Chapter 1: Overview of Housing Element Update 2023-2031

1.01 Introduction

This document serves as the Housing Element Update to the Santa Clara County General Plan for the planning period of 2023-2031 (2023 Update) and is Appendix No. 4 of the General Plan. The Housing Element is one of seven mandated elements of a jurisdiction's General Plan. Its content requirements are more detailed, extensive, and complex than other mandated elements

within the General Plan. This document addresses the housing-related subject matter required under State law.

This 2023 Update is organized into four chapters:

Chapter 1: Overview of Housing Element Update 2023-2031

Chapter 2: Housing Needs and Production

Chapter 3: Fifth Cycle Performance Review and Sixth Cycle Housing Strategies and Policies

Chapter 4: County Housing Strategies, Policies, and Programs

The 2023 Update primarily uses the same organizational structure as that of the 2015 Housing Element Update (2015 Update), an approach consistent with State Department of Housing and Community Development (HCD) preferences and guidelines. This technique allows the review of the 2023 Update to qualify for streamlined review, facilitating comparison with the previous update for purposes of the State's review, and provides for continuity from one update to the next. The content of the 2023 Update is based on the State's publication "*Building Blocks for Effective Housing Elements*" and related checklists provided for the purpose of locating content and relating it to the various requirements set forth in State law.

The main categories or types of information and analysis required in a Housing Element update are:

- Identification and analysis of existing housing needs and projected housing needs;
- A statement of goals, objectives, strategies, and policies relating to the maintenance, preservation, improvement, and development of housing;

- An analysis of the capacity of the existing General Plan and Zoning Ordinance to meet projected needs; and,
- A summary of housing programs and a five-year schedule of implementation measures.

The 2023 Update serves four additional important purposes:

- To document local housing needs in the context of existing County land use and growth management policies;
- To affirmatively further fair housing throughout Santa Clara County;
- To explain important components of planning policies in Santa Clara County, which has urban growth management policies that guide urban housing development to occur within cities and Urban Service Areas (USAs) to preserve open space and promote rural land use densities outside cities; and
- To document the many other ways, in addition to the approval of residential development, by which the County contributes significantly to meeting local and countywide housing needs.

1.02 Executive Summary

Planning Period for Current Update

This section provides an executive summary of key information and findings of the 2023 Update.

County Produced Housing Consistent with Regional Housing Need Allocation and Forecast for the 2015 Update

From 2015 through the end of 2022, 3,214 housing units were produced in the unincorporated county. This level of production meets and exceeds the 277 units assigned for the 2015-2022 planning period (fifth cycle) Regional Housing Needs Allocation (RHNA) by 2,937 units. In the 2015 Update, the County forecasted that permits would be issued for 2,082 units through 2022. Chapter 2

includes detailed information about the County's housing production in the last planning cycle.

Changes to Policy Direction and Strategies Proposed in 2023 Update

The Housing Element Update is a part of, and is required to be consistent with, the County's General Plan, including the countywide growth management policies, health and transportation elements, and relevant portions of other elements. The goals, strategies, policies, and implementation measures described in the 2023 Update are consistent with, and promote the goals and policies of, the overall General Plan. **However, with a RHNA assignment that has increased 1,028 percent from the previous cycle, from 277 units to 3,125 units, the County will need to make a few meaningful changes to the County's General Plan policies.** Furthermore, the County has added new strategies and policies to meet the challenges of present and future climate change impacts and to remedy long-standing systemic discrimination in housing policies and the inequitable outcomes of such policies.

The primary shift in the County's General Plan is to modify long-standing policies that confer long-range planning responsibilities for urban unincorporated pockets within the USAs (also known as unincorporated "islands") to the associated city jurisdiction. In October 2023, the County modified its General Plan to allow long-range planning for housing in these areas, especially where the city does not have a plan for annexation during a specific Housing Element planning period.

Aside from these necessary modifications, the existing housing strategies and policies are effective, and they provide a broad and comprehensive framework to guide planning and decision-making related to housing issues in the unincorporated county during the period of 2023-2031. Chapter 2 includes detailed information about

the County’s completed, ongoing, and new housing strategies and policies.

Regional Housing Needs Allocation Description

The County’s RHNA is based on a model and assumptions about projected growth in housing need determined by the regional Council of Governments, in this case the Association of Bay Area Governments (ABAG). The RHNA assignment for the unincorporated areas of the county for the 2023-2031 planning period is 3,125 housing units, a dramatic increase from the 277 units allocated for the previous, 2015-2022 planning period. This increase is due to the RHNA methodology developed by ABAG, which includes three important components:

1. The baseline allocation based on ABAG’s Plan Bay Area 2050 Final Blueprint;
2. Factors and weights for allocating units based on income categories (Access to High Opportunity Areas and Jobs Proximity); and,
3. Equity Adjustment based on the approach developed by ABAG’s Housing Methodology Committee.

Figure 1.1 shows the RHNA assigned to the County, by affordability categories.

Figure 1.1 RHNA County Assignment

County Capacity to Meet RHNA and Accommodate Necessary Housing

The 2023 Update includes detailed information and analysis to determine whether housing capacity exists within the existing General Plan and Zoning Ordinance to accommodate projected needs and production obligations assigned through the RHNA. Based on an evaluation of general housing capacity within urban unincorporated areas, combined with capacity on Stanford University lands as defined under the Stanford Community Plan and 2000 General Use Permit, the County has identified sites providing 110 percent more capacity than is required under the RHNA. This extra capacity is necessary to ensure that if one or more large sites identified at Stanford or within the City of San José USA do not result in housing development projects during the 2023-2031 planning period, the County will still have enough capacity to accommodate its RHNA target. The County expects that by selecting sites sufficient to meet twice its RHNA target, it will ensure development

opportunities remain available throughout the planning period, especially for lower- and moderate-income households, pursuant to Government Code Section 65863 (the No Net Loss Law). Chapter 3, section 3.05, and Appendix A includes the County sites inventory and more information on the County's ability to meet its RHNA assignment. Chapter 3, Section 3.03 includes more information on ABAG's process for determining the County's RHNA and Projected Housing Need.

Existing Housing Needs

Chapter 3 provides detailed demographic and other statistical information required by housing element law and the State's *Building Blocks for Effective Housing Elements*. The primary purpose is to describe and assess existing housing needs for the unincorporated area population. The existing needs analysis is distinct and separate from the RHNA target for projected housing needs, based on projected population and economic growth.

Table 1.1: Summary Capacity to Meet RHNA Allocation

Location	Affordable Units			Above Moderate Income (>120% of Area Median Income)	Total	
	Affordable Units Share	Very Low Income (<50% of Area Median Income)	Low Income (<50%-80% of Area Median Income)			Moderate Income (<80%-120% of Area Median Income)
San Jose	33%	739	370	384	3,025	4,518
Fruitdale/Santa Clara Valley Medical Center	100%	186	69	45	-	300
Pleasant Hills	16%	228	114	114	2,394	2,850
Hostetter Station	58%	325	187	200	514	1,226
Parkmoor/Burbank Neighborhood	18%	-	-	14	62	76
Alum Rock/East Foothills	17%	-	-	10	48	58
Cambrian Park	13%	-	-	1	7	8
Stanford	50%	336	252	252	840	1,680
Quarry Sites	50%	196	147	147	490	980
Escondido Village	50%	140	105	105	350	700
ADUs	25%	-	-	92	276	368
Total		1,075	622	728	4,141	6,566
<i>RHNA Assignment</i>		828	477	508	1,312	3,125
<i>Surplus Units</i>		247	145	220	2,829	3,441
<i>% of RHNA Target</i>		130%	130%	143%	316%	210%

Section 3.02 documents unincorporated area housing needs through a series of tables and analyses based on available population, demographics, and housing data. Section 3.03 provides detailed analysis of housing capacity in relation to the RHNA target for projected housing needs. Section 3.04 documents recent unincorporated housing development, and Section 3.05 further describes issues relating to housing development potential for the unincorporated areas. The conclusion of Chapter 3, Section 3.05, is that the County has the capacity to accommodate the projected housing needs in the unincorporated area, as determined by ABAG.

Evaluation of Governmental and Non-Governmental Factors and Constraints

Section 3.06 provides a broad review and evaluation of governmental factors that influence housing production and affordability. The section provides an overview of many topics, including land use policies and regulations referred to generally as “land use controls,” impact fees, accessory dwelling unit provisions, building codes, development and site improvement standards, fees and exactions, processing and permitting procedures, special needs housing, and code enforcement, among other subjects.

The County’s overall conclusions are that, in general, the County’s policies, regulations, permit processes, and related factors support housing development in the unincorporated areas. However, certain areas are identified as areas where the County can further streamline development review or increase housing development in the county. These areas include:

- Additional housing on the Stanford campus for graduate students, staff, faculty and other workers; and
- Updating the County General Plan policies to allow the County to plan for housing within urban unincorporated pockets that are

within the USA of an adjacent city and slated for future annexation.

Section 3.07 describes non-governmental factors influencing the production of housing, such as national and regional economic conditions, land costs, financing and mortgage industry trends, general labor and material costs, and similar information of relevance to the region and unincorporated Santa Clara County.

Compilation of Housing Programs, Projects, Studies, and Activities

Lastly, the Housing Element provides an overview of the most important housing programs, projects, studies, and activities intended to promote housing supply, rehabilitation, preservation, affordability, and a variety of other related goals and objectives, including programs that affirmatively further fair housing (AFFH). This compilation is contained in Chapter 4 of the 2023 Update and is based upon and modified from the 2015 Update.

Chapter 4 documents the County’s significant role in providing housing, especially affordable housing, despite only having land use authority over the limited amount of urban housing development that occurs within unincorporated areas. The County’s significant involvement in housing-related programs and its long-standing philosophy and commitment to regional solutions to housing needs is evident in the program summaries provided in Chapter 4. Most of the programs and activities in which the County participates provide important funding and services throughout the cities and unincorporated areas alike, meeting the needs of residents across jurisdictional lines.

The County has included an Assessment of Fair Housing (AFH) as Appendix L, which is intended to provide a holistic look – informed by data, maps, community input, and policy analysis – into the trends and factors affecting access to housing and opportunity on the basis

of protected characteristics under federal and state fair housing laws. The Housing Element must include such an AFH component as a result of Assembly Bill (AB) 686, a law passed by the California Legislature in 2018 to incorporate a duty to affirmatively further fair housing into state law.

1.03 Terminology Used in the 2023 Update

For purposes of the 2023 Update, the terms “County of Santa Clara” and “County” refer to the governing body and not the geographic area.

The terms “unincorporated Santa Clara County” and “unincorporated county” refer to the geographic area under the jurisdiction and land use authority of the County of Santa Clara. The terms “Santa Clara County” and “county” refer to the geographic region that consists of unincorporated areas of Santa Clara together with the 15 cities located within Santa Clara County. The terms “countywide” and “county as a whole” are synonymous with “Santa Clara County.”

The terms urban unincorporated “pocket” and “island” refer to unincorporated urban areas within USAs and surrounded by city boundaries, awaiting annexation by the surrounding city jurisdiction.

Lastly, the term “Urban County” consists of all unincorporated areas as well as the following jurisdictions that participate jointly in the HOME and Community Development Block Grant programs: Campbell, Los Altos, Los Altos Hills, Los Gatos, Monte Sereno, Morgan Hill, and Saratoga.

1.03a Terms and Acronyms

- **ABAG:** [The Association of Bay Area Governments](#). ABAG is the Council of Governments and regional planning organization for

the jurisdictions of the nine counties of the San Francisco Bay Area. ABAG is now organizationally merged with the Metropolitan Transportation Commission (MTC).

- **ACS:** American Community Survey. The ACS is a Census Bureau product that provides yearly demographic information, to supplement the decennial Census.
- **AFH:** [Affirmatively Furthering Fair Housing](#). The Federal Fair Housing Act requires HUD and recipients of federal funds from HUD to affirmatively further the policies and purposes of the Fair Housing Act.
- **AFH:** Assessment of Fair Housing. Jurisdictions are required to prepare an [Assessment of Fair Housing](#), which is a plan that examines barriers that people face in obtaining and keeping housing and measures that our jurisdictions can take to reduce these barriers and promote equal opportunity in housing.
- **AMI:** Area Median Income, as used for Federal and State funding purposes. For jurisdictions in Santa Clara County, including the unincorporated county, the Area Median Income in 2022 is \$168,500 for a household of four.
- **DoF:** [State Department of Finance](#). The DoF provides population estimates and projections by city and by county.
- **HCD:** The [State Department of Housing and Community Development](#). HCD reviews each jurisdiction’s housing element for compliance with State housing law.
- **HUD:** [U.S. Department of Housing and Urban Development](#).
- **MTC:** [Metropolitan Transportation Commission](#). The MTC is the Bay Area region’s transportation planning, coordinating, and financing agency. MTC is now organizationally merged with ABAG.

- **N/A:** “Not Applicable”
- **NDA:** “No Data Available.” Table cells marked with “NDA” are statistics that are not reported by the source agencies at the city or unincorporated area level of detail.
- **RHNA:** [The Regional Housing Needs Allocation](#). The RHNA is the projected housing need for jurisdictions, as allocated to each jurisdiction by ABAG.
- **SOI:** Sphere of Influence. A planning boundary outside of a city’s legal boundary (such as the city limit line) that designates the city’s probable future boundary and service area as determined by the Local Agency Formation Commission (LAFCO). Factors considered in a sphere of influence review focus on the current and future land use, the current and future need and capacity for service, and any relevant communities of interest.
- **USA:** Urban Service Area. Delineates areas currently annexed and provided with urban services; or areas that a city intends to annex in order to develop and provide urban services, as determined by LAFCO.

1.04 Housing Policy and Development in Relation to Smart Growth General Plan Policies and Climate Change Policies

The County’s housing-related policies reflect a smart growth approach to land use and development. The cities, County, and LAFCO have developed and implemented a system of urban growth management that has been in place since the early 1970s. Cities are generally responsible for planning and accommodating urban

growth and development, including higher-density housing, within cities and their USAs. Outside the USAs, the unincorporated rural areas are intended to remain in farmland, open space, natural resource protection, and low-density land uses that support the rural resource base. In these areas, the allowed density of development is low by necessity, due to the lack of urban services, and minimum lot sizes for subdivision are typically five acres or larger.

Since the previous update to the Housing Element, the County has embarked on a significant planning effort to preserve agricultural lands and operations as a means of bolstering regional resilience to the effects of climate change. This effort began with the development and adoption of the [Santa Clara Valley Agricultural Plan](#) (Ag Plan), which studied the local effects of sprawl development and trajectory of farmland loss in the region. The Ag Plan concluded that local greenhouse gas emissions increased by nearly 77 times when rural unincorporated farmland was developed.¹ This massive increase in emissions could be attributed to the increase in vehicle miles travelled (VMT) resulting from rural low-density residential development. The Ag Plan further concluded that, in addition to avoiding increased VMT as a result of residential sprawl, agricultural preservation in the county would also provide a rich opportunity for climate resilience. The County determined that the management of local agricultural lands can be optimized to sequester significant amounts of atmospheric carbon into the soil and provide enhanced climate resilience in the form of improved watershed management, wildlife habitat conservation, fire hazard mitigation, flood plain protection, groundwater recharge, erosion control, pest and disease management, and air quality regulation. Through the implementation of the Ag Plan, the County has revised and redoubled its

¹ See [Ag Plan Appendix G](#), Steve Shaffer (2016).

commitment to preventing sprawl development and to advancing smart growth policies from an affirmative rural land use perspective.

The County has also developed “Silicon Valley 2.0,” which consists of a [Climate Change Preparedness Decision Support Tool](#), a [Climate Adaptation Guidebook](#), and [high-resolution maps](#) showing areas throughout the county that are vulnerable to extreme heat, riverine flooding, sea level rise, storm surge, and wildfire. These resources support the entirety of the county with climate risk assessment, adaptation, and resilience planning. The County expects that the impacts of climate change will increasingly impact the location of residential development in the region, and that the County will increasingly bolster and rely upon its smart growth land use policies.

Within the USAs in the county, the urban unincorporated islands have long been identified by the cities, the County, and LAFCO for eventual annexation and incorporation. This policy reinforces the role of cities to plan for and accommodate new urban development within USAs. As the islands have been annexed, the unincorporated population has decreased by 37% from 1970-2010, while the total county population has increased by nearly 67%. Given the inevitable land use control by the City over these areas, the County policies have accorded indirect long-range planning authority in advance of annexation. Cities have therefore been responsible for planning infill development and higher-density housing in the USAs. Proposals by property owners for development of individual parcels within USAs also trigger the opportunity for the corresponding city to annex the property.

The methodology used by ABAG for determining the sixth cycle RHNA included and analyzed urban unincorporated pockets as the planning responsibility of the County, despite the expectation that

those parcels will need to be annexed to gain access to sewer and water services, which the County does not provide. Given the County’s longstanding collaborative policies with the cities and LAFCO, the County appealed ABAG’s methodology, but the appeal was denied.² Therefore, by necessity, the County’s approach to site selection for the 2023 Update reflects a departure from previous planning periods. Although annexation continues to be an expected prerequisite to any significant development within urban pockets, the County will now begin to plan for the projected housing needs in these areas. As needed and to accommodate this cycle’s RHNA assignment, the County has amended its General Plan in October 2023 to enable such long-range planning for urban development in the unincorporated islands. More information on ABAG’s approach to the urban pockets in its RHNA methodology is provided below in Section 1.06.

1.05 The County’s Special Role in Housing Production

Within the context of regional, long-standing growth management and smart growth policies, the County’s primary role in housing development has been providing financial and technical assistance to create more affordable, below-market rate housing and special needs housing through the County’s Office of Supportive Housing (OSH). Although the County’s role in issuing permits for affordable and multi-family housing development is limited, the County makes other significant contributions to housing affordability and development that are in line with AFFH guidelines, including, but not limited to:

² [ABAG appeal documents linked here.](#)

- funding for construction, rehabilitation, and preservation of affordable and supportive housing for special needs populations;
- providing rental subsidies to special needs populations;
- creating and assisting shelters with operating funds;
- providing financing for first-time and low-income homebuyers;
- offering and funding services to address housing discrimination and landlord-tenant dispute resolution;
- generating opportunities for new housing on surplus County-owned lands; and
- facilitating housing-related advocacy and education.

The County works in concert with non-profit organizations and local agencies, such as the Santa Clara County Housing Authority, to actively provide a wide variety of housing assistance countywide, not only within the unincorporated areas under the County's planning jurisdiction. These efforts include funding for non-profit affordable housing developers and local agencies to construct affordable housing, maintain affordable rents, and loans for rehabilitation. The County is also a significant funder of housing for residents who have special needs and receive other supportive services from the County, which include seniors and people with mental illnesses, substance abuse disorders, and HIV/AIDS. The County funds and provides emergency shelters, transitional and supportive housing, and housing for other special needs populations countywide. More information on the County's programs supporting housing production is provided in Chapter 4.

1.06 ABAG Allocation Methodology and Unique Aspects of County Planning

ABAG's housing allocation methodology and procedures apply to all nine Bay Area counties and 101 cities. In past cycles, the RHNA targets assigned to cities included the projected development of areas within the cities' Spheres of Influence (SOI), including unincorporated areas under the jurisdiction of counties. However, in a change of course, ABAG based the final RHNA methodology for this cycle on present-day jurisdictional boundaries instead of SOI and areas expected to be annexed. This change has the effect of significantly increasing the urban areas appropriate for higher-density development falling under the County's RHNA obligation, due to the existence of unincorporated islands slated for annexation and city development. This is how the County's sixth cycle RHNA target grew by 1,028% from the fifth cycle target.

ABAG, through an ad hoc Housing Methodology Committee comprised of local elected officials, staff, and other stakeholders, elected to use a RHNA allocation method titled "*High Opportunity Areas Emphasis & Job Proximity*." This model incorporates household data from the [Plan Bay Area 2050 Final Blueprint](#), the region's comprehensive land use, transportation, and housing plan, prepared by ABAG. A central feature of Plan Bay Area is the targeting of growth and infrastructure investment in existing developed areas near jobs and transit (Priority Development Areas, or PDAs). Plan Bay Area's focus on PDAs generally supplements and complements Santa Clara County's countywide urban growth management policies. The final RHNA methodology adopted by ABAG and approved by HCD intends to achieve five primary objectives: increase housing supply and mix of housing types; promote infill development and

socioeconomic equity; promote improved intraregional jobs-housing relationship; balance disproportionate household income distributions; and affirmatively further fair housing.³

Of the 441,176 total housing units assigned to the Bay Area region by the State, the County was allocated 3,125 units, which are further broken down by income category. In the past, ABAG's RHNA methodology generally allocated growth and housing need within a city's SOI to that city, resulting in a low RHNA target for the County, corresponding only to those unincorporated areas that are not within a city's SOI or within a City's USA boundaries within a SOI.

Historically, such methodology and its low allocation to the County have been appropriate given the County's limited role in approving and issuing permits for new housing development in urban areas. This approach was consistent with the County's General Plan policies, which have thus far provided that cities in Santa Clara County plan for and annex areas appropriate for urban development, particularly those lands within USAs, where development is already most feasible.

ABAG's new approach to RHNA methodology requires the County to plan for development in the urban unincorporated pockets. The more rural areas of the unincorporated county are not suitable for significant increases to the housing stock, due to the lack of municipal infrastructure like water and sewer service, but also due to the increased VMT, traffic, and emissions associated with sprawl development.

A notable exception to the County's General Plan policies is Stanford University's unincorporated Community Plan Area, which is for the most part located within Palo Alto's SOI and USA but has not and will not be annexed into Palo Alto because of a 1985 land use policy

agreement among the City of Palo Alto, the County, and Stanford University setting forth that academic land uses and lands held in reserve for future academic uses shall remain unincorporated. This agreement has resulted in the County having the long-range planning and permitting authority for the campus. Consequently, the responsibility of identifying housing opportunities and planning for growth and development on Stanford's academic lands appropriately resides with the County.

Housing element law requires that cities and counties take responsibility to plan for housing on lands under their planning authority and regulatory control. The County's 2023 Update therefore focuses on the unincorporated areas, in terms of population and demographic data and housing capacity and development potential – including, now, urban unincorporated pockets. However, the County has long recognized that housing needs and issues are regional in nature and require regional solutions. Therefore, the County has and will continue to administer most of its housing programs, activities, and projects on a countywide basis, not only for the unincorporated areas under its planning jurisdiction.

1.07 Sustainable Communities Strategy and Plan Bay Area

The Bay Area's implementation of Senate Bill (SB) 375 is its Sustainable Communities Strategy, which is an important component of [Plan Bay Area 2050](#). Plan Bay Area 2050 provides for regional growth through 2050 and beyond by focusing on transportation infrastructure investment and housing capacity within the region's PDAs. PDAs are areas where local jurisdictions believe there is

³ https://abag.ca.gov/sites/default/files/documents/2022-04/Final_RHNA_Methodology_Report_2023-2031_March2022_Update.pdf

capacity and demand for focused growth in population and infrastructure. Most PDAs are centered around existing transportation infrastructure. Relatively little growth is expected or planned for in the peri-urban⁴ or rural areas of the region. However, ABAG and the State recognize that for households to be successful, there is a strong need for access to opportunities. These opportunities may not be available in the defined PDAs. To that end, the State has mapped High Opportunity Areas, where jurisdictions are encouraged to add additional housing, particularly affordable and diverse housing unit types.⁵

In Santa Clara County, the High Opportunity Areas cover primarily high-income jurisdictions and neighborhoods. These areas only partially overlap some of the urban unincorporated pockets within USAs. Three significant unincorporated areas that the County has identified for housing development during the 2023-2031 cycle are High Opportunity Areas:

- Stanford University campus
- Cambrian Park
- Hostetter Station

In addition, the Pleasant Hills site is adjacent to a High Opportunity Area and is significant enough in size to support affordable and diverse housing types. The County will seek a greater share of affordable housing within new development in these areas. More detailed information on these sites can be found in the site inventory, Appendix A.

⁴ The term “peri-urban” refers to an area surrounding an urban area, where urban development meets countryside, in contrast to suburban areas.

In addition to the High Opportunity Areas and PDAs, Plan Bay Area 2050 provides eight strategies to improve housing across the Bay Area, using ABAG’s “Hx” convention for housing strategies:

- H1.** Further strengthen renter protections beyond State law.
- H2.** Preserve existing affordable housing.
- H3.** Allow a greater mix of housing densities and types in Growth Geographies.
- H4.** Build adequate affordable housing to ensure homes for all.
- H5.** Integrate affordable housing into all major housing projects.
- H6.** Transform aging malls and office parks into neighborhoods.
- H7.** Provide targeted mortgage, rental, and small business assistance to Equity Priority Communities.
- H8.** Accelerate reuse of public and community-owned land for mixed-income housing and essential services.

To the extent feasible and appropriate, the County endeavors to further these strategies through this 2023 Update and future updates to the County Housing Element.

1.08 Community Participation and Outreach

Community participation and outreach played a critical role in the development of the 2023 Update. An iterative engagement program ensured stakeholders, community representatives, and members of the public were given opportunities to review project progression and provide input to influence the development of core components

⁵ The State mapping tools used to delineate different levels of opportunity is [available here](#).

of the plan. Consultation with stakeholders and the broader community began in June 2022 and concluded in Spring 2023.

Extra care was taken to engage a diverse range of community members representing various economic and cultural backgrounds. To reach a broad cross-section of the community, advertisements were placed on social media in Spanish, Simplified and Traditional Chinese, and Vietnamese. The County also provided interpretation services at both public meetings. All stakeholder organizations consulted throughout the process were encouraged to serve as project champions and to communicate engagement opportunities through their networks (see the full list of stakeholder organizations further in this chapter). These organizations included housing advocacy groups, seniors’ groups and other community-based organizations representing vulnerable populations. Additionally, community-based organization CARAS was onboarded to conduct surveys and an in-person listening session with Spanish-speaking residents and farm workers in the southern portion of the county. The online survey collected demographic information from participants through an optional question. The results can be found on page 42.

The project’s phased engagement approach is demonstrated in Figure 1.2 and described in detail below.

Figure 1.2: Housing Element Update Community Participation and Outreach Process

1.08a Phase 1: Information Gathering

The purpose of Phase 1 was to understand current conditions through information gathering with stakeholders and the public. Engagement included a series of two stakeholder workshops, two community workshops, and a community survey. Feedback from the community was used to identify opportunities and challenges that could be addressed in the Housing Element Update. Participant feedback informed the County’s review of previous housing strategies and helped to identify new strategies for discussion in Phase 2.

1.08b Phase 2: Draft Policies

In Phase 2, the project team returned to stakeholders and the community with draft strategies and policy goals developed based on the information gathered in Phase 1. The project team hosted two stakeholder workshops, one community workshop, and one listening session. Participants were asked to provide feedback to refine the strategies and policy goals prepared by the project team. Feedback was used to inform the development of the draft Housing Element Update document for public review in Phase 3.

1.08c Phase 3: Public Release

The third phase of outreach occurred following the release of the draft Housing Element Update. The public review and comment period began on March 21, 2023, and lasted 30 days, as required under State law. During this time, mailers were sent to all property owners within 300 feet of parcels identified in the site inventory. All comments received during this period were reviewed and considered carefully by County staff. Where appropriate, clarifications and additional information were incorporated into this document in response to public comments. Such amendments were made during the 10-day period following public comment, as required under State

law. A table summarizing the public comments can be found in Appendix J.

1.08d Additional Engagement

Community feedback from similar Santa Clara County projects has also been considered. These projects are the [Stanford Community Plan](#) and [Let’s Talk Housing](#). While separate from the Housing Element engagement process, housing-related input from these projects has been considered by County consultants and staff.

Stanford Community Plan (SCP): Stanford lands within unincorporated Santa Clara County are governed by policies in the Stanford Community Plan (SCP). Development within the SCP area is currently regulated under the 2000 General Use Permit (GUP). Through several outreach efforts conducted in association with a new General Use Permit application, it was brought to the Board of Supervisors’ attention that updates to the SCP are necessary. Despite Stanford withdrawing its GUP application in 2019, the County is currently proceeding with revisions to the SCP to, among other goals, support housing development on campus. The final SCP update will be completed along with the Housing Element Update.

The SCP includes chapters that guide the development of the Stanford academic lands, such as, Growth and Development, Land Use, Housing, Circulation, Open Space, Resource Conservation, and Health and Safety. Many of these chapters include strategies, policies, and implementation measures supporting housing development. As such, the updates to the SCP refer to the County’s Housing Element and this 2023 Update.

Outreach efforts and public meetings regarding the SCP are listed in Table 1.2:

Table 1.2: Outreach Efforts and Public Meetings

MEETING	AUDIENCE(S)

Let’s Talk Housing: On August 11, 2021, the Santa Clara County Planning Collaborative held a virtual countywide community meeting to provide an opportunity for community members to learn more about upcoming Housing Element updates and gain a better understanding of how they can participate in the preparation process. The meeting was targeted towards community members

living in the Cities of Gilroy and Morgan Hill, and unincorporated areas of the county.

During the meeting, staff from the Santa Clara County Planning Collaborative provided an overview of the Housing Element followed by breakout rooms for Gilroy, Morgan Hill, and the County, where each jurisdiction could speak towards the current state of housing, RHNA targets, and goals for the jurisdiction’s upcoming respective Housing Element updates. Timelines for the County’s 2023 Update were also shared.

1.09 Communication Methods

Communication to promote the 2023 Update, raise awareness, and encourage participation, was a critical component of the engagement program. The communication methods utilized are set forth below in Table 1.3.

Table 1.3: Communications Methods

DATE	MEDIA	PURPOSE
June 27, 2022	Nextdoor* Facebook* Twitter Instagram Stories	Prepare community for upcoming outreach meetings and promote webpage
July 1, 2022	County of Santa Clara Press Release to Media Distribution List and County Webpage	Community encouraged to participate in the process from July – September 2022
July 14, 2022	Nextdoor* Facebook* Twitter	Promote Community Workshops No. 1 (July 19) & No. 2 (July 21)
September 5, 2022	Facebook* Twitter Instagram	Promote Community Meeting No. 3 (Sept 7)

August 31, 2022 September 2, 2022 September 7, 2022	E-Blast (issued to participants registered for updates through the project website)	Promote Community Meeting No. 3 (Sept 7)
Ongoing	Project Website*	Provide a schedule of upcoming meetings and events

**Notes communications offered in Simplified Chinese, Spanish, and Vietnamese*

1.10 Engagement Methods

Community participation and outreach was implemented through a multi-method approach to maximize opportunities for involvement from local stakeholders and a broad cross-section of the community. Recognizing comfort level with in-person meetings following the COVID-19 pandemic, most of the public engagement was completed virtually. The following section describes the engagement methods

used to involve the public in the development of this Housing Element Update.

1.10a Project Website

The [project website](#) serves as the central portal for all Housing Element Update information. The landing page provides a concise overview of the project purpose and information about what the Housing Element is intended to accomplish. The website also

includes tabs to navigate to important information, such as, upcoming events, descriptions of major components to the update, data on housing trends in the county, links to previous Housing Element updates and the survey and registration form.

Social media posts, emails, and presentations all directed members of the community to the website for updated project information.

1.10b Stakeholder Workshops

The County of Santa Clara compiled a list of stakeholders representing service providers, housing advocates, affordable housing developers, government agencies, county departments, environmental advocates, and more. The County also included stakeholders involved in the Applicant Roundtable (representing the County’s most frequent applicants), stakeholders suggested by the County Office of Supportive Housing, and elected and/or appointed

officials and their representatives. Stakeholders were invited to a series of workshops to provide feedback to the project team at key milestones. Formal invitations were issued to stakeholders prior to each workshop to encourage participation. Attendees were asked to act as ambassadors for the project, sharing community meeting opportunities through their networks. Approximately 52 organizations were represented at the stakeholder workshops and are listed below.

Participating Organizations:

- Adobe Services
- Allied Housing
- Bay Area Building Industry Assn.
- Boys & Girls Club of Silicon Valley
- Burbank Community Association
- CARAS
- Charities Housing
- City of Gilroy
- City of Morgan Hill
- City of Santa Clara
- County of Santa Clara Agricultural Division
- County of Santa Clara Dept. of Aging and Adult Services
- County of Santa Clara Dept. of Planning and Development
- County of Santa Clara Dept. of Public Health
- County of Santa Clara Office of the County Counsel
- County of Santa Clara Office of Supportive Housing
- Habitat for Humanity East Bay/Silicon Valley
- Housing Choices
- Housing Trust Silicon Valley
- Latinos United for a New America
- Law Foundation of Silicon Valley
- MH Engineering
- MidPen Housing
- Midpeninsula Regional Open Space District
- Milligan Land Company
- New York Life
- Rebuilding Together Silicon Valley
- Ruggeri-Jensen-Azar
- San Antonio Hills Homeowners Assn.
- San Martin Neighborhood Assn.
- Santa Clara County Housing Authority
- Santa Clara County LAFCO
- Santa Clara Valley Open Space Authority

- County of Santa Clara Office of Sustainability
- County of Santa Clara Parks and Recreation Dept.
- Dividend Homes
- Eden Housing
- Gilroy Dispatch
- Gilroy Historical Society
- Green Foothills
- Greenbelt Alliance
- Silicon Valley at Home (SV@Home)
- Silicon Valley Coalition for the Unhoused
- Silicon Valley Independent Living Center
- Silicon Valley Leadership Group
- South Bay YIMBY
- Stanford University
- West Valley Community Services

All workshop materials – including the presentation slide decks, meeting recordings, and meeting summaries – were posted to the project website for public review. All summaries were translated into Spanish, Simplified Chinese, and Vietnamese, with some translated into Tagalog. Summaries of the stakeholder workshops can be found in Appendix B.

1.10c Community Workshops

Three community workshops were hosted over the course of the engagement program, to invite members of the community to provide input in Phase 1 (Q2 2022) and Phase 2 (Q3 2022). Community workshops were advertised through stakeholder partners, the County’s social media channels (Facebook, Nextdoor, Instagram, and Twitter), and the County website. Interpretation services were made available at all community workshops in Spanish, Vietnamese, Cantonese, and Mandarin. Email invitations were issued to those who registered for updates on the project website. A total of 97 participants attended community workshops over the course of the engagement program.

All workshop materials were also made available on the project website for public review. All summaries were translated into Spanish,

Simplified Chinese, and Vietnamese, with some translated into Tagalog. Summaries of the workshops can be found in Appendix B.

1.10d Community Survey

A community survey was available on the project website from June 21 to August 17, 2022, to seek information on community housing priorities as part of *Phase 1: Information Gathering*. The survey asked participants to rate a series of housing priorities for the 2023 Update on a rating scale also known as a Likert scale. Participants were able to add additional housing priorities not included in the survey for consideration. The survey was provided in English, Chinese (simplified and traditional), Spanish, and Vietnamese. A total of 167 survey responses were collected. Results of the survey are found under [Online Survey Results](#) on page 42.

1.10e Community-Based Organizations

Community Agency for Resources, Advocacy and Services ([CARAS](#)) was contracted to support the County in outreach to Spanish-speaking residents and farmworkers in South Santa Clara County. Established in 2014, CARAS provides supportive services to the community including housing assistance programs, such as rental and deposit assistance to low-income families, especially those on the verge of eviction. In addition to housing programs, CARAS provides youth case management services, public benefit navigation services, community financial literacy training, expungements of criminal records, combatting housing discrimination and community forums addressing legal barriers to re-entry. CARAS also plays a role in supporting undocumented community members in learning about their rights, available resources, and information on current immigration policies.

CARAS’s involvement in the 2023 Update included the following outreach initiatives:

- Promoting the County of Santa Clara Housing Element on social media platforms;
- Administering and promoting the community survey;
- Facilitating a listening session for community members at the CARAS office; and
- Participating in community and stakeholder workshops.

Efforts were made to partner with Vietnamese American groups and associations within the county, including the Vietnamese American Service Center. However, responses from the contacted groups and associations were not received. To encourage participation from Vietnamese and other non-English-speaking community members, promotional efforts, the community survey, and meeting summaries were translated into Simplified Chinese, Spanish, and Vietnamese. Additionally, interpretation services were provided at community workshops in Cantonese, Mandarin, Spanish, and Vietnamese.

1.11 Outreach Events

Table 4 below provides the Stakeholder and Community Workshops hosted over the duration of the Housing Element Update’s engagement program. The table identifies the dates of the workshops, presentation focus, and purpose of discussion.

Stakeholder meetings were inclusive of various organizations operating in both incorporated and unincorporated Santa Clara County. The list of stakeholders was developed by the County and was inclusive of housing developers, housing advocacy organizations, and a host of community-based organizations. All participating groups have been listed previously in this chapter.

Community meetings were open to the general public. Advertising was conducted via social media and through invitations issued to stakeholders and through the project website’s listserv. Stakeholders were encouraged to invite their networks to attend and participate.

Table 1.4 Stakeholder and Community Workshops

EVENT	DATE	WORKSHOP FOCUS
Phase 1		
Stakeholder Workshop No. 1	July 6, 2022	Presentation delivered to stakeholders to introduce the 2023 Update.

Special Stakeholder Workshop: Development Focus	August 2, 2022	<p>Special meeting seeking input from the development and housing advocates on methods to streamline and/or simplify the development process.</p> <p>Presentation delivered to review government and non-government related factors creating barriers to housing production.</p>
Phase 2		
Stakeholder Workshop No. 2	August 17, 2022	<p>Presentation delivered to review strategies from the previous update to the Housing Element (2015 – 2022) identifying priority areas where new strategies are needed.</p> <p>Discussion seeking feedback on how previous strategies could be updated to address current and forecasted</p>

EVENT	DATE	WORKSHOP FOCUS
		conditions. Input sought to get participant suggestions for new strategies related to housing production, housing affordability, access to housing, homelessness, and climate change.
Stakeholder Workshop No. 3	August 29, 2022	<p>Presentation to review policy goals to address six priority housing challenges: housing production, housing affordability, access to housing, AFFH, homelessness, and climate change.</p> <p>Discussion focused on confirming or refining proposed policy goals and seeking ideas on new policy goals to address the priority housing challenges.</p>
Community Workshop No. 3	September 7, 2022	<p>Presentation to review feedback heard to-date, provide a refresh on the 2023 Update, introduce policy goals to address six priority housing challenges: housing production, housing affordability, access to housing, AFFH, homelessness, and climate change.</p> <p>Discussion focused on confirming or refining proposed policy goals and seeking ideas on new policy goals to address the priority housing challenges.</p>
CARAS Listening Session	October 24, 2022	<p>A listening session hosted by CARAS and the County for Spanish-speaking community members and farmworkers in south county.</p> <p>A brief presentation provided information on the 2023 Update and sought feedback on five priority policy goals.</p>

1.12 Summary of Feedback

Over the course of the engagement program, recurring themes emerged from the feedback received the series of stakeholder workshops and community workshops, and the community survey. These recurring messages from participant feedback have been grouped into eight key themes. Each theme is described below with an explanation of how the County is addressing each issue in the 2023 Update.

1.12a Housing Affordability

Stakeholders and members of the community challenged the County to consider the definition of housing affordability to address the housing needs of people with extremely low-income (ELI), seniors on fixed income, and people living with chronic illness. Participants noted the County should prioritize, streamline, and incentivize the development of units that are affordable across a range of income levels. Stakeholders cited reducing requirements, taxes, and exactions, to make affordable housing development more feasible. New affordable housing ought to be in areas with amenities and services and dispersed throughout the County to avoid concentrations of poverty. Policies ought to be developed to support low-income residents through anti-displacement initiatives and expanded tenant protections like stricter rent control, rent subsidies, tax credits, just cause eviction policies, and tenant right to counsel.

Response to Feedback: The policies under Strategies 1, 2, and 3 address the support for housing affordability. The existing policies (HG1-3, HG1-4, HG1-5, HG3-1, and HG3-2) prioritize funding for building more very low- and low-income housing. Under Strategy 2, the County has policies to work with other jurisdictions and non-government entities to facilitate the building of affordable housing across the jurisdictions in the county. The opportunity sites identified

for the 2023-2031 planning period are dispersed across the county to avoid concentration and many of them are in areas determined by the State to be High Opportunity Areas.

1.12b Access to Housing

Participants noted that diverse housing types and informational resources are needed to improve access to housing in the county. Policies are needed to promote creative housing solutions, such as the adaptive reuse of underutilized warehouses and office buildings for residential development and streamlining and incentivizing affordable ADU development and microhomes. Programs are needed to promote the development of housing that considers universal design standards for seniors and people with disabilities. The County can also play an important role in providing information and education to those in need of affordable housing options or access to financial and legal aid.

Response to Feedback: The existing and updated policies under Strategies 1 and 4 will improve access to housing. Updates to policies under Strategy 7 (Ending Homelessness) and Strategy 6 (Special Needs Housing) also address these concerns.

1.12c Housing Production / Supply

Participant feedback highlighted the need to streamline the development process to facilitate housing development with incentives, particularly for affordable housing. Suggestions included policies for land dedication, zoning overlays, rezoning, percentage-based affordable housing dedications, and funding for affordable housing development. The County can also consider reducing processing times, fees, and exactions, rounds of application reviews, and pre-development meetings, to reduce developer expenses related to development timelines and the application process. Some participants recommended changes to the County's General Plan to

allow for development through conforming zoning and revised densities. Dialogue and collaboration with LAFCO and city jurisdictions were also suggested to ease the annexation process and stimulate development in the cities' USAs. Finally, some suggested that the County could tailor incentives to sites deemed desirable for affordable housing development or consider partnerships with community developers.

In addition to new development, participants encouraged the County to consider programs and policies to preserve the existing affordable housing stock. Options include retrofit programs and rebates for property owners to keep affordable units and rental units in a state of good repair. The County should also conduct research to analyze threats to the existing housing stock and respond with safeguards tailored to address such threats.

Response to Feedback: Significant updates to policies under Strategy 1 (Balanced Housing Supply) will allow for the County to plan for housing within urban unincorporated pockets and help to address housing supply concerns within the jurisdiction of the unincorporated county.

1.12d Homelessness

The County received feedback regarding programs and policies that can address homelessness. Input centered around support programs to assist with re-entry and transition back into stable housing. A case management approach can also be utilized as a key protective measure to address chronic homelessness in the community. The [Community Plan to End Homelessness](#) can also provide assistance to the County and should be integrated into the Housing Element Update.

Response to Feedback: Strategy 7 (Ending Homelessness) has been significantly updated to add new policy directions and planning effort to reduce homelessness countywide.

1.12e Services

Participants noted that infrastructure and community services are needed to support the development of new housing within this Housing Element cycle. Sufficient municipal services are needed to accommodate housing in unincorporated areas of the county. This includes drinking water, wastewater treatment, and stormwater management infrastructure. Some participants raised incidents of recent sewage runoff in Morgan Hill and San Martin as a particular concern. A range of transportation options are also needed to support new housing development and reduce reliance on personal vehicles. This requires the County to coordinate with transit providers to increase service in newly developed areas and to allocate funds towards the creation of cycling and pedestrian facilities.

Several comments were received related to the need for soft services to support new development. Soft services can range from support (e.g., social services, healthcare, and community services) to amenities (e.g., grocery stores and recreation facilities). Development should be in proximity to parks and open spaces for the well-being of residents. Finally, the County heard about the need for development to occur in the proximity of employment areas to facilitate opportunities for residents to easily commute to and from work.

Response to Feedback: Policies HG1-6 & HG1-7 under Strategy 1 address access to services and amenities in neighborhoods that have historically had low public infrastructure investments.

1.12f Environment & Climate Change

Feedback highlighted the importance of protecting the environment, reducing contributions to climate change, and planning for climate resiliency. Several participants urged the County to focus development in existing urbanized areas to avoid the conversion of valuable natural habitat, open space, and agricultural land into residential uses. For some, allowing more development in communities like Gilroy and Morgan Hill is a concern as it may stimulate unintended growth. New development should also avoid fire- and flood-prone regions of the county. Stakeholders and the community suggested that the County consider policies that direct new development to be energy-efficient and adhere to green development standards to reduce greenhouse gas (GHG) emissions. Such policies should apply to new development, renovations, and existing buildings. Resilience and climate change adaptation were also suggested by participants who encouraged the County to consider policies to address climate and environmental justice for communities of color and low-income populations.

Response to Feedback: Strategy 10 has been added to the 2023 Update to address housing and climate change, including reducing risks from extreme weather and reducing the GHG footprint of new and existing housing.

1.12g Equity

Participant feedback indicated that the Housing Element Update should make efforts to address inequity and unequal access to housing in the county. For example, some expressed the County should apply AFFH policies created by HUD. The policies should seek to rectify injustices related to economic segregation, racial segregation, and historic redlining in various communities in the county (e.g., Burbank and Seven Trees). Racism in housing should be addressed specifically and not covered under blanket terminology

related to discriminatory practices. It was also recommended that the County create policies to provide housing or housing support programs for formerly incarcerated people and undocumented immigrants.

Response to Feedback: Strategy 5 has been updated with new policies that will identify key neighborhoods in need of improved access to amenities and services in those communities. The County will also support other jurisdictions in implementing fair housing programs through the Office of Supportive Housing.

1.12h Farmworker Housing

Stakeholders and community members noted that farmworker housing is critical to supporting the county's agricultural economy. Suggestions included providing streamlined permitting and financing to support the development of farmworker housing in proximity of agricultural operations. Along with farmworker housing production, community feedback included suggestions to ensure that services such as water and sanitary infrastructure are extended to rural areas to support increased farmworker housing.

Response to Feedback: During the previous Housing Element cycle, the County significantly streamlined the planning approval process for agricultural employee housing and expanded the available options for establishing such housing in unincorporated areas. Strategy 8 addresses the ongoing need for such housing by maintaining and expanding the supply of homes available to farmworkers.

1.13 Online Survey Results

A community survey was launched simultaneously with the project website to collect insights from the community and register participants for the email list to receive updates on upcoming meetings.

Figure 1.3: Housing Issues Priority Rating Exercise (average scores out of five from 167 responses)

The simple survey, taking less than ten minutes to complete, asked participants to rank the importance of six predetermined housing issues and provide information on any additional housing issues to be addressed in the 2023 Update. The survey also asked for optional demographic information to assist in understanding the reach to various communities. The survey was made available in Simplified Chinese, Spanish, and Vietnamese. Three participants completed the survey in Vietnamese, one participant completed the survey in Simplified Chinese, and 48 participants completed the survey in Spanish as a part of CARAS’s efforts to reach the Spanish-speaking communities in the southern parts of the county.

In total, 167 surveys were completed. The following illustrates the results of the survey.

1.13a Survey Summary of Housing Priorities

Participants were asked to evaluate the importance of six predetermined housing challenges facing the county. The question

provided a scale of one to five to rate the individual priority of each listed challenge. One indicated the least amount of priority and five indicated the highest level of priority. Figure 1.3 shows the results of the exercise.

While all six issues were rated relatively high, out of a maximum of five, “housing affordability” was rated the highest priority to be addressed by the Housing Element. This was followed by “Access to Housing/Homelessness” as the second highest priority, with “Diversity in Choices” and “Access to Services and Amenities” tied for the third highest priority. “Fire Safety and Climate Resilience” and “Urban Sprawl” rounded out the priorities in fourth and fifth place, respectively.

SURVEY RESPONDENT ETHNICITY

Figure 1.4. Participant Ethnicity (out of 99 responses - 20 participants chose not to answer)

1.13b Additional Housing Priorities

In addition to the ranking exercise, participants were asked to identify additional housing challenges that should be addressed through the Housing Element Update. Input from this question has been included into the key themes in [Summary of Feedback](#).

SURVEY RESPONDENT INCOME LEVEL

Figure 1.5. Participant Income level (out of 80 responses - 39 participants chose not to answer)

1.13c Participant Demographics

To conclude the survey, participants were asked to provide demographic information, including their income, ethnicity, and zip code. This information demonstrates the reach of engagement. The demographic questions were made optional to respect the privacy of participants.

Figure 1.6: Participant Zip Codes

The majority of participants surveyed (53%) identified as persons of color, with 49% of participants making less than \$75,000.00 per year. Survey participants indicated their top issues of concern were housing affordability, access to housing, and diversity in choices. Figures 1.4, 1.5, and 1.3 show the results in visual detail.

1.14 Ongoing Reporting, Referral Requirements, and Program Maintenance

In 2009, the State standardized annual reporting regarding housing development and programs. The housing production statistics and program progress data in the 2023 Update rely upon and are consistent with the County's annual Housing Element Progress Reports. County staff will continue to be engaged with monitoring and reporting requirements over the duration of the Housing Element's sixth cycle.

1.15 Consistency of the Housing Element with Other Elements of the General Plan

The Housing Element is a component of the County's General Plan and State law requires that updates to a Housing Element be consistent with other Elements of the General Plan. Housing Elements are updated more frequently than other Elements, which could lead to internal inconsistencies.

For the 2023 Update, to meet the County's RHNA target resulting from ABAG's new allocation methodology discussed above, the County will need to amend certain policies in its General Plan. Specifically, the County will need to modify its General Plan policies

that confer to cities long-range planning authority within their respective SOIs and USAs. This is especially true for urban unincorporated pockets under the County's jurisdiction, which the County will now need to plan for in order to meet its RHNA target.

Aside from the General Plan amendments that are required to accommodate ABAG's new approach to RHNA methodology, the policies included in this 2023 Update primarily update existing strategies and policies from the previous 2015 Update and are consistent with the rest of the County's General Plan. The 2023 Update does include Strategy 10: *Plan for Climate Change Impacts on Existing and Future Housing Stock*, which is a new strategy that strengthens the connection and consistency between the Housing Element and the other relevant provisions of the County's General Plan.

Additionally, under State law, every resolution amending the General Plan must contain a section attesting to an evaluation and conclusion of consistency with the General Plan. In addition to this requirement, the County will use the Annual Report process to review consistency of the Housing Element with other aspects of the General Plan as Housing Element programs are implemented and as other General Plan Elements are updated.

Chapter 2: Housing Needs and Production

2.01 Introduction

Santa Clara County covers approximately 1,300 square miles that include significantly varied urban, rural, and academic communities. This chapter contains an assessment of the various factors that influence and affect the unincorporated county’s housing needs. Understanding the housing needs of the communities in unincorporated areas of the County is the first step in the development of housing policies and programs that further the County’s housing goals. Utilizing data collected from the U.S. Census Bureau, California Department of Finance, ABAG, and others, the County housing needs assessment takes stock of factors that illustrate existing housing needs as well as those that help the County identify and plan for future trends.

Household income categories used in this Chapter are based on those established by U.S. Department of Housing and Urban Development (HUD) for use in its Section 8 Housing Choice Voucher Program. The following categories refer to AMI, or Area Median Income, as used for Federal and State funding purposes, which was \$168,500 in 2022 for a household of four in Santa Clara County.

Extremely Low-Income (ELI): A household with income less than 30% of AMI.

Figure 2.1 Santa Clara County Urban and Rural Areas⁶

Very Low-Income (VLI): A household with income less than 50% of AMI.

Low-Income: A household with income less than 80% of AMI.

Moderate-Income: A household with income less than 120% of AMI

Above Moderate-Income: A household with income over 120% of AMI.

⁶ “Urban” areas consist of the cities and the urban-base zoning districts within unincorporated areas.

“Rural” areas consist of the rural based zoning districts in the unincorporated areas.

Income category determinations are made with respect to both AMI and household size. The income category annual income maximums by household size for Santa Clara County are shown in Table 2.1:

2.02 Unincorporated County Housing Needs

A variety of statistical and demographic data provide the foundation for documenting and analyzing housing needs. State law requires local jurisdictions to analyze their communities' housing needs, in part through an examination of such data. ABAG has compiled the required demographic, economic, and housing stock data on behalf of the County, and all other member jurisdictions, in the form of a Housing Needs Data Report. The Housing Needs Data Report for unincorporated Santa Clara County prepared on April 2, 2021, and can be found in Appendix C.

One area of data collection and analysis, overall population characteristics, merits additional context here.

The Bay Area is the fifth-largest metropolitan area in the nation and has seen a steady increase in population since 1990, as has Santa Clara County as a whole. As seen in Table 2.2, however, the unincorporated areas of the County have seen an inverse trend in population over the same period.

From 1990 to 2000, the population in the unincorporated county decreased by 6.0%, then decreased by an additional 9.9% during the first decade of the 2000s. Between 2010 and 2020, the population decreased by 3.3%. In 2020, the estimated population of the

unincorporated county was 86,989, which made up roughly 4.4% of the population of Santa Clara County as a whole.⁷

The overall decrease in population is due in large part to previously existing urban unincorporated areas of the County being incrementally annexed into adjacent cities, over time. This dynamic, although not unique to Santa Clara County, is particularly pronounced here and factors significantly into where and how the County plans for future housing development on unincorporated lands.

⁷ To compare the rate of growth across various geographic scales, Figure 2.2 shows population for the jurisdiction, county, and region indexed to the

population in the year 1990. This means that the data points represent the population growth (i.e. percent change) in each of these geographies relative to their populations in 1990.

Table 2.1: 2022 Household Income Category Thresholds by Household Size

Income Category	Household Size							
	1	2	3	4	5	6	7	8
ELI	\$22,300	\$25,500	\$28,650	\$37,850	\$34,400	\$36,950	\$39,500	\$42,050
VLI	\$37,150	\$42,450	\$47,750	\$53,050	\$57,300	\$61,550	\$65,800	\$70,050
Low	\$59,400	\$67,900	\$76,400	\$84,900	\$91,650	\$98,450	\$105,250	\$112,050
Moderate	\$88,600	\$101,300	\$113,950	\$126,600	\$136,750	\$146,850	\$157,000	\$167,100

Note: the "Above Moderate-Income" category is, by definition, inclusive of any income level above the "Moderate-Income" thresholds, as determined by household size.

Source: California Department of Housing and Community Development, State Income Limits for 2022.

Table 2.2: Population Growth Trends

Geographic Area	1990	1995	2000	2005	2010	2015	2020
Unincorporated Santa Clara County	106,173	107,705	99,813	97,844	89,960	88,323	86,989
Santa Clara County as a whole	1,497,577	1,594,818	1,682,585	1,752,696	1,781,642	1,912,180	1,961,969
Bay Area	6,020,147	6,381,961	6,784,348	7,073,912	7,150,739	7,595,694	7,790,537

Source: California Department of Finance, E-5 series

Figure 2.2 Population Growth Trends

Source: California Department of Finance, E-5 series Note: The data shown on the graph represents population for the jurisdiction, county, and region indexed to the population in the first year shown. The data points represent the relative population growth in each of these geographies relative to their populations in that year.

For some jurisdictions, a break may appear at the end of each decade (1999, 2009) as estimates are compared to census counts.

DOF uses the decennial census to benchmark subsequent population estimates.

2.02a HCD’s Projection of Regional Housing Needs

California State Government Code Section 65584(a) directs HCD, in conjunction with the State Department of Finance, to “determine the regional share of the statewide housing need” for each region of the state, or Regional Housing Needs Allocation (RHNA). These housing needs determinations are then forwarded to the councils of government in each region of the state.

HCD’s regional RHNA numbers are developed using considerations including household size and growth, rate of household formation, and both existing and optimal vacancy rates.⁸ In the Bay Area, ABAG is responsible for allocating the

⁸ Govt Code Section 65584.01 (c) (1) (A)

regional target number to cities and counties throughout the Bay Area. The resulting RHNA goals for cities and counties are based on HCD’s regional growth forecasts and are derived from the most current assessment of future housing needs by jurisdiction. ABAG’s primary assessment is through Plan Bay Area 2050, the regional long-range strategic plan that covers the four interrelated planning elements of housing, the economy, transportation, and the environment. Plan Bay Area 2050 was adopted in October 2021 and covers the period from the present through 2050.

2.02b ABAG’s Projection for Jurisdictional Housing Needs

ABAG’s final RHNA methodology, adopted in December 2021, forecasts the 2023-2031 regional housing needs for each jurisdiction in the Bay Area. Development of ABAG’s RHNA methodology was guided by the statutory requirements that the RHNA meet five objectives and be consistent with the forecasted development pattern from Plan Bay Area 2050. The five statutory objectives of RHNA can be summarized as:

Objective 1: Increase housing supply and mix of housing types, tenure and affordability in all cities and counties in an equitable manner.

Objective 2: Promote infill development and socioeconomic equity, protect environmental and agricultural resources, encourage efficient development patterns, and achieve greenhouse gas emissions reduction targets.

Objective 3: Promote improved intraregional jobs-housing relationship, including balance between low-wage jobs and affordable housing.

Objective 4: Balance disproportionate household income distributions (more high-income RHNA to lower-income areas and vice-versa).

Objective 5: Affirmatively further fair housing.

In addition to meeting the objectives above, State law governing Housing Element updates requires ABAG to consider a specific set of factors in the development of the RHNA methodology. The law also requires ABAG to survey its member jurisdictions to gather information on the factors that must be considered for inclusion in the methodology.⁹ Based on the State Housing Element laws, the jurisdiction surveys, and the forecasted development pattern from Plan Bay Area 2050, ABAG developed a methodology for RHNA allocation that includes three primary components¹⁰:

1. Baseline allocation based off the Plan Bay Area 2050 Final Blueprint;
2. Factors and weights for allocating units by income categories; and,
3. An equity adjustment based on an approach developed by ABAG’s Housing Methodology Committee.

Based on the final RHNA methodology, ABAG allocated 3,125 units to the unincorporated areas of the County. The allocation is a 1,028 percent increase from the County’s prior RHNA assignment of 277 units. The County will meet its RHNA

assignment through a combination of housing development in urban unincorporated islands or pockets within the USA of San José; graduate student, faculty, and staff housing at Stanford University; and single-family homes with accessory dwelling units built in other unincorporated areas. The County is also considering projections for units that will be built under the County’s ordinance update streamlining ADU development. For detailed explanation of the County’s capacity to meet its RHNA targets, see section [2.04](#).

Figure 2.3 Unincorporated Santa Clara County Housing Need, by Income Category

2.02c Housing Costs

Housing costs throughout the unincorporated areas of Santa Clara County have increased significantly during the 21st century. While homeownership was already a challenge for families

⁹ State of California Government Code Section 65584.04(b)(1)

¹⁰ Final Regional Housing Needs Allocation (RHNA) Plan: San Francisco Bay Area, 2023-2031

earning less than \$100,000 per year in 2000, a report from real estate website Redfin estimates that a first-time homeowner in 2023 would need to earn more than \$400,000 per year in order to afford a median-priced home in the Bay Area.¹¹ This section examines how those housing costs have developed since 2000, for the unincorporated areas of the County overall, and for specific unincorporated neighborhoods within the county. Housing cost data throughout the County of Santa Clara was collected for the County's nine Census Designated Places (CDP), rural unincorporated county,¹² and the overall unincorporated Santa Clara County.

Information from the American Community Survey (ACS) and Zillow was analyzed to provide housing cost data. The County's nine CDPs are: Stanford (unincorporated lands owned by Stanford University), Loyola (an unincorporated area between Los Altos and Los Altos Hills), Lexington Hills (an area near Lexington Reservoir), San Martin (a rural community located between Gilroy and Morgan Hill), and five urban pockets surrounded by or directly adjacent to incorporated San José (Alum Rock, Burbank, Cambrian Park, East Foothills, and Fruitdale).

The Zillow House Value Index was used to quantify the median home value of all homes, including single-family residences and condos/co-ops. In 2000, the average value of a home in the unincorporated county was \$577,701. Alum Rock and East Foothills had the lowest median home value at \$319,090, while Loyola had the most expensive housing with a median home value of \$1,381,367. Between 2000-2007, home values throughout the unincorporated county rose by 48%, to a median

home value of \$846,008. Loyola, Stanford, and San Martin saw median home values exceeding \$1,000,000, with Loyola still the most expensive with a median home value of \$1,762,232. The median home value in Alum Rock and East Foothills hit a then record high in 2006 of \$530,062.

Between 2007 and 2011, average home values throughout Santa Clara County fell to \$597,297, which can be largely attributed to the housing market crash of 2008. Alum Rock, East Foothills, and San Martin saw the sharpest drop in median home value during this time, falling to below 2000 levels. Home values began to recover in 2012, with all CDPs recovering to at least their 2000 median home value, and Stanford and Loyola setting new high values.

Between 2007 and 2015, the more affluent, urban communities of Cambrian Park, Loyola, and Stanford, had the strongest recovery from the crash, increasing in value by 40%, 56%, and 67%, respectively. During this same period, the urban pocket communities like Alum Rock and Fruitdale saw moderate increases in home values by 10% and 24%, whereas the rural community of San Martin saw an overall 9% decrease. San Martin's slower recovery could be attributed to the unsuccessful attempt to incorporate as an independent city, which ended in 2008.

Between 2015 and 2023, home values in unincorporated Santa Clara County rose, on average, by 69%. Stanford saw the most modest increase at 45% while the East Foothills increased by 108%. Between 2022 and 2023 alone, housing values in the unincorporated county rose between 1% and 7%. As of 2023, all

¹¹ Homebuyers Must Earn \$115,000 to Afford the Typical U.S. Home. That's About \$40,000 More Than the Typical American Household Earns. Dana Anderson, Redfin.com, October 17, 2023

¹² In this section, rural unincorporated county refers to areas of the unincorporated areas of Santa Clara County which are not within an urban service area or within a CDP such as San Martin or Lexington Hills.

communities in the unincorporated county have median home values of at least \$1,000,000 (except for Alum Rock with a median of \$991,237). The median home values in Stanford and Loyola total \$2,766,213 and \$4,316,058, respectively. This data substantially matches ACS 5-year data of median housing values between 2000 and 2022.

Housing tenure distinguishes whether a housing unit is occupied by a homeowner or a renter. Generally, affluent and hillside communities had a higher percentage of housing occupied by homeowners. For example, the East Foothills, Loyola, and Lexington Hills had the highest percentage of housing units occupied by homeowners, the highest across the unincorporated county, with 88%, 87%, and 85% of housing units occupied by homeowners, respectively.

In contrast, unincorporated urban islands in the county (neighborhoods surrounded by an incorporated city) had a lower percentage of housing occupied by homeowners, and a higher percentage of renter-occupied housing units. Burbank, Fruitdale, and Alum Rock, urban communities surrounded by the City of San José, had only 59%, 66%, and 71% of housing units occupied by homeowners, respectively. Regardless, all communities analyzed in the unincorporated county had a higher percentage of homeowner tenure than renter tenure. In summary, across the unincorporated county, an average of 78% of housing units were occupied by homeowners and 22% were occupied by renters.

ACS 5-Year Data was used to collect median contract rent in the County’s nine CDPs, rural unincorporated county, and unincorporated Santa Clara County between 2010 and 2022. In 2010, the median contract rent in unincorporated Santa Clara County was \$1,450. Affluent and hillside communities had the highest median rents in the unincorporated county – Loyola,

Lexington Hills, and East Foothills had the highest median rents at this time, ranging from \$1,842 to more than \$2,000 per month (ACS data does not provide specific data once a median rent surpassing \$2,000 per month, so actual rents may be significantly higher based on the home values and lack of multi-family housing in Loyola and Lexington Hills).

Table 2.3: Housing Value Trends

	% Change in Housing Value 2000-2023 (ZHVI, 2023)			Median Home Value (ZHVI, 2023)
	2000-2007	2007-2015	2015-2023	2023
Stanford	+32%	+67%	+45%	\$2,766,213
Loyola	+28%	+56%	+57%	\$4,316,058
Lexington Hills	+44%	+32%	+52%	\$1,379,041
Cambrian Park	+48%	+40%	+93%	\$1,769,419
Fruitdale	+52%	+24%	+80%	\$1,321,846
Burbank	+52%	+24%	+48%	\$1,085,294
Alum Rock	+61%	+10%	+76%	\$991,237
East Foothills	+61%	+10%	+108%	\$1,173,668
San Martin	+55%	-9%	+63%	\$1,493,280
Rural Unincorporated County	+45%	+33%	+64%	\$1,750,972
Unincorporated Santa Clara County	+48%	+29%	+69%	\$1,804,703

Urban islands and rural areas had the lowest median rents in 2010. Burbank, Fruitdale, and San Martin experienced rents between \$965 and \$1,109 per month.

Between 2010 and 2015, the median rent rose by 9% throughout unincorporated Santa Clara County. In the rural areas of the unincorporated county, rent rose by 20%. Rents in the rural unincorporated area of San Martin increased by 52%. Hillside communities experienced the greatest reduction in rent during this period, with rents in East Foothills and Lexington Hills falling between 28% and 48%. Median rent increased at a rapid rate between 2015 and 2022. On average, median rents throughout unincorporated Santa Clara County rose by 60%, with median rents increasing between 21% in Stanford, to 138% in Lexington Hills. Between 2021-2022, the median rent increased by 12% across the unincorporated county.

The Zillow Observed Rent Index (ZORI) was used to provide a rental estimate (as of 2023) across unincorporated Santa Clara County. The highest median rents occurred in affluent, urban areas of the unincorporated county. ZORI data estimates show that Loyola, Cambrian Park, and Stanford experienced median monthly rents totaling \$7,884, \$3,628, and \$3,444, respectively. Hillside communities and urban islands had the lowest median rents. Lexington Hills, Alum Rock, and East Foothills, and Fruitdale and Burbank enjoyed median rents of \$2,850, \$2,992, and \$3,124, respectively. In 2023, the average median rent in unincorporated Santa Clara County was \$3,668. The data collected for both home values and rental prices concludes that while both home values and rental prices experienced significant increases between 2015 and 2022, rental prices increased by 60% while home values increased by 56%, marking a steeper increase in rental prices than home values.

Table 2.4: Rental Values

Median Rent Values 2023 (ZHVI, 2023)	
Stanford	\$3,444
Loyola	\$7,884
Lexington Hills	\$2,850
Cambrian Park	\$3,628
Fruitdale	\$3,124
Burbank	\$3,124
Alum Rock	\$2,992
East Foothills	\$2,992
San Martin	\$3,155
Rural Unincorporated County	\$3,486
Unincorporated Santa Clara County	\$3,668

The following paragraphs provide additional background on the County’s methodology for the preceding analysis.

The ACS was the primary source of data for home and rental prices. The ACS contains individual data samples for the nine CDPs within the unincorporated county. Data for the rural unincorporated county was collected from Census Tracts that cover those areas of the county. Furthermore, data from those census tracts was combined as an average to produce single data points described as the rural unincorporated county. Data sets used to analyze housing costs include housing tenure in median values of owner-occupied units between 2010 – 2022, median contract rent between 2010 – 2022, and median gross rent by bedroom in 2015, 2021, and 2022. All data collected from the ACS utilized ACS 5-Year estimates. ACS data was further analyzed to provide the percent change in rent between 2015-2022, and percent change in rent between 2021 and 2022. While

the ACS provides significant data on estimates of housing costs in the unincorporated county, Zillow was used to supplement and augment housing cost data.

The Zillow Housing Value Index (ZHVI), provided by Zillow, quantifies home values in the 35th to 65th percentile of typical homes. ZHVI data for home values is categorized by metropolitan area, state, county, zip code, and neighborhood. Generally, ZHVI neighborhood data aligned more closely with the boundaries of the CDP associated with that neighborhood (e.g., the boundaries of the Burbank neighborhood depicted by Zillow align very closely with the boundaries of the Burbank CDP), whereas zip code data covers the entire zip code.

The zip code data covers the CDP, but may also include areas outside the CDP, whether unincorporated county or incorporated city. For home values, the ZVHI neighborhood data provides more granular, accurate information than ZHVI zip code data because it covers a smaller area more aligned with the CDP. However, some ZVHI neighborhood data sets do not cover as large of a timespan as the zip code data sets (neighborhood data generally became available in 2016 whereas zip code data began in 2000). Generally, ZVHI neighborhood data was the primary source of housing cost but is augmented by ZVHI zip code data.

Where zip code data was not available or would not accurately describe housing costs of a specific community, City data was used as the most accurate data to represent that community. Additionally, Zillow housing data is not available for unincorporated areas of the county that excludes cities within Santa Clara County. For the purposes of collecting housing data on the unincorporated areas, ZVHI zip code data was used to calculate an average of the zip codes that cover the rural unincorporated county.

Lastly, an average of the housing costs for Santa Clara County's nine CDPs and rural unincorporated county provided data for unincorporated Santa Clara County. The Zillow Observed Rent Index (ZORI) provides 40th to 60th percentile of rental costs. For rental costs provided by ZORI, zip code data is the most granular data set. Zip codes associated with each CDP were used to provide the most accurate rental data in the County's nine CDPs. Data sets used to analyze housing costs include typical home values of all homes between 2000-2023 and typical rent values in 2023. Zillow data was further analyzed to provide the percent change in housing value between 2000-2007, 2007-2015, 2015-2023, and 2022-2023.

2.03 Affirmatively Furthering Fair Housing

The requirement to Affirmatively Further Fair Housing (AFFH) is derived from the Fair Housing Act of 1968, which prohibited discrimination concerning the sale, rental, and financing of housing based on race, color, religion, national origin, or sex—and was later amended to include familial status and disability. The 2015 HUD Rule to Affirmatively Further Fair Housing and California Assembly Bill 686 (2018) mandate that each jurisdiction takes meaningful action to address significant disparities in housing needs and access to opportunity.

State law now requires that the County affirmatively further fair housing through its Housing Element in several ways, including by analyzing integration and segregation patterns and trends, racially or ethnically concentrated areas of poverty and affluence, disparities in access to opportunity and in housing needs, and displacement risk. The County is also required to assess the historical origins of these realities and identify the factors that

contributed to them. After selecting those contributing factors that are particularly impactful in denying or limiting fair housing choice and access to opportunities, or negatively impact fair housing or civil rights compliance, the County must design priorities, strategies, and actions to address those priority contributing factors.

Toward this end, the County completed its **Assessment of Fair Housing (September 2023) (Appendix L)**, prepared by the Lawyers' Committee for Civil Rights Under Law and Root Policy, with input from a wide range of stakeholders through a community participation process that began in 2019. The Assessment of Fair Housing (AFH) is intended to provide a holistic look – informed by data, maps, community input, and policy analysis – into the trends and factors affecting access to housing and opportunity on the basis of protected characteristics under federal and state fair housing laws. Complementing the AFH is the **Affirmatively Furthering Fair Housing Sites Inventory Analysis (September 2023) (Appendix M)** and the **Assessment of Fair Housing Proposed Goals and Actions and Corresponding Implementation Programs (Appendix N) (September 2023)**, which directly analyze the nexus between the AFH and this Housing Element's sites inventory and programs, respectively.

In pursuit of fair housing, the County has undertaken manifold approaches to analyze and address housing inequities. In November 2016, Santa Clara County voters approved "Measure A" – a \$950 million affordable housing bond. Measure A provides the County with an unprecedented opportunity to partner with cities, residents, and the affordable and supportive housing community to significantly address the housing needs of the community's poorest and most vulnerable residents. It provides

affordable housing for vulnerable populations including veterans, seniors, the disabled, low- and moderate-income individuals or families, foster youth, victims of abuse, the homeless, and individuals suffering from mental health or substance abuse illnesses. The bond proceeds are contributing to the creation and/or preservation of approximately 4,800 affordable housing units and the development of numerous programs aimed at furthering fair housing.

The Housing Bond has enhanced the County's ability to achieve its fair housing priorities, which include:

- Increasing the scope and breadth of supportive housing for special needs populations, including homeless and chronically homeless persons;
- Increasing the supply of housing that is affordable to extremely low-income (ELI) households; and,
- Improving coordination and collaboration among the County, the cities, other governmental agencies, and the affordable housing community.

Implementation of Measure A reflects the County's approach to fair housing more broadly – **rather than focus on disparate pockets of unincorporated lands, the County takes a holistic approach to affirmatively furthering fair housing, across the entire area of Santa Clara County.** On policy and on projects, the County partners with the 15 cities of the county to develop and support fair housing where it is most appropriate and effective, irrespective of jurisdictional lines.

The County has demonstrated an abiding focus on fair housing in recent years and has conducted several related studies, although few make special consideration for the unincorporated areas of the county. Such studies form the basis for the County's

approach to realizing fair housing and the programs of this Housing Element.

Race and Homelessness in Santa Clara County (January 2020) (Appendix D)

Written in 2020, this report examines the relationship between racial equity and homelessness, which is disproportionately experienced by people of color in the county. The goal of the report is to improve and expand services and to make sure that supportive housing services do not exacerbate or perpetuate the racial and social disparities in the county. The report explores three themes:

1. Disproportionately high rates of homelessness among specific racial/ethnic groups.
2. Racial/ethnic variation in experiences of homelessness.
3. Structural barriers, including lack of affordable housing and economic opportunity.

Three underlying values emerge from the assessment:

1. Integrate people of color with lived experience of homelessness in all program, policy, and funding decisions.
2. Align racial equity work in the homelessness sector with other racial equity initiatives in Santa Clara County.
3. Use a racial equity lens and data-driven decision making in the homelessness system and across other systems.

These values have led the County to three strategies to address racial equity, which are reflected in programs contained in this Housing Element:

1. Center and raise the voice of people of color who have experienced homelessness in the policy and program decisions of the supportive housing system.

2. Partner with the safety net system to better understand and address the systemic causes of poverty and inequity.
3. Adopt new housing and land use policies that help reverse longstanding housing disparities that have negatively impacted people of color.

The full analysis of this report is included in this Housing Element as Appendix D.

Urban County Consolidated Plan and Annual Action Plan (2020) (Appendix E)

This planning document presents a housing needs assessment, market analysis, and strategic plan for the "Urban County," consisting of unincorporated areas and seven smaller jurisdictions, which together receive and disperse HUD funds. Seven goals are identified in the plan and relate directly to AFFH and the programs in this Housing Element:

1. Increase affordable and supportive housing;
2. Promote fair housing Countywide;
3. Maintain and expand activities designed to prevent and reduce homelessness;
4. Preserve existing affordable housing;
5. Provide essential services for special needs populations;
6. Maintain, improve, and expand community facilities and spaces; and
7. Strengthen employment and workforce opportunities.

The plan identifies and describes numerous barriers or impediments to fair housing:

- Displacement of residents due to economic pressures;

- Loss of affordable housing;
- Land use and zoning laws;
- Income discrimination;
- Community opposition;
- Availability, location, size, and type of affordable units;
- Lack of affordable, accessible housing in a range of unit sizes;
- Lack of access to opportunity due to high housing costs;
- Lack of affordable housing for individuals who need supportive services;
- Lack of assistance for housing accessibility modifications;
- Lack of resources for fair housing agencies; and
- Private discrimination.

Using these goals and barriers, the document presents a strategic plan that informs two critical undertakings: the expenditure of affordable housing funds by the County and its partner cities, and the development of this Housing Element and its programs.

The full housing needs assessment, market analysis, and strategic plan are included in this Housing Element and can be found as Appendix E.

Community Plan to End Homelessness (2015; updated 2020) (Appendix F)

In 2014, the County of Santa Clara Office of Supportive Housing and Destination: Home, a public-private partnership dedicated to collective impact strategies to end homelessness, convened a

series of community summits to develop a coordinated strategy to address homelessness across the county.

Representatives of local cities, non-profit advocacy groups, service providers, philanthropic organizations, elected officials, universities, and people with lived experience of homelessness participated in the planning process. The resulting *Community Plan to End Homelessness* document was formally endorsed by the County's Board of Supervisors, Santa Clara County Housing Authority, Santa Clara Valley Water District, and the majority of the county's 15 cities, in addition to participating stakeholder organizations. The Community Plan was developed to enhance the community's work towards ending and preventing homelessness among all homeless persons and families and was intended to build upon and supersede previous plans including the County's 2005 *Ten-Year Plan to End Chronic Homelessness, Keys to Housing*, and the city of San José's 2003 *Homeless Strategy*.

In 2020, the Community Plan was updated for 2020-2025, serving as the County's ongoing roadmap for ending homelessness in Santa Clara County and organized around three main strategies: (1) Address the root causes of homelessness through system and policy change; (2) Expand homelessness prevention and housing programs to meet the need; and (3) Improve quality of life for unsheltered individuals and create healthy neighborhoods for all. These strategies are grounded in evidence-based practices, lessons learned over the prior five years, and robust conversation and input from more than 8,000 members of the community; including people with lived experience of homelessness, subject matter experts, key stakeholders, and community members.

The Community Plan and its 2020 revision continue to be utilized and inform the County's programs and policies, including those of this Housing Element and are included in this Housing Element and can be found as Appendix F.

Ending Homelessness: The State of the Supportive Housing System in Santa Clara County (2018-2022) (Appendix G)

In 2018, the County released the first of ten annual reports to provide the community with information and updates related to the County's Supportive Housing System, 2016 "Measure A" Affordable Housing Bond activities, progress towards the goals of the Community Plan to End Homelessness, and efforts to improve client outcomes in Santa Clara County. These annual reports are referred to as [Ending Homelessness: The State of the Supportive Housing System in Santa Clara County](#) and are included in this Housing Element as Appendix G.

No Place Like Home Program: Technical Background Report (2018) (Appendix H)

In 2018 the County also prepared a technical background report to support the County's No Place Like Home program. This technical background report summarizes the available County and community resources addressing homelessness, including the County's efforts to prevent criminalization of homelessness and the Coordinated Entry System. This report is included in this Housing Element as Appendix H.

2.03a Segregation Analysis

What follows supplements the more holistic analysis of the AFH (Appendix L) and summarizes research and analysis in the **ABAG Segregation Report (March 2021) (Appendix I)**.

Santa Clara County is part of the U.S. Census Bureau's San José-Sunnyvale-Santa Clara, CA Metropolitan Statistical Area (Region), which consists of Santa Clara and San Benito Counties. The Region has a population of over two million people and is highly diverse, with no majority racial/ethnic group. Although less diverse than the Region, the unincorporated population also has no majority racial/ethnic group, as illustrated in Table 2.5. Trends vary significantly across different areas. High levels of jobs-housing imbalance (the disconnect between where job growth is occurring and where housing is being produced) plays a major role in these patterns, with Latino and Vietnamese residents having limited access to jobs-rich areas in comparison to White, Chinese, and Indian residents.¹³

Countywide, there is a significant immigrant population, with top national origins of Mexico (7%), India (6%), China (6%), Vietnam (5%), and the Philippines (3%). These population shares are closely mirrored at the regional level. However, which cities these immigrant groups choose to settle in varies. Across nearly every entitlement jurisdiction, Black and Latino residents face the highest rate of challenges finding affordable housing. Additionally, throughout the county, there are clear disparities in access to opportunity in categories that include environmental health, labor market, and school proficiency. Access to opportunity for these categories is higher for residents in Urban County cities like Los Altos and Saratoga and lower in San José.

¹³ ABAG Segregation Report (March 6, 2021), Appendix I

Table 2.5 Population by Race in the Unincorporated County, 2000-2019

Year	American Indian or Alaska Native, Non-Hispanic	Asian / API, Non-Hispanic	Black or African American, Non-Hispanic	White, Non-Hispanic	Other Race or Multiple Races, Non-Hispanic	Hispanic or Latino
2000	445	11,099	2,021	55,274	225	28,444
2010	348	12,475	1,586	42,417	3,049	30,085
2019	142	13,232	1,583	38,599	4,089	26,054

Notes: Data for 2019 represents 2015-2019 ACS estimates. The Census Bureau defines Hispanic/Latino ethnicity separate from racial categories. For the purposes of this graph, the "Hispanic or Latino" racial/ethnic group represents those who identify as having Hispanic/Latino ethnicity and may also be members of any racial group. All other racial categories on this graph represent those who identify with that racial category and do not identify with Hispanic/Latino ethnicity. In the unincorporated county, while the overall population declined between 2000 and 2019, there has been an increase in diversity of the resident population (see Table 2.5). The mapping in Figures 2.4 and 2.5 show that most of the unincorporated areas with significant populations (Alum Rock, East Foothills, Cambrian Village, etc.) are relatively racially diverse and do not consist of Racially/Ethnically Concentrated Areas of Poverty (R/ECAPs) (Figure 2.6). There is currently only one R/ECAP located either partially or entirely in Unincorporated Santa Clara County, which is in South San José and includes the County Fairgrounds, an unincorporated enclave with no residential development, along with the adjoining residential areas that are within city limits. Of note is a former R/ECAP on Stanford University's campus.

The County Fairgrounds is located on a 135-acre parcel located in South San José. There is no housing on the site, but the fairgrounds are situated at the western corner of a census tract that also contains residential neighborhoods within the San José city limits.

According to the City of San José 2023-2031 Housing Element, the poverty rate in this census tract has nearly halved from 32.3% in 2013 to 16.6% in 2019; however, 35.4% of households have an annual income less than \$35,000. An estimated 81 percent of residents speak a language other than English (primarily Spanish or Asian languages, and 52 percent speak English “less than very well” according to the 2022 American Community Survey. Within

Figure 2.6: Racially/Ethnically Concentrated Areas of Poverty (R/ECAPs) in Santa Clara County
 Larger format available in Appendix A

Source: California Department of Housing and Community Development. <https://affh-data-resources-cahcd.hub.arcgis.com/>

this census tract, 42% of residents who identify as Latino or of Hispanic Origin have less than a high school education, and 34 percent of Asian residents have less than a high school education,

compared to the White non-Hispanic residents, who all have at least a high school education. This compares to the County as a whole, where 96% of non-Hispanic Whites, 92% of Asians, and 71% of Hispanic or Latinx origin residents are high school graduates.

The City of San José notes in its 2023-2031 Housing Element that city-wide there has recently been a decline in the Latinx population, likely due to displacement pressures. It further notes that low-income communities of color are increasingly being forced to the edges of the Bay Area region. This may be the impetus to a decrease in the dissimilarity index city-wide from 1990 to 2020.

The entire unincorporated portion of the R/ECAP is a nonresidential site that hosts the annual Santa Clara County Fair, concerts, festivals, sporting events, trade shows, corporate events, and farmers’ markets, as well as special events like Cirque du Soleil.

The County Fairgrounds site presents an opportunity to improve the quality of life for the surrounding residential area that is characterized as a R/ECAP within the City of San José. The County therefore continually seeks ways to utilize the site to bring amenities to the surrounding incorporated neighborhood; currently, discussions are under way to develop a portion of the site with state-of-the-art public soccer fields, alongside a professional soccer training facility. Refer to Program 2.29 – *Place-Based Planning and Neighborhood Improvements*.

Figure 2.7: Estimated Displacement Risk

Larger format available in Appendix A

Stanford campus’s former R/ECAP previously included a significant population in the unincorporated county. However, the reasons for its race/ethnicity and socioeconomic demographics are very different from the vast majority of R/ECAPs and are not truly reflective of the composition of a more traditional R/ECAP. More specifically, Stanford has a comparatively larger student population than that of surrounding communities. Full-time students tend to have lower incomes and are more diverse than total residents in Santa Clara County and unincorporated areas. According to the U.S. Department of Education, Stanford University graduates have median earnings of \$107,000 per year, and rank in the top 100 schools (top two percent) for percentage of graduates earning more than a local high school graduate, which demonstrates quick financial upward mobility for its graduates.

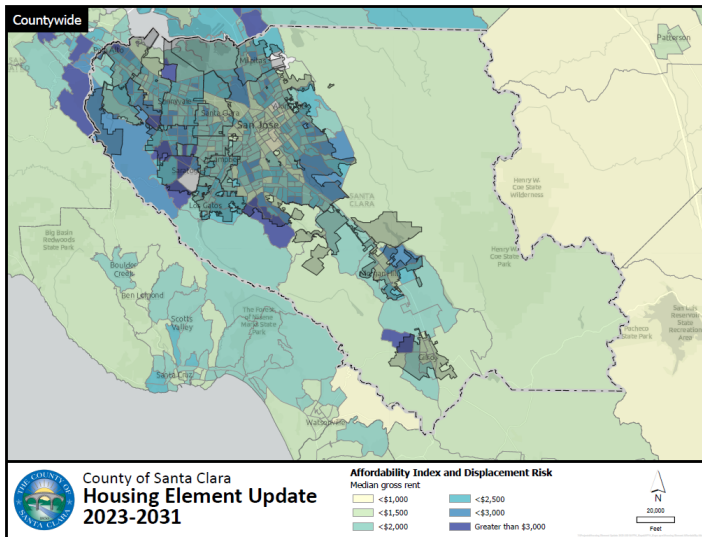

Figure 2.8: Affordability Index & Displacement Risk
 Larger format available in Appendix A

Source: California Department of Housing and Community Development. <https://affh-data-resources-cahcd.hub.arcgis.com/>

2.03b Access to Affordable Housing

At this time, Santa Clara County Housing Authority (SCCHA) operates very few units of public housing, defined as affordable rental housing for eligible low-income families, the elderly, and persons with disabilities that is owned and operated publicly. This is because SCCHA has disposed of or transitioned most of its public housing into non-public, project-based affordable housing. Now, affordable housing is primarily available through rental subsidy programs and the Low-Income Housing Tax Credit (LIHTC) program, which is an indirect federal subsidy used to finance the construction and rehabilitation of low-income affordable rental housing. Jurisdictions within the county use local programs, like inclusionary zoning, that encourage developers to set aside a certain percentage of housing

units in new or rehabilitated projects to supplement their affordable housing stocks. The County of Santa Clara has an ordinance code provision, the Countywide Inclusionary Housing Ordinance, which requires, in the unincorporated county, that 16 percent of units within any new residential development of three or more units be dedicated as affordable housing units or that an 164 into a fund managed by the County. Figures 2.7 and 2.8 reflect estimated displacement risk and affordability across the county using layers developed by ABAG. These figures and others are available in a larger format and with a focus on the sites inventory in Appendix A.

2.03c Fair Housing Issues and Services

Fair housing issues are conditions that restrict fair housing choice or access to opportunity. As indicated in the section above, such issues are comparatively uncommon in unincorporated county, and the focus for a countywide effort will address segregation and lack of integration, significant disparities in access to opportunity, and disproportionate housing needs. The Urban County and entitlement cities contract with private fair housing organizations to provide fair housing and housing rights outreach and education, landlord-tenant dispute resolution services, and fair housing investigation, representation, and enforcement services to residents.

2.04 Unincorporated County Housing Development Capacity

2.04a Overview

Section 2.04 first describes how the County has the capacity to meet the RHNA target assigned to it by ABAG for the 2023-2031 planning period (sixth cycle), followed by an analysis of the probable

development that may occur through the end of the planning period in 2031.

Prior to the adoption of the County's first General Plan, foundational Santa Clara County land use policies placed a high value on curtailing sprawl by focusing growth within incorporated areas and urban unincorporated areas, especially those within USAs. To facilitate greater cohesive development patterns between incorporated and unincorporated USAs, the County's General Plan ([Book B](#)) reflects that land use planning for the urbanized parts of unincorporated county should be conducted by the cities. It has been the longstanding policy of the County, the cities, and LAFCO that these urban unincorporated areas will be ultimately annexed into the respective cities. Pursuant to State law, cities may choose to utilize a streamlined annexation process for most urban unincorporated islands under 150 acres.

The County's Zoning Ordinance has historically not allowed any significant development projects within a city's USA unless the project conforms with the city's General Plan. The County works with cities to ensure all utilities and services to these unincorporated USAs are provided for by their respective cities. These policies have been in place since the 1970s and are actively utilized by cities to plan for the unincorporated areas within their respective USAs.

However, with the 3,125 housing units allocated to the County for the 2023-2031 planning period, the County is required to amend its General Plan to allow for the County to plan for housing in urban unincorporated areas. Table 2.6 below provides an overview of the sites in the County's 2023-2031 sites inventory batched by neighborhood, along with the capacity of each group of sites by income category. Through the RHNA process, the County was allocated housing units at the Very Low-Income, Low-Income, Moderate-Income, and Above Moderate-Income affordability

categories. Fifty percent of all Very Low-Income units will be made available as affordable to people with Extremely Low-Incomes. A table version of the full sites inventory is in Appendix A, and detailed analysis of each site is below in sections 2.04b and 2.04c.

Each site analysis includes a table that notes the site's existing use(s), realistic capacity, maximum capacity, and unit affordability. The realistic capacity is the same as the minimum projected density for all parcels in the sites inventory. In December 2023, the County amended its Zoning Ordinance to create a new combining district consisting of the sites identified in this chapter. This rezoning is in compliance with California Government Code section 65583.2 subdivision (c) and removes constraints to the development of such parcels. Section 3.75.040 of the County Zoning Ordinance now provides housing opportunity sites with the option to pursue a streamlined project review and approval by way of a Planning Clearance, which conforms with the definition of "use by right" in California Government Code Section 65583.2 subdivision (i). Section 5.20.240 of the County Zoning Ordinance defines Planning Clearance as "a ministerial, nondiscretionary process for uses that require adherence to the Zoning Ordinance but for which no discretionary permit is required." To qualify for such processing, projects must meet objective eligibility criteria, including conditions and requirements for minimum levels of affordability.

Of the sites selected for inclusion in this sixth cycle planning period analysis, only the Stanford University *Escondido Village* site is both considered non-vacant and was previously selected as a housing site (in the fourth cycle planning period). The two other Stanford sites (*Quarry Arboretum* and *Quarry El Camino*) were previously identified in the fourth and fifth cycles, each time with a total capacity of 350 units at a density of 25 units per acre. These sites were not developed during the fourth or fifth cycles.

Some of the selected sites in unincorporated San José are currently nonvacant. The department has identified these sites as underutilized, and therefore prime locations to be converted into multi-family or mixed-use residential developments. These uses include parking lots and single-story retail commercial sites. In the first quarter of 2023, San José had a reported 24% vacancy rate in commercial properties, which includes both office space and retail space. There were 70 vacant store fronts in downtown San Jose alone.

There have been a number of initiatives from the federal, state, and local governments to ease restrictions concerning the conversion of commercial buildings or commercially zoned properties into residential and mixed-use residential uses. There has also been a steady reduction of minimum parking requirements allowed by the state and City of San José, freeing up land that was previously not available to housing developers.

Of the 24 sites selected by the County in the sixth cycle, three are on the Stanford University Campus and 21 are within the City of San José's urban service area. The County worked with the Stanford University administration in selecting the three sites that they determined to have the most potential for development. The City of San José has, through its own planning initiatives, identified 90 locations as "planned growth areas" throughout the city. Of the 21 sites within the City of San José's urban service area, 14 are located in "urban villages," a designation the City uses for neighborhood-level "planned growth areas." Two more sites are directly adjacent to an "urban village," and two others are processing subdivision applications with the City or County. The three remaining sites include a church parking lot, a type of land that the State has made easier to add housing to through the "Affordable Housing on Faith Lands Act" of 2023, and two parcels containing the decommissioned

Pleasant Hills Golf Course, which the owner is currently seeking to develop as residential or limited mixed-use residential. The County is therefore confident that these sites have the potential for increased development during the sixth cycle.

The market also has shown a trend of developers seeking to develop such land for housing. In 2021, for example, the City of San José approved the demolition of commercial buildings and construction of mixed-use residential projects, both located 1.5 miles from the Fruitdale sites listed in this chapter. One project replaced two single-story commercial buildings with a six-story mixed use building consisting of 61 residential units and approximately 18,000 square feet of commercial office space on a 0.88-acre site on Winchester Boulevard. The other project was for the demolition of over 75,000 square feet of commercial buildings to construct a mixed-use project with a 200,000-square foot office building and 590 residential units on South Bascom Avenue. The City of San José has also approved a project to replace the Cambrian Park Plaza Shopping Mall with a large-scale mixed-use development that includes 48 single-family residences, 27 accessory dwelling units, 25 townhomes, 305 multi-family residential units as well as assisted living and senior independent living units, ground floor retail and restaurants, and a hotel located one half mile from the Cambrian Park site.

Other recently approved developments in the City of San José include the demolition of a two-story office building to construct a 115-unit multi-family apartment building on a 0.47-acre site on North First Street, the demolition of a Chuck E. Cheese's restaurant to construct a six-story mixed-use building with 5,000 square feet of commercial and 190 residential units on Kooser Road, the demolition of two commercial buildings to construct one six-story multifamily residential building with 62 units on Almaden Road, the demolition of a carwash and auto repair shop to construct a 20-story residential

tower with up to 472 residential units and approximately 7,600 square feet of street level retail on Stockton Avenue

Under the amended County Zoning Ordinance, the development of each site requires a minimum number of affordable units, with no limitation to the maximum number of units (affordable or market rate). The maximum capacity identified in the tables below is the highest anticipated density that was analyzed under this Housing Element's Environmental Impact Report (EIR). If a future development proposal includes more units than have been analyzed in the EIR, then additional CEQA review may be required. The number of affordable units required of future development on each site generally correlates with the County's Inclusionary Housing

Ordinance rate of 16%, assuming each site develops to the extent of the realistic capacity, with the exception of sites on Stanford University campus and those expected to develop in partnership with the County.

The amended Zoning Ordinance requires all development on the sites analyzed in this Housing Element to include residential development to the extent specified; entirely non-residential development is not permissible on these sites.

In addition to the below analyses of the sites inventory, the Affirmatively Furthering Fair Housing Sites Inventory Analysis, included as Appendix M, consists of additional site analysis within the context of AFFH.

Table 2.6 Summary Capacity to Meet RHNA Assignment

Location	Affordable Units			Above Moderate Income (>120% of Area Median Income)	Total	
	Affordable Units Share	Very Low Income (<50% of Area Median Income)	Low Income (<50%-80% of Area Median Income)			Moderate Income (<80%-120% of Area Median Income)
San Jose	33%	739	370	384	3,025	4,518
Fruitdale/Santa Clara Valley Medical Center	100%	186	69	45	-	300
Pleasant Hills	16%	228	114	114	2,394	2,850
Hostetter Station	58%	325	187	200	514	1,226
Parkmoor/Burbank Neighborhood	18%	-	-	14	62	76
Alum Rock/East Foothills	17%	-	-	10	48	58
Cambrian Park	13%	-	-	1	7	8
Stanford	50%	336	252	252	840	1,680
Quarry Sites	50%	196	147	147	490	980
Escondido Village	50%	140	105	105	350	700
ADUs	25%	-	-	92	276	368
Total		1,075	622	728	4,141	6,566
<i>RHNA Assignment</i>		828	477	508	1,312	3,125
<i>Surplus Units</i>		247	145	220	2,829	3,441
<i>% of RHNA Target</i>		130%	130%	143%	316%	210%

The County prepared a detailed mapping analysis to identify areas within the urban unincorporated county that are suitable for housing development, which included mapping access to amenities such as transit, schools, parks, and grocery stores, as well as mapping of hazardous areas such as very high fire zones, flood zones, and fault zones. Based upon this mapping, the County selected sites for its 2023-2031 sites inventory that were identified as having high access to amenities and low or no impacts from hazards.

Pursuant to California Government Code Section 65583.2(b)(6), all of the above sites identified as available for housing for above moderate-income households are in USAs and therefore served by public sewer systems. Nearly all of the rural unincorporated areas of the county, where above moderate-income single-family residences are often constructed, are not served by public sewer systems.

None of the sites identified as available for above-moderate households are in areas NOT served by public sewer.

The County considered public comments received regarding the inclusion of sites from property owners with written interest in residential development during the planning period. Those who provided public comment owned property located in rural unincorporated area outside the USAs. Sites in the rural unincorporated areas were not selected for inclusion in the Housing Element sites inventory due to the unavailability of adequate infrastructure, such as sewer and water connections to accommodate a multi-family development.

Table 2.7 presents the criteria utilized to map sites suitable for housing. Only sites scoring above a minimum threshold were considered for inclusion in the County’s sites inventory.

Table 2.7 Criteria Utilized to Map Housing Suitability Areas

AMENITIES (SCORED BASED ON DISTANCES AND URBAN/RURAL LOCATION)		HAZARDS & PRESERVATION ISSUES (WITHIN OR NEARBY THE AREA)	
1.	Near high-capacity transit	1.	High or Very High Fire Hazard Severity zone
2.	Near transit stops (2 or more lines)	2.	36-inch or 77-inch sea level rise scenario inundation area
3.	Near transit stop (1 line)	3.	Floodplain
4.	Near a public park or a community center	4.	Earthquake/Seismic hazard zone
5.	Near a book-lending library	5.	Liquefaction susceptibility zone
6.	Near grocery store / supermarket / neighborhood market/farmer’s market	6.	Landslide hazard zone
7.	Near elementary/middle/high schools	7.	California Protected Area
8.	Near medical clinic or hospital	8.	Riparian area
9.	Near pharmacy	9.	Wildlife habitat
10.	Has access to high-speed internet	10.	Williamson Act lands
11.	Within a State-identified high opportunity area		

In sections 2.04b and c, the discussion of development capacity and sites inventory is organized by the following subareas:

- Stanford University Lands;
- Urban Unincorporated Areas; and
- Accessory Dwelling Units.

Collectively, the sites selected on Stanford academic lands and in urban unincorporated areas, in combination with anticipated ADUs, have an estimated capacity of at least **6,574 units**, which is **110% more than the RHNA target** for unincorporated areas. This extra capacity is necessary to ensure that if one or more large sites identified at Stanford or within the City of San José USA do not result in housing development projects during the 2023-2031 planning period, the County will still have enough capacity to accommodate

its RHNA goals. The County expects that by selecting sites sufficient to meet twice its RHNA allocation, it will ensure development opportunities remain available throughout the planning period, especially for lower- and moderate-income households, pursuant to Government Code Section 65863 (the No Net Loss Law).

2.04b Development Capacity Analysis – Stanford University Lands

Stanford University is a private university located in the northwest corner of Santa Clara County, adjacent to San Mateo County. It contains over 4,000 acres of land within Santa Clara County, the majority of which is under the land use jurisdiction and regulatory authority of the County. Stanford academic lands on which residential development may occur have full access to urban services and infrastructure. Stanford University has a high capacity for the development of housing units available to a range of income levels. Stanford University development is governed by a Community Plan (Stanford Community Plan, or SCP), the County Zoning Ordinance, and a General Use Permit. Together, these land use controls link the development of academic space with that of housing.

The Stanford Campus has been identified by the State as a high opportunity area, and therefore is an ideal location to add a variety of housing types and households. In addition, Stanford University has indicated its desire to build new, state-of-the art, academic spaces. Such development has the potential to attract additional students and staff to the university. The County worked with the University to identify three sites on the campus for development of housing for faculty, staff, and students. One of the three sites (Escondido Village) is currently developed with student housing and associated parking lots, the second (Quarry Arboretum) consists of an existing parking lot, and the third (Quarry El Camino) is currently undeveloped open space.

By providing these units on campus, the County and University expect to see a significant reduction in VMTs and corresponding GHGs, in addition to the provision of a significant number of affordable housing units in an area with one of the highest median home prices in the region. While this housing is directly accessible only to Stanford students, faculty, staff, other workers, and their families, it benefits the wider community by allowing more of the local housing supply to be available for community members not affiliated with Stanford.

Existing Uses, Trends, and Regulatory Framework

The Escondido Village site is underutilized and contains existing, low-density, multifamily graduate student housing. The existing use supports the future development of additional housing units at a higher density and does not require any change in use to do so.

Although the site is over 10 acres, the existing multifamily residential use makes the site appropriate to accommodate additional lower-income housing units. There are currently low-density, outdated residential buildings at the Escondido Village Site, housing undergraduate and graduate students, as well as the Children's Center of the Stanford Community and residential administration buildings. Nearly all the residential buildings are low-rise, however, the Escondido Village Graduate Residences immediately to the west include four large multi-story style apartment buildings. This site is also adjacent to the Bing Nursery School and Escondido Elementary School, making it an ideal location to develop additional multi-family residential buildings for graduate students and staff. The anticipated density of such redevelopment is 70-90 dwelling units per acre, at specific locations within the 40-acre area, rather than being distributed evenly across the 40-acre area.

The Quarry Arboretum site is also underutilized, developed with a parking lot, and does not have any existing structures. The Stanford

General Use Permit requires Stanford not to exceed 2,300 net new parking spaces above a baseline of 19,351 spaces. The removal of the parking lot at the Quarry Arboretum site will comply with General Use Permit requirements and the lot can be replaced elsewhere, if deemed necessary; this parking lot is not associated with any specific structures or uses.

The Quarry El Camino site is undeveloped open space and therefore does not require redevelopment or change in use to accommodate the construction of housing units.

Two of the three Stanford sites (*Quarry Arboretum* and *Quarry El Camino*) were previously identified in the fourth and fifth cycles, each time with a total capacity of 350 units at a density of 25 units per acre. These sites were not developed during the fourth or fifth cycles; Stanford University focused on building housing in other parts of the campus. The third site (*Escondido Village*) is located in the residential district of the campus, adjacent to where the University added 2,597 moderate-income units during the fifth cycle, and is currently occupied with low-density residential development composed of outdated building stock.

The 2023 Board-adopted SCP Update calls for increasing the supply and affordability of housing on the Stanford campus to meet the needs of faculty, staff, students, postgraduate fellows, hospital residents, and other workers. It requires Stanford to provide a sufficient level of housing on campus to meet the affordable housing needs generated by new development of academic space. Under the updated SCP, the minimum allowed density increases from 15 dwelling units per acre to 30 units per acre.

The revised SCP also identifies the three sites included here as areas where the expected densities will further increase to accommodate 1,680 to 2,150 new units. This can be achieved by building the two Quarry sites at densities ranging between 70 to 90 units per acre;

densities that are appropriate for this area adjacent to the Caltrain Station and the Stanford Shopping Center. The Escondido Village site has already seen an intensification of housing in the 2015-2022 planning period, and the University plans to further intensify the housing in this area to accommodate an additional 700 to 900 units.

The adopted SCP Update includes a linkage policy that requires Stanford to develop housing with, or prior to, any development of new academic space on Stanford Campus. Stanford has demonstrated a trend of continuing to develop new academic space, with over 750,000 square feet of academic space during the 2015-2022 planning period. Due to Stanford's plans for academic campus growth and the linkage policy requirements of the revised SCP, Stanford is likely to develop housing on these three sites within the 2023-2031 planning period.

In conjunction with adoption of the revised SCP, the County adopted Zoning Ordinance provisions (the "-os" Housing Opportunity Sites combining district) in December 2023, which implements Program 2.02 – Planning for Housing Development in Unincorporated USAs and Stanford University Lands. Such rezoning requires a minimum number of lower-income housing units to be included in any development proposed on each of the parcels in this Housing Element's Sites Inventory, including the three Stanford sites. Table 2.8 provides a summary of the estimated potential capacity for the three identified sites on Stanford Campus, including the anticipated levels of affordability.

This rezoning program, completed in December 2023 and amended in November 2024 with clarifying edits, conforms with the provisions of California Government Code Section 65583.2 subdivision (c) and removes constraints to the development of such parcels. Section 3.75.040 of the County Zoning Ordinance now provides housing opportunity sites with the option to pursue a streamlined project

review and approval by way of a Planning Clearance, which conforms with the definition of a ministerial, “use by right” process in California Government Code Section 65583.2 subdivision (i). Section 5.20.240 of the County Zoning Ordinance defines Planning Clearance as “a ministerial, nondiscretionary process for uses that require adherence to the Zoning Ordinance but for which no discretionary permit is required.” To qualify for such processing, projects must meet objective eligibility criteria, including conditions and requirements for minimum levels of affordability. See Program 2.06f for specifics.

The realistic capacity and anticipated affordability levels for each site are predicated on the revised SCP and new combining district requirements. Under such rezoning, new development on each site is required to be multi-family or mixed-use and to include the minimum number of affordable units prescribed. Entirely non-residential development is not allowed on such sites. Development proposals on these sites may include more units (market-rate or affordable) beyond the units prescribed and there is effectively no density limit.

Additionally, the rezoning provides a process by which a development proposal may utilize an expedited, non-discretionary permit, if the development meets specified levels of affordability, akin to the provisions of California Senate Bill 35 (2017).

If Stanford proposes a certain percentage of affordable housing as a part of their development (further detailed in Program 2.02 and Zoning Ordinance Section 3.75.040) their project would be subject to a ministerial nondiscretionary approval called a Planning Clearance. After the Planning Clearance is approved, Stanford may apply for the required construction permits to build the proposed development.

If Stanford wishes to propose an alternative means of providing the lower income units listed in Table 2.8 (e.g., developing them elsewhere, rehabilitation of existing structures, or land dedication),

Stanford may submit the alternative means of compliance for consideration and approval by the Board of Supervisors.

Height, setbacks, and other objective development standards are applied through the Stanford Community Plan and General Use Permit. However, they can be modified through an approved development agreement or variance, as delineated in the County Zoning Ordinance.

There are no timing requirements in place by the County that would restrict the development of housing on the Stanford University Campus; however, should the university wish to count the housing towards the SCP requirements of developing housing to meet increased academic space, the university would first need to apply for a new General Use Permit. However, if the County does not receive an application from Stanford by June 2026, the County will work with Stanford to facilitate the submittal of a housing development application. The County would pursue additional actions, including but not limited to, the selection of additional housing sites on Stanford Campus, rezoning, and/or permit processing improvements. See Program 2.02, Table 4.36, and Program 2.26 (Mid-Cycle Review). County staff have a standing monthly meeting with representatives of Stanford University to best assess the university’s need and facilitate development in a way that is consistent with the SCP and other County requirements.

Based on the available information and as a result of working closely with Stanford to select the Escondido Village and Quarry sites as the best locations for future residential development on Stanford Campus, the County does not foresee any barriers preventing the development of these sites during the sixth cycle planning period. However, should an unforeseen barrier arise, the Mid-Cycle Review (Program 2.31) will further assess the sites inventory and implement a revised plan to meet the County’s RHNA obligations.

Table 2.8: Housing Capacity on Stanford Sites

SITE	SIZE (ACRES)	EXISTING USE	POTENTIAL UNIT COUNT		UNITS BY INCOME CATEGORY		
			Realistic Capacity	Maximum Capacity	Lower Income	Moderate	Above Moderate
<i>QUARRY EL CAMINO 142-04-036 (a)</i>	6	Undeveloped open space	420	540	147	63	210
<i>QUARRY ARBORETUM 142-04-036 (b)</i>	8	Campus parking lot	560	720	196	84	280
<i>ESCONDIDO VILLAGE 142-04-036 (c)</i>	40	Student housing and associated parking	700	900	245	105	350
TOTAL	54		1,680	2,160	588	252	840

Figure 2.9: Housing Sites on Stanford Campus
 (Larger format available in Appendix A)

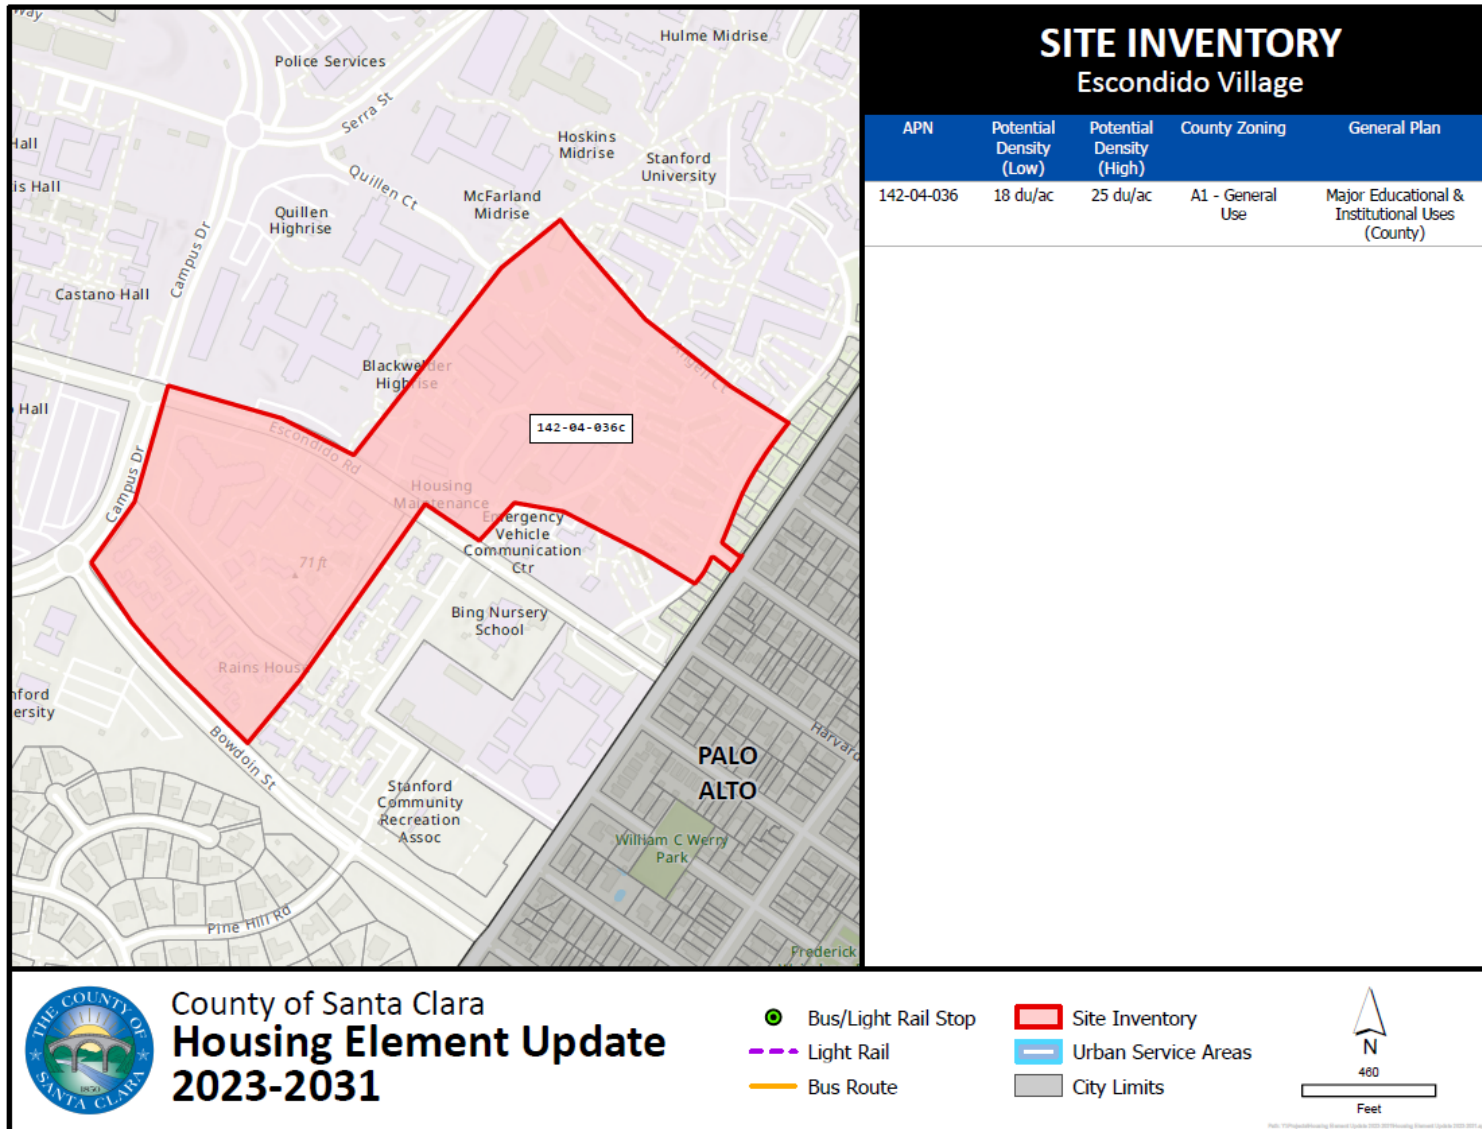

Figure 2.10: Housing Sites on Stanford Campus
 (Larger format available in Appendix A)

All three Stanford sites will include faculty, staff, and/or graduate student housing. The Arboretum and El Camino Quarry sites are within walking distance of the Caltrain Palo Alto Station, the Town and Country Shopping Center, and the Stanford Shopping Center. The Escondido Village area is serviced by Stanford Marguerite Shuttle, which is synchronized with the Caltrain schedule. While housing sites at Stanford are intended to house Stanford students, staff, faculty, other workers and their families, the housing benefits all members of the community. Family members housed at Stanford include children who attend local schools and spouses who work outside of Stanford. By making this housing available, Stanford is reducing the demand for housing in nearby communities, thus making more housing available to all members of the community.

These sites have been selected due to their proximity to existing infrastructure and general suitability for development. There is no known contamination on these sites, nor are they located within an airport influence area which could provide negative impacts to residents. The sites do not possess an unusual configuration and are not subject to any easements or contracts (such as a Williamson Act contract) which would limit the ability to develop on these sites, provided the projects comply with the SCP and GUP. The land is identified by the California Department of Conservation as urban and built-up land and is not suitable for farming.

The California Natural Diversity Database identifies a number of species in the area, as is to be expected as much of the area in Stanford lands and the surrounding area have been preserved in their natural state. The Central Coast foothill yellow-legged frog (California Endangered), California tiger salamander (California Threatened), and Crotch Bumble Bee and western bumble bee (California Candidate Endangered) have been identified within the area in the early to mid-1900's, but urban development and

fragmentation of land over the last century makes these sites less suitable as habitat for these species.

Through the SCP public outreach process, the issue of housing affordability was brought forth by staff and students. Based on the income levels of the Stanford population of faculty, staff, graduate students, and other workers, and the high income and high rental costs in the area, the County projects that the new housing provided by the University at these sites will primarily be affordable units. All 2,597 units built during the 2015-2022 cycle were reported as affordable to moderate-income households. As discussed further in section 3.02b, rents for 85% of graduate student housing spaces at Stanford have been found to be generally within a range affordable to low- or moderate-income households. The County therefore anticipates that no less than 50 percent of new units built at Stanford during the 2023-2031 planning period will be deemed affordable.

2.04c Development Capacity Analysis – Urban Unincorporated Areas

As discussed above, to meet ABAG's RHNA target for unincorporated areas, the County is required to amend its General Plan policies, re-establishing the County's authority for planning in urban unincorporated pockets for the purposes of meeting housing demand.

Although there are urban unincorporated pockets that are intended for annexation into several different cities, most of them are associated with the City of San José. Approximately 78 percent of the population in all the urban unincorporated pockets in the county (not including Stanford) is attributable to areas within the USA of San José.

The County has identified 21 unincorporated urban housing sites, spanning roughly 142 acres within the City of San José's USA. These

sites range from .09 to 114 acres and are spread across multiple unincorporated urban islands within San José. To better accommodate the development of lower-income RHNA on sites less than one acre, the County included a new program (Program 2.30 – Incentivize Lot Consolidation) that encourages the merging of these lots and therefore furthers the potential of these lots to be redeveloped during the sixth cycle planning period.

In total, these sites have a capacity range between 4,517 and 6,282 units. This capacity estimate is based generally on the land use designations for these sites under the City of San José’s General Plan. The one exception is the Pleasant Hills site, which is a decommissioned golf course that does not yet have a land use designation for housing under the City General Plan. However, representatives for the former Pleasant Hills Golf Course are working with the County and City of San José to facilitate development of their site. The Pleasant Hills developers have submitted an application to change the General Plan designation for this property and the San José City Council has taken action to remove a policy barrier for housing and mixed-use development on the site.¹⁴

The County has worked closely with the City to review all sites selected within the unincorporated pockets of San José and to verify with City staff that they are compatible for residential development at the densities proposed. Without the related rezonings concurrent with this Housing Element Update, the pre-existing County zoning ordinance would not allow many of these sites to develop with multi-family housing.

To further ensure development of these sites, the County is implementing Program 2.02 – Planning for Housing Development in

Unincorporated USAs and Stanford University Lands, which rezones the County’s identified sites through a combining district that restricts development to multi-family residential and limited mixed uses. Any future development on these sites would be required to comply with the combining district.

In December of 2023, the County adopted Zoning Ordinance provisions creating the “-os” Housing Opportunity Sites combining district, which requires a minimum number of affordable housing units to be included in any development proposed on parcels in the sites inventory. Entirely non-residential development is not allowed on such sites. Development proposals on these sites may include more units (market-rate or affordable) beyond the units prescribed and there is effectively no density limit. The realistic capacity and anticipated affordability levels for each site are predicated on implementation of these amendments.

Additionally, this rezoning provides a process by which a development proposal may utilize a streamlined, non-discretionary permit process if it meets specified levels and percentages of affordability, akin to the provisions of California Senate Bill 35 (2017).

This approach is a first for the County and is needed to meet the RHNA target for unincorporated areas. The County does not have a history of processing multi-family and limited mixed uses as previous General Plan policies relied on the respective city’s long-range land use planning for the site.

During past RHNA and Housing Element update cycles, the County has not included unincorporated parcels within USAs because the County’s General Plan has historically encouraged such development to occur under the appropriate city’s jurisdiction, to ensure

¹⁴ On December 6, 2022, the City of San José City Council amended its Policy 5-1, “Transportation Analysis Policy.” [More information is available at this link.](#)

compliance with the city’s long-range planning authority for these areas. In October of 2023, the County amended its General Plan to re-establish the County’s authority to plan for housing in the unincorporated urban pockets. The County has identified this as a policy update in Chapter 3 (Strategy 1, Policy HG1-7).

The County has been careful to select sites that are in line with the development goals of the City of San José. As part of its Envision San José 2040 General Plan, adopted on November 1, 2011, the City of San José set forth 12 major strategies. One of these strategies is to promote the development of “urban villages” throughout the city, which would “provide active, walkable, bicycle-friendly, transit-oriented, mixed use urban settings for new housing and job growth attractive to an innovative workforce and consistent with the Plan’s environmental goals.” Among the approved urban village plans is the West San Carlos Urban Village Plan, for which the Burbank/Parkmoor opportunity sites are either located within or adjacent to. The West San Carlos Urban Village Plan is a “Local Transit Urban Village”, for which the City of San Jose has “planned for a balanced mix of job and housing growth at relatively high densities” to create complete communities along light rail and rapid transit bus service routes. A priority for all urban villages in San Jose is to revitalize underutilized properties with access to existing infrastructure, while increasing densities to support transit use and active transportation options.

The Burbank/Parkmoor area is highlighted by West San Carlos Street and Stevens Creek Boulevard, which provide an east-west connection between downtown San José to the east and Westfield Valley Fair Mall, Santana Row, De Anza College, and the Cites of Santa Clara and Cupertino to the west, and Bascom Avenue, which connects the Alameda and Rose Garden districts in the north to Cambrian Park and the City of Campbell in the south.

Figure 2.11: Housing Sites and the City of San José Development Plan for Midtown and Burbank/Parkmoor

Other sites within the City of San José’s urban service area are within or adjacent to other urban villages (such as the South Bascom Urban Village Plan and other priority development areas in Alum Rock/East Foothills, Cambrian Park, and at Hostetter Station). Finally, the decommissioned golf course at Pleasant Hills represents the largest opportunity for development of unincorporated land within the City of San José’s urban service area.

The County remains committed to the existing General Plan goals that these areas be annexed by their respective cities and that high-density urban residential development applications be processed by the cities, rather than the County, for alignment and compatibility with the immediately surrounding areas. The County will also work closely with the City of San José to support annexation of these parcels when housing development projects occur. Should annexation occur, any future development would move forward within the City’s jurisdiction and the County would seek a commensurate transfer of RHNA units, as described in Program 4.03.

The County Inclusionary Housing Ordinance will apply to these sites, requiring a minimum of 16 percent of the units to be affordable. In certain cases where 16 percent yields less than one unit of affordable housing, the projection has been rounded up to one unit.

The following tables and figures provide an overview of the urban unincorporated sites in the County sites inventory, by neighborhood, with the estimated potential capacity for each site, including the anticipated levels of affordability, which reflects the new combining district requirements.

Figure 2.12: Housing Sites and the City of San José Development Plan for Alum Rock and East Foothills

Table 2.9 Housing Capacity on Sites within Unincorporated USAs of the City of San José

City Location	High Opportunity Area	Transit*	Sites	Acres	Unit Capacity		Affordable Units

* Within one-half mile from a High-Capacity Transit stop/station

** Low unit capacity is considered to be the realistic capacity based on analysis of each housing site section

Fruitdale / Santa Clara Valley Medical Center

The Santa Clara Valley Medical Center (VMC) is a County-owned facility that covers over 70 acres in the Fruitdale neighborhood. The County has identified two sites adjacent to the VMC campus.

These properties are expected to be developed in partnership with the County, which will plan for projects on these sites to be entirely affordable. These sites have been selected due to their proximity to existing infrastructure (such as water, sewer, and dry utilities) and general suitability for development. There is no known contamination on these sites, nor are they located within an airport influence area. The sites do not possess an unusual configuration and are not subject to any easements or contracts (such as a Williamson Act contract) that would limit the ability to develop housing on these sites. The land is identified by the California Department of

Conservation as urban and built-up land and is not suitable for farming.

The California Natural Diversity Database identifies several species in the area. The robust spineflower (California Endangered), California tiger salamander (California Threatened), and Crotch Bumble Bee and western bumble bee (California Candidate Endangered) have been identified within the area either over a century ago or in an unspecified area of San José, but urban development and fragmentation of land over the last century makes these sites less suitable as habitat for these species.

Existing Uses, Trends, and Regulatory Framework

The Fruitdale / Santa Clara Valley Medical Center sites are currently developed with parking lots and are considered non-vacant. These underutilized sites are expected to be developed in partnership with the County, which will plan for entirely affordable housing.

The first site is in the southwest part of the facility, where there is a 3.5-acre surface parking lot that abuts a residential neighborhood along Thornton Way. Under the City's General Plan, supportive housing is allowed under the current land use designation of *Public-Quasi-Public*. Additionally, the removal of the existing parking use will not hinder the development of new housing units as the existing parking spaces can be replaced elsewhere as deemed necessary.

The second site is adjacent to VMC, along Empey Way, is 1.5 acres in size, and is also a surface parking lot. This site is classified under the City's General Plan as *Neighborhood/Community Commercial*, which also allows for residential development. The removal of the existing parking use will not hinder the development of new housing units as the existing parking spaces can be replaced elsewhere as deemed necessary.

These sites are adjacent to the City's *Bascom Urban Village Plan Area*, which plans for a high-density, mixed-use neighborhood. With the proximity to the various medical facilities and high-capacity transit along Bascom Avenue, both sites are well-suited for the development of supportive housing projects.

The County will follow the timeline outlined below to complete the housing development within the sixth cycle planning period. In order to fully realize the project as forecast, continued coordination and partnership will be needed with the current owners of APN 282-02-037, a nonprofit community health organization. The County is not aware of additional barriers.

County-Led Development Process

The southwestern site (APN: 282-03-016) is owned by the County of Santa Clara and is a part of the Valley Medical Campus. The following is an analysis of necessary steps to achieve development on the property.

Upon completion of an internal space planning process in coordination with the County Facilities and Fleets Department, the site could be deemed a County-led Housing Development site under Program 1.07 and the Office of Supportive Housing (OSH) would serve as the project lead. However, in this case, because the sites are within the VMC campus there could be some additional barriers that are unforeseen or unique to County-led sites.

The following serves as a summary of the process working in coordination with the City of San José:

- Stakeholder Mapping and Coordination: During this stage, OSH works with the respective Supervisorial Office to develop a stakeholder list and a draft of the community engagement strategy. Concurrently, OSH staff meets with the City of San José's Housing Planner to discuss the potential land use development path for the property including whether it could qualify under a streamlining process under SB 35 or AB 2162. *Estimated completion date - December 2024*
- Early Community Engagement: During the second phase our focus is to host a series of listening sessions to get a better understanding and buy-in from the community. These sessions help us identify opportunities to inform the future design of the housing and determine if there are resources that are needed in the community. For instance, there may be a desire to improve a neighboring park or creek trail. Knowing this information early helps identify different funding sources to fund potential public benefits. Given that the surrounding uses are healthcare related, OSH in partnership with the Facilities and Fleet Department would host a series of meetings with VMC leadership to assess vehicular and pedestrian circulation, safety, parking, and

concerns with the proximity of housing to existing medical uses. *Estimated completion date – August 2025*

- **Developer Selection:** Information gathered during the listening sessions are incorporated into the solicitation process. Using the County’s Developer Qualified Pool (DQP), a Request for Offer (RFO) is issued to select a development partner. The solicitation process includes a panel interview, scoring, and coordination with the City of San José. Once a developer is selected, OSH negotiates the County’s early funding commitment to the project and development milestones through a development and disposition agreement. This process can take up to eight weeks including approval by the Board of Supervisors. *Estimated completion date – January 2026*
- **Entitlement and Financing:** Upon approval by the Board of Supervisors, the selected developer is introduced to the community and the formal community engagement process begins. The developer will spend the next 6 months working with the community to design a project and secure the necessary entitlements. During this time OSH helps coordinate engagement with the Lived Experience Advisory

Table 2.10: Fruitdale / Santa Clara Valley Medical Center Sites

Board to provide input and coordinates with the City of San José’s Housing Department about potential funding available. OSH continues to support the selected development partner with securing other financing throughout this phase. This includes but is not limited to local housing dollars, private philanthropy funding, and State funding applications. Assuming that the proposed development project is competitive and they are able to receive an allocation of tax credits with their first submission, the project could be permit ready within a year and a half after a development partner is selected. *Estimated completion date – July 2027*

- **Construction and Operation:** Once all financing is secured, it is anticipated that the construction finance closing and completion of the project would take approximately 24 – 30 months. *Estimated completion date – August 2029*

The anticipated share of affordable units for this site is 100% because the County is the property owner (shown in Table 2.9 Housing Capacity on Sites within Unincorporated USAs of the City of San José, above).

APN	SIZE (ACRES)	EXISTING USE	POTENTIAL UNITS		UNITS BY INCOME CATEGORY		
			Realistic Capacity	Maximum Capacity	Lower Income	Moderate	Above Moderate
282-03-016	3.5	Valley Medical Center parking lot	210	350	178	32	0
282-02-037	1.5	Valley Medical Center parking lot	90	150	77	13	0
Total	5		300	500	255	45	0

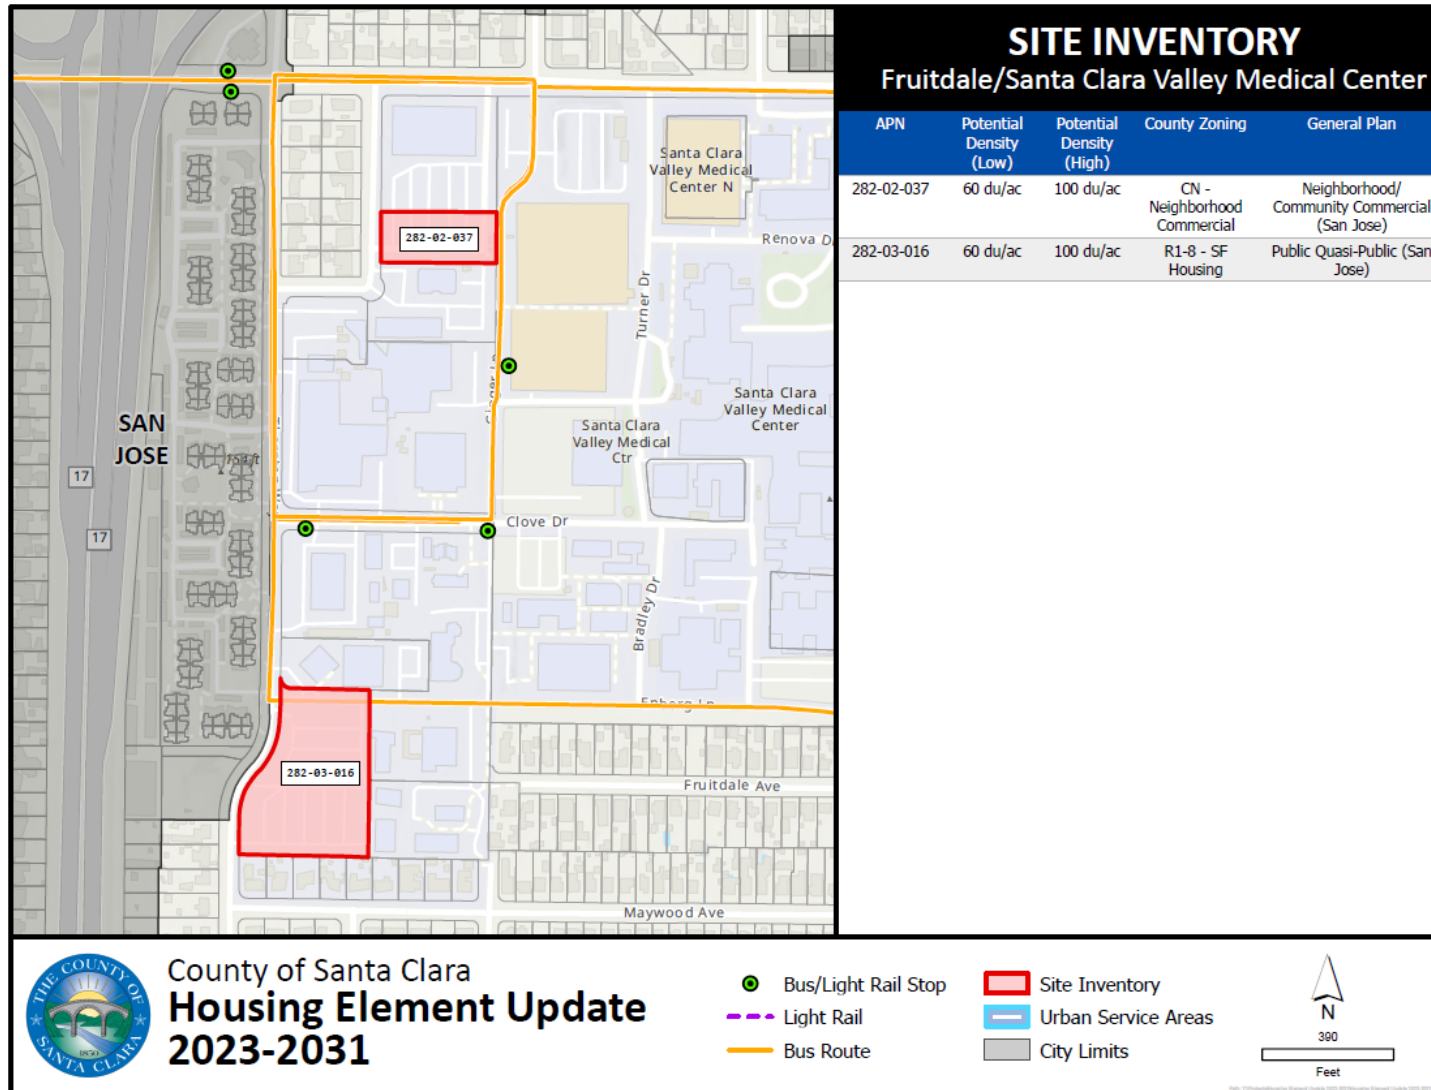

Figure 2.13: Housing Sites in Fruitdale / VMC (Larger format available in Appendix A)

Parkmoor / Burbank Neighborhood

There are nine sites identified along West San Carlos Street that are within the City's *West San Carlos Urban Village Plan Area*. These sites are relatively small (between 0.09 and 0.36 acres) and would likely be aggregated to create a larger project. However, they can also develop independently as small-scale multi-family projects and, using that approach, the County anticipates projects that would range from 4 to 36 units on the individual parcels.

These sites have been selected due to their proximity to existing infrastructure (such as water, sewer, and dry utilities) and general suitability for development. There is no known contamination on these sites, nor are they located within an airport influence area which could provide negative impacts to residents. The sites do not possess an unusual configuration and are not subject to any easements or contracts (such as a Williamson Act contract) which would limit the ability to develop on these sites. The land is identified by the California Department of Conservation as urban and built-up land and is not suitable for farming.

The California Natural Diversity Database identifies a number of species in the area. The robust spineflower (California Endangered), California tiger salamander (California Threatened), and Crotch Bumble Bee and western bumble bee (California Candidate Endangered) have been identified within the area either over a century ago or in an unspecified area of San José, but urban development and fragmentation of land over the last century makes these sites less suitable as habitat for these species.

West San Carlos Street is a high-capacity transit corridor, therefore housing in this location will have a high level of connectivity to amenities and resources.

Existing Uses, Trends, and Regulatory Framework

The Parkmoor / Burbank Neighborhood sites are currently developed with parking lots, car sales facilities, tattoo parlors, a religious institution, and a single-family residence. These sites are underutilized because they are inconsistent with the recent redevelopment of nearby parcels and long-range plans for the neighborhood.

There is an ongoing trend of redevelopment in the neighborhood that demonstrates the unrealized potential for multi-family and mixed-use residential development to occur within the planning period on the Parkmoor / Burbank sites.

Several recent projects in the City of San José illustrate the redevelopment trend of the neighborhood:

- Two parcels located a third of a mile east of the Parkmoor / Burbank sites on West San Carlos received approval in August of 2021 from the City of San José to demolish existing commercial and residential buildings to construct two new seven-story residential mixed-use buildings (City of San José Project No. SP20-004). The commercial uses that were demolished consist of a used car sales facility, restaurant, and strip mall with a barber, piñata store, and a package shipping service.
- One half mile to the east of the Parkmoor / Burbank sites a development was approved by the City of San José for a six-story 82 dwelling unit housing project that included the demolition of three single-family residences (City of San José Project No. SP17-037).

- One half mile east of the Parkmoor / Burbank sites another development within the City of San José was approved for the construction of a seven-story mixed-use development with 241 residential units (City of San José Project No. PD19-011) and including the demolition of three commercial buildings. The commercial buildings were used as medical offices, such as chiropractic, dentist, and acupuncture offices.
- Less than one half mile to the south of the Parkmoor / Burbank sites, the historic Burbank Theater is slated for annexation and redevelopment, with the current proposal including 62 units and 7,400 square feet of commercial space in a five-story building.

The redevelopment projects on the nearby City of San José sites demonstrate that uses in the area, such as single-family residences, used car sales, and retail, are suited for and are being recently constructed with multi-family and mixed-use residential development. The nine sites selected in the Parkmoor / Burbank neighborhood contain uses similar to those that were redeveloped in the City of San José (refer to Table 2.11 & Table 2.12), and therefore are expected to be redeveloped during the planning period.

Table 2.12 compares existing conditions, existing uses versus allowable uses, existing versus allowable residential units, and existing versus possible stories between the selected sites in the Parkmoor/Burbank area and the aforementioned City redevelopment projects. Both the selected sites and the nearby redeveloped sites have/had existing structures that were constructed in the 1920's and 1950's with their conditions ranging from good to neglected, and have/had a building height of no more than 1 story. The nearby City's redeveloped sites have a maximum height of up to 7 stories, while the Parkmoor/Burbank sites can go up to approximately 11 stories, pursuant to County zoning requirements in this area. The

nearby redeveloped sites include a range of residential units from 82 to 241, while the Parkmoor/Burbank sites have the possibility of developing residential units anywhere from 7 units to 36 units under the County's requirements. As the nearby redeveloped sites under the City's jurisdiction had structures of similar age, condition, and use as the Parkmoor/Burbank sites, and have realized new approvals and new construction of multi-family and mixed-use residential units thereby establishing an indisputable trend, existing uses on the Parkmoor/Burbank sites do not act as a barrier to housing development. Additionally, the Parkmoor/Burbank sites can accommodate approximately 11 stories, while the nearby developed sites show there's a demand for at most 7 stories. Therefore, the rezoning in this area further encourages the redevelopment of these sites to multi-family/mixed use residential development as is supported by the trends of redevelopment.

This trend and scale of redevelopment aligns with the City of San José West San Carlos Urban Village Plan, which encompasses the unincorporated Parkmoor / Burbank sites and anticipates their annexation and redevelopment. The West San Carlos Urban Village Plan is a "Local Transit Urban Village," for which the City of San Jose has "planned for a balanced mix of job and housing growth at relatively high densities" to create complete communities along light rail and rapid transit bus service routes. A priority for all urban villages in San Jose is to revitalize underutilized properties with access to existing infrastructure, while increasing densities to support transit use and active transportation options.

The Burbank/Parkmoor area is highlighted by West San Carlos Street and Stevens Creek Boulevard, which provide an east-west connection between downtown San José to the east and Westfield Valley Fair Mall, Santana Row, De Anza College, and the Cities of Santa Clara and Cupertino to the west, and Bascom Avenue, which connects the

Alameda and Rose Garden districts in the north to Cambrian Park and the City of Campbell in the south.

The County's realistic capacity and rezoning of these sites aligns with the City's long-range planning vision, the recent redevelopment trends, and incentivizes their redevelopment within the planning period through the rezoning program. Therefore, the existing uses and improvements on the identified Parkmoor / Burbank sites do not act as a barrier to near-term housing development.

Should an unforeseen barrier arise, the Mid-Cycle Review (Program 2.26) will further assess the sites inventory and implement a revised plan to meet the County's RHNA obligations.

The Parkmoor / Burbank Neighborhood sites have been rezoned under the Housing Opportunity Sites combining district, which does not impose a limit on residential density and requires a minimum number of housing units to be developed, specified for each parcel. The potential for new housing is limited only by height and setbacks, which are aligned with the City's requirements for the surrounding area. An applicant may request a modification to such requirements through a variance or development agreement to achieve a multi-family housing development. This rezoning requires any development to have a residential component; entirely non-residential development is not allowed on such sites.

If the proposal includes the development of a minimum percentage of affordable units, a streamlined, non-discretionary permitting processes is available. The anticipated affordability of each site is shown in Table 2.9, above, and in Table 2.11, below.

Although each of these sites are under one half acre, none of them are required or expected to be developed with lower income units. Prospective developers of these sites may, however, avail themselves of the County's new program to incentivize lot consolidation.

Program 2.30 – Incentivize Lot Consolidation, encourages the merging of such lots and therefore furthers the potential of these lots to be redeveloped during the sixth cycle planning period.

The County Inclusionary Housing Ordinance will apply to these sites, requiring a minimum of 16 percent of the units to be affordable. In certain cases where 16 percent yields less than one unit of affordable housing, the projection has been rounded up to one unit. West San Carlos Street is a high-capacity transit corridor, therefore housing in this location will have a high level of connectivity to amenities and resources.

These sites have been selected due to their proximity to existing infrastructure (such as water, sewer, and dry utilities) and general suitability for development. There is no known contamination on these sites, nor are they located within an airport influence area which could provide negative impacts to residents. The sites do not possess an unusual configuration and are not subject to any easements or contracts (such as a Williamson Act contract) which would limit the ability to develop on these sites. The land is identified as urban and built-up land and is not suitable for farming. The California Natural Diversity Database identifies a number of species in the area. The robust spineflower (California Endangered), California tiger salamander (California Threatened), and Crotch Bumble Bee and western bumble bee (California Candidate Endangered) have been identified within the area either over a century ago or in an unspecified area of San Jose, but urban development and fragmentation of land over the last century makes these sites less suitable as habitat for these species.

These sites may also be annexed by the City of San José, pursuant to State law. Should annexation occur, any future development would move forward within the City's jurisdiction and the County would

seek a commensurate transfer of RHNA units, as described in Program 4.03.

Table 2.11: Parkmoor / Burbank Neighborhood

APN	SIZE (ACRES)	EXISTING USE	POTENTIAL UNITS		UNITS BY INCOME CATEGORY		
			Realistic Capacity	Maximum Capacity	Lower Income	Moderate	Above Moderate

277-18-019 & -020	Good. Restaurant built in 1962. Appears to have been rehabilitated in 2016. Residences built in 1925. Appear to have been kept in good condition.	Restaurant and single-family residences.	Mixed use residential development (two separate buildings) – Land Use Entitlement approved December 2021	8	202	1	7 and 5
277-20-066	Neglected. Residences built in 1916 without apparent recent rehabilitation.	Three single-family residences.	Multifamily housing – Land Use Entitlement approved February 2019	3	82	2	6
274-14-152	Good. Commercial buildings constructed in 1958. Appears to have been kept in good condition.	Three medical office buildings.	Mixed use residential development - Land Use Entitlement approved January 2020	0	241	1	7

Figure 2.14: Housing Sites in Parkmoor / Burbank (Larger format available in Appendix A)

Hostetter Station

The Hostetter Station site consists of two parcels adjacent to the Hostetter Light Rail Station in North San José. These sites are ideal for multi-family housing development because they are within a State-identified high opportunity area and adjacent to the light rail station.

These sites have been selected due to their proximity to existing infrastructure (such as water, sewer, and dry utilities) and general suitability for development. There is no known contamination on these sites, nor are they located within an airport influence area which could provide negative impacts to residents. The sites do not possess an unusual configuration and are not subject to any easements or contracts (such as a Williamson Act contract) which would limit the ability to develop on these sites. The land is identified by the California Department of Conservation as partially consisting of “unique farmland” but has no recent history of agricultural use.

The California Natural Diversity Database identifies a number of species in the area. The robust spineflower (California Endangered), California tiger salamander (California Threatened), and Crotch Bumble Bee and western bumble bee (California Candidate Endangered) have been identified within the area either over a century ago or in an unspecified area of San José, but urban development and fragmentation of land over the last century make these sites less suitable as habitat for these species.

Existing Uses, Trends, and Regulatory Framework

The larger 13-acre site is largely vacant with an existing single-family residence and privately owned. The smaller 2.3-acre site is a VTA Park & Ride facility. The County has connected with VTA and representatives of the privately-owned property and both are

amenable to the development of housing on these sites. VTA representatives were supportive of up to 100 percent affordable housing. As such, there is potential for these sites to be redeveloped throughout the housing element cycle.

Under the San José General Plan, the sites are designated *Neighborhood/Community Commercial* and are also identified as an *Unplanned Urban Village* area. The allowable density under the City’s General Plan can go up to 150 dwelling units per acre within an Urban Village area, with additional density bonuses provided to 100% affordable projects. These two sites were included in the City’s fourth cycle planning period sites inventory and had a projected density at that time of 45 dwelling units per acre, with a total capacity of 630 units.

The County is anticipating that a housing project on these sites would be developed at a minimum of 80 units per acre, given its location near a transit station and the prevailing densities for more recent housing projects in San José that are near transit stations. The County will work with VTA, the City, and the project proponent to support affordable housing on this site to the maximum extent feasible.

The County will follow the timeline outlined below to complete the housing development within the sixth cycle planning period (entering a MOU with VTA to prioritize development of this site, community engagement, developer selection, entitlement and financing, and construction). As one of these sites is controlled by another governmental entity, there may be additional steps to development. In order to fully realize the project as forecast, continued coordination and partnership will be needed with VTA and the current owners of APN 245-01-003. The County is not aware of any additional barriers.

County-Led Development Process

The County is intending to leverage two sixth cycle Housing Element programs that are designed to accelerate the production of affordable and supportive housing by utilizing publicly owned land. First, the County will implement Program 1.08 (Joint Development Memorandum of Understanding (MOU) to negotiate a partnership with VTA to incorporate this property as a priority housing development site. Currently the County is working with the VTA on four similar partnership projects that once completed will add 508 Affordable Units in partnership with the Office of Supportive Housing (OSH). The properties are in a State-identified high opportunity area and at least 25% of the units will be set aside for special needs populations.

Upon completion of the negotiations with VTA, the site could be deemed as a County-led Housing Development site under Program 1.07 and OSH would serve as the project lead coordinating with the VTA Transit Oriented Development (TOD) team. All County-Led Housing Development sites follow a similar workflow process, and it usually takes five years to develop a property into housing. However, in this case, because the site is controlled by another governmental entity, there are additional steps that could result in additional barriers that are unforeseen or unique to other County-led sites.

The following serves as a summary of the process working in coordination with the City of San José and VTA:

- Stakeholder Mapping and Coordination: During this stage, OSH works with the respective Supervisorial Office to develop a stakeholder list and a draft of the community engagement strategy. Concurrently, VTA staff meets with the City of San José's Housing Planner to discuss the potential land use development path for the property including whether it could

qualify under a streamlining process under SB 35 or AB 2162. *Estimated completion date – December 2026*

- Early Community Engagement: During the second phase our focus is to host a series of listening sessions to get a better understanding and buy-in from the community. These sessions help us identify opportunities to inform the future design of the housing and determine if any of the existing parking needs to be replaced. *Estimated completion date – August 2027*
- Developer Selection: Information gathered during the listening sessions are incorporated into the solicitation process. Using the County's Developer Qualified Pool (DQP), a Request for Offer (RFO) is issued to select a development partner. The solicitation process includes a panel interview, scoring, and coordination with the City of San José. VTA include OSH staff to serve on the panel. Once a developer is selected, the VTA TOD team takes the lead in negotiating with the selected developer and approval is considered by the VTA Board. *Estimated completion date – January 2028*
- Entitlement and Financing: Upon approval by the VTA Board, the selected developer is introduced to the community and the formal community engagement process begins. The developer will spend the next 6 months working with the community to design a project and secure the necessary entitlements. During this time OSH meets monthly with the VTA team to stay apprised of any issues to ensure progress continues. *Estimated completion date – July 2029*
- Construction and Operation: Once all financing is secured, it is anticipated that the construction finance closing and completion of the project would take approximately 24 – 30 months. *Estimated completion date – August 2031*

Pursuant to Program 1.08, mentioned above, the County plans to enter into negotiations with VTA to initiate County-led housing development on the property and anticipates an affordability level noted in Table 2.13. Due to the partially public ownership and the County prioritizing this site for housing development, it is appropriate to accommodate the lower-income RHNA despite its size over 10 acres.

In support of development on this site, VTA’s Transit-Oriented Development team and the City of San José recently nominated it for MTC’s Priority Sites pilot program, which provides pre-development funding and technical assistance for projects providing affordable housing in either a Play Bay Area 2050 Growth Geography or a Transit Priority Area. The Priority Sites selected by MTC will also be included in Plan Bay Area 2050+, which can provide additional funding.

Figure 2.15: Housing Site at Hostetter Station (Larger format available in Appendix A)

Alum Rock / East Foothills Neighborhoods

Alum Rock and East Foothills are established residential neighborhoods with few remaining vacant parcels.

These sites have been selected due to their proximity to existing infrastructure (including water, sewer, and dry utilities) and general suitability for development. There is no known contamination on these sites, nor are they located within an airport influence area which could provide negative impacts to residents. The sites do not possess an unusual configuration and are not subject to any easements or contracts (such as a Williamson Act contract) which would limit the ability to develop on these sites. The land is identified by the California Department of Conservation as urban and built-up land and is not suitable for farming.

The California Natural Diversity Database identifies a number of species in the area. The robust spineflower (California Endangered), California tiger salamander (California Threatened), and Crotch Bumble Bee and western bumble bee (California Candidate Endangered) have been identified within the area either over a century ago or in an unspecified area of San José, but urban development and fragmentation of land over the last century makes these sites less suitable as habitat for these species.

Existing Uses, Trends, and Regulatory Framework

The Alum Rock / East Foothills neighborhood sites that are considered non-vacant are currently underutilized and developed with parking lots, a shopping center, and a single-family residence.

These sites are underutilized because they are inconsistent with the recent redevelopment of nearby parcels and long-range plans for the neighborhood.

There is an ongoing trend of redevelopment in the neighborhood that demonstrates the unrealized potential for multi-family and mixed-use residential development to occur within the planning period on the Alum Rock / East Foothills sites.

Several recent projects approved by the City of San José illustrate the redevelopment trend of the neighborhood:

- One site, located 1.5 miles northwest of the Alum Rock / East Foothills sites, is under review by the City for the demolition of a single-family residence and the development of a 7-story, 350-unit apartment building and a 3-story, 32-unit townhome building (City of San José Project No. H21-015).
- Approximately 1.75 miles west of the Alum Rock / East Foothills sites, a development was approved by the City that included the demolition of an existing shopping center (uses included a salon, cell phone store, shoe store, and spa) and surface parking lot to make way for a new 87-unit residential building with 3,000 sf of commercial space (City of San José Project No. CP18-044).
- Approximately 2 miles west of the Alum Rock / East Foothills sites a development was approved by the City for the construction of a five-story building with 3,000 sf of commercial space and 185 affordable units (City of San José Project No. CP20-015). This project included the demolition of a pet store, plastering contractor, and salvage/recycling operator.
- Approximately 2.5 miles west of the Alum Rock/East Foothills sites, a development was approved by the City for the demolition of existing commercial and residential buildings to construct a 6-story mixed-use building with 123 residential units and ground floor retail (City of San José Project No.

PDC18-021&PD18-016). The existing uses to be demolished consisted of a wheel and tire store, a panderia, and multi-family apartments.

The redevelopment projects on the nearby City of San José sites demonstrate that uses in the area, such as single-family residences and shopping centers, are suited for multi-family and mixed-use residential development. The sites selected in the Alum Rock/ East Foothills neighborhood contain uses similar to those that were redeveloped in the City of San José (refer to Table 2.14 & Table 2.15) and are therefore expected to be redeveloped during the planning period.

Table 2.15 compares existing conditions, existing uses versus possible uses, existing versus allowable residential units, and existing versus possible stories between the selected sites in the Alum Rock/East Foothill area and the aforementioned City redevelopment projects. Both the selected sites and the nearby redeveloped sites have/had existing structures that were constructed in the 1960's or earlier with their buildings in generally good condition and have/had a building height of no more than 1 story. The nearby City's redeveloped sites have a maximum height of up to 7 stories, while the Alum Rock/East Foothill sites can go up to 10 stories, pursuant to County zoning regulations in this area. The nearby redeveloped sites include a range of residential units from 87 to 382, while the Alum Rock/East Foothill sites have the possibility of developing residential units anywhere from 7 units to 45 units under County regulations.

As the nearby redeveloped sites had structures of similar age, condition, and use as the Alum Rock/East Foothill sites, and have realized new approvals and new construction of multi-family and mixed-use residential units thereby establishing an indisputable trend, existing uses on the Alum Rock/East Foothill sites do not act as a barrier to housing development. Additionally, the Alum Rock/East

Foothill sites can accommodate 10 stories while the nearby developed sites show there's a demand for at most 7 stories. Therefore, the rezoning in this area further encourages the redevelopment of these sites to multi-family/mixed use residential development as is supported by the trends of redevelopment.

This trend and scale of redevelopment aligns with the City of San José's long-range plans for the neighborhood, which anticipates the annexation and redevelopment of these sites. Two of the five parcels identified in this area are in an Unplanned Urban Village under San José's General Plan and were recently redesignated by the City to accommodate multi-family housing with a density range between 40 to 80 units. The other three sites are within existing neighborhoods and their capacity reflects the density allowed under the current San José General Plan *Residential Neighborhood* designation.

The County's realistic capacity and rezoning of these sites aligns with the City's long-range vision and incentivizes their redevelopment within the planning period.

Therefore, the existing uses and improvements on the identified Alum Rock / East Foothills sites do not act as a barrier to near-term housing development. However, should an unforeseen barrier arise, the Mid-Cycle Review (Program 2.26) will further assess the sites inventory and implement a revised plan to meet the County's RHNA obligations.

The Alum Rock / East Foothills sites have been rezoned under the Housing Opportunity Sites combining district, which does not impose a limit on residential density and requires a minimum number of housing units to be developed, specified for each parcel. The potential for new housing is limited only by height and setbacks, which are aligned with the City's requirements for the surrounding area. An applicant may request a modification to such requirements through a variance or development agreement to achieve a multi-

family housing development. This rezoning requires any development to have a residential component; entirely non-residential development is not allowed on such sites.

These sites may also be annexed by the City of San José, pursuant to State law. Should annexation occur, any future development would move forward within the City’s jurisdiction and the County would seek a commensurate transfer of RHNA units, as described in Program 4.03.

Table 2.14: Alum Rock / East Foothills Neighborhoods

APN	SIZE (ACRES)	EXISTING USE	POTENTIAL UNITS		UNITS BY INCOME CATEGORY		
			Realistic Capacity	Maximum Capacity	Lower Income	Moderate	Above Moderate
612-21-004	0.82	Undeveloped lot	4	7	0	1	3
599-39-047	0.56	Single family residence	22	45	0	4	18
599-01-064	0.74	Shopping center	15	22	0	2	13
601-25-119	1.9	Religious facility parking lot	10	15	0	2	8
601-07-066	1.49	Single family residence	7	12	0	1	6
Total	5.51		58	101	0	10	48

Note: Alum Rock / East Foothills sites are not required or expected to accommodate lower-income units and their development is not necessary to meet the County’s RHNA obligations, however, they are included in the Sites Inventory for the housing opportunity they present and have been rezoned accordingly.

Table 2.15 Alum Rock/East Foothill vs Nearby Redeveloped Sites

County Housing Opportunity Sites							
APN	Existing Condition	Existing Use	Allowable Uses	Existing Units	Maximum Allowable Units	Existing Stories	Possible Stories
612-21-004	N/A – no building on-site	Vacant	multifamily housing and mixed-use residential development.	0	7	0	135 ft – can accommodate approximately 10 stories (no maximum stories).

Figure 2.16. Housing Sites at Alum Rock / East Foothills (Larger format available in Appendix A)

Cambrian Park Site

The single site within the Cambrian Park neighborhood is within a State-identified high opportunity area and has been selected due to its proximity to existing infrastructure (including water, sewer, and dry utilities) and general suitability for development. There is no known contamination on these sites, nor are they located within an airport influence area which could provide negative impacts to residents. The sites do not possess an unusual configuration and are not subject to any easements or contracts (such as a Williamson Act contract) which would limit the ability to develop on these sites. The land is identified by the California Department of Conservation as urban and built-up land and is not suitable for farming. The California Natural Diversity Database does not identify any species in the area.

Existing Uses, Trends, and Regulatory Framework

This site is currently developed with a liquor store and cell phone repair shop. Although this site contains an existing use, there is a history of annexation and development in the nearby areas of San José that demonstrates the potential for redevelopment on the Cambrian Park neighborhood site. Specifically, two parcels located a quarter mile to the west of the subject site received approval in August of 2022 from the City of San José to annex the parcels into the City and demolish the existing strip mall into a planned development with residential, commercial, and open space uses (City of San José Project No. [PDC17-040](#)).

Due to the trends of neighboring sites being developed with multi-family housing despite having an existing use present, the County finds that the existing uses on the Cambrian Park site do not act as a barrier to future housing development. However, should an unforeseen barrier arise, the Mid-Cycle Review (Program 2.26) will further assess the sites inventory and implement a revised plan to meet the County's RHNA obligations.

The Cambrian Park site has been rezoned under the Housing Opportunity Sites combining district, which does not impose a limit on residential density and requires a minimum number of housing units to be developed, specified for each parcel. The potential for new housing is limited only by height and setbacks, which are aligned with the City's requirements for the surrounding area. An applicant may request a modification to such requirements through a variance or development agreement to achieve a multi-family housing development. This rezoning requires any development to have a residential component; entirely non-residential development is not allowed on such sites.

These sites may also be annexed by the City of San José, pursuant to State law. Should annexation occur, any future development would move forward within the City's jurisdiction and the County would seek a commensurate transfer of RHNA units, as described in Program 4.03.

Table 2.16: Cambrian Park Neighborhood

APN	SIZE (ACRES)	EXISTING USE	POTENTIAL UNITS		UNITS BY INCOME CATEGORY		
			Realistic Capacity	Maximum Capacity	Lower Income	Moderate	Above Moderate
419-12-044	0.78	Liquor store and cell phone repair shop	8	16	0	1	7

Note: Cambrian Park sites are not required or expected to accommodate lower-income units and their development is not necessary to meet the County’s RHNA obligations, however, they are included in the Sites Inventory for the housing opportunity they present and have been rezoned accordingly.

Figure 2.17. Housing Site in Cambrian Park Neighborhood (Larger format available in Appendix A)

Pleasant Hills Site

The 114-acre site of the decommissioned Pleasant Hills golf course promises to be one of the most significant sites for residential development within the unincorporated county during the 2023-2031 planning period.

The site is not within a State-identified high opportunity area; however, it is in the vicinity (within 1.5 miles) of San José's largest area of "Highest Resources" according to [HCD's Opportunity Map](#). The site is less than one mile from a major transit stop, placing it just outside of, but very close to, a Transit Priority Area. Moreover, development of the site, and the nearby Reid-Hillview Airport (proposed to be closed in 2031 and with the potential for high-density residential redevelopment), is likely to result in major increases to transit service in the immediate vicinity.

The Pleasant Hills site has been selected in part due to its proximity to existing infrastructure and general suitability for development. There is no known contamination on this site. The site is located near the Reid-Hillview Airport, outside of the airport safety zone and therefore suitable for residential development. The parcels are located between the MSL 283 and 433 lines, which limit the maximum height allowed (in feet) above sea level for new development. These height limits do not present a realistic constraint to the type of housing likely to be developed on this site. The site does not possess an unusual configuration and is not subject to any easements or contracts (such as a Williamson Act contract) that would limit the ability to develop. The land is identified by the California Department of Conservation as consisting of "grazing land," but has no recent history of agricultural use.

The California Natural Diversity Database identifies a number of species in the area. The robust spineflower (California Endangered), California tiger salamander (California Threatened), and Crotch Bumble Bee and western bumble bee (California Candidate Endangered) have been identified within the area either over a century ago or in an unspecified area of San José, but urban development and fragmentation of land over the last century makes these sites less suitable as habitat for these species.

Existing Uses, Trends, and Regulatory Framework

There is no existing use on the Pleasant Hills site; it is a decommissioned golf course with no other current use. Although the site consists of two parcels over 10 acres, there is a high likelihood of development during the sixth cycle planning period. Due to a variety of factors, there are no anticipated barriers for achieving the estimated level of housing on this site – such factors include the site's vacancy, the ability to process a housing development application through either the City or County, the City's interest in seeing the site developed, and the developer's active application with the City to construct multi-family housing at the scale represented below in Table 2.17.

This site does not currently have a land use designation for housing under the City of San José General Plan; however, a developer application has been submitted to change the General Plan designation for this property and on December 6, 2022, the San José City Council removed a policy barrier for housing and mixed-use development on the site.¹⁵

The County anticipates that the City will process the application to change the General Plan designation, pre-zone the property for high-

¹⁵ On December 6, 2022, the City of San José City Council amended its Policy 5-1, "Transportation Analysis Policy." [More information is available at this link](#).

density residential and mixed-use development, and then annex the property to process the development application under the City's jurisdiction. The removal of a policy barrier by the City and application for a General Plan change by the developer demonstrates the potential for imminent development of the site. The current development proposal with the City seeks a General Plan amendment that would allow up to 3,970 housing units (approximately 35 units per acre) on the parcel, in addition to 785,000 square feet of retail and commercial space. Alternatively, the developer could choose to submit an application to the County, prior to annexation.

The County has conservatively estimated a lower density of 25 units per acre as the realistic capacity. As of June 2024, based on discussions with the developer, incorporating feedback from the recent community outreach process, and the City's overall planning goals, development on the site is likely to be in the range of 28 to 32 units per acre. Significant parcelization is expected prior to residential development, which would likely occur in four phases, from 2027 through 2031. The first three phases would focus on residential development and deliver relatively equal portions of the residential units. A fourth phase would develop the commercial components of the project. This approach supports the adequacy and suitability of these sites to support the development of lower-income units.

Should the proposed development on this site come to fruition under the County's land use authority, the project will be required to include a minimum number of very low-income and low-income housing units but does not impose an overall limit on residential density, pursuant to the recently adopted Housing Opportunity Sites

combining district (Program 2.02) (County Zoning Ordinance Chapter 3.75.020). The potential for new housing is limited only by height and setbacks, which are aligned with the City's requirements for the surrounding area. The adopted programmatic EIR analyzed up to 35 dwelling units per acre on this site, for a total of approximately 4,000 units. In other words, the rezoning enables a developer to size and configure a project to meet market demands and trends to achieve the projected realistic capacity, inclusive of the required affordable units.

An applicant may request a modification to such requirements through a variance or development agreement to achieve a multi-family housing development. This rezoning requires any development to have a residential component; entirely non-residential development is not allowed on such sites.

The developer's proposal identifies the inclusion of affordable housing but does not yet specify a level or amount. The County's Inclusionary Housing Ordinance (County Zoning Ordinance Chapter 4.20.130) requires 16% of total dwelling units be made affordable to lower-income households.¹⁶ Due to the significant and singular potential of this site, the County will work with the applicant and the City, as applicable, to support a high proportion of the units as affordable to lower-income households.

Should the developer choose to submit an application to the County, prior to annexation, the County will continue to coordinate with the City regarding the development of these parcels, including infrastructure to provide the necessary urban services and future annexation, as appropriate. See Program 4.03 for additional

¹⁶ Upon annexation of the Pleasant Hills into the City of San José, the affordability requirement could be 1% lower (15%), pursuant to the City of San José's Inclusionary Housing Ordinance.

information on the process of transferring RHNA units in the case of an unincorporated site being annexed.

Table 2.17: Pleasant Hills Site

APN	SIZE (ACRES)	EXISTING USE	POTENTIAL UNITS		UNITS BY INCOME CATEGORY		
			Realistic Capacity	Maximum Capacity	Lower Income	Moderate	Above Moderate
649-23-001	70.5	Decommissioned golf course	1,762	2,468	211	70	1481
649-24-013	43.5	Decommissioned golf course	1,088	1,523	131	44	913
Total	114		2850	3991	342	114	2394

Figure 2.18. Pleasant Hills Site (Larger format available in Appendix A)

Projected ADU Development

As explained in section 3.02c, after recent Zoning Ordinance changes the County has seen an increase in ADU permit applications and issuance. Therefore, the County is conservatively anticipating 46 ADU permits per year over the 2023-2031 period, which is reflective of the average annual rate from 2018 through 2022. This rate would yield a total of 368 dwelling units over the eight-year planning period.

The County does not plan to require any deed-restricted affordable housing requirements for ADUs; however, it does anticipate that approximately a quarter of these units would likely be moderate-income units based upon prevailing rents across different parts of the County.

Probable Housing Development

The purpose of this section is to identify the probable development expected to occur over the planning period of the 2023 Update, which ends in 2031. The analysis here is distinct from the previous capacity analysis, which indicates the feasible potential for housing development without focusing on what is most likely to occur.

There are many reasons to believe that the sites identified in this Housing Element—particularly the largest sites—will successfully be developed during the planning period. First, the County has been working with Stanford University on its near-term plans to provide on-campus housing for students, faculty, staff, and other workers. The University has confirmed its desire to build on the three sites identified in this Housing Element and anticipates realizing the density and number of units identified in the above capacity analysis.

Second, the County has spoken with owner representatives for the sites near Hostetter Station, who confirmed the desire to develop high-density housing on the site and that it would likely be available for such development within the next eight years.

And third, the owners of the Pleasant Hills site are seeking to sell the property to a developer. As described under the capacity analysis above, a development proposal has been submitted and the City of San José has affirmatively taken steps toward making the site developable for housing. Due to these recent developments, County and City staff believe that the development of Pleasant Hills is highly likely within the next eight years.

While the other smaller parcels identified within the City of San José USA may also develop, they are not included in the probability analysis as the County has not received any direct feedback or confirmation from the owners of these parcels.

In addition to the parcels identified in the sites inventory (Appendix A), the probable housing development analysis relies upon historical development trends to determine development potential, rather than merely counting vacant parcels. This is especially important for the rural unincorporated areas, where there are significant environmental constraints to developing on certain parcels. Based on trends in recent development activity, the County anticipates approving roughly 46 ADUs per year and 40 single-family homes per year, on average, during the sixth cycle planning period. Table 2.18 provides the probable number of units that are likely to be issued a building permit between 2023 and 2031, with the following assumptions:

- The Fruitdale sites are located on County-owned property utilized for the Santa Clara Valley Medical Center. Preliminary internal discussions have indicated that two areas of the campus are likely candidates for development of 100% affordable housing during the sixth cycle planning period.
- Stanford Campus housing, when constructed, provides housing that is generally affordable across income levels.
- Pleasant Hills Golf Course has area to supply affordable housing, with access to services and amenities, above and

beyond the City's 15% inclusionary requirements and the County's 16% inclusionary requirements. Double the inclusionary requirements for affordability is manageable and appropriate. The County could work with the City and a developer to exceed 30% of the units being affordable for moderate- and below moderate-income households.

- Hostetter Station sites include a VTA-owned parcel and a privately owned parcel. The VTA has confirmed its support of 100% affordable housing on its parcel, and the County has conservatively applied a reasonable affordable number of units on the privately owned parcel.

Housing Development Mid-Cycle Review

By December 2026, the County shall complete a review of housing permits issued and units transferred via annexation to determine if they are in line with the projections to meet the County's RHNA requirement by the end of the sixth cycle planning period. If the review indicates that the selected sites may not be developed at the capacities discussed in Sections 2.04b and 2.04c, then the County will re-evaluate the sites inventory list and explore additional ways to incentivize and remove barriers to housing production, such as streamlining permit processing, reduction of fees, removal of subjective requirements, and CEQA streamlining. The additional site selection and/or barrier removal shall be completed by December 2027 (Program 2.26).

2.04d Summary of Quantified Objectives

Based on the needs, resources, and constraints analyzed in this Housing Element, Tables 2.16 and 2.17 summarize the estimated number of units to be constructed or rehabilitated during the 2023-2031 planning period, as well as the conservation/preservation of existing affordable housing stock.

From a housing needs perspective, new housing units, rehabilitated housing units, and preservation of existing affordable units are all important for a healthy housing market which serves all income levels. While the County has many programs to help construct new and preserve existing affordable units throughout Santa Clara County, this section will focus only on units in the unincorporated areas.

Unincorporated Santa Clara County has fewer existing affordable units and a lower capacity for new units than some of the county's constituent cities. Most multi-family development since 1970 has occurred within one of the incorporated cities, or on unincorporated lands that become annexed into one of the cities. The only three multi-family developments constructed since 1970 that are still in unincorporated areas are: an 8-unit and 18-unit development owned by the Emergency Housing Consortium of Santa Clara County, constructed in 1998, and the 29-unit "Vivente I" development, constructed on County land in 1989 and managed by MidPen Housing. The remaining 632 units of multi-family housing in the unincorporated areas of the county were constructed between 1900 and 1968. While the County has no information indicating if or to what extent these 632 units may be in need of rehabilitation, it is reasonable to assume that all units could benefit from seismic retrofitting.

The overwhelming majority of units within the unincorporated area are single-family dwellings. None of these units are considered below market rate, although some have developed accessory dwelling units (ADUs) or Junior ADUs, which could be rented out at differing levels of affordability. According to assessor data, the unincorporated areas of Santa Clara County include 17,737 single-family homes and 52 duet homes. These residences range in age from the Victorian era to newly constructed. Approximately 1% of single-family residences

currently in the unincorporated area were constructed in the Victorian era (1850-1900), and 18% in the pre-World War 2 or wartime era (1901-1945). These pre-1946 homes represent the most vulnerable housing stock in the County's jurisdiction. All of Santa Clara County experienced a post-war boom, with 38% of all single-family homes in the unincorporated areas constructed between 1946 and 1960. This post-war boom prompted the County to begin requiring building permits in 1947. 24% of single-family homes were constructed from 1961 to 1980, 12% from 1981 to 2000, and 7% from 2001 to 2023.

The slowdown in development of single-family residences in the unincorporated areas of the County over the last 50 years can in part be explained by a groundbreaking set of agreements between the County and the 15 constituent cities in 1970, to focus development into the urban service areas and protect the areas outside of the urban service areas for agriculture, recreational open space, natural resource conservation, and natural hazard buffer zones. The dwindling supply of readily developed parcels after the post-war building boom also contributed to the decline in new housing starts, as well as policy interventions like Proposition 13, which had a deterring effect on the frequent sale of homes in order to purchase larger homes.

Some of the older housing stock has been significantly rehabilitated. Approximately 4% of homes at least 25 years in age have undergone a significant remodel since 1990. With the remaining vacant parcels available only at a premium price, and with significant site constraints such as slope, remodels continue to be an important tool for homeowners, including new buyers, seeking to upgrade their older homes. Between 2018 and 2023, the County issued 877 building permits to remodel existing residences, which is roughly 5% of all homes over a six-year period.

Between 2019 and 2023, the County Code Enforcement Division received complaints involving substandard housing at 139 distinct addresses. This represents less than 1% of all housing units in the unincorporated areas, although there are many reasons why this number is not fully representative. The County relies on a complaint-based code enforcement system and does not pro-actively inspect residences, whether they are owner-occupied, rental units, or vacant. An owner is unlikely to submit a complaint against themselves, and renters may be deterred from reporting issues due to either a fear of retaliation, or fear that if improvements are made the residence will no longer be affordable to them. Many of the complaints received revolve around the unpermitted conversion of structures into substandard housing or overcrowding, both of which point more towards the lack of housing availability than to the overall housing stock conditions.

County Code Enforcement Officers estimate that 55% of housing stock in unincorporated areas is in need of some kind of repair beyond purely cosmetic improvements, with approximately 10% in need of more serious repair. These numbers are likely higher in the unincorporated areas than in the cities due to the remote locations of some parcels, the existence of multiple accessory buildings that could be converted to housing, and the lack of visibility on many parcels due to terrain, vegetation, or parcel size.

While the County has programs for minor home repairs that can benefit all housing types (refer to Program 1.31, Minor Home Repair and Maintenance Program), the focus on rehabilitation and preservation of affordability in County programs will be directed primarily to multi-family units.

Programs 1.09, 1.12, 1.13, 1.14, and 1.16 help provide funds to create and preserve affordable housing. Program 1.30 will preserve the existing affordability of units constructed with financial and other

forms of support from the County. Program 2.21 will see the County review options to allow rehabilitation or replacement of such multi-family units without compromising their legal nonconforming status. In 2025, the County will develop ordinance or policy updates to help streamline such rehabilitation and replacement of older multi-family units. The County will also consider opportunities to preserve the affordability of existing units, whether required or naturally occurring. This may include partnering with community development corporations to acquire, rehabilitate, and preserve the affordability of units.

Lastly, the County will assess the housing stock and conditions of agricultural worker housing and explore related opportunities to streamline rehabilitation and replacement of such units, as appropriate (refer to Programs 2.05, 2.15, & 4.02).

Table 2.18 reflects the anticipated new units to be constructed on unincorporated lands during the 2023-2031 planning period, delineated by unit type and household income level. "New construction" refers to the number of new units that potentially could be constructed using public and/or private sources over the planning period, given the locality's land resources, constraints, and proposed programs.

Table 2.19 summarizes the quantified objectives for the 2023-2031 planning period, with the new construction totals from Table 2.18 alongside rehabilitation and conservation/preservation of existing units. The "Rehabilitation" objective refers to the number of existing units anticipated to be rehabilitated during the planning period. The

"Conservation/Preservation" objective refers to the anticipated preservation of the existing affordable housing stock throughout the planning period.

Based on prior permit history and trends, in combination with new programs and incentives, the County forecasts that 5% of all single-family or duet homeowners in the unincorporated areas will seek permits to voluntarily rehabilitate their homes during the sixth cycle planning period. This amounts to approximately 890 units, 25% of which are anticipated to be affordable to moderate-income households, with the remaining 75% affordable to above moderate-income households.

Although County rehabilitation and conservation/preservation programs are not exclusive to unincorporated properties, based on past trends of program implementation, 79 low-income units and 79 very low-income units are anticipated to be rehabilitated and/or conserved/preserved in the unincorporated areas.

Approximately one third of moderate-income units to be rehabilitated are anticipated to be conserved/preserved as moderate-income. No above moderate-income units are projected for conservation/preservation because, by definition, they are not considered to be part of the existing affordable housing stock. Furthermore, the market trends are such that any existing above moderate-income housing unit is expected to remain affordable only to above moderate-income households during the planning period, and there is no threat of conversion or demolition of such units.

Table 2.18: New Construction in Unincorporated County, 2023-2031

UNIT TYPE	VERY LOW	LOW	MODERATE	ABOVE MODERATE	TOTAL UNITS
Single Family Dwellings <i>(40 units/year)</i>	-	-	-	360	360
ADUs <i>(46 units/year)</i>	-	-	92	276	368
Fruitdale / Santa Clara Valley Medical Center	186	69	45	0	300
Stanford Campus	336	252	252	840	1,680
Pleasant Hills	228	114	114	2,394	2,850
Hostetter Station Site	325	187	200	514	1,226
Parkmoor/Burbank Neighborhood	-	-	14	62	76
Alum Rock/East Foothills	-	-	10	48	58
Cambrian Park	-	-	1	7	8
Total Probable 2023-2031	1,075	622	728	4,141	6,566

Note: Parkmoor / Burbank, Alum Rock / East Foothills, and Cambrian Park sites are not required or expected to accommodate lower-income units and their development is not necessary to meet the County's RHNA obligations, however, they are included in the Sites Inventory for the housing opportunity they present and have been rezoned accordingly.

Table 2.19: Quantified Objectives for Unincorporated County, 2023-2031

HOUSING PROGRAM	QUANTIFIED OBJECTIVES PER INCOME GROUP					TOTALS
	EXTREMELY LOW	VERY LOW	LOW	MODERATE	ABOVE MODERATE	
New Construction	1,075	622	728	4,141	6,566	
Rehabilitation	79	79	222	667	1,047	
Conservation/Preservation	79	79	74	0	158	

2.04e Zoning for a Variety of Housing Types

Table 2.20 sets forth how the County’s zoning districts accommodate a variety of housing types described in State law.

Table 2.20: Zoning for a Variety of Housing Types

HOUSING TYPE	USE CLASSIFICATION	ZONING DISTRICTS	PERMIT REQUIREMENTS
Multi-family rental housing	Residences – Multi-family	R1S, R3, R3S, CN, CG, OA, A1	UP, ASA, UP/ASA for mixed use projects
Agricultural employee (temporary, small-scale permanent, large-scale permanent, seasonal)	Ag-Employee Housing	A, AR, HS, RR	SP, with time limits, 4.10.040 Suppl. Use Regs. C for temporary, small-scale permanent in A & RR
Group quarters up to 36 beds	Ag-Employee Housing – Long Term (Large-Scale permanent)	A, AR, HS, RR, A1 in rural areas	SP A1 with UP
Single-family/HH units up to 12 units	Ag-Employee Housing – Long Term (Large-Scale permanent)	A, AR, HS, RR, A1 in rural areas	SP A1 with UP
Emergency shelters	Emergency Shelters Small-Scale Large-Scale	Small-Scale (RR-R3-CN-CG-OA-ML-MH-A1-Rs) Large-Scale (RR-R3-CN-CG-OA-ML-MH- A1)	Small-Scale By right, or ASA in applicable urban zoning districts Large-Scale with UP
Transitional and supportive housing in structures designed for families and households of six or fewer people	Residential: Single Family, Two Family, Multi-Family	All Urban zones and All Rural zones-CN-CG-OA-A1-RS (single-family dwellings) -R1S-R3S-R2, R3- CN-CG-OA-A1 (duplexes) -R1S-R3S-R3- CN-CG-OA -A1(apartments)	By Right for structures designed as single-family dwellings, otherwise with ASA Single family in R3S with ASA CN-CG-OA- with UP Single family in RS with UP
Transitional and supportive housing in structures designed with communal dining and living facilities	Residential Communal Institutional	All Urban zones except R1S & R3S, All Rural zones, A1.	UP
Single-room occupancy	Rooming Houses, Fraternities & Sororities	R1, R1E, R2, R3, A1, R1S, R3S	UP, except ASA in R3
Mobile homes / Factory-built housing	Residences –Single Family	All zones	By right
Movable Tiny Homes	Accessory Dwelling Unit	All Urban zones All Rural zones CN-CG-OA A1-RS	C

Accessory Dwelling Units (including Junior Accessory Dwelling Units)	Accessory Dwelling Units	All Urban zones All Rural zones CN-CG-OA A1-RS	By right
Urban Primary Unit	Single-Family Residential	All zones	By right

Note: Permit Type abbreviations are C = Planning Clearance, SP = Special Permit, UP = Use Permit, ASA = Architecture and Site Approval.

The following sections elaborate on each of the housing types specified in the first column of Table 2.20.

2.04f Multi-Family Residential Development

Multi-family residences are allowed in R1S, R3S, and R3 zones with an Architecture and Site Approval (ASA) permit. ASA is a discretionary permit required for certain applications as detailed in the County Ordinance and require review by the Zoning Administrator or other hearing body at a public hearing. The required findings for an ASA approval are detailed in the Zoning Ordinance and are listed below:

- Adequate traffic safety, on-site circulation, parking and loading areas, and insignificant effect of the development on traffic movement in the area;
- Appearance of proposed site development and structures, including signs, will not be detrimental to the character of the surrounding neighborhood or zoning district;
- Appearance and continued maintenance of proposed landscaping will not be detrimental to the character of the surrounding neighborhood or zoning district;
- No significant, unmitigated adverse public health, safety and environmental effects of proposed development;
- No adverse effect of the development on flood control, storm drainage, and surface water drainage;

- Adequate existing and proposed fire protection improvements to serve the development;
- No significant increase in noise levels;
- Conformance with zoning standards, unless such standards are expressly eligible for modification by the Zoning Administrator as specified in the Zoning Ordinance;
- Conformance with the general plan and any applicable area or specific plan, or, where applicable, city general plan conformance for property located within a city’s urban service area; and
- Substantial conformance with the adopted “Guidelines for Architecture and Site Approval” and any other applicable guidelines adopted by the County.

While some of these findings are necessary for health and safety, others could create uncertainty or barriers which could constrain the development of multi-family housing in desired areas. These include high parking requirements per unit, conformance to neighborhood character, and conformance to guidelines and policies which lack objective standards. To this end, the County will create a new process for review of multi-family residential development on properties located within designated Housing Opportunity zones under a non-discretionary permit.

The non-discretionary permit will be ministerially reviewed and approved if they meet a set of objective criteria. These will include:

- Conforms with all requirements of the California Building Code as locally adopted and amended;
- Adequate traffic safety, on-site circulation, and loading areas, and compliance with County design standards for traffic improvements;
- Proposed landscaping will comply with the County’s Water Efficiency standards;
- No significant, unmitigated adverse public health, safety and environmental effects of proposed development;
- Proposed development will meet County and Regional Water Quality Control Board standards for drainage;
- Adequate existing and proposed fire protection improvements to serve the development;
- Noise levels will not exceed those allowed in the County Noise Ordinance; and
- The project provides for at least the required number of inclusionary units as specified in the Zoning Ordinance.

By removing discretionary reviews, subjective criteria, parking requirements, as well as not imposing height, FAR, or lot coverage restrictions on these projects, developers will be able to apply with greater certainty that their projects would be approved.

2.04g Multi-Family Rental Housing

Multi-family rental housing is not differentiated from any other type of multi-family uses or occupancies under the Zoning Ordinance.

2.04h Agricultural Employee Housing

Agricultural employee housing use classifications of the Zoning Ordinance define three subcategories of use – *small-scale permanent*, *large-scale permanent*, and *seasonal*. Seasonal housing

can be in the form of movable tiny homes, which are on the property temporarily. Small-scale and large-scale permanent housing may be either in the form of a site-built single-family dwelling, duplex, multi-family dwelling, group quarters, mobile and/or manufactured homes. The Zoning Ordinance also allows for *Temporary Agricultural Residences* in the rural base zoning districts, which can be a recreational vehicle or movable tiny home that provides temporary housing to a person engaged in an on-site agricultural operation. The County’s special zoning classifications and procedures for agricultural employee housing are in addition to applicable state statutes.

The California Employee Housing Act (Health and Safety [H&S] Code 1700 et seq.) generally requires employee housing for occupancy by six or fewer employees to be permitted by-right, without a conditional use permit, in single-family zones. Section 17021.5 requires such employee housing to be permitted by right. This requirement is satisfied by section 2.10.030 of the County’s Zoning Ordinance, which specifically states that the definition of residence (which are permitted by right) includes “Employee housing that provides exclusive accommodation for six (6) or fewer employees, pursuant to California Health and Safety Code Section 17021.5.”

2.04i Emergency Shelters

An emergency shelter is a place for homeless people to live temporarily. Most emergency shelters provide shelter for a specific time-period e.g., 90 days after which the individual or family is expected to vacate it. Short-term shelter is needed to meet the needs of homeless persons lacking shelter due to a variety of reasons, including family violence, crime, fire, condemnation, or eviction.

The County’s response to homelessness is led by OSH, which manages programs ranging from preventative measures, such as rental assistance and assistance to first-time home buyers,

emergency, transitional, and supportive housing, and connection to training and services. OSH leverages funds from HUD as well as local funds (namely the 2016 “Measure A” Affordable Housing Bond). The County uses the Santa Clara County Community Plan to End Homelessness 2020-2025 (an extension of the Community Plan to End Homelessness in Santa Clara County 2015-2020) as its guide which amongst other things calls for the doubling of the number of shelter beds across the County.

2.04j Transitional Housing

Transitional housing is temporary, supportive housing for people. Transitional housing is generally provided for a limited period –from 2 weeks to 24 months.

2.04k Supportive Housing

Supportive Housing is an effective strategy that combines affordable housing with intensive coordination services to help previously unhoused individuals find and retain housing. The Santa Clara County Supportive Housing System includes two primary housing interventions that fall within the umbrella of Supportive Housing: permanent supportive housing and rapid rehousing.

Permanent Supportive Housing program provides permanent housing and supportive services to chronically homeless individuals and families. The target population for permanent supportive housing program are chronically homeless individuals with a disability. The program focuses on the population that has high acuity and high costs. The program provides rental subsidy, intensive case management and health care (including behavioral health) to the program participants. There is usually no time limit for the program. PSH has been seen to have a high impact on housing stability. Nationally 84% of program participants have been observed

to retain housing for at least a year. Locally our housing retention system goal is 95%.

Rapid rehousing is an intervention that has been seen to be a successful model in addressing the issue of homelessness in different parts of the country. There are three core-components of rapid rehousing: 1) Housing identification; 2) move-in and rent assistance; and 3) rapid rehousing case management and services. The clients are provided shallow or declining rent subsidy, other temporary financial assistance and time-limited case management. It has been observed that rapid rehousing helps individuals and families to quickly exit homelessness, return to housing in the community, and not become homeless again in the near future.

2.04l Single-Room Occupancy

Single-room occupancy (SRO) housing is expressly defined in the Zoning Ordinance as a subset of the Rooming Houses, Fraternities, & Sororities use classification, where SROs are characterized by facilities that feature individually secured rooms and are individually rented to a one or two-person household. SROs do not typically involve on-site services. Single-room occupancies are allowed with a Use Permit in A1, R1, R1E, and R2 zones, and with architecture and site approval in R3 zones.

2.04m Mobile homes and Factory-Built Housing

Mobile homes and factory-built housing are recognized as a building form that is allowable for any manner of housing for single-family homes, ADUs, SB 9 urban primary unit, and agricultural employee housing, and they are permitted forms of housing wherever dwelling units are permitted.

2.04n Accessory Dwelling Units

Accessory Dwelling Units are defined under the use classification “Accessory Dwelling Units” in the County’s Zoning Ordinance. The use classification is based on the applicable provisions of state law and differentiates them from primary dwellings, agricultural employee housing, caretaker’s residences, and all other forms of residential use. They are allowed by right in all zones where primary residential dwellings are allowed.

2.05 Opportunities for Energy Conservation

This section describes opportunities for energy conservation in the areas of Planning and Land Use, Energy Conservation Incentives, and Green Building and Energy Efficiency Standards.

2.05a Planning and Land Use

The joint urban development policies of the cities, County, and [LAFCO](#) recognize the benefits of energy conservation in promoting sound urban growth management policies. The cities are responsible for planning for and accommodating urban growth and development. The County’s role has been and continues to be that of supporting the cities in such efforts by not acting as a promoter of urban sprawl and by restricting land use and development outside urban areas and Urban Service Areas (USAs) to rural, open space, and agricultural uses. These policies have been in effect since the early 1970s and they continue to serve the County and larger region well by using energy efficiently and minimizing carbon emissions. To integrate sustainability as a core function within County operations and to coordinate and support cross-departmental efforts, the Board of Supervisors adopted the [Sustainability Master Plan](#) in January of 2021.

County policies strongly support increasing the proximity of housing to jobs by promoting infill development or “compact” urban development as urban areas redevelop. Accordingly, there has been relatively little need for urban expansion into unincorporated areas of the County to accommodate population and housing growth. These County policies both advance energy conservation and are consistent with the goals of SB 375, which are to coordinate land use, transportation, and housing policy and planning in pursuit of development patterns that emit fewer greenhouse gases than has been the pattern in the past.

County General Plan policies also promote making more efficient use of existing urban areas. As with many metropolitan areas that experienced significant growth after 1950, Santa Clara County contains underutilized lands, parking lots, and other properties within the core of existing urban areas. These areas, particularly those that can support and utilize transit, should be redeveloped for residential or mixed-use to the most appropriate and efficient densities possible.

Among the variety of programs or specific land use policies that contribute to energy conservation, the County supports and encourages the surrounding cities in the following ways:

- Transit-oriented land use and densities (e.g., San José has transit corridor and urban core minimum density policies, as opposed to maximum density limits). The Valley Transportation Authority (VTA) is currently working to utilize [Senate Bill 791](#) by developing surplus agency-owned land into housing.
- Streetscape and similar policies of the County, cities, and the VTA, illustrate how major arteries and thoroughfares can be retrofitted, redesigned, and planned to promote shared access for bus ways, bicycling, multi-level mixed uses, and

pedestrian improvements. A successful instance of multi-jurisdictional collaboration in this regard has been the [Grand Boulevard Initiative](#), an effort to revitalize the El Camino Real corridor.

2.05b Conservation Incentives for the Building Industry and Residents

Through the General Plan and other publications, the County promotes broader public understanding of the importance of conservation on a variety of subjects, such as natural resources, trees, land, energy, and open space. Energy saving incentives are primarily the domain of the utility companies, such as PG&E, which provides a significant rebate program for energy efficient appliances, insulation, and related activities.

The County offers incentives for energy efficiency through the [Bay Area Regional Energy Network](#) (BayREN) program to provide local energy efficiency and electrification resources for homeowners, renters, multifamily property owners, businesses, and jurisdictions in the county. Since its inception in 2013, the program has accelerated the County's transition to carbon neutrality, upgraded over 3,000 single and multifamily homes, and paid over \$2.7 million in rebates to residents and property owners.

Energy conservation in the building industry has widened its focus from simply retrofitting to green construction. The County promotes energy efficiency improvements in older housing stock through the housing rehabilitation and financial assistance programs it provides to support lower income housing— but the area where the County is making greatest strides is in mandatory green building standards because it can directly affect building standards through its own codes and ordinances.

2.05c Promoting Green Building and Greater Efficiency Standards

The County began efforts to promote green building over fifteen years ago, culminating with the adoption of significant new requirements for green building in single-family residential construction in 2008. Those new standards became mandatory for new single-family residences and major renovations (“rebuilt”) in 2009. Since September of 2015, the County now follows the green building requirements for multi-family residential and non-residential buildings, as set forth in the California Green Building Standards Code (CalGreen) standards.

In addition to its Building Ordinance requirements, the County promotes green building information through handouts, displays, and its websites. The County's green building requirements include:

- Standards for use of passive solar heating, extended overhangs where consistent with building codes and zoning setbacks, and similar practices;
- Use of tree planting and conservation through landscaping plans to assist in energy conservation;
- Use of solar photovoltaic;
- Efficient building framing design to reduce waste and incorporate framing concepts with other efficiency standards and methods;
- Recycling of construction waste;
- Water use reduction;
- Use of renewable materials;
- Efficient appliances, heating/ventilation/AC, and lighting standards;

- Materials such as paints, adhesives, and finishes that improve indoor air quality, reduce hydrocarbon emissions, and improve the health of occupants.

In 2021, the County adopted all electric Reach Codes, requiring new buildings in unincorporated areas to use electricity (not natural gas) for water heating, space heating, cooking, clothes drying, indoor and outdoor fireplaces, and decorative appliances. The Reach Codes also require infrastructure for charging electric vehicles. These regulations go further than State requirements related to climate change. Within unincorporated areas, 43% of total GHG emissions are attributed to commercial and residential natural gas use and these requirements will ensure that no new emissions from natural gas use in new buildings are added to the atmosphere. This ordinance will also improve indoor air quality and safety, reduce new building construction costs, and help transition the County's building stock to the State's planned phase-out of natural gas infrastructure.

Enhanced energy conservation standards are not limited to green building. To increase native plant landscapes and prioritize water efficiency, the County of Santa Clara has implemented the state Model Water-Efficient Landscape Ordinance (MWELo) standards through a locally adopted [ordinance](#). This policy prioritizes a holistic approach to the design, construction, and maintenance of landscaping to integrate with the local ecology and protect the watersheds. MWELo emphasizes the natural functions of the landscape to promote resiliency. The County's MWELo applies to residential development, which includes any landscaping over 500 square feet in area or earthwork subject to a Grading Permit.

Additional information regarding green building requirements is provided in section 2.06k, describing governmental factors and constraints to housing. Green building requirements add an increment of cost in terms of design, consulting services, material

choices, and equipment. The long-term advantages significantly outweigh costs over the life of a building and help to reduce the County's carbon footprint.

2.06 Governmental Factors Influencing Housing

2.06a Introduction and Overview

State law requires that the Housing Element contain an analysis of potential and actual governmental constraints upon the maintenance, improvement, or development of housing for all income levels, including land use controls, building codes and their enforcement, site improvements, fees and other exactions required of developers, and local processing and permit procedures. This analysis is also required to discuss local efforts to remove governmental constraints that hinder the locality from meeting its share of the regional housing need in accordance with Government Code Section 65585. For the purposes of this discussion, 'land use control' is a term used to refer to any policy, regulation, or similar exercise of local land use authority.

The primary purpose of including a discussion of potential or actual governmental constraints in the Housing Element is to provide a means for identifying regulations and procedures that may unduly restrict housing potential within the jurisdiction. Such analysis helps to assess ways the jurisdiction may facilitate housing development and improve supply. The purpose is not to place housing needs above all other matters of public policy concerns but rather to balance those with other concerns including public health and safety issues, conservation, and open space.

2.06b Land Use Controls

Land use controls include the General Plan and its control over residential densities, the Zoning Ordinance, the County’s Subdivision Ordinance, County regulation of building sites, and specific development standards, such as parking requirements and height limits, any growth control measures employed, policies and regulations regarding accessory dwelling units, junior accessory dwelling units, SB 9 (2021) ‘urban primary units,’ and density bonuses. Discussion of specific standards is found in Section 2.06f, after an overview of the principal land use control mechanisms adopted by the County regarding residential development.

In alignment with the provisions and purpose of the Housing Crisis Act of 2019 (Government Code 66300 et seq.), any County-adopted rezoning or development controls shall not impose any new governmental constraints to the development of housing unless those increased constraints are offset by the removal or reduction of other constraints. A “new governmental constraint” is a County-imposed requirement, including but not limited to process, fees, or design, that increases the cost of development, not including mitigation measures adopted in compliance with CEQA or a requirement adopted to specifically protect against a threat to health or safety. The County complies with these requirements, and has not rezoned or changed the designation of any parcels or districts to a reduced intensity since the adoption of the Housing Crisis Act. Any changes the County makes to zoning or land use designations in the future shall be done within the requirements of State law.

2.06c Santa Clara County General Plan: Charting a Course for Santa Clara County’s Future, 1995-2010

The General Plan governs unincorporated residential land use and development potential in a variety of ways. The fundamental policies that most affect residential land use are:

- The countywide growth management policies shared by the County, cities, and LAFCO, also referred to as the “joint urban development policies,” and
- The Land Use Plan and policies also referred to as the “Land Use Element.”

The joint urban development policies stipulate that urban types and densities of development for all land use categories should be located within cities or their USAs. Outside of the USAs of the 15 cities within the county, these policies stipulate that the County will allow only non-urban land uses and densities of development, such as agriculture, low-density residential, and open space uses. The goal is to direct new urban development in existing urban areas, preserve rural character, maintain and enhance agriculture, conserve open space and natural resources, minimize exposure to extreme natural hazards, and limit demand for new public services and infrastructure. These policies have been mutually agreed upon and implemented by the cities, County, and LAFCO since the early 1970s and are the fundamental growth management strategies guiding long-term land use for the urban areas and the rural unincorporated areas outside the USAs.

These policies are also consistent with SB 375, passed in 2008, and its Bay Area implementation, the *Sustainable Communities Strategy*, adopted by the MTC and ABAG in June 2013. These are also broadly consistent with *Plan Bay Area 2050*, the long-range Strategic Plan for the region.

For urban unincorporated areas, inside cities' USAs, the County's General Plan policies promote eventual annexation of such unincorporated urban pockets. The General Plan also requires new unincorporated development in USAs to conform to the General Plan of each respective city, conferring to the city authority for allowable uses and densities of development to determine the appropriate level of residential use within USAs. For example, where a city's General Plan land use element allows high-density, multi-family housing on an unincorporated urban parcel, the parcel may be annexed and redeveloped to meet the city's General Plan intention, through the necessary city approval processes.

The following are case studies that demonstrate implementation of agreements and policies between the County and the Cities that facilitate annexation and appropriate development of urban unincorporated areas.

Case 1: Communications Hill

Planning for the urban island of Communications Hill, the City Council of the City of San José adopted the Communications Hill Specific Plan in April 1992. The Specific Plan permits up to 4,000 dwelling units, primarily at a minimum density of 24 units per acre. The City of San José's Housing Element for 2007-2014 credits the site as having a total capacity of 5,421 housing units, of which over 2,500 have already been constructed. About one-third of the site's original 500+ acres have already been annexed and developed. The majority

of the remaining 335 acres of the site is vacant and unincorporated. The City of San José's 2040 General Plan made no changes to the Communications Hill Specific Plan.

Figure 2.19. Urban Islands – Communications Hill

Case

2: Cambrian Park

The Cambrian Park Plaza project is within the unincorporated urban island of Cambrian Park in south San José. The project area covers just over 18 acres and is a mixed-use project planned for over 500 residential units that include senior and assisted living. It also has over 4 acres of open space and over 50,000 square feet of retail planned. The City of San José has filed for annexation of the project area, which was approved by the City Council in September 2022.

Figure 2.20: Urban Islands – Cambrian Park

As illustrated by the above two case studies, the County’s policies and procedures help facilitate annexation and appropriate development of urban unincorporated areas. This is accomplished by requiring new development to conform to city general plans, mandating referrals to the city to enable annexation prior to any significant development. In the case of whole urban island annexations, subsidizing mapping and state filing fees are other incentives. In these ways, the County makes it possible for such sites to be developed to their greatest potential, involving only one jurisdiction, and in ways that consider and complement the development patterns and land uses of the surrounding area already located within city limits.

The lands outside the cities’ USAs include the mountainous areas of the Diablo and Santa Cruz Mountain ranges, the agricultural lands of the south valley surrounding Morgan Hill and Gilroy, and the rural residential community of San Martin, located between Morgan Hill and Gilroy in the South County. To maintain rural densities of residential development and effectuate the goals and policies of other General Plan elements, the “Hillside,” “Ranchlands,” “Agriculture,” and “Open Space Reserve” land use designations require a minimum lot size of at least 20 acres per dwelling unit for purposes of subdivision and lot line adjustments. “Rural Residential” allows densities of between 5-20 acres per dwelling, depending on average slope. These minimum lot sizes govern the creation of new parcels by means of subdivision and the adjustment of parcels by means of lot line adjustments.

The Stanford Community Plan (SCP) is an area plan adopted as part of the County General Plan. The SCP and the Stanford 2000 General Use Permit (2000 GUP) guide future use and development of Stanford lands in a manner that incorporates key County General Plan principles. Through the SCP and 2000 GUP, housing development is linked with academic land use (refer to Section 2.06u). The SCP is being updated to address the changing needs of the residents and workers on campus and the residential capacity on campus is being updated to include the following:

- Minimum residential density on Academic Campus (High-density housing for faculty, staff, and students) has been increased from 15 dwelling units per acre to 30 dwelling units per acres.
- At least 50% of the housing planned on the identified sites is anticipated to be affordable housing.

Constraints Analysis

The fundamental policies of the General Plan governing rural land

use and densities do not unduly constrain residential development in rural unincorporated areas. Most new residential development in rural areas occurs on existing lots of record, not on lots created by subdivision under the current County Land Use Element.

Furthermore, the County's policies and its Zoning Ordinance do not preclude residential development of substandard lots (those less than the minimum allowed lot sizes under current zoning) solely based on being substandard. The low densities of development prescribed for rural areas are based on the prevalence of numerous physical development constraints throughout the rural areas, such as high fire hazard, seismic and geologic factors, significant slopes, and accessibility limitations. These areas are also important for purposes of habitat preservation, water supply reservoir protection, water quality, scenic resources, significant flood zones, and agricultural land uses. The densities prescribed by the General Plan are intended to accomplish a variety of related conservation goals and objectives.

The County's fundamental growth management policies rely on the Cities to develop a plan for annexation of the unincorporated urban islands and plan for residential development within those islands on sites suitable for housing. This policy has been effective in the past, as described in the above case studies. However, the County's reliance on the Cities to annex and plan for housing in the unincorporated urban islands leaves the County constrained in its ability to plan for housing when a city does not have a plan for annexation in place.

Implementation Measure

The County will be amending its General Plan policies and strategies (County General Plan Book B, Part 4 Urban Unincorporated Area Issues & Policies. Strategy No. 2: *Ensure Conformity of Development with Cities' General Plans*) to allow the County to plan for housing in

the unincorporated urban islands during each RHNA cycle (See policy HG1-8 in Chapter 3 and Program 2.02 in Chapter 4).

2.06d Santa Clara County Zoning Ordinance

The Zoning Ordinance was updated through a comprehensive reorganization and evaluation of its regulations in 2003. No substantive changes were involved with the Zoning Ordinance Revision project that affected residential minimum lot sizes, development standards, or process and permit requirements.

The Zoning Ordinance controls residential development potential primarily through the individual zoning districts, minimum lot size standards, and use regulations defining types of residential development allowed. One set of zoning districts is applied to lands inside USAs, including the Urban Residential Base Districts, and another set of districts is applied to lands outside USAs, including the Rural Base Districts.

Urban Residential Base Districts

Within USAs, the primary residential zoning districts are the R1, R1E, R2, and R3 districts. R1 and R1E are single-family districts. R2 is the Two-Family Residence district, which allows duplexes and single-family homes. R3 is Multi-Family Residential, allowing apartments and other forms of multi-family dwellings, as well as single-family and duplex units. RHS is the Urban Hillside Residential zone that is applied to some hillside lands within USAs; it is also a single-family district. There are two zones specifically for residential use on Stanford University lands, the R1S and R3S zones, which are low-density campus residential and medium-density campus residential zones, respectively.

Most urban areas zoned for residential use have base zoning districts of R1 and R1E. The County assigns a lot size "combining district" to an area's base zoning district to reflect the general pattern of existing

lot sizes found when those lots generally exceed 5,000 square feet in size. The lot size combining districts most commonly applied to single family zones (R1 and R1E) are the “-6” (6,000 square feet minimum lot size), “-8” (8,000 square feet lot size), “-10” (10,000 square feet lot size), and “-20” (20,000 square feet lot size) combining districts. R2 allows standard duplex or two-family residences with a 5,000 square feet minimum lot size, and R3 zoning permits multi-family residences of three units or more depending on the density permitted by the applicable city’s general plan. New residential uses in commercial and industrial zoning districts are generally not allowed.

Most residential areas within USAs are already subdivided and built out to maximum allowed densities. However, urban infill subdivisions do occur as opportunities arise, governed by city general plan densities. The County typically approves two to three such urban infill subdivisions per year.

In unincorporated urban zoning districts, the base zoning districts permit one primary dwelling per lot “by right.” ADUs and Junior ADUs are permitted by right in all urban and single-family residential zones (refer to section 2.06h for additional discussion). Urban Primary Units, additional units allowed by SB 9, are permitted by right in areas delineated under State law. Residential accessory structures are also permitted by right in residential zoning districts, but occupancy or habitation is prohibited within accessory structures.

Rural Base Districts

Like urban districts, in unincorporated rural zoning districts, the base zoning districts permit one primary dwelling per lot by right. ADUs and Junior ADUs are permitted by right in all rural and single-family residential zones (refer to section 2.06h for additional discussion). Urban Primary Units, additional units allowed by SB 9, are permitted by right in areas delineated under State law. Residential accessory

structures are also permitted by right in residential zoning districts, but occupancy or habitation is prohibited within accessory structures.

Rural area base zoning districts include Hillside (HS), Exclusive Agriculture (A), Agricultural Ranchlands (AR), and Rural Residential (RR). The Agricultural Ranchlands (AR) zoning district permits up to two primary residences per legal lot by right, but only on lots of 10 acres or more, provided one such dwelling is related to the agricultural use of the property. While single-family residences are allowed in these zones, only Rural Residential (RR) zoning district has the primary purpose to provide housing. The other rural area base zoning districts are intended to preserve natural resources such as sensitive habitats and agricultural lands, and reduce development in areas susceptible to fire, geologic, and flooding hazards. Density of development in these zones is consistent with the densities defined by the General Plan and Zoning Ordinance as described in the previous section describing the General Plan. In other words, the rural area zoning districts further implement the density controls provided by the General Plan for lands outside USAs.

In addition to the residential densities above, all four rural zoning districts allow for agricultural employee housing and temporary agricultural residences by way of a ministerial non-discretionary Planning Clearance or with a Special Permit, depending on the scale and base zoning. Please refer to section 2.06s for a more detailed discussion on these forms of housing in the county.

Constraints Analysis

The allowable uses and minimum lot sizes for each zone are delineated in the Zoning Ordinance, which implements policies established in the General Plan. Single-family residences are permitted by right in all urban residential zones and all rural base zones. The use regulations and minimum lot sizes of the County Zoning Ordinance do not unduly constrain housing development.

Implementation Measure

No changes are recommended or necessary to the County's Zoning Ordinance to accommodate projected housing demand. However, with ongoing improvements, clarifications, and updates to the Zoning Ordinance on an annual or bi-annual basis, the County reviews applicable provisions for opportunities to address potential constraints to housing. For example, when recent provisions for ADUs were under review, the County evaluated possible ordinance revisions and standards to ensure that they were practical, necessary, and appropriate. During such Zoning Ordinance amendments, the County considers revisions that could reduce regulatory requirements and facilitate establishment of ADUs and other new forms of housing.

2.06e Regulation of Building Site Approval

Building Site Approval (BSA) is generally required as a prerequisite to the issuance of a building permit for new primary residential development on vacant lots and for additions of over 500 square feet to existing residences on parcels that are not approved building sites. BSA is applicable to vacant, rural sites, specifically properties located within the A, AR, HS, RR, R1E, and RHS zoning districts. BSA is the land development application process used by the County to determine whether, and under what specific conditions, a parcel of land may be improved for residential use. BSA has been required by the County since 1965 for lots not created by subdivision processes that conferred site approval through the subdivision approval and subsequent recording of a parcel or tract map. At issue are parcels created by deed transaction or other means of land division for which site approval and accompanying improvement requirements have not been imposed. Numbered lots in a numbered subdivision tract map are approved building sites. Whole parcels shown on parcels maps for subdivision purposes are also recognized as

approved building sites, if there is no formal pronouncement on the map negating the status of a lot as an approved building site. Some lots created by subdivision were exempted from site approval requirements through the land development process in place up to the late 1970s and early 1980s. Since that time, all lots approved by subdivision maps are required to demonstrate site suitability and conformance to development standards that enable them to function as approved building sites.

Constraints Analysis

BSAs ensure that a parcel proposed for residential development has safe and adequate access for emergency vehicles, an adequate water supply for potable water and for fire suppression, capacity for sanitary waste disposal, and other matters related directly to public health and safety standards. Drainage, road right-of-way (ROW) dedication and improvement requirements, and geologic hazard issues are also addressed through the site approval process. Although such requirements and exactions (a ROW dedication, for example) may impose costs to the residential development proposed, no residential development for unapproved sites would be feasible without such improvements. In summary, the site approval process functions as a means of ensuring that a subsequent building permit can be issued in conformance with all applicable standards and codes to facilitate housing production with adequate infrastructure for health and safety.

Implementation Measure

No further change to BSA procedures or requirements is necessary or appropriate to accommodate projected need for housing development on rural, unimproved parcels.

2.06f Specified Development Standards

Development standards, such as maximum building height, parking space requirements, and similar standards, are contained within the

Zoning Ordinance. The primary residential development standards in the unincorporated county are discussed below.

The Zoning Ordinance provides for Floor Area Ratio (FAR) or lot coverage requirements in specific, limited zoning districts. The purpose of FAR and lot coverage is to limit house size or mass. In most zoning districts, the amount of floor area feasible for any given development is defined only by the setbacks, height, and story limitations.

In most zoning districts there are no open space requirements, however, in the “-os” Housing Opportunity Sites combining district, created for the sixth cycle planning period’s sites inventory, all buildings shall provide either a patio or balcony for each unit, or commonly accessible open space(s) (including courtyards, parklets, playgrounds, usable landscaped areas, rooftop common areas, and sports courts) equal to a minimum of ten percent of the lot size. This requirement alone, with a variety of options, many of which could be located within the building setback areas, is unlikely to reduce the maximum size of a multi-family residential structure.

Projects within the “-os” combining district are exempt from any development standards of the base zoning district, including FAR and lot coverage, and instead have the following objective development standards:

- Minimum setbacks of 10 feet on all sides.
- Maximum height of 135 feet, 150 feet, or 270 feet, depending on the development category, with no maximum of stories.
- Minimum density as required by Government Code § 65583.2(h), specifically including 20 units per acre for all sites that are required to accommodate housing for very low- and low-income households.

- Equitable distribution and characteristics between affordable and market rate units.
- Architectural variation to delineate building entrances and in wall planes over 100 feet in length.
- Onsite laundry facilities accessible to all units.
- Secured storage space accessible to all units.
- Onsite bicycle storage, no less than one space per four units.
- 1 guest parking space and 1 short-term drop-off/delivery space for projects with more than 25 units, with 1 additional space of each type required for every 600 residential units.
- Mixed-use residential development on Housing Opportunity Sites is generally limited to locating any non-residential uses on the ground floor and rooftop level and must comply with all requirements of Government Code § 65583.2(h), specifically including that residential use shall occupy at least 50% of the total floor area of a mix-used project.

All development standards applicable to the Housing Opportunity Sites are objective and were designed to ensure high-quality and equitable housing, and to provide basic amenities to all residents, while avoiding any subjective findings that may impose potential constraints on the project. These standards were conceived with multi-family development on these specific sites in mind, and taken all together, the maximum density can be easily achieved on any of the Housing Opportunity Sites while complying with the objective development standards.

Furthermore, should it be desired by a developer of one of these sites, any of the development standards may be modified pursuant to a development agreement approved by the County Board of Supervisors.

There are two combining districts used in unincorporated urban areas that have an FAR requirement, “-n1” in Los Altos, and “-n2” in the Burbank neighborhood of San José.

The -n1 combining district within the USAs of Los Altos and Los Altos Hills, FAR requirements fall into two categories:

- Lots of 10,000 square feet (net) or less have an FAR limit of 35%.
- Lots larger than 10,000 square feet have a FAR of 3,500 square feet plus one additional square foot of floor area per 10 square feet of lot area over 10,000 square feet, to a maximum of 5,700 square feet.

The -n2 combining district in Burbank has an FAR limit of 50%.

In December 2021, by way of a new combining district called the Coyote Valley Climate Resilience Combining District (“-cv”), the County adopted development standards for all new development within the unincorporated agricultural area known as Coyote Valley. The new standards include a maximum lot coverage of 7,500 square feet for all non-agricultural structures and a maximum development area of one acre, unless there is onsite agriculture, in which case development area is allowed up to two acres.

In May 2022, the County adopted objective development standards for Stanford University’s Upper San Juan neighborhood through the adoption of an “-n3” combining district, for the purpose of preserving the area’s unique characteristics. The -n3 combining district requires single-family development to not exceed 20% of lot coverage and a maximum of 35% lot coverage for two-family and multi-family developments.

In all districts that are restricted by FAR or lot coverage, additional allowances are made so that property owners can accommodate ADUs, JADUs, and SB 9 urban primary units (where authorized) even

if the property is already at or near its maximum allowed development.

The following table sets forth the primary development standards for each zoning district. The maximum density can be easily achieved in each of the County’s zoning districts, given the relatively large minimum parcel sizes and objective development standards that are commensurate with the minimum parcel sizes. A small percentage of parcels on steep slopes and in rural areas are unable to fully realize their maximum allowed density due to site-specific constraints, typically involving the topography or other environmental constraints. The County Zoning Ordinance allows an applicant to seek a variance in situations where site-specific constraints can be accommodated through modified development standards without creating an adverse impact to public health and safety.

To further demonstrate that the maximum density can be achieved in each of the County’s zoning districts, below is a list of the minimum lot sizes for each zoning district, its corresponding setbacks, and a discussion of how the maximum density can be achieved.

- **Rural Zones** (A, AR, HS, RR) have a range of minimum lot sizes (Table 2.21) with the smallest being 5 acres. These zones have minimum side, rear, and front setbacks of 30 feet (Zoning Ordinance provisions also allow setback reductions for “substandard” lots). On a 5-acre lot, these setbacks leave a remainder of roughly 4 acres (175,000 square feet) to develop three dwelling units: a single-family residence, ADU, and Junior ADU. With the ADU size limitation being 1,200 square feet, and the Junior ADU limitation of 500 square feet, that leaves over 173,000 square feet to accommodate the development of a single-family residence and its associated improvements (driveways, septic systems, etc.). The County regularly processes applications that are able to develop three residential units and their associated improvements on parcels 5-acres or larger.

- **RHS** has a range of minimum lot sizes with the smallest being 1 acre. The setbacks for this zone is 30 feet from the side, rear, and front property lines. On a 1-acre lot, these setbacks leave a remainder of roughly 20,000 square feet to develop three dwelling units: a single-family residence, ADU, and Junior ADU. With the ADU size limitation being 1,200 square feet, and the Junior ADU limitation of 500 square feet, that leaves over 18,300 square feet to accommodate the development of a single-family residence and its associated improvements (driveways, septic systems, etc.). The County regularly processes applications that are able to develop three residential units and their associated improvements on parcels 1-acre or larger.
- **A1, R1E, R2, R1** have a range of minimum lot sizes with the smallest being 5,000 square feet. These zones have front and rear setbacks of 25 feet with side setbacks that increase with the minimum lot size (i.e., a property with a minimum lot size of 10,000 square feet has a side setback of 10 feet, a property with a minimum lot size of 20,000 square feet has a side setback of 15 feet, etc.). Lots with that have a minimum size of 5,000 square feet have a side setback of 5 feet. With the 25-foot front and rear setback and 5-foot side setback, this leaves roughly 2,000 square feet for a single-family residence that can be up to two stories and 35 feet tall. ADUs and Junior ADUs have a rear and side setback of 4 feet. On a 5,000 square feet parcel, this leaves roughly 3,000 square feet to accommodate an ADU and Junior ADU. The County regularly processes applications for the development of a single-family residence, ADU and/or Junior ADU on lots 5,000 square feet or larger in these zones.
- **R3** has a density as determined by the applicable city's general plan. The intent is that the density will be consistent with the surrounding city's requirements, preparing for eventual annexation into the city. The City of San José has a variety of general plan designations in the R3 zone, the majority of which is Mixed Use Neighborhood (MUN). One hundred percent

residential development in the MUN areas has a density of 30 dwelling units per acre. The majority of parcels in this zone are approximately 6,000 square feet, which would allow for four dwelling units pursuant to the City of San José General Plan MUN requirements.

Setbacks in this zone consist of 20 feet in the front, 10 feet on the sides, and 15 feet in the rear. The maximum height is 45 feet with 4 stories. With these applicable setbacks, this leaves approximately 2,500 square feet to accommodate the allowed four units. As such the R3 development standards do not restrict the property from achieving its maximum density.

- **R1S** has a density of 8 units per acre pursuant to Zoning Ordinance Section 2.30.030. However, each lot can *also* have an ADU and Junior ADU. The majority of parcels in this zone are 0.25 acres, which allows for two dwelling units, plus an ADU and a Junior ADU, which totals to four units.

The setbacks in this zone are a 25-feet in the front, 5-feet on the sides, and 25-feet in the rear. This leaves approximately 6,000 square feet to accommodate the two primary units. The ADU and Junior ADU have side and rear setbacks of four feet, which leaves approximately 7,000 square feet to accommodate the ADU and Junior ADU. As such, the R1S development standards allow the properties to achieve their maximum density.

Furthermore, the side and rear yard setbacks may be modified through a discretionary review process, Architecture and Site Approval (ASA) which is meant to provide setback flexibility so the property can reach its allowed maximum density.

- **R3S** has a density of 15 units per acre. However, there are no set setbacks or height limitations as they are determined by the ASA process to provide setback and height flexibility so the property can reach its allowed maximum density.

Table 2.21: Residential Development Standards

Base Zoning District	Maximum Density ¹⁷	Setback (Min)			Bldg. Height (Max)	
		Front	Side	Rear	Dwelling	Accessory Buildings
A	3 units per 5 acres (A-5ac), 20 acres (A-20ac), or 40 acres (A-40ac), depending on lot size combining district. ¹⁸	30'	30'	30'	35' (2 Stories)	In rural districts (generally) 35' if greater than or equal to 2.5 Ac., otherwise 12'.
AR	3 units per 20 to 160 acres, depending on slope.	30'	30'	30'	35' (3 Stories)	In rural districts (generally) 35' if greater than or equal to 2.5 Ac., otherwise 12'.
HS	3 units per 20 to 160 acres, depending on slope and optional clustering. ¹⁹	30'	30'	30'	35' (3 Stories)	In rural districts (generally) 35' if greater than or equal to 2.5 Ac., otherwise 12'.
RR	3 units per 5 acres (RR-5ac) or 20 acres (RR-20ac).	30'	30'	30'	35' (2 Stories)	In rural districts (generally) 35' if greater than or equal to 2.5 Ac., otherwise 12'.
RHS	3 units per 1 acre to 10 acres, depending on slope.	30'	20'	25'	35' (3 Stories)	In urban districts (generally) 12' (plus gable allowance)
A1, R1E, R2, R1	3 units per 5,000 sq. ft., or as determined otherwise by lot size combining district.	25'	5' (or by combining district)	25'	35' (2 Stories)	In urban districts (generally) 12' (plus gable allowance)
R3	Per the density allowed by the applicable city general plan.	20'	10'	15'	45' (4 stories)	In urban districts (generally) 12' (plus gable allowance)
R1S	24 units per acre.	25'	5' (or by ASA)	25' (or by ASA)	35 (2.5 Stories)	In urban districts (generally) 12' (plus gable allowance)
R3S	15 units per acre.	Determined by ASA.				

¹⁷ Maximum density is described here as a measure of total units allowed per the minimum parcel size in each zoning district. Single-family homes are permitted to have two additional units per parcel (one ADU and one JADU), therefore, zoning that allows one single-family unit is described here to allow three total units per minimum parcel size. Parcels that are eligible to utilize SB 9 are allowed an additional, fourth unit. In certain cases, the Zoning Ordinance also establishes a minimum residential density.

¹⁸ In Urban Service Areas, density is determined by the corresponding city's general plan designation for the property.

¹⁹ Cluster subdivisions may be proposed in HS, in which case the maximum density is 3 units per 20 acres, depending on slope density, and with 90% of the remaining land area preserved in permanent open space

The following table describes standard parking space requirements for residential uses. Despite trends toward the increasing size of residential development and vehicle ownership per household, minimum parking space requirements have not been increased, thereby minimizing development limitations.

In December of 2023, the County reduced the number of parking spaces required for multi-family development from 1.5 spaces per dwelling unit to 1 space per dwelling unit, across all zoning districts. In most zoning districts, no guest parking spaces are required,

however, the “-os” Housing Opportunity Sites combining district requires guest parking in certain instances, as described above.

Currently, the County Zoning Ordinance does not differentiate parking requirements in dwellings based on the number of bedrooms. In transit rich areas, parking requirements have been reduced or eliminated for ADUs and SB 9 urban primary units in alignment with state law, and for multi-family developments that qualify for parking exceptions or reductions.

Table 2.22: Parking Requirements

Housing Type	Minimum Parking Requirement
Single Family Residences	2 spaces / dwelling unit (1 shall be covered)
Two-Family	2 spaces / dwelling unit (1 per unit shall be covered)
Multiple Family Dwelling Unit	1 space / dwelling unit
Accessory Dwelling Unit (ADU)	
Standard (attached or detached)	1 space / dwelling unit
Movable Tiny Home	1 space / dwelling unit
Junior ADU	None
Caretaker’s Residences	2 / residence
Home Occupations	
General	None
Expanded	1 in addition to total residential Requirement
Recreational Vehicle Parks	1.5 per recreational vehicle space, plus 1 per employee
Residential–Communal Institutional	1 for each guest room, plus 1 for each employee (may be reduced if occupants normally do not have cars)
Rooming Houses, Fraternities, and Sororities	1 space / guest room, plus 1 space / employee

Accessible parking requirements are required by law and typically apply to non-residential and multi-family residential projects. Accessible parking requirements typically do not affect single-family residential development.

Table 2.23: Accessible Parking Requirements

Total Number of Parking Spaces	Number of Accessible Spaces Required
One-25	1
26-50	2
51-75	3
76-100	4
101-150	5
151-200	6
200-300	7
301-400	8
401-500	9
501-1,000	2% of total
1,001 +	20, plus 1 per 100 over 1,000

The County's land development requirements for on- and off-site improvements vary by zoning district and area. For new non-residential land uses or subdivisions in an A, A1, R1E, R1, or R2 residential zoning district, the street dedication is typically a 30-foot half-street on the frontage of each parcel. Street and related improvement requirements are determined either by the County's Roads and Airports Department for streets that are or will become part of the County-maintained road system, or by the County's Land Development Engineering section of the Department of Planning and Development for private roads.

Additionally, the County Ordinance Code requires:

- Local streets shall have a right-of-way (ROW) width of 60 feet.
- Urban area streets with dedicated ROW of 40 feet will not require additional dedication, but may require road improvements (e.g., install drainage or close a sidewalk gap in front of the property).
- Private driveways serving a single residence may be 12 feet in width with one 3-foot shoulder. Driveways serving more than two residences must be 18 feet with two 3-foot shoulders.
- In some instances, such as cluster subdivisions, the street, court, parking, and turnaround areas may be varied, to minimize improvement requirements.
- All dwellings must have approved water sources and sanitary wastewater treatment and disposal plans, including onsite wastewater treatment systems if necessary. All dwellings must typically connect to sanitary sewer and public water, if available.

All dwellings that do not have access to adequate piped water supplies must have adequate storage of water, including above

ground storage tanks and sprinkler systems when required to meet increasingly stringent fire protection requirements in wildland areas. All dwellings in urban areas must have access to public fire hydrants and minimum pressure and flow standards. Residential sprinklers as required by current ordinance or code adoption. Dwellings in the Wildland Urban Interface zone are subject to current Building Code Requirements for exterior fire protection. Roads and longer driveways over 150 feet must meet minimum width and clearance standards as well as loading capacity, grade, turnouts, and turnarounds to be accessible to emergency vehicles.

For certain parcels located in the County's rural resource areas, for example Hillside (HS) zoning, the permit review process can take longer if the applicant is subject to State fire access requirements or State drinking water requirements.

Constraints Analysis

The basic development standards applicable to residential use and development are consistent with those applied by most local jurisdictions; however, they do constitute an undue constraint on housing development. Parking requirements add an additional cost to development of any housing, a cost which is compounded for multi-family development. Minimum lot sizes and required setbacks beyond those necessary for fire safety also represent a constraint on the number, size, and types of units which can be developed. Height, FAR, and lot coverage standards similarly provide this constraint. Additionally, the County's current Zoning Ordinance and development guidelines limit multi-family development to relatively low densities. Other standards described above are directly related to public health, safety, and general welfare objectives of the Zoning Ordinance and other County Ordinance Code provisions.

Implementation Measure

The County will review and update parking standards to allow more

flexibility for a variety of housing types particularly in urban areas that are within walking distance from High-Capacity Transit Corridors. The County has implemented Program 2.02 – Planning for Housing Development in Unincorporated USAs and Stanford University Lands, which created a new combining district to rezone sites listed in this Housing Element’s sites inventory and a streamlined, non-discretionary permit review for multi-family and/or mixed-use development with a certain percentage of affordable units. This new process will remove as many constraints as possible for the approval of new multi-family development on these properties.

2.06g Growth Control Measures

Growth control measures are defined as programs and/or ordinances that place limits on population and dwelling units within a jurisdiction during a particular period. Within such period, the jurisdiction will typically implement those limitations on growth by establishing a cap on the number of building permits that may be issued annually for construction of new residential units. The County of Santa Clara does not employ any growth control measures that place numerical limits upon the number or type of building permits that may be issued in a given period.

2.06h Accessory Dwelling Units & Junior Accessory Dwelling Units

Accessory Dwelling Units (ADUs) and Junior Accessory Dwelling Units (JADUs) are an important part of providing an adequate and affordable housing supply. The County recognizes that ADUs and JADUs can be particularly important to augment urban housing supply in a largely built-out metropolitan area, such as the urban areas of Santa Clara County. Regulations governing ADUs and JADUs are set forth in Section 4.10.015 of the County Zoning Ordinance. The regulations allow for ADUs (which includes Movable Tiny Homes or

“MTHs”) and JADUs on properties with single-family residences in accordance with Government Code Sections 65852.2 and 65852.22. ADUs and JADUs are permitted by right and do not require land use entitlements.

ADUs and JADUs are permitted in all zones within the unincorporated county except for Light Industrial (ML), Heavy Industrial (MH), Open Space and Field Research (OS/F), and Special Conservation Areas (SCA), as these zones do not permit single-family residences. In the past, JADUs were not permitted, and ADUs (formerly known as secondary dwelling units) were regulated and limited in size depending on its location in an urban zoning district or a rural zoning district.

Since the 2014 Housing Element update, the Zoning Ordinance has been revised according to State law and allows for conforming ADUs and JADUs as a matter of right, reducing the regulatory burden on property owners and streamlining the approval process in terms of both cost and time. Furthermore, the County has applied the standards of ADUs and JADUs similarly across all sections of the County to ensure equitable access to housing type and size, with respect to ADUs and JADUs where lot coverage constraints do not exist. Additionally, the County has allowed JADUs to be attached to either a primary residence of an ADU, which surpasses the state’s requirement and increases the opportunities to develop these types of units.

Within the unincorporated county, ADUs can be a maximum of 1,200 square feet, with a 400-square foot attached garage and 400-square foot attached deck. ADUs can be either attached or detached from the primary residence. The ADU, whether attached or detached, must be setback four feet from the side and rear property lines, with a front setback that is the same as the primary residence. Height requirements for ADUs are the same as the primary residence if all

primary residential setbacks are adhered to. If the ADU encroaches into the primary residence setbacks (remaining four feet away from the side and rear property lines), the maximum height requirement is 16 feet. There are exceptions to setback and height requirements for the conversion of legal structures into ADUs. The County does not require owner-occupancy of the primary residence or ADU, and has made this amendment permanent, which exceeds the state law requirements.

JADUs can be a maximum of 500 square feet and must be attached to either the main residence or a detached ADU. JADUs share the same setback and height restrictions as an ADU. JADUs must contain cooking facilities and may share sanitation facilities with the existing dwelling unit. Owner-occupancy of at least the primary residence or the JADU on site is also required for all properties containing a JADU, as required by state law.

The County will continue to consider additional minor modifications to certain standards for ADUs and JADUs to provide greater flexibility and facilitate additional units as part of routine Zoning Ordinance review, and in accordance with any future amendments necessitated by State law.

2.06i Senate Bill 9/Urban Primary Units

In 2021, the State adopted SB 9 to add Government Code Sections 65852.21 and 66411.7 (as well as amend Section 66452.6) to allow the development of two residential units on a lot within a single-family residential zone and/or the subdivision of a lot within a single-family residential zone by right if certain conditions are met. On January 24 and February 7 of 2022, the County amended its Zoning Ordinance (adding Section 4.10.387 and amending other sections) and Subdivision Ordinance (adding Sections C12-5.23 and C12-44 and amending Section C12-77) to reflect these changes, and to apply objective development standards allowed by the State.

SB 9 is intended to streamline and remove barriers to housing production in urban, primarily infill, development sites. For areas that are unincorporated, the parcel must be wholly within an urban area as designated by the U.S. Census Bureau. There are two designated urban areas within Santa Clara County: the San José Urban Area, which includes the thirteen northern cities, much of the Stanford lands, and unincorporated “urban islands,” and the Gilroy-Morgan Hill Urban Area, which includes those two cities as well as the rural community of San Martin between them. Properties with historic or conservation designations are not included, nor are properties on prime farmland or wetlands, or that contain habitat for protected species. Applicants with parcels with fire, flooding, or geologic hazards or identified as containing hazardous waste must show that these hazards are properly mitigated to use SB 9. Areas outside of the USAs must also show adequate access to water and wastewater management. Protections are built into the State law for renters, including a bar on short-term rentals to retain affordable housing. Applicants for subdivisions must state their intention to use the property as their primary residence for a minimum of three years, a provision designed to limit the involvement of large developers.

The County Zoning Ordinance mirrors state requirements that each Eligible lot be allowed to develop two residences, each at least 800 square feet in size. One of these residences is only restricted in size by the existing FAR, lot coverage, setbacks, and height requirements of the underlying zoning district, while the second unit may be up to 1,600 square feet in size, which is double the minimum standard. If a property owner does not split a lot, the owner may also add an ADU and Junior ADU. Objective standards adopted by the County focus on preserving privacy and neighborhood character, including minimum lot frontages, minimal design standards in design review districts, and restrictions on second story windows, balconies, and rooftops. Alternatives and exemptions from standards are included

to ensure that all eligible parcels can utilize SB 9, unless the Building Official can make a written finding that the project would have a specific, adverse impact upon public health and safety or the physical environment and for which there is no feasible method to satisfactorily mitigate or avoid. Like ADUs, the County has applied an equitable approach to the size of an Urban Primary Unit of 1,600 square feet across all zoning districts that are permitted to utilize SB 9 for development. This ensures that all have access to the same building structure type and size and that units are more likely to be affordable to rent to the public.

Unlike larger subdivisions, SB 9 development projects are exempt from the County Inclusionary Housing Ordinance. Parking requirements are reduced to one space per residence or eliminated for properties near High-Capacity Transit Corridors.

Constraints Analysis

The largest constraints on SB 9 development are the requirements in the State law regarding which parcels are eligible, which largely align with the County's General Plan and joint development policies regarding preservation of habitat for protected species and agricultural lands, and carefully vetting growth in hazard zones. Parcels in the urban islands and most of the rural community of San Martin are eligible if they are in single-family zones and do not have site-specific disqualifiers. The basic development standards applicable to SB 9 development in the unincorporated county are consistent with those found in the State Government Code and do not constitute an undue constraint on housing development. Standards described above are directly related to public health, safety, and general welfare objectives of the Zoning Ordinance and

other County Ordinance Code provisions. Additional FAR allowances and exemption from the County's Inclusionary Housing Ordinance were included in the County's ordinances to ensure these measures are not constraining factors. SB 9 allows for higher-density development in infill areas and will allow for additional housing development. In no cases will it reduce the density or number of units allowed prior to SB 9's adoption.

Implementation Measure

The County will review implementation of SB 9-related measures in Fiscal Year 2023-2024 and again in 2025-2026 and further amend the County Zoning Ordinance and Subdivision Ordinance as necessary to ensure eligible property owners can utilize SB 9 without undue constraints. Any changes to State law impacting SB 9 development will also be reviewed as they are adopted.

2.06j Density Bonuses

State Government Code Sections 65915 through 65918 address density bonuses and other incentives to providing affordable housing. "Density bonus" is a term generally used to refer to an allowance granted by the local jurisdiction to a developer to build more units per acre than otherwise permitted under the General Plan or zoning regulations. State law requires, in certain instances, a city or county to grant a density bonus when certain affordability provisions are met, namely, when a specified percentage of affordable housing is proposed and will be maintained as such for a period of 55 years.²⁰ The city or county is required to grant the concession or incentive proposed by the developer unless it finds that the proposed concession or incentive does not result in identifiable and actual cost reductions, would cause a public health

²⁰ Guide to the California Density Bonus Law, Revised 2021, by Jon Goetz and Tom Sakai, accessed 9/8/22 <https://www.meyersnave.com/wp-content/uploads/California-Density-Bonus-Law-2021.pdf>

or safety problem, would cause an environmental problem, would harm historical property, or would be contrary to law.²¹

The County's Zoning Ordinance provides for a density bonus in accordance with State laws under Section 4.20.030. The County's regulations refer to and rely upon existing State laws, including California Government Code Sections 65915 through 65918 and California Health and Safety Code Sections 50052.5 and 50053, rather than adopting extensive and complex provisions in the County's Zoning Ordinance, as density bonus laws are frequently updated. These regulations were adopted as part of the County's comprehensive Zoning Ordinance revision in 2003, which both simplified density bonus provisions and brought them into compliance with State laws. In June 2014, the County amended the density bonus requirements to ensure that they reflected the 2005 update to State density bonus laws. Additionally, the County will implement Program 2.18 – Facilitate State Permit Streamlining Laws, which will establish application requirements, eligibility criteria and decision making and processing criteria for applications associated with State Density Bonus Law.

Pursuant to the County's Inclusionary Housing Ordinance, at least 16 percent of new units in multi-family development shall be made available to rent or purchase at an Affordable Housing Cost to lower, very low, or extremely low-income households earning no more than eighty percent (80%) of the Area Median Income. The Applicant for a multi-family development providing Inclusionary Units upon the same site as the Market Rate Units may, at the Applicant's sole option, submit a written request for density bonus, waivers or incentives pursuant to California Government Code Section 65915 et seq. and Section 4.20.030 of the County Code, if the multi-family development includes the provision of affordable Inclusionary Units

within the development that meets the minimum thresholds for density bonus pursuant to California Government Code Section 65915 et seq. The incentives requested by the Applicant of the multi-family development shall be included in a proposed Affordable Housing Plan, and any incentives authorized by the County pursuant to Section 4.20.030 of the County Ordinance Code shall be included in the Affordable Housing Plan, if approved by the County, for the development.

Constraints Analysis

The use of the density bonus provisions of the Zoning Ordinance in urban unincorporated county projects has been limited. Most urban residential areas were fully subdivided and developed by the 1970s. Hence, the major subdivision tracts of 100-300 single-family residential lots that might have taken advantage of density bonuses were approved before density bonus provisions of State law took effect. Where urban area multi-family dwellings are permitted uses and eligible for redevelopment, and therefore might take advantage of density bonus provisions, the typical development process involves annexation to an adjacent city if the property is contiguous with existing city boundaries. Consequently, the remaining urban unincorporated areas, which are predominantly single-family tracts, do not produce development proposals capable of utilizing density bonus provisions. New single-family residential subdivisions of 10-20 parcels do not occur, given the larger minimum lot sizes within rural areas and limited number of larger parcels in urban areas. Developers have not elected to pursue density bonus opportunities because the number of units involved in a typical subdivision of two or three lots does not provide the economies of scale necessary to incorporate more affordable units or benefit from density bonuses sufficiently to be profitable.

²¹ Ibid.

In the rural areas, major subdivisions of five lots or more are infrequent. Those that might qualify to take advantage of the County's density bonus allowance are even more rare. As stated above, given the allowable densities in rural areas, minimum lot sizes, and lack of public services, new residential development typically is for above-moderate income households, and the cost of including affordable housing is not covered by the additional density that might be available through density bonus.

Implementation Measure

To expand opportunities and locations for development of affordable housing, the County adopted an Inclusionary Housing Ordinance that requires a 16 percent requirement for affordable units and allows for paying in-lieu fees in certain circumstances. Since the County has largely conferred the planning and multi-unit housing project development in urban areas to cities, the density bonus provisions of cities are those applicable to most of such projects. As detailed in Programs 2.23 and 2.24, the County will streamline the permitting process for multi-family units by providing the public with checklists and information about the processing online, and will create an administrative permit system for applications which meet basic objective standards, including at least the minimum required affordable housing units.

2.06k Green Building Requirements

Currently, the County's Ordinance Code incorporates and requires conformance with the State of California's 2022 Building Code, Mechanical Code, Plumbing Code, Electrical Code, Green Building Standards Code and Energy Code. Codes establish the minimum acceptable standards for construction of all kinds, including code requirements for energy conservation and fire protection in most rural areas. Costs associated with meeting code requirements for

energy conservation are typically recouped through energy savings over a short time.

The County adopted the California Green Building Standards Code (CalGreen) regulations in 2014 to require minimum green building standards for single-family residential development, in particular new homes and rebuilds, effective September 2015. CalGreen Tier 1 requirements apply to all new single-family and duplex residential buildings over 3,000 SF, and new multi-family or non-residential construction of buildings over 25,000 SF.

In 2021, to further reduce carbon emissions and air pollution, the County adopted amendments (Reach Codes) to the 2019 California Green Building Standards and 2019 California Energy Code to require electrification (electricity as the only source of energy) of new buildings, with certain exceptions, and increase the electric vehicle infrastructure in new construction. Pairing electrification of vehicles and buildings with the high amounts of renewable energy generation is considered a lower-cost and lower-risk emission-reduction strategies. Since 2017, unincorporated Santa Clara County communities have been able to receive 100 percent carbon-free electricity.

Green building is *"a holistic approach to design, construction, and demolition that minimizes the building's impact on the environment, the occupants, and the community"* (California Building Standards Commission). Green building is also an important part of the Santa Clara County Climate Change and Sustainability program. The County is committed to energy efficiency, resource conservation, waste reduction, and the health and productivity of building occupants.

The overall costs associated with utilizing green building concepts and materials have been estimated as typically 5-7% of total construction costs for non-residential uses, such as office buildings. The cost for residential development may vary depending on house

size. Green building requirements may also contribute to meeting future greenhouse gas emission reductions and lowering the carbon footprint of an individual residence.

Constraints Analysis

Although green building requirements may add certain upfront costs to housing production, both in terms of services and design, there are a variety of ways green building requirements reduce the overall cost of construction and maintenance over the life of a building. For example, in terms of energy efficiency requirements alone, high-efficiency heating and appliance choices can pay off through lower utility costs in as little as five years. In terms of water use efficiency and savings, there can be similar short-term and lifetime benefits. Insulation, lighting choices, and material choices can improve indoor air quality and comfort as well as benefit the environment. A study conducted by Silicon Valley Clean Energy (SVCE) and Peninsula Clean Energy found that the construction of all-electric buildings, including single-family homes, are typically less expensive to build without the cost of natural gas plumbing, metering, and venting. Green building has become an integral, mainstream aspect of development in recent years, due to its environmental benefits and market value. Green building is now generally viewed as an indispensable part of the State's efforts to meet AB 32 goals for greenhouse gas emission reductions and addressing impacts of climate change.

The County anticipates meeting or exceeding the minimum State requirements for energy and environmental design in building structures.

Implementation Measure

The County will continue to monitor and adopt CalGreen standards as the baseline requirements are raised. The County is continuing to develop its regulations to promote energy conservation and green

building beyond the CalGreen standards, in both the private sector and in County Government buildings.

2.06I Site Improvement Requirements

Site improvement requirements include streets, driveways, parking and turnaround areas, road construction standards, undergrounding of utilities, water service connections or on-site water wells and storage tanks, drainage, stormwater treatment, and similar requirements. It also includes providing septic tanks and leach fields or sanitary sewer connections. Such site improvements are typically addressed and imposed as components of either subdivisions, grading or drainage permits, or building site approval processes. They are also imposed through ministerial approvals, such as a building permit, where applicable and required by County codes. In some urban unincorporated areas, where road and utility improvements already exist, there may not be significant on-site improvements required on an individual, parcel-by-parcel basis for new residential development.

In rural areas, where urban services are not provided and there may not yet exist any road, infrastructure, or utility improvements to facilitate development, site improvements can represent a significant component of overall development costs. For example, the cost of road or driveway access improvements can be substantial when developing remote, rural, hillside parcels.

A private driveway serving one or two parcels must be 12 feet wide, with one three-foot shoulder. Access roads serving three developed parcels or more must be 18 feet wide with two three-foot shoulders for a total of 24 feet of pavement surface. Additionally, access roads in the State Responsibility Area and/or the Very High Fire Hazard Severity Zone, as designated by the California Department of Forestry and Fire Protection (CAL Fire), must comply with the State Minimum Fire Safe Regulations, which includes requirements for two

ten-foot-wide travel lanes and limits to the length of dead-end and one-way roads. Grade limitations are also imposed for the purpose of ensuring that emergency vehicles can gain access to a given site.

The County adopted a periodic update to the Fire Code based on the 2022 California Fire Code that went into effect on January 1, 2023. The updates included administrative and operational requirements in alignment with the requirements of neighboring jurisdictions, creating a more consistent application of the California Fire Code throughout Santa Clara County and enabling the County to enforce these provisions should the need arise in the unincorporated areas. Amendments include requirements for fire apparatus access roads, fire water supplies, fire sprinklers, fire extinguishing systems in chemical fume hoods, energy storage systems, fire site safety during construction, and hazardous materials use and storage. The amendments require that all access roads have a 20-foot drivable width and clarify when sprinkler systems must be installed. According to these updates, no final inspection or certificate of occupancy can occur prior to clearance that fire protection facilities and access have been installed. When access roads cannot be installed because of topography, waterways, non-negotiable grades, or other similar conditions, an approved alternative means of fire protection shall be provided.

There can also be drainage improvements on rural properties not served by a storm drainage system to ensure no harmful off-site impacts or additional drainage problems are created by new impervious surfaces and buildings. Stormwater treatment improvements may be required to meet the permitting requirements of the State Regional Water Quality Control Board. Sediment and erosion control plans are required for all construction projects larger than 500 square feet and review is based on standards for the applicable drainage basin (San Francisco Bay or Monterey Bay).

Constraints Analysis

Basic site improvements of the type discussed in this section are necessary pre-requisites to residential development. The individual standards and requirements are not deemed excessive. They provide the basis for meeting the fundamental public health, safety, and welfare objectives of the Zoning Ordinance, Ordinance Code, and other development-related standards of the County. The County reviews these standards regularly and reduces them where appropriate. County requirements are in line with State requirements as well as federal and international standards. These constraints encourage housing to be developed in already urbanized areas where services are currently in place and hazard risks are greatly reduced, which also support other County and State priorities discussed in this chapter. While these constraints are the minimum necessary, they are not without a cost. The grading, pavement, and retaining walls necessary for access roads and driveways, especially in areas of wildfire risk, can cost millions of dollars. Similarly, the development of onsite wastewater treatment systems (aka septic systems) requires costly testing to site in addition to construction costs. Because of their relation to public health and safety, these are not constraints the County can reduce beyond encouraging development to be sited in areas which already have adequate access and can be serviced by existing sanitary sewers. However, this does not impede the ability for the County to meet its RHNA as the County's sites inventory is located within the city's Urban Service Areas which can provide services to those sites.

Implementation Measure

Given the recent update to the County Fire Code, and the lack of sites inventory locations in the rural unincorporated areas, no additional implementation measures are forthcoming. The County Fire Code will be reviewed and updated every three years in line with the California Fire Code and International Fire Code updates.

2.06m Building Permit and Inspection Fees

The County has, since the mid-1990s, adopted a full cost-recovery policy for fees imposed to cover direct services to customers. This policy reflects a perspective that development should not be subsidized by County General Fund monies and that fees cannot exceed the cost of services.

The County adopts the current version of the California Building and Residential Codes every three years, including supplements and errata. The building codes of the County are based on the International Building and Residential Codes (IBRC), as compiled and published by the International Code Council. The IBRC are further modified in the County's Ordinance Code with additions, deletions, and amendments.

Typical building permit and inspection fees charged by the County for residential development are based on a formula that factors construction type, floor area, and valuation. Most new residential development in the unincorporated county is that of single-family residences and ADUs; few multi-family housing developments are in the unincorporated county other than at Stanford University. As part of the County's SB9 implementation effort, County staff used Assessor's Office data to determine the median size of a single-family dwelling and found it to be approximately 1,500 square feet.^[2]

Fees are collected at the time of application submittal and itemized in the receipt provided at the time of application. County building permit fees are updated on an annual basis, as necessary. Additional fees are also imposed to recover the costs of permitting, inspecting, and administering permits for violations of building and housing codes when required by citations or notices of violation.

Comprehensive Planning Fee Surcharge

In 2010, the County updated its Comprehensive Planning Fee (CPF) surcharge on building permits of \$25,000 valuation or greater to the rate of \$0.00123 per dollar valuation of a project, with a maximum fee of \$7,000.00 per permit, regardless of valuation. The fee indirectly benefits individual project applicants by enabling the County to maintain the General Plan.

Impact and Additional Fees

The County does not assess any impact fees for residential development, beyond a limited option to pay an Inclusionary Housing fee in lieu of constructing affordable units. This is the case for both single-family residential development (which are exempt from the County's Inclusionary Housing Ordinance) and multi-family residential development, in both urban and rural parts of the unincorporated county. Other entities and special districts do collect additional fees, such as the school impact fee and the Santa Clara Valley Habitat Conservation Plan development fee as appropriate for the particular development.

Building Permit Review and Processing Times

Typical building permit review and processing times can vary depending on the size and complexity of the project, and on available staff. For a typical single-family residence that is not subject to a prerequisite building site approval process, standard plan check and review time is four weeks for the initial plan review. Subsequent reviews to address any comments from the first round of review take approximately two weeks. Express plan check and permit issuance is available for small projects that are typically additions of less than 500 square feet. Express plan check service is appointment-based

^[2] San Martin Advisory Committee Staff Report, July 27, 2022 meeting, Item No. 5 <http://sccgov.ig2.com/citizens/FileOpen.aspx?Type=1&ID=12852&Inline=True>

and enables the applicant to submit a building permit application with the goal of obtaining a permit in one business day.

Constraints Analysis

Building permit and inspection fees, including associated surcharges, do not impose an undue burden or constraint to housing development. As a percentage of total construction costs for a typical 3,500-square-foot home with a 500-square-foot attached two-car garage, building permit and inspection fees represent only approximately 2.25% of costs.

Implementation Measure

Each year, the County evaluates and adjusts fees as necessary to comply with the full cost recovery mandate set by the Board of Supervisors. Fees may be adjusted downward as necessary to reflect real processing costs.

The Department of Planning and Development recommends no changes to current fees for building permit plan check, review, and inspection. The Department continually reviews and implements procedural improvements as appropriate that may enable applicants to obtain services faster and with fewer complications. For example, for new homes that could require building site approval or other land use processes as a pre-requisite, the Department implemented a new checklist procedure to ensure that applicants are informed of the sequence of applications and help avoid situations where building permit applications are inadvertently submitted prior to obtaining

necessary land use approvals, or where the proposed project scope would make the project site subject to annexation by an adjacent city. These changes have significantly reduced complications and the need to extend building permit approvals or re-apply and pay new fees for building permit approvals that expire prior to obtaining pre-requisite land use approvals, such as site approval or Williamson Act compatible use determinations.

2.06n Land Use and Development Application Fees

Since the mid-1990s, the County has adopted a full cost-recovery policy for fees imposed to cover direct services to customers. This policy reflects a perspective that development should not be subsidized by County General Fund monies and that fees cannot exceed the cost of services.

The land use and development application fees listed below are collected by the Department of Planning and Development for necessary zoning and land use approvals. These are distinct from the building permit and inspection fees. State law requires land use and development fees to be commensurate and reasonably related to the cost of providing services. Permit processing fees charged by the County are in conformance with this requirement. For certain application types, there is a minimum fee for initial application costs, and if processing costs exceed the initial fee or deposit, the applicant is charged for the total cost of processing the application prior to issuance of the permit.

Table 2.24: Land Use and Development Application Fees

Application Type	Fee as of 12/07/2021
Architecture & Site Approval	\$9,198*
Building Site Approval (inside USA)	\$4,860*
Building Site Approval (outside USA)	\$10,984*
Certificate of Compliance	\$1,488
Design Review-No Hearing- Tier I- Gross Floor Area= <5,000	\$995
Design Review-ZA Hearing- Tier II- 5,001 <Gross Floor Area= <12,500	\$3,963
Design Review – PC Hearing- Tier III- Gross Floor Area> 12,500	\$8,932
Environmental Assessment	\$4,069*
Petition for Categorical Exemption/ Use of prior CEQA document	\$532
Geologic Report review (letter report)	\$621
Geologic Report review (in-depth report)	\$1,634
Grading Approval	\$3,587
Grading Approval filed concurrently w/ other land development permit	\$2,364
Special Permit (agricultural and temporary)	\$5,973*
Subdivision (minor, 4 lots or fewer)	\$12,078
Subdivision (major, 5 lots or more)	\$16,562
*Use Permit (standard)	\$9,258
Variance (standard)	\$2,030
Zone Change	\$6,651
<i>Notes:</i>	
1) *Asterisk indicates minimum fee for initial filing of application. Full cost of the fee is assessed at the completion of processing and charged to applicant.	
2) There are also final inspection fees for Fire Marshal and Land Development Engineering.	

Single Family Dwelling Development Cost Example

The first example of land use approval costs represents a typical rural area land development scenario, to provide a better understanding of the application fees associated with development of a new single-family dwelling used as a primary residence. Where the parcel is not an approved building site, it is not uncommon for the project to involve Building Site Approval and a Grading Approval and permit. Combined fees for these typical land use applications are \$14,411, including a petition for exemption from CEQA. These fees are based on typical processing costs and are in addition to the building permit fees discussed in the previous section. They represent the most common fees associated with residential development in rural areas. Neither a Building Site Approval nor Grading Approval would require a public hearing.

In areas subject to Design Review requirements, a Design Review process is required for a new single-family residence. The Design Review would be processed concurrently or bundled with Building Site Approval and Grading Approvals, if also necessary. Design Review zoning applies to most rural hillside lands immediately adjacent to and visible from the urban area or valley floor areas of the County. It may also be required as a condition of subdivision approval.

The Design Review process is intended to achieve excellence in residential design and make sure development blends with the natural hillsides as much as possible. Standards can require low reflectivity of painted surfaces and landscaping to blend with the natural hillsides and mitigate for visual impacts and may affect the placement of a home on a site for visual mitigation. The process allows for a residence that is 5,000 square feet or less to be processed without a public hearing. For structures that trigger design

review that exceed 5,000 square feet in size up to 12,500 square feet in size, a public hearing by the Zoning Administrator is required. Design Review residences that exceed 12,500 square feet in size require a Planning Commission public hearing. Minor projects, such as additional to an existing residence or accessory structures, may apply for an exemption or for administrative review without a public hearing. Decisions of the Zoning Administration Hearing Officer may be appealed to the Planning Commission, and Planning Commission decisions to the Board of Supervisors. Companion land use actions (i.e., Grading and Building Site Approval) are completed concurrent with Design Review and are referred to as Concurrent Land Use applications by the County Zoning Ordinance. Generally, Design Review takes 2-4 months. Design Review rarely results in project denial because the process is intended to identify and resolve issues that would result in an unacceptable final project design. Conditions of approval often include grading quantities, architectural refinements/limits, landscape requirements, and protection of existing vegetation.

Costs commonly associated with Design Review process include the County application fee (\$3,963) and consultant fees for design and modification of site improvements. Additional costs are often offset by savings associated with reduced grading, since Design Review (especially in conjunction with Grading review) often results in less grading on the site.

Multifamily Dwelling Development Cost Example

This second example of land use application costs represents a four-unit apartment project in an urban area zoned for multifamily development, in R1S, R3S, or R3. The project would require Architecture and Site Approval (ASA). There is no mandatory pre-application meeting requirement as there is for a non-residential Use

Permit or Subdivision. Accompanying the submittal is a form indicating that the density of the proposed development conforms to the applicable city General Plan. The ASA process is designed to ensure conformance with applicable development standards and reasonable conditions of approval. Generally, ASA addresses the adequacy of parking and driveways, landscaping, site layout, and design of the structure. ASA may also evaluate the relationship of the lot and its development with adjacent uses. Standard ASA fees are \$9,197, plus \$531 for the processing of a Categorical Exemption under CEQA.

Constraints Analysis

Each annual budget cycle, fees are assessed relative to service costs. In the current fee evaluation process, certain fees will be reduced to address the general or average cost of processing, while other lesser fees will become minimum deposit fees without being raised, to enable compliance with full cost recovery mandates. Fees may not be significantly increased except for the amount necessary to cover inflation in personnel costs. Fees for service is now a common means for local governments to address the costs of development-related services without relying on General Fund revenues. Fees are set by the Board of Supervisors to recover full costs of the services provided, thereby avoiding reliance on General Fund revenues to the greatest extent feasible. Reducing fees would necessitate increased reliance on General Fund revenues for planning and land use approval services.

Implementation Measure

Each year, the County evaluates and adjusts fees as necessary to comply with the full cost recovery mandate set by the Board of Supervisors. Fees may be adjusted downward as necessary to reflect real processing costs.

No changes to current land use and planning application fees are proposed to facilitate or accommodate projected housing demand or substantially reduce costs of development.

2.06o Impact Fees and Exactions

A development impact fee is a monetary exaction other than a tax or special assessment that is charged by a local governmental agency to an applicant in connection with approval of a development project for the purpose of defraying all or a portion of the cost of public facilities related to the development project (Gov. Code § 66000(b)). The legal requirements for enactment of a development impact fee program are set forth in Government Code §§ 66000-66025 (the "Mitigation Fee Act").²²

Two typical fees or exactions charged on housing development are permit processing fees for planning and land use entitlements and impact fees or exactions imposed to defray all, or a portion, of the public costs related to the development projects.²³ The County does not impose development impact fees of its own upon private residential development. Local school districts collect impact fees when a building permit for a new residence is being processed and provide documentation of payment to the County prior to the issuance of permits. Certain ADUs are exempt from this impact fee under State law. No other impact fees are levied upon private single-

²² A Short Overview of Development Impact Fees, by Peter N. Brown City Attorney, City of Carpinteria and Graham Lyons, Deputy City Attorney, City of Carpinteria, Dated

February 27, 2003, http://www.ca-ilg.org/sites/main/files/file-attachments/resources_overviewimpactfees.pdf accessed 8/16/22

²³ Fees and Exactions, <https://www.hcd.ca.gov/fees-and-exactions> accessed 8/16/22

family residential development in the unincorporated area. Projects which create three or more housing units (not counting ADUs or Junior ADUs, or units developed following an SB 9 urban lot split) are subject to the County's Inclusionary Housing Ordinance, which requires one out of every six units to be deed restricted affordable, or for the applicant to pay an in-lieu fee to the County's Office of Supportive Housing. This minimal application of impact fees helps reduce housing costs and it contrasts with the practices of most cities and many counties, which impose impact fees for libraries, parks, and a variety of other services to ensure new development pays a share of the costs of new facilities or upgraded facilities incurred due to new development.

2.06p Permit Process and Procedures

The County seeks to be as transparent as possible with applicants on permit processing and procedures. This includes posting checklists of required submittal materials on the Department of Planning and Development website, with helpful descriptions of required items and helpful links to examples, ordinance sections, fee schedules and guidelines to provide direction and context to the applicants.

Throughout the processing of applications, the County complies with the State's Housing Accountability and Permit Streamlining Acts.

Ministerial projects are reviewed by the County's subject matter experts for compliance with relevant State and County requirements (such as the California Building Code, County Grading Ordinance, and the County Zoning Ordinance) and permits issued unless the project does not comply.

In the unincorporated areas, the County allows many types of housing without a land use entitlement. Where applicable, the entitlements that may be required include Building Site Approval, Design Review (in certain districts), Grading Approval (should the project exceed a specified amount of earthwork), Architecture and

Site Approval (for some multi-family housing), and in rare cases, a Use Permit (when housing is proposed in a zone that is not a residential zone by nature). Accessory Dwelling Units do not require site approval or design review, although may be subject to grading approval. Multi-family housing in the Housing Opportunity Sites combining district (those properties listed in the Housing Element sites inventory) have the option of proceeding without any land use entitlements if certain conditions are met, including an affordability requirement.

Processing of land use and development applications that are not permitted by-right require a discretionary land use application administered by the Department of Planning and Development. In 2023 that process includes the following basic steps:

- **Application Submittal** – Intake of development application, receipt of fee or fees, review of submitted application materials to determine if submittal is acceptable for distribution to reviewing departments/agencies.
- **Application Review** – Referral to reviewing departments/agencies, receipt of comments. Review of development application for completeness within 30 days of submittal in accordance with Assembly Bill 884. If incomplete, letter sent indicating necessary revisions for re-submittal.
- **California Quality Act (CEQA) Compliance & Staff Report Preparation** – When the application is deemed complete, preparation of environmental review, as applicable, in addition to the preparation of preliminary conditions and staff evaluation documents.
- **Public Hearing** – Upon completion of review process, development applications requiring public hearing are scheduled for hearing before the hearing authority.

- **Hearing Authority Decision** – Granting authority approves, denies, or approves permit application, with conditions, as appropriate.
- **Appeal** – 15 calendar day appeal period following action by granting authority, after which, if no appeals are filed, land use entitlement becomes effective, and applicant may submit building permits for plan check.

Throughout the application review process, the County complies with the Permit Streaming Act and CEQA timeline requirements to ensure timely processing of applications. Other steps taken to ensure timely application review may include:

- Use of pre-application meeting requirements, intended to review prospective applications for completeness and feasibility prior to formal application submittal (example: use permit, subdivision, lot line adjustment).
- An optional pre-screening meeting available to property owners considering applying for a land use permit. Pre-

screening meetings are scheduled approximately four weeks from the customer’s submittal of development materials. Costs are as listed in the [current fee schedule](#). The pre-screening can give customers insight regarding next steps and identifies challenges an applicant might need to address.

- Tracking of compliance with initial 30-day Permit Streamlining Act review period for completeness determination after initial submittal or any formal re-submittal.

Typical timelines for land use entitlement and planning permits are indicated in the table below. These processing times are general averages. Where circumstances vary and projects may be more complicated or require more than one resubmittal, processing times may increase. The County does not require any period of time to elapse between the approval of a project and the submittal of development permit applications, although applicants are advised to wait until the 15-day appeal period has passed.

Table 2.25: Land Use and Development Application Processing Timelines

Application Type	Typical Processing Time
Architecture & Site Approval (residential)	2-4 months
Building Site Approval (inside USA)	3-9 months
Building Site Approval (outside USA or > 30% slopes)	12-24 months
Certificate of Compliance	3-6 months
Design Review	3-4 months
Design Review Exemption	3-4 weeks
Environmental Assessment	2-3 months
Environmental Impact Report	6-12 months
Geologic Report review (letter report)	1 month
Geologic Report review (in-depth report)	1-2 months
Grading Approval	2-4 months
Grading Small	4-6 weeks
Special Permit (agricultural and temporary)	2-4 months
*Subdivision (minor, 4 lots or fewer)	2-6 months
*Subdivision (major, 5 lots or more)	6-12 months
*Use Permit (standard)	3-6 months
Variance (standard)	2-3 months
Zone Change (conforming with General Plan)	6-8 months

Constraints Analysis

A great deal of attention is often focused on permit processing and expediting such procedures as a primary means of facilitating development approvals, reducing processing costs, and speeding

residential development to construction phases. Some aspects of the typical development processing and review procedure are under the control of the local government, and some are not. Departments must assure that enough adequately trained staff are assigned to

manage the workload of application processing. Adequate coordination and internal review are also critical to ensuring that initial completeness reviews are performed within the 30-day period prescribed by State Permit Streamlining Act requirements. However, lack of competently prepared, legible, and adequate plans and supporting documents can lengthen review times, and the state of these documents is not within the control of the local government. In addition, depending on site-specific environmental factors and constraints, environmental assessment for potential adverse impacts and mitigation may be either simple or complex and time consuming.

County staff routinely monitors processing times to promote compliance with Permit Streamlining Act provisions. Changes to reduce permitting requirements, such as reduced requirements for minor grading projects, have also been implemented to reduce permitting costs and time consumed.

The Department of Planning and Development, including Planning, Development Services, and Fire Marshal Offices, has implemented three components of development review to potentially streamline and improve land use and permit review. First is a “developer’s roundtable” with staff to dialogue and discuss common issues that hamper efficient development review. Second, as described previously, the Department also offers an optional pre-screening meeting available to anyone considering applying for a land use permit. One benefit of pre-screening meetings is that applicants are subsequently more likely to have complete submittals and are better prepared to manage the application process. The Department also offers in-person and virtual meetings with anyone interested in developing a property to explain the application process as well as potential constraints prior to application submittal. Finally, in 2020 the Department implemented a new type of ministerial

nondiscretionary application called a Planning Clearance, an administrative level permit that is processed in 1-4 weeks. Currently, movable tiny homes and small scale agricultural and temporary agricultural housing are able to be processed through a Planning Clearance.

There are no constraints related to the timing of development permit applications following planning approvals, as there is no required waiting period. The County of Santa Clara generally does not impose restrictive requirements that delay property owners and project applicants from applying for building permits once a land use entitlement is granted. Almost all land use entitlements related to housing are valid for four years (five years in rare cases), and eligible for up to a two-year extension at the discretion of the approving authority (i.e., the Director of the Department of Planning and Development, the Zoning Administrator, the Planning Commission, or the Board of Supervisors). When the County applies timing conditions, they are generally items to be met prior to permit issuance or prior to final inspection, and do not require separate actions prior to application in almost all cases.

It should be noted that since 2020, the County has discouraged applicants from submitting “at-risk” applications, where a permit moves forward with all parties involved understanding that a land use entitlement is required but has not yet been approved. The County does not consider this policy to be a barrier to development, as there are often changes to the design of projects in rural areas that are required prior to the land use entitlement being approved, which would render the at-risk building permit application moot.

The County analyzed recent land use entitlements related to housing that were approved in relation to when the following development applications were submitted. There have been few, if any, multi-family developments in the unincorporated county since 1970, so

timelines for that housing type is not known. The County instead analyzed available data for single-family development. As of February 13, 2024, of the last 150 land use entitlements that were approved, 123 of them (82.0%) have resulted in development permit applications. A majority of these development permit applications (109, or 72.7% of the entitlements approved) were submitted within

one year of the prerequisite land use entitlement being approved, 49 of which were submitted within the first month of entitlement approval. Of the 150 approved entitlements, 27 have not yet materialized into development applications, 9 of which are currently still within the first year since the entitlement was approved. Additional analysis is summarized in the table below.

Table 2.26: Time Between Approval of Housing-Related Land Use Entitlements and Building Permit Application

Time Between Approval of Housing-Related Land Use Entitlements and Building Permit Application														
<i>(Analyzing most recent 150 approvals, as of February 13, 2024)</i>														
Time Since Entitlement Approval	within 1st month		1 mo. - 1 yr.		1-2 yrs.		2+ yrs.		No application submitted*		Expired		Total	
Building Permit Applications Submitted	49	32.7%	60	40.0%	9	6.0%	5	3.3%	24	16.0%	3	2.0%	150	100%

* Not yet expired, but no building permit application submitted since land use entitlement approval; expiration is generally four years from approval of these entitlements. Of the 24, 9 are still within 1 year of approval, 11 are between 1-2 years, and 4 are already beyond 2 years.

There are several reasons why an applicant may be delayed in applying for their development permits after receiving their land use entitlement approval. In four instances, there were appeals of the decision by either the applicant or a neighbor which delayed the project advancing. In five cases, the applicant chose to modify their project significantly after receiving their approval. In one case, an applicant chose to annex into a sanitary district rather than develop an onsite wastewater treatment system, a process governed by the Santa Clara County Local Agency Formation Committee (LAFCO) and not by the Department of Planning and Development.

In five cases, applicants began their work after receiving their land use entitlement approval and without seeking their development

permits, in violation of the County Ordinance Code. The County Ordinance Code does not allow for permits to be issued on a property with a violation except when the permits do not expand an existing use or add a new use; the permits are immediately necessary to protect public health, safety, or welfare; the permits will allow for the full abatement of all existing violations on the premises; or the property owner enters into a compliance agreement with the County concerning the correction or legalization of the violations.

Additionally, based on anecdotal reporting from property owners, some applicants who have received their land use entitlements have subsequently faced financial or other hardships that have prevented them from moving forward with their projects. Some property

owners have reported having difficulty hiring surveyors or other experts needed to finalize plans, including the onsite wastewater treatment system. Others elect to delay their application until they have completed conditioned requirements, even those requirements could be handled concurrently with their permit review. Finally, some owners seek a land use entitlement to increase their asking price for the land and have no intention of developing the property themselves.

Implementation Measure

Improving customer service and reducing processing times are a high priority of the Department and will continue to be the primary focus of the Department's improvement efforts. The Department continues to evaluate other areas of its Zoning Ordinance and Ordinance Codes to streamline permit reviews through the new Planning Clearance application. The County will also implement Program 2.19 - Streamline Multi-Family Housing Development which removes permit processing constraints in zones which permit multi-family housing. Delays experienced between land use entitlement approval and development permit application are not within the control of the County, and therefore no program is proposed to remedy them.

2.06q Code Enforcement

The County's Department of Planning and Development is responsible for enforcement of the Zoning Ordinance, Building Code, and Fire Codes as they apply to land use and development. Code enforcement is performed through building plan checks and inspections, in response to complaints regarding alleged violations submitted for review, through routine observation and field visits, and coordinated agency efforts such as abatement procedures. Code enforcement is a necessary and important aspect of local land use and permitting authority. It also helps to ensure that violations do

not contribute to neighborhood or community deterioration that adversely affect housing stock, new housing opportunities, and housing needs.

The Code Enforcement Division has a Program Manager who supervises a team of code enforcement officers who are assigned code enforcement cases throughout the unincorporated county and a Permit Technician that is specifically dedicated to assist the Code Enforcement Division.

The Department utilizes a database for managing and tracking violation complaints to ensure timely reporting and actions and all staff in the Department can access and view violation reports, inspections, and all images taken at inspections sites. An administrative hearing process was developed during the 2015-2022 Housing Element cycle and is still implemented with the goal of promoting code compliance in the most timely and efficient manner. County Ordinance C1-71 was further amended in January 2021 to clarify that while a permit shall not be issued on a property that has a confirmed active violation, until and unless the violation is removed and abated directly or through a Compliance Agreement, the Department Director has discretion to issue a permit where (1) the permit does not expand an existing use or add a new use, (2) the permit is immediately necessary to protect public health, safety, or welfare, or (3) the permit will allow for full abatement of all existing violations on the premises. . County Ordinance Code section C1-71 will continue to be amended during this code cycle to allow for flexibility of permits to be issued where violation(s) exist on the parcel.

Constraints Analysis

Public outreach and communication regarding code enforcement generally have a positive net effect on housing and neighborhood

preservation. The County continues to evaluate various means of improving code enforcement efforts and abatement of violations.

Implementation Measure

No reduction in code enforcement efforts or resources is recommended during the current cycle of the Housing Element Update. The County and the Department should continue to implement planned improvements to the code enforcement program.

2.06r Regulations Influencing Housing for Persons with Disabilities

Government constraints or factors influencing housing for persons with disabilities derive from the Americans with Disabilities Act (ADA), Chapter 11A or Chapter 11B of the California Building Code (CBC), and Federal Housing Administration (FHA) for accessibility.

A privately funded single-family residence project (new or addition/remodel) is not subject to accessibility requirements but a property owner can voluntarily incorporate such features as ramps or other improvements. All multi-family residential structures must meet the applicable accessibility requirements (ADA, FHA, CBC 11A or 11B) depending on its funding. It is recommended that applicants meet with the County Building Division to understand the necessary requirements for accessibility and other code requirements when developing housing projects.

The County Zoning Ordinance includes the following definition of "family" which explicitly includes "necessary domestic help" to accommodate those with disabilities – *"Family: One or more persons occupying a premises and living as a single, nonprofit household, as distinguished from a group occupying a hotel, club, fraternity or sorority house. A family shall be deemed to include necessary domestic help."* The purpose of the definition of "family" is to distinguish

private residential dwelling units from hotels, bed and breakfasts, inns, clubs, and fraternity or sorority houses. Families are also allowed to rent out rooms to two persons who are not part of their family structure.

This definition does not pose a constraint on housing for persons with disabilities because it allows for necessary domestic help and does not include any requirement for a specific type of relationship between residents within a residential unit, be it a single-family residence, multi-family housing development, or "group home." For clarification, the reference to "nonprofit households" does not address the type of legal entity occupying the household, but rather clarifies that the group of individuals occupying the home is not doing so for a profit-seeking purpose (e.g., a hotel).

Where accessibility improvements are involved or required, they are reviewed and approved through the normal permitting process.

Special needs housing involving multi-family buildings or more institutional settings is more likely to be developed in the cities or unincorporated urban pockets because of the available sewer and water services and transportation accessibility.

For some populations of people with disabilities, "group homes" provide a desirable type of housing as they typically offer a variety of support and services to their residents. Our Zoning Ordinance does not define "group homes" and refers to such uses as Community Care Facilities. The County's Community Care use classification is defined as "Limited" when a development provides for six or fewer residents. Group homes or other Community Care – Limited uses are allowed as a matter of right, with no requirements restricting concentration of uses, discretionary requirements, and parking requirements other than those required under the building code for group home occupancies and accessibility requirements. Group homes or other forms of Community Care facilities providing for

more than six residents are allowed under the “Expanded” subcategory, subject to issuance of a Use Permit. Community Care Facilities are allowed in all zoning districts except for OS/F (Open Space and Field Research) and SCA (Special Conservation Areas).

“Limited” projects may be sited on any parcel in the unincorporated county outside of the OS/F and SCA zones. For “Expanded” projects, there is a supplemental finding requirement that the new facility would not lead to an undue concentration of group homes in the vicinity. There is no standard of separation from other existing facilities specified in the Zoning Ordinance, and to date the County has not denied any application due to concerns regarding the proximity to other Community Care facilities. Standard Use Permit findings and criteria would provide an evaluation of whether the proposed location of the use is appropriate relative to necessary support services and is otherwise appropriate for the site. Parking requirements for residential community care facilities such as group homes are specified in Ch. 4.30 of the Zoning Ordinance, requiring one space per six beds or residents, and one per employee. If either a Community Care facility or an Expanded Care facility is applied for, the structure is subject to accessibility requirements. By December 2026, the County will adopt revisions to the Zoning Ordinance and other County codes to allow “Expanded” projects in all zones that have similar residential uses, with objective standards and permit processes that are equivalent to similar residential uses.

For any parking facility serving the public, accessible parking spaces shall be provided. Of the required accessible spaces, at least one shall be van accessible. Standards for accessible parking spaces are found in 4.30.070 of the County Zoning Ordinance. Additionally, Electric Vehicle Charging Stations (EVCS) shall comply with accessibility standards (e.g., stall size, spacing, signage, accessible route, etc.).

The County does not require licensing for Community Care facilities, but State licensing requirements apply.

Reasonable Accommodation

The County’s approach is to seek reasonable accommodations whenever possible under Federal and State law. Aside from Federal and State accessibility regulations, the Zoning Ordinance provides for procedures which allow for exemptions from setback requirements or other development standards, permit requirements or building regulations to allow for accessibility devices and structures. The County has a process to address reasonable accommodation requests for persons with disabilities. The Zoning Administrator of the County of Santa Clara reviews and either denies, approves, or conditionally approves such request where the proposed building or improvements necessitate relief from a standard of the Zoning Ordinance, such as a setback. The reasonable accommodation procedures are intended to allow exceptions or modifications without application or consideration of a Variance or other defined discretionary approvals. Reasonable accommodation requests are not subject to the more restrictive nature of a Variance procedure and findings, including noticing and public hearing, rights of appeal, and fees. There are no fees charged for the reasonable accommodation review process.

The criteria and factors considered by the Zoning Administrator in processing a reasonable accommodation request are:

- Existing, applicable policies or regulations,
- Availability of solutions not requiring an exception or modification of standards,
- How the request directly relates to the needs of the owner/occupant with disabilities, and
- The exact nature of the exception or modification proposed.

In evaluating a proposed request for reasonable accommodation, the Zoning Administrator uses the above criteria and factors to determine whether the need expressed by the applicant can be met without granting undue relief from a Zoning Ordinance standard. If it is determined that the request necessitates deviation from some standard, such as a setback, the Zoning Administrator is authorized to approve the request, provided that the applicant provided the information validating the need of the owner or occupant with disabilities, and the request is not so extreme as to have an actual detrimental impact on an adjacent property.

To date, there have only been a small number of inquiries regarding the possibility of obtaining a reasonable accommodation request since it was instituted in 2003. Only one request has been filed; that request was filed in January 2009 and granted in February 2009. The County expects more reasonable accommodation requests in the future for modifications to buildings for accessibility, such as ramp and porch improvements, window and door modifications, and similar construction, as the overall population ages.

To further ensure the County is removing barriers that may make it more challenging for people with disabilities to develop housing, Program 2.33 – Reasonable Accommodation Policy will be implemented by December 2024, to review and further amend findings required to grant a reasonable accommodation.

Constraints Analysis

The County's permit requirements, procedures, and reasonable accommodation request process offer opportunities for homeowners to accommodate the special housing needs of those with disabilities. The procedures are prescribed, and processing time is approximately two to three weeks depending on possible need for further information and resubmittal. Staff works closely with applicants to ensure there is adequate information in each request to assess

whether or not a reasonable accommodation can be supported. However, the findings currently required may pose an unnecessary constraint. Therefore, the County will review and amend its required findings for granting a reasonable accommodation (refer to Program 2.33).

Implementation Measure

No changes are necessary to County requirements or procedures to accommodate housing needs for persons with disabilities, however, to increase the visibility of the reasonable accommodation option, Staff will propose options to the Board to codify this process within the Zoning Ordinance.

Additionally, the County is implementing Program 2.20 – Tracking and Ongoing Compliance with State Housing Laws, which includes updating the County's Zoning Ordinance, and any other relevant County codes and policies, on a regular basis so they continue to be in line with state law. The County will include an assessment of the regulations for group homes for seven or more persons in relation to state law as a part of Program 2.20.

2.06s Regulations Influencing Housing for Agricultural Workers

Agricultural workers are a specific subset of the population with special housing needs. The 2023 Farmworker Health Study published by UC Merced found that nearly all (92 percent) agricultural workers in the State are renters, and that these workers face a host of substandard housing issues ranging from inadequate drinking water, plumbing, heating and cooling systems, or are in need of major repairs due to problems such as termite infestation or water damage. Agricultural workers also face issues of overcrowding, with more than a quarter reporting that they live in a house with six or more than six people and sleep in a room with three or more people.

The State has set forth regulations relating to employee housing and labor camps in the California Health and Safety Code sections 17021.5, 17021.6, and 17021.8, which supersede any local ordinances. Housing that accommodates six or fewer employees must be treated as a single-family residence in terms of how they are permitted both in location and in processing. Medium-scale projects that include group quarters of up to 36 beds or up to 12 single-family units are classified as an agricultural use and cannot be subject to any requirements which other agricultural uses in the same zone would not be subject to.

The County makes special provision for agricultural employee housing, especially smaller-scale projects that do not qualify as employee housing under state law. In 2020, the County updated its Zoning Ordinance to re-classify agricultural employee housing as either *Small-Scale Permanent*, *Seasonal*, or *Large-Scale Permanent*. *Small-scale permanent* housing can include up to six family units or 18 beds in group housing. *Large-scale permanent* projects are those consisting of more units or beds than small-scale. *Seasonal* projects consist of multiple movable tiny homes and are onsite for no more than 180 days. The County also created a *Temporary Agricultural Residence* category, which allows for a single recreational vehicle or movable tiny home per property to provide temporary housing to a person engaged in an on-site agricultural operation, for up to five years.

The County streamlined the permitting process for all four of these housing categories. *Small-Scale Permanent* and *Temporary Agricultural Residences* are allowed subject to a non-discretionary Planning Clearance, with a cumulative cap of 100 units and 50 units, respectively. *Large-Scale Permanent* and *Seasonal* projects are allowed subject to a Special Permit.

Agricultural employee housing is contingent on the owner of each parcel submitting an annual verification form to the Department of Planning and Development by January 31 of each year, to verify and provide substantial evidence that any permanent agricultural employee housing was occupied by agricultural employees for a majority of the year and verify that any seasonal units will be removed from the property outside of the designated occupancy dates. A deed restriction is recorded on any property for any permanent agricultural employee housing to provide notice to subsequent property owners that such housing is to be used only for agricultural employee housing. A property owner shall also affirmatively disclose the existence of any such deed restriction before transfer of ownership of such a property.

The nature of commercial agriculture in Santa Clara County has evolved significantly over the decades since it was known primarily as an agricultural economy, nicknamed the “Valley of Heart’s Delight.” Santa Clara County, once the fruit capital of the world with over one hundred thousand acres planted in fruit and nut trees, has seen a significant loss of agricultural land since the 1940s. Recognizing the rapid conversion of prime farmland within the county over the past two decades, the County of Santa Clara adopted the Santa Clara Valley Agricultural Plan in January 2018 to identify and prioritize key strategy areas, policies, and programs that support and encourage existing and future agricultural operations. One key strategy and action was to facilitate construction of more workforce housing for both seasonal and year-round farmworkers.

The diversity of Santa Clara County’s crops, the labor-intensive nature of such crops, and the overall high cost of housing in the region compound the need for agricultural employee housing as a basis for maintaining agriculture within the county. Santa Clara County’s land values will continue to rise, encouraging high-value

specialty crop production, which tends to favor crops that are highly perishable and need sufficient personnel to be harvested and moved to market in a timely manner. Such crops require significant hand-scale labor for planting, pruning, weeding, and harvesting and are typically not well-suited to mechanization. As farms become more vertically integrated, with on-site value-added operations such as packing and shipping facilities, agricultural processing, and on-site sales, the need for agricultural labor may increase, becoming more stable and year-round rather than seasonal.

Constraints Analysis

Despite there being only three units developed in the two years since the amendments were made to streamline agriculture employee housing, interest in the new process has increased significantly during this time. According to the Santa Clara County 2021 Crop Report, there are approximately 8,000 agricultural workers in the county supporting a \$340 million industry that provides food to the local residents, region, and beyond. As the County implements additional measures to preserve agricultural lands, the need for agricultural worker housing is unlikely to diminish.

Interested property owners regularly call in or schedule meetings with planners to go over their options under the revised provisions and inquire about the process, with approximately four to six inquiries per month. Property owner interest has consistently centered on the *Small-Scale Permanent* category, which prior research indicated would be the most relevant and functional category in most circumstances. However, all four types of housing allowed under the approved amendments have been the subject of inquiries by property owners.

At least three property owners have initiated projects under the *Large-Scale Permanent* category, primarily with the intent to house seasonal workers operating under H-2A work visas, hosted by farm

labor contractors. In at least one case, land was purchased with the explicit intent of pursuing such a project. The primary challenge *Large-Scale Permanent* projects face is approval for drinking water. A water supply for any development consisting of five or more service connections is classified as a “state small water system” and water supply to a project serving 25 or more people per day, for at least 60 days per year, is classified as a “public water system.” Both water system classifications trigger oversight authority by the State’s Regional Water Quality Control Board, which in recent years has required that an applicant first attempt to obtain an urban service area connection prior to its consideration of an application. In most cases, an urban service area connection would necessitate city annexation. The Department is in discussion with staff from the Local Agency Formation Commission (LAFCO) of Santa Clara County regarding options and annexation. A smaller number of inquiries have been received regarding the *Seasonal* and *Temporary Agricultural Residence* categories. Both categories make use of movable tiny homes, which are required to connect to a permanent onsite wastewater treatment system (OWTS) under our County Local Agency Management Program (LAMP). Most prospective applicants are dissuaded from pursuing the *Seasonal* or *Temporary Agricultural Residence* categories once it is explained that they would first need to develop a permanent OWTS.

As evidenced by a six-month delay for the three-unit project discussed above, the *Small-Scale Permanent* category also faces challenges with establishing OWTS. At least a dozen prospective applicants have presented preliminary plans to develop agricultural employee housing, have been informed of the requirement to first obtain Department of Environmental Health approval for an OWTS and drinking water supply, and have not yet submitted a complete application. As a result of the amendments approved by the Board, the newly established planning process has been effectively

streamlined, allowing review and approval to be expedited through a ministerial evaluation of objective standards and requirements. However, the overall permitting process, namely the path to getting clearance for an OWTS and water supply, as well as the review and requirements by subject matter experts, continues to present significant delays and challenges in the path from proposal to final approval. It is important to note that the challenges related to water supplies are also challenges that originate at the state law level.

Implementation Measures

The Department is working with all relevant agency reviewers and subject matter experts to identify opportunities for further streamlining of the regulatory requirements and permitting process for agricultural employee housing. The County will continue to implement the new streamlined permitting process and monitor its effectiveness. Where potential streamlining opportunities require additional code amendments, the Department will coordinate with the relevant agencies to present such opportunities to the Board. On August 29, 2023, the Board of Supervisors directed the preparation of an Agricultural Worker Housing Workplan to facilitate and further support agricultural worker housing production.

Please see the implementation programs in Chapter 4 for multiple efforts aimed at further alleviating constraints on the development of housing for agricultural workers.

Please see Section X.6 of the Assessment of Fair Housing (Appendix L) for analysis of the housing need experienced by agricultural workers in the unincorporated county.

2.06t Regulations Influencing Additional Special Needs Housing

Regulations for Special Needs Housing includes populations such as the elderly; persons with disabilities, including a developmental disability, as defined in Section 4512 of the Welfare and Institutions Code; large families; farmworkers; families with female heads of households; and families and persons in need of emergency shelter. Cal. Gov't Code § 65583(a)(7). This section discusses housing for persons within these categories, and tools within the County Code to assist with residential modifications to enable a person to continue living in place.²⁴

Special needs housing includes community care facilities, assisted living centers, emergency shelter housing, and homelessness-related services. Community care facilities, also referred to as “group homes,” are defined as uses permitted in all urban base zoning districts that permit residential uses and all rural base districts. Small-scale (“Limited”) community care facilities, serving or housing six or fewer individuals, are permitted as a matter of right, while those serving more than six individuals (“Expanded”) are permitted subject to a conditional Use Permit. The use regulations of the County Zoning Ordinance are consistent with State laws.

Emergency shelters, homeless shelters, and combined shelter/service centers for the elderly and persons with disabilities are typically developed within city jurisdictions, where there are available sewer and water services, as well as public transportation, paratransit (on-demand transportation for those with special needs), and access to other important services. Emergency Shelter is permitted in Rural Residential (RR), Multifamily (R3), Commercial (CG and CN),

²⁴ The County has not identified any special needs in the unincorporated areas specific to large families or those with a female head of household, as per Government Code 65583(a)(7).

Administrative/Professional Office (AO), and Industrial (MH and ML) zones as well as the Public Services and Supportive Housing (-ps) combining district. Small scale (14 or fewer beds) emergency shelters are allowed “by right,” and large-scale shelters are allowed with a Use Permit approval. Religious and Non-profit institutions may also operate small-scale emergency shelters as an ancillary use “by right.” Emergency, homeless, and transitional shelters are not typically located in the rural unincorporated areas. Rural hillside and agricultural areas are not served by municipal sewer service, have no or very limited access to transit and social services, are far removed from other emergency response services and medical centers, schools, and amenities, and do not promote the societal integration of the populations served.

The focus of the County is to fund programs that provide emergency, transitional, and special needs housing within the urban areas of the 15 cities within Santa Clara County, which is where the needs and opportunities are greatest. The County devotes significant resources to the operation of emergency shelter housing throughout the urban areas, operating or assisting with a total of 211 shelters within Santa Clara County, including three major shelters in Sunnyvale, Gilroy, and San José. Funding assistance is also provided for many other resources aimed at preventing homelessness.

In the last Housing Element, the County identified funding as a significant constraint to combat homelessness. Since then, County voters approved an unprecedented [affordable housing bond measure of \\$950 million](#) in 2016, which the County has used to fund affordable housing projects, including 830 new homes in nine developments, which will serve more than 1,600 people, with another 1,280 affordable homes under construction. The County’s role has expanded from providing permanent housing, emergency housing, and homeless shelter/service centers, to also include advocacy and

tenant/landlord support services. Under what is called the “[Community Plan to End Homelessness](#),” the County gave itself [a deadline of 2025](#) to double its temporary shelter capacity, house 20,000 people through supportive housing, cut the annual inflow of people becoming unhoused by 30%, expand homelessness prevention programs to serve 2,500 people yearly, and address racial inequities that disproportionately affect people of color.

Constraints Analysis

The County General Plan, zoning regulations, and permitting requirements to accommodate certain special needs housing types described above do not constitute an undue burden or constraint on the production or supply of special needs housing. Within urban areas, the use classifications and regulations for special needs housing types are intentionally like those of the adjacent cities. The key issues or factors which pose constraints to meeting special needs housing continue to be the availability of suitable land, funding for programs and grants, ongoing need for intergovernmental coordination to provide such housing and related services, and providing the kinds of ongoing services needed to prevent re-occurrences of homelessness.

Implementation Measure

No changes to General Plan land use policies, zoning regulations, permitting procedures or development standards are necessary or appropriate to facilitate or accommodate special needs housing for the unincorporated areas.

2.06u State Required Permitting

The State has adopted several measures where local jurisdictions must approve projects which meet certain criteria, including SB 9, SB 35, SB 330, and the State ADU ordinances. The County is not yet subject to SB 35, but should it become so will fully comply with the

State's requirements. For SB 330, the County will revert to the State preliminary application, with no growth controls and only objective standards reviewed for qualifying applications. The County has adopted local implementing ordinances for SB 9 and ADUs, to incorporate the State's requirements and add minimal objective standards as allowed by the State. Should any of these State laws be amended, or new laws of a similar vein be adopted, the County will defer to State requirements when in conflict with the local County ordinances.

Constraints Analysis

The County permitting requirements to accommodate these housing application types described above do not constitute an undue burden or constraint on the production or supply of qualifying housing. Projects not qualifying for state required permitting often require discretionary approvals, such as Architecture & Site Approval for multi-family housing projects.

Implementation Measure

The County will create transparent processes, fees, and checklists for all State required permitting and make these available to public (Program 2.18). In addition, the County will work to streamline all multi-family housing developments through a streamlined permitting process with limited objective standards that will be applied first to properties on the sites inventory list and eventually to all zoning districts which allow multi-family housing development (Program 2.19). Lastly, the County will implement Program 2.20 - Tracking and Ongoing Compliance with State Housing Laws, which includes updating the County's Zoning Ordinance, and any other relevant County codes and policies, on a regular basis so they continue to be in line with state law.

2.06v Inclusionary Housing

The County adopted a countywide Inclusionary Housing Ordinance (IHO) in October of 2020 to foster a sufficient supply of housing for persons at all economic levels and relieve the burden placed on the housing market throughout Santa Clara County. The IHO applies to any application that creates three or more dwelling units. Of the proposed dwelling units, sixteen percent (16%) shall be made available for rent or for sale to at an affordable Housing cost to moderate, lower, very low, or extremely low-income households. The County adopted Inclusionary Housing Ordinance Guidelines in November of 2021 which serves as a guiding document for the implementation of the IHO.

Inclusionary Housing in the Stanford Community Plan Area

Applications within the Stanford Community Plan Area (SCPA) may bank the inclusionary for sale affordable units to be developed as rental inclusionary units at a later date. Applications within the SCPA may also construct the inclusionary units on site, off-site, convert an existing unit to an inclusionary unit, or transfer required inclusionary units to another residential development within the SCPA.

Inclusionary Housing outside the Stanford Community Plan Area

Required inclusionary units may be developed on-site, off-site, converted from an existing unit, or the applicant may choose to pay an in-lieu fee for developments that result in a fraction of a unit (a development that has less than 7 units).

Constraints Analysis

The intent of the program is to promote affordable housing development. To date, the County has not processed any residential development applications outside or within the SCP that would be subject to the IHO, therefore the County has not seen the IHO act as a constraint of proposed development projects. Additionally, the

development of ADUs, agricultural employee housing, student housing, residential community care facilities, and units created pursuant to SB9 are not subject to the IHO which limits constraints on building these types of units on properties. Lastly, the IHO offers a variety of options for the development of the required inclusionary unit(s) (on-site, off-site, conversion of units, etc.) which provides flexibility for the creation of the unit. As such, the IHO provides minimal constraints on housing supply and affordability.

Implementation Measures

The County will continue to implement the IHO as written and may perform future revisions if the County finds areas of improvements needed to achieve the IHO goals of affordable housing development.

2.06w Summary of Stanford University Constraints

Stanford University is the only significant unincorporated urban area that is excluded from countywide urban development policies that call for annexation of urban development into the adjacent city. Such exclusion is based upon a 1985 land use policy agreement among Stanford, the County of Santa Clara, and the City of Palo Alto (the “Tri-Party Agreement”).

Current County policies governing development at Stanford do not constrain affordable housing development. Through the Stanford Community Plan (SCP) and the 2000 General Use Permit (2000 GUP), the University is required to develop housing of a variety of types in conjunction with new academic building development. The SCP stipulates that Stanford will supply its own urban services for academic development, which includes housing for academic faculty and staff, and that lands with non-academic uses will be annexed

into Palo Alto. Stanford University has sited housing development adjacent or in close proximity to the academic programs that they support. Upon approval of an updated SCP that is being processed in parallel with this Housing Element Update, SCP policies are being amended to promote the construction of housing near transportation, the campus, and services/amenities.

Constraints Analysis

The County requires a linkage between academic development and housing, to balance housing, jobs, and available transportation. The linkage is expressly defined in the SCP and the 2000 GUP. Within University lands located in the unincorporated county, there is capacity to meet at least half (1,680 units) of the housing needs of this Housing Element Update. The County is currently updating the SCP, which would require Stanford to provide housing, both affordable and market-rate, on campus or on contiguous Stanford-owned land grant properties.

Beginning with Annual Report No. 12 (2013) Table C-2 of each Annual Report includes a column that indicates the RHNA units provided in each reporting period since the adoption of the 2000 GUP.²⁵ This helps the County track the RHNA units constructed on the Stanford Campus in relation to the remaining capacity under the GUP.

Implementation Measures

The revised SCP policies will require development of housing in the Academic Campus land use designation at minimum densities of 30 dwelling units per acre (currently the required density is a minimum of 15 dwelling units per acre) to enhance access to affordable

²⁵ Annual Reports for Stanford University can be found here: <https://plandev.sccgov.org/policies-programs/stanford-university/2000-general-use-permit/annual-reports>.

housing. In addition, a streamlined approval process for on-campus housing within a half mile of a public transit station or high-capacity transit stop is being developed as part of the SCP, consistent with Senate Bill (SB) 35, along with objective design standards for the three sites on the Stanford campus identified in the Housing Element, to further facilitate streamlined review of housing projects while addressing neighborhood compatibility.

2.06x Summary of Rural Unincorporated Area Constraints

Since its inception, the County General Plan has been built around a longstanding vision for rural unincorporated areas to remain rural. As such, **none of the sites selected to meet the County's RHNA are located in the rural unincorporated areas.** The selected sites are all located within a city's urban service area or on Stanford Campus, which is an area planned to provide infrastructure and utilities to properties it encompasses. Refer to the Housing Element Update EIR Section 4.16 and Appendix C for more information regarding the utility services planned for the selected sites.

Unincorporated areas consisting of steep hillsides, open spaces, farmland, and rangeland, are considered rural and are intended to remain in non-urban uses and densities, deemed inappropriate and unsuitable for urban development. Moreover, these areas have significant physical and environmental constraints to development; they are often prone to natural hazards, such as wildfire, flooding, and geological hazards, contain protected habitat species, protected waterways, and protected scenic vistas, and have limited viable water supply and steep slopes.

These areas are often void of sidewalks, public transit, and other amenities that would serve typical residential development, such as

schools and grocery stores. Supportive infrastructure is prohibitively costly for development on certain parcels. Higher density housing is dependent on provision of urban services like sewer and water, which are available only in cities and Urban Service Areas. Very low- and low-income households particularly benefit from other urban services and amenities like schools, transportation, and retail establishments, none of which are provided in the rural areas. Local, regional, and state planning policies and incentives such as *Plan Bay Area 2050* and transit-oriented development enabling legislation focus development in areas where there is already existing infrastructure, proximity to transit and work centers, and where environmental impacts can be minimized. As such, the County's policies for the rural unincorporated areas are aligned with broader regional and state goals.

In rural unincorporated areas, new residential uses are limited to one primary, single-family dwelling per lot (except for agricultural employee housing and accessory dwelling units), and densities for subdivision purposes are low. With the addition of Senate Bill 9 (SB9), the minimum lot size of qualifying parcels is reduced to 1,200 square feet. Under SB 9, eligible parcels in the unincorporated county must be designated as wholly within an urban area according to the U.S. Census Bureau and be residentially zoned (Parcels in R1, R1E, RHS, R1S, RR, or A1 Zoning Districts) and not be located within a hazardous area.²⁶ Over two-thirds of the land in the county (including parcels within the 15 cities and towns) would not be eligible under the provisions of SB 9. In rural zoning districts, allowable densities range between 5 and 160 acres per lot.

In rural unincorporated areas of the County, several factors present constraints to housing development, but constitute appropriate

²⁶ County of Santa Clara website; SB9 information page; <https://plandev.sccgov.org/senate-bill-9> accessed 11/17/22

policy and regulatory approaches to development in the variety of steep, vulnerable, protected, and hazardous areas that make up over two-thirds of the land area of the County. Protection of the rural districts does not present an undue burden or constraint upon housing for the urban area population, which as a matter of policy should be located within existing urban areas to the greatest extent possible to avoid sprawl and other unintended consequences. To summarize:

- Countywide, longstanding development policies require that urban scale development occur only in cities and not in rural unincorporated areas.
- Regional land use, housing, and transportation policies as reflected in the region’s Sustainable Communities Strategy focus growth in the urban core of the Bay Area, and particularly in urban areas near transit.
- The vast majority of rural unincorporated development is single-family residential on existing lots of record, agricultural uses, or open space.
- Rural areas do not have access to municipal sewers or water systems, and most areas rely upon on-site wells and small private water systems. Limited groundwater supplies, soils, slopes, and high groundwater conditions limit the feasibility of development. Multi-family housing development is not consistent with the density policies for rural areas and typically could not be approved without urban infrastructure.
- Steep terrain, limited road access, and prevalent natural hazards make most of the county’s vast rural hillside areas infeasible and unsuitable for housing at urban densities.

2.06y Summary of Urban Unincorporated Area Constraints

The unincorporated urban islands or pockets in Santa Clara County are mostly comprised of residential neighborhoods that were

developed prior to the County’s first General Plan, during a time when the County approved urban subdivision tracts in unincorporated areas. These urban pockets are scattered over a 250 square mile area. The best means of improving the efficiency of urban service delivery and making more logical political boundaries is to annex the islands into their surrounding cities. Better municipal organization, logical boundaries, and improved service efficiency promotes the provision of an affordable housing supply. To that end, utilizing the streamlined annexation provisions of state law, the cities of Santa Clara County have successfully annexed 16 islands during the fifth Housing Element cycle, from 2015 to May 2021. The City of San José alone has annexed 11 of those islands during this time.

Constraints to the development of affordable housing in urban unincorporated areas include:

- Urban unincorporated islands are largely built-out and devoted to single-family residential uses. Large-scale redevelopment of established neighborhoods with higher density uses would be difficult to coordinate and is therefore unlikely.
- Selected areas may be eligible for higher density development in accordance with city general plans, but most areas designated for multi-family residential uses have been annexed already or must be annexed into cities prior to redevelopment of any kind, consistent with joint city/County policies and as a means of accessing sewer and water services.
- While there are islands that remain unincorporated, County-approved development in these pockets must be consistent with the General Plans of the cities surrounding them to assure compatibility with the larger, surrounding city neighborhood of which they are a part. Annexation promotes the attainment of higher density housing, planned

unit developments, and other urban development that better ensures affordable housing opportunities.

The longstanding joint city/County policies are founded in cooperative planning, intended to be respectful of city general plans and interests, and provide greater opportunities for infill development than if the islands remained unincorporated.

2.06z Summary of County-Owned Lands Constraints

County-owned properties provide important but somewhat limited housing development opportunities. The sale of surplus properties to non-government entities for use in housing or mixed-use developments is one means of facilitating housing development. Another means is through County retention of land rights and partnership with a private developer to create new housing or mixed-use developments. In either case, the use of land for development (for a non-governmental purpose) is governed by the applicable city general plan when located within a city's Urban Service Area.

Analysis of the constraints affecting development of individual County-owned properties for affordable housing projects is more difficult than analyzing the constraints affecting residential development on privately-owned lands because:

- Opportunities for the development of County-owned lands is limited by the small number of properties and the financial considerations involved in determining the disposition of those properties.
- For those projects that may require city approvals, the parcels involved may not initially have residential designations in the cities' general plans and/or necessary pre-zoning that would indicate how many residential units the cities would allow to be built on them.

- The residential land use designations the cities would apply to County-owned lands proposed to be used for housing are likely to be "planned unit development" designations that allow for a relatively wide range of densities and development types and as such lack specificity and predictability.

The use of surplus County-owned properties does not involve significant constraints to housing development. Rather, it promotes housing development if the property is located within city Urban Service Areas and meets the needs of both the County and city within which development is proposed.

2.07 Non-Governmental Factors Influencing Housing Production

2.07a Overview

Housing supply and costs are influenced by many factors beyond the control of local government. State and national economic conditions have considerable bearing on the pace of local development, the availability of construction lending and financing, and mortgage interest rates. Many of the costs associated with home building, such as construction labor and materials, are outside of the County's control. The County can, and does, provide assistance in constructing low- and moderate-income housing through land-cost write-downs and construction loans through the Community Development Block Grant and other programs. However, to a great extent, the costs associated with producing and acquiring housing are beyond the direct control or influence of County government.

There may be significant capacity under existing General Plan and Zoning designations for housing, but cities and the County must rely on the housing market to create most new housing or spur

rehabilitation. Several non-governmental factors that can constrain housing development are discussed in the sections below.

2.07b The Regional Housing Market and National Economy

Following a decade of economic prosperity and sustained global growth, the COVID-19 pandemic triggered widespread economic uncertainty and consumer panic. While the national, state, and regional economies have mostly rebounded from the pandemic shock, the recovery is still resulting in sweeping economic fluctuations. After gradually returning to pre-pandemic levels by the end of 2020, the stock market slid during the first half of 2022 over fears of inflation, labor scarcity, global supply issues, political instability, and vulnerabilities to climate-induced disasters. Average long-term U.S. mortgage rates have risen due to inflation worries. As published by [Freddie Mac](#) on August 25, 2022, the 30-year rate rose to 5.55% from 2.87% the year prior and reached 7.08% by November 10, 2022.

Despite the pandemic upheaval, the San Francisco Bay Area continues to be one of the costliest housing markets in the state and the nation. According to [Zillow statistics](#), the average price of a single-family house in San José was \$1.45 million in June of 2022, up 18.5% from \$1.22 million in June 2021. Even though the high-income tech industry and limited availability of housing continues to drive up home and rental costs, the housing market has recently experienced a cooling due to the increase in borrowing interest rates.

Historically, highly profitable venture capital firms and software companies in Silicon Valley have created a prosperity that has driven prices higher in the most desirable housing areas. However, a disparity in wealth of white collar vs. blue collar workers exists in the

county. As the [National Low Income Housing Coalition](#) reports, software developers (with a median hourly wage of \$71.47) represent only a small fraction of employees in the largest occupations in Santa Clara County. Collectively, there are many more workers (janitors, farm laborers, retail salespersons, fast food staff, etc.) who make less than \$20 per hour. The resultant wage gaps between income and housing costs have pushed affordable housing out of reach for many renters and potential buyers. To afford a two-bedroom rental home in Santa Clara County, with a fair market monthly rent of \$2,418, the average worker would need to make at least \$46.50 an hour.

One of the County's hurdles to processing housing permits stems from a dwindling inventory of easily buildable lots, which is pushing residents to build on hillsides, prime farmland, and areas where a high groundwater level creates additional challenges for establishing onsite wastewater treatment systems. As climate change and drought have contributed to the increasingly common danger of wildfire, feasible lots in areas less threatened by fire are in increasingly short supply. Additionally, several areas of the county are impacted by flooding, with 50-year and 100-year storm levels occurring more often after drought periods and resulting in major flooding and destruction of residential neighborhoods and preservation land.

2.07c Home and Land Costs

In the Bay Area, the costs of housing have long been among the highest in the nation. The average home value across Santa Clara County was estimated at \$1,695,548²⁷ by the end of 2020, per data collected by the Santa Clara County Associated of Realtors. This average increased to \$1,995,986 by the end of 2021.²⁸

²⁷ Year End 2020: Santa Clara County": Single-Family Residence, accessed 9/12/22 <https://www.sccaor.com/pdf/stats/2020.pdf>

²⁸ Year End 2021: Santa Clara County: Single-Family Residence, accessed 9/12/22 <https://www.sccaor.com/pdf/stats/2021.pdf>

Aside from the prices of homes in Santa Clara County, the cost of land is a critical component of the overall price of housing, especially new construction. The price of unimproved land varies greatly within Unincorporated Santa Clara County, depending on location, existing infrastructure, and the existence of or difficulty in obtaining Building Site Approval or other entitlements necessary for development of the site. Urban unincorporated areas also vary greatly, and most are already developed with single-family homes. In terms of cost, areas of unincorporated East San José are very different from the unincorporated areas of Los Gatos, Los Altos, and Cupertino. According to LandWatch, an online rural real estate listing platform, in 2021 there were more than 22,700 acres of land for sale (farms, ranches, and other) in Santa Clara County, with an average cost of approximately \$4 million per transaction.²⁹

Rural area parcels vary greatly in price depending on whether building site approval has been obtained, the remoteness of the site, whether the property has a view, and the property’s proximity to desirable communities like Monte Sereno, Los Gatos, or Saratoga, among others.

2.07d Construction and Labor Costs

Construction and labor costs are also significant components of housing cost. These costs include site improvements (not land costs) necessary to prepare a site for development, as well as the actual costs of labor and materials for the dwelling. As part of the County Inclusionary Housing In-Lieu fee analysis, Keyser Marston Associates produced a [2020 report](#) on the costs of providing affordable units. The report concluded in part that the average cost of home sales has increased. Below is a table from the report showing the median and

²⁹ LandWatch, Santa Clara County Land Information, accessed 9/13/22 <https://www.landwatch.com/california-land-for-sale/santa-clara-county>

average cost of a new home based on the sale of homes the unincorporated Santa Clara County between the years of 2016-2019.³⁰

Table 2.27: Median and Average Characteristics of Home Sales in Unincorporated Santa Clara County

Year Sold	Beds	Baths	Size (SF)	Lot Size (Acres)	Sale Price	Price per SF
Median of Sales in						
2016	4	4	3,922	0.39	\$2,221,500	\$536
2017	4	4	3,751	0.40	\$2,300,000	\$654
2018/2019	5	5	4,158	0.75	\$2,562,500	\$709
Average of Sales in						
2016	5	5	4,415	1.25	\$2,854,000	\$658
2017	4	4	3,991	2.04	\$2,739,000	\$726
2018/2019	5	5	4,939	1.67	\$3,391,000	\$781

Source: CoreLogic, May 2019. Reflects homes built since 2000.

The median size home in urban areas over the last several years has slightly increased from 4,000 to almost 5,000 square feet, which means that a typical 4,500 square foot home in the unincorporated county could cost approximately \$3,150,000 to construct (\$700/sq.ft.). This does not include the cost of the underlying land.

Few multi-family units are built in unincorporated Santa Clara County, due to the lack of sewer and water services. According to analysis by the UC Berkeley Turner Center for Housing Innovation, the per-square-foot hard costs for constructing multifamily projects

³⁰ Inclusionary Housing and Supplemental Housing Mitigation Fee Ordinance prepared by Keyser Marston Associates (2020), [available here](#).

in California climbed 25 percent over the course of 2008-2018, reaching \$222 per square foot on average statewide. In the Bay Area, including Santa Clara County, the average cost in 2018 was \$380 per square foot, representing an increase of 119 percent from 2008.³¹

2.07e Availability of Financing

The COVID-19 pandemic has significantly altered the financial landscape for development and real estate within Santa Clara County. Since the start of the pandemic in early 2020 and the increasing prevalence of remote working in Silicon Valley, the general population has had an increase in demand for single-family residences in the county. The demand of single-family residences has led to a significant increase in home prices due to historically low mortgage interest rates, consistently decreasing until 2022. Construction costs have also seen a significant increase due to labor costs as well as high demand of lumber. The Federal Reserve has steadily raised interest rates to combat high inflation of 8.2% in mid-2022³² thereby slowly making it more expensive for developers and homebuyers to borrow.

The County's ability to mitigate for these effects is somewhat limited. However, in 2016 the voters of Santa Clara approved a \$950 Million Affordable Housing Bond with up to \$50 million set aside for homeownership programs. Launched in 2017, the County in partnership with Housing Trust Silicon Valley administers a \$25 Million [Empower Homebuyers SCC](#) program that offers down payment assistance to eligible first-time homebuyers.

2.07f Conclusion Regarding Non-Governmental Factors

Non-governmental factors in housing costs and production are ultimately the primary factors that determine price, availability, and affordability. In metropolitan areas that are largely built-out, redevelopment and infill development are a major source of new housing development opportunities. Urban land markets tend to place a premium on land the closer it is to central business districts, with good access, or in areas where higher densities are available.

Chapter 3: Fifth Cycle Performance Review and Sixth Cycle Housing Strategies and Policies

The purpose of this chapter is two-fold: to review the County’s performance in meeting the fifth cycle Housing Element goals and to introduce the County’s sixth cycle strategies and policies.

3.01 Review of County’s Fifth Cycle RHNA Assignment Performance

The County’s actual housing production during the fifth cycle, from 2015-2022, exceeded the RHNA assignment and projections for the planning period.

Table 3.1 summarizes the County’s fifth cycle RHNA targets, projected development, and actual production from 2015-2022. ABAG’s RHNA process for the fifth cycle allocated a housing need of 277 units to unincorporated Santa Clara County. A total of **3,214** units have been permitted as of December 31, 2022, over 1,000 percent above the assigned 277 units. Roughly eighty percent of the approved units were constructed in a series of high-density development projects on Stanford University campus in 2019. These units consisted of much-

needed moderate-income housing to meet the University’s faculty and graduate student housing demand.

During the fifth cycle, housing demand increased for the unincorporated county. The increase in housing permits can, in part, be attributed to the passing of new State legislation allowing Accessory Dwelling Units (ADUs) and Junior Accessory Dwelling Units (JADUs) in all areas zoned to allow single-family or multifamily uses, and other streamlining provisions. Following these laws coming into effect on January 1, 2020, there was a rise in ADU permit applications, and a related rise in permitting, to roughly three times the rate of applications preceding these laws.

Table 3.1: RHNA, Projections, and Achieved Housing Production

	Very Low	Low	Moderate	Above Moderate	Total
Fifth Cycle, 2015-2022					
RHNA Assignment	22	13	214	28	277
Projected	440	87	0	1555	2,082
Achieved	86	0	2,597	531	3,214
Sixth Cycle, 2023-2031					
RHNA Assignment	828	477	508	1,312	3,125
Projected	975	637	1,186	3,945	6,745

3.02 Recent Unincorporated County Housing Development Activity

The purpose of this section is to document how the County met its RHNA target for the 2015-2022 planning period, as measured by permits issued during that period for different dwelling types.

3.02a Single-Family Residential Units

All primary single-family dwelling development is assumed to have been constructed and/or sold at market rates and are assumed to be affordable only to those with above-moderate incomes. Many single-family residences built within unincorporated urban pockets are new units that are replacing units that already existed, however, the statistic provided for single family dwellings is a 'gross' figure, consistent with the reporting standard for HCD's Annual Housing Element Progress Report.

3.02b Graduate Student Housing Development at Stanford University

Stanford University currently provides graduate student housing for 75% of its graduate students, and most graduate students occupy their apartments year-round for multiple years while they obtain their degrees. Additionally, the University houses approximately 97% of its undergraduates on campus. Of the graduate students at Stanford, an estimated 93% do not have children, including 70% in single households and 23% in couple households. Approximately 7% of graduate students are estimated to have one or more children under the age of 18.

From January 2015 to December 2022, the County reported the construction of 2,597 moderate-income units on Stanford lands.

According to Stanford University Graduate Student Housing Affordability Analysis Report (prepared by Keyser Marston Associates in May 2022), rents for 85% of graduate student housing spaces are within a range affordable to households with low- or moderate-incomes. Monthly rents for apartments at Stanford range from \$1,473 to \$3,616 per month, depending on the number of bedrooms in the apartment and the size of the household sharing the apartment. Using this analysis and the determination of affordability categories in the [HCD Official State Income Limits for 2022](#), the 493 studios for graduate students built since January 2015 would be affordable to low-income households. The remaining 892 two-bedroom apartments would be affordable to moderate-income households.

3.02c ADU Development

During the 2015-2022 planning period, 276 accessory dwelling units (ADUs) were permitted in unincorporated county, an average of 34.5 per year. In 2019, the State legislature passed multiple new laws streamlining the construction of ADUs and Junior ADUs (JADUs). These laws went into effect on January 1, 2020, and the County accordingly modified its Zoning Ordinance to reflect the updated State laws, effective March 10, 2020. These amendments resulted in a significant rise in ADU and JADU permit applications. From 2015 through 2019, the County approved roughly 21 ADU permits per year on average. In the three years since the ADU regulations were changed, 2020 through 2022, the County has approved increasingly more ADU permits each year: 40, 54, and 79, respectively. Looking forward, the County anticipates that the level of ADU permit applications will fluctuate over time and the best rate to project through the 2023-2031 planning period is the average taken from 2018 through 2022, approximately 45 permits per year, yielding a projected 360 units in total during the sixth cycle planning period.

Table 3.2: Accessory Dwelling Permit issued 2015-2021

YEAR	ADU PERMITS ISSUED
2015	20
2016	13
2017	16
2018	22
2019	32
2020	40
2021	54
2022	82
8-year average	34.875
2018-2022 average	46

3.02d Agricultural Employee Housing Development

From 2015-2021, there were no agricultural employee housing permits issued in unincorporated county. In December 2020, the County significantly updated its Zoning Ordinance provisions for agricultural employee housing to streamline the planning approval and expand options for such housing. Since the adoption of these changes, three permits have been issued for new single-family units of small-scale permanent agricultural employee housing.

Although not consisting of dwelling units for the purposes of reporting on RHNA progress in Annual Progress Reports, the County approved a 200-bed project for agricultural employees during the planning period,

with building permits finalized in 2021. In addition, on August 29, 2023, the Board of Supervisors directed the preparation of an Agricultural Worker Housing Workplan to facilitate and further support agricultural worker housing production.

3.03 Review of County’s Investment in Countywide Housing Efforts During Fifth Cycle and Beyond

In December 2014 the Board of Supervisors affirmed the County’s role in promoting affordable housing, especially for vulnerable populations, and therefore the County must take an active role in developing, financing, and supporting various types of affordable housing for the populations the County serves. The Board further established that the County’s priorities were to:

- Increase the supply of housing that is affordable to extremely low-income (ELI) households;
- Increase the scope and breadth of supportive housing for special needs populations, including homeless and chronically homeless people; and,
- Improve coordination and collaboration among the County, the cities, other governmental agencies, and the affordable housing community.

Since 2015 the Board of Supervisors has approved approximately \$1 billion in funds to support 66 housing development projects in 10 cities, yielding 6,231 multifamily residential units.

Concurrently, in an effort to accelerate the pace of development, the County has made available County owned properties for the

production of affordable and supportive housing and worked with other governmental agencies to identify underutilized parcels that could be made available for housing. The County of Santa Clara has a variety of County-controlled and County-owned properties, some of which are suitable for residential development. Many of the County-controlled and County-owned properties suitable for residential are located within cities and the County's development of these properties to provide housing units does not count towards the County's RHNA assignment. Nevertheless, the County has invested in numerous projects that create affordable housing in incorporated cities as a part of its longstanding commitment to providing all county residents with appropriate housing options. The County has established a process to give community stakeholders and other jurisdictions an opportunity to work in partnership with the County to develop County-controlled and -owned sites for affordable housing. The benefit of this collaborative approach includes a more streamlined entitlement process and the opportunity to leverage local funding available for housing production.

In 2019, the County Office of Supportive Housing (OSH) created a pool of prequalified affordable housing developers who could respond to solicitations to develop affordable housing on County-owned land. This Developer Qualified Pool (DQP) consists of 16 experienced developers that are aligned with the County's goals of increasing affordable

housing for Santa Clara County's most vulnerable and poorest residents. As County-controlled properties become available, the

County issues a Request for Offers to accept development proposals from the DQP. The following five projects have been approved for development on County-owned sites, within city jurisdictional boundaries, utilizing the pool of selected developers:

231 Grant Avenue - Palo Alto

OSH is partnering with Mercy Housing and Abode Communities to develop 110 affordable rental workforce apartments for teachers, school employees, and their families. The project is being developed with

a donation by Meta (formerly Facebook) and in partnership with the City of Palo Alto and five local school and community college districts. In January 2022, the Board of Supervisors approved the project and construction started in August 2023. Please visit the [231 Grant | Mercy Housing California & Abode Communities](#) project website for more information.

Mitchell Park - Palo Alto

Located at 525 East Charleston Road, this project is a partnership with Eden Housing to develop 50 affordable rental apartments and 2,750 square feet (sq. ft.) of service space for AbilityPath – a nonprofit that provides support services to individuals with special needs and developmental disabilities in the greater Bay Area. This development includes 25 apartments and services for individuals with intellectual and/or developmental disabilities and their families. Land use entitlements were approved by the Palo Alto City Council on March 8,

2022, and on July 25, 2023 Eden Housing received an allocation of tax credits. Construction is expected to begin January 2024. Please visit the [Eden Housing project website](#) for more information.

The Hub - San José

Located at 1510-1540 Parkmoor Avenue, this project is a partnership with Allied Housing to develop affordable rental apartments, including units for transitioned age foster youth, and The Hub, a youth-led community center dedicated to supporting current and former foster youth. Allied Housing has secured all necessary entitlements and financing. Construction is scheduled to begin November 2023. Please visit the [Abode Services](#) project website and [The Hub Youth Center](#) website for more information.

Distel Circle - Los Altos

Located at 330 Distel Circle, this project is a partnership between OSH, the City of Los Altos, and EAH Housing to develop affordable rental apartments. The development includes 90 housing units. Land use entitlements were approved by Los Altos in September 2022. The developer is in the process of submitting tax credit application for funding. Please visit the [EAH Housing project website](#) for more information.

EAST SANTA CLARA MASTER PLAN SITE

SCCHA PROPERTY:	5 acres
COUNTY PROPERTY:	7 acres
TOTAL:	12 acres

East Santa Clara – San José

Located at 725 East Santa Clara Street, this project is a partnership between OSH and Eden Housing and The Core Companies to develop affordable housing in accordance with the East Santa Clara Master Plan. Please visit the [County project website](#) for more information on the East Santa Clara Master Plan. **Additional Sites to be Developed During Sixth Cycle**

In addition to these sites, the County has identified three additional sites within incorporated areas that together could yield the production of a minimum of 617 units of affordable, workforce and supportive housing during the 6th Cycle Housing Element.

Retaining Ownership of Property in Housing Development Projects

The County Board of Supervisors has directed County Administration to, when possible and feasible, negotiate and incorporate County ownership of property into multifamily affordable housing transactions. Towards that directive, the County maintains ownership of property for the purposes of affordable and supportive housing by: 1) Negotiating property acquisitions as part of developer-led housing development projects, and 2) County-led efforts to increase the production of housing through proactive acquisitions of private properties or by using existing underutilized County-owned properties. In both cases, the County enters a long-term ground lease with the developer and all obligations to maintain and operate the site are the responsibility of the developer.

At present, using a combination of funds from the County's 2016 "Measure A" Affordable Housing Bond, the State program *No Place Like Home*, and the County General Fund, the County has invested in, and OSH is managing, the following 68 projects:

- 22 developments funded by the 2016 Measure A Housing Bond, wherein the land is owned by the County and the housing development is managed/operated by a housing developer;
- 11 properties for which the County has approved Housing Bond funds and the Administration has negotiated an option to acquire;
- 15 properties for which the County has approved Housing Bond funds but the properties are not directly controlled by the County;
- 21 properties acquired by the County and funded by the Housing Bond, where the County is either already working with a development partner or will be issuing a request for offer to select a development partner; and
- 34 County-owned properties not funded by the Housing Bond, which are currently used for supportive housing and/or are under consideration to be used as supportive housing.

Additionally, the County distributes federal funding through a variety of housing programs (see Chapter 4 for a summary of the housing programs the County offers). The County's many housing programs affirmatively further fair housing and support the provision of housing, particularly affordable housing, across the entirety of Santa Clara County and not only those unincorporated areas within County's planning jurisdiction. The County will be continuing the above approach to housing investments and policies in the sixth cycle, serving the entirety of Santa Clara County and not only unincorporated areas.

3.04 2015 Housing Element Update Program Outcomes

Housing Element law requires an analysis and evaluation of programs implemented during the prior planning period as part of the 2023-2031 update process. A description of program outcomes from 2015-2023 for the programs identified during the previous housing cycle is

captured in Appendix K and references the housing program numbers for the 2015-2023 cycle. Most of the programs listed in the 2015 Update were successful in meeting their objectives, and in general the County was highly engaged and productive in creating housing opportunities countywide, including by developing County-owned lands, funding development of affordable housing in the incorporated cities, and offering robust housing-related services to county residents. As County agencies evolve, many of the programs have been closed out and/or consolidated into new programs.

3.05 Sixth Cycle Housing-Related Strategies and Policies

This section lists the strategies and policies of the County's General Plan related to housing, including new strategies that are being added for the sixth cycle. This section is an update and continuation of the County's 2015 Update. In addition, this section lists the implementation programs relevant to each strategy and policy, with more detailed program descriptions provided in Chapter 4.

The Housing Element Update is a part of and is required to be consistent with the County's General Plan, including the countywide growth management policies, health and transportation elements, and relevant portions of other elements. However, with a RHNA assignment that has increased by 1,028 percent from the previous cycle, the County will need to make a few significant changes to the County's General Plan policies, namely, to enable the County to plan for development within urban unincorporated islands inside of an adjacent city's USA. Nevertheless, this 2023 Housing Element Update will ensure that the General Plan goals, strategies, and policies related to the promotion of compact, urban development and preservation of open

space and prime farmland will continue to be promoted in a purposeful manner.

The strategies and policies of the 2015 Update have been reviewed in accordance with current State requirements as part of the 2023 Update. There are modest changes to the 2015 Update policies and strategies, and the addition of a significant set of new policies and a new strategy addressing the impacts of climate change on housing in the county. Furthermore, the 2023 Update adds new policies to address the Federal program of Affirmatively Furthering Fair Housing (AFFH) in accordance with new State law requirements.

The policies delineated below are organized according to overall strategies or topics that provide a broad policy direction.

3.05a Strategies

Over the last two Housing Element cycles, the County has focused on increasing the housing supply countywide in the urban areas as well as on the Stanford University campus. Market-rate housing development has largely been led by individual cities, through development within urban unincorporated county islands that are annexed into adjacent cities. Concurrently, through the direction of the Board of Supervisors and implemented by OSH, the County has focused its efforts on assisting with the development of primarily extremely low-income and low-income units. The provision of adequate housing for a growing and diverse population requires a complex, comprehensive approach beyond development alone. To successfully address current and projected housing needs, the location, the type, and the price of new housing are all key factors. Accordingly, the primary objective of the strategies and policies of the County's Housing Element is to achieve and maintain a balanced housing supply countywide while affirmatively furthering fair housing and remedying past harms. A balanced housing supply is defined here as one that is affordable and accessible to all

residents, adequate to meet the overall demand, and appropriately distributed across the county. A balanced housing supply depends upon maintenance, preservation, improvement, and development of housing.

The below strategies will guide the County as it progresses toward achieving balance in its housing supply. They ensure increased housing opportunities for households at all economic levels and do so while balancing other economic, social, and environmental objectives that enjoy broad popular support in Santa Clara County. In doing so, the strategies and the policies that seek to balance the practical and constitutional limits on local governments while taking into account the genuine and universal need of all our residents for just and affordable housing.

To ensure that these strategies meet the needs of the community, substantial outreach was conducted (see Chapter 1, Section 1.08). The outreach led to the creation of new strategies and policies to address concerns raised by local housing advocates and the community at large. Existing policies were modified, where appropriate. The categorization of policies under strategies, and in some cases, the creation of a policy cluster headed by a new strategy, was guided by the results of the outreach.

Brief descriptions of the County's ten strategies are below, followed by detailed tables linking each strategy—explained in further detail—to policies and implementing programs.

Strategy No. 1: Plan for a Balanced, Countywide Housing Supply
Support every Santa Clara County jurisdiction in developing diverse housing types within existing and new communities to meet the needs of all households, affordable housing production goals, State Housing Element requirements, and regional land use and transportation planning objectives.

Strategy No. 2: Promote Cooperation and Collaboration on Residential Development

Explore every feasible opportunity to assist developers in building more affordable housing projects. By working with neighborhood residents, community organizations, and the private sector to promote a diverse housing supply, the County can capitalize on all the ideas, expertise, and untapped resources within the county.

Strategy No. 3: Provide Financial Assistance for Extremely Low-Income Housing

Housing in the county, and in the Bay Area in general, is expensive to build and these costs have been increasing over the last decade. To ensure that the housing needs of all residents are met—and with a focus on extremely low-income housing—the County will continue to work with developers and use “Measure A” Housing Bond funds to make housing projects financially feasible.

Strategy No. 4: Remove Unnecessary Barriers to Housing

Utilize expedited project review, adaptable development standards, funds for affordable housing programs, additional density bonuses, and other measures to reduce housing development costs.

Strategy No. 5: Ensure Support for Fair Housing Law and Practices

Discriminatory housing practices are still a challenge for low-income, disabled, and racial/ethnic minority households. This discrimination further restricts access to permanent housing and temporary housing. This strategy focuses on furthering fair housing efforts and educating residents on tenant and landlord rights and responsibilities.

Strategy No. 6: Provide for Special Needs Households

To create a balanced housing supply, the County must include housing suitable for to meet the needs of households with special needs. This includes housing for people of all ages who have physical or

intellectual challenges, or those with extremely low or no income. The policies pertaining to housing for special needs households encourage a closer partnership between developers and the County and cities to ensure that new housing is built to accommodate different type of households.

Strategy No. 7: Address Homelessness Consistent with Housing First Principles

The County and cities are experiencing a crisis of homelessness, and there is a need to prioritize and increase programs and efforts to provide immediate shelter and assistance in attaining permanent housing. Homeless shelters shall continue to be supported by service providers with the full range of assistance needed by the homeless. Temporary emergency shelters shall be used only as part of a continuum of care that leads to permanent housing.

Strategy No. 8: Maintain and Expand the Supply of Farm Worker Housing

The State considers housing for farm workers to be one form of special needs housing. Farm worker housing is vital to a viable agricultural economy and healthy communities in the county. This strategy focuses on addressing farm worker housing needs, particularly for year-round farm workers and their families.

Strategy No. 9: Conserve and Rehabilitate the Existing Housing Stock

Preserving and rehabilitating existing homes is an effective way to sustain the supply of affordable housing. The policies in this strategy encourage replacement of older, affordable housing lost through redevelopment or conversion to market rate housing. The policies also promote timely neighborhood improvements to prevent decay. The reuse and repurpose of underutilized buildings should be encouraged with adequate improvements to meet building and safety codes.

Strategy No. 10: Plan for Climate Change Impacts on Existing and Future Housing Stock

Santa Clara County is already experiencing the effects of the climate crisis. The County needs to ensure that existing and future housing stock is resilient to the impacts of climate change and extreme weather events. Policies under this strategy promote greater energy efficiency and resiliency in new and existing housing stock.

These strategies are designed not only to implement policies and programs that will effectively address countywide housing needs, but also to promote the other land use and development objectives expressed elsewhere in the General Plan, thereby supporting the housing-related goals in the Vision Statement of the General Plan and indirectly supporting other community goals. The strategies also span the entire County, though individual implementation measures may apply to only the unincorporated areas, to the County as a governmental entity, or countywide.

3.05b Completed Policies & Programs

The strategies and policies of the 2015 Update have been reviewed in accordance with the State requirements as part of the 2023 Housing Element Update. Changes to the 2015 Update primarily focuses on consolidating and updating policies and programs to reflect the County’s current organizational structure and its focus on ending and preventing homelessness in Santa Clara County. The main changes include removing programs where funding sources for affordable housing production have been consolidated into a single over-the-counter Notice of Funding Availability, organizing the County’s homelessness policies to be more consistent with the [2020-2025 Community Plan to End Homelessness](#), and introducing new policies and programs that address the County’s commitment to affirmatively further fair housing. Appendix K provides an assessment of the status, progress, and accomplishments of each of the policies and programs in

the 2015-2022 Housing Element. Notable accomplishments during fifth Housing Element cycle include:

- The voter-approved \$950 million 2016 “Measure A” Affordable Housing Bond, which is projected to fund 120 new affordable housing developments over ten years, including 4,800 new units dedicated to extremely low-income and very low-income households. As of November 1, 2022, the Board of Supervisors has approved 47 developments that will yield over 4,000 affordable and supportive housing.
- Streamlined housing development funds into one over-the-counter Notice of Funding Availability, which allowed the County to fund over 50 new development projects across ten of the fifteen incorporated cities in the county.
- Merged the County’s Office of Affordable Housing and Office of Homelessness Concerns to form the Office of Supportive Housing, which positioned the County to rapidly scale the production of supportive housing, adding more than 2,700 units and housed over 21,000 people since 2015.

3.05c Ongoing and New Policies and Implementation Measures by Strategy

In this section, each Strategy is discussed in turn, and the associated Policies and Implementation Measures are listed. Housing Policies are identified by an indicator of “HG” followed by the associated Strategy number and then the policy number. Policies with subparts are indicated with a hyphenated suffix—for example, HG1-1 is a subpart of Housing Policy HG1. Implementation Measures are labeled by the associated Strategy number, followed by an “(i)” and a letter—for example, HG1(i) A. Programs associated with each Implementation Measure are listed beneath each Measure. The full program descriptions are provided in Chapter 4.

Strategy No. 1: Plan for a Balanced Countywide Housing Supply

A balanced housing supply is one that is adequate to meet housing needs and is affordable and accessible to all residents. "Balanced" refers not only to a sufficient amount of housing at various income levels, but also refers to a variety of housing types appropriate for a range of needs, and a variety of locations that complement transit opportunities and concentrations in employment. "Balance" goes beyond mere parity between the quantity of housing and the number of jobs. The housing stock must reflect household income and lifestyle profiles. The existing housing crisis in the State and in the Bay Area underscores the urgent need to provide a balanced housing supply in the county, ensuring that new housing projects fill in the gaps in the housing market, as well as encouraging the creation of diverse, walkable neighborhoods where there is a mix of population, ages, and incomes. The County will support the production of housing of diverse size and type that is affordable to extremely low-income, very low-income, low-income, moderate-income, and special needs populations.

The County is obligated by State housing law to support equity and ensure that it plans for, to the extent feasible, housing opportunities in the unincorporated area that are affordable to moderate-, low-, very low-, and extremely low-income households. For a variety of reasons, the majority of those opportunities will continue to be more commonly found in the urban unincorporated areas inside city USAs. The County's General Plan goal is to have all unincorporated areas within USAs annexed by the respective cities to ensure all urban areas are managed by cities, and therefore the cities are authorized to plan the future growth of these USAs. However, given the new housing allocation methodology utilized by ABAG – allocating units partly based on existing population within jurisdictions – the County will update its General Plan to allow the County to plan for housing in these urbanized islands when cities do not have a plan for annexation. The policies under this strategy are set forth below.

Policies		Implementation Measures
HG1-1	Planning for the supply and diversity of housing types in urbanized areas of the County shall include consideration of both current and projected employment, household income needs, and a variety of housing types.	<p>HG1(i) A</p> <p>Maintain and, where necessary, strengthen County and cities' joint land use policies and agreements that direct urban development to areas within city urban service areas.</p> <p><i>Program 2.10: Joint Urban Development Policies</i></p> <p><i>Program 4.03: Coordinated Annexation and RHNA Transfer</i></p>
HG1-2	Housing at urban densities shall generally be built within the cities and their urban service areas, not in rural areas.	<p>HG1(i) B</p> <p>Encourage public support of city efforts to create a balanced housing supply, which includes housing affordable to special needs, farmworkers, and extremely low-income households.</p> <p><i>Program 1.01: Supportive Housing Development Fund Notice of Funding Availability (SHDF NOFA)</i></p>
HG1-3	Focus the County's limited housing production resources on special needs populations, farmworkers, and extremely low-income households.	

HG1-4	Encourage homeownership opportunities for lower-income households.	<p><i>Program 2.27: Replacement Housing Policy</i></p> <p>HG1(i) C</p> <p>Continue to implement new homeownership programs that provide an opportunity for lower-income households that would otherwise struggle to afford a home, furthering the equity and sustainability of homeownership.</p>
HG1-5	Prioritize suitable County-owned, underutilized parcels within cities and Urban Service Areas for affordable, supportive, and workforce housing development.	<p><i>Program 1.01: Supportive Housing Development Fund Notice of Funding Availability (SHDF NOFA)</i></p>
HG1-6	Ensure housing development projects within unincorporated Urban Service Areas contain an equitable mix of housing typology and housing options for different household income levels.	<p><i>Program 1.02: Limited Equity Housing Cooperative Projects (LEHCs)</i></p> <p><i>Program 1.03: Homeownership Projects</i></p>
HG1-7	Work with local transit authorities to locate housing within one-quarter mile walking distance to a transit station or stop to provide connectivity to services (such as schools, grocery stores, parks, etc.), and to prioritize constructing multi-modal transportation networks (sidewalks, bicycle lanes, trails, etc.), and other amenities within existing unincorporated neighborhoods.	<p><i>Program 1.04: Empower Homebuyers SCC</i></p> <p><i>Program 1.05: Mortgage Credit Certificate Program (MCC)</i></p> <p><i>Program 1.06: Below Market Partnership Program</i></p> <p><i>Program 1.32: Community Development Corporation Grant Program</i></p>
HG1-8	Until a city annexes the unincorporated islands within its USA, the County will plan for housing development in these areas, as necessary to address Housing Element law during a planning cycle and Regional Housing Needs Allocations (RHNA).	<p>HG1(i) D</p> <p>Continue consideration of County owned lands suitable for the construction of extremely low-income housing and prioritize the development of County-owned sites suitable for housing development and when possible adjacent to transit.</p> <p><i>Program 1.07: County-Led Housing Development</i></p> <p><i>Program 1.17: Permanent Supportive Housing for Persons with a Serious Mental Illness</i></p> <p><i>Program 2.01: Housing Suitability and Prioritization Tool for County-Owned Properties</i></p> <p><i>Program 2.07: Housing Adjacent to Transit</i></p> <p><i>Program 2.26: Mid-Cycle Review</i></p> <p><i>Program 3.01: SCC Mental Health Department Evans Lane Wellness and Recovery Center</i></p> <p>HG1(i) E</p> <p>Amend General Plan and Zoning Ordinance to Plan for Housing in Unincorporated USAs and Stanford University Lands.</p> <p><i>Program 2.02: Planning for Housing Development in Unincorporated USAs and Stanford University Lands</i></p>

		<p><i>Program 2.18: Facilitate State Permit Streamlining Laws</i></p> <p><i>Program 2.19: Streamline Multi-Family Housing Development</i></p> <p><i>Program 2.22: Objective Standards for Multi-Family Housing</i></p> <p><i>Program 2.25: Incentivize Lot Consolidation</i></p>
HG1-9	Ensure that place-based neighborhood improvements to infrastructure and services are focused on the areas which have been historically underserved.	<p>HG1(i) F</p> <p>Coordinate improvements and services with other County agencies and Departments.</p> <p><i>Program 2.29: Place-Based Planning and Neighborhood Improvements</i></p>
HG1-10	Promote access to racially concentrated areas of affluence to a wide range of residents.	<p>HG1(i) G</p> <p>Seek opportunities for the County to work with institutional landowners to develop housing affordable to a wide range of income levels and backgrounds.</p> <p><i>Program 2.30 – Explore Housing Opportunities in the RCAA</i></p>

Strategy No. 2: Promote Cooperation and Collaboration on Housing Development

There are numerous housing agencies and advocacy groups within the county with opportunities to cooperate and collaborate to address housing issues, thus saving time and money, and expediting the introduction of innovative ideas and best practices throughout the housing community. The County and cities are well-positioned to work jointly to promote interjurisdictional and public/private efforts to expand the housing supply, and within County Departments, there are several agencies that either rely upon or provide housing services. For example, the County's Office of Supportive Housing (OSH) has a mission to increase the supply of housing and supportive housing that is affordable and available to extremely low-income and/or special needs households. Additionally, the County administers the Community Development Block Grant (CDBG) and Home Investment Partnerships Program (HOME Program). The County CDBG program is administered for the cities of Campbell, Los Altos, Los Altos Hills, Los Gatos, Monte Sereno, Morgan Hill, and Saratoga, while it manages the HOME program for the cities of Cupertino, Gilroy, and Palo Alto.

There are many instances of collaboration between County and city governments to attain balance in the county's housing supply. The primary existing mechanism is the set of 40-year-old joint growth management policies of LAFCO, the cities, and the County that focus urban growth inside cities' Urban Service Areas (USAs). These growth management policies are designed to place most of the County's housing growth in the cities of the County, and results in most of the high density and affordable housing being created primarily in the cities. In November of 2016, Santa Clara County voters approved Measure A – the \$950 million affordable housing bond (Housing Bond). The Housing Bond provides the County with an unprecedented opportunity to partner with cities, residents, and the affordable and supportive housing community to significantly address the housing needs of the community's poorest and most vulnerable residents. The County, through the Office of Supportive Housing, has accelerated the production of affordable, supportive, and workforce housing throughout the County in partnerships with cities and other governmental entities through its implementation of the Housing Bond.

Policies

Implementation

HG2-1	The County and the cities should work cooperatively to ensure that there is a balanced housing supply sufficient to achieve countywide economic, social, and environmental objectives. Further opportunities for inter-agency, intergovernmental, interregional, and public/private cooperation should be sought out and encouraged.	<p>HG2(i) A</p> <p>Maintain intergovernmental agreements to address countywide housing objectives and to ensure an adequate supply of affordable housing countywide.</p> <p><i>Program 1.08: Joint Development Memoranda of Understanding (MOU)</i></p>
HG2-2	Intergovernmental and public and private cooperation shall be encouraged to achieve an adequate supply of affordable housing that meets changing demographic needs in Santa Clara County.	<p><i>Program 1.09: Housing Trust of Silicon Valley</i></p> <p><i>Program 1.10: Santa Clara County CDBG and Housing Coordinators' Convening</i></p> <p><i>Program 1.16: Collaborate with the Santa Clara County Housing Authority (SCCHA)</i></p>
HG2-3	Housing resources should be combined, and their use coordinated, among County Departments.	<p>HG2(i) B</p> <p>Establish and expand intergovernmental processes to more effectively define and achieve local and regional housing objectives.</p> <p><i>Program 1.10: Santa Clara County CDBG and Housing Coordinators' Convening</i></p> <p><i>Program 2.08: Santa Clara County Association of Planning Officials</i></p> <p><i>Program 2.24: Apply for Prohousing Designation</i></p> <p>HG2(i) C</p> <p>Continue to support cross-agency integration of housing services within the County Departments through internal agency agreements.</p> <p><i>Program 1.11: Internal County Coordination of Housing Funds and Services</i></p> <p><i>Program 2.08: Santa Clara County Association of Planning Officials</i></p> <p><i>Program 2.24: Apply for Prohousing Designation</i></p>

Strategy No. 3: Provide Financial Assistance for Extremely Low-Income Housing

Extremely low-income (ELI) households are those households with an income less than 30% of the area median income (AMI). In a high-cost and low-vacancy housing market, such as Santa Clara County, financial assistance to home builders, buyers, and renters is necessary to ensure that housing affordable to ELI and special needs households is built. However, public funds for this purpose are limited. Therefore, publicly funded housing programs should give priority to housing for ELI households. The goal of any public housing assistance program should be to ensure the availability of housing that is suitable and affordable to those not provided for by the current market.

By ensuring that a sufficient amount of new housing will be affordable to ELI households, the policies in this Strategy will also help to achieve the vision of the General Plan for social diversity and economic growth. Effective partnerships between home builders and local government will ensure that affordable housing is built in ways which also support the full range of land use objectives supported by Santa Clara County residents.

Policies		Implementation
HG3-1	Local funds for housing shall be targeted to households earning less than 30% of the County median income and special needs populations.	<p>HG3(i) A</p> <p>Participate in intergovernmental efforts to secure Federal and State legislation, which will ensure adequate funding for, and tax and other incentives for, the construction and preservation of extremely low-, very low-, low- and moderate-income ownership and rental housing.</p> <p><i>Program 1.12: Coordinate with Bay Area Housing Finance Authority</i></p> <p><i>Program 1.13: Supportive Housing and Innovation Fund</i></p> <p><i>Program 1.16: Collaborate with the Santa Clara County Housing Authority (SCCHA)</i></p> <p>HG3(i) B</p> <p>Continue to use suitably located surplus publicly owned lands for housing affordable to extremely low-, very low-, and low-income households through the sale or lease of such land to a government entity, or to nonprofit or private home builders with appropriate terms and conditions guaranteeing long term affordability.</p> <p><i>Program 1.16: Collaborate with the Santa Clara County Housing Authority (SCCHA)</i></p> <p><i>Program 2.01: Housing Suitability and Prioritization Tool for County-Owned Properties</i></p> <p><i>Program 1.07: County-Led Housing Development</i></p>
HG3-2	The provision of permanent supportive housing for extremely low-income households shall be given high priority in housing assistance programs.	

Strategy No. 4: Remove Unnecessary Barriers to Housing

Another important means by which County and city governments can cooperatively encourage affordable housing is to work with developers to reduce the costs of development. Lengthy project review times and important, but increasingly complex, development requirements (such as green building requirements), are costly for developers, who then pass additional costs to the future occupant.

State housing law requires each jurisdiction, as part of their Housing Element Update process, to review their development standards and review procedures for opportunities to remove unnecessary constraints. Over the last Housing Element cycle, the County has taken several steps to allow for more housing opportunities, as well as improving the permit review and approval process, primarily investing in new technological systems that improve the permitting and recordkeeping process. As part of the County’s commitment to keep improving the permit process, there is a continuous review of processes to seek improvements and revisions to ordinances to facilitate the building of housing.

With new State laws in response to the housing crisis that allow for the development of Accessory Dwelling Units (ADUs), Junior Accessory Dwelling Units (JADUs) and second primary units (Senate Bill 9 or SB9 units – referred to as Urban Primary Units in the County ordinances) in areas zoned for single-family development, it is imperative that the County continue to streamline the regulatory and permit review process for these types of development.

To reaffirm this intent, the County continually reviews development trends, policy interpretation implications, and new State laws. If necessary, the County’s policies and standards are revised to ensure that housing and development objectives are met and are aligned with State objectives.

Policies		Implementation
HG4-1	The County should continually review its land use and development procedures for opportunities to remove unnecessary constraints to, and provide new opportunities to fund, the construction of affordable housing.	<p>HG4(i) A</p> <p>Identify and utilize a forum for sharing of best practices for removing governmental and nongovernmental constraints to housing development.</p> <p><i>Program 1.10: Santa Clara County CDBG and Housing Coordinators’ Convening</i></p> <p><i>Program 2.08: Santa Clara County Association of Planning Officials</i></p> <p><i>Program 2.26: Mid-Cycle Review</i></p>
HG4-2	Review and reduce, where appropriate, regulations and processing procedures regarding the development of ADUs, JADUs, and SB9 Units.	<p>HG4(i) B</p> <p>Implement Inclusionary Housing Fee Program for affordable housing project types.</p> <p><i>Program 2.03: In Lieu Fee Program for State Density Bonus and Affordable Housing</i></p>
HG4-3	Update parking standards to allow more flexibility for a variety of housing types.	<p>HG4(i) C</p> <p>Monitor and modify development standards as needed, including the trends of ADU, JADU, and SB 9 development, to ensure development standards are objective, up to date with current State law, reported to the State Department of Housing and Community Development annually, and remove barriers to housing development.</p> <p><i>Program 2.06: Streamline ADU Processing</i></p> <p><i>Program 2.09: Digital Tracking System for ADU, JADU, & SB9 Units.</i></p> <p><i>Program 2.18: Facilitate State Permit Streamlining Laws</i></p>

Program 2.19: Streamline Multi-Family Housing Development

Program 2.20: Tracking and Ongoing Compliance with State Housing

Program 2.22: Objective Standards for Multi-Family Housing

Program 2.30 – Explore Housing Opportunities in the RCAA

HG4(i) D

Create opportunities for adaptive reuse of non-residential buildings where single-family residential uses are allowed in the County Zoning Ordinance. The County will remove barriers related to development standards, such as providing exceptions to setbacks, building heights, and parking requirements, when a non-residential building is converted to a single-family residence.

Program 2.11: Update the Zoning Ordinance for Re-use of Non-Residential Buildings to Residential.

Program 2.19: Streamline Multi-Family Housing Development

Program 2.25: Incentivize Lot Consolidation

Program 2.26: Mid-Cycle Review

HG4(i) E

Ensure access for all by reviewing application requirements and design requirements, globally and/or through an accommodation process.

Program 2.28: Reasonable Accommodation Policy

Strategy No. 5: Ensure Support for Fair Housing Law and Practices

Illegal housing discrimination limits access to an already inadequate supply of affordable housing, which further exacerbates the imbalance between available housing and household needs, particularly for those of modest means. Discriminatory acts can be so subtle that many victims cannot readily detect them.

Ensuring equal access to housing for all residents is a responsibility of government. The County’s goal is to promote equal housing opportunities and to eliminate discriminatory housing practices. Despite the escalating costs of enforcement, County anti-discrimination programs have been effective. By ensuring equal access to housing, the County will achieve its housing goals and the objective of social equity and harmonious diversity expressed in the vision of the County General Plan.

Fair housing challenges often occur within an existing landlord / tenant relationship. Such challenges include unanticipated rent increases, changes in the terms of occupancy, evictions, lack of information regarding recourse for tenants, maintenance and condition of the leased property, late rental payments, and occupant behavior. Introducing financial assistance to rehabilitate properties and/or counseling services to address issues such as rent increases can help to resolve such tenant and landlord disagreements.

The County provides funding to several non-profit organizations that assist tenants and landlords. Funding is limited and these organizations are often understaffed. Consistent and adequate funding would increase the likelihood of both eliminating discrimination and improving tenant/landlord relations. In addition to aiding improvements in tenant and landlord relations. The efforts to resolve tenant/landlord problems should be continued and, where necessary, reinforced.

In 2018, the State passed Assembly Bill (AB) 686 as the Statewide framework to Affirmatively Furthering Fair Housing (AFFH). AB 686 requires that a local jurisdiction promote inclusive communities, further housing choice, and address racial and economic disparities through government programs, policies, and operations. This law is an important tool to address systemic racism in housing and achieve positive impacts for all. AB 686 applies to all public agencies in all activities related to housing and community development. In response to the new law, the County has added new polices and implementation programs to meet AB 686 under this strategy.

Racially and ethnically concentrated areas of poverty (R/ECAPs) have become a policy focus for the federal Department of Housing and Urban Development (HUD). R/ECAPs are neighborhoods where residents are largely people of color and have lower incomes. State statute requires the Housing Element’s Assessment of Fair Housing to analyze R/ECAPs as well as racially concentrated areas of affluence (RCAAs). In contrast to R/ECAPs, RCAAs are neighborhoods where the population is disproportionately white and affluent.

“Burdened Households” are those with burdened with a rent cost that is 30 percent or more of their monthly income.

The policies and implementation programs set forth below continue existing policies and include new policies that work towards AFFH goals and serve county residents in all R/ECAPs countywide (i.e., not just in unincorporated areas).

Policies		Implementation
HG5-1	The County shall continue its work to enforce laws and foster policies and programs aimed towards preventing discrimination against people of protected status under Federal and State law.	<p>HG5(i) A</p> <p>Facilitate access to Federal and State home rehabilitation loans or grants to qualifying persons of extremely low-income.</p> <p><i>Program 1.04: Empower Homebuyer SCC</i></p>
HG5-2	Fair housing services shall be available in all parts of the County.	<p>HG5(i) B</p> <p>Fair housing services shall continue to offer standardized protection and outreach services throughout the County.</p>

HG5-3	The rights of tenants and landlords shall be recognized and protected, and opportunities for mediation of disputes shall be provided.	<p><i>Program 1.14: Fair Housing Assistance Program</i></p> <p><i>Program 1.15: Fair Housing Audit & Education Program</i></p> <p>HG5(i) C</p> <p>Fair housing services provided shall be respectful of language, culture, and special needs.</p> <p><i>Program 1.20: San Andreas Regional Center</i></p>
HG5-4	Reduce displacement of low-income household tenants and increase tenant protections prior to eviction proceedings.	<p><i>Program 1.14: Fair Housing Assistance Program</i></p> <p><i>Program 3.01: SCC Behavioral Health Services Department Evans Lane Wellness and Recovery Center</i></p> <p>HG5(i) D</p> <p>Continue to support organizations active in ensuring the rights of all persons to obtain and retain housing.</p> <p><i>Program 1.19: Eviction Diversion Program</i></p> <p><i>Program 1.14: Fair Housing Assistance Program</i></p> <p><i>Program 1.15: Fair Housing Audit & Education Program</i></p> <p><i>Program 2.12: Monitor R/ECAP and Burdened Household Areas</i></p> <p>HG5(i) E</p> <p>Maintain tenant/landlord dispute mediation services in all areas of the County.</p> <p><i>Program 1.18: Tenant/Landlord Dispute Mediation Services</i></p> <p><i>Program 4.01: Dispute Resolution Program</i></p>
HG5-5	Identify and increase access to services and other opportunities for residents of historically disinvested low-income communities (R/ECAPs and Burdened Households) across unincorporated county.	<p>HG5(i) F</p>
HG5-6	Support cities in improving opportunities within neighborhoods and areas identified as R/ECAPs and/or neighborhoods with a majority of Burdened Households.	<p>Identify R/ECAP and communities with Burdened Households and identify areas of improvement that will increase access to amenities and resources such as (but not limited to) transit, parks, fresh groceries, and health improvement facilities.</p>
HG5-7	Promote residential racial and ethnic integration and reduce displacement by increasing the supply of affordable housing in High Opportunity Areas, in areas with ongoing displacement, and in areas where residents are at risk of displacement.	<p><i>Program 2.12: Monitor R/ECAP and Burdened Household Areas</i></p> <p><i>Program 2.23: Tracking Housing Conditions</i></p>

Strategy No. 6: Provide for Special Needs Housing

Many Santa Clara County households encounter extraordinary difficulty in finding both affordable and accessible housing. In addition to the housing constraints already imposed by limited income, there are additional burdens faced by special needs and vulnerable populations, such as the elderly, large families, female-headed households, at-risk youth, victims of domestic violence, agricultural employee families (addressed specifically in Strategy No. 8), the homeless (addressed specifically in Strategy No. 7), and by those that are differently abled. These types of households are identified as special needs households. The needs of these groups call for specific program responses.

Community input showed significant interest and concern for the housing needs of all special needs populations. The input affirmed the need for policies promoting housing with support services. In addition, the community emphasized the need to adopt new policies that facilitate aging in place, such as incorporating Universal Design²⁷ in building codes. The community input also sought collaborative efforts by and among all cities, County agencies, and nonprofit housing-related organizations to ensure housing resources are well advertised and better utilized to prevent homelessness, address special needs, and provide paths to permanent housing.

Because homes for special needs households often require design features not typically required by other households, housing suitable for special needs households is rarely provided by the private market without some public assistance. The County and cities can encourage the production of special needs housing by identifying the scope of need in each community and using housing funds to enable builders to construct the needed extremely low-income (ELI) units in coordination with County’s direct referral services to ensure access to vulnerable and special needs populations. Through reducing constraints, local governments can improve the economics of such projects without compromising standards for health and safety (this approach is implemented through Strategy No. 4 addressing constraints to housing production).

The latest U.S. Census continues to indicate a growing elderly population in the county. Since 2000, the population share of residents in unincorporated county 65 years and older has increased to 15% of the total population and is projected to increase to over 20% by 2030 and reach 25% around 2045. This is a higher percentage of elderly population than the State of California (11 %), and country (13 %) as a whole. As such, planning for the senior population will be a growing need for the County to address. It is imperative that new housing suitable to the needs of a variety of senior households be integrated into every community.

The following policies continue existing policies identified in the previous Housing Element, while adding new policies to help the County update its understanding of the demand for special needs housing in the county, including senior housing.

Policies		Implementation
HG6-1	Encourage the development of affordable housing that is suitable for a variety of special needs populations.	HG6(i) A Advocate for the expansion of Federal and State programs and funding to assist local government in developing special needs housing not provided through the private market. <i>Program 1.01: Supportive Housing Development Fund Notice of Funding Availability (SHDF NOFA)</i> <i>Program 1.12: Coordinate with Bay Area Housing Finance Authority</i> <i>Program 1.16: Collaborate with the Santa Clara County Housing Authority (SCCHA)</i> <i>Program 1.17: Permanent Supportive Housing for Persons with a Serious Mental Illness</i>
HG6-2	An adequate supply of affordable housing suitable for individuals at all stages of life should be available in every community.	

²⁷ Universal Design is a building concept that incorporates products, general design layouts, and characteristics into residences in order to make the residence usable by the greatest number of people, respond to the changing needs of the resident, and improve the marketability of the residence.

HG6-3	Expand the Home Repair and Modification Program to include the retrofit of existing housing units to become ADA compliant.	<p><i>Program 3.01: SCC Behavioral Health Department Evans Lane Wellness and Recovery Center</i></p> <p>HG6(i) B</p> <p>Develop and implement policies and ordinances that create housing that is adaptable to the needs of physically, developmentally, and emotionally challenged persons.</p>
HG6-4	Incorporate Universal Design Principles into existing residential building standards.	<p><i>Program 1.01: Supportive Housing Development Fund Notice of Funding Availability (SHDF NOFA)</i></p> <p><i>Program 1.20: San Andreas Regional Center</i></p> <p><i>Program 2.13: Universal Design in Housing Development</i></p> <p><i>Program 3.01: SCC Behavioral Health Services Department Evans Lane Wellness and Recovery Center</i></p> <p>HG6(i) C</p> <p>Maintain existing programs to provide “Housing for All Ages,” including housing for multigenerational households.</p> <p><i>Program 1.31: Minor Home Repair and Maintenance Program</i></p> <p><i>Program 2.16: Expand Home Repair and Modifications to Include ADA Upgrades</i></p> <p><i>Program 2.17: Training and Support to Homeowners Aging in Place</i></p> <p>HG6(i) D</p> <p>Maintain existing programs to provide housing suitable for families with children in need.</p> <p><i>Program 1.11: Internal County Coordination of Housing Funds and Services</i></p> <p>HG6(i) E</p> <p>Support implementation of housing-related policies in the county.</p> <p><i>Program 1.24: Community Plan to End Homelessness</i></p> <p><i>Program 3.01: SCC Behavioral Health Services Department Evans Lane Wellness and Recovery Center</i></p> <p><i>Program 2.27: Replacement Housing Policy</i></p>

Strategy No. 7: Address Homelessness Consistent with Housing First Principles

Homelessness is a persistent and chronic problem for many individuals, but its effects touch whole communities. The countywide unhoused population remained between 7,200 and 7,500 people from 2007 to 2017, when there was a significant jump. From 2017 to the present, the unhoused population has increased. In a survey conducted in 2022, the unhoused population had grown to 10,000. Families with children, seniors, individuals with disabilities, veterans, youth, and young adults are all represented in the county’s diverse unhoused population.

The growing income gap between higher-income and lower-income populations in the county and the lack of housing development particularly at the lowest income levels contribute to the homelessness crisis. According to the Public Policy Institute of California, families at the highest income levels in the Bay Area (the 90th percentile) have more than 12 times the income of families at the bottom (the 10th percentile).²⁸ Those at the lower end of the income level have not shared in the region’s significant economic growth. In Santa Clara County, between 2000 and 2015, workers with earnings in the 10th percentile saw their income decline by 12%.²⁹

In 2015, the community came together to create a roadmap for ending homelessness in Santa Clara County. The *2015-2020 Community Plan to End Homelessness* centered around a collective impact response and the proven Housing First model. The Plan helped 8,884 households resolve their homelessness, doubled the number of supportive housing units, and increased temporary and emergency shelter capacity. Following a robust community engagement process and coordination, the County and its partners updated the roadmap for ending homelessness in the *2020-2025 Community Plan to End Homelessness*, focusing on three core strategies: 1) Address the root causes of homelessness through system and policy change; 2) Expand homelessness prevention and housing programs to meet the need; and 3) Improve quality of life for unsheltered individuals and create healthy neighborhoods for all. The *Community Plan to End Homelessness* continues to guide the County, cities, non-profit agencies, and community members on decisions about funding, programs, and needs for addressing the root causes of homelessness in the county.

Policies		Implementation
HG7-1	Expand homelessness prevention programs to support individuals and families most at risk of becoming homeless.	HG7(i) A Transition the Homelessness Prevention System Pilot into an ongoing housing intervention within the Supportive Housing System and continue to secure public and private funding to aid 2,500 households annually. <i>Program 1.11: Internal County Coordination of Housing Funds and Services</i> <i>Program 1.21: Homelessness Prevention System</i> <i>Program 1.22: Emergency Assistance Network</i> <i>Program 1.24: Community Plan to End Homelessness</i>
HG7-2	Expand supportive housing programs, including permanent supportive housing and rapid rehousing programs.	
HG7-3	Improve the quality of life of unsheltered individuals by expanding the capacity of temporary housing programs and providing basic needs services to individuals experiencing unsheltered homelessness.

<p>HG7-4</p>	<p>Continue to use hotels and motels to provide interim housing options for unsheltered households and seek additional Homekey funding from the State for capital improvements and to support ongoing operating funding.</p>	<p>HG7(i) B</p> <p>Continue to collaborate with affordable housing developers, non-profit agencies, county departments, local and regional partners to expand affordable and supportive housing.</p> <p><i>Program 1.23: City Revenue Agreements</i></p> <p><i>Program 1.24: Community Plan to End Homelessness</i></p> <p>HG7(i) C</p> <p>Continue to support community-based organizations that provide services to the unhoused population.</p> <p><i>Program 1.24: Community Plan to End Homelessness</i></p> <p><i>Program 1.25: Temporary Housing Programs</i></p> <p><i>Program 1.28: Lived Experience Advisory Board (LEAB)</i></p> <p>HG7(i) D</p> <p>Coordinate with cities to construct service enriched emergency shelters consistent with the Community Plan to End Homelessness's goal to double the number of temporary shelter beds by 2025.</p> <p><i>Program 1.24: Community Plan to End Homelessness</i></p> <p><i>Program 1.27: Service Enriched Shelter Forgiveness Loan Program</i></p> <p>HG7 (i) E</p> <p>Coordinate a Homekey Round 3 strategy with cities that focuses on expanding temporary and interim housing options to reduce unsheltered homelessness.</p> <p><i>Program 1.26: Homekey Application Strategy</i></p>
<p>HG7-5</p>	<p>Continue to incentivize the construction of new service enriched emergency interim housing by partnering with cities.</p>	<p>HG7 (i) F</p> <p>Promote the County's Service Enriched Emergency Interim Housing Challenge Grant by partnering with cities to help achieve the goals contained in the Community Plan to End Homelessness to double the number of temporary shelter beds.</p> <p><i>Program 1.24: Community Plan to End Homelessness</i></p>
<p>HG7-6</p>	<p>Continue to support feedback mechanisms that provide those with lived experience the opportunity to inform and shape improvements to the Supportive Housing System and the delivery of services.</p>	<p>HG7(i) G</p> <p>Raise the voices of people with lived experience and share power with unhoused and recently housed neighbors by including them in the decision-making process when making decisions about homelessness-related policies.</p> <p><i>Program 1.24: Community Plan to End Homelessness</i></p> <p><i>Program 1.28: Lived Experience Advisory Board (LEAB)</i></p>

Strategy No. 8: Maintain and Expand the Supply of Agricultural Employee Housing

Santa Clara County has a long history as a significant producer of agricultural products. Once known as the Valley of the Heart’s Delight, the region still produces over \$320 million of agricultural products per year.³⁰ The County is proud of its agricultural heritage and desires to promote food security by ensuring viable agricultural production including access to affordable and safe housing for agricultural workers and their families. The provision of affordable and safe agricultural employee housing can also promote the continuation of the county’s agricultural tradition by making the farms throughout the County more productive and more competitive. Moreover, through the development and implementation of the *Santa Clara Valley Agricultural Plan (Ag Plan)*, it has become clear that the County’s agricultural lands and the workers who steward them play an essential role in mitigating and adapting to climate change.

Agricultural employee households are considered a special needs household in State planning guidelines. Providing housing for agricultural employees continues to be a priority for the County and for communities and organizations countywide. Prioritizing agricultural employees extends to individuals who seasonally migrate to the County for employment at local farms and in processing plants, as well as to a substantial and growing portion of agricultural employees who are permanent, year-round County residents and who often live with their families. Year-round crops need year-round workers, and many farmers strive to provide work for their employees in the off-season to increase the likelihood that their employees will be available during crucial periods of high-labor needs. These dynamics are particularly true during times of labor shortages and a competitive job market. A large supply of seasonal workers is also necessary for the labor-intensive work of planting and harvesting highly perishable seasonal crops. Migrant and seasonal agricultural workers are often more challenged than year-round workers to find adequate housing and are more likely to endure long commutes from their place of residence to their place of work. By providing adequate opportunities for agricultural employee housing in Santa Clara County, the County’s agricultural industry can gain a competitive advantage, especially for seasonal workers during periods when agricultural workers are scarce. Importantly, the term agricultural employee also includes the significant population of self-employed farm and ranch operators, permanent County residents who also face significant housing challenges.

In 2018, the County adopted the Ag Plan, recognizing the need to ensure that the region’s agricultural economy continues to thrive, and that it is integrated into the County’s efforts to tackle climate change and regional resilience. The plan identifies the development of new agricultural employee housing as a crucial aspect to improving the agriculture-supportive infrastructure of the region. In response to the plan, the County updated its Zoning Ordinance to expand options for agricultural employee housing and streamline the planning approval process. The Ag Plan also calls for the facilitation of construction of more agricultural employee housing by identifying opportunities, including siting and funding options, for such projects.

The policies under this strategy continue existing policies identified in the 2015 Update, while adding new policies that work in conjunction with policies identified under Strategy No. 1 (Plan for a Balanced Countywide Housing Supply).

Policies		Implementation
HG8-1	Facilitate agricultural employee housing by improving the permitting process.	HG8(i) A Convene other jurisdictions for capacity-building and conduct a farmworker housing needs assessment. <i>Program 2.04: Assess Farmworker Housing Needs and Collaborate with Other Jurisdictions</i>
HG8-2	The County shall promote and support programs that maintain and expand appropriately located housing suitable for and affordable to farmworker households. Such support shall prioritize the needs of seasonal workers.	

³⁰ Source: [Santa Clara County 2021 Crop Report](#)

		<p>HG8(i) B</p> <p>Identify and pursue additional opportunities to support the development of agricultural employee housing.</p> <p><i>Program 2.14: Expanded Streamlining of Agricultural Employee Housing</i></p> <p><i>Program 2.20: Tracking and Ongoing Compliance with State Housing Laws</i></p> <p><i>Program 4.02: Agricultural Worker Housing Workplan</i></p>
HG8-4	Seek new funding sources to support the construction of farmworker housing.	<p>HG8(i) C</p> <p>Monitor new State and Federal Funding regarding farmworker rental and homeownership programs and collaborate with housing developers to identify sites suitable for farmworker housing.</p> <p><i>Program 1.29: Farmworker Affordable Homeownership and Farmworker Housing Pilot Program.</i></p> <p><i>Program 4.02: Agricultural Worker Housing Workplan</i></p>

Strategy No. 9: Conserve and Rehabilitate the Existing Housing Stock

One means of ensuring the availability of affordable housing is by maintaining the existing supply of older, less costly units. Rehabilitation programs assist lower income owners and tenants in upgrading their housing and maintaining its affordability. Older single-family houses provide starter homes for many first-time home buyers, and many older apartments and duplexes provide safe, decent, and affordable housing for low-income seniors, students, and an increasing number of families with children.

These more affordable housing opportunities can and have been lost through demolition and rebuilding of newer, larger homes. It is appropriate and necessary that some areas in every community evolve to different uses as time goes by. However, communities must address the resulting displacement of existing long-term lower income rental residents out of the area. Programs to rehabilitate existing homes should ensure that low-income households can continue to live in their existing communities. Additionally, the rehabilitation of owner-occupied housing could be a means for seniors to be able to age in place.

Funds from Federal and State housing programs have been used to assist qualified low- and moderate-income homeowners and rental property owners in rehabilitation and maintenance efforts. Many of these neighborhoods are also in need of public infrastructure improvements, such as street repaving, sidewalk repairs, and installation or repair of storm drains, curbs, and gutters. Community development funds have been used to make public improvements of this sort. These improvements in turn provide residents with a safer living environment, as well as an increased pride in their neighborhood and homes. They further encourage an increase in private investment in the area.

Those programs should be continued and, as resources permit, expanded to ensure that the maximum number of units affordable to lower income residents remain available in those areas.

When rental units are rehabilitated, owners or landlords will frequently raise rents either to cover costs or because the upgraded units command higher rent on the market. The County and the cities should make every effort to ensure that public grants or low interest loans for the purposes of rehabilitation do not result in the displacement of lower income tenants or the loss of below market rate housing. Monitoring of rental costs has also proven to help with tracking the increasing cost of housing in the county.

The policies under this strategy maintain the County's goal to facilitate the preservation of the existing housing stock, while also ensuring that displacements due to such improvements are limited.

Policies		Implementation
HG9-1	The conservation and rehabilitation of the existing housing supply shall be encouraged and facilitated.	HG9(i) A Maintain ongoing programs for monitoring the physical condition of neighborhoods to assist in guiding rehabilitation program efforts, scheduling infrastructure maintenance activities, and to provide accurate information for Federal and State programs. Expand monitoring component to include rent price information. <i>Program 1.31: Minor Home Repair and Maintenance Program</i> <i>Program 2.05: Rent Price Monitoring Program</i> <i>Program 2.21: Streamlined Rehabilitation and Replacement</i> <i>Program 2.27: Replacement Housing Policy</i>
HG9-2	Publicly assisted housing rehabilitation efforts should not have the effect of reducing the available supply of housing for extremely low-income households.	
HG9-3	The inventory of land zoned and suitable for residential development shall be maintained.	

HG9-4

Support retaining existing deed restricted affordable and supportive housing units.

HG9(i) B

Maintain existing County and cities' joint land use policies and agreements that direct urban development to areas within city USAs and preserve rural areas for rural development.

Program 2.10: Joint Urban Development Policies

HG9(i) C

Strengthen the County's loan portfolio management system to track when existing affordable and supportive housing projects are eligible for syndication of their tax credits and work towards extending affordability terms.

Program 1.30: Asset Management Portfolio Expansion

Strategy No. 10: Plan for Climate Change Impacts on Existing and Future Housing Stock

Santa Clara County is already experiencing the effects of the climate crisis.³¹ The County needs to ensure that future housing stock is resilient to the impacts of climate change. It also needs to ensure that the current housing stock are periodically upgraded to reduce the impacts of climate change and extreme weather events. The policies under this strategy promote greater energy and water efficiency in new and existing housing stock and promote the development of resiliency against extreme weather in future housing stock.

The County's *Climate Roadmap 2030* and its *Sustainability Master Plan* (adopted in 2021) provide the larger vision and broad goals for climate smart housing. The policies below complement Strategy 2.1 and Strategy 6.3 of the *Sustainability Master Plan*. These policies will ensure that existing and future housing stock are contributing to lowering our greenhouse gas (GHG) footprint and protecting our existing housing stock from extreme weather events and natural disasters.

Policies		Implementation
HG10-1	Promote energy and water efficiency and electrification in new and existing residential buildings to reduce energy costs, conserve water, provide quality and resilient housing, improve safety, and comfort, and reduce greenhouse gas emissions.	<p>HG10(i) A</p> <p>Adopt new energy efficiency, electrification, water conservation and building performance standards for existing and new buildings.</p> <p><i>Program 2.15: Adoption of "Reach" Codes</i></p>
HG10-2	Continue to limit development of new housing in areas likely to face high risk to climate related disasters, such as, wildfires and floods.	<p>HG10(i) B</p> <p>Maintain low-density land use and zoning designations for properties within hazard areas.</p> <p><i>Program 2.10: Joint Urban Development Policies</i></p>
HG10-3	Facilitate programs and assistance to upgrade existing housing stock to better withstand extreme weather events, while keeping energy efficiency in mind.	<p>HG10(i) C</p> <p>Encourage retrofitting of existing homes.</p> <p><i>Program 1.31: Minor Home Repair and Maintenance</i></p> <p><i>Program 2.21: Streamlined Rehabilitation and Replacement.</i></p>

³¹ See [Silicon Valley 2.0 Climate Adaptation Guidebook](#) for more on the County's efforts to demonstrate the effects of climate change locally.

Chapter 4: County Housing Strategies, Policies, and Programs

4.01 Overview

Chapter 4 delineates housing policy programs to be implemented during the 2023-2031 Housing Element planning period. These programs are associated with the Strategies and Policies covered in Chapter 3. This chapter organizes the implementation programs by the lead responsible County agency. The numbering of these programs reflects the lead agency, followed by the program number. Section 4.02 lists all County programs and cross-references the relevant Strategies and Policies from Chapter 3. Programs that are new for this Housing Element cycle are marked as (New). Section 4.03 provides a detailed discussion of each program. Several programs address the contributing factors listed in the Assessment of Fair Housing (AFH) and each program discussion includes a reference to the relevant contributing factor(s). Appendix N lists proposed goals and actions recommended in the AFH and cites the appropriate programs that addresses each goal.

4.02 List of Implementation Programs

Table 4.1: List of Implementation Programs

PROGRAM NUMBER	PROGRAM	COMPLETION DATE	TIMEFRAME	STRATEGY & POLICY
1. OFFICE OF SUPPORTIVE HOUSING (OSH)				
1.01	Supportive Housing Development Fund Notice of Funding Availability (SHDF NOFA)	2026	Medium Term	HG1-3, HG1(i) B, HG1(i) C, HG6-1, HG6(i) A, HG6(i) B
1.02	Limited Equity Housing Cooperative Projects (LEHCs)	2026	Medium Term	HG1-4, HG1(i) C
1.03	Homeownership Projects	2026	Medium Term	HG1-4, HG1(i) C
1.04	Empower Homebuyers SCC	2026	Medium Term	HG1-4, HG1(i)C, HG5-5, HG5(i) A
1.05	Mortgage Credit Certificate (MCC) Program	2023	Short Term	HG1-4, HG1(i)C,
1.06	Below Market Partnership Program	2026	Medium Term	HG1-4, HG1(i)C,
1.07	County-Led Housing Development	Ongoing	Continuous	HG1-5, HG1(i)D, HG3-1, HG3(i) B
1.08	Joint Development Memoranda of Understanding (MOU)	2024	Short Term	HG2-1, HG2(i) A
1.09	Housing Trust of Silicon Valley	Ongoing	Continuous	HG2-1, HG2(i) A
1.10	Santa Clara County CDBG and Housing Coordinators' Convening	Ongoing	Continuous	HG2-2, HG2(i) A, HG2(i) B, HG4-1, HG4(i) A
1.11	Internal County Coordination of Housing Funds and Services	Ongoing	Continuous	HG2-3, HG2(i) C, HG 6-2, HG6(i) D, HG7-1, HG7(i) A
1.12	Coordinate with Bay Area Housing Finance Authority	Ongoing	Continuous	HG3-1, HG3(i) A, HG6-1, HG6(i)A
1.13	Supportive Housing and Innovation Fund	Ongoing	Continuous	HG3-1, HG3(i) A
1.14	Fair Housing Assistance Program	Ongoing	Continuous	HG5-1, HG5-2, HG5(i)B
1.15	Fair Housing Audit & Education Program	Ongoing	Continuous	HG5-1, HG5-2, HG5(i) B, HG5(i) D

4. OFFICE OF COUNTY EXECUTIVE				
4.01	Dispute Resolution Program	Ongoing	Continuous	HG5-3, HG5-4, HG5(i) E
4.02	Agricultural Worker Housing Workplan (New)	December 2023	Continuous	HG8-1, HG8(i) B, HG8-4, HG8(i) C
4.03	Coordinated Annexation and RHNA Transfer (New)	Ongoing	Continuous	HG1-1, HG1(i) A

4.03 Program Descriptions

This section describes the programs listed in Section 4.02 of this chapter, organized by the lead agencies responsible for implementation.

4.03a Office of Supportive Housing Programs

The Office of Supportive Housing's (OSH's) mission is to increase the supply of housing and supportive housing that is affordable and available to extremely low-income and/or special needs households countywide. One of OSH's primary aims is to support the County of Santa Clara's mission of promoting a healthy, safe, and prosperous community by ending and preventing homelessness. OSH's major activities include efforts to organize and operate homeless services countywide, including homelessness prevention, crisis response, and Permanent Supportive Housing and Rapid Rehousing programs (collectively, the Supportive Housing System). In addition, OSH strives to increase the supply of housing by funding and spurring the development of housing for low-income households, with a particular focus on extremely low-income households. OSH is the lead department within the County implementing the 2016 "Measure A" Affordable Housing Bond, a \$950M general obligation bond, serves as the collaborative applicant for the Santa Clara County Continuum of Care, and serves as the primary convener of housing staff across the County in collaboration with cities on joint housing and homelessness concerns. The 2020-2025 Community Plan to End Homelessness serves as our community's roadmap to ending homelessness and serves as the basis of OSH's annual workplan.

Collectively, Programs 1.01 – 1.33 provide a wholistic approach to addressing the housing and homelessness issues facing Santa Clara County communities. While some programs are new, continued programs have been modified to reaffirm the County's commitment

to create an environment that brings stakeholders together to streamline housing producing, that address displacement and impediments to fair housing, and leverages limited resources to maximize the assistance that is provided to special needs populations across the county. Most importantly, these programs have been designed to address the disproportionate housing needs of households who are cost burdened, at highest risk of displacement, and housing insecure. At a time when over half of U.S. renters across the Country cannot afford to pay their rent, the County of Santa Clara through OSH has designed priorities, strategies, and actions to address these contributing factors.

Program 1.01- Supportive Housing Development Fund Notice of Funding Availability (SHDF NOFA).

In December 2014, the County of Santa Clara's Board of Supervisors affirmed the County's role in promoting affordable housing, especially for vulnerable populations. Housing special needs populations is a county service and therefore the County must take an active role in developing, financing, and supporting various types of affordable housing for the populations that the County serves. The Board further established that the County's priorities were to:

- Increase the supply of housing that is affordable to extremely low-income (ELI) households;
- Increase the scope and breadth of supportive housing for special needs populations, including homeless and chronically homeless persons; and
- Improve coordination and collaboration among the County, the cities, other governmental agencies, and the affordable housing community.

These priorities have assisted the County in directly addressing contributing factors to fair housing issues including but not limited

to a lack of affordable, accessible housing in a range of unit sizes. ELI and very low-income (VLI) households are significantly more likely to be cost burdened in the county than other income groups.

Unfortunately, the county’s rental market has fallen short in meeting the affordability needs of these households. The most impactful tool for the County to address the disproportionate housing needs includes a local ballot measure intended to raise funds to accelerate the development of affordable and supportive housing.

In November 2016, Santa Clara County residents approved the 2016 “Measure A” Affordable Housing Bond (Housing Bond), a \$950 million general obligation bond that will create new affordable rental and homeowner housing opportunities. The Housing Bond has provided the County with an unprecedented opportunity to partner with cities, residents, and the affordable and supportive housing community to significantly address the housing needs of the community’s poorest and most vulnerable residents. The bond proceeds are projected to fund 120 new affordable housing developments over ten years, including 4,800 new units dedicated to extremely low-income and very low-income households. The Housing Bond is part of an ongoing effort to:

- Increase affordable housing opportunities for our community’s most vulnerable and poorest residents; and

- Prevent and reduce homelessness throughout Santa Clara County.

The SHDF NOFA includes funding sources for the development of new, permanent affordable and supportive housing for the community’s most vulnerable populations. Special needs groups include but are not limited to unhoused individuals, seniors, transition aged youth, agricultural workers, and people with a disabling condition. As a funder of affordable and supportive housing throughout the County, OSH works closely with the affordable housing development community and local jurisdictions to facilitate the development of housing from identifying properties through the entitlement process and financing stages to the lease up process for special needs units. This over-the-counter process will continue to consolidate all County-controlled housing production funds into one primary procurement method to accelerate housing development. Central to this work is the partnership and collaboration that OSH has with the affordable housing development community and the 15 incorporated cities in the county. Together we manage a countywide housing development pipeline. Since 2015, the County has funded the development of 7,183 housing units across the county of which 2,997 are set aside for homeless individuals or families that may also be seniors, transition aged youth, veterans, agricultural workers and/or those with a disabling condition.

Table 4.2: SHDF NOFA

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • Approve funding to support at least 18 new housing development sites resulting in 1,657 units of affordable and supportive housing for special needs populations by June 30, 2025. OSH will proactively meet with the cities in the County to facilitate the land use approval process with an emphasis on leveraging land use streamlining legislation like SB 35 and AB 2161, provide predevelopment and acquisition funding, as well as facilitate applications for funding through the State of California’s Housing and Community Development Super NOFA. Through these partnership meetings, OSH staff provides technical assistance to staff, makes connections to other cities facing similar challenges, and attends City Council meetings as requested.
--------------------	---

	<ul style="list-style-type: none"> ○ On December 5, 2023, the Board approved funding for six entitled multifamily rental housing developments totaling 716 new apartments. ○ Concurrently, the Office of Supportive Housing is underwriting six additional multifamily rental housing developments that are working on seeking their entitlements. These recommendations are expected to be presented to the Board of Supervisors by September 2024. ● Over the 2023-2031 period, OSH will meet monthly with the cities of Campbell, Cupertino, Los Gatos, Morgan Hill, Mountain View, Santa Clara, and San José to provide technical assistance, coordinate interest from the development community, and chart a land use and financing plan for properties that have been identified by the County in these cities that can be developed for extremely low income and special needs affordable housing. Collectively the intent is to develop a clear land use approval process and reduce the time it takes to get through the approval process, work together to identify funding opportunities and submit joint application as applicable, and engage collaboratively with the affordable housing development community to reduce costs and deliver housing more quickly. OSH expects the outcomes of these convenings to lead to the production of additional affordable housing by working together to develop a regional housing development pipeline. OSH will track the outcomes of these meetings to demonstrate the impact and benefit of working collaboratively to remove the governmental constraints associated with building affordable and supportive housing for special needs populations ● Over the 2023-2031 period, bi-annually convene affordable housing development partners to discuss financing opportunities and co-create a housing development pipeline, discuss land use streamlining opportunities, and work together to strategically position projects so that they are not competing with each other for scarce resources. OSH expects the outcomes of these convenings to give developers the opportunity to learn about the County’s priorities and processes, reduce uncertainty, and foster an environment that will yield more affordable housing units. We expect to have at least 20 different developers in attendance at each convening. <ul style="list-style-type: none"> ○ On November 30, 2023, the County in partnership with SV@Home convened a Developer Roundtable to discuss upcoming funding applications and opportunities. ● Over the 2023-2031 period, annually seek approval for funding for at least six new development proposals for affordable and supportive housing to the Board of Supervisors. <ul style="list-style-type: none"> ○ By fall of every year, underwrite six housing development projects and schedule a 1:1 meeting with each developer to confirm funding assumptions and review all related due diligence items. ○ Draft staff analysis and deliver presentation to the OSH Director prior to presenting the list of projects for the Board’s approval. ○ Once the Board approves the funding, issue funding commitment letter, negotiate term sheet, and identify any pre-development funding that may be needed. ● Annually review the SHDF Guidelines to ensure that the current underwriting criteria is consistent with State and Federal capital funding sources for housing development. Outreach to the development community for input and host at least one listening session to discuss possible changes. Seek approval from the Board of Supervisors to formalize changes.
GEOGRAPHIC SERVICE AREA	Countywide
LEAD AGENCY	Office of Supportive Housing
FUNDING SOURCE	<p>The funding sources in the NOFA include:</p> <ul style="list-style-type: none"> ● 2016 “Measure A” Affordable Housing Bond (Housing Bond): A \$950 million general obligation bond approved by the voters in 2016.

	<ul style="list-style-type: none"> • No Place Like Home (NPLH): As an alternative county, the County of Santa Clara received a direct allocation of NPLH funds to administer locally. To date the County has received funding over four funding rounds totaling \$106,085,749. • Housing Funds for Persons with Intellectually and Developmentally Disabilities (I/DD): \$40 million in County General fund support the construction of extremely low-income and very low-income housing for to develop persons with intellectual and/or developmental disabilities and their families. • Stanford Affordable Housing Fund (SAHF): A special revenue fund to account for in-lieu fees received from Stanford University for General Use Permit (GUP). Funding affordable housing projects within 6-mile radius of boundary of the Stanford campus. • HOME Investment Partnership Program (HOME): A special revenue fund to account for the HOME Investment Partnerships Program awarded by the U.S. Department of Housing and Urban Development. Approximately \$1 million is available annually. • Community Development Block Grant (CDBG): A U.S. Department of Housing and Urban Development Block Grant awarded to eligible communities for housing and community development activities. As an Urban County, the County receives an annual allocation of funds directly from HUD. Additional revenue is generated from loan repayments of outstanding loans and from interest earned on funds. • Permanent Local Housing Allocation (PLHA): Funds are used to for the development of new affordable housing for households earning up to 60% AMI.
<p>POLICIES AND IMPLEMENTATION:</p>	<ul style="list-style-type: none"> • HG1-3: Focus the County's limited housing production resources on special needs populations, farmworkers, and extremely low-income households. • HG1(i) B: Encourage public support of city efforts to create a balanced housing supply, which includes housing affordable to special needs, farmworkers, and extremely low-income households. • HG1(i) C: Continue to implement new homeownership programs that provide an opportunity for lower-income households that would otherwise struggle to afford a home, furthering the equity and sustainability of homeownership. • HG6-1: Encourage the development of affordable housing that is suitable for a variety of special needs populations. • HG6(i) A: Advocate for the expansion of Federal and State programs and funding to assist local government in developing special needs housing not provided through the private market. • HG6(i) B: Develop and implement policies and ordinances that create housing that is adaptable to the needs of physically, developmentally, and emotionally challenged persons.
<p>CONTRIBUTING FACTORS</p>	<ul style="list-style-type: none"> • Availability of affordable units in a range of sizes • Lack of access to opportunity due to high housing costs • Location and type of affordable housing • Loss of affordable housing

Program 1.02 - Limited Equity Housing Cooperative Projects (LEHCs)

This program focuses on extremely low-income households, particularly those that face displacement due to economic pressures. A significant portion of these households have historically faced severe obstacles in accessing homeownership, which may reinforce their current economic status. ELI households have substantially lower rates of homeownership than overall households and other special needs households. LEHCs have aspects of both homeownership and rental projects and are a unique opportunity to provide equity to extremely low-income households and others who may not otherwise be able to achieve homeownership. LEHC developments are cooperatively owned by a resident board of directors (Cooperative Board). Residents pay affordable monthly dues or "rent" to the Cooperative Board and receive a modest equity share at the end of their residency. Projects are expected to include on-site services and would likely require Project Based Vouchers to support ongoing operations.

The Supportive Housing Development Fund Notice of Funding Availability (Program 1.01) includes the opportunity for developers to submit a funding application for Project Type 5 which promotes opportunities for "Limited Equity Housing Cooperative projects as defined under the California Business and Professions Code." The County anticipates funding at least one project in the planning period.

This program aims to overcome one or more contributing factors that create, contribute to, perpetuate, or increase the severity of one or more fair housing issues. Specifically, the County intends to demonstrate the opportunities that LEHCs can provide those that face displacement due to economic pressures and lack access to opportunity due to high housing costs. OSH intends to fund one project during the planning period to help determine the impact a program like this can have to directly address the high levels of displacement of low-income residents, who are disproportionately likely to be Black, Vietnamese, Latinx, or have disabilities.

Table 4.3: LEHCs

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • By June 2024, identify at least one County-owned site to pilot a LEHC project. This process includes reviewing the County’s portfolio of properties to determine which is best suited for this pilot project without jeopardizing the overall housing production goals for any given site. • Launch the community engagement strategy in partnership with the City of San José’s Housing Department in Summer 2024. <ul style="list-style-type: none"> ○ Identify key stakeholders and hold three listening sessions with ELI households who are interested in developing a vision for the site and the pilot LEHC project. ○ Work with the Santa Clara County Housing Authority to apply by December 2026 for funding or vouchers to support the rental subsidy needed to make the LEHC project feasible. • Identify a development partner using the County Developer Qualified Pool and select a partner by Summer 2024. The following provides a timeline to help achieve this goal: <ul style="list-style-type: none"> ○ Circulated internal draft of Request for Offer in March 2024 ○ Issue Request for Offer by June 2024 ○ Evaluate proposals and select development partner by September 2024
--------------------	---

	<ul style="list-style-type: none"> ○ Receive Board approval by October 2024 ○ Initiate Community Engagement and design work by November 2024. ● Receive entitlements from the City of San José by December 2025. ● Seek financing in 2026 and start construction by 2027. ● Complete project by 2029.
GEOGRAPHIC SERVICE AREA	Countywide
LEAD AGENCY	Office of Supportive Housing
FUNDING SOURCE	2016 "Measure A" Affordable Housing Bond
POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> ● HG1-4: Encourage homeownership opportunities for lower-income households. ● HG1(i)C: Continue to implement new homeownership programs that provide an opportunity for lower-income households that would otherwise struggle to afford a home, furthering the equity and sustainability of homeownership.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> ● Displacement of residents due to economic pressures ● Lack of access to opportunity due to high housing costs

Program 1.03 - Homeownership Projects

This program helps to support the production of new for-sale homes. Possible projects in this program may have a similar scale to multifamily affordable apartments, but smaller developments are also eligible. Within each proposed project, a minimum of 33% of the homes shall be sold to very low-income households, up to 33% to moderate-income buyers, and the balance to low-income buyers. In the case of common interest developments, each unit would be separately owned and would be a member of a Homeowners

Association which would be responsible for the maintenance of common elements and facilities. In November 2021, the Supportive Housing Development Fund Notice of Funding Availability (Program 1.01) was amended to include Project Type 6 which promotes opportunities for *"Homeownership projects which commit a minimum of 33% of the units for very low income (VLI) households, a maximum of 33% of the units for moderate-income households, and the balance of the units for households at 80% AMI or below."* **As noted above, lower income households are less likely to achieve homeownership.**

Table 4.4: Homeownership Projects

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • Complete construction of a total of 18 new for sale affordable homeownership units by December 2026. Implementing actions include providing financing to close the funding gap and working with the developer to remove any land use barriers by working closely with the local jurisdiction's planning staff. • Implement the approved \$1M funding for Habitat for Humanity East Bay/Silicon Valley and assist with the completion of the 4th and Reed Homeownership project consisting of 4 new homeownership units by August 2024. On May 16, 2023, the Board approved up to \$1,000,000 for this project. The project has secured all financing and is getting prepared to start construction. Construction is expected to be completed by Spring 2025. • Implement the approved funding for Habitat for Humanity Easy Bay/Silicon Valley and assist with the completion of the Jackson Avenue Townhomes project consisting of 14 new for sale affordable townhomes by March 2026. On November 1, 2022, the Board approved up to \$4,000,000 for this project. Construction is expected to be completed by Spring 2026.
GEOGRAPHIC SERVICE AREA	Countywide

FUNDING SOURCE	2016 "Measure A" Affordable Housing Bond
POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG1-4: Encourage homeownership opportunities for lower-income households. • HG1(i)C: Continue to implement new homeownership programs that provide an opportunity for lower-income households that would otherwise struggle to afford a home, furthering the equity and sustainability of homeownership.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Location and type of affordable housing • Availability of affordable units in a range of sizes

Program 1.04 - Empower Homebuyers SCC

Empower Homebuyer Santa Clara County (Empower) was created to increase homeownership opportunity for low-income and moderate-income households. Empower is a loan program to help low- and moderate-income first-time homebuyers purchase a home by assisting them with the required down payment, which is usually 20% of the purchase price. The Housing Trust Silicon Valley (HTSV) administers the Empower Program from FY2019-FY2023 on the County’s behalf. The program offers up to \$250,000 for low-income to moderate-income first-time homebuyer to put towards the cost of

down payment on a qualified property in the county. The loans bear zero interest and are deferred up to 30 years. The borrower shall repay the original amount of their loan plus a share of the appreciation of their home when the loan matures, or when the borrower decides to sell their home or refinance their mortgage. The program increases homeownership opportunities to low-income individuals and families, of which may consist of individuals with special needs. A secondary aim of this program is to help in eliminating lending discrimination that is a prevalent problem faced by lower income households of color.

Table 4.5: Empower Homebuyers SCC

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> On June 27, 2023, the Board of Supervisors approved modifications to the program. OSH then worked closely with HTSV to make the necessary operational changes to the program. Approved program changes took place in October 2023 and this has yielded additional loans being issued. HTSV has been proactively reaching eligible households to make them aware of the changes to the program. The additional outreach is intended to increase the number of loans issued. Implementing actions include hosting 50 educational workshops or other similar events to educate homebuyers, realtors, lenders, and other interested parties about the program. OSH anticipates issuing 50 first-time homebuyer loans by 2027.
GEOGRAPHIC SERVICE AREA	Countywide
LEAD AGENCY	Office of Supportive Housing

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> HG1-4: Encourage homeownership opportunities for lower-income households. HG1(i)C: Continue to implement new homeownership programs that provide an opportunity for lower income households that would otherwise struggle to afford a home, furthering the equity and sustainability of homeownership. HG5-5: Identify and increase access to services and other opportunities for residents of historically disinvested low-income communities (R/ECAPs and Burdened Households) across unincorporated county. HG5(i) A: Facilitate access to Federal and State home rehabilitation loans or grants to qualifying persons of extremely low-income.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> Lack of access to opportunity due to high housing costs Location and type of affordable housing

Program 1.05 - Mortgage Credit Certificate (MCC) Program

Mortgage Credit Certificates (MCCs) provide financial assistance in the form of individual federal income tax credits to first-time homebuyers of single-family homes, townhomes, and condominiums. The MCC Program grants a federal income tax credit on the annual mortgage interest paid, thereby reducing overall federal income taxes. The credit may not exceed 20% of the interest paid on the borrower’s first mortgage. The County’s current tax credit rate of 15% was set in January 2001. In Santa Clara County, the MCC tax credit rate has varied from 10% to 20%, based on past performance, the potential demand for MCCs, and the likely amount of tax credit allocation awarded by the California Debt Limit

Allocation Committee (CDLAC). Since 1994, the County has offered a Reissue of Mortgage Credit Certificate (RMCC) Program for existing MCC holders wishing to retain their tax credit following refinancing. The Program generates revenue through homebuyer application and participating lender fees. The Mortgage Credit Certificate Program was authorized by the Tax Reform Act of 1984. Federal law limits the dollar amount of tax-exempt authority that can be used in each State to issue private activity bonds (including MCCs). CDLAC is granted sole authority for allocating the annual ceiling on private activity bond allocations in the State of California. The Program provides financial assistance in the form of individual federal income tax credit to low-income individuals and families, of which may consist of individual(s) with special needs.

Table 4.6: Mortgage Credit Certificate (MCC) Program

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • By December 2024, issue the remaining 10 MCCs. • Proactively promote the availability of the remaining MCCs in partnership with the County’s preferred lending pool and cities Below Market Rate housing programs. • The County will prioritize its remaining MCCs for agricultural workers and other lower income households with incomes at 50% AMI or below. These MCCs will help lower income homebuyers afford homes that would otherwise need to be sold to households with higher incomes. Specifically, MCCs will allow a lower income buyer to be able to devote more of their annual income towards qualifying for a first mortgage, because this can be offset by the buyer’s tax savings. This allows potential buyers with lower incomes to afford a sales price that they would not otherwise be able to afford without the benefit of the MCC. • Between 2015-2022, the County planned to issue approximately 130 MCCs annually for low- and moderate-income households. However, 92 MCCs were issued for low-and moderate-income households. CDLAC has not made new funding available for the Mortgage Credit Certificate Program since 2020. Currently, the County only has the authorization to issue 10 more MCCs. <ul style="list-style-type: none"> ○ In 2016, the County issued 24 MCCs ○ In 2017, the County issued 28 MCCs ○ In 2018, the County issued 13 MCCs ○ In 2019, the County issued 10 MCCs ○ In 2020, the County issued 9 MCCs ○ In 2021, the County issued 8 MCCs ○ In 2022, the County issued 1 MCC ○ In 2023, the County will issue 10 MCCs

Program 1.06 - Below Market Partnership Program

Homeownership has long been associated with many secondary benefits, including housing security, educational achievement, and the ability to build wealth. However, there are many barriers to purchasing a home within Santa Clara County. As of August 2022, the median home price in the county exceeded \$1.4 million, putting the dream of homeownership out of reach for more than half of the County’s residents. In addition to the extremely high cost of homes, many other market factors and industry standards compound the issue, including significant down payment and credit requirements and a highly competitive market where successful offers must also waive significant contingencies, offer quick closes, bid above assessed value, and compete against all-cash offers to be seriously considered by home sellers. These factors are challenging for all buyers and commonly become insurmountable barriers for low- and

very low-income households. The Below Market Rate Partnership Program is intended to promote affordable homeownership opportunities, particularly for very low- and low-income households. This program will provide deferred subordinate loans to eligible households purchasing a home within Santa Clara County. Deferred subordinate loans are mortgages under which no principal or interest payments are due during the term of the loans, and the loans have a junior lien priority to the borrower’s first mortgage. The County has received an award of CalHome funding that will be leveraged to supplement local funding in partnership with other governmental agencies who operate within Santa Clara County and nonprofit organizations which have experience operating homeownership programs. Eligible homes under the Program include single-family homes, townhomes, condominiums, manufactured homes, mobile homes, and ADUs or JADUs located within the county.

Table 4.7: Below Market Partnership Program

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • By January 2031, issue 100 deferred subordinate loans to eligible low-income households. To achieve this goal, OSH will coordinate with the other cities in the county who administer Below Market Rate programs. • On June 27, 2023, received approval from the Board of Supervisors for version 2 of the Below Market Rate Partnership Program policies and procedures. • In September 2023, the County started to administer the program and developed a workflow with Partner Agencies.
--------------------	---

	<ul style="list-style-type: none"> In December 2023, the County issued loans to the first two households under this new program in partnership with the City of Morgan Hill, for a total of \$185,000 in Housing Bond funds. Both homes were sold to low-income households. In 2024 OSH will continue to work with partner agencies to expand implementation of the program. This includes meeting with the cities in the county that have current BMR programs and who are interested in leveraging the County's newly established program that targets lower income households. Since this is a newer program OSH expects to see a steady increase in subordinate loans every year. In 2025 OSH will convene the cities in the county who administer BMR programs who have not engaged with the Below Market Partnership Program with the goal of establishing commitments from at least three cities.

Program 1.07 County-Led Housing Development

The County has a variety of County-controlled and County-owned properties, some of which are suitable for residential development. The County has established a process to give the community an opportunity to work in partnership with the County to develop these sites with affordable housing. Because the majority of these sites are located in the incorporated urban areas of the county, the Office of Supportive Housing works closely with the housing and planning staff of each city to develop a land use path for each site that is owned or controlled by the County before it is released through a solicitation process. This predevelopment work establishes early partnerships with the host city, their elected officials and the immediate community to shape the future design and target

population for the property. The intent of this strategy is to accelerate the construction of affordable and supportive housing by removing governmental constraints that are often impediments to housing.

Streamlined Solicitation Process

On September 4, 2019, the County of Santa Clara Office of Supportive Housing issued a Request for Qualifications to create a pool of prequalified affordable housing developers who could respond to solicitations to develop affordable housing on County-owned land. This Developer Qualified Pool (DQP) consists of 16 experienced developers that are aligned with the County's goals of increasing affordable housing for Santa Clara County's most

vulnerable and poorest residents. As County-controlled properties become available, the County issues a Request for Offers to accept development proposals from the DQP. The County has selected a developer from the DQP for five county-owned sites in incorporated cities. The sites are summarized below:

- Grant Avenue Educator Workforce Housing – Palo Alto: The County is partnering with Mercy Housing and Abode Communities to develop 110 affordable rental workforce apartments for teachers, school employees, and their families. The project is being developed in partnership with Meta (formerly Facebook), and five local school and community college districts.
- Mitchell Park Place – Palo Alto: The County is partnering with Eden Housing to develop 50 affordable rental apartments. This development includes 25 apartments and services for individuals with intellectual and/or developmental disabilities and their families.
- The Hub – San José: The County is partnering with Allied Housing to develop affordable rental apartments, including units for transitioned age youth, and The Hub, a youth-led community center dedicated to supporting current and former foster youth. The Planning application under review proposes 81 housing units.
- Distel Circle – Los Altos: The County and the City of Los Altos are partnering with EAH Housing to develop 90 affordable rental apartments.
- East Santa Clara – San José: The County is partnering with Eden Housing and The Core Companies to develop

affordable housing in accordance with the East Santa Clara Master Plan.

Building on this moment, it is the County's intention to scale this program and accelerate the production of housing on County-owned sites with an emphasis on parcels in high opportunity areas. Specifically, the County will be focusing its efforts in the cities of Cupertino, San José and Gilroy for the first half of the 6th Cycle Planning Period to position 3 County-controlled sites for development into affordable, workforce and supportive housing. Examples of this partnership include working closely with the City of Cupertino to ensure the county-controlled site is listed as a housing opportunity site in Cupertino 6th Cycle Housing Element. The sites are summarized below:

Wolfe Road – Cupertino: The County is in control of a 5-acre site in the City of Cupertino to explore the development of affordable, supportive and workforce housing.

Senter Road – San José: The County acquired a 6.2-acre site in the City of San José to explore the development of affordable, supportive and homeownership housing.

East 8th and Alexander – Gilroy: The County and the City of Gilroy are currently exploring the possibility of developing affordable housing on this County-owned site.

Table 4.8: County-Led Housing Development

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • Complete construction of 240 affordable, workforce and supportive housing units for special needs populations by January 2026 through the Grant Avenue Educator Workforce Housing Development, Mitchell Park Place and the Hub Housing Development. <ul style="list-style-type: none"> ○ Construction for the Grant Avenue Educator Workforce Housing started July 2023 ○ Construction for the Mitchell Park Place started February 2024 ○ Construction for the Hub Housing Development started November 2023 • Complete construction on the Distel Circle project in Los Altos by December 2026 which will result in 90 units of affordable and supportive housing in a high opportunity area of the county. OSH is proactively tracking funding opportunities to help the developer fill financing gaps. Most recently on May 21, 2024, the Board approved allocation additional funding that will allow the project to apply for tax credits in August 2024. • Complete construction on the East Santa Clara site in San Jose by 2031 that will result in a three phased development totaling 214 units. The County, through OSH, has selected Eden and the Core Companies to serve as co-developers. OSH worked closely with the development partners and the City of San José to submit an SB 35 streamlining Land Use application for the project. Entitlements are expected to be received through a ministerial process by December 2024. OSH will then return to the Board of Supervisors to pursue approval of any remaining financing commitments needed by the County for the project. • By September 2024, initiate the community engagement process for the County-owned sites in Cupertino, San José, and Gilroy, in partnership with city partners that could yield a minimum of 617 new housing units that would be completed by 2031. <ul style="list-style-type: none"> ○ On February 6, 2024, the Board approved the selection of Eden Housing as the developer for the Cupertino site. One-on-one stakeholder engagement has started, and entitlements are expected to be obtained by January 2025. The Cupertino site is located in a high resources area and may include educator workforce housing, special needs housing, and housing for families. The final target population will be determined by January 2025 when the project is expected to received final land use approvals. OSH worked proactively with the City of Cupertino to list the property on the City’s opportunity sites as part of their 6th cycle housing element update. ○ By June 2024, issue a Request for Offer to select an affordable housing development team for the Senter Road site in San José and the 8th and Alexander site in Gilroy. The Gilroy site will focus on affordable workforce housing for ag workers and homeless families. With all County-led sites, OSH can ensure that the County is addressing the disproportionate housing needs of lower income households of color. • By October 2024, select a development partner for the Gilroy and San José sites. Implementing actions include the issuance of the Request for Offer by June 2024 and convening a panel to review the proposals submitted by August 2024. Negotiate terms with the developer by September 2024. • By March 2025, execute Development and Disposition Agreements with the future selected development partners. • By June 2025, present recommendations to the Board of Supervisors for financing opportunities for the Cupertino, Gilroy, and San José sites.
GEOGRAPHIC SERVICE AREA	Countywide

FUNDING SOURCE	The funding sources vary. For a full list of funding sources used by the County, please refer to Program 1.01.
POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG1-5: Prioritize suitable county-owned underutilized parcels within Cities and Urban Service Areas for affordable, supportive and workforce housing development. • HG1(i) D: Continue consideration of publicly owned lands suitable for the construction of extremely low-income housing and develop a priority of county-owned sites suitable for housing development. • HG3-1: Local funds for housing shall be targeted to households earning less than 30% of the County median income and special needs populations. • HG3(i) B: Continue to use suitably located surplus publicly owned lands for housing affordable to extremely low-, very low-, and low-income households through the sale or lease of such land to a government entity, or to nonprofit or private home builders with appropriate terms and conditions guaranteeing long term affordability.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Availability of affordable units in a range of sizes • Lack of access to opportunity due to high housing costs • Location and type of affordable housing • Land use and zoning laws

Program 1.08 - Joint Development Memorandum of Understanding (MOU)

One of the contributing factors to fair housing issues is a lack of regional cooperation. To remove this impediment and accelerate the development of housing, the County developed a strategy that includes partnering with cities and other governmental agencies to achieve our common goals of building more affordable and supportive housing throughout the County. To date the most notable example includes a partnership between the County, the City of Los Altos, and the Midpeninsula Regional Open Space District. Through this partnership the City of Los Altos approved its first 100% affordable housing development which will include 90 new units of deed restricted affordable housing. While each MOU is slightly

different, the County has also teamed up with Destination: Home, which offers cities planning grants to help fill gaps within their teams. By working with cities, the County can leverage resources and work more effectively with affordable housing developers and address community opposition together.

Since 2020, the County has proactively been coordinating with local jurisdictions and other government agencies to develop new ways to partner to achieve common housing goals. The County has set a goal of developing at least one Housing Bond funded development in each of the 15 incorporated cities. As of November 2022, the County is still working with the remaining cities and the Joint Development Memoranda of Understanding is an opportunity to help facilitate those conversations.

Table 4.9: Joint Development Memorandum of Understanding (MOU)

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • By December 2024, wrap up conversations with Palo Alto, Campbell, Cupertino, and/or San José about the possibility of developing housing production strategies that can be memorialized in an MOU. Implementing actions include quarterly check-in meetings to discuss the benefits and possible terms of the MOU. Most importantly, the conversations will be guided by each jurisdiction’s 6th Cycle Housing Element Update. OSH will then pursue approval by each City Council and the Board of Supervisors. Assuming that an MOU is negotiated, OSH would then leverage the work captured under Program 1.01- Supportive Housing Development Fund Notice of Funding Availability to approve funding for the identified sites and projects. • By December 2024, conclude conversation with the Valley Transportation Authority about the possibility of amending the existing cost sharing agreement to add the Housing Sites at Hostetter Station as the fifth partnership site. To achieve this program objective, OSH will identify a potential funding source that can be leveraged in partnership with the VTA and pursue approval by the Board of Supervisors to execute an amendment to the MOU by June 2025. Once the MOU is amended OSH will work with VTA to take the following actions: <ul style="list-style-type: none"> ○ By January 2026, issue a Request for Offer to select a development partner. ○ By March 2026, kick off the community engagement process to solicit input from the community that will inform the design of the affordable and supportive housing project. ○ By December 2026, seek approval from the VTA Board for the final housing development project. ○ By June 2027, seek approval from the Board of Supervisors for additional project financing. ○ By February 2028, submit applications for funding including but not limited to federal and/or state tax credits. ○ By November 2028, start construction.
--------------------	---

	<ul style="list-style-type: none"> ○ By November 2030, complete the project and start operations.

Program 1.09 - Housing Trust of Silicon Valley

Housing Trust Silicon Valley (Housing Trust) is a nonprofit Community Development Finance Institution (CDFI) that makes loans to create and preserve affordable rental housing, housing for the homeless and persons with special needs, and provides loans for first-time homebuyers. Housing Trust is a unique public-private partnership created through the collaboration of the Silicon Valley

Leadership Group, County Board of Supervisors, and the County Collaborative on Housing and Homelessness. In response to community need, Housing Trust provides affordable housing opportunities through a variety of programs, including the Multifamily Lending Program and First Time Homebuyer Assistance Programs.

Table 4.10: Housing Trust of Silicon Valley

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • On June 27, 2023, the Board approved an amended contract with Housing Trust to continue supportive the County in administering Empower Homebuyer program. This agreement is connected with Program 1.04 - Empower Homebuyers SCC. Together these two programs help the County make homeownership for households who need downpayments assistance. Most recently after receiving feedback from the community and with the increase in interest rates, OSH worked with HTSV to modify program guidelines to remove barriers to entry into the program.
---------------------------	--

	<ul style="list-style-type: none"> By June 2026, amend existing agreement related to the Supportive Housing Fund to continue to offer below rate predevelopment and/or acquisition loans. <ul style="list-style-type: none"> Schedule meeting with HTSV after June 30, 2025, to evaluate the status of the county’s revolving funds and how much of the funding is obligated in a loan agreement versus how much of the funding has been expended to cover administrative costs. By June 30, 2026, develop recommendations relating to the future of the fund and how to continue leveraging the funding to support the construction of new affordable and supportive housing. By December 2026, OSH will pursue approval from the Board of Supervisors to extend the existing agreement.

Program 1.10 - Santa Clara County CDBG and Housing Coordinators’ Convenings

Participate and host monthly meetings to discuss topics intended to further the goals of additional affordable and equitable housing. Involvement of the 15 incorporated cities further the regional approach to further housing objectives and address fair housing issues. Primary contributing factors to fair housing issues include community opposition and a lack of regional cooperation. These convenings offer the County and the 15 incorporated cities a forum to collectively discuss issues that include but are not limited to land

use and zoning laws, integrated housing for individuals who need supportive services, and development of local housing strategies that increase access to safe and stable housing.

Historically these convenings have afforded collaboration, support and technical assistance to help expand inclusionary housing and commercial linkage fee policies, coordinating efforts around tenant protection ordinances (i.e., source of income), emergency shelter crisis and joint funding applications. During the 6th cycle Housing Element planning period, the County anticipates a regional approach to implementing goals that various cities have included in their

respective Housing Element update. For instance, the County is currently working with the City San Jose to provide input and feedback on two tenant protection ordinances related to anti-displacement and tenant preferences.

Table 4.11: Santa Clara County CDBG and Housing Coordinators’ Convenings

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> Over the 2023-2031 period, host monthly meetings and introduce new topics intended to partner and provide technical assistance to the 15 incorporated cities within the county address housing and homelessness concerns. The objective of these convenings is intended to increase regional collaboration and to create a space where local jurisdictions can learn from each other. OSH’s goal is to build a network of city staff that can work collaboratively to achieve a common goal of addressing the needs of the county’s most vulnerable populations and find ways to support each other’s efforts. OSH’s role in these convenings is to provide technical assistance, share funding opportunities, serve as the lead application for new funding opportunities, and increase coordination amongst the cities in the county. Ensured that every eligible city in Santa Clara County (San José, Palo Alto, Mountain View, Sunnyvale, and Milpitas) accesses the Permanent Local Housing Allocation in December 2023. An implementing action includes to continue to serve as the PLHA consortium lead. Currently the County is the consortium lead for the cities of Cupertino, Gilroy, and Santa Clara. To facilitate this partnership, OSH has developed a menu of services consistent with the Santa Clara County PLHA plan priorities. OSH will provide technical assistance to cities interested in pursuing joint funding application. The remaining cities participate directly through the County. Coordinate discussion related to nexus studies, inclusionary housing, and tenant protections. One potential outcome of these conversations may include sharing costs of these studies at the regional level. Work with the Town of Los Gatos and the City of Saratoga to identify at least one affordable housing development in their jurisdiction by December 2025 and/or efforts to address the growing housing insecurity amongst older adults. Work together to develop a robust housing production and preservation strategy. OSH will achieve this objective by meeting with each city to discuss potential sites that are prime for the development of affordable and supportive housing. In addition, OSH will work closely with the cities of Mountain View and San Jose to develop an engagement plan related to the creation of a county-wide preservation strategy by December 2025.

Program 1.11 Internal County Coordination of Housing Funds and Services

To end homelessness in our community, we must address its root causes. This program includes coordination with various county departments and agencies to leverage critical housing dollars for the county’s most vulnerable residents. Strategy 1 of the 2020-2025 Community Plan to End Homelessness is focused on addressing the root causes of homelessness through systemic and policy change including any regulatory barriers that prevent people from accessing critical supportive services. This plan sets a five-year goal of reducing new unhoused individuals and families in a given year by 30%. The system we live in has created social, economic, and racial disparities and it will take monumental shifts in policies and priorities to make effective change. While eliminating these disparities across our community will take more than the five years covered by the Community Plan, we can make substantial progress towards this important goal by implementing the strategies below, which are

targeted to address the entrenched economic and societal causes of homelessness through transformational systemic and policy change.

Examples of the implementing programs under the Community Plan and subject to internal County coordination include but are not limited to the following:

- Permanent Supportive Housing for Public Safety and Justice: Through programming coordinated by the County of Santa Clara Behavioral Health Services Department, the County seeks to interrupt the complex feedback loop between homelessness and incarceration by connecting high-needs incarcerated individuals who would otherwise exit to homelessness without permanent supportive housing. The program employs a range of medical, behavioral health, and housing-related supports to reduce the rate of incarceration of individuals with serious mental illness and to address the social and health factors that can lead to further involvement with the justice system. This program serves 90 individuals annually with serious mental illness and a history of chronic

homelessness who would otherwise exit jail to the streets or emergency shelters.

- **Rapid Rehousing for Public Safety and Justice:** In partnership with the County of Santa Clara Office of Reentry Services, the County of Santa Clara Office of Supportive Housing offers a rapid rehousing program to address a significant risk factor for long-term homelessness in Santa Clara County by providing much needed linkages to housing and case management for persons experiencing homelessness who are reentering society after involvement with the criminal justice system. This includes leveraging AB 109 funds.
- **Bringing Families Home:** A common challenge among families involved in the child welfare system is the issue of housing instability. To be considered for family reunification, parents must be able to provide a safe and stable, though not necessarily long-term or permanent, living environment for the child. Temporary living arrangements, such as emergency shelters, transitional housing, and staying with friends and family, often cannot provide the type of stability that the child welfare system requires. This instability has

been shown to cause stress within families, which can persist for at least six months following reunification, and can increase the risk factors resulting in reentry to the child welfare system. In Santa Clara County, the Bringing Families Home program, a partnership between the Office of Supportive Housing and the Department of Family and Children Services, addresses these risk factors by providing stable housing to promote family reunification.

- Funded through a state legislative initiative targeted to families with connections to child welfare, the program provides rapid rehousing, including a rental subsidy and housing location services, to families at any point in the reunification process. This includes families with a child currently placed out of the home or families who have recently reunified who may be precariously housed, to assist them in achieving housing stability faster, exiting the child welfare system more quickly, and preventing re-entry.

Table 4.12: Internal County Coordination of Housing Funds and Services

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • Serve 1,000 justice involved people annually receiving housing assistance services through a partnership with the Office of Diversion and Reentry Services at the Reentry Resource Center. These programs include the Rapid Rehousing Exceptions Program and the Emergency Assistance Program. The County has an agreement with HomeFirst Services. In calendar year 2023, the program served 342 reentry clients with Emergency Financial Assistance. • Serve 250 households annually through the Wellness and Housing Stabilization Program in partnership with the Behavioral Health Services Department. This program is intended to serve households receiving specialty mental health services who are at imminent risk of becoming homeless. <ul style="list-style-type: none"> ○ On August 15, 2023, the Board approved a contract with Abode Services relating to providing homelessness prevention services for 235 individuals and families who are at risk of homelessness and currently enrolled in specialty mental health services. OSH will seek approval of the continuation of this program on an annual basis as part of the County's budget process.
--------------------	---

	<ul style="list-style-type: none"> Over the 2023-2031 period, attend monthly meetings with various County Departments to coordinate the programming of new housing funds and services. The purpose of these meetings is to continue to establish shared goals that are consistent with the Board’s priorities to address the disproportionate housing needs of ELI and VLI households of color. Annually report to the Board of Supervisors on the progress of these efforts. Identify primary points of contacts for each program. Given staff turnover, OSH will update contact information for each program on an annual basis to ensure continuity of the program without any disruption. This again is intended to remove governmental constraints that can limit access to housing and critical safety net services. Continue to provide education and training material to County departments about how to access housing services for homeless individuals and families including those at risk of becoming homeless. Remove regulatory barriers to providing housing and supportive services for persons with disabilities. through implementation of the CalAIM ECM and Community Supports By August 2024, negotiate amendments with the Managed Care Plans for Round 2 of one time Housing and Homelessness Incentive Program funds.

Program 1.12 - Coordinate with Bay Area Housing Finance Authority

The Bay Area Housing Finance Authority (BAHFA) is the first regional housing finance authority in California. Established by California State Legislature AB 1487 (2019, Chiu) to support the production and preservation of affordable housing by placing new revenue options on the ballot, BAHFA has the potential to raise hundreds of millions of dollars to help address affordable housing and housing stability in the Bay Area. One of the contributing factors to fair housing issues in

Santa Clara County includes a loss of affordable housing and lack of financial resources to support the preservation of existing housing. This program is intended to position the County to participate in regional discussions. The County will continue to provide information to BAHFA as it relates to the County’s housing development pipeline and lessons learned in the implementation of the 2016 “Measure A” Affordable Housing Bond and will participate in regional discussions about housing needs.

Table 4.13: Coordinate with Bay Area Housing Finance Authority

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • Participate in BAHFA convenings related to future ballot measures that would increase available resources for the production and preservation of housing. • Seek endorsement of the BAHFA Regional Housing Bond by the Board of Supervisors by September 2024 and develop an expenditure plan by February 2025. <ul style="list-style-type: none"> ○ Convene at least one community engagement meeting in each supervisorial district in partnership with the cities within the district. ○ Leverage Program 1.10 - Santa Clara County CDBG and Housing Coordinators’ Convenings to prioritize projects that serve ELI and VLI households who are severely cost burdened and at risk of displacement due to gentrification. • Bi-annually provide an updated housing development pipeline for Santa Clara County.

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG3-1: Local funds for housing shall be targeted to households earning less than 30% of the county median income and special needs populations. • HG3(i)A: Participate in intergovernmental efforts to secure federal and state legislation which will ensure adequate funding for, and other incentives, for the construction and preservation of extremely low-, low-and moderate-income ownership and rental housing. • HG6-1: Encourage the development of affordable housing that is suitable for a variety of special needs populations. • HG6(i) A: Seek expanded state and federal programs and funding to assist local government in developing special needs housing not provided through the private market.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Access to financial services • Loss of affordable housing

Program 1.13 - Supportive Housing and Innovation Fund

Established in 2018 with a \$50 million gift from Cisco, the Supportive Housing and Innovation Fund provides the private sector with a means to strategically partner with local government, leverage public funding, and share in a joint approach towards ending homelessness in our community. In late 2019, Apple also announced a \$50 million contribution to the fund. The Office of Supportive Housing works in

partnership with Destination: Home to implement the “Supportive & ELI Housing Development” program by vetting development proposals early and often to ensure that development proposals are being planned consistent with the County’s supportive and affordable housing production goals. Through this partnership the County has an opportunity to incentivize the development of affordable and supportive housing in high opportunity areas.

Table 4.14: Supportive Housing and Innovation Fund

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • In March 2023, provided Destination: Home with a list of eligible housing sites they will consider for funding. The housing sites are consistent with Program 1.01- Supportive Housing Development Fund Notice of Funding Availability (SHDF NOFA). • In September 2023, identified new funding applications for housing sites identified in partnership with Destination Home. Continue to provide housing development pipeline information and early input to developers seeking funding through the Supportive Housing and Innovation Fund on a quarterly basis. • Work with Destination: Home to raise \$25M in private philanthropy funding by 2026. <ul style="list-style-type: none"> ○ Destination Home will meet with at least four private philanthropic partners to raise private funding to supplemental local government funding. OSH will provide data and information about the Countywide housing development pipeline to demonstrate the use of the funds to support the construction of affordable and supportive housing.

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG3-1: Local funds for housing shall be targeted to households earning less than 30% of the county median income and special needs populations. • HG3(i) A: Participate in intergovernmental efforts to secure federal and state legislation which will ensure adequate funding for, and tax and other incentives for, the construction and preservation of extremely low-, low- and moderate-income ownership and rental housing.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Availability of affordable units in a range of sizes • Lack of access to opportunity due to high housing costs • Location and type of affordable housing • Loss of affordable housing

Program 1.14 - Fair Housing Assistance Program

Community input received through the planning process for, identified priority needs, and five-year goals established in the 2020-2025 Urban County Consolidated Plan drive how the County will allocate its federal CDBG public service funding. Community engagement through this planning process made it clear that fair housing is a priority need in the Urban County (i.e., Campbell, Los Altos, Los Altos Hills, Los Gatos, Monte Sereno, Morgan Hill, Saratoga, and the unincorporated areas of the County, including those in San José). As such, the County prioritizes fair housing education and services to help lower-income families and individuals in the Urban County to obtain and keep their housing and redress fair housing claims.

The County will utilize its CDBG public service funding to enable a community-based organization to provide tenant-landlord and fair housing services to Urban County residents. These services will include three key types of programs: education for community members and service providers; investigation of fair housing violation claims; and advocacy on behalf of lower-income, special needs, and disabled community members so they may obtain disability-related accommodations, preserve their housing subsidies, and/or resolve disputes to obtain new or keep their existing housing. The Fair Housing Assistance Program will also provide a forum for local governments and community-based organizations to share information about new and proposed tenant protections and programs that further fair housing.

Table 4.15: Fair Housing Assistance Program

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • Annually pursue approval by the Board of Supervisors to allocate CDBG funding to service provider Project Sentinel to enable it to assist Urban County residents by providing the following: <ul style="list-style-type: none"> ○ Serve a minimum of 67 lower-income persons with fair housing complaint investigation, information and referral, and/or advocacy services and 50 community members through outreach and education. • Between the summer of 2024 and spring of 2025, engage community members and community-based organizations through the 2025-2030 Consolidated Planning process about priority needs; evaluate CDBG public service allocations; and incorporate modifications to this program as needed. • On an annual basis have a service agreement in place each July to enable the community-based organization to provide this program’s specified services. Action to achieve this goal include completion of a competitive procurement process by Fall 2024 for a new five-year agreement that would start July 1, 2025 (FY 2026). • Over the 2023-2031 period, meet on a quarterly basis with the community-based organization awarded the service agreement to review and, if necessary, collaborate to amend their community engagement and client services plans to help ensure that they achieve service agreement deliverables. • Over the 2023-2031 period, host meetings and meet on a quarterly basis with other local governments and community-based organizations, including non-profit legal services providers, to share information about fair housing and other tenant protections and programs that help lower-income tenants obtain and keep housing. •

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG5-1: The County shall continue its work to enforce laws and foster policies and programs aimed towards preventing discrimination against people of protected status under federal and state law. • HG5-2: Fair housing services shall be available in all parts of the county. • HG5(i) B: Fair housing services shall continue to offer standardized protection and outreach services throughout the county. • HG5(i) C: Fair housing services provided shall be respectful of language, culture, and special needs. • HG5(i) D: Continue to support organizations active in ensuring the rights of all persons to obtain and retain housing.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Access to transportation for persons with disabilities • Availability, type, frequency, and reliability of public transportation • Lack of access to opportunity due to high housing costs • Displacement of residents due to economic pressures

Program 1.15 - Fair Housing Audit & Education Program

Fair Housing audits are conducted regularly by Project Sentinel, a long-standing fair housing organization serving Santa Clara County residents, to monitor the presence and prevalence of housing discrimination based upon protected classes under both Federal and State fair housing laws.

Project Sentinel’s Civil Rights Investigation Coordinators train testers in all classes of fair housing protection and design specific tests to conduct audits. Testers are dispatched to residential sites and conduct phone inquiries about available units, posing as home seekers of different protected classes to uncover disparate treatment. Audit results from tests performed help to determine whether a property provider is discriminating against a certain group of people, such as people with disabilities who use service animals. They can also help to determine if new multi-family housing meets accessibility standards, or if families with children are denied housing opportunities in contravention of fair housing and other tenant protection laws.

Audit results are then used to evaluate and/or address claims of fair housing and tenant protection violations, as well as shape outreach-education campaigns. Social media campaigns, flyers, brochures, and educational presentations and workshops are formulated to address forms of housing discrimination. The education of property owners and property managers, along with residents, is key to elevating awareness about fair housing protections to remedy housing discrimination.

This program, as well as the previous one (program 1.14, Fair Housing Assistance Program), serve many special needs populations, including people with disabilities, veterans, victims of domestic violence, immigrants, seniors, and those with criminal histories. This program’s outcomes compliments and informs Program 1.14 activities, including community engagement.

The County does not currently fund this Project Sentinel program. Through the Urban County’s 2025-2030 Consolidated Planning process, the County will engage community members and community-based organizations to learn if this program is a priority need and, if it is so identified, pursue monetary and non-monetary resources to support this program

Table 4.16: Fair Housing Audit & Education Program

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • Project Sentinel will train testers, conduct audits, design effective outreach campaigns, and educate residents, housing providers and property managers about fair housing protections. • Project Sentinel will represent, and/or coordinate experienced legal representation of, bona fide plaintiffs where investigation has produced evidence of a meritorious fair housing case. • During 2023-2031, this program will conduct 32 audits, work on 48 cases, provide education material to 450 people, and assist with or file 3 enforcement cases when warranted by evidence of discrimination. • During community engagement for the Urban County’s 2025-2030 Consolidated Plan, the County will engage with community members about whether the work under this program is a priority need in the Urban County.
--------------------	---

	<ul style="list-style-type: none"> • If identified as a priority need during the 2025-2030 Consolidated Planning process, the County will pursue state and federal funding and non-monetary resources to support this program. • .

CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Private discrimination • Lending discrimination • Lack of local public fair housing enforcement • Lack of local private fair housing outreach and enforcement

Program 1.16 – Collaborate with the Santa Clara County Housing Authority (SCCHA)

The Santa Clara County Housing Authority (SCCHA) was established by the County Board of Supervisors to administer a federal rent subsidy program administered under the Federal Housing Act of 1937. SCCHA’s mission is to provide and inspire affordable housing solutions to enable low-income people in Santa Clara County to achieve financial stability and self-reliance. SCCHA has constructed, rehabilitated, and/or served as developer for over 30 affordable housing developments. SCCHA currently owns 31 housing projects serving families, seniors, persons with disabilities, and the homeless within the county.

As a Moving to Work (MTW) demonstration agency, SCCHA also strives to meet the following three MTW statutory goals established by Congress:

- Decrease administrative costs and increase cost effectiveness in housing program operations,
- Promote participants’ economic self-sufficiency, and
- Expand participants’ housing choices.

SCCHA utilized its MTW flexibility to facilitate expansion and improve program efficiencies, such as streamlining the Section 8 Project Based Voucher Program (PBV) competitive process and raising the maximum share of units that can be project-based, from 20% to 40% of SCCHA’s total authorized units. The PBV is a component of the Housing Choice Voucher Program (HCV). SCCHA may allocate up to 40% of its voucher assistance authority to specific housing units. In

the Project Based Voucher (PBV) program, rental subsidies are attached to contracted units for a period of typically 20 years. Eligible low-income tenants typically pay about one third of their monthly income for rent.

SCCHA’s designation as an MTW demonstration agency has afforded our community the opportunity to establish a preference for chronically homeless individuals and families. One of the County’s housing priorities is to increase supportive housing for chronically homeless and other special needs populations. In order to be successful, special needs populations require that affordable housing and ongoing support services be provided in a coordinated manner. While the County and its partners should support increasing affordable housing for all residents, special needs populations (e.g., extremely low-income seniors, extremely low-income individuals with a serious mental illness, and chronically homeless persons) will likely access supportive housing only through carefully planned programs.

In 2011, SCCHA established the Chronically Homeless Direct Referral Program (CHDR) and allocated 200 Section 8 Housing Choice Vouchers to CHDR. In 2012, SCCHA allocated an additional 100 vouchers to CHDR, and in 2016 it allocated an additional 500 vouchers to CHDR. Today, this partnership includes a Special Needs Direct Referral program and a streamlined procurement process in alignment with the County’s Supportive Housing Development Fund Notice of Funding Availability (SHDF NOFA) (Program 1.01). Most recently the SCCHA has been focused on exploring a combination of placed based investments and mobility programs.

Table 4.17: Collaborate with the Santa Clara County Housing Authority (SCCHA)

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • Over the 2023-2031 period, participate in monthly Section 8 coordination and operation meetings with SCCHA and the City of San José’s Housing Department to address barriers that voucher holders experience, streamline the lease up process, and explore policy changes that increase
--------------------	---

	<p>housing choice in high resources areas of the county. The purpose of these meetings is to ensure that households who are severely cost burdened are being connected to housing opportunities.</p> <ul style="list-style-type: none"> • In December 2023, developed a strategic spending plan for future rental subsidies and housing production pipeline consistent with the negotiated Memorandum of Understanding between the County and SCCHA. OSH and SCCHA in partnership with Destination Home and other key stakeholders will seek approval from the U.S. Department of Housing and Urban Development for a new 2025 – 2026 Move to Work Activity that will allow SCCHA to launch a new shallow subsidy program targeting ELI and VLI households who are cost burdened in existing affordable housing developments. The intent of the program is to ensure that households are not paying more than 30% of their income but that the development has enough funding to operate decent and stable housing. • Work with SCCHA on the development of a Mobility Program in alignment with HUD’s Mobility Demonstration Program that will be submitted to HUD in June 2024 with implementation beginning in January 2025. Because lower income households face greater instances of housing insecurity, this strategy is intended to better leverage rental subsidies to give families the opportunity to live in healthier communities with greater access to education and employment.
GEOGRAPHIC SERVICE AREA	Countywide
LEAD AGENCY	Office of Supportive Housing
FUNDING SOURCE	U.S. Department of Housing and Urban Development
POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG2-1: The County and the cities should work cooperatively to ensure that there is a balanced housing supply sufficient to achieve countywide economic, social, and environmental objectives. Further opportunities for inter-agency, intergovernmental, interregional, and public/private cooperation should be sought out and encouraged. • HG2(i) A: Maintain intergovernmental agreements to address countywide housing objectives and to ensure an adequate supply of affordable housing countywide. • HG3-1: Local funds for housing shall be targeted to households earning less than 30% of the County median income and special needs populations. • HG3(i) A: Participate in intergovernmental efforts to secure Federal and State legislation which will ensure adequate funding for, and tax and other incentives for, the construction and preservation of extremely low-, very low-, low- and moderate-income ownership and rental housing. • HG3(i) B: Consider using suitably located surplus publicly owned lands for housing affordable to extremely low-, very –low-, and low-income households through the sale or lease of such land to a government entity, or to nonprofit or private home builders with appropriate terms and conditions guaranteeing long term affordability. • HG6-1: Encourage the development of affordable housing which is suitable for a variety of special needs populations. • HG6(i) A: Advocate for the expansion of Federal and State programs and funding to assist local government in developing special needs housing not provided through the private market.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Access to publicly supported housing for persons with disabilities • Impediments to mobility • Lack of affordable, integrated housing for individuals who need supportive services • Lack of access to opportunity due to high housing costs • Lack of affordable, accessible housing in a range of unit sizes

Program 1.17 - Permanent Supportive Housing for Persons with a Serious Mental Illness

The current capacity levels for the Behavioral Health Services Department (BHSD) intensive outpatient programs (e.g., FSP, IFSP, etc.) can be used as an initial estimate of need for permanent supportive housing (PSH) program “slots.” Across all BHSD divisions, intensive outpatient programs have the capacity to serve about 1,700 individuals or households per year. BHSD and contractors estimate that about 90% of intensive outpatient program participants were homeless when referred to the program, had recently experienced homelessness, or have experienced multiple episodes of homelessness in their lives.

BHSD’s goal is to provide 1,500 units of PSH over the next two and a half years. This strategy goal is consistent with the needs of intensive outpatient program participants, could reduce unnecessary utilization and management of temporary shelter and treatment programs and improve health outcomes for program participants,

and aligns with the 2020-2025 Community Plan to End Homelessness. Some PSH capacity will be met by leasing existing housing units, while others will be met by developing new housing units. Housing units include apartments, shared single-family residences, and semi-congregate settings. Since licensed residential care facilities (RCFs) serve a subset of individuals who need PSH, RCFs are separated from other housing units. BHSD estimates that approximately 20% of PSH clients would need an RCF.

Of the 1,500 PSH units needed, the Administration has developed the following goals:

- Expand tenant based rental assistance programs to serve an additional 785 individuals or households;
- Construct at least 219 apartments that will be used as PSH for persons with a serious mental illness; and
- Develop or support the development of RCFs that will increase the system capacity by 171 beds.

Table 4.18: Permanent Supportive Housing for Persons with a Serious Mental Illness

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • By June 2024, enter into an agreement with a rental subsidy provider to expand tenant based rental assistance programs to serve an additional 785 individuals or households. • OSH will work closely with the County Administration and the Behavioral Health Services Department to understand the implementing actions of Proposition 1 which combine SB 326 (changes to the Mental Health Services Act) and AB 532 (The Behavioral Health Infrastructure Bond Act of 2023). By gaining a better understanding of the changes, OSH will be better prepared to identify funding opportunities that will yield additional PSH units for persons with a serious mental illness and the critical services needed to remain housed.
GEOGRAPHIC SERVICE AREA	Countywide
LEAD AGENCY	Office of Supportive Housing
FUNDING SOURCE	No Place Like Home, 2016 “Measure A” Affordable Housing Fund, California’s Community Care

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG1-5: Prioritize suitable county-owned underutilized parcels within Cities and Urban Service Areas for affordable, supportive and workforce housing development. • HG1(i) D: Continue consideration of publicly owned lands suitable for the construction of extremely low-income housing and develop a priority of county-owned sites suitable for housing development. • HG6-1: Encourage the development of affordable housing which is suitable for a variety of special needs populations. • HG6(i) A: Seek expanded Federal and State programs and funding to assist local governments in developing special needs housing not provided through the private market.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • State or local laws, policies, or practices that discourage individuals with disabilities from living in apartments, family homes, supportive housing and other integrated settings • Lack of affordable, integrated housing for individuals who need supportive services • Access to publicly supported housing for persons with disabilities

Program 1.18 - Tenant/Landlord Dispute Resolution Services

Community engagement for the 2020-2025 Urban County Consolidated Plan identified vital legal services and homelessness prevention as priority needs in the Urban County. In light of this, the County prioritizes CDBG public services funding for programs, including the Tenant-Landlord Services program, that address these needs in the Urban County (i.e., Campbell, Los Altos, Los Altos Hills, Los Gatos, Monte Sereno, Morgan Hill, Saratoga, and the unincorporated areas of the County, including those in San José).

The County currently funds Project Sentinel to provide services to Urban County residents through the Tenant Landlord Dispute Resolution Services program. This program helps lower-income families and individuals by providing them with information and referral, housing-related education and counseling services, and dispute resolution services that seek to prevent tenant displacement and homelessness. Specific services to be provided include the following:

- Providing information and referral services to approximately 600 callers on an annual basis.

- Opening and processing approximately 74 cases on an annual basis.
- Providing housing-related education and counseling, intervention, and dispute resolution to improve quality of life and prevent homelessness.
- Maintaining housing stability for individuals/families at risk of homelessness/eviction by intervening in disputes and helping negotiate a resolution.
- Empowering people through education and counseling to advocate on behalf of themselves.
- Educating tenants and housing providers to understand housing law.
- Intervening with lending institutions to assist households to avoid foreclosure.
- Working with housing industry groups to educate owners and managers on their obligations under fair housing and other tenant protection laws.

Services are provided to the following communities: Campbell, Los Gatos, Saratoga, Monte Sereno, Morgan Hill, and unincorporated San José areas.

Table 4.19: Tenant/Landlord Dispute Resolution Services

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> Annually, through FY 2025, and consistent with Board of Supervisors’ direction, allocate CDBG public service funds to service provider Project Sentinel to enable it to assist Urban County residents by: serving at least 600 people through information and referral and 74 lower-income persons through tenant-landlord services cases/casework (e.g., education and counseling intervention and dispute resolution) to reduce displacement and homelessness. Between the summer of 2024 and spring of 2025, engage community members and community-based organizations through the Urban County’s 2025-2030 Consolidated Planning process about priority needs; evaluate CDBG public service allocations; and incorporate modifications to this program as needed. On an annual basis have a service agreement in place each July to enable the community-based organization to provide this program’s specified services. Over the 2023-2031 period, meet on a quarterly basis with the community-based organization awarded the service agreement to review and, if necessary, collaborate to amend their community engagement and client services plans to help ensure that they achieve service agreement deliverables. Over the 2023-2031 period, host meetings and meet on a quarterly basis with other local governments and community-based organizations, including non-profit legal services providers, to share information about fair housing and other tenant protections and programs that help lower-income tenants obtain and keep housing.

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> HG5-3: The rights of tenants and landlords shall be recognized and protected, and opportunities for mediation of disputes shall be provided. HG5(j) E: Maintain tenant/landlord dispute mediation services in all areas of the county.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> Displacement of residents due to economic pressures

Program 1.19 - Eviction Diversion Program

The Eviction Diversion program is a collaboration between the County of Santa Clara; the City of San José and other cities in the

county; community-based organizations, like Sacred Heart Community Services and Destination: Home; non-profit mediation services and legal services providers; and the Santa Clara County

Superior Court to help community members at-risk of homelessness preserve their existing housing or transition to alternate housing opportunities. The goal of the program is to help tenants secure resources (e.g., case management, rental and other assistance resources, legal assistance, etc.), and help tenants and landlords access dispute resolution assistance, to prevent homelessness or help tenants transition to other housing opportunities. One of the County’s goals and strategies to affirmatively furthering fair housing includes collaboratively working with the Santa Clara County Superior Court and other partners to facilitate access to resources for vulnerable tenants engaged in eviction provisions.

The Eviction Diversion Program workshops coincide with the Superior Court’s unlawful detainer (eviction) calendar. Through these workshops, tenants are connected with resources (e.g., case management, rental and other assistance resources, legal assistance, etc.) to help them respond to and address landlords’ claims for back-rent owed and lack of compliance with rental rules. Tenants and landlords are also connected to dispute resolution assistance to aid these parties in developing workable solutions (e.g., payment plan for owed rent, unit repairs, etc.) that help keep tenants housed or transition to alternate housing opportunities. Through the Eviction Diversion program, cities and service providers meet on a monthly basis to provide eviction diversion and other resource updates and share best practices.

Table 4.20: Eviction Diversion Program

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • In January 2023, launched program to support the disproportionate housing needs of households at greatest risk of housing insecurity. • In June 2023, provided assistance to 60 households and complete first phase of the program. • By June 2025, secure additional funding to initiate a continuation of the program to serve 50 households a year. Implementing actions include seeking funding as part of the County’s Fiscal Year 2025 – 2026 Budget process.

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG5-4: Reduce displacement of low-income household tenants and increase tenant protections prior to evictions proceedings. • HG5(i) D: Continue to support organizations active in ensuring the rights of all persons to obtain and retain housing.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Displacement of residents due to economic pressures • Private discrimination

Program 1.20 - San Andreas Regional Center

The San Andreas Regional Center (SARC) is a community-based, private nonprofit corporation that is funded by the State of California

to serve individuals with an intellectual and development disability (I/DD) as required by the Lanterman Developmental Disabilities Act. SARC serves residents in four counties, including Santa Clara County,

and provides comprehensive support services, such as: case management, supported living or independent living, health and clinical supports, adaptive equipment and environmental modifications, day activities, and vocational services and supports. On Jun 15, 2020, the County and SARC entered a Memorandum of Understanding (MOU) to further coordinate funding and onsite services to help individuals obtain and retain permanent housing. The MOU with SARC describes each organization’s respective roles and responsibilities relating to: a) helping OSH clients experiencing homeless or who formerly experienced homelessness and who have

reported an I/DD to access SARC’s services; b) helping SARC’s clients who are experiencing or are at-risk of homelessness to access supportive housing or homelessness prevention services; and c) ensuring that individuals or families who move into County-funded housing units for individuals with an I/DD receive the services they need to obtain and maintain their housing, and live as independently as possible. One of the contributing factors to fair housing issues is access to publicly supported housing for persons with disabilities. This partnership aims to remove housing barriers and provide households with access to affordable, integrated housing.

Table 4.21: San Andreas Regional Center

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • By July 2024, convene a debriefing session with SARC and Alta Housing about the lease up process for Wilton Court in Palo Alto. • By July 2025, revisit SARC MOU to develop an annual report that summarizes the services delivered through the MOU and additional services provided to Santa Clara County residents. • Construct approximately 55 dedicated affordable housing units for persons with an intellectual and development disability by 2029. <ul style="list-style-type: none"> ○ Over the 2023-2031 period, quarterly track progress of the projects approved by the Board of Supervisors as part of this partnership to ensure construction is completed.
GEOGRAPHIC SERVICE AREA	Countywide
LEAD AGENCY	Office of Supportive Housing
FUNDING SOURCE	N/A
POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG5-5: Identify and increase access to services and other opportunities for residents of historically disinvested low-income communities (R/ECAPs and Burdened Households) across unincorporated county. • HG5(i) C: Fair housing services provided shall be respectful of language, culture, and special needs. • HG6-2: An adequate supply of affordable housing suitable for individuals at all stages of life should be available in every community. • HG6(i) B: Develop and implement policies and ordinances that create housing that is adaptable to the needs of physically, developmentally, and emotionally challenged persons.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Access to publicly supported housing for persons with disabilities • Lack of affordable, integrated housing for individuals who need supportive services • Regulatory barriers to providing housing and supportive services for persons with disabilities • State or local laws, policies, or practices that discourage individuals with disabilities from living in apartments, family homes, supportive housing and other integrated settings

Program 1.21 – Homelessness Prevention System

As a component of the Supportive Housing System, the Homelessness Prevention System pilot brings together a network of community partners to provide flexible financial assistance and resources for households in crisis, channeling support to families and individuals most at risk of losing their housing and preventing them from entering the homeless system. Under the leadership and coordination of Destination: Home, the Homelessness Prevention System pilot re-envisioned the community’s approach to preventing homelessness. In Year 1, the annual budget was \$1.6M and helped serve 215 households. In Year 6, the annual budget is \$16.9M and the system has the capacity to serve 1,600 households. Over the past five years, the HPS Pilot has served 12,367 individuals from 4,455 households at imminent risk of homelessness.

This pilot program streamlines access to essential resources for families in crisis, targets resources to those most at risk of homelessness, and uses data to measure the collective impact of the prevention system. The agencies participating in the Homelessness Prevention System pilot use a standard assessment tool to target resources to households with the highest risk of homelessness. The use of a single intake assessment allows the system to better identify which households are most likely to experience homelessness, and to prevent it. As a coordinated system with standardized data collection requirements, the Homelessness Prevention System pilot will provide a rich source of information about the nature of housing crises in Santa Clara County and which tools are most effective at permanently stabilizing housing for at-risk families.

Table 4.22: Homelessness Prevention System

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • In March 2023, amended the existing contract to add additional funding to support more families in need. • In July 2023, increased system capacity to serve 1,700 households. It is estimated that a total of 13,600 households will be assisted during between 2023 and 2031. • Issued a Joint Request for Proposals in January 2024 to select a system administrator and network partners. • In May 2024, received approval from the Board of Supervisors to continue the program to serve households with housing insecurity who are at risk of becoming homeless. • By July 2024, launch new County-led Homelessness Prevention System with the capacity to serve 2,500 households by combining efforts into one overarching prevention strategy • Over the 2023-2031 period, annually work with Destination Home to host quarterly investor briefing sessions to secure additional resources for all homelessness prevention programs.

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG7-1: Expand homelessness prevention programs to support individuals and families most at risk of becoming homeless. • HG7(i) A: Transition the Homelessness Prevention System Pilot into an ongoing housing intervention within the Supportive Housing System and continue to secure public and private funding to provide assistance to 2,500 households annually.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Displacement of residents due to economic pressures

Program 1.22 – Emergency Assistance Network

The Emergency Assistance Network (EAN) agencies in Santa Clara County provide eligible households with emergency financial assistance in order to prevent homelessness. Eligible households include those who are at imminent risk of becoming homeless and have income below 50% of Area Median Income, those who have not received emergency financial assistance in the previous 12 months, and households who have sufficient household income to maintain

housing after receiving emergency financial assistance. In addition to financial assistance, the EAN provides emergency aid for rent, food, work-related transportation, medical expenses, or utilities. The EAN plays a critical role in providing low-income individuals and families with emergency funds to pay for rent, utilities, and other housing costs to prevent homelessness. In addition, households are connected to other service providers that can help individuals and families on the path toward self-sufficiency.

Table 4.23: Emergency Assistance Network

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • In March 2023, amended existing contracts to increase funding and issue Request for Proposals as required by the County for contracts that exceed a 5-year term. • In June 2023, made recommendations to the Board of Supervisors. • In July 2023, launched new five-year contracts serving up to 1,840 households annually. • In June 2024, approved agreements with the EAN’s to serve households in Fiscal Year 2024-2025. While the funding to support these programs is ongoing, OSH will seek annual approval from the Board of Supervisors to formally approve annual agreements with the EANs.
GEOGRAPHIC SERVICE AREA	Countywide

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • Policy HG7-1: Expand homelessness prevention programs to support individuals and families most at risk of becoming homeless. • HG7(i) A: Transition the Homelessness Prevention System Pilot into an ongoing housing intervention within the Supportive Housing System and continue to secure public and private funding to provide assistance to 2,500 households annually.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Access to financial services • Displacement of residents due to economic pressures

Program 1.23 – City Revenue Agreements

In order to expand the capacity of the Supportive Housing System, the County has pooled resources from various cities. These partnerships increase efficiency and reduce the duplication of services throughout the county. The funded services continue to

prevent and reduce homelessness throughout Santa Clara County. The programs supported by these revenue funding sources are aligned with the goals of the 2020-2025 Community Plan to End Homelessness and promote racial equity in homeless services by increasing the availability of community-based supportive services throughout the County.

Table 4.24: City Revenue Agreements

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • In May 2023, presented cities with a menu of options of services they can fund. • By September 2023, finalized list of services for each housing intervention type. • By December 2023, received confirmation from interested cities. • In the first half of 2024, presented funding recommendations through the County's budget process. • By July 2024, begin to administer expanded programs. • Starting in July 2023, provide supportive services for 180 chronically homeless households from San José. Assuming funding continues annually through 2031, this Revenue Agreement with the City of San José would serve 1,620 chronically homeless households from San José. Implementing actions include seeking approval from the San José City Council as part of their annual budget approval process and subsequent approval from the County Board of Supervisors. These actions will continue annually through 2031. • Starting in July 2023, serve 400 homeless households from San José through a centralized hotline for individuals and families seeking shelter services or shelter diversion services. Assuming funding continues annually through 2031, this Revenue Agreement with the City of San José would serve 3,600 homeless households from San José. Implementing actions include seeking approval from the San José City Council as part of their annual budget approval process and subsequent approval from the County Board of Supervisors. These actions will continue annually through 2031. • Starting in July 2023, serve 20 households from the City of Santa Clara and 20 households from the City of Mountain View with permanent supportive housing services and rental assistance. Assuming funding continues annually through 2031, these Revenue Agreements with the cities of Santa Clara and Mountain View would serve 360 households. Implementing actions include seeking approval from the San José City Council as part of their annual budget approval process and subsequent approval from the County Board of Supervisors. These actions will continue annually through 2031. • Starting in July 2023, serve 133 vehicle dwellers from the City of Mountain View by providing homeless households a temporary, overnight, safe location to park, as well as case management support. Assuming funding continues annually through 2031, this Revenue Agreement with Mountain View would serve 1,197 vehicle dwellers. Implementing actions include seeking approval from the San José City Council as part of their annual budget approval process and subsequent approval from the County Board of Supervisors. These actions will continue annually through 2031.

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG7-2: Expand supportive housing programs, including permanent supportive housing and rapid rehousing programs. • HG7(i) B: Continue to collaborate with affordable housing developers, non-profit agencies, county departments, local and regional partners to expand the capacity of the supportive housing system.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Lack of affordable in-home or community-based supportive services

Program 1.24 - Community Plan to End Homelessness

The 2020-2025 Community Plan to End Homelessness will serve as our roadmap for ending homelessness in Santa Clara County and is organized around three main strategies: (1) Address the root causes of homelessness through system and policy change, (2) Expand homelessness prevention and housing programs to meet the need, and (3) Improve quality of life for unsheltered individuals and create healthy neighborhoods for all. The strategies included in this plan are grounded in evidence-based practices, lessons learned over the past five years, and robust conversations and input from more than 8,000 members of our community, including people with lived experience of homelessness, subject matter experts, key stakeholders, and community members. In addition, this plan sets aggressive targets designed to reverse the current growth in homelessness we are experiencing and bring us one step closer to our collective goal of eliminating homelessness in our community.

The plan’s focused goals are: (1) house 20,000 people through the supportive housing system, (2) achieve a 30% reduction in the annual inflow of people becoming homeless, (3) double temporary housing and shelter capacity to reduce the number of people sleeping outside, and (4) expand the Homelessness Prevention System and other early interventions to serve 2,500 households per year. The first two strategies of the plan seek to end and prevent homelessness for as many people as possible over the next five years. However, the

reality is that many people will remain unhoused due to an extreme housing crisis and increasing income inequality. To address this immediate crisis in our community and ensure healthy neighborhoods for all, we must begin by doubling our temporary housing and shelter capacity to serve 2,000 additional households each night; increase investment in health, safety, and other basic services to better meet the needs of people living in unsheltered conditions; and build connections to housing programs and safety net services offered throughout the county.

Implementation of the strategies in the Community Plan to End Homelessness will raise the voices of people with lived experience and share power with our unhoused and recently-housed neighbors. We will focus on policies and programs that reduce racial inequity, in an effort to reverse the disproportionately high rates of people of color who are unhoused. The County through its administration of Homeless Housing, Assistance and Prevention (HHAP) Rounds 3 and 4 funding have set various goals related to *“Underserved Populations and Populations Disproportionately Impacted by Homelessness” that are connected to each of the HHAP goals.*

The focus of this program is to report outcomes for the implementing programs that help the County and overall community meet the goals of the 2020-2025 Community Plan to End Homelessness. For instance, one goal is to “expand the Homelessness Prevention System and other early interventions to

serve 2,500 households per year” and one of the implementing actions is Program 1.21 – Homelessness Prevention System.

With this program as a roadmap, it is intended to work together and through a series of interrelated programs in the Housing Element to

accomplish its goals. Such programs include 1.11, 1.17, 1.23, 1.26, 1.27, and 1.28, which should be considered alongside and in conjunction with 1.24.

Table 4.25: Community Plan to End Homelessness

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • House approximately 3,200 people annually through implementation of the Community Plan to End Homelessness. Assuming the current reduction rate and the number of people served annually, we project housing 25,600 people between 2023 – 2031. <ul style="list-style-type: none"> ○ On February 2024, published the 2023 Community Plan to End Homelessness Progress report. Since 2020, our progress is as follows: <ul style="list-style-type: none"> ▪ 13, 817 people have been connected to stable housing. ▪ 19,575 people were placed in temporary housing and shelter. ▪ 28,235 people received homelessness prevention assistance. • Annually convene the strategy leads to develop annual focused implementation plans. These plans cannot be set in advance because there are a lot of factors that are taken into consideration when developing priorities. The purpose of this plan is to shape and guide our work through a collective impact model. Seek approval from the Continuum of Care Executive Board on the priorities for annual workplans. This includes, but is not limited to, the supportive housing system improvement work, supporting the work of the Lived Experience Advisory Board to improve service delivery, and the coordinated entry redesign work. Collectively these efforts are intended to continuously improve how unhoused individuals and families are served through the Santa Clara County Supportive Housing System. • In March 2023, issued Annual Progress Report for Year 3. • In March 2023, received notification from the U.S. Department of Housing and Urban Development on new grant applications that will increase the system capacity and allow the County to administer new programs. • In August 2023, issued the Mid-Year Progress Report for Year 4. • In January 2024, received notification from the U.S Department of Housing and Urban Development on new grant applications that resulted in \$7.9M more in funding over the prior year. • In March 2024, issued Annual Progress Report for Year 4. See above for latest progress report outcomes. • By September 2024, issue the Mid-Year Progress Report for Year 5. • By March 2025, issue the Annual Progress Report for Year 5. • In 2025, initiate the process to update the Community Plan to End Homelessness. Seek approval from the Continuum of Care Board on the community outreach and stakeholder engagement plan. Once a draft is developed, seek endorsement from the Board of Supervisors, the 15 incorporated cities, the Santa Clara County Housing Authority, the Valley Transportation Authority, the Santa Clara Valley Water Board, the various School and College Districts and other governmental and non-governmental partners. • By September 2025, complete the draft 2026-2031 Community Plan to End Homelessness, and adopt by January 2026.
--------------------	--

	<ul style="list-style-type: none"> In 2026, once the new Community Plan to End Homelessness is in place, will seek approval from each city on the development of a local implementation plan. OSH will offer technical assistance and support to each city either directly or through a consultant.

HG7(i) F: Promote the County's Service Enriched Emergency Interim Housing Challenge Grant by partnering with cities to help achieve the goals contained in the Community Plan to End Homelessness to double the number of temporary shelter beds. HG7(i) G: Raise the voices of people with lived experience and share power with unhoused and recently housed neighbors by including them in the decision-making process when making decisions about homelessness-related policies.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> Admissions and occupancy policies and procedures, including preferences in publicly supported housing Quality of affordable housing information programs Inaccessible government facilities or services Lack of local or regional cooperation

Program 1.25 – Temporary Housing Programs

While supportive housing programs—and building more units to increase the system’s capacity—are central to the community’s mission to end homelessness, the reality remains that individuals currently experiencing homelessness need programs and services that address their immediate needs. The supportive housing system includes a range of crisis response strategies, which help to identify and engage with at-risk or homeless households, prevent homelessness before it begins whenever possible, and provide

shelter and other basic needs to individuals and families experiencing homelessness. For many households, these programs are the first step back to stable housing, and each component of this housing crisis response system works in alignment with the community’s supportive housing programs and other permanent housing resources to help clients achieve long-term housing stability. The County manages 37 programs providing a variety of services and contracts for 22 shelters countywide.

Table 4.26: Temporary Housing Programs

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • By June 2024, the County will enter into new agreements to expand existing basic needs services and temporary housing programs. • Complete construction of the Palo Alto and San José Interim Housing sites that will result in a total of 308 new shelter units by 2027. <ul style="list-style-type: none"> ○ Construction of the Palo Alto Interim Housing site started in October 2023 ○ Construction of the San José Interim Housing site started in April 2023 • Given the recent budget reductions at the State level it does not appear that the County will receive funding for the Santa Clara Homekey project. The Office of Supportive Housing will need to identify a different funding source or find different opportunities to expand temporary housing options.

CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Displacement of residents due to economic pressures

Program 1.26 - Homekey Application Strategy

In July 2021, the County of Santa Clara challenged the 15 cities in our community to identify 10 possible Homekey sites that could be submitted as part of Round 2 funding. One of the biggest gaps we have in our Supportive Housing System is a lack of accessible shelter beds throughout the County. However, we have developed a strategy that places people who are enrolled in a housing program into interim housing while they are in housing search. Homekey has afforded our community with the opportunity to scale this work. Collectively, Santa Clara County has been awarded a total of \$222,104,646 in Homekey funding across 10 projects in Rounds 1 and 2 resulting in the following:

- 270 hotel rooms converted into 224 permanent affordable and supportive housing units; with 21 of those units for transitional housing;

- 283 hotel rooms rehabbed and used for emergency internal housing that will later be converted to permanent housing; and
- 412 new units of emergency interim housing using modular construction (LifeMoves at Mountain View, Palo Alto, and San José).

As new funding becomes available and is more competitive, the County and cities need to work collaboratively to develop a strategy for Round 3 that fills any remaining gaps and that is consistent with the Community Plan to End Homelessness strategies and goals. This strategy also affords the County to serve a lead local coordinator in addressing contributing factors to fair housing issues by ensuring the equitable distribution of shelters across the county that are close to transit, amenities, employment, and schools.

Table 4.27: Homekey Application Strategy

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • In January 2023, hosted community meetings across the County about the next round of Homekey funds. • Submitted two new projects Countywide for Homekey Round 3 in partnership with the cities of Santa Clara and San José. • Given the structural deficit at the State level, it is unlikely that the County or the City of San José will receive an award of Homekey Round 3. As such, our current focus is to ensure all Round 2 Homekey sites are delivered. <ul style="list-style-type: none"> ○ Construction of the San José Interim Housing site started in April 2023. ○ The Crestview hotel conversation began construction July 2023 and is expected to complete construction August 2024. ○ The Palo Alto Homekey Emergency Interim Housing began site work and construction in October 2023. ○ The Pacific Motor Inn Interim to Permanent Housing project began construction in January 2024.

Program 1.27 - Service Enriched Shelter Forgivable Loan Program

While the County continues prioritizing permanent housing developments and programs, the County recognizes the need to sustain and expand the emergency shelter and transitional housing system. Over the last three years, the County took extraordinary measures to increase operational funding for existing and new emergency shelter and transitional housing programs. These measures ensured that all major shelter and transitional housing facilities in Santa Clara County were available for use. One of the goals of the 2020 – 2025 Community Plan to End Homelessness includes doubling temporary housing and shelter capacity to reduce

the number of people sleeping outside. The purpose of the Service Enriched Shelter Forgivable Loan Program is to provide capital funding and operating subsidies to non-profit organizations, as sole applicants or in partnership with cities or other entities, to create new service-enriched shelters. Applicants are required to demonstrate cost savings and time advantages as compared to traditional shelter construction. The Service Enriched Shelter Forgivable Loan Program has been designed and is proposed as an over-the-counter application process whereby applications can be accepted and assessed on an ongoing basis. This enables prospective respondents to obtain a commitment early on and affords the County the opportunity to manage the production pipeline and leverage the State Homekey Program and other funding sources.

Table 4.28: Service Enriched Shelter Forgivable Loan Program

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • Complete construction of the Palo Alto and San José Interim Housing sites that will result in a total of 308 new shelter units by December 2027. <ul style="list-style-type: none"> ◦ Construction of the Palo Alto Interim Housing site started in October 2023 ◦ Construction of the San José Interim Housing site started in April 2023 • In March 2023, identified at least three new sites for funding and develop pathway for project approvals and funding. • Annually determine if additional funding can be set aside to reach the County’s goal of a \$40 million investment that would incentivize the construction of service enriched housing. Seek approval from the Board of Supervisors as part of the County’s Fiscal Year 2027-2028 budget cycle to secure new funding.

CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Access to transportation for persons with disabilities • Impediments to mobility

Program 1.28 - Lived Experience Advisory Board (LEAB)

Santa Clara County’s Lived Experience Advisory Board (LEAB) is a leadership development body consisting of members who are currently or previously unhoused. The LEAB serves as a platform for people who have experienced homelessness, especially people of color and LGBTQI+ persons, to provide meaningful input to improve the Santa Clara County’s supportive housing system. The County’s Continuum of Care and Destination: Home, among others, consult with the LEAB to center input from people who are currently or formerly unhoused in development of planning, like the 2020-2025 Santa Clara County Community Plan to End Homelessness and procurement processes. The LEAB’s consultation and advocacy work relating to improving the Santa Clara County’s supportive housing system serves community members with special needs, including community members who are low-income people of color, seniors, unhoused or at risk of becoming unhoused, female-headed households, large families, those with limited English proficiency,

children and youth, and individuals with mental or physical health disabilities.

The LEAB’s strategies include:

- Provide leadership opportunities for people with lived experience of homelessness to shape how we address homelessness in our community.
- Center the voices of people who have lived experience of homelessness, especially people of color, in the policy and program design decisions of the supportive housing system.
- Within the supportive housing system, incentivize hiring of people who have lived experience of homelessness to reflect the client population— especially people of color and LGBTQI+ persons.
- Provide opportunities for people who have lived experience of homelessness to provide peer-to-peer support.

Table 4.29: LEAB

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • In January 2023, kicked-off Supportive Housing System Improvement work including the work of LEAB. • By June 2024, develop a toolkit for the establishment of Tenant Association’s for every 100% Permanent Supportive Housing Development. • OSH will continue to work with the LEAB to make improvements to the supportive housing system. The County will continue its commitment of inviting LEAB members and others with lived expertise of homelessness to participate in funding decisions and policy changes.
--------------------	---

	<ul style="list-style-type: none"> Seek approval from the Board of Supervisors by June 30, 2024 to increase the County's support for the various participation stipends that are offered to LEAB.

HG7(i) C: Continue to support community-based organizations that provide services to the unhoused population. HG7(i) G: Raise the voices of people with lived experience and share power with our unhoused and recently housed neighbors.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> Lack of affordable in-home or community-based supportive services

Program 1.29 - Farmworker Affordable Homeownership and Farmworker Housing Pilot Program

Building on the progress made through the housing needs survey conducted during the 2015-2022 Housing Element planning period, the County is exploring the development of several new programs designed to 1) assist agricultural operators and landowners in providing housing for extremely low- and very low-income farmworkers, and 2) provide funding for either the rehabilitation of owner-occupied homes, mortgage assistance, and/or new home construction. HCD published a Notice of Funding Availability in January 2023 that included the Joe Serna, Jr. Farmworker Housing Grant (FWHG) Program. Eligible project types include both traditional homeownership and cooperative housing. In all cases, resale restrictions are required for a minimum of 20 years. Deferred FWHG loans are issued to buyers and a portion of the loans is forgiven each year, with loans being fully forgiven after 20 years. In addition to single-family homes, FWHG funding may also be used to develop projects involving multiple homeownership units, including single-

family subdivisions for lower-income agricultural employees and their families.

The Farmworker Affordable Homeownership component of the Program will first leverage funding from Program 1.06 – Below Market Partnership Program. Specifically, \$1 million in funding is set aside for mobile homes and manufactured housing. The County will work with the cities of Gilroy, Morgan Hill, and other stakeholders in South County to market the program to the farmworker community. The focus of this component of the program is primarily focused on individual households.

The Farmworker Housing Pilot component of the Program will focus on providing financing to help agricultural operators and landowners provide housing for “very low-income” farmworkers by creating new housing, rehabilitation or repairing existing housing, or replacing existing dilapidated mobile home units that have been used as farmworker housing at any time in the past. The focus of this component of the program is primarily focused on operators and landowners.

Together these two components are expected to meet an existing housing gap that cannot be achieved through high density multi-family housing development. In addition, on August 29, 2023, the Board of Supervisors directed the preparation of an Agricultural Worker Housing Workplan and, as a result of the Workplan,

additional agricultural worker housing programs may be launched by the County. The intent of this pilot program is to issue a total of 10 loans by 2031 and then determine the viability of scaling the program in future planning periods.

Table 4.30: Farmworker Affordable Homeownership and Farmworker Housing Pilot Program

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • Monthly monitoring of new funding available and quarterly meetings with potential developers interested in developing Farmworker Affordable Homeownership units. • By July 2024, develop program guidelines for the Farmworker Housing Pilot Program and share the draft with partners so that they can provide input and feedback. • By July 2024, soft launch of focused community engagement. Note that OSH will seek the list of stakeholders that are engaging in the countywide ag worker housing survey. OSH is participating in four community outreach events taking place in June 2024 with growers and seasonal and year-round ag workers. Through this effort OSH will be providing housing navigation services to ag workers to ensure they are provided with a safe and stable housing • By December 2024, circulate draft program guidelines for Farmworker Affordable Homeownership Program. Seek approval from the Board of Supervisors by April 2025. • By July 2025, soft launch of Farmworker Affordable Homeownership Program. • By December 2025, issue first loan and serve 10 households by 2031. • Ongoing: the County will continue to work with non-profit organizations to provide funding resources, as appropriate, and assistance with the production of housing for ownership and multifamily farmworker housing opportunities, focusing these efforts to areas that have access to transit, medical services, and education opportunities. • Ongoing: On an annual basis, the County will review the progress of this program, assessing the number of applications, building permits issued and loans made for farmworker housing.

CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Lack of access to opportunity due to high housing costs • Land use and zoning laws

- Location and type of affordable housing
- Location of employers

Program 1.30 - Asset Management Portfolio Expansion

The County, as a lender, is responsible for overseeing and monitoring the operation and financial performance of the affordable and multifamily rental projects that have been developed with financial and other forms of support from the County of Santa Clara. These projects serve a variety of low-income populations: families, seniors, disabled individuals, veterans, chronically homeless people, transition-age youth, and people with HIV/AIDS, among others. With the passage of the 2016 "Measure A" Affordable Housing Bond, the County's portfolio of loans is expected to grow substantially once the measure is fully implemented. It continues to be important that the County adequately service each loan, monitor each site for compliance, and closely review annual audits to ensure the County is receiving its fair share of residual receipts. There are several goals central to this program which ensure that all projects financed by the County are:

- Serving the intended low-income populations with affordable rents;
- Well-managed and provide decent, safe, and sanitary housing; and
- Financially sound and sustainable in the long term.

In performing its duties, the Office of Supportive Housing through the Asset Management Team acts as a steward of public resources and works to mitigate risk to the County's investments wherever possible. Furthermore, through this effort the County will preserve existing deed-restricted affordable housing by negotiating to extend the County's affordability restrictions in its existing portfolio.

The County, as a leader in advancing affordable housing production and preservation will work collaboratively with the 15 incorporated cities in the county to centralize efforts to preserve affordable housing that is at risk of conversion to market rate housing. For instance, in 2016 the County worked closely with the City of Sunnyvale and the Santa Clara County Housing Authority to develop a relocation strategy for households at risk of displacement from a housing development site with an expired restrictive covenant. Through this partnership, the County was able to find alternative housing options for several households that were not able to afford the new market rate rents. Successful management of the County's Loan Portfolio will result in additional financial resources through loan repayments that can potentially be used to preserve housing at risk of conversion through partnerships with other key regional stakeholders.

Table 4.31: Asset Management Portfolio Expansion

PROGRAM OBJECTIVES

- Selected a new vendor in June 2023 that will manage the data related to the County's single-family and multifamily loan portfolio.
- By June 2024, generate first draft of compliance reports and fund balance statements.
- Conduct annual monitoring and site visits of at least 25% of the County's property portfolio annually.

	<ul style="list-style-type: none"> • Service a total of 209 permanent deferred interest multifamily loans through 2031. • Over the 2023-2031 period, annually review the Subsidized Affordable Housing At Risk Report prepared by the California Housing Partnerships. • By June 2025, create a Housing Preservation Fund that can be funded through loan repayments the County anticipates receiving from residual receipt payments. Seek Board approval for new program by December 2025.
GEOGRAPHIC SERVICE AREA	Countywide
LEAD AGENCY	Office of Supportive Housing
FUNDING SOURCE	All housing production funds. See Program 1.01 for a list of funding sources
POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG9-4: Support retaining existing deed restricted affordable and supportive housing units. • HG9(i) C: Strengthen the County’s loan portfolio management system to track when existing affordable housing projects are eligible for syndication of their tax credits and work towards extending affordability terms.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Displacement of residents due to economic pressures; Loss of affordable housing

Program 1.31 – Minor Home Repair and Maintenance

The County will continue to provide funding to assist low-income owner-occupied residents with minor home repair and maintenance services. The County proposes to continue its partnership with Rebuilding Together Silicon Valley (RTSV), who offers repair and rehabilitation assistance to low-income, urban County residents who are owner-occupants, particularly the elderly and disabled. All repairs are provided free of charge to the homeowner. Primary efforts include the “Safe At Home Program” and “Rebuilding Days.” Program assistance addresses home safety repairs, fall prevention, accessibility and mobility, aging in place, weatherization, and home and fire safety of owner-occupied residences. The County plans to continue funding RTSV to further several goals in the 2020-2025 Urban County Consolidated Plan that identify the County’s housing and community development priorities: preventing and reducing homelessness,

preserving existing affordable housing, and providing essential services to special needs populations. This program expects to complete repairs on 45 homes per year during the 2023-2031 planning period.

Table 4.32: Minor Home Repair and Maintenance

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> Over the 2023-2031 period, annually, by April, present funding recommendations to the Housing and Community Development Advisory Committee (HCDAC) to approve the continued funding of this program. Annually, by June, present funding recommendations to, and seek approval from, the Board of Supervisors. Annually, by July, begin offering services to the eligible households. Both the HCDAC and the Board of Supervisors approved OSH’s request for Fiscal Year 2024-2025 and the application has also been submitted to the U.S. Department of Housing and Urban Development. As in prior years, this program will begin offering services on July 1, 2024. Provide minor home repair and maintenance services to 45 households annually and approximately 400 between 2023 and 2031.

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> HG6-2: An adequate supply of affordable housing suitable for individuals at all stages of life should be available in every community. HG6(i) C: Maintain existing programs to provide “Housing for All Ages,” including housing for multigenerational households. HG9-1: The conservation and rehabilitation of the existing housing supply shall be encouraged and facilitated HG9-4: Support retaining existing deed restricted affordable and supportive housing units. HG9(i) A: Maintain ongoing programs for monitoring the physical condition of neighborhoods to assist in guiding rehabilitation program efforts, scheduling infrastructure maintenance activities, and to provide accurate information for Federal and State programs. Expand monitoring component to include rent price information.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> Lack of assistance for housing accessibility modifications

Program 1.32 – Community Development Corporation Grant Program

CDCs have three distinguishing characteristics: (1) nonprofit status under section 501(c)(3) of the Internal Revenue Code; (2) involvement in community development projects, usually with an emphasis on affordable housing expansion; and (3) a governing board composed in significant part of community members.

CDCs devote themselves to revitalizing the areas in which they are located. In most cases, these areas are low-income neighborhoods that have experienced significant disinvestment. While all CDCs aim

to improve the quality of neighborhood life, they may do so in a variety of ways, including by producing housing, promoting commercial development, regenerating open spaces, and/or administering support programs (such as employment services). Experts in community development have explained that one of CDCs’ main advantages over entities with similar missions is their ability to play multiple roles, including that of community organizer and project developer, when leading community development initiatives.

The County of Santa Clara’s (County) Community Development Corporation Grant Program (Grant Program) helps community-based organizations play more substantial roles in acquiring, developing,

rehabilitating, and/or managing properties to increase affordable rental and/or ownership housing opportunities (collectively, “affordable housing development”). Grant recipients are 501(c)(3) nonprofit corporations whose missions are to revitalize, build community among, and/or enhance the quality of life of residents in specific communities, neighborhoods, or small cities. Selected organizations would also be committed to including residents in decision-making at program-/project-, strategic, and organizational

levels. All recipients must use grant funds to increase their ability to undertake affordable housing development activities; however, the organizations may also undertake development activities that would increase economic, cultural, health, or social service resources in their communities. The capacity building grants would expand the network of community-based organizations capable of affordable housing development while giving residents more opportunities to shape the future of their communities

Table 4.33: Community Development Corporations

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • Work closely with the three Round 1 CDC Grantees (SOMOS Mayfair, African American Cultural Center, and the South Bay Community Land Trust to implement. • By December 2025 assist the African American Cultural Center with securing all the necessary funding for their signature project located at 2001 the Alameda in San José. • By June 2024, complete workplan for SOMOS Mayfair to help them acquire their first property. • By July 2025 select Round 2 CDC grant recipients.

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • Encourage homeownership opportunities for lower-income households. • HG1(i) C: Continue to implement new homeownership programs that provide an opportunity for lower-income households that would otherwise struggle to afford a home, furthering the equity and sustainability of homeownership.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Availability of Affordable Units in a Range of Sizes • Displacement of Residents Due to Economic Pressures • Loss of Affordable Housing

Program 1.33 – Expand Access to UPLIFT Program

The Universal Pass for Life Improvement From Transportation (UPLIFT) Program provides quarterly Valley Transportation Authority (VTA) transit passes for adults experiencing homelessness or who are at risk of losing their housing due to lack of transportation. The goal

of UPLIFT is to help people get housing or employment by improving access to public transit. The program, a partnership between and subsidized by the County of Santa Clara, VTA, and the City of San José, is operated at no cost to the clients or referring organizations. Since the inception of the UPLIFT Program in 2008, the program has

provided VTA transit passes for thousands of people experiencing homelessness or are at-risk of homelessness. These individuals receive ongoing case management from partner agencies, including shelter providers, homeless services agencies, community re-integration programs, vocational services providers, behavioral healthcare providers, and others.

The UPLIFT Program has seen growth in demand throughout the years. The number of partner agencies has increased from 28 in 2008 to 44 in 2023.

In addition to providing the valuable service of transportation, the UPLIFT Program also provides service to connect people to the community’s Coordinated Assessment System by requiring partner agencies to refer Clients who are literally homeless to the community queue for permanent housing programs.

Table 4.34: Expand Access to UPLIFT Program

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • Serve 2,500 homeless individuals and families quarterly. • In July 2023, updated the UPLIFT User Guide to ensure partners agencies are able to train new staff on the County’s process for accessing passes for their respective organization. • By July 2028 renegotiate an agreement with VTA relating to continued expansion of the UPLIFT Program
GEOGRAPHIC SERVICE AREA	Countywide

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG7-6: Continue to support feedback mechanisms that provide those with lived experience the opportunity to inform and shape improvements to the Supportive Housing System and the delivery of service. • HG7(i) C: Continue to support community-based organizations that provide services to the unsheltered population.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Access to transportation for persons with disabilities • Availability, type, frequency, and reliability of public transportation • Lack of access to opportunity due to high housing costs

4.03b Department of Planning & Development Programs

The Department of Planning and Development (DPD) balances the need for development with the environmental, social, safety, and other needs of the community and its residents. DPD meets these needs by adopting and enforcing community standards, ordinances, and codes approved by the Board of Supervisors. Additionally, DPD issues and monitors permits for various activities including activities as broad as parades, construction of new buildings, and mining to ensure compliance with standards and applicable laws. DPD also investigates any reported violations of codes and offers assistance and paths to compliance.

Program 2.01 - Housing Suitability and Prioritization Tool for County-Owned Properties

The County has prioritized facilitating the construction of more affordable housing countywide, including evaluating opportunities for building affordable housing on County-owned properties. The

County continues to examine opportunities to increase construction of seasonal and permanent farmworker housing to maintain the agricultural economy's viability.

To assist in this effort, the County applies a GIS tool to identify and facilitate low- and middle-income housing development opportunities for County-owned parcels as well as any identified opportunities to support housing development at higher densities in unincorporated county Urban Service Areas (USAs). To help identify and prioritize housing sites on County-owned parcels, the DPD developed an Affordable and Farmworker Housing Prioritization Assessment (AFHPA) tool for all County-owned parcels. The tool will be utilized to rank County-owned parcels on their suitability for housing. It will help other departments, such as the Office of Supportive Housing and the Facilities and Fleet Department, identify and prioritize County-owned parcels for housing development. The process for County-Led Housing Development is detailed in Program 1.07.

Table 4.35 Housing Suitability and Prioritization Tool for County-Owned Properties

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • By April 2023, the AFHPA tool was introduced to the Facilities and Fleet (FAF) Department and Office of Supportive Housing (OSH). • By June 2023, training was completed to utilize the tool and housing sites were subsequently identified. • By September 2024, initiate the community engagement process for the County-owned sites in Cupertino, San José, and Gilroy, in partnership with city partners that could yield a minimum of 617 new housing units that would be completed by 2031. • On February 6, 2024, the Board approved the selection of Eden Housing as the developer for the Cupertino site. One-on-one stakeholder engagement is underway, and entitlements are expected to be obtained by January 2025. The Cupertino site is located in a high resources area and may include educator workforce housing, special needs housing, and housing for families. The final target population will be determined by January 2025 when the project is expected to received final land use approvals. OSH worked proactively with the City of Cupertino to list the property on the City's opportunity sites as part of their 6th cycle housing element update that was recently certified by State HCD. • By June 2024, issue a Request for Offer to select an affordable housing development team for the Senter Road site in San José and the 8th and Alexander site in Gilroy. The Gilroy site will focus on affordable workforce housing for ag workers and homeless families. With all County-led sites, OSH can ensure that the County is addressing the disproportionate housing needs of lower income households of color.
--------------------	---

	<ul style="list-style-type: none"> By October 2024, select a development partner for the Gilroy and San José sites. Implementing actions include the issuance of the Request for Offer by June 2024 and convening a panel to review the proposals submitted by August 2024. Negotiate terms with the developer by September 2024. By March 2025, execute Development and Disposition Agreements with the future selected development partners. By June 2025, present recommendations to the Board of Supervisors for financing opportunities for the Cupertino, Gilroy, and San José sites.

Program 2.02 - Planning for Housing Development in Unincorporated USAs and Stanford University Lands

Since its inception, the County General Plan has been designed around foundational policies that aim to curtail sprawl and carbon emissions by focusing growth within urban, incorporated areas and urban parts of the unincorporated county, specifically within Urban Service Areas (USAs). To facilitate more cohesive development patterns between incorporated and unincorporated urban areas, the County’s General Plan sets forth three important strategies: 1)

Promote Eventual Annexation, 2) Ensure Conformity of Development with Cities’ General Plans, and 3) Provide Services as Efficiently and Equitably as Possible. These strategies guide County policy in urban unincorporated areas, which are presumed to eventually require annexation. The major exception to this is the Stanford University academic campus, which the County, the City of Palo Alto, and Stanford University agreed in 1985 would remain unincorporated.

Following from these strategies are a series of general land use management policies (see General Plan [Book B, Urban](#)

[Unincorporated Area Issues and Policies, U-LM 5 through 10](#)) that require the County to only accept an application for new residential development on a parcel eligible for annexation if the applicable city has stated that annexation has been considered and denied, and require major development applications to conform with city General Plan designations and accompanying standards and policies. In effect, these policies have resulted in the County conferring long-range land use planning for these areas to the applicable city, by following the city's lead for urban unincorporated areas and seeking conformance with city planning wherever possible.

Given the 2023-2031 RHNA target of 3,125 units for unincorporated areas, and specifically the ABAG methodology that includes unincorporated USAs in the analysis used to assign units to the County, the County must plan for housing in unincorporated USAs to accomplish the RHNA assignment and avoid conflicts with existing land use policies.

To plan for and facilitate major residential development in unincorporated USAs, the County was required to amend the above-mentioned General Plan policies. As a result of the amendments, the General Plan no longer requires multi-family and mixed used development in the Housing Opportunity Sites combining district to be in conformance with the city's long-range land use planning for selected sites, and the County Zoning Ordinance has been updated to restrict development on the County's sites inventory (including Stanford University Lands) to multi-family residential and limited mixed uses. This rezoning program, completed in December 2023, conforms with the provisions of California Government Code Section 65583.2 subdivision (c) and removes constraints to the development of such parcels. Section 3.75.040 of the County Zoning Ordinance now provides housing opportunity sites with the option to pursue a streamlined project review and approval by way of a Planning

Clearance, which conforms with the definition of "use by right" in California Government Code Section 65583.2 subdivision (i). Section 5.20.240 of the County Zoning Ordinance defines Planning Clearance as "a ministerial, nondiscretionary process for uses that require adherence to the Zoning Ordinance but for which no discretionary permit is required." To qualify for such processing, projects must meet objective eligibility criteria, including conditions and requirements for minimum levels of affordability. While the County's Zoning Ordinance was amended and compliant with State law in December 2024, in October 2024, the County adopted clarifying text edits to the Zoning Ordinance Chapter 3.75 to respond to HCD's comments.

As such, any future development on these sites would be required to comply with the combining district. If the developer proposes a specified number of affordable units, then the project will be reviewed and processed with a streamlined, nondiscretionary permit, as required under California housing law. If the application does not include the percentage of affordable units specified in the zoning ordinance to qualify for the streamlined, nondiscretionary permit, then a discretionary review of either Architecture and Site Approval (ASA) or a Use Permit is required, which can take 2 to 6 months. Although the discretionary review process is longer, it still allows for development to take place within the planning period.

All development standards applicable to the Housing Opportunity Sites are objective and were designed to ensure high-quality and equitable housing, and to provide basic amenities to all residences, while avoiding any subjective findings that may impose potential constraints on the project. All "-os" development standards may be modified pursuant to a development agreement approved by the County Board of Supervisors. Details can be found in Section 2.06f of this Housing Element and in Zoning Ordinance Chapter 3.75.

Of the sites selected for inclusion in this sixth cycle planning period analysis, only the Stanford University *Escondido Village* site is both considered non-vacant and was previously selected as a housing site (in the fourth cycle planning period). The two other Stanford sites (*Quarry Arboretum* and *Quarry El Camino*) were previously identified in the fourth and fifth cycles and were not developed during the fourth or fifth cycles.

Development on Stanford lands within the three locations identified in the Housing Sites Inventory follow the same process as other sites rezoned with the “-os” combining district. Should Stanford wish to, it may apply for the streamlined, nondiscretionary Planning Clearance, provided the application conforms with the objective standards established in the County’s updated Zoning Ordinance, as amended in December 2023 and November 2024. Stanford University may also pursue a discretionary review process through ASA (a separate Use Permit for structures on Stanford lands is not required because the existing zoning and existing General Use Permit allow for a variety of housing types and other uses pertinent to a large academic institution across the majority of the academic campus). While academic building space on campus is limited based on a General Use Permit, the County does not place any limitations on the amount of housing units or square footage of housing that Stanford may construct, whether within the three housing inventory sites or elsewhere on the academic campus.

Stanford University will determine the timing of any application submittal based on an assessment of housing needs at that time; however, the Stanford Community Plan (updated in 2023) is clear in its requirements for Stanford to provide adequate housing to students, educators, staff, and other workers, commensurate with the University’s plans for expansion. Streamlined, nondiscretionary permits could be issued in as few as 30 days after the application is

submitted, while projects requiring an ASA could take up to 6 months for approval.

The County holds monthly meetings with representatives of Stanford University and will use these in part to discuss any constraints or barriers Stanford University encounters when developing housing on these three sites. If these constraints or barriers persist, the County will explore options to remove them as part of the mid-cycle review process.

If an applicant chooses to develop housing on one of the County’s inventory sites (including Stanford) through the *discretionary approach*, the process will typically include the following steps:

1. Submittal of application materials.
2. Staff’s review of submitted materials (typically within 30 days).
3. A review letter issued by staff either requesting more information or deeming the application complete.
4. When the application is deemed complete, the application is scheduled for a public hearing before either the County Zoning Administrator for ASA permits, or the Planning Commission for Use Permits.
5. Once the Zoning Administrator or Planning Commission approves the application, the developer must wait an additional 15 days until the appeal period is completed. If an appeal is received, the appeal will be heard by either the Planning Commission (ASA permits) or Board of Supervisors (Use Permits).
6. If no appeal is received, the developer may submit their building permits for construction.
7. County staff will then review each building permit and provide comment on deficient areas or issue the permits.

8. Following issuance of the permits, County staff will conduct applicable inspections throughout the construction until the development is formally completed and ready for occupancy.

If an applicant chooses to develop housing on one of the County's inventory sites (including Stanford) through the *streamlined approach*, the process would typically include the following steps:

1. Submittal of application materials.
2. Staff review of submitted materials (typically within 30 days).
3. A review letter issued by staff either requesting more information or deeming the application complete.
4. When the application is deemed complete, the developer may proceed directly to submit their building permits for construction.
5. County staff will then review each building permit and provide comment on deficient areas or issue the permits.

6. Following issuance of the permits, County staff will conduct applicable inspections throughout construction until the development is formally completed and ready for occupancy.

The County is committed to conducting a mid-cycle review of the Housing Element (refer to Program 2.26). Given that Stanford lands have been assigned a significant portion of the County's projected development to meet its RHNA requirements, the County will pay particular attention to Stanford's development applications in the mid-cycle review. Should it become evident that Stanford will not produce the number of units that the County has projected before the end of the sixth cycle, the County will pursue additional strategies, which may include selecting additional sites and removing any additional barriers to housing development.

Table 4.36: Planning for Housing Development in Unincorporated USAs and Stanford University Lands

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • In December 2023, the County reviewed and amended: (1) the relevant strategies, policies, and implementation provisions of the County General Plan; (2) the relevant Zoning Ordinance provisions that implement these General Plan policies; and (3) the applicable zoning and land use designations for sites within urban USAs that have been identified for housing development to meet the County's obligation under RHNA during a housing planning cycle. • In November 2024, the County adopted clarifying amendments to the relevant Zoning Ordinance provisions. • Throughout the planning period, the County will meet monthly with representatives of Stanford University and explore options to overcome constraints and barriers to housing development. • The County estimates receiving an application for housing on the Stanford sites that qualifies for the streamlined, ministerial process, by June 2026, in which case the following projected schedule may apply, in accordance with the Permit Streamlining Act and Assembly Bill 2234: <ul style="list-style-type: none"> ○ By July 2026 (30-day review), staff review of submitted materials and issuance of complete letter/incomplete letter. ○ By September 2026 (60-day resubmittal), receive resubmittal from applicant addressing County comments. ○ By October 2026 (30-day review), deem application complete and issue conditions of approval.
--------------------	---

	<ul style="list-style-type: none"> ○ By November 2026, submit plan check application for building permit review. ○ By December 2026, issue building permits. ● By December 2025, and annually thereafter, the County will monitor the production of new housing units, evaluating the trend of development and levels of affordability in relation to the realistic capacity of sites analyzed and overall RHNA obligation for the planning period. <ul style="list-style-type: none"> ● If the County does not receive an application from Stanford by June 2026, the County will work with Stanford to facilitate the submittal of a housing development application. The County would pursue additional actions, including but not limited to, the selection of additional housing sites on Stanford Campus, rezoning, and/or permit processing improvements. See Program 2.26 (Mid-Cycle Review). ● By January 2027, the County will adopt any necessary changes to policies or ordinances that remove unreasonable constraints or barriers to housing development on sites listed in the Housing Inventory for the sixth cycle. See Program 2.26 (Mid-Cycle Review).

POLICIES AND IMPLEMENTATION	<p>HG1-8: Until a city annexes the unincorporated islands within its USA, the County will plan for housing development in these areas, as necessary to address Housing Element law during a planning cycle and Regional Housing Needs Allocations (RHNA).</p> <p>HG1(i) E: Amend General Plan and Zoning Ordinance to Plan for Housing in Unincorporated USAs</p>
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> ● Availability of affordable units in a range of sizes ● Lack of access to opportunity due to high housing costs ● Lack of affordable, accessible housing in a range of unit sizes ● Land use and zoning laws ● Location and type of affordable housing ● Location and type of affordable housing ● Loss of affordable housing

Program 2.03 – In-Lieu Fee Program for State Density Bonus and Affordable Housing

On October 3, 2020, the County adopted a Countywide Inclusionary Housing Ordinance for residential development of three units or more within the unincorporated lands of Santa Clara County. Any project subject to the inclusionary requirement can avail itself of existing density bonus provisions in Section 4.20.030 of the County's

Zoning Ordinance, consistent with the State density bonus requirements (California Government Code Section 65915, *et. seq.*), if eligible. Eligible projects can request a density bonus, waivers, or reductions in development standards that would physically prevent the project from being built, and incentives and concessions related to reduced development standards for parking, height, and setback requirements. As the County inclusionary requirement is set at 16%,

it is likely that many projects providing inclusionary units on sites pursuant to the requirements of the Inclusionary Housing Ordinance could be eligible for density bonuses and related incentives.

The County has not yet processed any projects of this type. The County’s Zoning Ordinance will be updated to include density bonus provisions, as needed.

Table 4.37: In-Lieu Fee Program for State Density Bonus and Affordable Housing

PROGRAM OBJECTIVES	The County will continue to comply with density bonus laws if and when an application is presented. The County will ensure developers of three or more units will deed restrict one sixth of all units for affordability or collect in-lieu fees to be used to support affordable housing efforts.

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG4-1: The County should continually review its land use and development procedures for opportunities to remove unnecessary constraints and provide new opportunities to fund the construction of affordable housing. • HG4(i) B: Inclusionary Housing Fee Program for Affordable Housing project types.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Location and type of affordable housing • Land use and zoning laws • Lack of affordable, accessible housing in a range of unit sizes • Availability of affordable units in a range of sizes

Program 2.04 – Assess Farmworker Housing Needs and Collaborate with Other Jurisdictions

In 2020, as an implementation measure of the Santa Clara Valley Agricultural Plan, the County adopted Zoning Ordinance amendments to streamline the planning approval process for agricultural employee housing. In furtherance of this effort, there are two components of this program.

First, the County will collaborate with other jurisdictions in the region to both: (a) share best practices from the County’s streamlining efforts thus far, and (b) grow the collective understanding of challenges facing farmworkers in the region and the capacity to

address those challenges. With support and partnership of ABAG, this work began in 2022 and is expected to continue through 2025.

Second, the County has found that additional work, beyond streamlined planning approval, is required to facilitate the development of agricultural employee housing and better meet the housing needs of farmworkers. Therefore, the County will conduct a comprehensive Farmworker Housing Needs Assessment.

The Housing Element currently relies upon data from Federal, State, and regional sources. Local data on farmworker housing is either imperfectly aligned with data needs or exists only in anecdotal form. A more thorough and localized Farmworker Housing Needs

Assessment will provide the County with a deeper understanding of the number of farmworkers that are present in the county and at what time of year; an understanding of the types and conditions of housing in which they live based on how they self-report this information; and an improved ability to address farmworker housing needs by creating affordable housing options.

In 2018, the Department conducted extensive public outreach and analysis on this topic through the development of the Santa Clara Valley Agricultural Plan. This effort included distributing farmworker housing needs surveys to farm industry and farmworker community representatives and evaluating related studies associated with nearby counties. This effort was not, however, a comprehensive Farmworker Housing Needs Assessment.

Farmworkers are considered a special needs population as they are challenged with finding affordable housing in and near their places of employment. This program will directly benefit this population.

This program will be closely coordinated with Program 2.04 and associated programs, including an Agricultural Worker Housing Workplan (Program 4.02) that the Board of Supervisors directed the preparation of at its meeting on August 29, 2023.

Lastly, on an annual basis, the County will identify new opportunities for facilitating the development of farmworker housing, for example in partnership with nonprofit developers (among others); see Program 1.29 for additional objectives related to funding resources and assistance with the production of housing.

Table 4.38: Assess Farmworker Housing Needs and Collaborate with Other Jurisdictions

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • By December 2024, the County will work begin working annually with ABAG and other jurisdictions in the region to share best practices and build capacity to address farmworker housing needs. • By December 2025, the County will complete a comprehensive Farmworker Housing Needs Assessment. • By December 2026, the County will pursue ordinance and policy amendments, as appropriate, to address farmworker housing needs. • Throughout the planning period, the County will coordinate efforts to address farmworker housing needs across departments, including but not limited to the following related program objectives: <ul style="list-style-type: none"> ○ Program 1.01 – <i>Supportive Housing Development Fund Notice of Funding Availability</i>: pursue approval of funding for new development proposals involving farmworker housing. ○ Program 1.05 – <i>Mortgage Credit Certificate (MCC) Program</i>: prioritize remaining MCCs for agricultural workers. ○ Program 1.07 – <i>County-Led Housing Development</i>: pursue approval of new farmworker housing within County-led development. ○ Program 1.29 – <i>Farmworker Affordable Homeownership and Farmworker Housing Pilot Program</i>: issue a total of 10 loans to farmworker households by 2031. • Program 2.01 – <i>Housing Suitability and Prioritization Tool for County-Owned Properties</i>: pursue approval of new farmworker housing on County-owned properties. • Program 2.14 – <i>Expanded Streamlining of Agricultural Employee Housing</i>: pursue Zoning Ordinance amendments to further streamline the production of agricultural employee housing.
--------------------	---

	<ul style="list-style-type: none"> ○ Program 4.02 – <i>Agricultural Worker Housing Workplan</i>: develop a comprehensive approach to addressing farmworker housing needs in the county. • Ongoing: the County will partner with developers to assist with farmworker housing site identification, work with growers to identify strategies, and periodically meet with developers and the agriculture industry to identify the constraints and solutions to development of farmworker housing, focusing these efforts to areas that have access to transit, medical services, and education opportunities. • Ongoing: On an annual basis, the County will review the progress of this program, assessing the coordination across departments, outreach programs and policy changes.

Program 2.05 – Rent Price Monitoring Program

At every Annual Housing Element Progress Report update, staff conducts research on the respective rental rates for various types of units throughout the unincorporated county compared to nearby jurisdictions. Rental rates continue to rise for the unincorporated county, as well as the region. The data presented each year serves to monitor existing conditions and bring awareness to the costs of housing in our community. Through the Annual Housing Element

Progress Report, the Board will be presented with data on rent prices by reporting, evaluating, and considering actions necessary to address significant changes in rental rates. DPD will continue to monitor rent prices countywide and in unincorporated county pockets. DPD will also track and present rent data that can act as indicators of the presence of rent escalation in urban unincorporated pockets associated with the City of San José’s Urban Villages planning process

Table 4.39: Rent Price Monitoring Program

PROGRAM OBJECTIVES	Annually, the department will provide to the Board of Supervisors in its Annual Housing Element Progress Report updates on rent prices and to consider actions necessary to address significant changes in rental rates.

LEAD AGENCY	Department of Planning and Development
FUNDING SOURCE	N/A
POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG9-1: The conservation and rehabilitation of the existing housing supply shall be encouraged and facilitated. • HG9(i) A: Maintain ongoing programs for monitoring the physical condition of neighborhoods to assist in guiding rehabilitation program efforts, scheduling infrastructure maintenance activities, and to provide accurate information for Federal and State programs. Expand monitoring component to include rent price information.

Program 2.06 – Streamline ADU Processing

Since the 2014 Housing Element update, zoning regulations have been revised pursuant to State law to permit conforming ADUs and JADUs as a matter of right, reducing the regulatory burden on property owners and streamlining the approval process in terms of both cost and time.

Since the implementation of the current ADU and JADU ordinance that was adopted in March 2020, 104 permits for ADUs and JADUs have been issued by the County.

The County will continue to consider additional minor modifications to certain standards for ADUS and JADUs to provide greater

flexibility and facilitate additional units as part of routine Zoning Ordinance review, and in accordance with any future amendments necessitated by state law. The County’s current ADU and JADU ordinance defers to Government Code Sections 65852.2 and 65852.22, as those laws may be amended from time to time. While the County may choose to further update the ADU provisions of the Zoning Ordinance, the County considers both sections to be compliant because they explicitly defer to the California Government Code if any provisions conflict with the local ordinance code.

Staff will also evaluate the use of pre-approved plans for ADU applications to streamline the development, and provide a menu of incentive options to the Board of Supervisors to consider adopting.

Table 4.40: Streamline ADU Processing

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • By December 2024, update and modify development standards in the County Zoning Ordinance for ADUs, JADUs, and subdivisions related to SB9, to ensure development standards are objective, aligned with current state law, and reported to the State Department of Housing and Community Development. • By December 2024, the County will complete pre-approved building plans for ADUs and on an ongoing basis (at least annually) provide education and promotion by proactively marketing the pre-approved ADU plans. • Ongoing: the County will monitor ADUs to track approval timelines and levels of affordability. • By December 2025, the County will pursue options to incentivize ADU construction, including but not limited to modifying development standards and seeking funding for ADU development. • By June 2026, the County will pursue Zoning Ordinance amendments to incentivize the construction of ADUs. • By December 2026, the County will review ADU construction rates. Should the number of units lag expectations, the County will pursue adopting incentives that will encourage additional ADU construction, such as grants offered by the state for the construction of ADUs.
GEOGRAPHIC SERVICE AREA	Unincorporated County, Countywide
LEAD AGENCY	Department of Planning and Development
FUNDING SOURCE	General Fund
POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG4-2: Review and reduce, where appropriate, regulations and processing procedures regarding the development of ADUs, JADUs and SB9 Units. • HG4(i) C: Monitor and modify development standards as needed, including the trends of ADU, JADU and SB-9 development, to ensure development standards are objective, and up to date with current State law and reported to the State Department of Housing and Community Development annually.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Location and type of affordable housing • Land use and zoning laws • Availability of affordable units in a range of sizes • Lack of access to opportunity due to high housing costs • Loss of affordable housing

Program 2.07 – Housing Adjacent to Transit

One of the County’s policies is to strongly support increasing the proximity of housing to transit. One tool is by working with local transit authorities such as, the Santa Clara Valley Transportation Authority (VTA) to locate housing within one-quarter mile walking distance of a transit station or stop to provide connectivity to

services (such as, schools, grocery stores, parks, etc.). Another policy is prioritizing construction of active transportation infrastructure (sidewalks, bicycle lanes, trails, etc.), and other amenities within existing unincorporated neighborhoods, illustrating how major arteries and thoroughfares can be retrofitted, redesigned, and

planned to promote shared access for bus ways, bicycling, multi-level mixed uses, and pedestrian improvements.

Table 4.41: Housing Adjacent to Transit

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • With an initial meeting by December 2024, meeting annually to coordinate with HCD and VTA in support of utilizing Senate Bill 791, to facilitate the development of surplus agency-owned land into housing. • With an initial meeting by December 2024, meeting annually to coordinate with cities and VTA to support streetscaping and similar policies. • December 2026, complete stakeholder mapping and coordination • August 2027, complete early community engagement • January 2028, complete developer selection • July 2029, complete entitlement, and financing • August 2031, complete construction and operation
GEOGRAPHIC SERVICE AREA	Unincorporated County, Countywide
LEAD AGENCY	Department of Planning and Development
FUNDING SOURCE	N/A
POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG1-7: Work with local transit authority(ies) to locate housing within one-quarter mile walking distance of a transit station or stop to provide connectivity to services (such as, schools, grocery stores, parks, etc.). Prioritize constructing active transportation infrastructure (sidewalks, bicycle lanes, trails etc.), and other amenities within existing unincorporated neighborhoods. • HG1(i) D: Continue consideration of publicly owned lands suitable as sites for the construction of extremely low-income housing and develop a priority of County-owned sites suitable for housing development.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Availability of affordable units in a range of sizes • Lack of access to opportunity due to high housing costs • Location and type of affordable housing • Land use and zoning laws • Lack of public investments in specific neighborhoods, including services or amenities

Program 2.08 – Santa Clara County Association of Planning Officials

The County and cities are encouraged to explore every feasible opportunity to assist developers in building more affordable housing projects. By working collectively with neighborhood residents, the

private sector, and community organizations to promote a diverse housing supply, the County and cities can capitalize on all the ideas, expertise, and untapped resources.

The County will regularly attend and support the Santa Clara County Association of Planning Officials (SCCAPO), which is a monthly meeting of planning officials from each jurisdiction in the county,

where planning issues of common relevancy are discussed. SCCAPO is also a forum where regional entities, such as ABAG, may address local jurisdictions.

Table 4.42: Santa Clara County Association of Planning Officials

PROGRAM OBJECTIVES	Through SCCAPO, establish ongoing workplans to expand intergovernmental process to achieve local and regional housing targets.
GEOGRAPHIC SERVICE AREA	Unincorporated County, Countywide
RESPONSIBLE AGENCY	Department of Planning and Development
FUNDING SOURCE	N/A
POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG2-1: The County and the cities should work cooperatively to ensure that there is a balanced housing supply sufficient to achieve countywide economic, social, and environmental objectives. Further opportunities for inter-agency, intergovernmental, interregional, and public/private cooperation should be sought and encouraged. • HG2-2: Intergovernmental and public and private cooperation shall be encouraged to achieve an adequate supply of affordable housing that meets changing demographic needs in Santa Clara County. • HG2(i) B: Establish and expand intergovernmental processes to more effectively define and achieve local and regional housing objectives. • HG2(i) C: Continue to support cross-agency integration of housing services within the County Departments through internal agency agreements. • HG4-1: The County should continually review its land use and development procedures for opportunities to remove unnecessary constraints to, and provide new opportunities to fund, the construction of affordable housing. • HG4(i) A: Identify and utilize a forum for sharing of best practices for removing governmental and nongovernmental constraints to housing development
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Displacement of residents due to economic pressures • Lending discrimination • Private discrimination • Source of income discrimination

Program 2.09 – Digital Tracking System for ADUs, JADUs & SB9 Units

With the increase in development of various housing options, such as ADUs, JADUs, and SB9 development, ongoing tracking and monitoring is needed to not only address any opportunities to

streamline housing but to also understand and report development activity. The County obtained a new online permit system, Accella, during the last Housing Element reporting period and is continuously working to improve its usability and tracking features. Once the system can automatically populate housing data and building

permits submitted for certain housing types, the County will be able to streamline reports and better monitor progress and patterns of development throughout unincorporated county.

Table 4.43: Digital Tracking System for ADUs, JADUs & SB9 Units

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> By June 2025, DPD will continue to work on refining the digital tracking system. January 2026, DPD anticipates posting housing data online via the public portal.

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> HG4-2: Review and reduce, where appropriate, regulations and processing procedures regarding the development of ADU, JADU, and SB9 Units. HG4(i) C: Monitor and modify development standards as needed, including the trends of ADU, JADU, and SB-9 development, to ensure development standards are objective and up-to-date with current State law and reported to the State Department of Housing and Community Development annually.

Program 2.10 – Joint Urban Development Policies

In the aftermath of the “annexation wars” in the 1960s, the cities, the County, and Local Agency Formation Commission (LAFCO) developed and implemented a system for urban growth management that has been in place since the early 1970s. These policies are the foundational growth management strategies guiding long-term land use for the urban areas and the rural unincorporated areas outside the USAs.

Table 4.44: Joint Urban Development Policies

PROGRAM OBJECTIVES	Continue to engage with LAFCO on ongoing land use growth policies and principles.
GEOGRAPHIC SERVICE AREA	Unincorporated County, Countywide
LEAD AGENCY	Department of Planning and Development

FUNDING SOURCE	County, Cities
POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG1-1: Planning for the supply and diversity of housing types in urbanized areas of the County shall include consideration for both current and projected employment, household income needs, and a variety of housing type. • HG1(i) A: Maintain and, where necessary, strengthen County and cities' joint land use policies and agreements that direct urban development to areas within city urban service areas. • HG9-3: The inventory of land zoned and suitable for residential development shall be maintained. • HG9(i) B: Maintain existing County and cities' joint land use policies and agreements that direct urban development to areas within city USAs and preserve rural areas for rural development.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Lack of local or regional cooperation

Program 2.11 – Update Zoning Ordinance for Re-use of Non-Residential Buildings to Residential

The underutilization of non-residential buildings can provide an opportunity to meet the dire need for housing by creating opportunities for adaptive reuse of non-residential buildings where single-family residential uses are allowed in the County Zoning Ordinance. Converting a non-residential structure to a residential use can come with challenges including setback requirements, height limitations, and parking requirements to comply with residential development standards. To address some of these challenges, the

County must update its Zoning Ordinance to allow adaptive reuse of non-residential buildings to a single-family residence without creating unnecessary hurdles while establishing secure and safe housing that meets single-family residential development standards.

The Zoning Ordinance amendment would be in line with existing anti-displacement efforts and may include incentives to encourage adaptive reuse for special needs populations, including persons with disabilities, large households, or female-headed households.

Table 4.45: Update Zoning Ordinance for Re-use of Non-Residential Buildings to Residential

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • By late 2027, initiate engagement with local development community to solicit barriers they may face in development. • By mid-2028, create recommendations for a Zoning Ordinance amendment. • Approved changes anticipated to be in effect in Winter of 2028.
GEOGRAPHIC SERVICE AREA	Unincorporated County, Countywide
LEAD AGENCY	Department of Planning and Development
FUNDING SOURCE	N/A
POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG4-1: The County should continually review its land use and development procedures for opportunities to remove unnecessary constraints and provide new opportunities to fund the construction of affordable housing. • HG4(i) D: Create opportunities for adaptive reuse of non-residential buildings where Single-Family residential uses are allowed in the County Zoning Ordinance. The County will remove barriers related to development standards, such as, providing exceptions to setbacks, building heights, and parking requirements, when a non-residential building is converted to a single-family residence.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Land use and zoning laws • Location of accessible housing • Regulatory barriers to providing housing and supportive services for persons with disabilities • State or local laws, policies, or practices that discourage individuals with disabilities from living in apartments, family homes, supportive housing and other integrated settings • Availability of affordable units in a range of sizes; Lack of access to opportunity due to high housing costs • Location and type of affordable housing; Loss of affordable housing

Program 2.12 – Monitor R/ECAP and Burdened Households Areas

Racially and ethnically concentrated areas of poverty (R/ECAPs) have become a policy focus for the U.S. Department of Housing and Urban Development (HUD). R/ECAPs are neighborhoods where residents are mostly people of color with lower incomes. State statute requires the Housing Element’s Assessment of Fair Housing to analyze R/ECAPs as well as racially concentrated areas of affluence (RCAAs).

Residents in neighborhoods with concentrated poverty tend to be secluded from resources and programs that could otherwise assist

them. Additionally, research shows that children living in neighborhoods with concentrated poverty have higher risks for adverse health outcomes, lower educational attainment, poor employment, and lower lifetime earnings.¹

By monitoring areas of concentrated poverty, the County can better assist in ensuring inclusion in housing development and ensures equal access to amenities, such as parks, grocery stores, quality schools, and employment centers.

Table 4.46: Monitor R/ECAP and Burdened Households Areas

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> By June 2024, the County collected necessary data to assess R/ECAP and burdened household areas and assess opportunities for improvement. On an annual basis, the County will continue to monitor R/ECAPs and burdened household areas and opportunities will be identified and available for the public and housing agencies to use, including through implementation of Program 2.29 – Place-Based Planning and Neighborhood Improvements.
GEOGRAPHIC SERVICE AREA	Countywide
LEAD AGENCY	Department of Planning and Development
FUNDING SOURCE	N/A
POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> HG5-5: Monitor and increase access to services and other opportunities for residents of historically disinvested low-income communities (R/ECAP and Burdened Households) across unincorporated county. HG5-6: Support cities in improving opportunities within neighborhoods and areas identified as R/ECAPs and/or neighborhoods with a majority of burdened households. HG5(i) D: Continue to support organizations active in ensuring the rights of all persons to obtain and retain housing. HG5(j) F: Monitor R/ECAP and communities with Burdened Households to identify areas of improvements that will increase access to amenities and resources, such as, but not limited to, transit, parks, groceries, and health facilities.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> Lack of public investment in specific neighborhoods, including services or amenities

¹ City of Anderson, Fair Housing Assessment, <https://www.cityofanderson.com/DocumentCenter/View/3897/Section-C---RE--CAP-Area-Analysis>, accessed 12/3/2022.

Program 2.13 – Universal Design in Housing Development

Universal design is also referred to as barrier-free design and focuses on making a house safe and accessible for everyone, regardless of

age, physical ability, or stature. Universal design in housing ensures a house is accessible for the users and their family and friends. It promotes safety to avoid injury and the ability to live independently despite any mobility changes throughout a lifetime.

Table 4.47: Universal Design in Housing Development

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • Take active steps to ensure compliance with accessibility design standards as required by the California Building Code, ADA Requirements, and Uniform Federal Accessibility Standards (UFAS). • Continue research on inclusion of universal design principles in accordance with State and Federal fair housing laws. • First quarter 2027, begin formulating options for universal design in new housing development and continue public review process. • By Winter 2027, complete applicable ordinance updates for improved accessible universal design principles.
GEOGRAPHIC SERVICE AREA	Unincorporated County, Countywide
LEAD AGENCY	Department of Planning and Development
FUNDING SOURCE	N/A
POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG6-4: Incorporate universal design principles into existing residential building standards. • HG6(i) B: Develop and implement policies and ordinances that create housing that is adaptable to the needs of physically, developmentally, and emotionally challenged persons.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Lack of assistance for housing accessibility modifications • State or local laws, policies, or practices that discourage individuals with disabilities from living in apartments, family homes, supportive housing and other integrated settings

Program 2.14 – Expanded Streamlining of Agricultural Employee Housing

Streamlined planning approval processes for agricultural employee housing in the unincorporated county were adopted in 2020. The approved Zoning Ordinance amendments include provisions for a variety of forms of agricultural employee housing, namely *Small-Scale Permanent, Large-Scale Permanent, Seasonal, and Temporary Agricultural Residences*. All four forms of agricultural employee housing are now subject to a streamlined planning approval process and available to property owners in all four rural base districts in the unincorporated county.

During the development and implementation of this effort, the County identified opportunities for further streamlining of the regulatory requirements and permitting process for agricultural employee housing, particularly those aspects outside of the planning-specific review of development applications – for example,

environmental health, fire safety, and road access. The County will continue to monitor the new processes and present appropriate amendments to further streamline and facilitate the development of these much-needed forms of housing. On an annual basis, the County will identify new opportunities for facilitating the development of farmworker housing, for example in partnership with nonprofit developers.

The County’s current Agricultural Employee Housing provisions comply with Health and Safety Code sections 17021.5, 17021.6, and 17021.8.

This program will be closely coordinated with Program 2.04 and associated programs, the latter of which is an Agricultural Worker Housing Workplan that the Board of Supervisors directed the preparation of at its meeting on August 29, 2023.

Table 4.48: Expanded Streamlining of Agricultural Employee Housing

PROGRAM OBJECTIVES:	<ul style="list-style-type: none"> By June 2025, solicit feedback from development application review agencies, the development community, the public, and the agricultural community on opportunities for improvement. By December 2026, the County will pursue Zoning Ordinance amendments to further streamline the production of agricultural employee housing. On an annual basis, the County will identify new opportunities for facilitating the development of farmworker housing, for example in partnership with nonprofit developers (among others).

- Lack of access to opportunity due to high housing costs
- Loss of affordable housing

Program 2.15 - Adoption of “Reach” Codes

Every three years, the State of California adopts new Building Standards Code contained within Title 24 of the California Code of Regulations. Each city and county may adopt new building codes that exceed the state requirements, commonly known as “Reach” codes. These codes can require or encourage such improvements as electrification of buildings and additional electric vehicle (EV) infrastructure.

On December 7, 2021, the Board of Supervisors approved an ordinance that requires all new construction in unincorporated

county areas to use electricity (not natural gas) for water heating, space heating, cooking, clothes drying, indoor and outdoor fireplaces, and decorative appliances. The ordinance, through electrification of new buildings and expansion of electric vehicle (EV) infrastructure, will support increased EV usage and accomplish the following goals:

- Reduce greenhouse gas emissions,
- Improve indoor air quality and safety, and;
- Meet California Energy Commission (CEC) new construction cost-effectiveness requirements.

Table 4.49: Adoption of “Reach” Codes

PROGRAM OBJECTIVES	The County will continue to implement the ordinance in the next Housing Element cycle.
GEOGRAPHIC SERVICE AREA	Unincorporated County, Countywide
LEAD AGENCY	Department of Planning and Development

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG10-1: Promote energy, water efficiency, and electrification in new residential buildings to reduce energy costs, conserve water, provide quality and resilient housing, improve safety, comfort, and reduce greenhouse gas emissions. • HG10(i) A: Adopt new energy efficiency, electrification, water conservation, and building performance standards for existing and new buildings.

Program 2.16 - Expand Home Repair and Modifications to Include ADA Upgrades

For aging adults, housing preferences vary greatly depending on their needs and changing physical abilities. According to a report issued by the U.S. Census Bureau,² as people age and experience the onset of physical decline, areas of their home may become unsafe or difficult to navigate. Many adults are faced with the choice of either

relocating to be closer to family or friends or deciding to age in their own homes within their existing neighborhood. Migration studies of older adults have indicated that they are less likely to change their residence and instead stay in their own homes. As such, there is a need to upgrade or repair homes to better support residents’ changing needs.

Table 4.50: Expand Home Repair and Modifications to Include ADA Upgrades

PROGRAM OBJECTIVES:	<ul style="list-style-type: none"> By October 2025, complete background and technical studies to form the basis of a County-wide program or policy to aid in the improvement and modification of homes for seniors. By December 2025, conduct public outreach on potential programs or policies. By 2026, if feasible, introduce draft policy and/or ordinance for consideration. By 2027, implementation and public outreach.

<https://www.census.gov/content/dam/Census/library/publications/2022/demo/p23-218.pdf>

Program 2.17 - Training and Support to Homeowners Aging in Place

Staying in your home as you grow older is referred to as “aging in place” and it is an increasingly popular desire of older Americans. Multiple benefits are associated with aging in place, including the comfort of home, family and friends nearby, proximity to familiar

networks, and social engagement in one’s community. Although there is a cost associated with modifying a home to accommodate a person’s changing needs, this cost is typically less than that of a home care setting. Identifying barriers of opportunities to support aging in place can help ensure, to the extent possible, that people are able to age in place and are not displaced.

Table 4.51: Training and Support to Homeowners Aging in Place

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> Engage with organizations focused on aging and housing program and policies. Assess whether there are any feasible updates to our existing codes and ordinances that will better support homeowners wishing to age in place by early 2026. By 2027, begin to involve stakeholders with possible updates. By early 2028, adopt any applicable updates.

CONTRIBUTING FACTORS	<ul style="list-style-type: none"> State or local laws, policies, or practices that discourage individuals with disabilities from living in apartments, family homes, supportive housing and other integrated settings Displacement of residents due to economic pressures Lending discrimination Private discrimination Source of income discrimination

Program 2.18 – Facilitate State Permit Streamlining Laws

The State continues to adopt permit streamlining laws with the goal of increasing housing production, for example SB 35, SB 330, SB 9, and the State Density Bonus law. In order for applicants to clearly understand the requirements of each of these processes, the County

will prepare and publicly post checklists, standards, eligibility requirements, fees, and the review process for each type of streamlined application. This will allow applicants to proceed with confidence that if an application meets the requirements, they can expect it to be approved, and at what cost to them.

Table 4.52: Facilitate State Permit Streamlining Laws

PROGRAM OBJECTIVE	<ul style="list-style-type: none"> • By December 2025, technical analysis and policy document preparation. • By December 2025, publication of checklists and associated information.
GEOGRAPHIC SERVICE AREA	Unincorporated County, Countywide
LEAD AGENCY	Department of Planning and Development
FUNDING SOURCE	N/A
POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG1-8: Until a city annexes the unincorporated islands within its USA, the County will plan for housing development in these areas, as necessary to address Housing Element law during a planning cycle and Regional Housing Needs Allocations (RHNA). • HG1(i) E: Amend General Plan and Zoning Ordinance to Plan for Housing in Unincorporated USAs. • HG4-1: The County should continually review its land use and development procedures for opportunities to remove unnecessary constraints to, and provide new opportunities to fund, the construction of affordable housing. • HG4(i) C: Monitor and modify development standards as needed, including the trends of ADU, JADU, and SB 9 development, to ensure development standards are objective, up to date with current State law, and reported to the State Department of Housing and Community Development annually.

Program 2.19 – Streamline Multi-Family Housing Development

Currently, the County requires multi-family housing, where it is allowed, to go through an Architecture & Site Approval (ASA) process, which includes discretionary reviews and a public hearing. While designed to provide maximum community input and allow decision-makers flexibility in deciding what development standards will apply to a particular project, in practice, these subjective and non-mandatory guidelines and standards create uncertainty, which in turn can deter applicants from seeking to develop multi-family housing, with or without affordable units, in the unincorporated county.

Currently, applications for an ASA require review by the County’s subject matter experts who provide recommendations and proposed conditions of approval to the Zoning Administrator, who makes an approval decision at a public hearing. The main basis for the decision is the County’s ASA guidelines, adopted by the County’s Planning Commission in 1981.

The ASA Guidelines include subjective requirements, such as “excellence of design,” a “pleasing sense of scale,” and colors, materials, and designs that blend with the surrounding area “or positive trends.” Plantings should “enhance the architectural quality of the proposed buildings.”

To support meeting the County’s Sixth Cycle RHNA requirements, the County will create a Housing Opportunity Sites zoning designation comprised of the parcels listed in the housing sites inventory. This new zoning designation will not require eligible multi-family development proposals to go through the ASA process. These applications will instead go through a ministerial Planning Clearance process which will focus only on adherence to established codes, such as the California Building Code, the County’s Water Efficiency Ordinance, and the County’s Inclusionary Housing Ordinance, and

other objective standards designed to incorporate desirable characteristics while providing minimal barriers to development.

By January 2027, the County will seek to replace the ASA process for multi-family housing with the Planning Clearance in all districts that allow multi-family housing. Expanding this approach to properties not listed on the housing sites inventory will take additional time to go through the public review and ordinance approval process.

The County is currently in the process of revising all checklists for development applications in order to provide additional clarity to applicants. As part of this process, the County will create written procedures and checklists for all multi-family and mixed-use residential development and post these procedures and requirements to the County’s website. This will include streamlined application types required by various state laws. While Senate Bill 35 does not currently apply to the County, it may in the future, therefore these procedures and checklists will include this application type, as well as Senate Bill 330 and other state-required streamlined permit applications.

Table 4.53: Streamline Multi-Family Housing Development

PROGRAM OBJECTIVE	<ul style="list-style-type: none"> By July 2024, post application procedures and checklists of required items on the County website. By January 2028, develop a ministerial application process for all multi-family housing.

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> HG1-8: Until a city annexes the unincorporated islands within its USA, the County will plan for housing development in these areas, as necessary to address Housing Element law during a planning cycle and Regional Housing Needs Allocations (RHNA). HG1(i) E: Amend General Plan and Zoning Ordinance to Plan for Housing in Unincorporated USAs. HG4-1: The County should continually review its land use and development procedures for opportunities to remove unnecessary constraints to, and provide new opportunities to fund, the construction of affordable housing. HG4(i) C: Monitor and modify development standards as needed, including the trends of ADU, JADU, and SB 9 development, to ensure development standards are objective, up to date with current State law, and reported to the State Department of Housing and Community Development annually. HG4(i) D: Create opportunities for adaptive reuse of non-residential buildings where single-family residential uses are allowed in the County Zoning Ordinance. The County will remove barriers related to development standards, such as providing exceptions to setbacks, building heights, and parking requirements, when a non-residential building is converted to a single-family residence.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> Land use and zoning laws

Program 2.20 – Tracking and Ongoing Compliance with State Housing Laws

The State continues to adopt legislation that promotes the development of a variety of housing types, including ADUs, transitional housing, group homes, and single room occupancy (SRO) units. It is the County’s intent to proactively track state housing laws and maintain County ordinance codes, policies, and other regulations to ensure ongoing compliance with state housing laws. Where any provisions of County regulations conflict with state law, then those provisions shall be void and state law shall apply, and moreover, the County will work to revise the implicated regulations as appropriate.

To ensure the County’s regulations are consistently in conformance with state law, the County will track and review state legislation and bring forward code amendments on an annual basis to address discrepancies or inconsistencies. Throughout this process, the County will collaborate with HCD to bring current codes into compliance, as needed.

The County is aware of recent legislation that will require the County to review and in some cases make amendments to the County Zoning Ordinance, particularly regarding the following topics:

- Transitional and supportive housing, to comply with Government Code Section 65583(c)(3);
- Permanent supportive housing, to comply with Government Code Section 65651;
- Low Barrier Navigation Centers, to comply with Government Code Sections 65660-65661;
- Single Room Occupancy (SRO) units;
- Group homes of seven or more; and
- Emergency Shelters, to comply with Government Code Section 65583(a)(4).

For example, the County will be amending its Zoning Ordinance and related development standards for SRO units, Group Homes for seven or more residents, and Emergency Shelters. Such amendments will:

- Encourage and facilitate SRO units in the appropriate zones where residential uses are allowed (e.g., multi-family, commercial, mixed-use, etc.) and consider allowing conversion of nonresidential development to SRO Units;
- Allow Group Homes for seven or more residents (referred to as Community Care–Expanded in the County Zoning Ordinance) in all zones that have similar residential uses, with objective standards and permit processes that are equivalent to similar residential uses;
- Revise the definition of Emergency Shelters in the Zoning Ordinance to include expansion for “interim interventions” (e.g., counseling, resources, etc.), and conduct an analysis to ensure there is a sufficient amount of area zoned to allow emergency shelters to meet the demand in the unincorporated county pursuant to Assembly Bill 2339 (2022);
- Permit large-scale Emergency Shelter projects without discretionary action in one or more zones that allow residential uses, with appropriate standards to encourage the development, ensuring access to transit and services, and with sufficient overall capacity for the assessed need; and
- Ensure County compliance with all other requirements emerging from State Housing Laws.

The County’s current Agricultural Employee Housing provisions comply with Health and Safety Code sections 17021.5, 17021.6, and 17021.8.

The County’s current Accessory Dwelling Unit (ADU) and Junior ADU ordinance provisions defer to Government Code Sections 65852.2

and 65852.22, and the County’s Urban Primary Unit (aka Senate Bill 9) ordinance defers to Government Code Sections 65852.2, 65852.21, and 65852.22, as those laws may be amended from time to time. While the County may choose to further update the ADU and Senate Bill 9 provisions of the Zoning Ordinance, the County considers both sections to be compliant because they explicitly defer to the California Government Code if any provisions conflict with the local ordinance code.

As noted in the table below, the County will review its current ordinance codes and determine what amendments are needed by December 2024, make such necessary amendments by December 2026, and review new legislation on an annual basis.

Table 4.54: Tracking and Ongoing Compliance with State Housing Laws

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> By December 2024, the County will review its codes and regulations against recent state laws and identify areas that require updating. By December 2025, the County will adopt revisions to County codes and regulations necessary to comply with recent state laws, including but not limited to Government Code sections 65583(a)(4), 65583(c)(3), 65651, 65660-65661, 65852.2, 65852.21, and 65852.22. By the end of each year thereafter, the County will continue to track and review its codes and regulations and identify areas that may require updates.

Program 2.21 – Streamlined Rehabilitation and Replacement

Due to the County’s policy for the past 50 years to encourage cities to annex unincorporated lands where multi-family development is proposed, there are currently a limited number of multi-family buildings of four or more units in the unincorporated county. The County has identified 97 such developments, of which only 12 have 10 or more units and only 2 have 20 or more units. These relatively larger developments are located on the Stanford University Campus, the rural unincorporated area of San Martin, and in the Cambrian Park, Fruitdale, Burbank, Parkmoor, and Alum Rock neighborhoods of San José. They were established between 1917 and 1998. Smaller multi-family buildings (less than 10 units) were primarily constructed in the 1950s, when the County experienced a housing and population boom following World War 2. Out of these 97 developments, 94 were constructed prior to 1970.

The County has identified 179 two- and three-unit residential buildings within the unincorporated county, not including ADUs. No such units have been constructed since 2016, and only two new buildings and one rehabilitated building have been constructed since 2000. Some 158 buildings are at least 50 years old, 73 are at least 75 years old, and 30 are at least 100 years old. Many of these units were built prior the County requiring building permits (1947), or prior to current zoning requirements, leaving many in a legal nonconforming status. This status provides a serious disincentive to any property owner seeking to renovate or rebuild these older units, as significant work may require compliance with the existing zoning standards.

The County additionally has two condominium developments in the unincorporated county; Fairway Gardens constructed in 1972, which consists of 20 duet homes and one single-family residence, and Holmes Estates constructed in 1982, which consists of 19 attached

and semi-detached homes. Both developments are located in the East Foothills area of San José.

The overwhelming majority of units in the unincorporated area are single-family dwellings. None of these units are considered below market rate, although some have developed accessory dwelling units (ADUs) or Junior ADUs that could be rented out at differing levels of affordability. The County has identified 17,737 single-family homes and 52 duet homes in the unincorporated county. These residences range in age from the Victorian era to newly constructed. 12,301 of these single-family residences (69.1%) were constructed more than 50 years ago, with only 715 of such units undergoing a major rehabilitation. See Chapter 2, section 2.04d for further analysis and discussion.

In most cases, single-family residences can be rehabilitated or replaced through existing streamlined processes without any planning entitlements or other County-imposed requirements prior to building permit application. However, some sites are eligible for an administrative annexation into a neighboring city (when located in an urban service area and adjacent to or within 300 feet via a public right-of-way to a city). Other single-family residences require building site approval (BSA) to be replaced, or when rehabilitation is significant in scope and considered a “rebuild.” More about the BSA process is detailed in Chapter 2, section 2.06e.

Beginning in 2025, the County will review options to allow rehabilitation or replacement of aging multi-family units without compromising their legal nonconforming status. In 2026, the County will develop ordinance or policy updates to help streamline such rehabilitation and replacement of older multi-family units. The County will also consider opportunities to preserve the affordability of existing units, whether required or naturally occurring. This may

include partnering with community development corporations to acquire, rehabilitate, and preserve the affordability of units.

The County works with Rebuilding Together Silicon Valley to promote critical home repairs in a successful program that has provided support to 430 property owners of very low-, low-, or moderate-income, from 2015 to 2022 (refer to Program 1.31). Such aid totals over \$1.4 million over this period. The County will continue this partnership and seek out opportunities to work with other community-based organizations to facilitate rehabilitation of existing units (refer to Program 1.32).

Lastly, the County will assess the housing stock and conditions of agricultural worker housing and explore related opportunities to streamline rehabilitation and replacement of such units, as appropriate (refer to Program 2.04 and associated programs).

Table 4.55: Streamlined Rehabilitation and Replacement

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> By December 2025, the County will review options to allow for the rehabilitation or replacement of older multi-family units without losing legal nonconforming status. By December 2026, the County will pursue ordinance or policy amendments to streamline such rehabilitation or replacement, with a specific focus on addressing agricultural employee housing needs. By December 2031, the County’s quantified objective for rehabilitation of affordable units, most likely to be multi-family, is 380 units; the County’s quantified objective for rehabilitation of above moderate-income units, most likely to be single family residences, is 667 units. Ongoing: the County will seek out opportunities to work with community development corporations and other community-based organizations to rehabilitate and preserve existing housing.

Expand monitoring component to include rent price information.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> Land use and zoning laws Deteriorated and abandoned properties

Program 2.22 – Objective Standards for Multi-Family Housing

Currently, the County relies on subjective development standards when considering Use Permits, Architecture & Site Approvals, and Design Review. Therefore, it is currently difficult for a developer seeking to build multi-family housing to know what development and design criteria are necessary to include for their project to be approved. To increase certainty, the County will develop objective development standards for all multi-family housing.

The County is committed to removing barriers to multi-family and mixed-use residential development on the sites identified in the housing sites inventory in the short-term, and more broadly in the long-term.

The County is considering requirements for sites listed in the housing sites inventory, both on the Stanford University campus and within the San José urban service area, but the County will also pursue

extending objective standards to all other multi-family housing projects. This will include a review of parking standards for multi-family developments, including requirements for guest/short-term parking intended for drop-off/delivery and a sliding scale of parking requirements for varying unit types (i.e., different standards for studios, one-bedrooms, two-bedrooms, etc.).

Creating such standards will also better align the County with new state housing laws that require ministerial approval under certain circumstances, where only objective standards may be applied. These standards may be neighborhood-specific, tiered based on the number of units, or general enough to apply to all project types. The County intends to limit these standards to those that will not create prohibitive costs or other impediments to development of multi-family housing.

Table 4.56: Objective Standards for Multi-Family Housing

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • By June 2024, the County will complete a study of potential objective standards for multi-family housing projects on the Stanford University campus. • By June 2025, the County will present objective standards for multi-family housing projects on the Stanford University campus to the Board of Supervisors for adoption. • By December 2025, the County will complete a study of potential objective standards for multi-family housing projects on housing opportunity sites in the San José urban service area and consider adoption of these standards. • By December 2025, the County will complete a study of potential objective standards for all multi-family housing projects and consider adoption of these standards. • By December 2026, the County will pursue Zoning Ordinance amendments to reduce governmental constraints in the development of multi-family housing.

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG1-8: Until a city annexes the unincorporated islands within its USA, the County will plan for housing development in these areas, as necessary to address Housing Element law during a planning cycle and Regional Housing Needs Allocations (RHNA).

	<ul style="list-style-type: none"> • HG1(i) E: Amend General Plan and Zoning Ordinance to Plan for Housing in Unincorporated USAs. • HG4-1: The County should continually review its land use and development procedures for opportunities to remove unnecessary constraints to, and provide new opportunities to fund, the construction of affordable housing. • HG4(i) C: Monitor and modify development standards as needed, including the trends of ADU, JADU, and SB 9 development, to ensure development standards are objective, up to date with current State law, and reported to the State Department of Housing and Community Development annually.
<p>CONTRIBUTING FACTORS</p>	<ul style="list-style-type: none"> • Land use and zoning laws • Availability of affordable units in a range of sizes • Lack of access to opportunity due to high housing costs • Location and type of affordable housing • Loss of affordable housing

Program 2.23 – Tracking Housing Conditions

The County currently tracks building, grading, and zoning violations; however, the County’s database does not easily allow for identification of violation types beyond those three broad categories. In 2024, the County will add a subcategory that allows for violations related to housing conditions to be easily identified and tracked. This will allow greater clarity in reporting, and allow County staff to better connect those impacted by housing-related violations with the appropriate resources.

The County will add a housing-related subcategory to violation records in the County’s database by December 2024, track such violations during the following year, and by December 2025 create a webpage to connect those impacted by housing-related violations to the appropriate public resources, including the ability to report substandard housing conditions online and anonymously.

Following the Farmworker Housing Needs Assessment (Program 2.04), and one year of tracking reports of housing-related violations, the County will assess the need for a broad housing conditions survey and seek partners and resources to conduct such a survey, as appropriate.

Table 4.57: Tracking Housing Conditions

<p>PROGRAM OBJECTIVES</p>	<ul style="list-style-type: none"> • By December 2025, the County will add a housing-related subcategory to violation records in the County’s database. • By December 2026, the County will create a webpage to connect those impacted by housing-related violations to the appropriate public resources, including the ability to report substandard housing conditions. • By December 2026, the County will assess the need for a broad housing conditions survey and seek partners and resources to conduct such a survey, as appropriate.

Program 2.24 – Apply for Prohousing Designation

The State has created a Prohousing Designation Program that HCD can bestow on jurisdictions that meet certain criteria demonstrating an overall commitment to proactively helping the State meet its goal of building two million new housing units. Jurisdictions with such a designation will be eligible to receive funds to facilitate housing

production. Once the County adopts a certified Housing Element, it will begin work toward submitting an application to HCD for the Prohousing Designation. To qualify for the program, additional policy or ordinance changes may be required, and the County will consider implementing changes that will increase the likelihood of earning entry to the program.

Table 4.58: Apply for Prohousing Designation

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • By December 2025, the County will review all existing policies in relation to the Prohousing Designation criteria. • By December 2026, the County will consider changes to existing polices and ordinances to better align with the program and submit an application.

CONTRIBUTING FACTOR	<ul style="list-style-type: none"> • Lack of access to opportunity due to high housing costs • Location and type of affordable housing

Program 2.25 – Incentivize Lot Consolidation

The unincorporated areas within the City of San José’s urban service area have a historic land use pattern of small parcels that are less than 0.5 acres in size. Within these urban pockets, approximately 96 percent of parcels are less than 0.5 acre and 87 percent are less than 0.3 acres in size. The average parcel size in these areas is 0.35 acres and the median parcel size is 0.18 acres. In built-out communities such as Burbank, Fruitdale, and Alum Rock, parcels that allow mixed-use zoning can be incentivized to develop lower-income housing. However, most vacant and nonvacant parcels within these neighborhoods are relatively small legal lots under 0.5 acres. The County is aware that multi-family housing, especially projects including affordability-restricted units, are less likely to be built on lots smaller than 0.5 acres. Therefore, the County will aim to facilitate the consolidation of these smaller lots when possible.

To facilitate lot consolidation, the County currently allows for neighboring lots to be consolidated through a voluntary merger of contiguous parcels for a nominal fee. The County will implement a

Table 4.59: Incentivize Lot Consolidation

technical assistance program to educate property owners and facilitate their voluntary lot merger. To further incentivize multi-family development, the County will adopt strategies to encourage the consolidation of smaller lots in areas suitable for such development. Lot consolidation strategies may include increased densities, additional process streamlining for projects that include affordable housing units, the reduction of development standards, and deferral or reduction of fees, both of which are already minimal in the unincorporated county. Once these new strategies have been implemented, the County will conduct annual outreach to owners of adjacent small lots to encourage that they take advantage of a voluntary lot merger.

The County has a history of completing lot consolidations, usually when property owners own multiple full or partial lots that are not large enough to develop a single-family residential project. Once adopted, the County will advertise lot consolidation incentives to existing property owners and prospective mixed-use and affordable housing developers.

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • By June 2025, the County will publish a technical assistance brochure on the County’s website. • By December 2025, the County will research policy and ordinance changes to encourage and streamline lot consolidation. • By December 2026, the County will pursue the necessary code amendments to encourage and streamline lot consolidation, based on the outcome of the previous year’s research. • In 2027, and each year thereafter, the County will conduct property-owner outreach to facilitate small-lot consolidation.

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG1-8: Until a city annexes the unincorporated islands within its USA, the County will plan for housing development in these areas, as necessary to address Housing Element law during a planning cycle and Regional Housing Needs Allocations (RHNA). • HG1(i) E: Amend General Plan and Zoning Ordinance to Plan for Housing in Unincorporated USAs.

	<ul style="list-style-type: none"> • HG4-1: The County should continually review its land use and development procedures for opportunities to remove unnecessary constraints to, and provide new opportunities to fund, the construction of affordable housing. • HG4(i) D: Create opportunities for adaptive reuse of non-residential buildings where single-family residential uses are allowed in the County Zoning Ordinance. The County will remove barriers related to development standards, such as providing exceptions to setbacks, building heights, and parking requirements, when a non-residential building is converted to a single-family residence.
<p>CONTRIBUTING FACTORS</p>	<ul style="list-style-type: none"> • Availability of affordable units in a range of sizes • Lack of access to opportunity due to high housing costs • Lack of affordable, accessible housing in a range of unit sizes • Land use and zoning laws • Location and type of affordable housing

Program 2.26 – Mid-Cycle Review

To ensure the County meets its sixth cycle RHNA obligations, the County will complete a mid-cycle review by December of 2026. This program will include a review of permits issued in unincorporated areas, units transferred as the result of annexation, and a forecast for the remainder of the sixth cycle. The mid-cycle review will determine whether the County is on track to meet the its RHNA obligations by the end of the cycle. Depending on the outcome of such review, the County will evaluate opportunities to expand the sites inventory and to incentivize additional housing development through County rezoning and other programs. This program will focus on additional ways to remove barriers to the production of housing at the affordability levels shown to be most needed. As the result of the

mid-cycle review, the County will take additional actions as needed to meet the County’s RHNA obligations by the end of the sixth cycle, which may include:

- Selection of additional sites in unincorporated areas appropriate for housing development affordable to households with a range of incomes.
- Selection of additional sites in unincorporated areas appropriate for County-led housing affordable development.
- Removal of barriers to the production of housing at the affordability levels shown to be most needed, for example, by rezoning, streamlining CEQA and permit processing, and removal or reduction of any remaining fees or subjective requirements.

Table 4.60: Mid-Cycle Review

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> By December 2026, complete review of permits issued in unincorporated areas, units transferred as the result of annexation, and a forecast for the remainder of the sixth cycle. Should the mid-cycle review indicate that the County is not on track to meet its RHNA obligations, additional actions will be taken by December 2027.

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG1-3: Focus the County’s limited housing production resources on special needs populations, farmworkers, and extremely low-income households. • HG1-6: Ensure housing development projects within unincorporated Urban Service Areas contain an equitable mix of housing typology and housing options for different household income levels. • HG1(i) B: Encourage public support of city efforts to create a balanced housing supply, which includes housing affordable to special needs, farmworkers, and extremely low-income households. • HG6(i) E: Support implementation of housing-related policies in the county. • HG9-1: The conservation and rehabilitation of the existing housing supply shall be encouraged and facilitated. • HG9-2: Publicly assisted housing rehabilitation efforts should not have the effect of reducing the available supply of housing for extremely low-income households. • HG9(i) A: Maintain ongoing programs for monitoring the physical condition of neighborhoods to assist in guiding rehabilitation program efforts, scheduling infrastructure maintenance activities, and to provide accurate information for Federal and State programs. Expand monitoring component to include rent price information.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Availability of affordable units in a range of sizes • Lack of access to opportunity due to high housing costs • Location and type of affordable housing • Loss of affordable housing

Program 2.28 – Reasonable Accommodation Policy

To ensure the County is removing barriers that may prevent or make it more challenging for people with disabilities to develop housing, the Department of Planning and Development allows applicants to seek a reasonable accommodation, as determined by the County’s Zoning Administrator. The criteria and factors considered by the Zoning Administrator in processing a reasonable accommodation request are:

- Existing, applicable policies or regulations,
- Availability of solutions not requiring an exception or modification of standards,

- How the request directly relates to the needs of the owner/occupant with disabilities, and
- The exact nature of the exception or modification proposed.

Prior to December 2024, the County will review and amend the findings required to grant a reasonable accommodation such that only the following three questions are being considered:

- Is the request for a person with a disability?
- Does the request fundamentally alter or invert the zoning and land use?
- Is there a financial/administrative burden?

Table 4.62: Reasonable Accommodation Policy

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> By December 2024, the County will review and amend its policies and procedures for reasonable accommodations.

CONTRIBUTING FACTORS	<ul style="list-style-type: none"> Inaccessible government facilities or services

Program 2.29 – Place-Based Planning and Neighborhood Improvements

The County dissolved its Department of Public Works in 1974 and now relies on several different departments to conduct capital improvement projects, including the Department of Roads and Airports, Department of Parks and Recreation (County Parks), the Department of Facilities and Fleet, and the Office of Sustainability. Additionally, the County coordinates capital improvement projects with special districts such as the 2-3 Sanitary District, Burbank Sanitary District, and the Santa Clara Valley Transit Authority.

Through the implementation of this program, the Department of Planning and Development will serve as a facilitator and liaison, meeting annually with internal and external stakeholders to track and explore further opportunities for place-based planning and neighborhood improvements in unincorporated areas of the county that have been historically underserved. In most cases, the County’s place-based investments are overseen by other entities and require outside approval; the Department of Planning and Development’s role is primarily to coordinate and facilitate such efforts.

The County will continue to invest in and implement place-based measures for community revitalization and equitable quality of life throughout the county, with a focus on unincorporated areas that have higher concentrations of affordable housing or lower income households. Such areas include: the unincorporated San José neighborhoods of Alum Rock, East Foothills, Burbank, Fruitdale, and Fairgrounds, Stanford University Campus, and the rural South County communities of San Martin and unincorporated Gilroy.

The County’s approach to place-based measures will generally consist of three components: Outreach, Planning, and Investment.

Outreach: The County will utilize a variety of methods to ensure transparency, access, and meaningful input from the most impacted segments of the community. Outreach will be used to frame and help direct the County’s place-based efforts and prioritize unincorporated community planning and investment.

Planning: The County will pursue planning activities in targeted unincorporated communities and coordinate with adjacent jurisdictions and relevant planning entities, as appropriate. Planning will be comprehensive and address a variety of elements, such as land use, circulation, safety (including evacuation routes),

environmental justice, community facilities and resources, and open space and recreation.

Investment: The County will continue to invest in and implement capital improvement projects that aim to revitalize unincorporated neighborhoods and communities in targeted areas. Investments include a variety of neighborhood improvements and community development based on outreach and planning, such as transit, community meeting facilities, recreation opportunities, parks, public art, community programming, streetscapes, accessibility, safe routes to school, and active transportation. Examples of currently planned public improvements and place-based strategies include:

- The County is working to facilitate the development of public recreation facilities at the Fairgrounds, which is adjacent to a residential area of incorporated San José with low-income households and qualifies as a R/ECAP.
- County Parks manages 28 regional parks encompassing over 52,000 acres of land, including Penitencia Creek (just over a mile from Alum Rock), Los Gatos Creek County Park (less than a mile from Fruitdale), Coyote Lake Harvey Bear Ranch County Park (less than a mile from San Martin), and Chitactac-Adams Heritage County Park (3 miles from Gilroy and San Martin). County Parks are free to enter on foot or by active transportation (e.g., bicycles, scooters, etc.). There is a \$6 daily or \$95 annual vehicle entry fee, with reductions for people with disabilities, senior citizens, low-income earners, and active military personnel and their dependents. The Parks Department is currently in design for renovation and expansion of the Valley View Campgrounds at Mount Madonna County Park west of Gilroy, with construction tentatively scheduled to start in 2025. Other approved projects at Mount Madonna County Park that are not in progress include design and construction of a new visitor center, children’s adventure play area, and picnic areas near the existing visitor

center. A Master Plan Amendment process for Coyote Lake – Harvey Bear Ranch County Park Master Plan has been budgeted and is slated to begin in late 2024 or early 2025, depending on progress of other current projects. County Parks recently put out to bid a trail construction project for the Coyote Canyon property in unincorporated Morgan Hill/San Martin. Construction will start by mid-2024 and is scheduled to be completed by end of 2024. Once opened, the Coyote Canyon property will be incorporated into Coyote Lake – Harvey Bear Ranch County Park.

- The County Office of Sustainability is in the process of planting 3,000 trees in disadvantaged neighborhoods (as defined by Cal Fire) throughout the county.
- The County Department of Environmental Health has initiated a new Lead Safe Homes Program in 2024. The program will help identify and eliminate hazards posed by lead-based paint in private residential units throughout Santa Clara County. The program provides residents with no or low-cost lead paint inspections and abatement services. This program will aim to provide services equitably across the county, ensuring the highest risk and highest need groups are prioritized for services, including areas that have higher concentration of affordable housing and lower-income households. The program will accomplish this by working with community leaders and stakeholders throughout underserved areas of the county to ensure barriers to entry are minimized and community input is obtained throughout the planning, implementation, and evaluation process. The program is currently in the planning phase and will begin a pilot phase at a limited number of properties in early 2025, followed by countywide implementation during the second half of 2025.
- As a result of the recently adopted update to the Stanford Community Plan, Stanford University is required to plan for housing for all new students and employees related to additional

academic and research building development. Sites identified for housing in this Housing Element are already situated close to high-frequency transit stops, jobs on campus, and amenities on campus or in nearby neighborhoods. The County will continue to work with the University to eliminate barriers to housing and other community amenities for low-income students and employees of Stanford.

- With support from the County, the City of San José Libraries operate branches in Alum Rock and Fruitdale with community spaces and robust programming, which will continue.
- With support from the County, the Valley Transit Authority connects Alum Rock to job centers in the downtowns of San José and Mountain View, as well as office parks in northern San José, Milpitas, Santa Clara, and Sunnyvale, and event spaces such as Levi Stadium and SAP Center, through its light rail service since

2004, and through a bus rapid transit (BRT) line since 2017. The opening of the Milpitas BART station in 2020 (a VTA light rail transfer point) has further connected Alum Rock to locations throughout the Bay Area, and the BART extension into Santa Clara County continues to move forward.

In the first quarter of each calendar year, starting in 2025, the Department of Planning and Development will initiate coordinating meetings with internal and external stakeholders to track outreach, planning, and investment associated with County’s various place-based measures. Through these meetings, the County will explore further opportunities for place-based planning and neighborhood improvements in unincorporated areas of the county that have been historically underserved.

Table 4.63: Place-Based Planning and Neighborhood Improvements

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • By March of 2025, and each year thereafter, the Department of Planning and Development will initiate annual coordinating meetings to prioritize capital improvement projects and planning in unincorporated areas of the county that have been historically underserved. • As the result of annual coordinating meetings, by July of 2025, and each year thereafter, the Department of Planning and Development will identify further opportunities for place-based planning and neighborhood improvements and present them to the County Board of Supervisors through the Housing, Land Use, Environment, and Transportation Committee. • On an annual basis, County offices which are eligible to receive regional, state, and federal funding will submit applications for funds to support capital improvements, sustainable development, active transportation, and affordable housing. • By July of 2029, the Department of Planning and Development will identify and facilitate at least eight place-based strategies that result in community investment and tangible neighborhood improvements in areas that have higher concentrations of affordable housing or lower-income households.

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG1-9: Ensure that place-based neighborhood improvements to infrastructure and services are focused on the areas which have been historically underserved. • HG1(i) F: Coordinate improvements and services with other County agencies and Departments.

CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • HG9(i) A: Maintain ongoing programs for monitoring the physical condition of neighborhoods to assist in guiding rehabilitation program efforts, scheduling infrastructure maintenance activities, and to provide accurate information for Federal and State programs. Expand monitoring component to include rent price information.
	<ul style="list-style-type: none"> • Displacement of residents due to economic pressures • Availability of affordable units in a range of sizes • Lack of access to opportunity due to high housing costs • Location and type of affordable housing • Loss of affordable housing

Program 2.30 – Explore Housing Opportunities in the RCAA

To ensure the County is affirmatively furthering fair housing, the County will explore ways to remove barriers that may prevent or make it more challenging for people of all backgrounds and income levels from accessing or developing housing in neighborhoods where the population is disproportionately white and affluent. The unincorporated areas of the County contain two only two census-designated places identified as racially concentrated areas of affluence (RCAA), the Lexington Hills area and Loyola.

RCAAs exist due to both historical and present-day decisions by private developers and government actions. While race-based discriminatory practices were outlawed though the federal Fair Housing Act of 1968, factors such as restrictive zoning, lack of vacant land, and high land values can continue to create barriers to fair housing. Both Lexington Hills and Loyola have additional constraints to increased housing development. Please refer to Appendix N: Assessment of Fair Housing section X.6 (ii) for a full analysis of the unincorporated County’s RCAAs.

Lexington Hills describes a series of small communities located in the Santa Cruz Mountains. Population growth and rising costs of housing in the valley areas of the County have pushed more residents to seek homes in the Lexington Hills area, in addition to those seeking a

more remote and rustic lifestyle. However, the area has high fire risk and is in close proximity to the San Andreas Fault. The area also lacks public transportation, sewer service, and, in many cases, piped water. These considerations, which also influence property insurance rates, make the development of housing types that are more affordable to low- and moderate-income households infeasible by necessitating large lot sizes. Doing so would also result in moving more low- and moderate-income people into areas with high risks of devastating wildfires, earthquakes, and landslides caused by geologic and rain events.

Unincorporated RCAAs in Santa Clara County that do not contain census-designated places generally have the same obstacles to creating more inclusive communities as Lexington Hills, and often to an even greater degree.

Loyola, particularly the portions of it east of I-280, is not subject to as significant environmental constraints as Lexington Hills. Notwithstanding, lot sizes within the community tend to be quite large, consistent with historical development patterns dating back to the 1920s and current zoning requirements. The initial development of Loyola as an affluent and all-white community was driven principally by speculative private sector investment, enforced by deed restrictions, rather than County policy, but County policy later

reinforced those choices. In 1994, the County adopted a zoning overlay district for the Loyola area at the request of residents, and with the justification of aligning the district with standards found in the neighboring City of Los Altos, to which the County expected the neighborhood would eventually be annexed. These restrictions added a maximum floor area ratio (FAR) of 35% in most cases, with an absolute floor area cap on larger lots, to the existing larger minimum lot sizes. As tech companies expanded in the west valley area and San Francisco peninsula, Loyola’s draw as a wealthy bedroom community has grown, and with it there has been a demographic shift. In 2010, 2,222 of the 3,261 residents identified as White alone (68%), while 757 identified as Asian alone (23%). In 2020, 2,001 of the 3,491 residents (57%) identified as White alone, while 1,109 (32%) identified as Asian alone.

Today, while a 35% floor area ratio restriction exists to more closely align with development restrictions of the neighboring city in anticipation of annexation, the applicable County zoning is not the only barrier to building more racially and socioeconomically inclusive housing in Loyola. The area lacks proximity to job centers, services, and transportation, but perhaps the greatest barrier is the high land costs and the lack of vacant or underutilized parcels. The County will

have to be opportunistic and provide a comprehensive approach to overcome those hurdles.

One possible option would be for the County to acquire parcels with single-family homes that may be at the end of their useful life in the future, however this approach would be prohibitively expensive unless there is a drastic change to the real estate market. A more realistic option would entail partnering with religious congregations, like the Antiochian Orthodox Church of the Redeemer, that own land within Loyola.

Prior to December 2025 and December 2029, the County will contact institutional landowners in the Loyola area to gauge interest in allowing affordable housing on their sites to potentially be included in the mid-cycle review or 7th cycle housing element update.

Prior to December 2029, the County will review the County Zoning Ordinance and analyze what amendments might reduce barriers to developing a more diverse community in the Loyola district, including, but not limited to, promoting ADU and Junior ADU development. The Department of Planning and Development will propose a set of amendments to the Board of Supervisors by December 2030 if RHNA targets have not been met.

Table 4.64: Explore Housing Opportunities in the RCAA

PROGRAM OBJECTIVES	<p>If the County does not meet its RHNA targets by the required mid-cycle, the County will conduct the following process:</p> <ul style="list-style-type: none"> • By December 2025, the County will engage with institutional property owners in the Loyola area to encourage affordable housing development on their properties for inclusion in the County’s mid-cycle review. • By December 2029, the County will engage with institutional property owners in the Loyola area to encourage affordable housing development on their properties for inclusion in the County’s mid-7th cycle housing element update. • By December 2029, the County will review the County Zoning Ordinance and analyze what amendments might reduce barriers to developing a more diverse community in the Loyola district.
---------------------------	--

	<ul style="list-style-type: none"> By December 2030, the Department of Planning and Development will propose a set of amendments to the Board of Supervisors based on the results of the analysis.

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> HG1-10: Promote access to racially concentrated areas of affluence to a wide range of residents. HG1(i) G: Seek opportunities for the County to work with institutional landowners to develop housing affordable to a wide range of income levels and backgrounds. HG4-1: The County should continually review its land use and development procedures for opportunities to remove unnecessary constraints to, and provide new opportunities to fund, the construction of affordable housing. HG4(i) C: Monitor and modify development standards as needed, including the trends of ADU, JADU, and SB 9 development, to ensure development standards are objective, up to date with current State law, reported to the State Department of Housing and Community Development annually, and remove barriers to housing development.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> Lack of access to opportunity due to high housing costs Location and type of affordable housing

4.03c Behavioral Health Services Department

The Behavioral Health Services Department (BHSD) is the public behavioral health system for Santa Clara County. The mission of BHSD is to assist individuals in our community affected by mental illness and serious emotional disturbance to achieve their hopes, dreams, and quality of life goals. To accomplish this, services must be delivered in the least restrictive, non-stigmatizing, most accessible environment within a coordinated system of community and self-care, respectful of a person's family and loved ones, language, culture, ethnicity, gender, and sexual identity.

Program 3.01 - SCC Behavioral Health Services Department Evans Lane Wellness and Recovery Center

The Evans Lane Wellness and Recovery Center is dedicated to serving individual adults who suffer from a mental illness, substance use, and co-occurring disorders who are involved in the criminal justice

system. The center is overseen by the BHSD's Forensic, Diversion and Reintegration Division. The program works in collaboration with Santa Clara County Superior Court, Santa Clara County Adult Probation Department, and the California Department of Corrections and Rehabilitation. The program is a community environment based on wellness and recovery. The participants of this program are active community members. This is demonstrated through the community governance meetings, which are facilitated by the participants of the program. In addition, the participants display ownership of their recovery, the program, and the community environment by contributing to a variety of tasks. The program includes both residential and outpatient services. These two distinct programs are featured on one campus. The residential program provides housing, support, and care to the justice-involved population and supports the participants by providing evening and weekend groups and activities. This program is fully implemented, and clients released

from federal, state prisons, and local jails access this program on an ongoing basis. In addition, referrals to this program come from our

justice partners. The program served 434 clients between FY21 and FY22 and is ongoing.

Table 4.65: SCC Behavioral Health Services Department Evans Lane Wellness and Recovery Center

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • Within the first 30 days of residence, the client will have completed a transition plan for self-sufficiency which will include employment/education and housing. The plan will detail the behaviorally measurable goals that are needed for development to transition from Evans Lane within the 6-month period. The recovery philosophy of "harm reduction" is applied at Evans Lane. • Social skills training is aimed at teaching specific skills to clients for getting their interpersonal needs met and for handling common situations involving alcohol, drugs use, and other high-risk behaviors. Group sessions are focused primarily on teaching particular skills that are important for functioning without alcohol and drugs and staying on psychiatric medications. • Program length for social skill building varies based on the needs of the client and the range of social skills that are being addressed. The fewer the skills taught the shorter the duration. Curricula can include a variety of skills pertinent to the underlying dual-diagnosis issues as well as the skills to live within the Evans Lanes environment.

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG1-5: Prioritize suitable county-owned underutilized parcels within Cities and Urban Service Areas for affordable, supportive and workforce housing development. • HG1(i) D: Continue consideration of publicly owned lands suitable for the construction of extremely low-income housing and develop a priority of county-owned sites suitable for housing development. • HG5-5: Identify and increase access to services and other opportunities for residents of historically disinvested low-income communities (R/ECAPs and Burdened Households) across unincorporated county. • HG5(i) C: Fair housing services provided shall be respectful of language, culture, and special needs. • HG6-1: Encourage the development of affordable housing which is suitable for a variety of special needs populations. • HG6(i) A: Advocate for the expansion of Federal and State programs and funding to assist local government in developing special needs housing not provided through the private market. • HG6(i) E: Support implementation of housing-related policies in the county.

Program 3.02 – Substance Use Recovery Residences (formerly Department of Alcohol and Drugs Services)

The Behavioral Health Services – Substance Use Treatment Services (SUTS) provides 310 recovery residence beds for eligible clients.

While being housed, clients attend substance use treatment service programs. The SUTS recovery residences provide housing for men, women, women with children, and men with children. SUTS recovery residences served 471 clients in FY22 and is ongoing.

4.03d Office of County Executive

Program 4.01 – Dispute Resolution Program

Santa Clara County Office of Mediation and Ombuds Services (OMOS) formerly referred to as DRP has provided mediation services to Santa Clara County residents since 1977, paid for from County funds and provided free of charge to County residents. These services include mediation, conciliation, and coaching services to any and all landlords and tenants within Santa Clara County. OMOS empowers people by facilitating communication and increasing education in conflict resolution principles, thereby providing a model for effective efficient resolution of disputes. OMOS provides specific

services tailored to meet the diverse individual needs of those involved in daily disputes or those affected locally by national and global events. By being proactive, OMOS supports a community where individual differences are respected while responsibility for conflict and out comes are encouraged.

OMOS previously considered adopting a sliding scale fee for service but did not adopt a sliding scale due to the cost to administer such a program. Instead, OMOS continues to provide services free to County residents. OMOS has updated its website and partnered with the City of San José Housing Department to reach more vulnerable populations. Mediation services are provided by OMOS via Zoom or in person.

Table 4.67: Dispute Resolution Program

PROGRAM OBJECTIVES	The program will continue to expand outreach to high-risk and vulnerable populations and otherwise maintain the program.

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG5-3: The rights of tenants and landlords shall be recognized and protected, and opportunities for mediation of disputes shall be provided. • HG5-4: Reduce displacement of low-income household tenants and increase tenant protections prior to evictions proceedings. • HG5(i) E: Maintain tenant/landlord dispute mediation services in all areas of the county.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Displacement of residents due to economic pressures • Loss of affordable housing • Private discrimination

Program 4.02 – Agricultural Worker Housing Workplan

In 2020, as an implementation measure of the Santa Clara Valley Agricultural Plan, the County adopted Zoning Ordinance amendments to streamline the land use entitlement approval process for agricultural employee housing based on objective development standards and requirements. During the first two years of implementation, only three new units of privately funded housing were developed.

The County Board of Supervisors directed County staff and County Counsel on August 29, 2023, to develop an Agricultural Worker Housing Workplan to be presented to the Board in 90 days, which may consist of the following components:

- *Process, Informational, and Funding Strategies* – Including further research into the housing conditions and needs of agricultural workers, engaging specialists, and establishing a stakeholder committee.

- *Permitting Process Improvements* – Including research and proposals to make the permitting process for agricultural worker housing more understandable and easier to undertake with more parcel-specific information to help developers make better informed business decisions.
- *Strategies Utilizing County Land* – Including exploration of partnerships to develop agricultural worker housing on County-owned land.
- *Legislative and Partnership Strategies* – Including work with the state, other jurisdictions, and agencies to explore funding and policy strategies for developing agricultural worker housing.

Once the workplan is complete, the County will begin its implementation.

This program will be closely coordinated with Program 2.04 and associated programs.

Table 4.68: Agricultural Worker Housing Workplan

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • By December of 2024, finalize a work plan to further promote agricultural worker housing and begin implementation, revising the work plan from time to time, as needed. • Ongoing: On an annual basis, the County will review the progress of this program, assessing the coordination across departments, outreach programs and policy changes.

-----------------------------	---

Program 4.03 – Coordinated Annexation and RHNA Transfer

Background

For over 50 years, the County has worked cooperatively with the 15 cities in Santa Clara County and LAFCO to facilitate the annexation and efficient use of urban unincorporated islands. According to agreements reached in the early 1970s, all unincorporated territory within urban service areas that are planned for development should be annexed into the adjacent cities, and any land within city limits that is outside of the urban service areas and not planned for development should be detached/de-annexed back to unincorporated areas. These policies are still in effect. (Santa Clara County LAFCO, *Island Annexation Policies* (Rev. Oct. 14, 2009). Pursuant to state law, many unincorporated properties within the USAs are eligible for streamlined annexation by the cities without LAFCO approval or property owner protest procedures. (Government Code §§ 56375.3, 56757; Santa Clara County LAFCO. *Policies Relative to Annexation/Reorganizations for Cities and Special Districts* (Jan. 1, 2003). However, completion of these annexations has not occurred despite this powerful annexation authority.

In 2001, the County entered into an agreement with the City of San José (City) and its former Redevelopment Agency (“2001 RDA Agreement”). The 2001 RDA Agreement generally addresses redevelopment issues, but also includes some land use provisions. (2001 RDA Agreement, § VII.H–M.) These provisions obligate the City to annex unincorporated pockets. (§ VII.I.7.) In exchange, the County

would continue implementing its land use policies calling for urban development to occur within incorporated USAs. (§ VII.I.) This agreement essentially resulted in the stagnation of the unincorporated pockets in San José’s USA because the City would not annex the pockets and the County would not process applications for any significant development or redevelopment in those areas.

ABAG assigned the County a 6th cycle RHNA of 3,125 new units, which exceeded the prior cycle’s RHNA by 1,028%. This unprecedented increase was largely based on the unincorporated islands in the City of San José’s USA that the City failed to annex for over 50 years (e.g., Pleasant Hills Golf Course site), in clear violation of the 2001 RDA Agreement and the longstanding joint policies between LAFCO, the 15 cities, and the County.

During the period of time when the County was developing its Housing Inventory list through to the submittal to HCD of a draft Housing Element update, County and City planning staff were in regular conversation to coordinate the selection of County Housing Element sites that were inside the City’s USA.

Continued County Support for Annexation of Unincorporated Islands Within USAs

The County continues to support the annexation of all parcels that are within city USAs regardless of whether they are eligible for the streamlined annexation or require further discretionary review and

LAFCO approval. However, state law does not give the County any role in the annexation process. to the County typically only receives notification after an annexation has already occurred, at which time the County Surveyor will update the official maps and the Department of Planning and Development’s Geographic Information Systems (GIS) team will update online maps and flag the parcels as no longer being in the County’s jurisdiction.

The City of San José acknowledged in a July 12, 2024 letter to HCD that development of unincorporated sites within the City’s USA “are most appropriately permitted through City processes, which would also correspond with a concurrent annexation process to properly deliver municipal and other services to these sites.” Yet in a September 30, 2024 meeting between City and County officials, the City admitted it had no future plans to initiate annexation of unincorporated islands and would not initiate the annexation process for a property unless and until it receives a specific development application for the site.

Notwithstanding this annexation dilemma—over which the County has no control—the County remains committed to encouraging and facilitating city annexation of all unincorporated islands within USAs. In furtherance of this longstanding commitment, upon being notified of a potential development project in an unincorporated island within a city’s USA, the County will do the following:

- promptly notify the relevant city of the development proposal and encourage the city to proactively annex the site; and
- strongly encourage the developer to file a development application with the city and pursue annexation.

If the city or developer does not initiate annexation of the property and the developer files an application with the County, the County does not have the legal authority to refuse to accept or process the application. The law also requires the County to apply its adopted General Plan policies, Zoning Ordinance, and other ordinances and standards to such applications and may not delegate authority or veto power to another public agency³. However, the County commits to do the following for all such applications:

- strongly encourage the developer to design the project to conform with city standards and requirements while still meeting all applicable County standards, to the maximum extent feasible;
- provide the city with a copy of the application and any related materials within 15 days after the application is submitted;
- convene a joint meeting with the developer and the city within 30 days after the application is submitted to address any city concerns about the project (e.g., city’s ability to

³ Several courts have held that a public agency may not contract away its police power or bind future boards or councils to exercise—or refrain from exercising—its legislative power in a particular way. (See, e.g., *Avco Community Developers, Inc. v. South Coast Regional Com.* (1976) 17 Cal.3d 785, 800; *Tiburon Open Space Committee v. City of Tiburon* (2022) 78

Cal.App.5th 700, 730-33; *County of Ventura v. City of Moorpark* (2018) 24 Cal.App.5th 377; *108 Holdings, Ltd. v. City of Rohnert Park* (2006), 136 Cal.App.4th 186, 195; *Alameda County Land Use Association v. City of Hayward* (1995) 38 Cal.App.4th 1716, 1724.)

provide water, sewer, and any other urban services for the project)⁴;

- hold joint meetings with the developer and the city at least once every two months while the County is processing the application and as otherwise requested by the city; and
- provide the city with written notice for all significant project events, including but not limited to the following:
 - County completeness/incompleteness letters issued pursuant to the Permit Streamlining Act, Gov. Code § 65920 et seq.;
 - Developer application resubmittals;
 - County determinations regarding what type of environmental review, if any, will be done for the project pursuant to the California Environmental Quality Act (CEQA), Pub. Res. Code § 21000 et seq.;
 - County notices issued pursuant to CEQA (e.g., notice of exemption, notice of preparation for an environmental impact report (EIR), notice to adopt a negative declaration/mitigated declaration, notice of availability of a draft EIR); and
 - Notices of community meetings, public hearings, and other public meetings/forums.

The County anticipates that its RHNA will be reduced during the 2023-2031 planning period, as parcels are annexed into the cities

⁴ Pursuant to Government Code section 65583.2(b)(5), the County Housing Element and accompanying Environmental Impact Report (EIR) describe and analyze the supply of utilities to all sites in the

and commensurate RHNA units are transferred between the County and the cities. However, for reasons described above, city annexations can be difficult to predict. In the fifth housing cycle from 2015 to 2022, the City of San José completed 7 annexations from the unincorporated County for a total of 63.5 acres. The most recent large-scale annexations occurred in the fourth housing cycle, 274 acres at Communications Hill in 2014 and two 100-plus acre sites in East San José in 2010.

The County will proactively monitor annexation applications, proactively communicate with LAFCO and the cities, and take any steps appropriate to support and coordinate with the cities and LAFCO for a smooth recordation of any annexations as they occur.

Infrastructure Capacity

Pursuant to Government Code section 65583.2(b)(5), the County Housing Element and accompanying Environmental Impact Report (EIR) describe and analyze the supply of utilities to all sites in the Housing Opportunity sites inventory, including that of the former Pleasant Hills Golf Course site. Appendix C of the EIR includes a Water Supply Assessment prepared by San José Water Company (SJWC), approved by the SJWC Board, and further analyzed by EIR consultants Environmental Science Associates and West Yost. SJWC would serve all Housing Element sites within the urban service areas of San José. Regarding the Pleasant Hills Golf Course site, the Water Supply Assessment concluded:

The impact of this project is not consequential and SJW has the capacity to serve this project through buildout based on current water supply capacity and Valley Water's proposed water supply

Housing Opportunity sites inventory, including that of the former Pleasant Hills Golf Course site.

projects ... After comparing estimated demand associated with this project to water supplies, based on both the SJW and Valley Water Urban Water Management Plans, SJW has determined that the water quantity needed is within normal growth projections and expects for there to be sufficient water available to serve the Project.

Wastewater generated by all Housing Element sites within the City of San José's USA would be treated at the San José-Santa Clara Regional Wastewater Facility (RWF). Based on 2020 data, the RWF was estimated to be at approximately 61 percent of its design capacity, and the City of San José was at about 61 percent of its treatment allocation. (EIR § 4.16.2.)

Other utility services, including electricity, natural gas, telecommunications, and solid waste collection, are readily available at all Housing Element sites within the USA of San José, including the Pleasant Hills Golf Course site.

The County Housing Element and accompanying EIR therefore determine, based on substantial evidence, that there is ample infrastructure capacity to support the development of all Housing Element sites, including the Pleasant Hills Golf Course site, within the range of units analyzed.

Despite the EIR's analysis, the City of San José has expressed concern that there may not be adequate infrastructure capacity to serve development of the Pleasant Hills Golf Course site at the density analyzed by the County. The City has not provided any evidence to support this claim. Moreover, the City asserts that the County should require development of this site at an even higher density than required in the County Zoning Ordinance. The City's conflicting assertions cannot be reconciled.

Government Code section 65589.7(a) requires public agencies or private entities that provide water or sewer services within the

County's territory to "grant a priority" to proposed housing developments that include affordable units. Pursuant to section 65589.7(c), a public agency or private entity that provides such services may only deny extension of the services for a proposed affordable housing development if it makes specific written findings that denial (or conditional approval) is necessary for certain reasons (e.g., insufficient water supply, treatment, collection, or distribution capacity to serve the development). Based on the information in the Water Supply Assessment and EIR described above, it would be difficult for the City of San José to make the necessary findings or to argue that it is unduly burdensome to extend services to any of the housing sites, including the Pleasant Hills Golf Course site.

RHNA Transfer

If the County approves a project application and issues the building permits for a site before annexation occurs, the County would still receive the RHNA credit for the housing units. If not, upon annexation by a city, the County would have a 90-day window under state law to reach agreement with the City to transfer a portion of the County's RHNA obligation to the City (Gov. Code § 65584.07(d)). If the County and City cannot reach an agreement, ABAG would decide the number of units that should be transferred to the City's RHNA allocation. State law does not provide any guidance to ABAG for making this determination.

Should a developer choose to submit an application to the County, prior to annexation, the County will continue to coordinate with the city regarding the development of these parcels, including infrastructure to provide the necessary urban services and future annexation, as appropriate.

Mid-Cycle Review

The County will conduct a mid-cycle review by December 2026 to determine if the combination of permits issued and units transferred via annexation are in line with projections to meet the County’s RHNA obligations by the end of the cycle. Should these numbers fall

below projections in this Housing Element, the County will re-evaluate its sites inventory list and explore additional ways to incentivize and remove barriers to housing production, especially at the affordability levels highlighted through the mid-cycle review (refer to Program 2.26).

Table 4.69: Coordinated Annexation and RHNA Transfer

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • Quarterly meetings with LAFCO and city staff to discuss and coordinate around prospective annexations. • Upon being notified of a potential development project in an unincorporated island within a city’s USA, the County will: <ul style="list-style-type: none"> ○ promptly notify the relevant city of the development proposal and encourage the city to proactively annex the site; ○ strongly encourage the developer to file a development application with the city and pursue annexation; encourage the developer to design the project to conform with city standards and requirements while still meeting all applicable County standards, to the maximum extent feasible; ○ provide the city with a copy of the application and any related materials within 15 days after the application is submitted; ○ convene a joint meeting with the developer and the city within 30 days after the application is submitted to address any city concerns about the project (e.g., city’s ability to provide water, sewer, and any other urban services for the project); ○ hold joint meetings with the developer and the city at least once every two months while the County is processing the application and as otherwise requested by the city; and ○ provide the city with written notice for all significant project events, including but not limited to County completeness/incompleteness letters, Developer application resubmittals, County determinations regarding what type of environmental review, if any, will be done for the project pursuant to the California Environmental Quality Act (CEQA), County notices issued pursuant to CEQA, and notices of community meetings, public hearings, and other public meetings/forums. • Upon annexation of an unincorporated parcel, the County will coordinate with the applicable city and ABAG to effectuate a commensurate transfer of RHNA units within 90 days. • By December 2026, complete review of permits issued in unincorporated areas, units transferred as the result of annexation, and a forecast for the remainder of the sixth cycle.

How to Use the Housing Element Update

A Housing Element is a planning document required by California state law as part of the local government's General Plan. The Housing Element is intended to address the current and future housing needs of a community, including the development, preservation, and improvement of housing for all income levels.

The California Department of Housing and Community Development (HCD) sets forth specific requirements for the Housing Element, including an assessment of housing needs, identification of sites suitable for housing development, and policies to promote affordable housing. The Housing Element must be updated every eight years to reflect changing community needs and to ensure that the local government is meeting its goals for housing production.

The Housing Element plays a critical role in California's efforts to address its housing crisis by providing solutions to affordability and quality in housing. By requiring local governments to plan for housing growth and development, the Housing Element helps ensure that California's communities can provide a range of housing options for residents at all income levels.

The 2023-2031 update to the County of Santa Clara Housing Element is divided into the following chapters:

Chapter 1: Overview of Housing Element Update 2023-2031

Chapter 2: Housing Needs and Production

Chapter 3: Fifth Cycle Performance Review and Sixth Cycle Housing Strategies and Policies

Chapter 4: County Housing Strategies, Policies, and Programs

How the Housing Element is used will vary greatly based on the user. This section gives some general suggestions based on different users. Please also review the Frequently Asked Questions section, for general questions about the Housing Element.

County Officials

As an elected or appointed official, you have a duty to oversee the development, preservation, and improvement of housing for members of your community. This includes future members of the community and those of varying income levels, abilities, ages, and backgrounds.

Professional staff employed by the County will also need to be familiar with the Housing Element to implement the goals, strategies, policies, and programs it contains.

The Housing Element contains goals and policies to guide you in your work to ensure that these goals are met while still allowing for an appropriate level of local control. Some of the key sections County officials should be familiar with include:

- **Chapter 2:** [2.04b Development Capacity Analysis](#).
- **Chapter 3:** [3.05 Sixth Cycle Housing-Related Strategies and Policies](#)
- **Chapter 4:** [County Housing Strategies, Policies, and Programs](#).

Homeowners

As a current or future homeowner, you may want to know how the Housing Element impacts you and your housing choices. The Housing Element contains information about housing-related programs for both first-time home buyers as well as current homeowners.

For those individuals looking to become first-time home buyers, the County has several programs that may be of assistance, including:

- **Chapter 4:** [Program 1.02 - Limited Equity Housing Cooperative Projects \(LEHCs\)](#).
- **Chapter 4:** [Program 1.04 - Empower Homebuyers SCC](#).
- **Chapter 4:** [Program 1.05 - Mortgage Credit Certificate \(MCC\) Program](#).
- **Chapter 4:** [Program 1.06 - Below Market Partnership Program](#).
- **Chapter 4:** [Program 1.31 – Minor Home Repair and Maintenance](#).

Existing homeowners can find several programs and policies that can assist them as well. Some of these programs may include additional information on how to add an Accessory Dwelling Unit (ADU) and/or Junior Accessory Dwelling Unit (JADU), programs to assist in home repair or maintenance, and information on how to keep your home safe from wildfires. Chapter 4 describes a number of these policies and programs including:

- **Chapter 4:** [Program 1.31 – Minor Home Repair and Maintenance](#).
- **Chapter 4:** [Program 2.06 - Streamline Accessory Dwelling Unit \(ADU\) Processing](#).
- **Chapter 4:** [Program 2.17 - Training and Support to Homeowners Aging in Place](#).

Please see Chapter 4 for the full list of programs and policies.

Landlords/Tenants

The County of Santa Clara has housing programs geared at assisting tenants as well as landlords, including:

- **Chapter 4:** [Program 1.18 - Tenant/Landlord Dispute Mediation Services](#).
- **Chapter 4:** [Program 1.19 - Eviction Diversion Program](#).

Please see Chapter 4 for the full list of programs and policies.

Developers

Coordination with housing developers, especially affordable housing developers, is crucial to seeing more housing built in Santa Clara County. Developers can use the Housing Element to learn more about the sites identified for additional housing development. They can also take advantage of some of the County's on-going efforts to free up additional land for residential development such as: Program 2.11 - Update Zoning Ordinance for Re-use of Non-Residential Buildings to Residential. Some sections of the Housing Element that may be of interest to developers include:

- **Chapter 2:** Housing Needs and Production
- **Chapter 4:** County Housing Strategies, Policies, and Programs

Affordable Housing Advocates

The provision of affordable housing is critical for the continued vitality of the Bay Area. The County of Santa Clara has partnered with affordable housing developers in the past and will continue to provide support through a number of programs and funding

mechanisms. To learn more about past projects, as well as future opportunities, please read the following sections:

- **Chapter 2:** [2.04b Development Capacity Analysis](#).
- **Chapter 3:** [3.03 Review of County's Investment in Countywide Housing Efforts During Fifth Cycle and Beyond](#).
- **Chapter 3:** [3.05 Sixth Cycle Housing-Related Strategies and Policies](#).
- **Chapter 4:** [County Housing Strategies, Policies, and Programs](#).

Special Housing Needs

Part of the role of the Housing Element is to plan for a variety of housing types for a wide variety of individuals and circumstances. This includes looking at situations such as housing for agricultural workers, Seniors, individuals with disabilities, and temporary housing. To learn more about these programs and policies please visit the following sections of the Housing Element:

- **Chapter 3:** [Sixth Cycle Housing-Related Strategies and Policies](#).
- **Chapter 4:** [County Housing Strategies, Policies, and Programs](#).

Members of the Community

Community engagement is a key part of the Housing Element update process. Throughout the process, the County of Santa Clara has reached out to community members like you for your input and feedback. Thank you for your participation in the Housing Element process and for your continued interest. To learn about how public input was incorporated into the Housing Element, please refer to the following section:

- **Chapter 1:** [Community Participation and Outreach](#).

Housing Element FAQ

What is the purpose of a Housing Element?

The purpose of a Housing Element is to address the current and future housing needs of a community, including the development, preservation, and improvement of housing for all income levels.

What are the requirements for a Housing Element?

The requirements for a Housing Element include an assessment of housing needs, identification of sites suitable for housing development, and policies to promote affordable housing. The Housing Element must be updated every eight years and approved by HCD.

The main categories or types of information and analysis required in a Housing Element update are:

- Identification and analysis of existing housing needs and projected housing needs;
- A statement of goals, objectives, strategies, and policies relating to the maintenance, preservation, improvement, and development of housing;
- An analysis of the capacity of the existing General Plan and Zoning Ordinance to meet projected needs; and,
- A summary of housing programs and a five-year schedule of implementation measures.

The 2023-2031 update serves four additional important purposes:

- To document local housing needs in the context of existing County land use and growth management policies;
- To affirmatively further fair housing throughout Santa Clara County;

- To explain important components of planning policies in Santa Clara County, which has urban growth management policies that guide urban housing development to occur within cities and Urban Service Areas (USAs) to preserve open space and promote rural land use densities outside cities; and
- To document the many other ways, in addition to the approval of residential development, by which the County contributes significantly to meeting local and countywide housing needs.
- Who is responsible for preparing a Housing Element?
- Local governments are responsible for preparing a Housing Element. In this case, the County of Santa Clara is responsible for the preparation and update of the Housing Element for the unincorporated areas of the county.

How often does a Housing Element need to be updated?

A Housing Element needs to be updated every eight years. HCD will release a detailed timeline of when Housing Elements need to be submitted to HCD and approved for compliance with State law.

How does a Housing Element address affordable housing?

A Housing Element addresses affordable housing through policies that promote the production of affordable housing, such as permit streamlining and zoning reform. It also acknowledges the use of public funds (such as Measure A) to help subsidize the development of affordable housing.

How does a Housing Element address the needs of different income levels?

A Housing Element addresses the needs of different income levels by identifying the housing needs of all income levels and developing policies to promote the production and preservation of housing for all income levels. The Regional Housing Needs Allocation (RHNA)

identifies housing production targets for a range of income brackets—ensuring that the County plan for housing at all income levels.

What role do public participation and community input play in the preparation of a Housing Element?

Public participation and community input are critical in the preparation of a Housing Element. Local governments are required to engage with the community in the development of the Housing Element, through public meetings and other outreach efforts, and the County of Santa Clara held numerous on-line and in-person events. Section 1.08 highlights the Community Engagement plan and all of the efforts that went into meeting with the community and integrating their feedback into the final draft of the Housing Element.

How are housing needs assessed in a Housing Element?

Housing needs are assessed in a Housing Element through an analysis of demographic data, population projections, and housing market data. In the case of the County of Santa Clara, the Association of Bay Area Governments (ABAG) developed the methodology to assess the housing need in the region, and then assigned a certain number of projected units to each member jurisdiction. This is called the Regional Housing Needs Allocation (RHNA).

RHNA methodology adopted by ABAG and approved by HCD intends to achieve five primary objectives: increase housing supply and mix of housing types; promote infill development and socioeconomic equity; promote improved intraregional jobs-housing relationship; balance disproportionate household income distributions; and affirmatively further fair housing.

What is the role of the state government in the review and approval of a Housing Element?

The state government reviews and approves Housing Elements to ensure they comply with state law and meet the state's housing goals. HCD provides guidance and technical assistance to local governments in the preparation of the Housing Element.

Chapter 1: Overview of Housing Element Update 2023-2031

1.01 Introduction

This document serves as the Housing Element Update to the Santa Clara County General Plan for the planning period of 2023-2031 (2023 Update) and is Appendix No. 4 of the General Plan. The Housing Element is one of seven mandated elements of a jurisdiction's General Plan. Its content requirements are more detailed, extensive, and complex than other mandated elements

within the General Plan. This document addresses the housing-related subject matter required under State law.

This 2023 Update is organized into four chapters:

Chapter 1: Overview of Housing Element Update 2023-2031

Chapter 2: Housing Needs and Production

Chapter 3: Fifth Cycle Performance Review and Sixth Cycle Housing Strategies and Policies

Chapter 4: County Housing Strategies, Policies, and Programs

The 2023 Update primarily uses the same organizational structure as that of the 2015 Housing Element Update (2015 Update), an approach consistent with State Department of Housing and Community Development (HCD) preferences and guidelines. This technique allows the review of the 2023 Update to qualify for streamlined review, facilitating comparison with the previous update for purposes of the State's review, and provides for continuity from one update to the next. The content of the 2023 Update is based on the State's publication "*Building Blocks for Effective Housing Elements*" and related checklists provided for the purpose of locating content and relating it to the various requirements set forth in State law.

The main categories or types of information and analysis required in a Housing Element update are:

- Identification and analysis of existing housing needs and projected housing needs;
- A statement of goals, objectives, strategies, and policies relating to the maintenance, preservation, improvement, and development of housing;

- An analysis of the capacity of the existing General Plan and Zoning Ordinance to meet projected needs; and,
- A summary of housing programs and a five-year schedule of implementation measures.

The 2023 Update serves four additional important purposes:

- To document local housing needs in the context of existing County land use and growth management policies;
- To affirmatively further fair housing throughout Santa Clara County;
- To explain important components of planning policies in Santa Clara County, which has urban growth management policies that guide urban housing development to occur within cities and Urban Service Areas (USAs) to preserve open space and promote rural land use densities outside cities; and
- To document the many other ways, in addition to the approval of residential development, by which the County contributes significantly to meeting local and countywide housing needs.

1.02 Executive Summary

Planning Period for Current Update

This section provides an executive summary of key information and findings of the 2023 Update.

County Produced Housing Consistent with Regional Housing Need Allocation and Forecast for the 2015 Update

From 2015 through the end of 2022, 3,214 housing units were produced in the unincorporated county. This level of production meets and exceeds the 277 units assigned for the 2015-2022 planning period (fifth cycle) Regional Housing Needs Allocation (RHNA) by 2,937 units. In the 2015 Update, the County forecasted that permits would be issued for 2,082 units through 2022. Chapter 2

includes detailed information about the County's housing production in the last planning cycle.

Changes to Policy Direction and Strategies Proposed in 2023 Update

The Housing Element Update is a part of, and is required to be consistent with, the County's General Plan, including the countywide growth management policies, health and transportation elements, and relevant portions of other elements. The goals, strategies, policies, and implementation measures described in the 2023 Update are consistent with, and promote the goals and policies of, the overall General Plan. **However, with a RHNA assignment that has increased 1,028 percent from the previous cycle, from 277 units to 3,125 units, the County will need to make a few meaningful changes to the County's General Plan policies.** Furthermore, the County has added new strategies and policies to meet the challenges of present and future climate change impacts and to remedy long-standing systemic discrimination in housing policies and the inequitable outcomes of such policies.

The primary shift in the County's General Plan is to modify long-standing policies that confer long-range planning responsibilities for urban unincorporated pockets within the USAs (also known as unincorporated "islands") to the associated city jurisdiction. In October 2023, the County modified its General Plan to allow long-range planning for housing in these areas, especially where the city does not have a plan for annexation during a specific Housing Element planning period.

Aside from these necessary modifications, the existing housing strategies and policies are effective, and they provide a broad and comprehensive framework to guide planning and decision-making related to housing issues in the unincorporated county during the period of 2023-2031. Chapter 2 includes detailed information about

the County’s completed, ongoing, and new housing strategies and policies.

Regional Housing Needs Allocation Description

The County’s RHNA is based on a model and assumptions about projected growth in housing need determined by the regional Council of Governments, in this case the Association of Bay Area Governments (ABAG). The RHNA assignment for the unincorporated areas of the county for the 2023-2031 planning period is 3,125 housing units, a dramatic increase from the 277 units allocated for the previous, 2015-2022 planning period. This increase is due to the RHNA methodology developed by ABAG, which includes three important components:

1. The baseline allocation based on ABAG’s Plan Bay Area 2050 Final Blueprint;
2. Factors and weights for allocating units based on income categories (Access to High Opportunity Areas and Jobs Proximity); and,
3. Equity Adjustment based on the approach developed by ABAG’s Housing Methodology Committee.

Figure 1.1 shows the RHNA assigned to the County, by affordability categories.

Figure 1.1 RHNA County Assignment

County Capacity to Meet RHNA and Accommodate Necessary Housing

The 2023 Update includes detailed information and analysis to determine whether housing capacity exists within the existing General Plan and Zoning Ordinance to accommodate projected needs and production obligations assigned through the RHNA. Based on an evaluation of general housing capacity within urban unincorporated areas, combined with capacity on Stanford University lands as defined under the Stanford Community Plan and 2000 General Use Permit, the County has identified sites providing 110 percent more capacity than is required under the RHNA. This extra capacity is necessary to ensure that if one or more large sites identified at Stanford or within the City of San José USA do not result in housing development projects during the 2023-2031 planning period, the County will still have enough capacity to accommodate its RHNA target. The County expects that by selecting sites sufficient to meet twice its RHNA target, it will ensure development

opportunities remain available throughout the planning period, especially for lower- and moderate-income households, pursuant to Government Code Section 65863 (the No Net Loss Law). Chapter 3, section 3.05, and Appendix A includes the County sites inventory and more information on the County's ability to meet its RHNA assignment. Chapter 3, Section 3.03 includes more information on ABAG's process for determining the County's RHNA and Projected Housing Need.

Existing Housing Needs

Chapter 3 provides detailed demographic and other statistical information required by housing element law and the State's *Building Blocks for Effective Housing Elements*. The primary purpose is to describe and assess existing housing needs for the unincorporated area population. The existing needs analysis is distinct and separate from the RHNA target for projected housing needs, based on projected population and economic growth.

Table 1.1: Summary Capacity to Meet RHNA Allocation

Location	Affordable Units			Above Moderate Income (>120% of Area Median Income)	Total	
	Affordable Units Share	Very Low Income (<50% of Area Median Income)	Low Income (<50%-80% of Area Median Income)			Moderate Income (<80%-120% of Area Median Income)
San Jose	33%	739	370	384	3,025	4,518
Fruitdale/Santa Clara Valley Medical Center	100%	186	69	45	-	300
Pleasant Hills	16%	228	114	114	2,394	2,850
Hostetter Station	58%	325	187	200	514	1,226
Parkmoor/Burbank Neighborhood	18%	-	-	14	62	76
Alum Rock/East Foothills	17%	-	-	10	48	58
Cambrian Park	13%	-	-	1	7	8
Stanford	50%	336	252	252	840	1,680
Quarry Sites	50%	196	147	147	490	980
Escondido Village	50%	140	105	105	350	700
ADUs	25%	-	-	92	276	368
Total		1,075	622	728	4,141	6,566
RHNA Assignment		828	477	508	1,312	3,125
Surplus Units		247	145	220	2,829	3,441
% of RHNA Target		130%	130%	143%	316%	210%

Section 3.02 documents unincorporated area housing needs through a series of tables and analyses based on available population, demographics, and housing data. Section 3.03 provides detailed analysis of housing capacity in relation to the RHNA target for projected housing needs. Section 3.04 documents recent unincorporated housing development, and Section 3.05 further describes issues relating to housing development potential for the unincorporated areas. The conclusion of Chapter 3, Section 3.05, is that the County has the capacity to accommodate the projected housing needs in the unincorporated area, as determined by ABAG.

Evaluation of Governmental and Non-Governmental Factors and Constraints

Section 3.06 provides a broad review and evaluation of governmental factors that influence housing production and affordability. The section provides an overview of many topics, including land use policies and regulations referred to generally as “land use controls,” impact fees, accessory dwelling unit provisions, building codes, development and site improvement standards, fees and exactions, processing and permitting procedures, special needs housing, and code enforcement, among other subjects.

The County’s overall conclusions are that, in general, the County’s policies, regulations, permit processes, and related factors support housing development in the unincorporated areas. However, certain areas are identified as areas where the County can further streamline development review or increase housing development in the county. These areas include:

- Additional housing on the Stanford campus for graduate students, staff, faculty and other workers; and
- Updating the County General Plan policies to allow the County to plan for housing within urban unincorporated pockets that are

within the USA of an adjacent city and slated for future annexation.

Section 3.07 describes non-governmental factors influencing the production of housing, such as national and regional economic conditions, land costs, financing and mortgage industry trends, general labor and material costs, and similar information of relevance to the region and unincorporated Santa Clara County.

Compilation of Housing Programs, Projects, Studies, and Activities

Lastly, the Housing Element provides an overview of the most important housing programs, projects, studies, and activities intended to promote housing supply, rehabilitation, preservation, affordability, and a variety of other related goals and objectives, including programs that affirmatively further fair housing (AFFH). This compilation is contained in Chapter 4 of the 2023 Update and is based upon and modified from the 2015 Update.

Chapter 4 documents the County’s significant role in providing housing, especially affordable housing, despite only having land use authority over the limited amount of urban housing development that occurs within unincorporated areas. The County’s significant involvement in housing-related programs and its long-standing philosophy and commitment to regional solutions to housing needs is evident in the program summaries provided in Chapter 4. Most of the programs and activities in which the County participates provide important funding and services throughout the cities and unincorporated areas alike, meeting the needs of residents across jurisdictional lines.

The County has included an Assessment of Fair Housing (AFH) as Appendix L, which is intended to provide a holistic look – informed by data, maps, community input, and policy analysis – into the trends and factors affecting access to housing and opportunity on the basis

of protected characteristics under federal and state fair housing laws. The Housing Element must include such an AFH component as a result of Assembly Bill (AB) 686, a law passed by the California Legislature in 2018 to incorporate a duty to affirmatively further fair housing into state law.

1.03 Terminology Used in the 2023 Update

For purposes of the 2023 Update, the terms “County of Santa Clara” and “County” refer to the governing body and not the geographic area.

The terms “unincorporated Santa Clara County” and “unincorporated county” refer to the geographic area under the jurisdiction and land use authority of the County of Santa Clara. The terms “Santa Clara County” and “county” refer to the geographic region that consists of unincorporated areas of Santa Clara together with the 15 cities located within Santa Clara County. The terms “countywide” and “county as a whole” are synonymous with “Santa Clara County.”

The terms urban unincorporated “pocket” and “island” refer to unincorporated urban areas within USAs and surrounded by city boundaries, awaiting annexation by the surrounding city jurisdiction.

Lastly, the term “Urban County” consists of all unincorporated areas as well as the following jurisdictions that participate jointly in the HOME and Community Development Block Grant programs: Campbell, Los Altos, Los Altos Hills, Los Gatos, Monte Sereno, Morgan Hill, and Saratoga.

1.03a Terms and Acronyms

- **ABAG:** [The Association of Bay Area Governments](#). ABAG is the Council of Governments and regional planning organization for

the jurisdictions of the nine counties of the San Francisco Bay Area. ABAG is now organizationally merged with the Metropolitan Transportation Commission (MTC).

- **ACS:** American Community Survey. The ACS is a Census Bureau product that provides yearly demographic information, to supplement the decennial Census.
- **AFFH:** [Affirmatively Furthering Fair Housing](#). The Federal Fair Housing Act requires HUD and recipients of federal funds from HUD to affirmatively further the policies and purposes of the Fair Housing Act.
- **AFH:** Assessment of Fair Housing. Jurisdictions are required to prepare an [Assessment of Fair Housing](#), which is a plan that examines barriers that people face in obtaining and keeping housing and measures that our jurisdictions can take to reduce these barriers and promote equal opportunity in housing.
- **AMI:** Area Median Income, as used for Federal and State funding purposes. For jurisdictions in Santa Clara County, including the unincorporated county, the Area Median Income in 2022 is \$168,500 for a household of four.
- **DoF:** [State Department of Finance](#). The DoF provides population estimates and projections by city and by county.
- **HCD:** The [State Department of Housing and Community Development](#). HCD reviews each jurisdiction’s housing element for compliance with State housing law.
- **HUD:** [U.S. Department of Housing and Urban Development](#).
- **MTC:** [Metropolitan Transportation Commission](#). The MTC is the Bay Area region’s transportation planning, coordinating, and financing agency. MTC is now organizationally merged with ABAG.

- **N/A:** “Not Applicable”
- **NDA:** “No Data Available.” Table cells marked with “NDA” are statistics that are not reported by the source agencies at the city or unincorporated area level of detail.
- **RHNA:** [The Regional Housing Needs Allocation](#). The RHNA is the projected housing need for jurisdictions, as allocated to each jurisdiction by ABAG.
- **SOI:** Sphere of Influence. A planning boundary outside of a city’s legal boundary (such as the city limit line) that designates the city’s probable future boundary and service area as determined by the Local Agency Formation Commission (LAFCO). Factors considered in a sphere of influence review focus on the current and future land use, the current and future need and capacity for service, and any relevant communities of interest.
- **USA:** Urban Service Area. Delineates areas currently annexed and provided with urban services; or areas that a city intends to annex in order to develop and provide urban services, as determined by LAFCO.

1.04 Housing Policy and Development in Relation to Smart Growth General Plan Policies and Climate Change Policies

The County’s housing-related policies reflect a smart growth approach to land use and development. The cities, County, and LAFCO have developed and implemented a system of urban growth management that has been in place since the early 1970s. Cities are generally responsible for planning and accommodating urban

growth and development, including higher-density housing, within cities and their USAs. Outside the USAs, the unincorporated rural areas are intended to remain in farmland, open space, natural resource protection, and low-density land uses that support the rural resource base. In these areas, the allowed density of development is low by necessity, due to the lack of urban services, and minimum lot sizes for subdivision are typically five acres or larger.

Since the previous update to the Housing Element, the County has embarked on a significant planning effort to preserve agricultural lands and operations as a means of bolstering regional resilience to the effects of climate change. This effort began with the development and adoption of the [Santa Clara Valley Agricultural Plan](#) (Ag Plan), which studied the local effects of sprawl development and trajectory of farmland loss in the region. The Ag Plan concluded that local greenhouse gas emissions increased by nearly 77 times when rural unincorporated farmland was developed.¹ This massive increase in emissions could be attributed to the increase in vehicle miles travelled (VMT) resulting from rural low-density residential development. The Ag Plan further concluded that, in addition to avoiding increased VMT as a result of residential sprawl, agricultural preservation in the county would also provide a rich opportunity for climate resilience. The County determined that the management of local agricultural lands can be optimized to sequester significant amounts of atmospheric carbon into the soil and provide enhanced climate resilience in the form of improved watershed management, wildlife habitat conservation, fire hazard mitigation, flood plain protection, groundwater recharge, erosion control, pest and disease management, and air quality regulation. Through the implementation of the Ag Plan, the County has revised and redoubled its

¹ See [Ag Plan Appendix G](#), Steve Shaffer (2016).

commitment to preventing sprawl development and to advancing smart growth policies from an affirmative rural land use perspective.

The County has also developed “Silicon Valley 2.0,” which consists of a [Climate Change Preparedness Decision Support Tool](#), a [Climate Adaptation Guidebook](#), and [high-resolution maps](#) showing areas throughout the county that are vulnerable to extreme heat, riverine flooding, sea level rise, storm surge, and wildfire. These resources support the entirety of the county with climate risk assessment, adaptation, and resilience planning. The County expects that the impacts of climate change will increasingly impact the location of residential development in the region, and that the County will increasingly bolster and rely upon its smart growth land use policies.

Within the USAs in the county, the urban unincorporated islands have long been identified by the cities, the County, and LAFCO for eventual annexation and incorporation. This policy reinforces the role of cities to plan for and accommodate new urban development within USAs. As the islands have been annexed, the unincorporated population has decreased by 37% from 1970-2010, while the total county population has increased by nearly 67%. Given the inevitable land use control by the City over these areas, the County policies have accorded indirect long-range planning authority in advance of annexation. Cities have therefore been responsible for planning infill development and higher-density housing in the USAs. Proposals by property owners for development of individual parcels within USAs also trigger the opportunity for the corresponding city to annex the property.

The methodology used by ABAG for determining the sixth cycle RHNA included and analyzed urban unincorporated pockets as the planning responsibility of the County, despite the expectation that

those parcels will need to be annexed to gain access to sewer and water services, which the County does not provide. Given the County’s longstanding collaborative policies with the cities and LAFCO, the County appealed ABAG’s methodology, but the appeal was denied.² Therefore, by necessity, the County’s approach to site selection for the 2023 Update reflects a departure from previous planning periods. Although annexation continues to be an expected prerequisite to any significant development within urban pockets, the County will now begin to plan for the projected housing needs in these areas. As needed and to accommodate this cycle’s RHNA assignment, the County has amended its General Plan in October 2023 to enable such long-range planning for urban development in the unincorporated islands. More information on ABAG’s approach to the urban pockets in its RHNA methodology is provided below in Section 1.06.

1.05 The County’s Special Role in Housing Production

Within the context of regional, long-standing growth management and smart growth policies, the County’s primary role in housing development has been providing financial and technical assistance to create more affordable, below-market rate housing and special needs housing through the County’s Office of Supportive Housing (OSH). Although the County’s role in issuing permits for affordable and multi-family housing development is limited, the County makes other significant contributions to housing affordability and development that are in line with AFFH guidelines, including, but not limited to:

² [ABAG appeal documents linked here.](#)

- funding for construction, rehabilitation, and preservation of affordable and supportive housing for special needs populations;
- providing rental subsidies to special needs populations;
- creating and assisting shelters with operating funds;
- providing financing for first-time and low-income homebuyers;
- offering and funding services to address housing discrimination and landlord-tenant dispute resolution;
- generating opportunities for new housing on surplus County-owned lands; and
- facilitating housing-related advocacy and education.

The County works in concert with non-profit organizations and local agencies, such as the Santa Clara County Housing Authority, to actively provide a wide variety of housing assistance countywide, not only within the unincorporated areas under the County's planning jurisdiction. These efforts include funding for non-profit affordable housing developers and local agencies to construct affordable housing, maintain affordable rents, and loans for rehabilitation. The County is also a significant funder of housing for residents who have special needs and receive other supportive services from the County, which include seniors and people with mental illnesses, substance abuse disorders, and HIV/AIDS. The County funds and provides emergency shelters, transitional and supportive housing, and housing for other special needs populations countywide. More information on the County's programs supporting housing production is provided in Chapter 4.

1.06 ABAG Allocation Methodology and Unique Aspects of County Planning

ABAG's housing allocation methodology and procedures apply to all nine Bay Area counties and 101 cities. In past cycles, the RHNA targets assigned to cities included the projected development of areas within the cities' Spheres of Influence (SOI), including unincorporated areas under the jurisdiction of counties. However, in a change of course, ABAG based the final RHNA methodology for this cycle on present-day jurisdictional boundaries instead of SOI and areas expected to be annexed. This change has the effect of significantly increasing the urban areas appropriate for higher-density development falling under the County's RHNA obligation, due to the existence of unincorporated islands slated for annexation and city development. This is how the County's sixth cycle RHNA target grew by 1,028% from the fifth cycle target.

ABAG, through an ad hoc Housing Methodology Committee comprised of local elected officials, staff, and other stakeholders, elected to use a RHNA allocation method titled "*High Opportunity Areas Emphasis & Job Proximity*." This model incorporates household data from the [Plan Bay Area 2050 Final Blueprint](#), the region's comprehensive land use, transportation, and housing plan, prepared by ABAG. A central feature of Plan Bay Area is the targeting of growth and infrastructure investment in existing developed areas near jobs and transit (Priority Development Areas, or PDAs). Plan Bay Area's focus on PDAs generally supplements and complements Santa Clara County's countywide urban growth management policies. The final RHNA methodology adopted by ABAG and approved by HCD intends to achieve five primary objectives: increase housing supply and mix of housing types; promote infill development and

socioeconomic equity; promote improved intraregional jobs-housing relationship; balance disproportionate household income distributions; and affirmatively further fair housing.³

Of the 441,176 total housing units assigned to the Bay Area region by the State, the County was allocated 3,125 units, which are further broken down by income category. In the past, ABAG's RHNA methodology generally allocated growth and housing need within a city's SOI to that city, resulting in a low RHNA target for the County, corresponding only to those unincorporated areas that are not within a city's SOI or within a City's USA boundaries within a SOI.

Historically, such methodology and its low allocation to the County have been appropriate given the County's limited role in approving and issuing permits for new housing development in urban areas. This approach was consistent with the County's General Plan policies, which have thus far provided that cities in Santa Clara County plan for and annex areas appropriate for urban development, particularly those lands within USAs, where development is already most feasible.

ABAG's new approach to RHNA methodology requires the County to plan for development in the urban unincorporated pockets. The more rural areas of the unincorporated county are not suitable for significant increases to the housing stock, due to the lack of municipal infrastructure like water and sewer service, but also due to the increased VMT, traffic, and emissions associated with sprawl development.

A notable exception to the County's General Plan policies is Stanford University's unincorporated Community Plan Area, which is for the most part located within Palo Alto's SOI and USA but has not and will not be annexed into Palo Alto because of a 1985 land use policy

agreement among the City of Palo Alto, the County, and Stanford University setting forth that academic land uses and lands held in reserve for future academic uses shall remain unincorporated. This agreement has resulted in the County having the long-range planning and permitting authority for the campus. Consequently, the responsibility of identifying housing opportunities and planning for growth and development on Stanford's academic lands appropriately resides with the County.

Housing element law requires that cities and counties take responsibility to plan for housing on lands under their planning authority and regulatory control. The County's 2023 Update therefore focuses on the unincorporated areas, in terms of population and demographic data and housing capacity and development potential – including, now, urban unincorporated pockets. However, the County has long recognized that housing needs and issues are regional in nature and require regional solutions. Therefore, the County has and will continue to administer most of its housing programs, activities, and projects on a countywide basis, not only for the unincorporated areas under its planning jurisdiction.

1.07 Sustainable Communities Strategy and Plan Bay Area

The Bay Area's implementation of Senate Bill (SB) 375 is its Sustainable Communities Strategy, which is an important component of [Plan Bay Area 2050](#). Plan Bay Area 2050 provides for regional growth through 2050 and beyond by focusing on transportation infrastructure investment and housing capacity within the region's PDAs. PDAs are areas where local jurisdictions believe there is

³ https://abag.ca.gov/sites/default/files/documents/2022-04/Final_RHNA_Methodology_Report_2023-2031_March2022_Update.pdf

capacity and demand for focused growth in population and infrastructure. Most PDAs are centered around existing transportation infrastructure. Relatively little growth is expected or planned for in the peri-urban⁴ or rural areas of the region. However, ABAG and the State recognize that for households to be successful, there is a strong need for access to opportunities. These opportunities may not be available in the defined PDAs. To that end, the State has mapped High Opportunity Areas, where jurisdictions are encouraged to add additional housing, particularly affordable and diverse housing unit types.⁵

In Santa Clara County, the High Opportunity Areas cover primarily high-income jurisdictions and neighborhoods. These areas only partially overlap some of the urban unincorporated pockets within USAs. Three significant unincorporated areas that the County has identified for housing development during the 2023-2031 cycle are High Opportunity Areas:

- Stanford University campus
- Cambrian Park
- Hostetter Station

In addition, the Pleasant Hills site is adjacent to a High Opportunity Area and is significant enough in size to support affordable and diverse housing types. The County will seek a greater share of affordable housing within new development in these areas. More detailed information on these sites can be found in the site inventory, Appendix A.

⁴ The term “peri-urban” refers to an area surrounding an urban area, where urban development meets countryside, in contrast to suburban areas.

In addition to the High Opportunity Areas and PDAs, Plan Bay Area 2050 provides eight strategies to improve housing across the Bay Area, using ABAG’s “Hx” convention for housing strategies:

- H1.** Further strengthen renter protections beyond State law.
- H2.** Preserve existing affordable housing.
- H3.** Allow a greater mix of housing densities and types in Growth Geographies.
- H4.** Build adequate affordable housing to ensure homes for all.
- H5.** Integrate affordable housing into all major housing projects.
- H6.** Transform aging malls and office parks into neighborhoods.
- H7.** Provide targeted mortgage, rental, and small business assistance to Equity Priority Communities.
- H8.** Accelerate reuse of public and community-owned land for mixed-income housing and essential services.

To the extent feasible and appropriate, the County endeavors to further these strategies through this 2023 Update and future updates to the County Housing Element.

1.08 Community Participation and Outreach

Community participation and outreach played a critical role in the development of the 2023 Update. An iterative engagement program ensured stakeholders, community representatives, and members of the public were given opportunities to review project progression and provide input to influence the development of core components

⁵ The State mapping tools used to delineate different levels of opportunity is [available here](#).

of the plan. Consultation with stakeholders and the broader community began in June 2022 and concluded in Spring 2023.

Extra care was taken to engage a diverse range of community members representing various economic and cultural backgrounds. To reach a broad cross-section of the community, advertisements were placed on social media in Spanish, Simplified and Traditional Chinese, and Vietnamese. The County also provided interpretation services at both public meetings. All stakeholder organizations consulted throughout the process were encouraged to serve as project champions and to communicate engagement opportunities through their networks (see the full list of stakeholder organizations further in this chapter). These organizations included housing advocacy groups, seniors’ groups and other community-based organizations representing vulnerable populations. Additionally, community-based organization CARAS was onboarded to conduct surveys and an in-person listening session with Spanish-speaking residents and farm workers in the southern portion of the county. The online survey collected demographic information from participants through an optional question. The results can be found on page 42.

The project’s phased engagement approach is demonstrated in Figure 1.2 and described in detail below.

Figure 1.2: Housing Element Update Community Participation and Outreach Process

1.08a Phase 1: Information Gathering

The purpose of Phase 1 was to understand current conditions through information gathering with stakeholders and the public. Engagement included a series of two stakeholder workshops, two community workshops, and a community survey. Feedback from the community was used to identify opportunities and challenges that could be addressed in the Housing Element Update. Participant feedback informed the County’s review of previous housing strategies and helped to identify new strategies for discussion in Phase 2.

1.08b Phase 2: Draft Policies

In Phase 2, the project team returned to stakeholders and the community with draft strategies and policy goals developed based on the information gathered in Phase 1. The project team hosted two stakeholder workshops, one community workshop, and one listening session. Participants were asked to provide feedback to refine the strategies and policy goals prepared by the project team. Feedback was used to inform the development of the draft Housing Element Update document for public review in Phase 3.

1.08c Phase 3: Public Release

The third phase of outreach occurred following the release of the draft Housing Element Update. The public review and comment period began on March 21, 2023, and lasted 30 days, as required under State law. During this time, mailers were sent to all property owners within 300 feet of parcels identified in the site inventory. All comments received during this period were reviewed and considered carefully by County staff. Where appropriate, clarifications and additional information were incorporated into this document in response to public comments. Such amendments were made during the 10-day period following public comment, as required under State

law. A table summarizing the public comments can be found in Appendix J.

1.08d Additional Engagement

Community feedback from similar Santa Clara County projects has also been considered. These projects are the [Stanford Community Plan](#) and [Let’s Talk Housing](#). While separate from the Housing Element engagement process, housing-related input from these projects has been considered by County consultants and staff.

Stanford Community Plan (SCP): Stanford lands within unincorporated Santa Clara County are governed by policies in the Stanford Community Plan (SCP). Development within the SCP area is currently regulated under the 2000 General Use Permit (GUP). Through several outreach efforts conducted in association with a new General Use Permit application, it was brought to the Board of Supervisors’ attention that updates to the SCP are necessary. Despite Stanford withdrawing its GUP application in 2019, the County is currently proceeding with revisions to the SCP to, among other goals, support housing development on campus. The final SCP update will be completed along with the Housing Element Update.

The SCP includes chapters that guide the development of the Stanford academic lands, such as, Growth and Development, Land Use, Housing, Circulation, Open Space, Resource Conservation, and Health and Safety. Many of these chapters include strategies, policies, and implementation measures supporting housing development. As such, the updates to the SCP refer to the County’s Housing Element and this 2023 Update.

Outreach efforts and public meetings regarding the SCP are listed in Table 1.2:

Table 1.2: Outreach Efforts and Public Meetings

MEETING	AUDIENCE(S)
<p>Community Outreach Meetings</p> <p>2020 September 3, 22, October 1, 21, 22, November 10, 12, December 3, 7</p> <p>2021 March 18, April 15</p> <p>2022 April 26, May 19, May 25</p>	<p>General public and stakeholder and interest groups</p>
<p>Housing, Land Use, Environment, and Transportation Committee (HLUET) Meetings</p> <p>2020 May 19, June 18, October 15</p> <p>2021 February 16, May 27, August 12, November 9</p> <p>2022 February 17, May 19, September 15</p>	<p>HLUET Committee, general public, stakeholders, and interest groups (opportunity provided for written and spoken comment)</p>
<p>Planning Commission Meetings</p> <p>2020 November 19</p> <p>2022 May 26, July 14, August 4, August 31, October 27</p>	<p>Planning Commission, general public, stakeholders, and interest groups (opportunity provided for written and spoken comment)</p>
<p>Board of Supervisors Meetings</p> <p>2020 February 11, October 20</p> <p>2022 September 27, October 18, December 13</p>	<p>Board of Supervisors, general public, stakeholders, and interest groups (opportunity provided for written and spoken comment)</p>

Let’s Talk Housing: On August 11, 2021, the Santa Clara County Planning Collaborative held a virtual countywide community meeting to provide an opportunity for community members to learn more about upcoming Housing Element updates and gain a better understanding of how they can participate in the preparation process. The meeting was targeted towards community members

living in the Cities of Gilroy and Morgan Hill, and unincorporated areas of the county.

During the meeting, staff from the Santa Clara County Planning Collaborative provided an overview of the Housing Element followed by breakout rooms for Gilroy, Morgan Hill, and the County, where each jurisdiction could speak towards the current state of housing, RHNA targets, and goals for the jurisdiction’s upcoming respective Housing Element updates. Timelines for the County’s 2023 Update were also shared.

1.09 Communication Methods

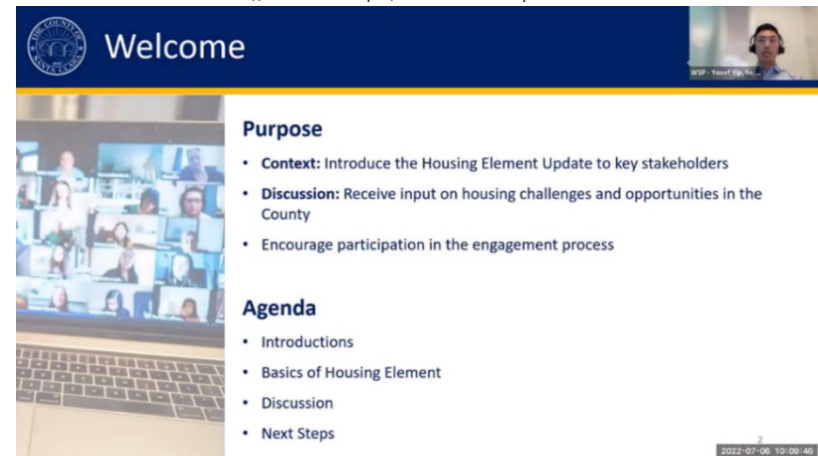

Communication to promote the 2023 Update, raise awareness, and encourage participation, was a critical component of the engagement program. The communication methods utilized are set forth below in Table 1.3.

Table 1.3: Communications Methods

DATE	MEDIA	PURPOSE
June 27, 2022	Nextdoor* Facebook* Twitter Instagram Stories	Prepare community for upcoming outreach meetings and promote webpage
July 1, 2022	County of Santa Clara Press Release to Media Distribution List and County Webpage	Community encouraged to participate in the process from July – September 2022
July 14, 2022	Nextdoor* Facebook* Twitter	Promote Community Workshops No. 1 (July 19) & No. 2 (July 21)
September 5, 2022	Facebook* Twitter Instagram	Promote Community Meeting No. 3 (Sept 7)

DATE	MEDIA	PURPOSE
July 8, 2022 July 19, 2022 July 21, 2022	E-Blast (issued to participants registered for updates through the project website)	Promote Community Workshops No. 1 (July 19) & No. 2 (July 21)
August 31, 2022 September 2, 2022 September 7, 2022	E-Blast (issued to participants registered for updates through the project website)	Promote Community Meeting No. 3 (Sept 7)
Ongoing	Project Website*	Provide a schedule of upcoming meetings and events

**Notes communications offered in Simplified Chinese, Spanish, and Vietnamese*

1.10 Engagement Methods

Community participation and outreach was implemented through a multi-method approach to maximize opportunities for involvement from local stakeholders and a broad cross-section of the community. Recognizing comfort level with in-person meetings following the COVID-19 pandemic, most of the public engagement was completed virtually. The following section describes the engagement methods

used to involve the public in the development of this Housing Element Update.

1.10a Project Website

The [project website](#) serves as the central portal for all Housing Element Update information. The landing page provides a concise overview of the project purpose and information about what the Housing Element is intended to accomplish. The website also

includes tabs to navigate to important information, such as, upcoming events, descriptions of major components to the update, data on housing trends in the county, links to previous Housing Element updates and the survey and registration form.

Social media posts, emails, and presentations all directed members of the community to the website for updated project information.

1.10b Stakeholder Workshops

The County of Santa Clara compiled a list of stakeholders representing service providers, housing advocates, affordable housing developers, government agencies, county departments, environmental advocates, and more. The County also included stakeholders involved in the Applicant Roundtable (representing the County’s most frequent applicants), stakeholders suggested by the County Office of Supportive Housing, and elected and/or appointed

officials and their representatives. Stakeholders were invited to a series of workshops to provide feedback to the project team at key milestones. Formal invitations were issued to stakeholders prior to each workshop to encourage participation. Attendees were asked to act as ambassadors for the project, sharing community meeting opportunities through their networks. Approximately 52 organizations were represented at the stakeholder workshops and are listed below.

Participating Organizations:

- Adobe Services
- Allied Housing
- Bay Area Building Industry Assn.
- Boys & Girls Club of Silicon Valley
- Burbank Community Association
- CARAS
- Charities Housing
- City of Gilroy
- City of Morgan Hill
- City of Santa Clara
- County of Santa Clara Agricultural Division
- County of Santa Clara Dept. of Aging and Adult Services
- County of Santa Clara Dept. of Planning and Development
- County of Santa Clara Dept. of Public Health
- County of Santa Clara Office of the County Counsel
- County of Santa Clara Office of Supportive Housing
- Habitat for Humanity East Bay/Silicon Valley
- Housing Choices
- Housing Trust Silicon Valley
- Latinos United for a New America
- Law Foundation of Silicon Valley
- MH Engineering
- MidPen Housing
- Midpeninsula Regional Open Space District
- Milligan Land Company
- New York Life
- Rebuilding Together Silicon Valley
- Ruggeri-Jensen-Azar
- San Antonio Hills Homeowners Assn.
- San Martin Neighborhood Assn.
- Santa Clara County Housing Authority
- Santa Clara County LAFCO
- Santa Clara Valley Open Space Authority

- County of Santa Clara Office of Sustainability
- County of Santa Clara Parks and Recreation Dept.
- Dividend Homes
- Eden Housing
- Gilroy Dispatch
- Gilroy Historical Society
- Green Foothills
- Greenbelt Alliance
- Silicon Valley at Home (SV@Home)
- Silicon Valley Coalition for the Unhoused
- Silicon Valley Independent Living Center
- Silicon Valley Leadership Group
- South Bay YIMBY
- Stanford University
- West Valley Community Services

All workshop materials – including the presentation slide decks, meeting recordings, and meeting summaries – were posted to the project website for public review. All summaries were translated into Spanish, Simplified Chinese, and Vietnamese, with some translated into Tagalog. Summaries of the stakeholder workshops can be found in Appendix B.

1.10c Community Workshops

Three community workshops were hosted over the course of the engagement program, to invite members of the community to provide input in Phase 1 (Q2 2022) and Phase 2 (Q3 2022). Community workshops were advertised through stakeholder partners, the County’s social media channels (Facebook, Nextdoor, Instagram, and Twitter), and the County website. Interpretation services were made available at all community workshops in Spanish, Vietnamese, Cantonese, and Mandarin. Email invitations were issued to those who registered for updates on the project website. A total of 97 participants attended community workshops over the course of the engagement program.

All workshop materials were also made available on the project website for public review. All summaries were translated into Spanish,

Simplified Chinese, and Vietnamese, with some translated into Tagalog. Summaries of the workshops can be found in Appendix B.

1.10d Community Survey

A community survey was available on the project website from June 21 to August 17, 2022, to seek information on community housing priorities as part of *Phase 1: Information Gathering*. The survey asked participants to rate a series of housing priorities for the 2023 Update on a rating scale also known as a Likert scale. Participants were able to add additional housing priorities not included in the survey for consideration. The survey was provided in English, Chinese (simplified and traditional), Spanish, and Vietnamese. A total of 167 survey responses were collected. Results of the survey are found under [Online Survey Results](#) on page 42.

1.10e Community-Based Organizations

Community Agency for Resources, Advocacy and Services (CARAS) was contracted to support the County in outreach to Spanish-speaking residents and farmworkers in South Santa Clara County. Established in 2014, CARAS provides supportive services to the community including housing assistance programs, such as rental and deposit assistance to low-income families, especially those on the verge of eviction. In addition to housing programs, CARAS provides youth case management services, public benefit navigation services, community financial literacy training, expungements of criminal records, combatting housing discrimination and community forums addressing legal barriers to re-entry. CARAS also plays a role in supporting undocumented community members in learning about their rights, available resources, and information on current immigration policies.

CARAS’s involvement in the 2023 Update included the following outreach initiatives:

- Promoting the County of Santa Clara Housing Element on social media platforms;
- Administering and promoting the community survey;
- Facilitating a listening session for community members at the CARAS office; and
- Participating in community and stakeholder workshops.

Efforts were made to partner with Vietnamese American groups and associations within the county, including the Vietnamese American Service Center. However, responses from the contacted groups and associations were not received. To encourage participation from Vietnamese and other non-English-speaking community members, promotional efforts, the community survey, and meeting summaries were translated into Simplified Chinese, Spanish, and Vietnamese. Additionally, interpretation services were provided at community workshops in Cantonese, Mandarin, Spanish, and Vietnamese.

1.11 Outreach Events

Table 4 below provides the Stakeholder and Community Workshops hosted over the duration of the Housing Element Update’s engagement program. The table identifies the dates of the workshops, presentation focus, and purpose of discussion.

Stakeholder meetings were inclusive of various organizations operating in both incorporated and unincorporated Santa Clara County. The list of stakeholders was developed by the County and was inclusive of housing developers, housing advocacy organizations, and a host of community-based organizations. All participating groups have been listed previously in this chapter.

Community meetings were open to the general public. Advertising was conducted via social media and through invitations issued to stakeholders and through the project website’s listserv. Stakeholders were encouraged to invite their networks to attend and participate.

Table 1.4 Stakeholder and Community Workshops

EVENT	DATE	WORKSHOP FOCUS
Phase 1		
Stakeholder Workshop No. 1	July 6, 2022	Presentation delivered to stakeholders to introduce the 2023 Update.

EVENT	DATE	WORKSHOP FOCUS
		Input sought on priority opportunities and challenges to be addressed through the 2023 Update.
Community Workshop No. 1: Rural Focus	July 19, 2022	<p>Presentation delivered to community members in rural areas of unincorporated Santa Clara to introduce the 2023 Update.</p> <p>Discussion structured to identify priority housing opportunities and challenges in rural communities to be addressed through the 2023 Update.</p>
Community Workshop No. 2: Urban Focus	July 21, 2022	<p>Presentation delivered to community members in urban areas and urban service areas in unincorporated Santa Clara to introduce the 2023 Update.</p> <p>Discussion structured to identify priority housing opportunities and challenges in urban communities to be addressed through the 2023 Update.</p>
Special Stakeholder Workshop: Development Focus	August 2, 2022	<p>Special meeting seeking input from the development and housing advocates on methods to streamline and/or simplify the development process.</p> <p>Presentation delivered to review government and non-government related factors creating barriers to housing production.</p>
Phase 2		
Stakeholder Workshop No. 2	August 17, 2022	<p>Presentation delivered to review strategies from the previous update to the Housing Element (2015 – 2022) identifying priority areas where new strategies are needed.</p> <p>Discussion seeking feedback on how previous strategies could be updated to address current and forecasted</p>

		conditions. Input sought to get participant suggestions for new strategies related to housing production, housing affordability, access to housing, homelessness, and climate change.
Stakeholder Workshop No. 3	August 29, 2022	<p>Presentation to review policy goals to address six priority housing challenges: housing production, housing affordability, access to housing, AFFH, homelessness, and climate change.</p> <p>Discussion focused on confirming or refining proposed policy goals and seeking ideas on new policy goals to address the priority housing challenges.</p>
Community Workshop No. 3	September 7, 2022	<p>Presentation to review feedback heard to-date, provide a refresh on the 2023 Update, introduce policy goals to address six priority housing challenges: housing production, housing affordability, access to housing, AFFH, homelessness, and climate change.</p> <p>Discussion focused on confirming or refining proposed policy goals and seeking ideas on new policy goals to address the priority housing challenges.</p>
CARAS Listening Session	October 24, 2022	<p>A listening session hosted by CARAS and the County for Spanish-speaking community members and farmworkers in south county.</p> <p>A brief presentation provided information on the 2023 Update and sought feedback on five priority policy goals.</p>

1.12 Summary of Feedback

Over the course of the engagement program, recurring themes emerged from the feedback received the series of stakeholder workshops and community workshops, and the community survey. These recurring messages from participant feedback have been grouped into eight key themes. Each theme is described below with an explanation of how the County is addressing each issue in the 2023 Update.

1.12a Housing Affordability

Stakeholders and members of the community challenged the County to consider the definition of housing affordability to address the housing needs of people with extremely low-income (ELI), seniors on fixed income, and people living with chronic illness. Participants noted the County should prioritize, streamline, and incentivize the development of units that are affordable across a range of income levels. Stakeholders cited reducing requirements, taxes, and exactions, to make affordable housing development more feasible. New affordable housing ought to be in areas with amenities and services and dispersed throughout the County to avoid concentrations of poverty. Policies ought to be developed to support low-income residents through anti-displacement initiatives and expanded tenant protections like stricter rent control, rent subsidies, tax credits, just cause eviction policies, and tenant right to counsel.

Response to Feedback: The policies under Strategies 1, 2, and 3 address the support for housing affordability. The existing policies (HG1-3, HG1-4, HG1-5, HG3-1, and HG3-2) prioritize funding for building more very low- and low-income housing. Under Strategy 2, the County has policies to work with other jurisdictions and non-government entities to facilitate the building of affordable housing across the jurisdictions in the county. The opportunity sites identified

for the 2023-2031 planning period are dispersed across the county to avoid concentration and many of them are in areas determined by the State to be High Opportunity Areas.

1.12b Access to Housing

Participants noted that diverse housing types and informational resources are needed to improve access to housing in the county. Policies are needed to promote creative housing solutions, such as the adaptive reuse of underutilized warehouses and office buildings for residential development and streamlining and incentivizing affordable ADU development and microhomes. Programs are needed to promote the development of housing that considers universal design standards for seniors and people with disabilities. The County can also play an important role in providing information and education to those in need of affordable housing options or access to financial and legal aid.

Response to Feedback: The existing and updated policies under Strategies 1 and 4 will improve access to housing. Updates to policies under Strategy 7 (Ending Homelessness) and Strategy 6 (Special Needs Housing) also address these concerns.

1.12c Housing Production / Supply

Participant feedback highlighted the need to streamline the development process to facilitate housing development with incentives, particularly for affordable housing. Suggestions included policies for land dedication, zoning overlays, rezoning, percentage-based affordable housing dedications, and funding for affordable housing development. The County can also consider reducing processing times, fees, and exactions, rounds of application reviews, and pre-development meetings, to reduce developer expenses related to development timelines and the application process. Some participants recommended changes to the County's General Plan to

allow for development through conforming zoning and revised densities. Dialogue and collaboration with LAFCO and city jurisdictions were also suggested to ease the annexation process and stimulate development in the cities' USAs. Finally, some suggested that the County could tailor incentives to sites deemed desirable for affordable housing development or consider partnerships with community developers.

In addition to new development, participants encouraged the County to consider programs and policies to preserve the existing affordable housing stock. Options include retrofit programs and rebates for property owners to keep affordable units and rental units in a state of good repair. The County should also conduct research to analyze threats to the existing housing stock and respond with safeguards tailored to address such threats.

Response to Feedback: Significant updates to policies under Strategy 1 (Balanced Housing Supply) will allow for the County to plan for housing within urban unincorporated pockets and help to address housing supply concerns within the jurisdiction of the unincorporated county.

1.12d Homelessness

The County received feedback regarding programs and policies that can address homelessness. Input centered around support programs to assist with re-entry and transition back into stable housing. A case management approach can also be utilized as a key protective measure to address chronic homelessness in the community. The [Community Plan to End Homelessness](#) can also provide assistance to the County and should be integrated into the Housing Element Update.

Response to Feedback: Strategy 7 (Ending Homelessness) has been significantly updated to add new policy directions and planning effort to reduce homelessness countywide.

1.12e Services

Participants noted that infrastructure and community services are needed to support the development of new housing within this Housing Element cycle. Sufficient municipal services are needed to accommodate housing in unincorporated areas of the county. This includes drinking water, wastewater treatment, and stormwater management infrastructure. Some participants raised incidents of recent sewage runoff in Morgan Hill and San Martin as a particular concern. A range of transportation options are also needed to support new housing development and reduce reliance on personal vehicles. This requires the County to coordinate with transit providers to increase service in newly developed areas and to allocate funds towards the creation of cycling and pedestrian facilities.

Several comments were received related to the need for soft services to support new development. Soft services can range from support (e.g., social services, healthcare, and community services) to amenities (e.g., grocery stores and recreation facilities). Development should be in proximity to parks and open spaces for the well-being of residents. Finally, the County heard about the need for development to occur in the proximity of employment areas to facilitate opportunities for residents to easily commute to and from work.

Response to Feedback: Policies HG1-6 & HG1-7 under Strategy 1 address access to services and amenities in neighborhoods that have historically had low public infrastructure investments.

1.12f Environment & Climate Change

Feedback highlighted the importance of protecting the environment, reducing contributions to climate change, and planning for climate resiliency. Several participants urged the County to focus development in existing urbanized areas to avoid the conversion of valuable natural habitat, open space, and agricultural land into residential uses. For some, allowing more development in communities like Gilroy and Morgan Hill is a concern as it may stimulate unintended growth. New development should also avoid fire- and flood-prone regions of the county. Stakeholders and the community suggested that the County consider policies that direct new development to be energy-efficient and adhere to green development standards to reduce greenhouse gas (GHG) emissions. Such policies should apply to new development, renovations, and existing buildings. Resilience and climate change adaptation were also suggested by participants who encouraged the County to consider policies to address climate and environmental justice for communities of color and low-income populations.

Response to Feedback: Strategy 10 has been added to the 2023 Update to address housing and climate change, including reducing risks from extreme weather and reducing the GHG footprint of new and existing housing.

1.12g Equity

Participant feedback indicated that the Housing Element Update should make efforts to address inequity and unequal access to housing in the county. For example, some expressed the County should apply AFFH policies created by HUD. The policies should seek to rectify injustices related to economic segregation, racial segregation, and historic redlining in various communities in the county (e.g., Burbank and Seven Trees). Racism in housing should be addressed specifically and not covered under blanket terminology

related to discriminatory practices. It was also recommended that the County create policies to provide housing or housing support programs for formerly incarcerated people and undocumented immigrants.

Response to Feedback: Strategy 5 has been updated with new policies that will identify key neighborhoods in need of improved access to amenities and services in those communities. The County will also support other jurisdictions in implementing fair housing programs through the Office of Supportive Housing.

1.12h Farmworker Housing

Stakeholders and community members noted that farmworker housing is critical to supporting the county's agricultural economy. Suggestions included providing streamlined permitting and financing to support the development of farmworker housing in proximity of agricultural operations. Along with farmworker housing production, community feedback included suggestions to ensure that services such as water and sanitary infrastructure are extended to rural areas to support increased farmworker housing.

Response to Feedback: During the previous Housing Element cycle, the County significantly streamlined the planning approval process for agricultural employee housing and expanded the available options for establishing such housing in unincorporated areas. Strategy 8 addresses the ongoing need for such housing by maintaining and expanding the supply of homes available to farmworkers.

1.13 Online Survey Results

A community survey was launched simultaneously with the project website to collect insights from the community and register participants for the email list to receive updates on upcoming meetings.

Figure 1.3: Housing Issues Priority Rating Exercise (average scores out of five from 167 responses)

The simple survey, taking less than ten minutes to complete, asked participants to rank the importance of six predetermined housing issues and provide information on any additional housing issues to be addressed in the 2023 Update. The survey also asked for optional demographic information to assist in understanding the reach to various communities. The survey was made available in Simplified Chinese, Spanish, and Vietnamese. Three participants completed the survey in Vietnamese, one participant completed the survey in Simplified Chinese, and 48 participants completed the survey in Spanish as a part of CARAS’s efforts to reach the Spanish-speaking communities in the southern parts of the county.

In total, 167 surveys were completed. The following illustrates the results of the survey.

1.13a Survey Summary of Housing Priorities

Participants were asked to evaluate the importance of six predetermined housing challenges facing the county. The question

provided a scale of one to five to rate the individual priority of each listed challenge. One indicated the least amount of priority and five indicated the highest level of priority. Figure 1.3 shows the results of the exercise.

While all six issues were rated relatively high, out of a maximum of five, “housing affordability” was rated the highest priority to be addressed by the Housing Element. This was followed by “Access to Housing/Homelessness” as the second highest priority, with “Diversity in Choices” and “Access to Services and Amenities” tied for the third highest priority. “Fire Safety and Climate Resilience” and “Urban Sprawl” rounded out the priorities in fourth and fifth place, respectively.

SURVEY RESPONDENT ETHNICITY

Figure 1.4. Participant Ethnicity (out of 99 responses - 20 participants chose not to answer)

1.13b Additional Housing Priorities

In addition to the ranking exercise, participants were asked to identify additional housing challenges that should be addressed through the Housing Element Update. Input from this question has been included into the key themes in [Summary of Feedback](#).

SURVEY RESPONDENT INCOME LEVEL

Figure 1.5. Participant Income level (out of 80 responses - 39 participants chose not to answer)

1.13c Participant Demographics

To conclude the survey, participants were asked to provide demographic information, including their income, ethnicity, and zip code. This information demonstrates the reach of engagement. The demographic questions were made optional to respect the privacy of participants.

Figure 1.6: Participant Zip Codes

The majority of participants surveyed (53%) identified as persons of color, with 49% of participants making less than \$75,000.00 per year. Survey participants indicated their top issues of concern were housing affordability, access to housing, and diversity in choices. Figures 1.4, 1.5, and 1.3 show the results in visual detail.

1.14 Ongoing Reporting, Referral Requirements, and Program Maintenance

In 2009, the State standardized annual reporting regarding housing development and programs. The housing production statistics and program progress data in the 2023 Update rely upon and are consistent with the County's annual Housing Element Progress Reports. County staff will continue to be engaged with monitoring and reporting requirements over the duration of the Housing Element's sixth cycle.

1.15 Consistency of the Housing Element with Other Elements of the General Plan

The Housing Element is a component of the County's General Plan and State law requires that updates to a Housing Element be consistent with other Elements of the General Plan. Housing Elements are updated more frequently than other Elements, which could lead to internal inconsistencies.

For the 2023 Update, to meet the County's RHNA target resulting from ABAG's new allocation methodology discussed above, the County will need to amend certain policies in its General Plan. Specifically, the County will need to modify its General Plan policies

that confer to cities long-range planning authority within their respective SOIs and USAs. This is especially true for urban unincorporated pockets under the County's jurisdiction, which the County will now need to plan for in order to meet its RHNA target.

Aside from the General Plan amendments that are required to accommodate ABAG's new approach to RHNA methodology, the policies included in this 2023 Update primarily update existing strategies and policies from the previous 2015 Update and are consistent with the rest of the County's General Plan. The 2023 Update does include Strategy 10: *Plan for Climate Change Impacts on Existing and Future Housing Stock*, which is a new strategy that strengthens the connection and consistency between the Housing Element and the other relevant provisions of the County's General Plan.

Additionally, under State law, every resolution amending the General Plan must contain a section attesting to an evaluation and conclusion of consistency with the General Plan. In addition to this requirement, the County will use the Annual Report process to review consistency of the Housing Element with other aspects of the General Plan as Housing Element programs are implemented and as other General Plan Elements are updated.

Chapter 2: Housing Needs and Production

2.01 Introduction

Santa Clara County covers approximately 1,300 square miles that include significantly varied urban, rural, and academic communities. This chapter contains an assessment of the various factors that influence and affect the unincorporated county’s housing needs. Understanding the housing needs of the communities in unincorporated areas of the County is the first step in the development of housing policies and programs that further the County’s housing goals. Utilizing data collected from the U.S. Census Bureau, California Department of Finance, ABAG, and others, the County housing needs assessment takes stock of factors that illustrate existing housing needs as well as those that help the County identify and plan for future trends.

Household income categories used in this Chapter are based on those established by U.S. Department of Housing and Urban Development (HUD) for use in its Section 8 Housing Choice Voucher Program. The following categories refer to AMI, or Area Median Income, as used for Federal and State funding purposes, which was \$168,500 in 2022 for a household of four in Santa Clara County.

Extremely Low-Income (ELI): A household with income less than 30% of AMI.

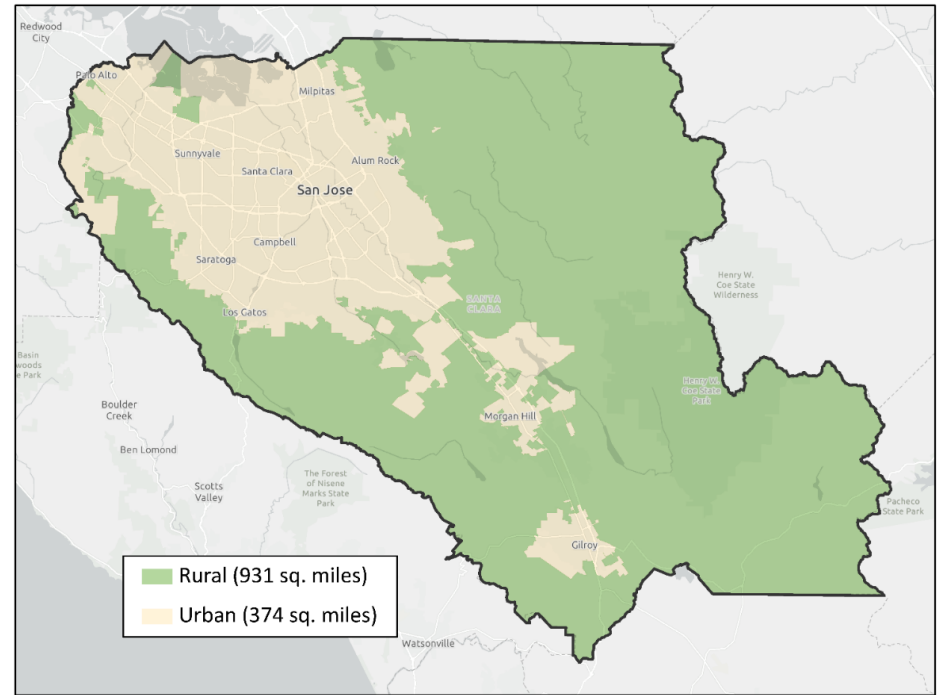

Figure 2.1 Santa Clara County Urban and Rural Areas⁶

Very Low-Income (VLI): A household with income less than 50% of AMI.

Low-Income: A household with income less than 80% of AMI.

Moderate-Income: A household with income less than 120% of AMI

Above Moderate-Income: A household with income over 120% of AMI.

⁶ “Urban” areas consist of the cities and the urban-base zoning districts within unincorporated areas.

“Rural” areas consist of the rural based zoning districts in the unincorporated areas.

Income category determinations are made with respect to both AMI and household size. The income category annual income maximums by household size for Santa Clara County are shown in Table 2.1:

2.02 Unincorporated County Housing Needs

A variety of statistical and demographic data provide the foundation for documenting and analyzing housing needs. State law requires local jurisdictions to analyze their communities' housing needs, in part through an examination of such data. ABAG has compiled the required demographic, economic, and housing stock data on behalf of the County, and all other member jurisdictions, in the form of a Housing Needs Data Report. The Housing Needs Data Report for unincorporated Santa Clara County prepared on April 2, 2021, and can be found in Appendix C.

One area of data collection and analysis, overall population characteristics, merits additional context here.

The Bay Area is the fifth-largest metropolitan area in the nation and has seen a steady increase in population since 1990, as has Santa Clara County as a whole. As seen in Table 2.2, however, the unincorporated areas of the County have seen an inverse trend in population over the same period.

From 1990 to 2000, the population in the unincorporated county decreased by 6.0%, then decreased by an additional 9.9% during the first decade of the 2000s. Between 2010 and 2020, the population decreased by 3.3%. In 2020, the estimated population of the

unincorporated county was 86,989, which made up roughly 4.4% of the population of Santa Clara County as a whole.⁷

The overall decrease in population is due in large part to previously existing urban unincorporated areas of the County being incrementally annexed into adjacent cities, over time. This dynamic, although not unique to Santa Clara County, is particularly pronounced here and factors significantly into where and how the County plans for future housing development on unincorporated lands.

⁷ To compare the rate of growth across various geographic scales, Figure 2.2 shows population for the jurisdiction, county, and region indexed to the

population in the year 1990. This means that the data points represent the population growth (i.e. percent change) in each of these geographies relative to their populations in 1990.

Table 2.1: 2022 Household Income Category Thresholds by Household Size

Income Category	Household Size							
	1	2	3	4	5	6	7	8
ELI	\$22,300	\$25,500	\$28,650	\$37,850	\$34,400	\$36,950	\$39,500	\$42,050
VLI	\$37,150	\$42,450	\$47,750	\$53,050	\$57,300	\$61,550	\$65,800	\$70,050
Low	\$59,400	\$67,900	\$76,400	\$84,900	\$91,650	\$98,450	\$105,250	\$112,050
Moderate	\$88,600	\$101,300	\$113,950	\$126,600	\$136,750	\$146,850	\$157,000	\$167,100

Note: the "Above Moderate-Income" category is, by definition, inclusive of any income level above the "Moderate-Income" thresholds, as determined by household size.

Figure 2.2 Population Growth Trends

Source: California Department of Finance, E-5 series Note: The data shown on the graph represents population for the jurisdiction, county, and region indexed to the population in the first year shown. The data points represent the relative population growth in each of these geographies relative to their populations in that year.

For some jurisdictions, a break may appear at the end of each decade (1999, 2009) as estimates are compared to census counts.

DOF uses the decennial census to benchmark subsequent population estimates.

2.02a HCD’s Projection of Regional Housing Needs

California State Government Code Section 65584(a) directs HCD, in conjunction with the State Department of Finance, to “determine the regional share of the statewide housing need” for each region of the state, or Regional Housing Needs Allocation (RHNA). These housing needs determinations are then forwarded to the councils of government in each region of the state.

HCD’s regional RHNA numbers are developed using considerations including household size and growth, rate of household formation, and both existing and optimal vacancy rates.⁸ In the Bay Area, ABAG is responsible for allocating the

⁸ Govt Code Section 65584.01 (c) (1) (A)

regional target number to cities and counties throughout the Bay Area. The resulting RHNA goals for cities and counties are based on HCD’s regional growth forecasts and are derived from the most current assessment of future housing needs by jurisdiction. ABAG’s primary assessment is through Plan Bay Area 2050, the regional long-range strategic plan that covers the four interrelated planning elements of housing, the economy, transportation, and the environment. Plan Bay Area 2050 was adopted in October 2021 and covers the period from the present through 2050.

2.02b ABAG’s Projection for Jurisdictional Housing Needs

ABAG’s final RHNA methodology, adopted in December 2021, forecasts the 2023-2031 regional housing needs for each jurisdiction in the Bay Area. Development of ABAG’s RHNA methodology was guided by the statutory requirements that the RHNA meet five objectives and be consistent with the forecasted development pattern from Plan Bay Area 2050. The five statutory objectives of RHNA can be summarized as:

Objective 1: Increase housing supply and mix of housing types, tenure and affordability in all cities and counties in an equitable manner.

Objective 2: Promote infill development and socioeconomic equity, protect environmental and agricultural resources, encourage efficient development patterns, and achieve greenhouse gas emissions reduction targets.

Objective 3: Promote improved intraregional jobs-housing relationship, including balance between low-wage jobs and affordable housing.

Objective 4: Balance disproportionate household income distributions (more high-income RHNA to lower-income areas and vice-versa).

Objective 5: Affirmatively further fair housing.

In addition to meeting the objectives above, State law governing Housing Element updates requires ABAG to consider a specific set of factors in the development of the RHNA methodology. The law also requires ABAG to survey its member jurisdictions to gather information on the factors that must be considered for inclusion in the methodology.⁹ Based on the State Housing Element laws, the jurisdiction surveys, and the forecasted development pattern from Plan Bay Area 2050, ABAG developed a methodology for RHNA allocation that includes three primary components¹⁰:

1. Baseline allocation based off the Plan Bay Area 2050 Final Blueprint;
2. Factors and weights for allocating units by income categories; and,
3. An equity adjustment based on an approach developed by ABAG’s Housing Methodology Committee.

Based on the final RHNA methodology, ABAG allocated 3,125 units to the unincorporated areas of the County. The allocation is a 1,028 percent increase from the County’s prior RHNA assignment of 277 units. The County will meet its RHNA

assignment through a combination of housing development in urban unincorporated islands or pockets within the USA of San José; graduate student, faculty, and staff housing at Stanford University; and single-family homes with accessory dwelling units built in other unincorporated areas. The County is also considering projections for units that will be built under the County’s ordinance update streamlining ADU development. For detailed explanation of the County’s capacity to meet its RHNA targets, see section [2.04](#).

Figure 2.3 Unincorporated Santa Clara County Housing Need, by Income Category

2.02c Housing Costs

Housing costs throughout the unincorporated areas of Santa Clara County have increased significantly during the 21st century. While homeownership was already a challenge for families

⁹ State of California Government Code Section 65584.04(b)(1)

¹⁰ Final Regional Housing Needs Allocation (RHNA) Plan: San Francisco Bay Area, 2023-2031

earning less than \$100,000 per year in 2000, a report from real estate website Redfin estimates that a first-time homeowner in 2023 would need to earn more than \$400,000 per year in order to afford a median-priced home in the Bay Area.¹¹ This section examines how those housing costs have developed since 2000, for the unincorporated areas of the County overall, and for specific unincorporated neighborhoods within the county. Housing cost data throughout the County of Santa Clara was collected for the County's nine Census Designated Places (CDP), rural unincorporated county,¹² and the overall unincorporated Santa Clara County.

Information from the American Community Survey (ACS) and Zillow was analyzed to provide housing cost data. The County's nine CDPs are: Stanford (unincorporated lands owned by Stanford University), Loyola (an unincorporated area between Los Altos and Los Altos Hills), Lexington Hills (an area near Lexington Reservoir), San Martin (a rural community located between Gilroy and Morgan Hill), and five urban pockets surrounded by or directly adjacent to incorporated San José (Alum Rock, Burbank, Cambrian Park, East Foothills, and Fruitdale).

The Zillow House Value Index was used to quantify the median home value of all homes, including single-family residences and condos/co-ops. In 2000, the average value of a home in the unincorporated county was \$577,701. Alum Rock and East Foothills had the lowest median home value at \$319,090, while Loyola had the most expensive housing with a median home value of \$1,381,367. Between 2000-2007, home values throughout the unincorporated county rose by 48%, to a median

home value of \$846,008. Loyola, Stanford, and San Martin saw median home values exceeding \$1,000,000, with Loyola still the most expensive with a median home value of \$1,762,232. The median home value in Alum Rock and East Foothills hit a then record high in 2006 of \$530,062.

Between 2007 and 2011, average home values throughout Santa Clara County fell to \$597,297, which can be largely attributed to the housing market crash of 2008. Alum Rock, East Foothills, and San Martin saw the sharpest drop in median home value during this time, falling to below 2000 levels. Home values began to recover in 2012, with all CDPs recovering to at least their 2000 median home value, and Stanford and Loyola setting new high values.

Between 2007 and 2015, the more affluent, urban communities of Cambrian Park, Loyola, and Stanford, had the strongest recovery from the crash, increasing in value by 40%, 56%, and 67%, respectively. During this same period, the urban pocket communities like Alum Rock and Fruitdale saw moderate increases in home values by 10% and 24%, whereas the rural community of San Martin saw an overall 9% decrease. San Martin's slower recovery could be attributed to the unsuccessful attempt to incorporate as an independent city, which ended in 2008.

Between 2015 and 2023, home values in unincorporated Santa Clara County rose, on average, by 69%. Stanford saw the most modest increase at 45% while the East Foothills increased by 108%. Between 2022 and 2023 alone, housing values in the unincorporated county rose between 1% and 7%. As of 2023, all

¹¹ Homebuyers Must Earn \$115,000 to Afford the Typical U.S. Home. That's About \$40,000 More Than the Typical American Household Earns. Dana Anderson, Redfin.com, October 17, 2023

¹² In this section, rural unincorporated county refers to areas of the unincorporated areas of Santa Clara County which are not within an urban service area or within a CDP such as San Martin or Lexington Hills.

communities in the unincorporated county have median home values of at least \$1,000,000 (except for Alum Rock with a median of \$991,237). The median home values in Stanford and Loyola total \$2,766,213 and \$4,316,058, respectively. This data substantially matches ACS 5-year data of median housing values between 2000 and 2022.

Housing tenure distinguishes whether a housing unit is occupied by a homeowner or a renter. Generally, affluent and hillside communities had a higher percentage of housing occupied by homeowners. For example, the East Foothills, Loyola, and Lexington Hills had the highest percentage of housing units occupied by homeowners, the highest across the unincorporated county, with 88%, 87%, and 85% of housing units occupied by homeowners, respectively.

In contrast, unincorporated urban islands in the county (neighborhoods surrounded by an incorporated city) had a lower percentage of housing occupied by homeowners, and a higher percentage of renter-occupied housing units. Burbank, Fruitdale, and Alum Rock, urban communities surrounded by the City of San José, had only 59%, 66%, and 71% of housing units occupied by homeowners, respectively. Regardless, all communities analyzed in the unincorporated county had a higher percentage of homeowner tenure than renter tenure. In summary, across the unincorporated county, an average of 78% of housing units were occupied by homeowners and 22% were occupied by renters.

ACS 5-Year Data was used to collect median contract rent in the County’s nine CDPs, rural unincorporated county, and unincorporated Santa Clara County between 2010 and 2022. In 2010, the median contract rent in unincorporated Santa Clara County was \$1,450. Affluent and hillside communities had the highest median rents in the unincorporated county – Loyola,

Lexington Hills, and East Foothills had the highest median rents at this time, ranging from \$1,842 to more than \$2,000 per month (ACS data does not provide specific data once a median rent surpassing \$2,000 per month, so actual rents may be significantly higher based on the home values and lack of multi-family housing in Loyola and Lexington Hills).

Table 2.3: Housing Value Trends

	% Change in Housing Value 2000-2023 (ZHVI, 2023)			Median Home Value (ZHVI, 2023)
	2000-2007	2007-2015	2015-2023	2023
Stanford	+32%	+67%	+45%	\$2,766,213
Loyola	+28%	+56%	+57%	\$4,316,058
Lexington Hills	+44%	+32%	+52%	\$1,379,041
Cambrian Park	+48%	+40%	+93%	\$1,769,419
Fruitdale	+52%	+24%	+80%	\$1,321,846
Burbank	+52%	+24%	+48%	\$1,085,294
Alum Rock	+61%	+10%	+76%	\$991,237
East Foothills	+61%	+10%	+108%	\$1,173,668
San Martin	+55%	-9%	+63%	\$1,493,280
Rural Unincorporated County	+45%	+33%	+64%	\$1,750,972
Unincorporated Santa Clara County	+48%	+29%	+69%	\$1,804,703

Urban islands and rural areas had the lowest median rents in 2010. Burbank, Fruitdale, and San Martin experienced rents between \$965 and \$1,109 per month.

Between 2010 and 2015, the median rent rose by 9% throughout unincorporated Santa Clara County. In the rural areas of the unincorporated county, rent rose by 20%. Rents in the rural unincorporated area of San Martin increased by 52%. Hillside communities experienced the greatest reduction in rent during this period, with rents in East Foothills and Lexington Hills falling between 28% and 48%. Median rent increased at a rapid rate between 2015 and 2022. On average, median rents throughout unincorporated Santa Clara County rose by 60%, with median rents increasing between 21% in Stanford, to 138% in Lexington Hills. Between 2021-2022, the median rent increased by 12% across the unincorporated county.

The Zillow Observed Rent Index (ZORI) was used to provide a rental estimate (as of 2023) across unincorporated Santa Clara County. The highest median rents occurred in affluent, urban areas of the unincorporated county. ZORI data estimates show that Loyola, Cambrian Park, and Stanford experienced median monthly rents totaling \$7,884, \$3,628, and \$3,444, respectively. Hillside communities and urban islands had the lowest median rents. Lexington Hills, Alum Rock, and East Foothills, and Fruitdale and Burbank enjoyed median rents of \$2,850, \$2,992, and \$3,124, respectively. In 2023, the average median rent in unincorporated Santa Clara County was \$3,668. The data collected for both home values and rental prices concludes that while both home values and rental prices experienced significant increases between 2015 and 2022, rental prices increased by 60% while home values increased by 56%, marking a steeper increase in rental prices than home values.

Table 2.4: Rental Values

Median Rent Values 2023 (ZHVI, 2023)	
Stanford	\$3,444
Loyola	\$7,884
Lexington Hills	\$2,850
Cambrian Park	\$3,628
Fruitdale	\$3,124
Burbank	\$3,124
Alum Rock	\$2,992
East Foothills	\$2,992
San Martin	\$3,155
Rural Unincorporated County	\$3,486
Unincorporated Santa Clara County	\$3,668

The following paragraphs provide additional background on the County’s methodology for the preceding analysis.

The ACS was the primary source of data for home and rental prices. The ACS contains individual data samples for the nine CDPs within the unincorporated county. Data for the rural unincorporated county was collected from Census Tracts that cover those areas of the county. Furthermore, data from those census tracts was combined as an average to produce single data points described as the rural unincorporated county. Data sets used to analyze housing costs include housing tenure in median values of owner-occupied units between 2010 – 2022, median contract rent between 2010 – 2022, and median gross rent by bedroom in 2015, 2021, and 2022. All data collected from the ACS utilized ACS 5-Year estimates. ACS data was further analyzed to provide the percent change in rent between 2015-2022, and percent change in rent between 2021 and 2022. While

the ACS provides significant data on estimates of housing costs in the unincorporated county, Zillow was used to supplement and augment housing cost data.

The Zillow Housing Value Index (ZHVI), provided by Zillow, quantifies home values in the 35th to 65th percentile of typical homes. ZHVI data for home values is categorized by metropolitan area, state, county, zip code, and neighborhood. Generally, ZHVI neighborhood data aligned more closely with the boundaries of the CDP associated with that neighborhood (e.g., the boundaries of the Burbank neighborhood depicted by Zillow align very closely with the boundaries of the Burbank CDP), whereas zip code data covers the entire zip code.

The zip code data covers the CDP, but may also include areas outside the CDP, whether unincorporated county or incorporated city. For home values, the ZVHI neighborhood data provides more granular, accurate information than ZHVI zip code data because it covers a smaller area more aligned with the CDP. However, some ZVHI neighborhood data sets do not cover as large of a timespan as the zip code data sets (neighborhood data generally became available in 2016 whereas zip code data began in 2000). Generally, ZVHI neighborhood data was the primary source of housing cost but is augmented by ZVHI zip code data.

Where zip code data was not available or would not accurately describe housing costs of a specific community, City data was used as the most accurate data to represent that community. Additionally, Zillow housing data is not available for unincorporated areas of the county that excludes cities within Santa Clara County. For the purposes of collecting housing data on the unincorporated areas, ZVHI zip code data was used to calculate an average of the zip codes that cover the rural unincorporated county.

Lastly, an average of the housing costs for Santa Clara County's nine CDPs and rural unincorporated county provided data for unincorporated Santa Clara County. The Zillow Observed Rent Index (ZORI) provides 40th to 60th percentile of rental costs. For rental costs provided by ZORI, zip code data is the most granular data set. Zip codes associated with each CDP were used to provide the most accurate rental data in the County's nine CDPs. Data sets used to analyze housing costs include typical home values of all homes between 2000-2023 and typical rent values in 2023. Zillow data was further analyzed to provide the percent change in housing value between 2000-2007, 2007-2015, 2015-2023, and 2022-2023.

2.03 Affirmatively Furthering Fair Housing

The requirement to Affirmatively Further Fair Housing (AFFH) is derived from the Fair Housing Act of 1968, which prohibited discrimination concerning the sale, rental, and financing of housing based on race, color, religion, national origin, or sex—and was later amended to include familial status and disability. The 2015 HUD Rule to Affirmatively Further Fair Housing and California Assembly Bill 686 (2018) mandate that each jurisdiction takes meaningful action to address significant disparities in housing needs and access to opportunity.

State law now requires that the County affirmatively further fair housing through its Housing Element in several ways, including by analyzing integration and segregation patterns and trends, racially or ethnically concentrated areas of poverty and affluence, disparities in access to opportunity and in housing needs, and displacement risk. The County is also required to assess the historical origins of these realities and identify the factors that

contributed to them. After selecting those contributing factors that are particularly impactful in denying or limiting fair housing choice and access to opportunities, or negatively impact fair housing or civil rights compliance, the County must design priorities, strategies, and actions to address those priority contributing factors.

Toward this end, the County completed its **Assessment of Fair Housing (September 2023) (Appendix L)**, prepared by the Lawyers' Committee for Civil Rights Under Law and Root Policy, with input from a wide range of stakeholders through a community participation process that began in 2019. The Assessment of Fair Housing (AFH) is intended to provide a holistic look – informed by data, maps, community input, and policy analysis – into the trends and factors affecting access to housing and opportunity on the basis of protected characteristics under federal and state fair housing laws. Complementing the AFH is the **Affirmatively Furthering Fair Housing Sites Inventory Analysis (September 2023) (Appendix M)** and the **Assessment of Fair Housing Proposed Goals and Actions and Corresponding Implementation Programs (Appendix N) (September 2023)**, which directly analyze the nexus between the AFH and this Housing Element's sites inventory and programs, respectively.

In pursuit of fair housing, the County has undertaken manifold approaches to analyze and address housing inequities. In November 2016, Santa Clara County voters approved "Measure A" – a \$950 million affordable housing bond. Measure A provides the County with an unprecedented opportunity to partner with cities, residents, and the affordable and supportive housing community to significantly address the housing needs of the community's poorest and most vulnerable residents. It provides

affordable housing for vulnerable populations including veterans, seniors, the disabled, low- and moderate-income individuals or families, foster youth, victims of abuse, the homeless, and individuals suffering from mental health or substance abuse illnesses. The bond proceeds are contributing to the creation and/or preservation of approximately 4,800 affordable housing units and the development of numerous programs aimed at furthering fair housing.

The Housing Bond has enhanced the County's ability to achieve its fair housing priorities, which include:

- Increasing the scope and breadth of supportive housing for special needs populations, including homeless and chronically homeless persons;
- Increasing the supply of housing that is affordable to extremely low-income (ELI) households; and,
- Improving coordination and collaboration among the County, the cities, other governmental agencies, and the affordable housing community.

Implementation of Measure A reflects the County's approach to fair housing more broadly – **rather than focus on disparate pockets of unincorporated lands, the County takes a holistic approach to affirmatively furthering fair housing, across the entire area of Santa Clara County.** On policy and on projects, the County partners with the 15 cities of the county to develop and support fair housing where it is most appropriate and effective, irrespective of jurisdictional lines.

The County has demonstrated an abiding focus on fair housing in recent years and has conducted several related studies, although few make special consideration for the unincorporated areas of the county. Such studies form the basis for the County's

approach to realizing fair housing and the programs of this Housing Element.

Race and Homelessness in Santa Clara County (January 2020) (Appendix D)

Written in 2020, this report examines the relationship between racial equity and homelessness, which is disproportionately experienced by people of color in the county. The goal of the report is to improve and expand services and to make sure that supportive housing services do not exacerbate or perpetuate the racial and social disparities in the county. The report explores three themes:

1. Disproportionately high rates of homelessness among specific racial/ethnic groups.
2. Racial/ethnic variation in experiences of homelessness.
3. Structural barriers, including lack of affordable housing and economic opportunity.

Three underlying values emerge from the assessment:

1. Integrate people of color with lived experience of homelessness in all program, policy, and funding decisions.
2. Align racial equity work in the homelessness sector with other racial equity initiatives in Santa Clara County.
3. Use a racial equity lens and data-driven decision making in the homelessness system and across other systems.

These values have led the County to three strategies to address racial equity, which are reflected in programs contained in this Housing Element:

1. Center and raise the voice of people of color who have experienced homelessness in the policy and program decisions of the supportive housing system.

2. Partner with the safety net system to better understand and address the systemic causes of poverty and inequity.
3. Adopt new housing and land use policies that help reverse longstanding housing disparities that have negatively impacted people of color.

The full analysis of this report is included in this Housing Element as Appendix D.

Urban County Consolidated Plan and Annual Action Plan (2020) (Appendix E)

This planning document presents a housing needs assessment, market analysis, and strategic plan for the "Urban County," consisting of unincorporated areas and seven smaller jurisdictions, which together receive and disperse HUD funds. Seven goals are identified in the plan and relate directly to AFFH and the programs in this Housing Element:

1. Increase affordable and supportive housing;
2. Promote fair housing Countywide;
3. Maintain and expand activities designed to prevent and reduce homelessness;
4. Preserve existing affordable housing;
5. Provide essential services for special needs populations;
6. Maintain, improve, and expand community facilities and spaces; and
7. Strengthen employment and workforce opportunities.

The plan identifies and describes numerous barriers or impediments to fair housing:

- Displacement of residents due to economic pressures;

- Loss of affordable housing;
- Land use and zoning laws;
- Income discrimination;
- Community opposition;
- Availability, location, size, and type of affordable units;
- Lack of affordable, accessible housing in a range of unit sizes;
- Lack of access to opportunity due to high housing costs;
- Lack of affordable housing for individuals who need supportive services;
- Lack of assistance for housing accessibility modifications;
- Lack of resources for fair housing agencies; and
- Private discrimination.

Using these goals and barriers, the document presents a strategic plan that informs two critical undertakings: the expenditure of affordable housing funds by the County and its partner cities, and the development of this Housing Element and its programs.

The full housing needs assessment, market analysis, and strategic plan are included in this Housing Element and can be found as Appendix E.

Community Plan to End Homelessness (2015; updated 2020) (Appendix F)

In 2014, the County of Santa Clara Office of Supportive Housing and Destination: Home, a public-private partnership dedicated to collective impact strategies to end homelessness, convened a

series of community summits to develop a coordinated strategy to address homelessness across the county.

Representatives of local cities, non-profit advocacy groups, service providers, philanthropic organizations, elected officials, universities, and people with lived experience of homelessness participated in the planning process. The resulting *Community Plan to End Homelessness* document was formally endorsed by the County's Board of Supervisors, Santa Clara County Housing Authority, Santa Clara Valley Water District, and the majority of the county's 15 cities, in addition to participating stakeholder organizations. The Community Plan was developed to enhance the community's work towards ending and preventing homelessness among all homeless persons and families and was intended to build upon and supersede previous plans including the County's 2005 *Ten-Year Plan to End Chronic Homelessness, Keys to Housing*, and the city of San José's 2003 *Homeless Strategy*.

In 2020, the Community Plan was updated for 2020-2025, serving as the County's ongoing roadmap for ending homelessness in Santa Clara County and organized around three main strategies: (1) Address the root causes of homelessness through system and policy change; (2) Expand homelessness prevention and housing programs to meet the need; and (3) Improve quality of life for unsheltered individuals and create healthy neighborhoods for all. These strategies are grounded in evidence-based practices, lessons learned over the prior five years, and robust conversation and input from more than 8,000 members of the community; including people with lived experience of homelessness, subject matter experts, key stakeholders, and community members.

The Community Plan and its 2020 revision continue to be utilized and inform the County's programs and policies, including those of this Housing Element and are included in this Housing Element and can be found as Appendix F.

Ending Homelessness: The State of the Supportive Housing System in Santa Clara County (2018-2022) (Appendix G)

In 2018, the County released the first of ten annual reports to provide the community with information and updates related to the County's Supportive Housing System, 2016 "Measure A" Affordable Housing Bond activities, progress towards the goals of the Community Plan to End Homelessness, and efforts to improve client outcomes in Santa Clara County. These annual reports are referred to as [Ending Homelessness: The State of the Supportive Housing System in Santa Clara County](#) and are included in this Housing Element as Appendix G.

No Place Like Home Program: Technical Background Report (2018) (Appendix H)

In 2018 the County also prepared a technical background report to support the County's No Place Like Home program. This technical background report summarizes the available County and community resources addressing homelessness, including the County's efforts to prevent criminalization of homelessness and the Coordinated Entry System. This report is included in this Housing Element as Appendix H.

2.03a Segregation Analysis

What follows supplements the more holistic analysis of the AFH (Appendix L) and summarizes research and analysis in the **ABAG Segregation Report (March 2021) (Appendix I)**.

Santa Clara County is part of the U.S. Census Bureau's San José-Sunnyvale-Santa Clara, CA Metropolitan Statistical Area (Region), which consists of Santa Clara and San Benito Counties. The Region has a population of over two million people and is highly diverse, with no majority racial/ethnic group. Although less diverse than the Region, the unincorporated population also has no majority racial/ethnic group, as illustrated in Table 2.5. Trends vary significantly across different areas. High levels of jobs-housing imbalance (the disconnect between where job growth is occurring and where housing is being produced) plays a major role in these patterns, with Latino and Vietnamese residents having limited access to jobs-rich areas in comparison to White, Chinese, and Indian residents.¹³

Countywide, there is a significant immigrant population, with top national origins of Mexico (7%), India (6%), China (6%), Vietnam (5%), and the Philippines (3%). These population shares are closely mirrored at the regional level. However, which cities these immigrant groups choose to settle in varies. Across nearly every entitlement jurisdiction, Black and Latino residents face the highest rate of challenges finding affordable housing. Additionally, throughout the county, there are clear disparities in access to opportunity in categories that include environmental health, labor market, and school proficiency. Access to opportunity for these categories is higher for residents in Urban County cities like Los Altos and Saratoga and lower in San José.

¹³ ABAG Segregation Report (March 6, 2021), Appendix I

Table 2.5 Population by Race in the Unincorporated County, 2000-2019

Year	American Indian or Alaska Native, Non-Hispanic	Asian / API, Non-Hispanic	Black or African American, Non-Hispanic	White, Non-Hispanic	Other Race or Multiple Races, Non-Hispanic	Hispanic or Latino
2000	445	11,099	2,021	55,274	225	28,444
2010	348	12,475	1,586	42,417	3,049	30,085
2019	142	13,232	1,583	38,599	4,089	26,054

Notes: Data for 2019 represents 2015-2019 ACS estimates. The Census Bureau defines Hispanic/Latino ethnicity separate from racial categories. For the purposes of this graph, the "Hispanic or Latino" racial/ethnic group represents those who identify as having Hispanic/Latino ethnicity and may also be members of any racial group. All other racial categories on this graph represent those who identify with that racial category and do not identify with Hispanic/Latino ethnicity. Source: U.S. Census Bureau, Census 2000, Table P004; U.S. Census Bureau, American Community Survey 5-Year Data (20152019), Table B03002

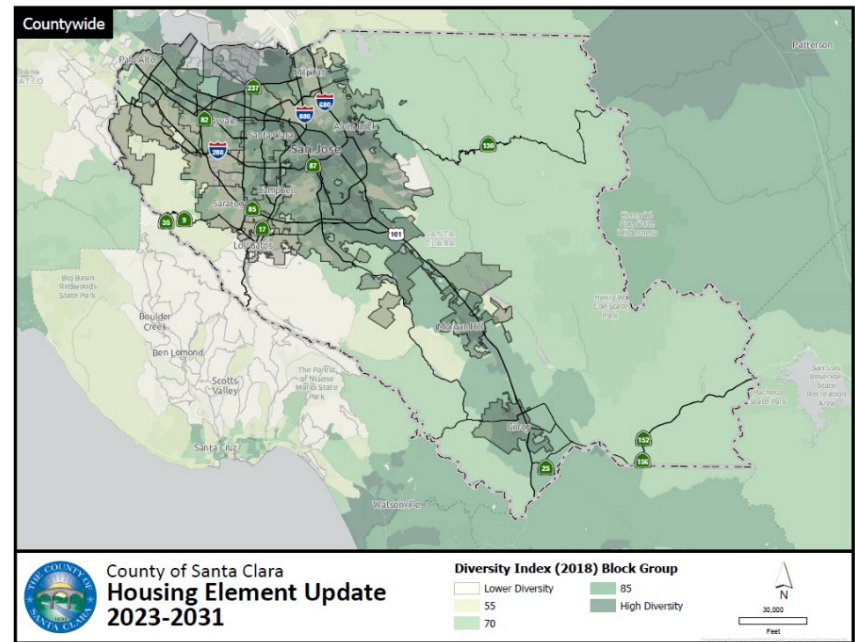

Figure 2.5: Diversity of Population in Santa Clara County
Larger format available in Appendix A

Source: California Department of Housing and Community Development. <https://affh-data-resources-cahcd.hub.arcgis.com/>

In the unincorporated county, while the overall population declined between 2000 and 2019, there has been an increase in diversity of the resident population (see Table 2.5). The mapping in Figures 2.4 and 2.5 show that most of the unincorporated areas with significant populations (Alum Rock, East Foothills, Cambrian Village, etc.) are relatively racially diverse and do not consist of Racially/Ethnically Concentrated Areas of Poverty (R/ECAPs) (Figure 2.6). There is currently only one R/ECAP located either partially or entirely in Unincorporated Santa Clara County, which is in South San José and includes the County Fairgrounds, an unincorporated enclave with no residential development, along with the adjoining residential areas that are within city limits. Of note is a former R/ECAP on Stanford University's campus.

The County Fairgrounds is located on a 135-acre parcel located in South San José. There is no housing on the site, but the fairgrounds are situated at the western corner of a census tract that also contains residential neighborhoods within the San José city limits.

According to the City of San José 2023-2031 Housing Element, the poverty rate in this census tract has nearly halved from 32.3% in 2013 to 16.6% in 2019; however, 35.4% of households have an annual income less than \$35,000. An estimated 81 percent of residents speak a language other than English (primarily Spanish or Asian languages, and 52 percent speak English “less than very well” according to the 2022 American Community Survey. Within

Figure 2.6: Racially/Ethnically Concentrated Areas of Poverty (R/ECAPs) in Santa Clara County
Larger format available in Appendix A

Source: California Department of Housing and Community Development. <https://affh-data-resources-cahcd.hub.arcgis.com/>

this census tract, 42% of residents who identify as Latino or of Hispanic Origin have less than a high school education, and 34 percent of Asian residents have less than a high school education,

compared to the White non-Hispanic residents, who all have at least a high school education. This compares to the County as a whole, where 96% of non-Hispanic Whites, 92% of Asians, and 71% of Hispanic or Latinx origin residents are high school graduates.

The City of San José notes in its 2023-2031 Housing Element that city-wide there has recently been a decline in the Latinx population, likely due to displacement pressures. It further notes that low-income communities of color are increasingly being forced to the edges of the Bay Area region. This may be the impetus to a decrease in the dissimilarity index city-wide from 1990 to 2020.

The entire unincorporated portion of the R/ECAP is a nonresidential site that hosts the annual Santa Clara County Fair, concerts, festivals, sporting events, trade shows, corporate events, and farmers’ markets, as well as special events like Cirque du Soleil.

The County Fairgrounds site presents an opportunity to improve the quality of life for the surrounding residential area that is characterized as a R/ECAP within the City of San José. The County therefore continually seeks ways to utilize the site to bring amenities to the surrounding incorporated neighborhood; currently, discussions are under way to develop a portion of the site with state-of-the-art public soccer fields, alongside a professional soccer training facility. Refer to Program 2.29 – *Place-Based Planning and Neighborhood Improvements*.

Figure 2.7: Estimated Displacement Risk

Larger format available in Appendix A

Stanford campus’s former R/ECAP previously included a significant population in the unincorporated county. However, the reasons for its race/ethnicity and socioeconomic demographics are very different from the vast majority of R/ECAPs and are not truly reflective of the composition of a more traditional R/ECAP. More specifically, Stanford has a comparatively larger student population than that of surrounding communities. Full-time students tend to have lower incomes and are more diverse than total residents in Santa Clara County and unincorporated areas. According to the U.S. Department of Education, Stanford University graduates have median earnings of \$107,000 per year, and rank in the top 100 schools (top two percent) for percentage of graduates earning more than a local high school graduate, which demonstrates quick financial upward mobility for its graduates.

Figure 2.8: Affordability Index & Displacement Risk
 Larger format available in Appendix A

Source: California Department of Housing and Community Development. <https://affh-data-resources-cahcd.hub.arcgis.com/>

2.03b Access to Affordable Housing

At this time, Santa Clara County Housing Authority (SCCHA) operates very few units of public housing, defined as affordable rental housing for eligible low-income families, the elderly, and persons with disabilities that is owned and operated publicly. This is because SCCHA has disposed of or transitioned most of its public housing into non-public, project-based affordable housing. Now, affordable housing is primarily available through rental subsidy programs and the Low-Income Housing Tax Credit (LIHTC) program, which is an indirect federal subsidy used to finance the construction and rehabilitation of low-income affordable rental housing. Jurisdictions within the county use local programs, like inclusionary zoning, that encourage developers to set aside a certain percentage of housing

units in new or rehabilitated projects to supplement their affordable housing stocks. The County of Santa Clara has an ordinance code provision, the Countywide Inclusionary Housing Ordinance, which requires, in the unincorporated county, that 16 percent of units within any new residential development of three or more units be dedicated as affordable housing units or that an 164 into a fund managed by the County. Figures 2.7 and 2.8 reflect estimated displacement risk and affordability across the county using layers developed by ABAG. These figures and others are available in a larger format and with a focus on the sites inventory in Appendix A.

2.03c Fair Housing Issues and Services

Fair housing issues are conditions that restrict fair housing choice or access to opportunity. As indicated in the section above, such issues are comparatively uncommon in unincorporated county, and the focus for a countywide effort will address segregation and lack of integration, significant disparities in access to opportunity, and disproportionate housing needs. The Urban County and entitlement cities contract with private fair housing organizations to provide fair housing and housing rights outreach and education, landlord-tenant dispute resolution services, and fair housing investigation, representation, and enforcement services to residents.

2.04 Unincorporated County Housing Development Capacity

2.04a Overview

Section 2.04 first describes how the County has the capacity to meet the RHNA target assigned to it by ABAG for the 2023-2031 planning period (sixth cycle), followed by an analysis of the probable

development that may occur through the end of the planning period in 2031.

Prior to the adoption of the County's first General Plan, foundational Santa Clara County land use policies placed a high value on curtailing sprawl by focusing growth within incorporated areas and urban unincorporated areas, especially those within USAs. To facilitate greater cohesive development patterns between incorporated and unincorporated USAs, the County's General Plan ([Book B](#)) reflects that land use planning for the urbanized parts of unincorporated county should be conducted by the cities. It has been the longstanding policy of the County, the cities, and LAFCO that these urban unincorporated areas will be ultimately annexed into the respective cities. Pursuant to State law, cities may choose to utilize a streamlined annexation process for most urban unincorporated islands under 150 acres.

The County's Zoning Ordinance has historically not allowed any significant development projects within a city's USA unless the project conforms with the city's General Plan. The County works with cities to ensure all utilities and services to these unincorporated USAs are provided for by their respective cities. These policies have been in place since the 1970s and are actively utilized by cities to plan for the unincorporated areas within their respective USAs.

However, with the 3,125 housing units allocated to the County for the 2023-2031 planning period, the County is required to amend its General Plan to allow for the County to plan for housing in urban unincorporated areas. Table 2.6 below provides an overview of the sites in the County's 2023-2031 sites inventory batched by neighborhood, along with the capacity of each group of sites by income category. Through the RHNA process, the County was allocated housing units at the Very Low-Income, Low-Income, Moderate-Income, and Above Moderate-Income affordability

categories. Fifty percent of all Very Low-Income units will be made available as affordable to people with Extremely Low-Incomes. A table version of the full sites inventory is in Appendix A, and detailed analysis of each site is below in sections 2.04b and 2.04c.

Each site analysis includes a table that notes the site's existing use(s), realistic capacity, maximum capacity, and unit affordability. The realistic capacity is the same as the minimum projected density for all parcels in the sites inventory. In December 2023, the County amended its Zoning Ordinance to create a new combining district consisting of the sites identified in this chapter. This rezoning is in compliance with California Government Code section 65583.2 subdivision (c) and removes constraints to the development of such parcels. Section 3.75.040 of the County Zoning Ordinance now provides housing opportunity sites with the option to pursue a streamlined project review and approval by way of a Planning Clearance, which conforms with the definition of "use by right" in California Government Code Section 65583.2 subdivision (i). Section 5.20.240 of the County Zoning Ordinance defines Planning Clearance as "a ministerial, nondiscretionary process for uses that require adherence to the Zoning Ordinance but for which no discretionary permit is required." To qualify for such processing, projects must meet objective eligibility criteria, including conditions and requirements for minimum levels of affordability.

Of the sites selected for inclusion in this sixth cycle planning period analysis, only the Stanford University *Escondido Village* site is both considered non-vacant and was previously selected as a housing site (in the fourth cycle planning period). The two other Stanford sites (*Quarry Arboretum* and *Quarry El Camino*) were previously identified in the fourth and fifth cycles, each time with a total capacity of 350 units at a density of 25 units per acre. These sites were not developed during the fourth or fifth cycles.

Some of the selected sites in unincorporated San José are currently nonvacant. The department has identified these sites as underutilized, and therefore prime locations to be converted into multi-family or mixed-use residential developments. These uses include parking lots and single-story retail commercial sites. In the first quarter of 2023, San José had a reported 24% vacancy rate in commercial properties, which includes both office space and retail space. There were 70 vacant store fronts in downtown San Jose alone.

There have been a number of initiatives from the federal, state, and local governments to ease restrictions concerning the conversion of commercial buildings or commercially zoned properties into residential and mixed-use residential uses. There has also been a steady reduction of minimum parking requirements allowed by the state and City of San José, freeing up land that was previously not available to housing developers.

Of the 24 sites selected by the County in the sixth cycle, three are on the Stanford University Campus and 21 are within the City of San José's urban service area. The County worked with the Stanford University administration in selecting the three sites that they determined to have the most potential for development. The City of San José has, through its own planning initiatives, identified 90 locations as "planned growth areas" throughout the city. Of the 21 sites within the City of San José's urban service area, 14 are located in "urban villages," a designation the City uses for neighborhood-level "planned growth areas." Two more sites are directly adjacent to an "urban village," and two others are processing subdivision applications with the City or County. The three remaining sites include a church parking lot, a type of land that the State has made easier to add housing to through the "Affordable Housing on Faith Lands Act" of 2023, and two parcels containing the decommissioned

Pleasant Hills Golf Course, which the owner is currently seeking to develop as residential or limited mixed-use residential. The County is therefore confident that these sites have the potential for increased development during the sixth cycle.

The market also has shown a trend of developers seeking to develop such land for housing. In 2021, for example, the City of San José approved the demolition of commercial buildings and construction of mixed-use residential projects, both located 1.5 miles from the Fruitdale sites listed in this chapter. One project replaced two single-story commercial buildings with a six-story mixed use building consisting of 61 residential units and approximately 18,000 square feet of commercial office space on a 0.88-acre site on Winchester Boulevard. The other project was for the demolition of over 75,000 square feet of commercial buildings to construct a mixed-use project with a 200,000-square foot office building and 590 residential units on South Bascom Avenue. The City of San José has also approved a project to replace the Cambrian Park Plaza Shopping Mall with a large-scale mixed-use development that includes 48 single-family residences, 27 accessory dwelling units, 25 townhomes, 305 multi-family residential units as well as assisted living and senior independent living units, ground floor retail and restaurants, and a hotel located one half mile from the Cambrian Park site.

Other recently approved developments in the City of San José include the demolition of a two-story office building to construct a 115-unit multi-family apartment building on a 0.47-acre site on North First Street, the demolition of a Chuck E. Cheese's restaurant to construct a six-story mixed-use building with 5,000 square feet of commercial and 190 residential units on Kooser Road, the demolition of two commercial buildings to construct one six-story multifamily residential building with 62 units on Almaden Road, the demolition of a carwash and auto repair shop to construct a 20-story residential

tower with up to 472 residential units and approximately 7,600 square feet of street level retail on Stockton Avenue

Under the amended County Zoning Ordinance, the development of each site requires a minimum number of affordable units, with no limitation to the maximum number of units (affordable or market rate). The maximum capacity identified in the tables below is the highest anticipated density that was analyzed under this Housing Element's Environmental Impact Report (EIR). If a future development proposal includes more units than have been analyzed in the EIR, then additional CEQA review may be required. The number of affordable units required of future development on each site generally correlates with the County's Inclusionary Housing

Ordinance rate of 16%, assuming each site develops to the extent of the realistic capacity, with the exception of sites on Stanford University campus and those expected to develop in partnership with the County.

The amended Zoning Ordinance requires all development on the sites analyzed in this Housing Element to include residential development to the extent specified; entirely non-residential development is not permissible on these sites.

In addition to the below analyses of the sites inventory, the Affirmatively Furthering Fair Housing Sites Inventory Analysis, included as Appendix M, consists of additional site analysis within the context of AFFH.

Table 2.6 Summary Capacity to Meet RHNA Assignment

Location	Affordable Units			Above Moderate Income (>120% of Area Median Income)	Total	
	Affordable Units Share	Very Low Income (<50% of Area Median Income)	Low Income (<50%-80% of Area Median Income)			Moderate Income (<80%-120% of Area Median Income)
San Jose	33%	739	370	384	3,025	4,518
Fruitdale/Santa Clara Valley Medical Center	100%	186	69	45	-	300

The County prepared a detailed mapping analysis to identify areas within the urban unincorporated county that are suitable for housing development, which included mapping access to amenities such as transit, schools, parks, and grocery stores, as well as mapping of hazardous areas such as very high fire zones, flood zones, and fault zones. Based upon this mapping, the County selected sites for its 2023-2031 sites inventory that were identified as having high access to amenities and low or no impacts from hazards.

Pursuant to California Government Code Section 65583.2(b)(6), all of the above sites identified as available for housing for above moderate-income households are in USAs and therefore served by public sewer systems. Nearly all of the rural unincorporated areas of the county, where above moderate-income single-family residences are often constructed, are not served by public sewer systems.

None of the sites identified as available for above-moderate households are in areas NOT served by public sewer.

The County considered public comments received regarding the inclusion of sites from property owners with written interest in residential development during the planning period. Those who provided public comment owned property located in rural unincorporated area outside the USAs. Sites in the rural unincorporated areas were not selected for inclusion in the Housing Element sites inventory due to the unavailability of adequate infrastructure, such as sewer and water connections to accommodate a multi-family development.

Table 2.7 presents the criteria utilized to map sites suitable for housing. Only sites scoring above a minimum threshold were considered for inclusion in the County’s sites inventory.

Table 2.7 Criteria Utilized to Map Housing Suitability Areas

AMENITIES (SCORED BASED ON DISTANCES AND URBAN/RURAL LOCATION)		HAZARDS & PRESERVATION ISSUES (WITHIN OR NEARBY THE AREA)	
1.	Near high-capacity transit	1.	High or Very High Fire Hazard Severity zone
2.	Near transit stops (2 or more lines)	2.	36-inch or 77-inch sea level rise scenario inundation area
3.	Near transit stop (1 line)	3.	Floodplain
4.	Near a public park or a community center	4.	Earthquake/Seismic hazard zone
5.	Near a book-lending library	5.	Liquefaction susceptibility zone
6.	Near grocery store / supermarket / neighborhood market/farmer’s market	6.	Landslide hazard zone
7.	Near elementary/middle/high schools	7.	California Protected Area
8.	Near medical clinic or hospital	8.	Riparian area
9.	Near pharmacy	9.	Wildlife habitat
10.	Has access to high-speed internet	10.	Williamson Act lands
11.	Within a State-identified high opportunity area		

In sections 2.04b and c, the discussion of development capacity and sites inventory is organized by the following subareas:

- Stanford University Lands;
- Urban Unincorporated Areas; and
- Accessory Dwelling Units.

Collectively, the sites selected on Stanford academic lands and in urban unincorporated areas, in combination with anticipated ADUs, have an estimated capacity of at least **6,574 units**, which is **110% more than the RHNA target** for unincorporated areas. This extra capacity is necessary to ensure that if one or more large sites identified at Stanford or within the City of San José USA do not result in housing development projects during the 2023-2031 planning period, the County will still have enough capacity to accommodate

its RHNA goals. The County expects that by selecting sites sufficient to meet twice its RHNA allocation, it will ensure development opportunities remain available throughout the planning period, especially for lower- and moderate-income households, pursuant to Government Code Section 65863 (the No Net Loss Law).

2.04b Development Capacity Analysis – Stanford University Lands

Stanford University is a private university located in the northwest corner of Santa Clara County, adjacent to San Mateo County. It contains over 4,000 acres of land within Santa Clara County, the majority of which is under the land use jurisdiction and regulatory authority of the County. Stanford academic lands on which residential development may occur have full access to urban services and infrastructure. Stanford University has a high capacity for the development of housing units available to a range of income levels. Stanford University development is governed by a Community Plan (Stanford Community Plan, or SCP), the County Zoning Ordinance, and a General Use Permit. Together, these land use controls link the development of academic space with that of housing.

The Stanford Campus has been identified by the State as a high opportunity area, and therefore is an ideal location to add a variety of housing types and households. In addition, Stanford University has indicated its desire to build new, state-of-the art, academic spaces. Such development has the potential to attract additional students and staff to the university. The County worked with the University to identify three sites on the campus for development of housing for faculty, staff, and students. One of the three sites (Escondido Village) is currently developed with student housing and associated parking lots, the second (Quarry Arboretum) consists of an existing parking lot, and the third (Quarry El Camino) is currently undeveloped open space.

By providing these units on campus, the County and University expect to see a significant reduction in VMTs and corresponding GHGs, in addition to the provision of a significant number of affordable housing units in an area with one of the highest median home prices in the region. While this housing is directly accessible only to Stanford students, faculty, staff, other workers, and their families, it benefits the wider community by allowing more of the local housing supply to be available for community members not affiliated with Stanford.

Existing Uses, Trends, and Regulatory Framework

The Escondido Village site is underutilized and contains existing, low-density, multifamily graduate student housing. The existing use supports the future development of additional housing units at a higher density and does not require any change in use to do so.

Although the site is over 10 acres, the existing multifamily residential use makes the site appropriate to accommodate additional lower-income housing units. There are currently low-density, outdated residential buildings at the Escondido Village Site, housing undergraduate and graduate students, as well as the Children's Center of the Stanford Community and residential administration buildings. Nearly all the residential buildings are low-rise, however, the Escondido Village Graduate Residences immediately to the west include four large multi-story style apartment buildings. This site is also adjacent to the Bing Nursery School and Escondido Elementary School, making it an ideal location to develop additional multi-family residential buildings for graduate students and staff. The anticipated density of such redevelopment is 70-90 dwelling units per acre, at specific locations within the 40-acre area, rather than being distributed evenly across the 40-acre area.

The Quarry Arboretum site is also underutilized, developed with a parking lot, and does not have any existing structures. The Stanford

General Use Permit requires Stanford not to exceed 2,300 net new parking spaces above a baseline of 19,351 spaces. The removal of the parking lot at the Quarry Arboretum site will comply with General Use Permit requirements and the lot can be replaced elsewhere, if deemed necessary; this parking lot is not associated with any specific structures or uses.

The Quarry El Camino site is undeveloped open space and therefore does not require redevelopment or change in use to accommodate the construction of housing units.

Two of the three Stanford sites (*Quarry Arboretum* and *Quarry El Camino*) were previously identified in the fourth and fifth cycles, each time with a total capacity of 350 units at a density of 25 units per acre. These sites were not developed during the fourth or fifth cycles; Stanford University focused on building housing in other parts of the campus. The third site (*Escondido Village*) is located in the residential district of the campus, adjacent to where the University added 2,597 moderate-income units during the fifth cycle, and is currently occupied with low-density residential development composed of outdated building stock.

The 2023 Board-adopted SCP Update calls for increasing the supply and affordability of housing on the Stanford campus to meet the needs of faculty, staff, students, postgraduate fellows, hospital residents, and other workers. It requires Stanford to provide a sufficient level of housing on campus to meet the affordable housing needs generated by new development of academic space. Under the updated SCP, the minimum allowed density increases from 15 dwelling units per acre to 30 units per acre.

The revised SCP also identifies the three sites included here as areas where the expected densities will further increase to accommodate 1,680 to 2,150 new units. This can be achieved by building the two Quarry sites at densities ranging between 70 to 90 units per acre;

densities that are appropriate for this area adjacent to the Caltrain Station and the Stanford Shopping Center. The Escondido Village site has already seen an intensification of housing in the 2015-2022 planning period, and the University plans to further intensify the housing in this area to accommodate an additional 700 to 900 units.

The adopted SCP Update includes a linkage policy that requires Stanford to develop housing with, or prior to, any development of new academic space on Stanford Campus. Stanford has demonstrated a trend of continuing to develop new academic space, with over 750,000 square feet of academic space during the 2015-2022 planning period. Due to Stanford's plans for academic campus growth and the linkage policy requirements of the revised SCP, Stanford is likely to develop housing on these three sites within the 2023-2031 planning period.

In conjunction with adoption of the revised SCP, the County adopted Zoning Ordinance provisions (the "-os" Housing Opportunity Sites combining district) in December 2023, which implements Program 2.02 – Planning for Housing Development in Unincorporated USAs and Stanford University Lands. Such rezoning requires a minimum number of lower-income housing units to be included in any development proposed on each of the parcels in this Housing Element's Sites Inventory, including the three Stanford sites. Table 2.8 provides a summary of the estimated potential capacity for the three identified sites on Stanford Campus, including the anticipated levels of affordability.

This rezoning program, completed in December 2023 [and amended in November 2024 with clarifying edits](#), conforms with the provisions of California Government Code Section 65583.2 subdivision (c) and removes constraints to the development of such parcels. Section 3.75.040 of the County Zoning Ordinance now provides housing opportunity sites with the option to pursue a streamlined project

review and approval by way of a Planning Clearance, which conforms with the definition of [a ministerial, "use by right" process](#) in California Government Code Section 65583.2 subdivision (i). Section 5.20.240 of the County Zoning Ordinance defines Planning Clearance as "a ministerial, nondiscretionary process for uses that require adherence to the Zoning Ordinance but for which no discretionary permit is required." To qualify for such processing, projects must meet objective eligibility criteria, including conditions and requirements for minimum levels of affordability. [See Program 2.06f for specifics.](#)

The realistic capacity and anticipated affordability levels for each site are predicated on the revised SCP and new combining district requirements. Under such rezoning, new development on each site is required to be multi-family or mixed-use and to include the minimum number of affordable units prescribed. Entirely non-residential development is not allowed on such sites. Development proposals on these sites may include more units (market-rate or affordable) beyond the units prescribed and there is effectively no density limit.

Additionally, the rezoning provides a process by which a development proposal may utilize an expedited, non-discretionary permit, if the development meets specified levels of affordability, akin to the provisions of California Senate Bill 35 (2017).

If Stanford proposes a certain percentage of affordable housing as a part of their development (further detailed in Program 2.02 and Zoning Ordinance Section 3.75.040) their project would be subject to a ministerial nondiscretionary approval called a Planning Clearance. After the Planning Clearance is approved, Stanford may apply for the required construction permits to build the proposed development.

If Stanford wishes to propose an alternative means of providing the lower income units listed in Table 2.8 (e.g., developing them elsewhere, rehabilitation of existing structures, or land dedication),

Stanford may submit the alternative means of compliance for consideration and approval by the Board of Supervisors.

Height, setbacks, and other objective development standards are applied through the Stanford Community Plan and General Use Permit. However, they can be modified through an approved development agreement or variance, as delineated in the County Zoning Ordinance.

There are no timing requirements in place by the County that would restrict the development of housing on the Stanford University Campus; however, should the university wish to count the housing towards the SCP requirements of developing housing to meet increased academic space, the university would first need to apply for a new General Use Permit. [However, if the County does not receive an application from Stanford by June 2026, the County will work with Stanford to facilitate the submittal of a housing development application. The County would pursue additional actions, including but not limited to, the selection of additional housing sites on Stanford Campus, rezoning, and/or permit processing improvements. See Program 2.02, Table 4.36, and Program 2.26 \(Mid-Cycle Review\).](#)

County staff have a standing monthly meeting with representatives of Stanford University to best assess the university's need and facilitate development in a way that is consistent with the SCP and other County requirements.

Based on the available information and as a result of working closely with Stanford to select the Escondido Village and Quarry sites as the best locations for future residential development on Stanford Campus, the County does not foresee any barriers preventing the development of these sites during the sixth cycle planning period. However, should an unforeseen barrier arise, the Mid-Cycle Review (Program 2.31) will further assess the sites inventory and implement a revised plan to meet the County's RHNA obligations.

Table 2.8: Housing Capacity on Stanford Sites

SITE	SIZE (ACRES)	EXISTING USE	POTENTIAL UNIT COUNT		UNITS BY INCOME CATEGORY		
			Realistic Capacity	Maximum Capacity	Lower Income	Moderate	Above Moderate
<i>QUARRY EL CAMINO 142-04-036 (a)</i>	6	Undeveloped open space	420	540	147	63	210
<i>QUARRY ARBORETUM 142-04-036 (b)</i>	8	Campus parking lot	560	720	196	84	280
<i>ESCONDIDO VILLAGE 142-04-036 (c)</i>	40	Student housing and associated parking	700	900	245	105	350
TOTAL	54		1,680	2,160	588	252	840

Figure 2.9: Housing Sites on Stanford Campus
 (Larger format available in Appendix A)

Figure 2.10: Housing Sites on Stanford Campus
(Larger format available in Appendix A)

All three Stanford sites will include faculty, staff, and/or graduate student housing. The Arboretum and El Camino Quarry sites are within walking distance of the Caltrain Palo Alto Station, the Town and Country Shopping Center, and the Stanford Shopping Center. The Escondido Village area is serviced by Stanford Marguerite Shuttle, which is synchronized with the Caltrain schedule. While housing sites at Stanford are intended to house Stanford students, staff, faculty, other workers and their families, the housing benefits all members of the community. Family members housed at Stanford include children who attend local schools and spouses who work outside of Stanford. By making this housing available, Stanford is reducing the demand for housing in nearby communities, thus making more housing available to all members of the community.

These sites have been selected due to their proximity to existing infrastructure and general suitability for development. There is no known contamination on these sites, nor are they located within an airport influence area which could provide negative impacts to residents. The sites do not possess an unusual configuration and are not subject to any easements or contracts (such as a Williamson Act contract) which would limit the ability to develop on these sites, provided the projects comply with the SCP and GUP. The land is identified by the California Department of Conservation as urban and built-up land and is not suitable for farming.

The California Natural Diversity Database identifies a number of species in the area, as is to be expected as much of the area in Stanford lands and the surrounding area have been preserved in their natural state. The Central Coast foothill yellow-legged frog (California Endangered), California tiger salamander (California Threatened), and Crotch Bumble Bee and western bumble bee (California Candidate Endangered) have been identified within the area in the early to mid-1900's, but urban development and

fragmentation of land over the last century makes these sites less suitable as habitat for these species.

Through the SCP public outreach process, the issue of housing affordability was brought forth by staff and students. Based on the income levels of the Stanford population of faculty, staff, graduate students, and other workers, and the high income and high rental costs in the area, the County projects that the new housing provided by the University at these sites will primarily be affordable units. All 2,597 units built during the 2015-2022 cycle were reported as affordable to moderate-income households. As discussed further in section 3.02b, rents for 85% of graduate student housing spaces at Stanford have been found to be generally within a range affordable to low- or moderate-income households. The County therefore anticipates that no less than 50 percent of new units built at Stanford during the 2023-2031 planning period will be deemed affordable.

2.04c Development Capacity Analysis – Urban Unincorporated Areas

As discussed above, to meet ABAG's RHNA target for unincorporated areas, the County is required to amend its General Plan policies, re-establishing the County's authority for planning in urban unincorporated pockets for the purposes of meeting housing demand.

Although there are urban unincorporated pockets that are intended for annexation into several different cities, most of them are associated with the City of San José. Approximately 78 percent of the population in all the urban unincorporated pockets in the county (not including Stanford) is attributable to areas within the USA of San José.

The County has identified 21 unincorporated urban housing sites, spanning roughly 142 acres within the City of San José's USA. These

sites range from .09 to 114 acres and are spread across multiple unincorporated urban islands within San José. To better accommodate the development of lower-income RHNA on sites less than one acre, the County included a new program (Program 2.30 – Incentivize Lot Consolidation) that encourages the merging of these lots and therefore furthers the potential of these lots to be redeveloped during the sixth cycle planning period.

In total, these sites have a capacity range between 4,517 and 6,282 units. This capacity estimate is based generally on the land use designations for these sites under the City of San José’s General Plan. The one exception is the Pleasant Hills site, which is a decommissioned golf course that does not yet have a land use designation for housing under the City General Plan. However, representatives for the former Pleasant Hills Golf Course are working with the County and City of San José to facilitate development of their site. The Pleasant Hills developers have submitted an application to change the General Plan designation for this property and the San José City Council has taken action to remove a policy barrier for housing and mixed-use development on the site.¹⁴

The County has worked closely with the City to review all sites selected within the unincorporated pockets of San José and to verify with City staff that they are compatible for residential development at the densities proposed. Without the related rezonings concurrent with this Housing Element Update, the pre-existing County zoning ordinance would not allow many of these sites to develop with multi-family housing.

To further ensure development of these sites, the County is implementing Program 2.02 – Planning for Housing Development in

Unincorporated USAs and Stanford University Lands, which rezones the County’s identified sites through a combining district that restricts development to multi-family residential and limited mixed uses. Any future development on these sites would be required to comply with the combining district.

In December of 2023, the County adopted Zoning Ordinance provisions creating the “-os” Housing Opportunity Sites combining district, which requires a minimum number of affordable housing units to be included in any development proposed on parcels in the sites inventory. Entirely non-residential development is not allowed on such sites. Development proposals on these sites may include more units (market-rate or affordable) beyond the units prescribed and there is effectively no density limit. The realistic capacity and anticipated affordability levels for each site are predicated on implementation of these amendments.

Additionally, this rezoning provides a process by which a development proposal may utilize a streamlined, non-discretionary permit process if it meets specified levels and percentages of affordability, akin to the provisions of California Senate Bill 35 (2017).

This approach is a first for the County and is needed to meet the RHNA target for unincorporated areas. The County does not have a history of processing multi-family and limited mixed uses as previous General Plan policies relied on the respective city’s long-range land use planning for the site.

During past RHNA and Housing Element update cycles, the County has not included unincorporated parcels within USAs because the County’s General Plan has historically encouraged such development to occur under the appropriate city’s jurisdiction, to ensure

¹⁴ On December 6, 2022, the City of San José City Council amended its Policy 5-1, “Transportation Analysis Policy.” [More information is available at this link.](#)

compliance with the city’s long-range planning authority for these areas. In October of 2023, the County amended its General Plan to re-establish the County’s authority to plan for housing in the unincorporated urban pockets. The County has identified this as a policy update in Chapter 3 (Strategy 1, Policy HG1-7).

The County has been careful to select sites that are in line with the development goals of the City of San José. As part of its Envision San José 2040 General Plan, adopted on November 1, 2011, the City of San José set forth 12 major strategies. One of these strategies is to promote the development of “urban villages” throughout the city, which would “provide active, walkable, bicycle-friendly, transit-oriented, mixed use urban settings for new housing and job growth attractive to an innovative workforce and consistent with the Plan’s environmental goals.” Among the approved urban village plans is the West San Carlos Urban Village Plan, for which the Burbank/Parkmoor opportunity sites are either located within or adjacent to. The West San Carlos Urban Village Plan is a “Local Transit Urban Village”, for which the City of San Jose has “planned for a balanced mix of job and housing growth at relatively high densities” to create complete communities along light rail and rapid transit bus service routes. A priority for all urban villages in San Jose is to revitalize underutilized properties with access to existing infrastructure, while increasing densities to support transit use and active transportation options.

The Burbank/Parkmoor area is highlighted by West San Carlos Street and Stevens Creek Boulevard, which provide an east-west connection between downtown San José to the east and Westfield Valley Fair Mall, Santana Row, De Anza College, and the Cites of Santa Clara and Cupertino to the west, and Bascom Avenue, which connects the Alameda and Rose Garden districts in the north to Cambrian Park and the City of Campbell in the south.

Figure 2.11: Housing Sites and the City of San José Development Plan for Midtown and Burbank/Parkmoor

Table 2.9 Housing Capacity on Sites within Unincorporated USAs of the City of San José

City Location	High Opportunity Area	Transit*	Sites	Acres	Unit Capacity		Affordable Units
					Realistic Capacity**	Maximum Capacity	
Fruitdale / VMC	N	Y	2	5	300	500	300

* Within one-half mile from a High-Capacity Transit stop/station

** Low unit capacity is considered to be the realistic capacity based on analysis of each housing site section

Fruitdale / Santa Clara Valley Medical Center

The Santa Clara Valley Medical Center (VMC) is a County-owned facility that covers over 70 acres in the Fruitdale neighborhood. The County has identified two sites adjacent to the VMC campus.

These properties are expected to be developed in partnership with the County, which will plan for projects on these sites to be entirely affordable. These sites have been selected due to their proximity to existing infrastructure (such as water, sewer, and dry utilities) and general suitability for development. There is no known contamination on these sites, nor are they located within an airport influence area. The sites do not possess an unusual configuration and are not subject to any easements or contracts (such as a Williamson Act contract) that would limit the ability to develop housing on these sites. The land is identified by the California Department of

Conservation as urban and built-up land and is not suitable for farming.

The California Natural Diversity Database identifies several species in the area. The robust spineflower (California Endangered), California tiger salamander (California Threatened), and Crotch Bumble Bee and western bumble bee (California Candidate Endangered) have been identified within the area either over a century ago or in an unspecified area of San José, but urban development and fragmentation of land over the last century makes these sites less suitable as habitat for these species.

Existing Uses, Trends, and Regulatory Framework

The Fruitdale / Santa Clara Valley Medical Center sites are currently developed with parking lots and are considered non-vacant. These underutilized sites are expected to be developed in partnership with the County, which will plan for entirely affordable housing.

The first site is in the southwest part of the facility, where there is a 3.5-acre surface parking lot that abuts a residential neighborhood along Thornton Way. Under the City's General Plan, supportive housing is allowed under the current land use designation of *Public-Quasi-Public*. Additionally, the removal of the existing parking use will not hinder the development of new housing units as the existing parking spaces can be replaced elsewhere as deemed necessary.

The second site is adjacent to VMC, along Empey Way, is 1.5 acres in size, and is also a surface parking lot. This site is classified under the City's General Plan as *Neighborhood/Community Commercial*, which also allows for residential development. The removal of the existing parking use will not hinder the development of new housing units as the existing parking spaces can be replaced elsewhere as deemed necessary.

These sites are adjacent to the City's *Bascom Urban Village Plan Area*, which plans for a high-density, mixed-use neighborhood. With the proximity to the various medical facilities and high-capacity transit along Bascom Avenue, both sites are well-suited for the development of supportive housing projects.

The County will follow the timeline outlined below to complete the housing development within the sixth cycle planning period. In order to fully realize the project as forecast, continued coordination and partnership will be needed with the current owners of APN 282-02-037, a nonprofit community health organization. The County is not aware of additional barriers.

County-Led Development Process

The southwestern site (APN: 282-03-016) is owned by the County of Santa Clara and is a part of the Valley Medical Campus. The following is an analysis of necessary steps to achieve development on the property.

Upon completion of an internal space planning process in coordination with the County Facilities and Fleets Department, the site could be deemed a County-led Housing Development site under Program 1.07 and the Office of Supportive Housing (OSH) would serve as the project lead. However, in this case, because the sites are within the VMC campus there could be some additional barriers that are unforeseen or unique to County-led sites.

The following serves as a summary of the process working in coordination with the City of San José:

- Stakeholder Mapping and Coordination: During this stage, OSH works with the respective Supervisorial Office to develop a stakeholder list and a draft of the community engagement strategy. Concurrently, OSH staff meets with the City of San José's Housing Planner to discuss the potential land use development path for the property including whether it could qualify under a streamlining process under SB 35 or AB 2162. *Estimated completion date - December 2024*
- Early Community Engagement: During the second phase our focus is to host a series of listening sessions to get a better understanding and buy-in from the community. These sessions help us identify opportunities to inform the future design of the housing and determine if there are resources that are needed in the community. For instance, there may be a desire to improve a neighboring park or creek trail. Knowing this information early helps identify different funding sources to fund potential public benefits. Given that the surrounding uses are healthcare related, OSH in partnership with the Facilities and Fleet Department would host a series of meetings with VMC leadership to assess vehicular and pedestrian circulation, safety, parking, and

concerns with the proximity of housing to existing medical uses. *Estimated completion date – August 2025*

- **Developer Selection:** Information gathered during the listening sessions are incorporated into the solicitation process. Using the County’s Developer Qualified Pool (DQP), a Request for Offer (RFO) is issued to select a development partner. The solicitation process includes a panel interview, scoring, and coordination with the City of San José. Once a developer is selected, OSH negotiates the County’s early funding commitment to the project and development milestones through a development and disposition agreement. This process can take up to eight weeks including approval by the Board of Supervisors. *Estimated completion date – January 2026*
- **Entitlement and Financing:** Upon approval by the Board of Supervisors, the selected developer is introduced to the community and the formal community engagement process begins. The developer will spend the next 6 months working with the community to design a project and secure the necessary entitlements. During this time OSH helps coordinate engagement with the Lived Experience Advisory

Board to provide input and coordinates with the City of San José’s Housing Department about potential funding available. OSH continues to support the selected development partner with securing other financing throughout this phase. This includes but is not limited to local housing dollars, private philanthropy funding, and State funding applications. Assuming that the proposed development project is competitive and they are able to receive an allocation of tax credits with their first submission, the project could be permit ready within a year and a half after a development partner is selected. *Estimated completion date – July 2027*

- **Construction and Operation:** Once all financing is secured, it is anticipated that the construction finance closing and completion of the project would take approximately 24 – 30 months. *Estimated completion date – August 2029*

The anticipated share of affordable units for this site is 100% because the County is the property owner (shown in Table 2.9 Housing Capacity on Sites within Unincorporated USAs of the City of San José, above).

Table 2.10: Fruitdale / Santa Clara Valley Medical Center Sites

APN	SIZE (ACRES)	EXISTING USE	POTENTIAL UNITS		UNITS BY INCOME CATEGORY		
			Realistic Capacity	Maximum Capacity	Lower Income	Moderate	Above Moderate

Total	5		300	500	255	45	0

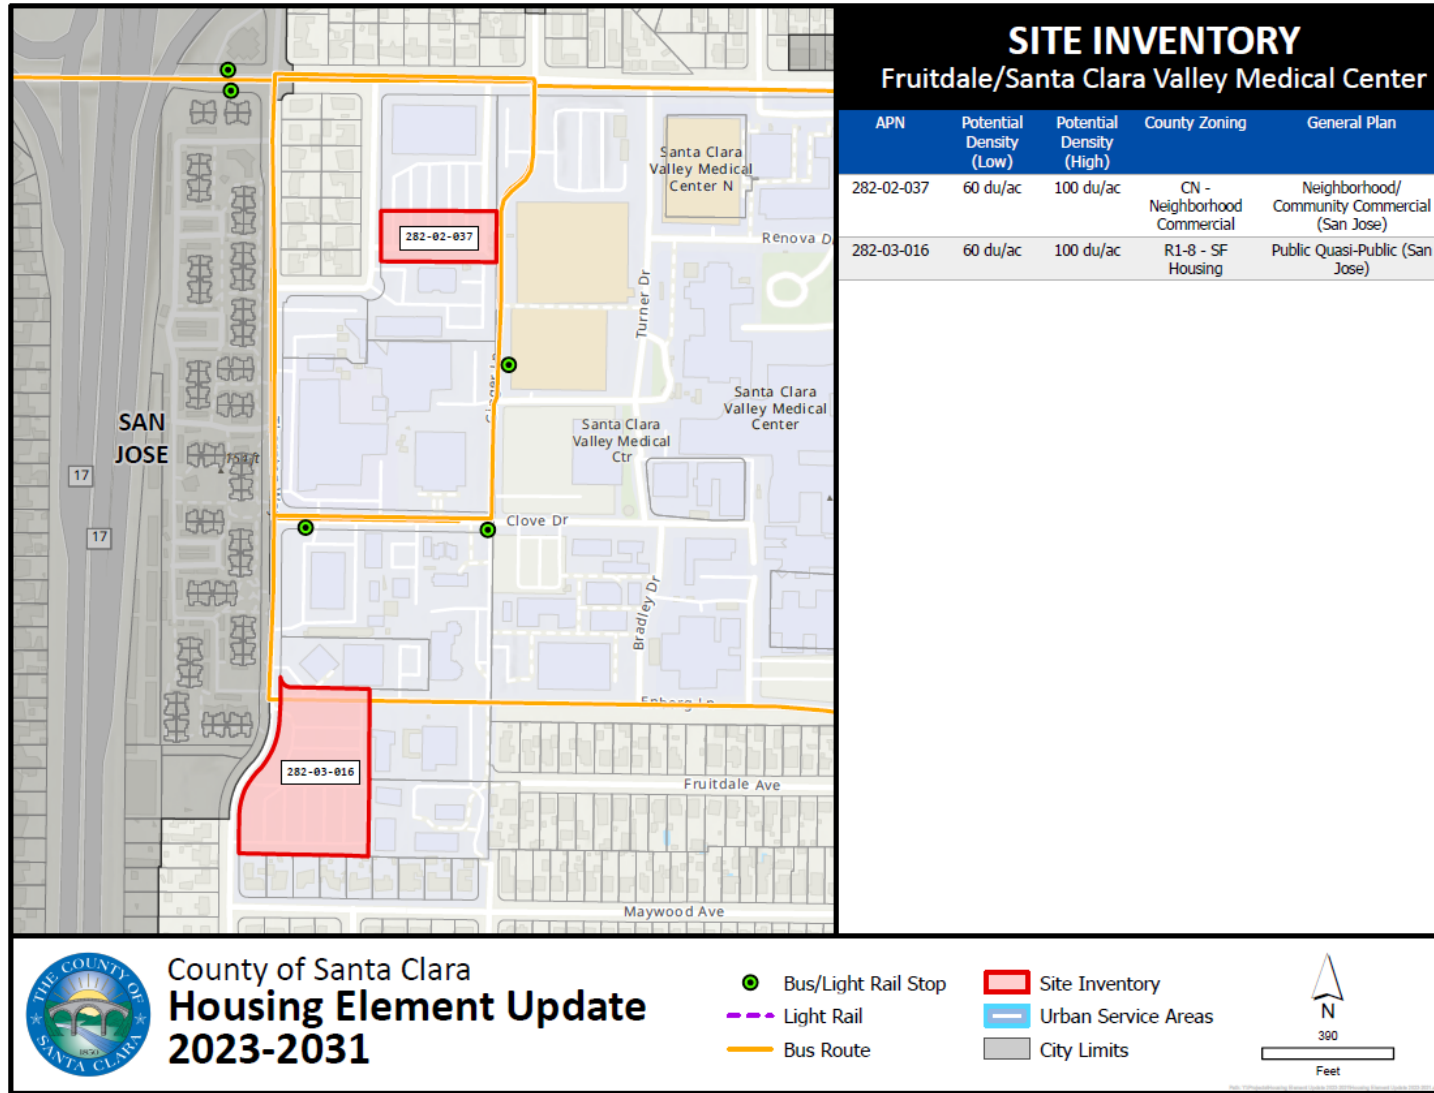

Figure 2.13: Housing Sites in Fruitdale / VMC (Larger format available in Appendix A)

Parkmoor / Burbank Neighborhood

There are nine sites identified along West San Carlos Street that are within the City's *West San Carlos Urban Village Plan Area*. These sites are relatively small (between 0.09 and 0.36 acres) and would likely be aggregated to create a larger project. However, they can also develop independently as small-scale multi-family projects and, using that approach, the County anticipates projects that would range from 4 to 36 units on the individual parcels.

These sites have been selected due to their proximity to existing infrastructure (such as water, sewer, and dry utilities) and general suitability for development. There is no known contamination on these sites, nor are they located within an airport influence area which could provide negative impacts to residents. The sites do not possess an unusual configuration and are not subject to any easements or contracts (such as a Williamson Act contract) which would limit the ability to develop on these sites. The land is identified by the California Department of Conservation as urban and built-up land and is not suitable for farming.

The California Natural Diversity Database identifies a number of species in the area. The robust spineflower (California Endangered), California tiger salamander (California Threatened), and Crotch Bumble Bee and western bumble bee (California Candidate Endangered) have been identified within the area either over a century ago or in an unspecified area of San José, but urban development and fragmentation of land over the last century makes these sites less suitable as habitat for these species.

West San Carlos Street is a high-capacity transit corridor, therefore housing in this location will have a high level of connectivity to amenities and resources.

Existing Uses, Trends, and Regulatory Framework

The Parkmoor / Burbank Neighborhood sites are currently developed with parking lots, car sales facilities, tattoo parlors, a religious institution, and a single-family residence. These sites are underutilized because they are inconsistent with the recent redevelopment of nearby parcels and long-range plans for the neighborhood.

There is an ongoing trend of redevelopment in the neighborhood that demonstrates the unrealized potential for multi-family and mixed-use residential development to occur within the planning period on the Parkmoor / Burbank sites.

Several recent projects [in the City of San José](#) illustrate the redevelopment trend of the neighborhood:

- Two parcels located a third of a mile east of the Parkmoor / Burbank sites on West San Carlos received approval in August of 2021 from the City of San José to demolish existing commercial and residential buildings to construct two new seven-story residential mixed-use buildings (City of San José Project No. SP20-004). The commercial uses that were demolished consist of a used car sales facility, restaurant, and strip mall with a barber, piñata store, and a package shipping service.
- One half mile to the east of the Parkmoor / Burbank sites a development was approved by the City of San José for an ~~eight~~six-story ~~820~~ dwelling unit housing project that included the demolition of three single-family residences (City of San José Project No. SP17-0~~32~~7).

- One half mile east of the Parkmoor / Burbank sites another development within the City of San José was approved for the construction of a seven-story mixed-use development with 241 residential units (City of San José Project No. PD19-011) and including the demolition of three commercial buildings. The commercial buildings were used as medical offices, such as chiropractic, dentist, and acupuncture offices.
- Less than one half mile to the south of the Parkmoor / Burbank sites, the historic Burbank Theater is slated for annexation and redevelopment, with the current proposal including 62 units and 7,400 square feet of commercial space in a five-story building.

The redevelopment projects on the nearby City of San José sites demonstrate that uses in the area, such as single-family residences, used car sales, and retail, are suited for and are being recently constructed with multi-family and mixed-use residential development. The nine sites selected in the Parkmoor / Burbank neighborhood contain uses similar to those that were redeveloped in the City of San José (refer to Table 2.11 & Table 2.12), and therefore are expected to be redeveloped during the planning period.

Table 2.12 compares existing conditions, existing uses versus allowable uses, existing versus allowable residential units, and existing versus possible stories between the selected sites in the Parkmoor/Burbank area and the aforementioned City redevelopment projects. Both the selected sites and the nearby redeveloped sites have/had existing structures that were constructed in the 1920's and 1950's with their conditions ranging from good to neglected, and have/had a building height of no more than 1 story. The nearby City's redeveloped sites have a maximum height of up to 7 stories, while the Parkmoor/Burbank sites can go up to approximately 11 stories, pursuant to County zoning requirements in this area. The

nearby redeveloped sites include a range of residential units from 82 to 241, while the Parkmoor/Burbank sites have the possibility of developing residential units anywhere from 7 units to 36 units under the County's requirements. As the nearby redeveloped sites under the City's jurisdiction had structures of similar age, condition, and use as the Parkmoor/Burbank sites, and have realized new approvals and new construction of multi-family and mixed-use residential units thereby establishing an indisputable trend, existing uses on the Parkmoor/Burbank sites do not act as a barrier to housing development. Additionally, the Parkmoor/Burbank sites can accommodate approximately 11 stories, while the nearby developed sites show there's a demand for at most 7 stories. Therefore, the rezoning in this area further encourages the redevelopment of these sites to multi-family/mixed use residential development as is supported by the trends of redevelopment.

This trend and scale of redevelopment aligns with the City of San José West San Carlos Urban Village Plan, which encompasses the unincorporated Parkmoor / Burbank sites and anticipates their annexation and redevelopment. The West San Carlos Urban Village Plan is a "Local Transit Urban Village," for which the City of San Jose has "planned for a balanced mix of job and housing growth at relatively high densities" to create complete communities along light rail and rapid transit bus service routes. A priority for all urban villages in San Jose is to revitalize underutilized properties with access to existing infrastructure, while increasing densities to support transit use and active transportation options.

The Burbank/Parkmoor area is highlighted by West San Carlos Street and Stevens Creek Boulevard, which provide an east-west connection between downtown San José to the east and Westfield Valley Fair Mall, Santana Row, De Anza College, and the Cities of Santa Clara and Cupertino to the west, and Bascom Avenue, which connects the

Alameda and Rose Garden districts in the north to Cambrian Park and the City of Campbell in the south.

The County's realistic capacity and rezoning of these sites aligns with the City's long-range planning vision, the recent redevelopment trends, and incentivizes their redevelopment within the planning period through the rezoning program. Therefore, the existing uses and improvements on the identified Parkmoor / Burbank sites do not act as a barrier to near-term housing development.

Should an unforeseen barrier arise, the Mid-Cycle Review (Program 2.26) will further assess the sites inventory and implement a revised plan to meet the County's RHNA obligations.

The Parkmoor / Burbank Neighborhood sites have been rezoned under the Housing Opportunity Sites combining district, which does not impose a limit on residential density and requires a minimum number of housing units to be developed, specified for each parcel. The potential for new housing is limited only by height and setbacks, which are aligned with the City's requirements for the surrounding area. An applicant may request a modification to such requirements through a variance or development agreement to achieve a multi-family housing development. This rezoning requires any development to have a residential component; entirely non-residential development is not allowed on such sites.

If the proposal includes the development of a minimum percentage of affordable units, a streamlined, non-discretionary permitting processes is available. The anticipated affordability of each site is shown in Table 2.9, above, and in Table 2.11, below.

Although each of these sites are under one half acre, none of them are required or expected to be developed with lower income units. Prospective developers of these sites may, however, avail themselves of the County's new program to incentivize lot consolidation.

Program 2.30 – Incentivize Lot Consolidation, encourages the merging of such lots and therefore furthers the potential of these lots to be redeveloped during the sixth cycle planning period.

The County Inclusionary Housing Ordinance will apply to these sites, requiring a minimum of 16 percent of the units to be affordable. In certain cases where 16 percent yields less than one unit of affordable housing, the projection has been rounded up to one unit. West San Carlos Street is a high-capacity transit corridor, therefore housing in this location will have a high level of connectivity to amenities and resources.

These sites have been selected due to their proximity to existing infrastructure (such as water, sewer, and dry utilities) and general suitability for development. There is no known contamination on these sites, nor are they located within an airport influence area which could provide negative impacts to residents. The sites do not possess an unusual configuration and are not subject to any easements or contracts (such as a Williamson Act contract) which would limit the ability to develop on these sites. The land is identified as urban and built-up land and is not suitable for farming. The California Natural Diversity Database identifies a number of species in the area. The robust spineflower (California Endangered), California tiger salamander (California Threatened), and Crotch Bumble Bee and western bumble bee (California Candidate Endangered) have been identified within the area either over a century ago or in an unspecified area of San Jose, but urban development and fragmentation of land over the last century makes these sites less suitable as habitat for these species.

These sites may also be annexed by the City of San José, pursuant to State law. Should annexation occur, any future development would move forward within the City's jurisdiction and the County would

seek a commensurate transfer of RHNA units, as described in Program 4.03.

Table 2.11: Parkmoor / Burbank Neighborhood

APN	SIZE (ACRES)	EXISTING USE	POTENTIAL UNITS		UNITS BY INCOME CATEGORY		
			Realistic Capacity	Maximum Capacity	Lower Income	Moderate	Above Moderate

Figure 2.14: Housing Sites in Parkmoor / Burbank (Larger format available in Appendix A)

Hostetter Station

The Hostetter Station site consists of two parcels adjacent to the Hostetter Light Rail Station in North San José. These sites are ideal for multi-family housing development because they are within a State-identified high opportunity area and adjacent to the light rail station.

These sites have been selected due to their proximity to existing infrastructure (such as water, sewer, and dry utilities) and general suitability for development. There is no known contamination on these sites, nor are they located within an airport influence area which could provide negative impacts to residents. The sites do not possess an unusual configuration and are not subject to any easements or contracts (such as a Williamson Act contract) which would limit the ability to develop on these sites. The land is identified by the California Department of Conservation as partially consisting of “unique farmland” but has no recent history of agricultural use.

The California Natural Diversity Database identifies a number of species in the area. The robust spineflower (California Endangered), California tiger salamander (California Threatened), and Crotch Bumble Bee and western bumble bee (California Candidate Endangered) have been identified within the area either over a century ago or in an unspecified area of San José, but urban development and fragmentation of land over the last century make these sites less suitable as habitat for these species.

Existing Uses, Trends, and Regulatory Framework

The larger 13-acre site is largely vacant with an existing single-family residence and privately owned. The smaller 2.3-acre site is a VTA Park & Ride facility. The County has connected with VTA and representatives of the privately-owned property and both are

amenable to the development of housing on these sites. VTA representatives were supportive of up to 100 percent affordable housing. As such, there is potential for these sites to be redeveloped throughout the housing element cycle.

Under the San José General Plan, the sites are designated *Neighborhood/Community Commercial* and are also identified as an *Unplanned Urban Village* area. The allowable density under the City’s General Plan can go up to 150 dwelling units per acre within an Urban Village area, with additional density bonuses provided to 100% affordable projects. These two sites were included in the City’s fourth cycle planning period sites inventory and had a projected density at that time of 45 dwelling units per acre, with a total capacity of 630 units.

The County is anticipating that a housing project on these sites would be developed at a minimum of 80 units per acre, given its location near a transit station and the prevailing densities for more recent housing projects in San José that are near transit stations. The County will work with VTA, the City, and the project proponent to support affordable housing on this site to the maximum extent feasible.

The County will follow the timeline outlined below to complete the housing development within the sixth cycle planning period (entering a MOU with VTA to prioritize development of this site, community engagement, developer selection, entitlement and financing, and construction). As one of these sites is controlled by another governmental entity, there may be additional steps to development. In order to fully realize the project as forecast, continued coordination and partnership will be needed with VTA and the current owners of APN 245-01-003. The County is not aware of any additional barriers.

County-Led Development Process

The County is intending to leverage two sixth cycle Housing Element programs that are designed to accelerate the production of affordable and supportive housing by utilizing publicly owned land. First, the County will implement Program 1.08 (Joint Development Memorandum of Understanding (MOU) to negotiate a partnership with VTA to incorporate this property as a priority housing development site. Currently the County is working with the VTA on four similar partnership projects that once completed will add 508 Affordable Units in partnership with the Office of Supportive Housing (OSH). The properties are in a State-identified high opportunity area and at least 25% of the units will be set aside for special needs populations.

Upon completion of the negotiations with VTA, the site could be deemed as a County-led Housing Development site under Program 1.07 and OSH would serve as the project lead coordinating with the VTA Transit Oriented Development (TOD) team. All County-Led Housing Development sites follow a similar workflow process, and it usually takes five years to develop a property into housing. However, in this case, because the site is controlled by another governmental entity, there are additional steps that could result in additional barriers that are unforeseen or unique to other County-led sites.

The following serves as a summary of the process working in coordination with the City of San José and VTA:

- Stakeholder Mapping and Coordination: During this stage, OSH works with the respective Supervisorial Office to develop a stakeholder list and a draft of the community engagement strategy. Concurrently, VTA staff meets with the City of San José's Housing Planner to discuss the potential land use development path for the property including whether it could

qualify under a streamlining process under SB 35 or AB 2162. *Estimated completion date – December 2026*

- Early Community Engagement: During the second phase our focus is to host a series of listening sessions to get a better understanding and buy-in from the community. These sessions help us identify opportunities to inform the future design of the housing and determine if any of the existing parking needs to be replaced. *Estimated completion date – August 2027*
- Developer Selection: Information gathered during the listening sessions are incorporated into the solicitation process. Using the County's Developer Qualified Pool (DQP), a Request for Offer (RFO) is issued to select a development partner. The solicitation process includes a panel interview, scoring, and coordination with the City of San José. VTA include OSH staff to serve on the panel. Once a developer is selected, the VTA TOD team takes the lead in negotiating with the selected developer and approval is considered by the VTA Board. *Estimated completion date – January 2028*
- Entitlement and Financing: Upon approval by the VTA Board, the selected developer is introduced to the community and the formal community engagement process begins. The developer will spend the next 6 months working with the community to design a project and secure the necessary entitlements. During this time OSH meets monthly with the VTA team to stay apprised of any issues to ensure progress continues. *Estimated completion date – July 2029*
- Construction and Operation: Once all financing is secured, it is anticipated that the construction finance closing and completion of the project would take approximately 24 – 30 months. *Estimated completion date – August 2031*

Pursuant to Program 1.08, mentioned above, the County plans to enter into negotiations with VTA to initiate County-led housing development on the property and anticipates an affordability level noted in Table 2.4213. Due to the partially public ownership and the County prioritizing this site for housing development, it is appropriate to accommodate the lower-income RHNA despite its size over 10 acres.

In support of development on this site, VTA’s Transit-Oriented Development team and the City of San José recently nominated it for MTC’s Priority Sites pilot program, which provides pre-development funding and technical assistance for projects providing affordable housing in either a Play Bay Area 2050 Growth Geography or a Transit Priority Area. The Priority Sites selected by MTC will also be included in Plan Bay Area 2050+, which can provide additional funding.

Table 2.4213: Hostetter Station

Total	15.3		1,226		512	200	514

Figure 2.15: Housing Site at Hostetter Station (Larger format available in Appendix A)

Alum Rock / East Foothills Neighborhoods

Alum Rock and East Foothills are established residential neighborhoods with few remaining vacant parcels.

These sites have been selected due to their proximity to existing infrastructure (including water, sewer, and dry utilities) and general suitability for development. There is no known contamination on these sites, nor are they located within an airport influence area which could provide negative impacts to residents. The sites do not possess an unusual configuration and are not subject to any easements or contracts (such as a Williamson Act contract) which would limit the ability to develop on these sites. The land is identified by the California Department of Conservation as urban and built-up land and is not suitable for farming.

The California Natural Diversity Database identifies a number of species in the area. The robust spineflower (California Endangered), California tiger salamander (California Threatened), and Crotch Bumble Bee and western bumble bee (California Candidate Endangered) have been identified within the area either over a century ago or in an unspecified area of San José, but urban development and fragmentation of land over the last century makes these sites less suitable as habitat for these species.

Existing Uses, Trends, and Regulatory Framework

The Alum Rock / East Foothills neighborhood sites that are considered non-vacant are currently underutilized and developed with parking lots, a shopping center, and a single-family residence.

These sites are underutilized because they are inconsistent with the recent redevelopment of nearby parcels and long-range plans for the neighborhood.

There is an ongoing trend of redevelopment in the neighborhood that demonstrates the unrealized potential for multi-family and mixed-use residential development to occur within the planning period on the Alum Rock / East Foothills sites.

Several recent projects [approved by the City of San José](#) illustrate the redevelopment trend of the neighborhood:

- One site, located 1.5 miles northwest of the Alum Rock / East Foothills sites, is under review by the City for the demolition of a single-family residence and the development of a 7-story, 350-unit apartment building and a 3-story, 32-unit townhome building (City of San José Project No. H21-015).
- Approximately 1.75 miles west of the Alum Rock / East Foothills sites, a development was approved by the City that included the demolition of an existing shopping center (uses included a salon, cell phone store, shoe store, and spa) and surface parking lot to make way for a new 87-unit residential building with 3,000 sf of commercial space (City of San José Project No. CP18-044).
- Approximately 2 miles west of the Alum Rock / East Foothills sites a development was approved by the City for the construction of a five-story building with 3,000 sf of commercial space and 185 affordable units (City of San José Project No. CP20-015). This project included the demolition of a pet store, plastering contractor, and salvage/recycling operator.
- Approximately 2.5 miles west of the Alum Rock/East Foothills sites, a development was approved by the City for the demolition of existing commercial and residential buildings to construct a 6-story mixed-use building with 123 residential units and ground floor retail (City of San José Project No.

PDC18-021&PD18-016). The existing uses to be demolished consisted of a wheel and tire store, a panaderia, and multi-family apartments.

The redevelopment projects on the nearby City of San José sites demonstrate that uses in the area, such as single-family residences and shopping centers, are suited for multi-family and mixed-use residential development. The sites selected in the Alum Rock/ East Foothills neighborhood contain uses similar to those that were redeveloped in the City of San José (refer to [Table 2.14](#) & [Table 2.15](#)) and are therefore expected to be redeveloped during the planning period.

[Table 2.15 compares existing conditions, existing uses versus possible uses, existing versus allowable residential units, and existing versus possible stories between the selected sites in the Alum Rock/East Foothill area and the aforementioned City redevelopment projects. Both the selected sites and the nearby redeveloped sites have/had existing structures that were constructed in the 1960's or earlier with their buildings in generally good condition and have/had a building height of no more than 1 story. The nearby City's redeveloped sites have a maximum height of up to 7 stories, while the Alum Rock/East Foothill sites can go up to 10 stories, pursuant to County zoning regulations in this area. The nearby redeveloped sites include a range of residential units from 87 to 382, while the Alum Rock/East Foothill sites have the possibility of developing residential units anywhere from 7 units to 45 units under County regulations.](#)

[As the nearby redeveloped sites had structures of similar age, condition, and use as the Alum Rock/East Foothill sites, and have realized new approvals and new construction of multi-family and mixed-use residential units thereby establishing an indisputable trend, existing uses on the Alum Rock/East Foothill sites do not act as a barrier to housing development. Additionally, the Alum Rock/East](#)

[Foothill sites can accommodate 10 stories while the nearby developed sites show there's a demand for at most 7 stories. Therefore, the rezoning in this area further encourages the redevelopment of these sites to multi-family/mixed use residential development as is supported by the trends of redevelopment.](#)

This trend and scale of redevelopment aligns with the City of San José's long-range plans for the neighborhood, which anticipates the annexation and redevelopment of these sites. Two of the five parcels identified in this area are in an Unplanned Urban Village under San José's General Plan and were recently redesignated by the City to accommodate multi-family housing with a density range between 40 to 80 units. The other three sites are within existing neighborhoods and their capacity reflects the density allowed under the current San José General Plan *Residential Neighborhood* designation.

The County's realistic capacity and rezoning of these sites aligns with the City's long-range vision and incentivizes their redevelopment within the planning period.

Therefore, the existing uses and improvements on the identified Alum Rock / East Foothills sites do not act as a barrier to near-term housing development. However, should an unforeseen barrier arise, the Mid-Cycle Review (Program 2.26) will further assess the sites inventory and implement a revised plan to meet the County's RHNA obligations.

The Alum Rock / East Foothills sites have been rezoned under the Housing Opportunity Sites combining district, which does not impose a limit on residential density and requires a minimum number of housing units to be developed, specified for each parcel. The potential for new housing is limited only by height and setbacks, which are aligned with the City's requirements for the surrounding area. An applicant may request a modification to such requirements through a variance or development agreement to achieve a multi-

family housing development. This rezoning requires any development to have a residential component; entirely non-residential development is not allowed on such sites.

These sites may also be annexed by the City of San José, pursuant to State law. Should annexation occur, any future development would move forward within the City’s jurisdiction and the County would seek a commensurate transfer of RHNA units, as described in Program 4.03.

Table 2.1314: Alum Rock / East Foothills Neighborhoods

APN	SIZE (ACRES)	EXISTING USE	POTENTIAL UNITS		UNITS BY INCOME CATEGORY		
			Realistic Capacity	Maximum Capacity	Lower Income	Moderate	Above Moderate
612-21-004	0.82	Undeveloped lot	4	7	0	1	3
599-39-047	0.56	Single family residence	22	45	0	4	18
599-01-064	0.74	Shopping center	15	22	0	2	13
601-25-119	1.9	Religious facility parking lot	10	15	0	2	8
601-07-066	1.49	Single family residence	7	12	0	1	6
Total	5.51		58	101	0	10	48

Note: Alum Rock / East Foothills sites are not required or expected to accommodate lower-income units and their development is not necessary to meet the County’s RHNA obligations, however, they are included in the Sites Inventory for the housing opportunity they present and have been rezoned accordingly.

Table 2.15 Alum Rock/East Foothill vs Nearby Redeveloped Sites

<u>County Housing Opportunity Sites</u>

Figure 2.16. Housing Sites at Alum Rock / East Foothills (Larger format available in Appendix A)

Cambrian Park Site

The single site within the Cambrian Park neighborhood is within a State-identified high opportunity area and has been selected due to its proximity to existing infrastructure (including water, sewer, and dry utilities) and general suitability for development. There is no known contamination on these sites, nor are they located within an airport influence area which could provide negative impacts to residents. The sites do not possess an unusual configuration and are not subject to any easements or contracts (such as a Williamson Act contract) which would limit the ability to develop on these sites. The land is identified by the California Department of Conservation as urban and built-up land and is not suitable for farming. The California Natural Diversity Database does not identify any species in the area.

Existing Uses, Trends, and Regulatory Framework

This site is currently developed with a liquor store and cell phone repair shop. Although this site contains an existing use, there is a history of annexation and development in the nearby areas of San José that demonstrates the potential for redevelopment on the Cambrian Park neighborhood site. Specifically, two parcels located a quarter mile to the west of the subject site received approval in August of 2022 from the City of San José to annex the parcels into the City and demolish the existing strip mall into a planned development with residential, commercial, and open space uses (City of San José Project No. [PDC17-040](#)).

Due to the trends of neighboring sites being developed with multi-family housing despite having an existing use present, the County finds that the existing uses on the Cambrian Park site do not act as a barrier to future housing development. However, should an unforeseen barrier arise, the Mid-Cycle Review (Program 2.26) will further assess the sites inventory and implement a revised plan to meet the County's RHNA obligations.

The Cambrian Park site has been rezoned under the Housing Opportunity Sites combining district, which does not impose a limit on residential density and requires a minimum number of housing units to be developed, specified for each parcel. The potential for new housing is limited only by height and setbacks, which are aligned with the City's requirements for the surrounding area. An applicant may request a modification to such requirements through a variance or development agreement to achieve a multi-family housing development. This rezoning requires any development to have a residential component; entirely non-residential development is not allowed on such sites.

These sites may also be annexed by the City of San José, pursuant to State law. Should annexation occur, any future development would move forward within the City's jurisdiction and the County would seek a commensurate transfer of RHNA units, as described in Program 4.03.

Table 2.1416: Cambrian Park Neighborhood

APN	SIZE (ACRES)	EXISTING USE	POTENTIAL UNITS		UNITS BY INCOME CATEGORY		
			Realistic Capacity	Maximum Capacity	Lower Income	Moderate	Above Moderate
419-12-044	0.78	Liquor store and cell phone repair shop	8	16	0	1	7

Note: Cambrian Park sites are not required or expected to accommodate lower-income units and their development is not necessary to meet the County’s RHNA obligations, however, they are included in the Sites Inventory for the housing opportunity they present and have been rezoned accordingly.

Figure 2.17. Housing Site in Cambrian Park Neighborhood (Larger format available in Appendix A)

Pleasant Hills Site

The 114-acre site of the decommissioned Pleasant Hills golf course promises to be one of the most significant sites for residential development within the unincorporated county during the 2023-2031 planning period.

The site is not within a State-identified high opportunity area; however, it is in the vicinity (within 1.5 miles) of San José’s largest area of “Highest Resources” according to [HCD’s Opportunity Map](#). The site is less than one mile from a major transit stop, placing it just outside of, but very close to, a Transit Priority Area. Moreover, development of the site, and the nearby Reid-Hillview Airport (proposed to be closed in 2031 and with the potential for high-density residential redevelopment), is likely to result in major increases to transit service in the immediate vicinity.

The Pleasant Hills site has been selected in part due to its proximity to existing infrastructure and general suitability for development. There is no known contamination on this site. The site is located near the Reid-Hillview Airport, outside of the airport safety zone and therefore suitable for residential development. The parcels are located between the MSL 283 and 433 lines, which limit the maximum height allowed (in feet) above sea level for new development. These height limits do not present a realistic constraint to the type of housing likely to be developed on this site. The site does not possess an unusual configuration and is not subject to any easements or contracts (such as a Williamson Act contract) that would limit the ability to develop. The land is identified by the California Department of Conservation as consisting of “grazing land,” but has no recent history of agricultural use.

The California Natural Diversity Database identifies a number of species in the area. The robust spineflower (California Endangered), California tiger salamander (California Threatened), and Crotch Bumble Bee and western bumble bee (California Candidate Endangered) have been identified within the area either over a century ago or in an unspecified area of San José, but urban development and fragmentation of land over the last century makes these sites less suitable as habitat for these species.

Existing Uses, Trends, and Regulatory Framework

There is no existing use on the Pleasant Hills site; it is a decommissioned golf course with no other current use. Although the site consists of two parcels over 10 acres, there is a high likelihood of development during the sixth cycle planning period. Due to a variety of factors, there are no anticipated barriers for achieving the estimated level of housing on this site – such factors include the site’s vacancy, the ability to process a housing development application through either the City or County, the City’s interest in seeing the site developed, and the developer’s active application with the City to construct multi-family housing at the scale represented below in Table 2.4517.

This site does not currently have a land use designation for housing under the City of San José General Plan; however, a developer application has been submitted to change the General Plan designation for this property and on December 6, 2022, the San José City Council removed a policy barrier for housing and mixed-use development on the site.¹⁵

The County anticipates that the City will process the application to change the General Plan designation, pre-zone the property for high-

¹⁵ On December 6, 2022, the City of San José City Council amended its Policy 5-1, “Transportation Analysis Policy.” [More information is available at this link](#).

density residential and mixed-use development, and then annex the property to process the development application under the City's jurisdiction. The removal of a policy barrier by the City and application for a General Plan change by the developer demonstrates the potential for imminent development of the site. The current development proposal with the City seeks a General Plan amendment that would allow up to 3,970 housing units (approximately 35 units per acre) on the parcel, in addition to 785,000 square feet of retail and commercial space. Alternatively, the developer could choose to submit an application to the County, prior to annexation.

The County has conservatively estimated a lower density of 25 units per acre as the realistic capacity. As of June 2024, based on discussions with the developer, incorporating feedback from the recent community outreach process, and the City's overall planning goals, development on the site is likely to be in the range of 28 to 32 units per acre. Significant parcelization is expected prior to residential development, which would likely occur in four phases, from 2027 through 2031. The first three phases would focus on residential development and deliver relatively equal portions of the residential units. A fourth phase would develop the commercial components of the project. This approach supports the adequacy and suitability of these sites to support the development of lower-income units.

Should the proposed development on this site come to fruition under the County's land use authority, the project will be required to include a minimum number of very low-income and low-income housing units but does not impose an overall limit on residential density, pursuant to the recently adopted Housing Opportunity Sites

combining district (Program 2.02) (County Zoning Ordinance Chapter 3.75.020). The potential for new housing is limited only by height and setbacks, which are aligned with the City's requirements for the surrounding area. The adopted programmatic EIR analyzed up to 35 dwelling units per acre on this site, for a total of approximately 4,000 units. In other words, the rezoning enables a developer to size and configure a project to meet market demands and trends to achieve the projected realistic capacity, inclusive of the required affordable units.

An applicant may request a modification to such requirements through a variance or development agreement to achieve a multi-family housing development. This rezoning requires any development to have a residential component; entirely non-residential development is not allowed on such sites.

The developer's proposal identifies the inclusion of affordable housing but does not yet specify a level or amount. The County's Inclusionary Housing Ordinance (County Zoning Ordinance Chapter 4.20.130) requires 16% of total dwelling units be made affordable to lower-income households.¹⁶ Due to the significant and singular potential of this site, the County will work with the applicant and the City, as applicable, to support a high proportion of the units as affordable to lower-income households.

Should the developer choose to submit an application to the County, prior to annexation, the County will continue to coordinate with the City regarding the development of these parcels, including infrastructure to provide the necessary urban services and future annexation, as appropriate. See Program 4.03 for additional

¹⁶ Upon annexation of the Pleasant Hills into the City of San José, the affordability requirement could be 1% lower (15%), pursuant to the City of San José's Inclusionary Housing Ordinance.

information on the process of transferring RHNA units in the case of an unincorporated site being annexed.

Table 2.1517: Pleasant Hills Site

Figure 2.18. Pleasant Hills Site (Larger format available in Appendix A)

Projected ADU Development

As explained in section 3.02c, after recent Zoning Ordinance changes the County has seen an increase in ADU permit applications and issuance. Therefore, the County is conservatively anticipating 46 ADU permits per year over the 2023-2031 period, which is reflective of the average annual rate from 2018 through 2022. This rate would yield a total of 368 dwelling units over the eight-year planning period.

The County does not plan to require any deed-restricted affordable housing requirements for ADUs; however, it does anticipate that approximately a quarter of these units would likely be moderate-income units based upon prevailing rents across different parts of the County.

Probable Housing Development

The purpose of this section is to identify the probable development expected to occur over the planning period of the 2023 Update, which ends in 2031. The analysis here is distinct from the previous capacity analysis, which indicates the feasible potential for housing development without focusing on what is most likely to occur.

There are many reasons to believe that the sites identified in this Housing Element—particularly the largest sites—will successfully be developed during the planning period. First, the County has been working with Stanford University on its near-term plans to provide on-campus housing for students, faculty, staff, and other workers. The University has confirmed its desire to build on the three sites identified in this Housing Element and anticipates realizing the density and number of units identified in the above capacity analysis.

Second, the County has spoken with owner representatives for the sites near Hostetter Station, who confirmed the desire to develop high-density housing on the site and that it would likely be available for such development within the next eight years.

And third, the owners of the Pleasant Hills site are seeking to sell the property to a developer. As described under the capacity analysis above, a development proposal has been submitted and the City of San José has affirmatively taken steps toward making the site developable for housing. Due to these recent developments, County and City staff believe that the development of Pleasant Hills is highly likely within the next eight years.

While the other smaller parcels identified within the City of San José USA may also develop, they are not included in the probability analysis as the County has not received any direct feedback or confirmation from the owners of these parcels.

In addition to the parcels identified in the sites inventory (Appendix A), the probable housing development analysis relies upon historical development trends to determine development potential, rather than merely counting vacant parcels. This is especially important for the rural unincorporated areas, where there are significant environmental constraints to developing on certain parcels. Based on trends in recent development activity, the County anticipates approving roughly 46 ADUs per year and 40 single-family homes per year, on average, during the sixth cycle planning period. Table 2.4618 provides the probable number of units that are likely to be issued a building permit between 2023 and 2031, with the following assumptions:

- The Fruitdale sites are located on County-owned property utilized for the Santa Clara Valley Medical Center. Preliminary internal discussions have indicated that two areas of the campus are likely candidates for development of 100% affordable housing during the sixth cycle planning period.
- Stanford Campus housing, when constructed, provides housing that is generally affordable across income levels.

- Pleasant Hills Golf Course has area to supply affordable housing, with access to services and amenities, above and beyond the City's 15% inclusionary requirements and the County's 16% inclusionary requirements. Double the inclusionary requirements for affordability is manageable and appropriate. The County could work with the City and a developer to exceed 30% of the units being affordable for moderate- and below moderate-income households.
- Hostetter Station sites include a VTA-owned parcel and a privately owned parcel. The VTA has confirmed its support of 100% affordable housing on its parcel, and the County has conservatively applied a reasonable affordable number of units on the privately owned parcel.

Housing Development Mid-Cycle Review

By December 2026, the County shall complete a review of housing permits issued and units transferred via annexation to determine if they are in line with the projections to meet the County's RHNA requirement by the end of the sixth cycle planning period. If the review indicates that the selected sites may not be developed at the capacities discussed in Sections 2.04b and 2.04c, then the County will re-evaluate the sites inventory list and explore additional ways to incentivize and remove barriers to housing production, such as streamlining permit processing, reduction of fees, removal of subjective requirements, and CEQA streamlining. The additional site selection and/or barrier removal shall be completed by December 2027 (Program 2.26).

2.04d Summary of Quantified Objectives

Based on the needs, resources, and constraints analyzed in this Housing Element, Tables 2.16 and 2.17 summarize the estimated number of units to be constructed or rehabilitated during the 2023-

2031 planning period, as well as the conservation/preservation of existing affordable housing stock.

From a housing needs perspective, new housing units, rehabilitated housing units, and preservation of existing affordable units are all important for a healthy housing market which serves all income levels. While the County has many programs to help construct new and preserve existing affordable units throughout Santa Clara County, this section will focus only on units in the unincorporated areas.

Unincorporated Santa Clara County has fewer existing affordable units and a lower capacity for new units than some of the county's constituent cities. Most multi-family development since 1970 has occurred within one of the incorporated cities, or on unincorporated lands that become annexed into one of the cities. The only three multi-family developments constructed since 1970 that are still in unincorporated areas are: an 8-unit and 18-unit development owned by the Emergency Housing Consortium of Santa Clara County, constructed in 1998, and the 29-unit "Vivente I" development, constructed on County land in 1989 and managed by MidPen Housing. The remaining 632 units of multi-family housing in the unincorporated areas of the county were constructed between 1900 and 1968. While the County has no information indicating if or to what extent these 632 units may be in need of rehabilitation, it is reasonable to assume that all units could benefit from seismic retrofitting.

The overwhelming majority of units within the unincorporated area are single-family dwellings. None of these units are considered below market rate, although some have developed accessory dwelling units (ADUs) or Junior ADUs, which could be rented out at differing levels of affordability. According to assessor data, the unincorporated areas of Santa Clara County include 17,737 single-family homes and 52

duet homes. These residences range in age from the Victorian era to newly constructed. Approximately 1% of single-family residences currently in the unincorporated area were constructed in the Victorian era (1850-1900), and 18% in the pre-World War 2 or wartime era (1901-1945). These pre-1946 homes represent the most vulnerable housing stock in the County's jurisdiction. All of Santa Clara County experienced a post-war boom, with 38% of all single-family homes in the unincorporated areas constructed between 1946 and 1960. This post-war boom prompted the County to begin requiring building permits in 1947. 24% of single-family homes were constructed from 1961 to 1980, 12% from 1981 to 2000, and 7% from 2001 to 2023.

The slowdown in development of single-family residences in the unincorporated areas of the County over the last 50 years can in part be explained by a groundbreaking set of agreements between the County and the 15 constituent cities in 1970, to focus development into the urban service areas and protect the areas outside of the urban service areas for agriculture, recreational open space, natural resource conservation, and natural hazard buffer zones. The dwindling supply of readily developed parcels after the post-war building boom also contributed to the decline in new housing starts, as well as policy interventions like Proposition 13, which had a deterring effect on the frequent sale of homes in order to purchase larger homes.

Some of the older housing stock has been significantly rehabilitated. Approximately 4% of homes at least 25 years in age have undergone a significant remodel since 1990. With the remaining vacant parcels available only at a premium price, and with significant site constraints such as slope, remodels continue to be an important tool for homeowners, including new buyers, seeking to upgrade their older homes. Between 2018 and 2023, the County issued 877 building

permits to remodel existing residences, which is roughly 5% of all homes over a six-year period.

Between 2019 and 2023, the County Code Enforcement Division received complaints involving substandard housing at 139 distinct addresses. This represents less than 1% of all housing units in the unincorporated areas, although there are many reasons why this number is not fully representative. The County relies on a complaint-based code enforcement system and does not pro-actively inspect residences, whether they are owner-occupied, rental units, or vacant. An owner is unlikely to submit a complaint against themselves, and renters may be deterred from reporting issues due to either a fear of retaliation, or fear that if improvements are made the residence will no longer be affordable to them. Many of the complaints received revolve around the unpermitted conversion of structures into substandard housing or overcrowding, both of which point more towards the lack of housing availability than to the overall housing stock conditions.

County Code Enforcement Officers estimate that 55% of housing stock in unincorporated areas is in need of some kind of repair beyond purely cosmetic improvements, with approximately 10% in need of more serious repair. These numbers are likely higher in the unincorporated areas than in the cities due to the remote locations of some parcels, the existence of multiple accessory buildings that could be converted to housing, and the lack of visibility on many parcels due to terrain, vegetation, or parcel size.

While the County has programs for minor home repairs that can benefit all housing types (refer to Program 1.31, Minor Home Repair and Maintenance Program), the focus on rehabilitation and preservation of affordability in County programs will be directed primarily to multi-family units.

Programs 1.09, 1.12, 1.13, 1.14, and 1.16 help provide funds to create and preserve affordable housing. Program 1.30 will preserve the existing affordability of units constructed with financial and other forms of support from the County. Program 2.21 will see the County review options to allow rehabilitation or replacement of such multi-family units without compromising their legal nonconforming status. In 2025, the County will develop ordinance or policy updates to help streamline such rehabilitation and replacement of older multi-family units. The County will also consider opportunities to preserve the affordability of existing units, whether required or naturally occurring. This may include partnering with community development corporations to acquire, rehabilitate, and preserve the affordability of units.

Lastly, the County will assess the housing stock and conditions of agricultural worker housing and explore related opportunities to streamline rehabilitation and replacement of such units, as appropriate (refer to Programs 2.05, 2.15, & 4.02).

Table 2.4618 reflects the anticipated new units to be constructed on unincorporated lands during the 2023-2031 planning period, delineated by unit type and household income level. "New construction" refers to the number of new units that potentially could be constructed using public and/or private sources over the planning period, given the locality's land resources, constraints, and proposed programs.

Table 2.4719 summarizes the quantified objectives for the 2023-2031 planning period, with the new construction totals from Table 2.4618 alongside rehabilitation and conservation/preservation of existing

units. The "Rehabilitation" objective refers to the number of existing units anticipated to be rehabilitated during the planning period. The "Conservation/Preservation" objective refers to the anticipated preservation of the existing affordable housing stock throughout the planning period.

Based on prior permit history and trends, in combination with new programs and incentives, the County forecasts that 5% of all single-family or duet homeowners in the unincorporated areas will seek permits to voluntarily rehabilitate their homes during the sixth cycle planning period. This amounts to approximately 890 units, 25% of which are anticipated to be affordable to moderate-income households, with the remaining 75% affordable to above moderate-income households.

Although County rehabilitation and conservation/preservation programs are not exclusive to unincorporated properties, based on past trends of program implementation, 79 low-income units and 79 very low-income units are anticipated to be rehabilitated and/or conserved/preserved in the unincorporated areas.

Approximately one third of moderate-income units to be rehabilitated are anticipated to be conserved/preserved as moderate-income. No above moderate-income units are projected for conservation/preservation because, by definition, they are not considered to be part of the existing affordable housing stock. Furthermore, the market trends are such that any existing above moderate-income housing unit is expected to remain affordable only to above moderate-income households during the planning period, and there is no threat of conversion or demolition of such units.

Table 2.1618: New Construction in Unincorporated County, 2023-2031

UNIT TYPE	VERY LOW	LOW	MODERATE	ABOVE MODERATE	TOTAL UNITS

2.04e Zoning for a Variety of Housing Types

Table 2.20/2.18 sets forth how the County’s zoning districts accommodate a variety of housing types described in State law.

Table 2.18/2.0: Zoning for a Variety of Housing Types

HOUSING TYPE	USE CLASSIFICATION	ZONING DISTRICTS	PERMIT REQUIREMENTS
Multi-family rental housing	Residences – Multi-family	R1S, R3, R3S, CN, CG, OA, A1	UP, ASA, UP/ASA for mixed use projects
Agricultural employee (temporary, small-scale permanent, large-scale permanent, seasonal)	Ag-Employee Housing	A, AR, HS, RR	SP, with time limits, 4.10.040 Suppl. Use Regs. C for temporary, small-scale permanent in A & RR
Group quarters up to 36 beds	Ag-Employee Housing – Long Term (Large-Scale permanent)	A, AR, HS, RR, A1 in rural areas	SP A1 with UP
Single-family/HH units up to 12 units	Ag-Employee Housing – Long Term (Large-Scale permanent)	A, AR, HS, RR, A1 in rural areas	SP A1 with UP
Emergency shelters	Emergency Shelters Small-Scale Large-Scale	Small-Scale (RR-R3-CN-CG-OA-ML-MH-A1-Rs) Large-Scale (RR-R3-CN-CG-OA-ML-MH- A1)	Small-Scale By right, or ASA in applicable urban zoning districts Large-Scale with UP
Transitional and supportive housing in structures designed for families and households of six or fewer people	Residential: Single Family, Two Family, Multi-Family	All Urban zones and All Rural zones-CN-CG-OA-A1-RS (single-family dwellings) -R1S-R3S-R2, R3- CN-CG-OA-A1 (duplexes) -R1S-R3S-R3- CN-CG-OA -A1(apartments)	By Right for structures designed as single-family dwellings, otherwise with ASA Single family in R3S with ASA CN-CG-OA- with UP Single family in RS with UP
Transitional and supportive housing in structures designed with communal dining and living facilities	Residential Communal Institutional	All Urban zones except R1S & R3S, All Rural zones, A1.	UP
Single-room occupancy	Rooming Houses, Fraternities & Sororities	R1, R1E, R2, R3, A1, R1S, R3S	UP, except ASA in R3
Mobile homes / Factory-built housing	Residences –Single Family	All zones	By right
Movable Tiny Homes	Accessory Dwelling Unit	All Urban zones All Rural zones CN-CG-OA A1-RS	C

Accessory Dwelling Units (including Junior Accessory Dwelling Units)	Accessory Dwelling Units	All Urban zones All Rural zones CN-CG-OA A1-RS	By right
Urban Primary Unit	Single-Family Residential	All zones	By right

Note: Permit Type abbreviations are C = Planning Clearance, SP = Special Permit, UP = Use Permit, ASA = Architecture and Site Approval.

The following sections elaborate on each of the housing types specified in the first column of [Table 2.18](#) [Table 2.20](#).

2.04f Multi-Family Residential Development

Multi-family residences are allowed in R1S, R3S, and R3 zones with an Architecture and Site Approval (ASA) permit. ASA is a discretionary permit required for certain applications as detailed in the County Ordinance and require review by the Zoning Administrator or other hearing body at a public hearing. The required findings for an ASA approval are detailed in the Zoning Ordinance and are listed below:

- Adequate traffic safety, on-site circulation, parking and loading areas, and insignificant effect of the development on traffic movement in the area;
- Appearance of proposed site development and structures, including signs, will not be detrimental to the character of the surrounding neighborhood or zoning district;
- Appearance and continued maintenance of proposed landscaping will not be detrimental to the character of the surrounding neighborhood or zoning district;
- No significant, unmitigated adverse public health, safety and environmental effects of proposed development;
- No adverse effect of the development on flood control, storm drainage, and surface water drainage;

- Adequate existing and proposed fire protection improvements to serve the development;
- No significant increase in noise levels;
- Conformance with zoning standards, unless such standards are expressly eligible for modification by the Zoning Administrator as specified in the Zoning Ordinance;
- Conformance with the general plan and any applicable area or specific plan, or, where applicable, city general plan conformance for property located within a city’s urban service area; and
- Substantial conformance with the adopted “Guidelines for Architecture and Site Approval” and any other applicable guidelines adopted by the County.

While some of these findings are necessary for health and safety, others could create uncertainty or barriers which could constrain the development of multi-family housing in desired areas. These include high parking requirements per unit, conformance to neighborhood character, and conformance to guidelines and policies which lack objective standards. To this end, the County will create a new process for review of multi-family residential development on properties located within designated Housing Opportunity zones under a non-discretionary permit.

The non-discretionary permit will be ministerially reviewed and approved if they meet a set of objective criteria. These will include:

- Conforms with all requirements of the California Building Code as locally adopted and amended;
- Adequate traffic safety, on-site circulation, and loading areas, and compliance with County design standards for traffic improvements;
- Proposed landscaping will comply with the County's Water Efficiency standards;
- No significant, unmitigated adverse public health, safety and environmental effects of proposed development;
- Proposed development will meet County and Regional Water Quality Control Board standards for drainage;
- Adequate existing and proposed fire protection improvements to serve the development;
- Noise levels will not exceed those allowed in the County Noise Ordinance; and
- The project provides for at least the required number of inclusionary units as specified in the Zoning Ordinance.

By removing discretionary reviews, subjective criteria, parking requirements, as well as not imposing height, FAR, or lot coverage restrictions on these projects, developers will be able to apply with greater certainty that their projects would be approved.

2.04g Multi-Family Rental Housing

Multi-family rental housing is not differentiated from any other type of multi-family uses or occupancies under the Zoning Ordinance.

2.04h Agricultural Employee Housing

Agricultural employee housing use classifications of the Zoning Ordinance define three subcategories of use – *small-scale permanent*, *large-scale permanent*, and *seasonal*. Seasonal housing

can be in the form of movable tiny homes, which are on the property temporarily. Small-scale and large-scale permanent housing may be either in the form of a site-built single-family dwelling, duplex, multi-family dwelling, group quarters, mobile and/or manufactured homes. The Zoning Ordinance also allows for *Temporary Agricultural Residences* in the rural base zoning districts, which can be a recreational vehicle or movable tiny home that provides temporary housing to a person engaged in an on-site agricultural operation. The County's special zoning classifications and procedures for agricultural employee housing are in addition to applicable state statutes.

The California Employee Housing Act (Health and Safety [H&S] Code 1700 et seq.) generally requires employee housing for occupancy by six or fewer employees to be permitted by-right, without a conditional use permit, in single-family zones. Section 17021.5 requires such employee housing to be permitted by right. This requirement is satisfied by section 2.10.030 of the County's Zoning Ordinance, which specifically states that the definition of residence (which are permitted by right) includes "Employee housing that provides exclusive accommodation for six (6) or fewer employees, pursuant to California Health and Safety Code Section 17021.5."

2.04i Emergency Shelters

An emergency shelter is a place for homeless people to live temporarily. Most emergency shelters provide shelter for a specific time-period e.g., 90 days after which the individual or family is expected to vacate it. Short-term shelter is needed to meet the needs of homeless persons lacking shelter due to a variety of reasons, including family violence, crime, fire, condemnation, or eviction.

The County's response to homelessness is led by OSH, which manages programs ranging from preventative measures, such as rental assistance and assistance to first-time home buyers,

emergency, transitional, and supportive housing, and connection to training and services. OSH leverages funds from HUD as well as local funds (namely the 2016 “Measure A” Affordable Housing Bond). The County uses the Santa Clara County Community Plan to End Homelessness 2020-2025 (an extension of the Community Plan to End Homelessness in Santa Clara County 2015-2020) as its guide which amongst other things calls for the doubling of the number of shelter beds across the County.

2.04j Transitional Housing

Transitional housing is temporary, supportive housing for people. Transitional housing is generally provided for a limited period –from 2 weeks to 24 months.

2.04k Supportive Housing

Supportive Housing is an effective strategy that combines affordable housing with intensive coordination services to help previously unhoused individuals find and retain housing. The Santa Clara County Supportive Housing System includes two primary housing interventions that fall within the umbrella of Supportive Housing: permanent supportive housing and rapid rehousing.

Permanent Supportive Housing program provides permanent housing and supportive services to chronically homeless individuals and families. The target population for permanent supportive housing program are chronically homeless individuals with a disability. The program focuses on the population that has high acuity and high costs. The program provides rental subsidy, intensive case management and health care (including behavioral health) to the program participants. There is usually no time limit for the program. PSH has been seen to have a high impact on housing stability. Nationally 84% of program participants have been observed

to retain housing for at least a year. Locally our housing retention system goal is 95%.

Rapid rehousing is an intervention that has been seen to be a successful model in addressing the issue of homelessness in different parts of the country. There are three core-components of rapid rehousing: 1) Housing identification; 2) move-in and rent assistance; and 3) rapid rehousing case management and services. The clients are provided shallow or declining rent subsidy, other temporary financial assistance and time-limited case management. It has been observed that rapid rehousing helps individuals and families to quickly exit homelessness, return to housing in the community, and not become homeless again in the near future.

2.04l Single-Room Occupancy

Single-room occupancy (SRO) housing is expressly defined in the Zoning Ordinance as a subset of the Rooming Houses, Fraternities, & Sororities use classification, where SROs are characterized by facilities that feature individually secured rooms and are individually rented to a one or two-person household. SROs do not typically involve on-site services. Single-room occupancies are allowed with a Use Permit in A1, R1, R1E, and R2 zones, and with architecture and site approval in R3 zones.

2.04m Mobile homes and Factory-Built Housing

Mobile homes and factory-built housing are recognized as a building form that is allowable for any manner of housing for single-family homes, ADUs, SB 9 urban primary unit, and agricultural employee housing, and they are permitted forms of housing wherever dwelling units are permitted.

2.04n Accessory Dwelling Units

Accessory Dwelling Units are defined under the use classification “Accessory Dwelling Units” in the County’s Zoning Ordinance. The use classification is based on the applicable provisions of state law and differentiates them from primary dwellings, agricultural employee housing, caretaker’s residences, and all other forms of residential use. They are allowed by right in all zones where primary residential dwellings are allowed.

2.05 Opportunities for Energy Conservation

This section describes opportunities for energy conservation in the areas of Planning and Land Use, Energy Conservation Incentives, and Green Building and Energy Efficiency Standards.

2.05a Planning and Land Use

The joint urban development policies of the cities, County, and [LAFCO](#) recognize the benefits of energy conservation in promoting sound urban growth management policies. The cities are responsible for planning for and accommodating urban growth and development. The County’s role has been and continues to be that of supporting the cities in such efforts by not acting as a promoter of urban sprawl and by restricting land use and development outside urban areas and Urban Service Areas (USAs) to rural, open space, and agricultural uses. These policies have been in effect since the early 1970s and they continue to serve the County and larger region well by using energy efficiently and minimizing carbon emissions. To integrate sustainability as a core function within County operations and to coordinate and support cross-departmental efforts, the Board

of Supervisors adopted the [Sustainability Master Plan](#) in January of 2021.

County policies strongly support increasing the proximity of housing to jobs by promoting infill development or “compact” urban development as urban areas redevelop. Accordingly, there has been relatively little need for urban expansion into unincorporated areas of the County to accommodate population and housing growth. These County policies both advance energy conservation and are consistent with the goals of SB 375, which are to coordinate land use, transportation, and housing policy and planning in pursuit of development patterns that emit fewer greenhouse gases than has been the pattern in the past.

County General Plan policies also promote making more efficient use of existing urban areas. As with many metropolitan areas that experienced significant growth after 1950, Santa Clara County contains underutilized lands, parking lots, and other properties within the core of existing urban areas. These areas, particularly those that can support and utilize transit, should be redeveloped for residential or mixed-use to the most appropriate and efficient densities possible.

Among the variety of programs or specific land use policies that contribute to energy conservation, the County supports and encourages the surrounding cities in the following ways:

- Transit-oriented land use and densities (e.g., San José has transit corridor and urban core minimum density policies, as opposed to maximum density limits). The Valley Transportation Authority (VTA) is currently working to utilize [Senate Bill 791](#) by developing surplus agency-owned land into housing.
- Streetscape and similar policies of the County, cities, and the VTA, illustrate how major arteries and thoroughfares can be

retrofitted, redesigned, and planned to promote shared access for bus ways, bicycling, multi-level mixed uses, and pedestrian improvements. A successful instance of multi-jurisdictional collaboration in this regard has been the [Grand Boulevard Initiative](#), an effort to revitalize the El Camino Real corridor.

2.05b Conservation Incentives for the Building Industry and Residents

Through the General Plan and other publications, the County promotes broader public understanding of the importance of conservation on a variety of subjects, such as natural resources, trees, land, energy, and open space. Energy saving incentives are primarily the domain of the utility companies, such as PG&E, which provides a significant rebate program for energy efficient appliances, insulation, and related activities.

The County offers incentives for energy efficiency through the [Bay Area Regional Energy Network](#) (BayREN) program to provide local energy efficiency and electrification resources for homeowners, renters, multifamily property owners, businesses, and jurisdictions in the county. Since its inception in 2013, the program has accelerated the County's transition to carbon neutrality, upgraded over 3,000 single and multifamily homes, and paid over \$2.7 million in rebates to residents and property owners.

Energy conservation in the building industry has widened its focus from simply retrofitting to green construction. The County promotes energy efficiency improvements in older housing stock through the housing rehabilitation and financial assistance programs it provides to support lower income housing— but the area where the County is making greatest strides is in mandatory green building standards because it can directly affect building standards through its own codes and ordinances.

2.05c Promoting Green Building and Greater Efficiency Standards

The County began efforts to promote green building over fifteen years ago, culminating with the adoption of significant new requirements for green building in single-family residential construction in 2008. Those new standards became mandatory for new single-family residences and major renovations (“rebuilt”) in 2009. Since September of 2015, the County now follows the green building requirements for multi-family residential and non-residential buildings, as set forth in the California Green Building Standards Code (CalGreen) standards.

In addition to its Building Ordinance requirements, the County promotes green building information through handouts, displays, and its websites. The County's green building requirements include:

- Standards for use of passive solar heating, extended overhangs where consistent with building codes and zoning setbacks, and similar practices;
- Use of tree planting and conservation through landscaping plans to assist in energy conservation;
- Use of solar photovoltaic;
- Efficient building framing design to reduce waste and incorporate framing concepts with other efficiency standards and methods;
- Recycling of construction waste;
- Water use reduction;
- Use of renewable materials;
- Efficient appliances, heating/ventilation/AC, and lighting standards;

- Materials such as paints, adhesives, and finishes that improve indoor air quality, reduce hydrocarbon emissions, and improve the health of occupants.

In 2021, the County adopted all electric Reach Codes, requiring new buildings in unincorporated areas to use electricity (not natural gas) for water heating, space heating, cooking, clothes drying, indoor and outdoor fireplaces, and decorative appliances. The Reach Codes also require infrastructure for charging electric vehicles. These regulations go further than State requirements related to climate change. Within unincorporated areas, 43% of total GHG emissions are attributed to commercial and residential natural gas use and these requirements will ensure that no new emissions from natural gas use in new buildings are added to the atmosphere. This ordinance will also improve indoor air quality and safety, reduce new building construction costs, and help transition the County's building stock to the State's planned phase-out of natural gas infrastructure.

Enhanced energy conservation standards are not limited to green building. To increase native plant landscapes and prioritize water efficiency, the County of Santa Clara has implemented the state Model Water-Efficient Landscape Ordinance (MWELo) standards through a locally adopted [ordinance](#). This policy prioritizes a holistic approach to the design, construction, and maintenance of landscaping to integrate with the local ecology and protect the watersheds. MWELo emphasizes the natural functions of the landscape to promote resiliency. The County's MWELo applies to residential development, which includes any landscaping over 500 square feet in area or earthwork subject to a Grading Permit.

Additional information regarding green building requirements is provided in section 2.06k, describing governmental factors and constraints to housing. Green building requirements add an increment of cost in terms of design, consulting services, material

choices, and equipment. The long-term advantages significantly outweigh costs over the life of a building and help to reduce the County's carbon footprint.

2.06 Governmental Factors Influencing Housing

2.06a Introduction and Overview

State law requires that the Housing Element contain an analysis of potential and actual governmental constraints upon the maintenance, improvement, or development of housing for all income levels, including land use controls, building codes and their enforcement, site improvements, fees and other exactions required of developers, and local processing and permit procedures. This analysis is also required to discuss local efforts to remove governmental constraints that hinder the locality from meeting its share of the regional housing need in accordance with Government Code Section 65585. For the purposes of this discussion, 'land use control' is a term used to refer to any policy, regulation, or similar exercise of local land use authority.

The primary purpose of including a discussion of potential or actual governmental constraints in the Housing Element is to provide a means for identifying regulations and procedures that may unduly restrict housing potential within the jurisdiction. Such analysis helps to assess ways the jurisdiction may facilitate housing development and improve supply. The purpose is not to place housing needs above all other matters of public policy concerns but rather to balance those with other concerns including public health and safety issues, conservation, and open space.

2.06b Land Use Controls

Land use controls include the General Plan and its control over residential densities, the Zoning Ordinance, the County’s Subdivision Ordinance, County regulation of building sites, and specific development standards, such as parking requirements and height limits, any growth control measures employed, policies and regulations regarding accessory dwelling units, junior accessory dwelling units, SB 9 (2021) ‘urban primary units,’ and density bonuses. Discussion of specific standards is found in Section 2.06f, after an overview of the principal land use control mechanisms adopted by the County regarding residential development.

In alignment with the provisions and purpose of the Housing Crisis Act of 2019 (Government Code 66300 et seq.), any County-adopted rezoning or development controls shall not impose any new governmental constraints to the development of housing unless those increased constraints are offset by the removal or reduction of other constraints. A “new governmental constraint” is a County-imposed requirement, including but not limited to process, fees, or design, that increases the cost of development, not including mitigation measures adopted in compliance with CEQA or a requirement adopted to specifically protect against a threat to health or safety. The County complies with these requirements, and has not rezoned or changed the designation of any parcels or districts to a reduced intensity since the adoption of the Housing Crisis Act. Any changes the County makes to zoning or land use designations in the future shall be done within the requirements of State law.

2.06c Santa Clara County General Plan: Charting a Course for Santa Clara County’s Future, 1995-2010

The General Plan governs unincorporated residential land use and development potential in a variety of ways. The fundamental policies that most affect residential land use are:

- The countywide growth management policies shared by the County, cities, and LAFCO, also referred to as the “joint urban development policies,” and
- The Land Use Plan and policies also referred to as the “Land Use Element.”

The joint urban development policies stipulate that urban types and densities of development for all land use categories should be located within cities or their USAs. Outside of the USAs of the 15 cities within the county, these policies stipulate that the County will allow only non-urban land uses and densities of development, such as agriculture, low-density residential, and open space uses. The goal is to direct new urban development in existing urban areas, preserve rural character, maintain and enhance agriculture, conserve open space and natural resources, minimize exposure to extreme natural hazards, and limit demand for new public services and infrastructure. These policies have been mutually agreed upon and implemented by the cities, County, and LAFCO since the early 1970s and are the fundamental growth management strategies guiding long-term land use for the urban areas and the rural unincorporated areas outside the USAs.

These policies are also consistent with SB 375, passed in 2008, and its Bay Area implementation, the *Sustainable Communities Strategy*, adopted by the MTC and ABAG in June 2013. These are also broadly consistent with *Plan Bay Area 2050*, the long-range Strategic Plan for the region.

For urban unincorporated areas, inside cities' USAs, the County's General Plan policies promote eventual annexation of such unincorporated urban pockets. The General Plan also requires new unincorporated development in USAs to conform to the General Plan of each respective city, conferring to the city authority for allowable uses and densities of development to determine the appropriate level of residential use within USAs. For example, where a city's General Plan land use element allows high-density, multi-family housing on an unincorporated urban parcel, the parcel may be annexed and redeveloped to meet the city's General Plan intention, through the necessary city approval processes.

The following are case studies that demonstrate implementation of agreements and policies between the County and the Cities that facilitate annexation and appropriate development of urban unincorporated areas.

Case 1: Communications Hill

Planning for the urban island of Communications Hill, the City Council of the City of San José adopted the Communications Hill Specific Plan in April 1992. The Specific Plan permits up to 4,000 dwelling units, primarily at a minimum density of 24 units per acre. The City of San José's Housing Element for 2007-2014 credits the site as having a total capacity of 5,421 housing units, of which over 2,500 have already been constructed. About one-third of the site's original 500+ acres have already been annexed and developed. The majority

of the remaining 335 acres of the site is vacant and unincorporated. The City of San José's 2040 General Plan made no changes to the Communications Hill Specific Plan.

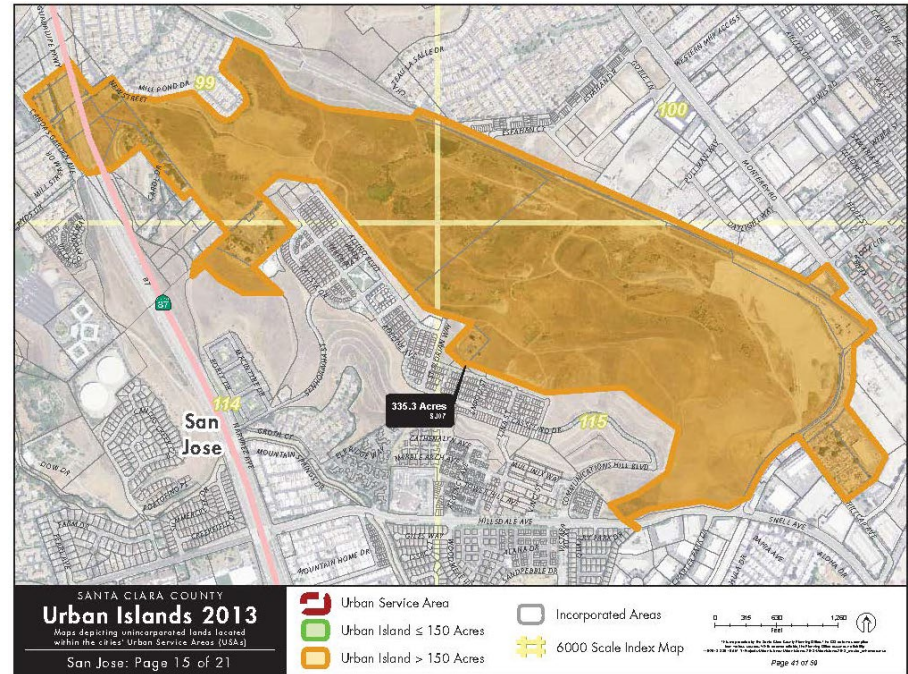

Figure 2.19. Urban Islands – Communications Hill

Case

2: Cambrian Park

The Cambrian Park Plaza project is within the unincorporated urban island of Cambrian Park in south San José. The project area covers just over 18 acres and is a mixed-use project planned for over 500 residential units that include senior and assisted living. It also has over 4 acres of open space and over 50,000 square feet of retail planned. The City of San José has filed for annexation of the project area, which was approved by the City Council in September 2022.

Figure 2.20: Urban Islands – Cambrian Park

As illustrated by the above two case studies, the County’s policies and procedures help facilitate annexation and appropriate development of urban unincorporated areas. This is accomplished by requiring new development to conform to city general plans, mandating referrals to the city to enable annexation prior to any significant development. In the case of whole urban island annexations, subsidizing mapping and state filing fees are other incentives. In these ways, the County makes it possible for such sites to be developed to their greatest potential, involving only one jurisdiction, and in ways that consider and complement the development patterns and land uses of the surrounding area already located within city limits.

The lands outside the cities’ USAs include the mountainous areas of the Diablo and Santa Cruz Mountain ranges, the agricultural lands of the south valley surrounding Morgan Hill and Gilroy, and the rural residential community of San Martin, located between Morgan Hill and Gilroy in the South County. To maintain rural densities of residential development and effectuate the goals and policies of other General Plan elements, the “Hillside,” “Ranchlands,” “Agriculture,” and “Open Space Reserve” land use designations require a minimum lot size of at least 20 acres per dwelling unit for purposes of subdivision and lot line adjustments. “Rural Residential” allows densities of between 5-20 acres per dwelling, depending on average slope. These minimum lot sizes govern the creation of new parcels by means of subdivision and the adjustment of parcels by means of lot line adjustments.

The Stanford Community Plan (SCP) is an area plan adopted as part of the County General Plan. The SCP and the Stanford 2000 General Use Permit (2000 GUP) guide future use and development of Stanford lands in a manner that incorporates key County General Plan principles. Through the SCP and 2000 GUP, housing development is linked with academic land use (refer to Section 2.06u). The SCP is being updated to address the changing needs of the residents and workers on campus and the residential capacity on campus is being updated to include the following:

- Minimum residential density on Academic Campus (High-density housing for faculty, staff, and students) has been increased from 15 dwelling units per acre to 30 dwelling units per acres.
- At least 50% of the housing planned on the identified sites is anticipated to be affordable housing.

Constraints Analysis

The fundamental policies of the General Plan governing rural land

use and densities do not unduly constrain residential development in rural unincorporated areas. Most new residential development in rural areas occurs on existing lots of record, not on lots created by subdivision under the current County Land Use Element.

Furthermore, the County's policies and its Zoning Ordinance do not preclude residential development of substandard lots (those less than the minimum allowed lot sizes under current zoning) solely based on being substandard. The low densities of development prescribed for rural areas are based on the prevalence of numerous physical development constraints throughout the rural areas, such as high fire hazard, seismic and geologic factors, significant slopes, and accessibility limitations. These areas are also important for purposes of habitat preservation, water supply reservoir protection, water quality, scenic resources, significant flood zones, and agricultural land uses. The densities prescribed by the General Plan are intended to accomplish a variety of related conservation goals and objectives.

The County's fundamental growth management policies rely on the Cities to develop a plan for annexation of the unincorporated urban islands and plan for residential development within those islands on sites suitable for housing. This policy has been effective in the past, as described in the above case studies. However, the County's reliance on the Cities to annex and plan for housing in the unincorporated urban islands leaves the County constrained in its ability to plan for housing when a city does not have a plan for annexation in place.

Implementation Measure

The County will be amending its General Plan policies and strategies (County General Plan Book B, Part 4 Urban Unincorporated Area Issues & Policies. Strategy No. 2: *Ensure Conformity of Development with Cities' General Plans*) to allow the County to plan for housing in

the unincorporated urban islands during each RHNA cycle (See policy HG1-8 in Chapter 3 and Program 2.02 in Chapter 4).

2.06d Santa Clara County Zoning Ordinance

The Zoning Ordinance was updated through a comprehensive reorganization and evaluation of its regulations in 2003. No substantive changes were involved with the Zoning Ordinance Revision project that affected residential minimum lot sizes, development standards, or process and permit requirements.

The Zoning Ordinance controls residential development potential primarily through the individual zoning districts, minimum lot size standards, and use regulations defining types of residential development allowed. One set of zoning districts is applied to lands inside USAs, including the Urban Residential Base Districts, and another set of districts is applied to lands outside USAs, including the Rural Base Districts.

Urban Residential Base Districts

Within USAs, the primary residential zoning districts are the R1, R1E, R2, and R3 districts. R1 and R1E are single-family districts. R2 is the Two-Family Residence district, which allows duplexes and single-family homes. R3 is Multi-Family Residential, allowing apartments and other forms of multi-family dwellings, as well as single-family and duplex units. RHS is the Urban Hillside Residential zone that is applied to some hillside lands within USAs; it is also a single-family district. There are two zones specifically for residential use on Stanford University lands, the R1S and R3S zones, which are low-density campus residential and medium-density campus residential zones, respectively.

Most urban areas zoned for residential use have base zoning districts of R1 and R1E. The County assigns a lot size "combining district" to an area's base zoning district to reflect the general pattern of existing

lot sizes found when those lots generally exceed 5,000 square feet in size. The lot size combining districts most commonly applied to single family zones (R1 and R1E) are the “-6” (6,000 square feet minimum lot size), “-8” (8,000 square feet lot size), “-10” (10,000 square feet lot size), and “-20” (20,000 square feet lot size) combining districts. R2 allows standard duplex or two-family residences with a 5,000 square feet minimum lot size, and R3 zoning permits multi-family residences of three units or more depending on the density permitted by the applicable city’s general plan. New residential uses in commercial and industrial zoning districts are generally not allowed.

Most residential areas within USAs are already subdivided and built out to maximum allowed densities. However, urban infill subdivisions do occur as opportunities arise, governed by city general plan densities. The County typically approves two to three such urban infill subdivisions per year.

In unincorporated urban zoning districts, the base zoning districts permit one primary dwelling per lot “by right.” ADUs and Junior ADUs are permitted by right in all urban and single-family residential zones (refer to section 2.06h for additional discussion). Urban Primary Units, additional units allowed by SB 9, are permitted by right in areas delineated under State law. Residential accessory structures are also permitted by right in residential zoning districts, but occupancy or habitation is prohibited within accessory structures.

Rural Base Districts

Like urban districts, in unincorporated rural zoning districts, the base zoning districts permit one primary dwelling per lot by right. ADUs and Junior ADUs are permitted by right in all rural and single-family residential zones (refer to section 2.06h for additional discussion). Urban Primary Units, additional units allowed by SB 9, are permitted by right in areas delineated under State law. Residential accessory

structures are also permitted by right in residential zoning districts, but occupancy or habitation is prohibited within accessory structures.

Rural area base zoning districts include Hillside (HS), Exclusive Agriculture (A), Agricultural Ranchlands (AR), and Rural Residential (RR). The Agricultural Ranchlands (AR) zoning district permits up to two primary residences per legal lot by right, but only on lots of 10 acres or more, provided one such dwelling is related to the agricultural use of the property. While single-family residences are allowed in these zones, only Rural Residential (RR) zoning district has the primary purpose to provide housing. The other rural area base zoning districts are intended to preserve natural resources such as sensitive habitats and agricultural lands, and reduce development in areas susceptible to fire, geologic, and flooding hazards. Density of development in these zones is consistent with the densities defined by the General Plan and Zoning Ordinance as described in the previous section describing the General Plan. In other words, the rural area zoning districts further implement the density controls provided by the General Plan for lands outside USAs.

In addition to the residential densities above, all four rural zoning districts allow for agricultural employee housing and temporary agricultural residences by way of a ministerial non-discretionary Planning Clearance or with a Special Permit, depending on the scale and base zoning. Please refer to section 2.06s for a more detailed discussion on these forms of housing in the county.

Constraints Analysis

The allowable uses and minimum lot sizes for each zone are delineated in the Zoning Ordinance, which implements policies established in the General Plan. Single-family residences are permitted by right in all urban residential zones and all rural base zones. The use regulations and minimum lot sizes of the County Zoning Ordinance do not unduly constrain housing development.

Implementation Measure

No changes are recommended or necessary to the County's Zoning Ordinance to accommodate projected housing demand. However, with ongoing improvements, clarifications, and updates to the Zoning Ordinance on an annual or bi-annual basis, the County reviews applicable provisions for opportunities to address potential constraints to housing. For example, when recent provisions for ADUs were under review, the County evaluated possible ordinance revisions and standards to ensure that they were practical, necessary, and appropriate. During such Zoning Ordinance amendments, the County considers revisions that could reduce regulatory requirements and facilitate establishment of ADUs and other new forms of housing.

2.06e Regulation of Building Site Approval

Building Site Approval (BSA) is generally required as a prerequisite to the issuance of a building permit for new primary residential development on vacant lots and for additions of over 500 square feet to existing residences on parcels that are not approved building sites. BSA is applicable to vacant, rural sites, specifically properties located within the A, AR, HS, RR, R1E, and RHS zoning districts. BSA is the land development application process used by the County to determine whether, and under what specific conditions, a parcel of land may be improved for residential use. BSA has been required by the County since 1965 for lots not created by subdivision processes that conferred site approval through the subdivision approval and subsequent recording of a parcel or tract map. At issue are parcels created by deed transaction or other means of land division for which site approval and accompanying improvement requirements have not been imposed. Numbered lots in a numbered subdivision tract map are approved building sites. Whole parcels shown on parcels maps for subdivision purposes are also recognized as

approved building sites, if there is no formal pronouncement on the map negating the status of a lot as an approved building site. Some lots created by subdivision were exempted from site approval requirements through the land development process in place up to the late 1970s and early 1980s. Since that time, all lots approved by subdivision maps are required to demonstrate site suitability and conformance to development standards that enable them to function as approved building sites.

Constraints Analysis

BSAs ensure that a parcel proposed for residential development has safe and adequate access for emergency vehicles, an adequate water supply for potable water and for fire suppression, capacity for sanitary waste disposal, and other matters related directly to public health and safety standards. Drainage, road right-of-way (ROW) dedication and improvement requirements, and geologic hazard issues are also addressed through the site approval process. Although such requirements and exactions (a ROW dedication, for example) may impose costs to the residential development proposed, no residential development for unapproved sites would be feasible without such improvements. In summary, the site approval process functions as a means of ensuring that a subsequent building permit can be issued in conformance with all applicable standards and codes to facilitate housing production with adequate infrastructure for health and safety.

Implementation Measure

No further change to BSA procedures or requirements is necessary or appropriate to accommodate projected need for housing development on rural, unimproved parcels.

2.06f Specified Development Standards

Development standards, such as maximum building height, parking space requirements, and similar standards, are contained within the

Zoning Ordinance. The primary residential development standards in the unincorporated county are discussed below.

The Zoning Ordinance provides for Floor Area Ratio (FAR) or lot coverage requirements in specific, limited zoning districts. The purpose of FAR and lot coverage is to limit house size or mass. In most zoning districts, the amount of floor area feasible for any given development is defined only by the setbacks, height, and story limitations.

In most zoning districts there are no open space requirements, however, in the “-os” Housing Opportunity Sites combining district, created for the sixth cycle planning period’s sites inventory, all buildings shall provide either a patio or balcony for each unit, or commonly accessible open space(s) (including courtyards, parklets, playgrounds, usable landscaped areas, rooftop common areas, and sports courts) equal to a minimum of ten percent of the lot size. This requirement alone, with a variety of options, many of which could be located within the building setback areas, is unlikely to reduce the maximum size of a multi-family residential structure.

Projects within the “-os” combining district are exempt from any development standards of the base zoning district, including FAR and lot coverage, and instead have the following ~~additional~~ objective development standards:

- Minimum setbacks of 10 feet on all sides.
- Maximum height of 135 feet, 150 feet, or 270 feet, depending on the development category, with no maximum of stories.
- Minimum density as required by Government Code § 65583.2(h), specifically including 20 units per acre for all sites that are required to accommodate housing for very low- and low-income households.

- Equitable distribution and characteristics between affordable and market rate units.
- Architectural variation to delineate building entrances and in wall planes over 100 feet in length.
- Onsite laundry facilities accessible to all units.
- Secured storage space accessible to all units.
- Onsite bicycle storage, no less than one space per four units.
- 1 guest parking space and 1 short-term drop-off/delivery space for projects with more than 25 units, with 1 additional space of each type required for every 600 residential units.
- Mixed-use residential development on Housing Opportunity Sites is generally limited to locating any non-residential uses on the ground floor and rooftop level and must comply with all requirements of Government Code § 65583.2(h), specifically including that residential use shall occupy at least 50% of the total floor area of a mix-used project.

All development standards applicable to the Housing Opportunity Sites are objective and were designed to ensure high-quality and equitable housing, and to provide basic amenities to all residents, while avoiding any subjective findings that may impose potential constraints on the project. These standards were conceived with multi-family development on these specific sites in mind, and taken all together, the maximum density can be easily achieved on any of the Housing Opportunity Sites while complying with the objective development standards.

Furthermore, should it be desired by a developer of one of these sites, any of the development standards may be modified pursuant to a development agreement approved by the County Board of Supervisors.

There are two combining districts used in unincorporated urban areas that have an FAR requirement, “-n1” in Los Altos, and “-n2” in the Burbank neighborhood of San José.

The -n1 combining district within the USAs of Los Altos and Los Altos Hills, FAR requirements fall into two categories:

- Lots of 10,000 square feet (net) or less have an FAR limit of 35%.
- Lots larger than 10,000 square feet have a FAR of 3,500 square feet plus one additional square foot of floor area per 10 square feet of lot area over 10,000 square feet, to a maximum of 5,700 square feet.

The -n2 combining district in Burbank has an FAR limit of 50%.

In December 2021, by way of a new combining district called the Coyote Valley Climate Resilience Combining District (“-cv”), the County adopted development standards for all new development within the unincorporated agricultural area known as Coyote Valley. The new standards include a maximum lot coverage of 7,500 square feet for all non-agricultural structures and a maximum development area of one acre, unless there is onsite agriculture, in which case development area is allowed up to two acres.

In May 2022, the County adopted objective development standards for Stanford University’s Upper San Juan neighborhood through the adoption of an “-n3” combining district, for the purpose of preserving the area’s unique characteristics. The -n3 combining district requires single-family development to not exceed 20% of lot coverage and a maximum of 35% lot coverage for two-family and multi-family developments.

In all districts that are restricted by FAR or lot coverage, additional allowances are made so that property owners can accommodate ADUs, JADUs, and SB 9 urban primary units (where authorized) even

if the property is already at or near its maximum allowed development.

The following table sets forth the primary development standards for each zoning district. The maximum density can be easily achieved in each of the County’s zoning districts, given the relatively large minimum parcel sizes and objective development standards that are commensurate with the minimum parcel sizes. A small percentage of parcels on steep slopes and in rural areas are unable to fully realize their maximum allowed density due to site-specific constraints, typically involving the topography or other environmental constraints. The County Zoning Ordinance allows an applicant to seek a variance in situations where site-specific constraints can be accommodated through modified development standards without creating an adverse impact to public health and safety.

To further demonstrate that the maximum density can be achieved in each of the County’s zoning districts, below is a list of the minimum lot sizes for each zoning district, its corresponding setbacks, and a discussion of how the maximum density can be achieved.

- **Rural Zones** (A, AR, HS, RR) have a range of minimum lot sizes (Table 2.1921) with the smallest being 5 acres. These zones have minimum side, rear, and front setbacks of 30 feet (Zoning Ordinance provisions also allow setback reductions for “substandard” lots). On a 5-acre lot, these setbacks leave a remainder of roughly 4 acres (175,000 square feet) to develop three dwelling units: a single-family residence, ADU, and Junior ADU. With the ADU size limitation being 1,200 square feet, and the Junior ADU limitation of 500 square feet, that leaves over 173,000 square feet to accommodate the development of a single-family residence and its associated improvements (driveways, septic systems, etc.). The County regularly processes applications that are able to develop three residential units and their associated improvements on parcels 5-acres or larger.

- **RHS** has a range of minimum lot sizes with the smallest being 1 acre. The setbacks for this zone is 30 feet from the side, rear, and front property lines. On a 1-acre lot, these setbacks leave a remainder of roughly 20,000 square feet to develop three dwelling units: a single-family residence, ADU, and Junior ADU. With the ADU size limitation being 1,200 square feet, and the Junior ADU limitation of 500 square feet, that leaves over 18,300 square feet to accommodate the development of a single-family residence and its associated improvements (driveways, septic systems, etc.). The County regularly processes applications that are able to develop three residential units and their associated improvements on parcels 1-acre or larger.
- **A1, R1E, R2, R1** have a range of minimum lot sizes with the smallest being 5,000 square feet. These zones have front and rear setbacks of 25 feet with side setbacks that increase with the minimum lot size (i.e., a property with a minimum lot size of 10,000 square feet has a side setback of 10 feet, a property with a minimum lot size of 20,000 square feet has a side setback of 15 feet, etc.). Lots with that have a minimum size of 5,000 square feet have a side setback of 5 feet. With the 25-foot front and rear setback and 5-foot side setback, this leaves roughly 2,000 square feet for a single-family residence that can be up to two stories and 35 feet tall. ADUs and Junior ADUs have a rear and side setback of 4 feet. On a 5,000 square feet parcel, this leaves roughly 3,000 square feet to accommodate an ADU and Junior ADU. The County regularly processes applications for the development of a single-family residence, ADU and/or Junior ADU on lots 5,000 square feet or larger in these zones.
- **R3** has a density as determined by the applicable city's general plan. The intent is that the density will be consistent with the surrounding city's requirements, preparing for eventual annexation into the city. The City of San José has a variety of general plan designations in the R3 zone, the majority of which is Mixed Use Neighborhood (MUN). One hundred percent

residential development in the MUN areas has a density of 30 dwelling units per acre. The majority of parcels in this zone are approximately 6,000 square feet, which would allow for four dwelling units pursuant to the City of San José General Plan MUN requirements.

Setbacks in this zone consist of 20 feet in the front, 10 feet on the sides, and 15 feet in the rear. The maximum height is 45 feet with 4 stories. With these applicable setbacks, this leaves approximately 2,500 square feet to accommodate the allowed four units. As such the R3 development standards do not restrict the property from achieving its maximum density.

- **R1S** has a density of 8 units per acre pursuant to Zoning Ordinance Section 2.30.030. However, each lot can *also* have an ADU and Junior ADU. The majority of parcels in this zone are 0.25 acres, which allows for two dwelling units, plus an ADU and a Junior ADU, which totals to four units.

The setbacks in this zone are a 25-feet in the front, 5-feet on the sides, and 25-feet in the rear. This leaves approximately 6,000 square feet to accommodate the two primary units. The ADU and Junior ADU have side and rear setbacks of four feet, which leaves approximately 7,000 square feet to accommodate the ADU and Junior ADU. As such, the R1S development standards allow the properties to achieve their maximum density.

Furthermore, the side and rear yard setbacks may be modified through a discretionary review process, Architecture and Site Approval (ASA) which is meant to provide setback flexibility so the property can reach its allowed maximum density.

- **R3S** has a density of 15 units per acre. However, there are no set setbacks or height limitations as they are determined by the ASA process to provide setback and height flexibility so the property can reach its allowed maximum density.

Table 2.1921: Residential Development Standards

Base Zoning District	Maximum Density ¹⁷	Setback (Min)			Bldg. Height (Max)	
		Front	Side	Rear	Dwelling	Accessory Buildings
A	3 units per 5 acres (A-5ac), 20 acres (A-20ac), or 40 acres (A-40ac), depending on lot size combining district. ¹⁸	30'	30'	30'	35' (2 Stories)	In rural districts (generally) 35' if greater than or equal to 2.5 Ac., otherwise 12'.
AR	3 units per 20 to 160 acres, depending on slope.	30'	30'	30'	35' (3 Stories)	In rural districts (generally) 35' if greater than or equal to 2.5 Ac., otherwise 12'.
HS	3 units per 20 to 160 acres, depending on slope and optional clustering. ¹⁹	30'	30'	30'	35' (3 Stories)	In rural districts (generally) 35' if greater than or equal to 2.5 Ac., otherwise 12'.
RR	3 units per 5 acres (RR-5ac) or 20 acres (RR-20ac).	30'	30'	30'	35' (2 Stories)	In rural districts (generally) 35' if greater than or equal to 2.5 Ac., otherwise 12'.
RHS	3 units per 1 acre to 10 acres, depending on slope.	30'	20'	25'	35' (3 Stories)	In urban districts (generally) 12' (plus gable allowance)
A1, R1E, R2, R1	3 units per 5,000 sq. ft., or as determined otherwise by lot size combining district.	25'	5' (or by combining district)	25'	35' (2 Stories)	In urban districts (generally) 12' (plus gable allowance)
R3	Per the density allowed by the applicable city general plan.	20'	10'	15'	45' (4 stories)	In urban districts (generally) 12' (plus gable allowance)
R1S	24 units per acre.	25'	5' (or by ASA)	25' (or by ASA)	35' (2.5 Stories)	In urban districts (generally) 12' (plus gable allowance)
R3S	15 units per acre.	Determined by ASA.				

¹⁷ Maximum density is described here as a measure of total units allowed per the minimum parcel size in each zoning district. Single-family homes are permitted to have two additional units per parcel (one ADU and one JADU), therefore, zoning that allows one single-family unit is described here to allow three total units per minimum parcel size. Parcels that are eligible to utilize SB 9 are allowed an additional, fourth unit. In certain cases, the Zoning Ordinance also establishes a minimum residential density.

¹⁸ In Urban Service Areas, density is determined by the corresponding city's general plan designation for the property.

¹⁹ Cluster subdivisions may be proposed in HS, in which case the maximum density is 3 units per 20 acres, depending on slope density, and with 90% of the remaining land area preserved in permanent open space

The following table describes standard parking space requirements for residential uses. Despite trends toward the increasing size of residential development and vehicle ownership per household, minimum parking space requirements have not been increased, thereby minimizing development limitations.

In December of 2023, the County reduced the number of parking spaces required for multi-family development from 1.5 spaces per dwelling unit to 1 space per dwelling unit, across all zoning districts. In most zoning districts, no guest parking spaces are required,

however, the “-os” Housing Opportunity Sites combining district requires guest parking in certain instances, as described above.

Currently, the County Zoning Ordinance does not differentiate parking requirements in dwellings based on the number of bedrooms. In transit rich areas, parking requirements have been reduced or eliminated for ADUs and SB 9 urban primary units in alignment with state law, and for multi-family developments that qualify for parking exceptions or reductions.

Table 2.2022: Parking Requirements

Housing Type	Minimum Parking Requirement
Single Family Residences	2 spaces / dwelling unit (1 shall be covered)
Two-Family	2 spaces / dwelling unit (1 per unit shall be covered)
Multiple Family Dwelling Unit	1 space / dwelling unit
Accessory Dwelling Unit (ADU)	
Standard (attached or detached)	1 space / dwelling unit
Movable Tiny Home	1 space / dwelling unit
Junior ADU	None
Caretaker's Residences	2 / residence
Home Occupations	
General	None
Expanded	1 in addition to total residential Requirement
Recreational Vehicle Parks	1.5 per recreational vehicle space, plus 1 per employee
Residential-Communal Institutional	1 for each guest room, plus 1 for each employee (may be reduced if occupants normally do not have cars)
Rooming Houses, Fraternities, and Sororities	1 space / guest room, plus 1 space / employee

Accessible parking requirements are required by law and typically apply to non-residential and multi-family residential projects. Accessible parking requirements typically do not affect single-family residential development.

Table 2.2123: Accessible Parking Requirements

Total Number of Parking Spaces	Number of Accessible Spaces Required
One-25	1
26-50	2
51-75	3
76-100	4
101-150	5
151-200	6
200-300	7
301-400	8
401-500	9
501-1,000	2% of total
1,001 +	20, plus 1 per 100 over 1,000

The County's land development requirements for on- and off-site improvements vary by zoning district and area. For new non-residential land uses or subdivisions in an A, A1, R1E, R1, or R2 residential zoning district, the street dedication is typically a 30-foot half-street on the frontage of each parcel. Street and related improvement requirements are determined either by the County's Roads and Airports Department for streets that are or will become part of the County-maintained road system, or by the County's Land Development Engineering section of the Department of Planning and Development for private roads.

Additionally, the County Ordinance Code requires:

- Local streets shall have a right-of-way (ROW) width of 60 feet.
- Urban area streets with dedicated ROW of 40 feet will not require additional dedication, but may require road improvements (e.g., install drainage or close a sidewalk gap in front of the property).
- Private driveways serving a single residence may be 12 feet in width with one 3-foot shoulder. Driveways serving more than two residences must be 18 feet with two 3-foot shoulders.
- In some instances, such as cluster subdivisions, the street, court, parking, and turnaround areas may be varied, to minimize improvement requirements.
- All dwellings must have approved water sources and sanitary wastewater treatment and disposal plans, including onsite wastewater treatment systems if necessary. All dwellings must typically connect to sanitary sewer and public water, if available.

All dwellings that do not have access to adequate piped water supplies must have adequate storage of water, including above

ground storage tanks and sprinkler systems when required to meet increasingly stringent fire protection requirements in wildland areas. All dwellings in urban areas must have access to public fire hydrants and minimum pressure and flow standards. Residential sprinklers as required by current ordinance or code adoption. Dwellings in the Wildland Urban Interface zone are subject to current Building Code Requirements for exterior fire protection. Roads and longer driveways over 150 feet must meet minimum width and clearance standards as well as loading capacity, grade, turnouts, and turnarounds to be accessible to emergency vehicles.

For certain parcels located in the County's rural resource areas, for example Hillside (HS) zoning, the permit review process can take longer if the applicant is subject to State fire access requirements or State drinking water requirements.

Constraints Analysis

The basic development standards applicable to residential use and development are consistent with those applied by most local jurisdictions; however, they do constitute an undue constraint on housing development. Parking requirements add an additional cost to development of any housing, a cost which is compounded for multi-family development. Minimum lot sizes and required setbacks beyond those necessary for fire safety also represent a constraint on the number, size, and types of units which can be developed. Height, FAR, and lot coverage standards similarly provide this constraint. Additionally, the County's current Zoning Ordinance and development guidelines limit multi-family development to relatively low densities. Other standards described above are directly related to public health, safety, and general welfare objectives of the Zoning Ordinance and other County Ordinance Code provisions.

Implementation Measure

The County will review and update parking standards to allow more

flexibility for a variety of housing types particularly in urban areas that are within walking distance from High-Capacity Transit Corridors. The County has implemented Program 2.02 – Planning for Housing Development in Unincorporated USAs and Stanford University Lands, which created a new combining district to rezone sites listed in this Housing Element’s sites inventory and a streamlined, non-discretionary permit review for multi-family and/or mixed-use development with a certain percentage of affordable units. This new process will remove as many constraints as possible for the approval of new multi-family development on these properties.

2.06g Growth Control Measures

Growth control measures are defined as programs and/or ordinances that place limits on population and dwelling units within a jurisdiction during a particular period. Within such period, the jurisdiction will typically implement those limitations on growth by establishing a cap on the number of building permits that may be issued annually for construction of new residential units. The County of Santa Clara does not employ any growth control measures that place numerical limits upon the number or type of building permits that may be issued in a given period.

2.06h Accessory Dwelling Units & Junior Accessory Dwelling Units

Accessory Dwelling Units (ADUs) and Junior Accessory Dwelling Units (JADUs) are an important part of providing an adequate and affordable housing supply. The County recognizes that ADUs and JADUs can be particularly important to augment urban housing supply in a largely built-out metropolitan area, such as the urban areas of Santa Clara County. Regulations governing ADUs and JADUs are set forth in Section 4.10.015 of the County Zoning Ordinance. The regulations allow for ADUs (which includes Movable Tiny Homes or

“MTHs”) and JADUs on properties with single-family residences in accordance with Government Code Sections 65852.2 and 65852.22. ADUs and JADUs are permitted by right and do not require land use entitlements.

ADUs and JADUs are permitted in all zones within the unincorporated county except for Light Industrial (ML), Heavy Industrial (MH), Open Space and Field Research (OS/F), and Special Conservation Areas (SCA), as these zones do not permit single-family residences. In the past, JADUs were not permitted, and ADUs (formerly known as secondary dwelling units) were regulated and limited in size depending on its location in an urban zoning district or a rural zoning district.

Since the 2014 Housing Element update, the Zoning Ordinance has been revised according to State law and allows for conforming ADUs and JADUs as a matter of right, reducing the regulatory burden on property owners and streamlining the approval process in terms of both cost and time. Furthermore, the County has applied the standards of ADUs and JADUs similarly across all sections of the County to ensure equitable access to housing type and size, with respect to ADUs and JADUs where lot coverage constraints do not exist. Additionally, the County has allowed JADUs to be attached to either a primary residence of an ADU, which surpasses the state’s requirement and increases the opportunities to develop these types of units.

Within the unincorporated county, ADUs can be a maximum of 1,200 square feet, with a 400-square foot attached garage and 400-square foot attached deck. ADUs can be either attached or detached from the primary residence. The ADU, whether attached or detached, must be setback four feet from the side and rear property lines, with a front setback that is the same as the primary residence. Height requirements for ADUs are the same as the primary residence if all

primary residential setbacks are adhered to. If the ADU encroaches into the primary residence setbacks (remaining four feet away from the side and rear property lines), the maximum height requirement is 16 feet. There are exceptions to setback and height requirements for the conversion of legal structures into ADUs. The County does not require owner-occupancy of the primary residence or ADU, and has made this amendment permanent, which exceeds the state law requirements.

JADUs can be a maximum of 500 square feet and must be attached to either the main residence or a detached ADU. JADUs share the same setback and height restrictions as an ADU. JADUs must contain cooking facilities and may share sanitation facilities with the existing dwelling unit. Owner-occupancy of at least the primary residence or the JADU on site is also required for all properties containing a JADU, as required by state law.

The County will continue to consider additional minor modifications to certain standards for ADUs and JADUs to provide greater flexibility and facilitate additional units as part of routine Zoning Ordinance review, and in accordance with any future amendments necessitated by State law.

2.06i Senate Bill 9/Urban Primary Units

In 2021, the State adopted SB 9 to add Government Code Sections 65852.21 and 66411.7 (as well as amend Section 66452.6) to allow the development of two residential units on a lot within a single-family residential zone and/or the subdivision of a lot within a single-family residential zone by right if certain conditions are met. On January 24 and February 7 of 2022, the County amended its Zoning Ordinance (adding Section 4.10.387 and amending other sections) and Subdivision Ordinance (adding Sections C12-5.23 and C12-44 and amending Section C12-77) to reflect these changes, and to apply objective development standards allowed by the State.

SB 9 is intended to streamline and remove barriers to housing production in urban, primarily infill, development sites. For areas that are unincorporated, the parcel must be wholly within an urban area as designated by the U.S. Census Bureau. There are two designated urban areas within Santa Clara County: the San José Urban Area, which includes the thirteen northern cities, much of the Stanford lands, and unincorporated “urban islands,” and the Gilroy-Morgan Hill Urban Area, which includes those two cities as well as the rural community of San Martin between them. Properties with historic or conservation designations are not included, nor are properties on prime farmland or wetlands, or that contain habitat for protected species. Applicants with parcels with fire, flooding, or geologic hazards or identified as containing hazardous waste must show that these hazards are properly mitigated to use SB 9. Areas outside of the USAs must also show adequate access to water and wastewater management. Protections are built into the State law for renters, including a bar on short-term rentals to retain affordable housing. Applicants for subdivisions must state their intention to use the property as their primary residence for a minimum of three years, a provision designed to limit the involvement of large developers.

The County Zoning Ordinance mirrors state requirements that each Eligible lot be allowed to develop two residences, each at least 800 square feet in size. One of these residences is only restricted in size by the existing FAR, lot coverage, setbacks, and height requirements of the underlying zoning district, while the second unit may be up to 1,600 square feet in size, which is double the minimum standard. If a property owner does not split a lot, the owner may also add an ADU and Junior ADU. Objective standards adopted by the County focus on preserving privacy and neighborhood character, including minimum lot frontages, minimal design standards in design review districts, and restrictions on second story windows, balconies, and rooftops. Alternatives and exemptions from standards are included

to ensure that all eligible parcels can utilize SB 9, unless the Building Official can make a written finding that the project would have a specific, adverse impact upon public health and safety or the physical environment and for which there is no feasible method to satisfactorily mitigate or avoid. Like ADUs, the County has applied an equitable approach to the size of an Urban Primary Unit of 1,600 square feet across all zoning districts that are permitted to utilize SB 9 for development. This ensures that all have access to the same building structure type and size and that units are more likely to be affordable to rent to the public.

Unlike larger subdivisions, SB 9 development projects are exempt from the County Inclusionary Housing Ordinance. Parking requirements are reduced to one space per residence or eliminated for properties near High-Capacity Transit Corridors.

Constraints Analysis

The largest constraints on SB 9 development are the requirements in the State law regarding which parcels are eligible, which largely align with the County's General Plan and joint development policies regarding preservation of habitat for protected species and agricultural lands, and carefully vetting growth in hazard zones. Parcels in the urban islands and most of the rural community of San Martin are eligible if they are in single-family zones and do not have site-specific disqualifiers. The basic development standards applicable to SB 9 development in the unincorporated county are consistent with those found in the State Government Code and do not constitute an undue constraint on housing development. Standards described above are directly related to public health, safety, and general welfare objectives of the Zoning Ordinance and

other County Ordinance Code provisions. Additional FAR allowances and exemption from the County's Inclusionary Housing Ordinance were included in the County's ordinances to ensure these measures are not constraining factors. SB 9 allows for higher-density development in infill areas and will allow for additional housing development. In no cases will it reduce the density or number of units allowed prior to SB 9's adoption.

Implementation Measure

The County will review implementation of SB 9-related measures in Fiscal Year 2023-2024 and again in 2025-2026 and further amend the County Zoning Ordinance and Subdivision Ordinance as necessary to ensure eligible property owners can utilize SB 9 without undue constraints. Any changes to State law impacting SB 9 development will also be reviewed as they are adopted.

2.06j Density Bonuses

State Government Code Sections 65915 through 65918 address density bonuses and other incentives to providing affordable housing. "Density bonus" is a term generally used to refer to an allowance granted by the local jurisdiction to a developer to build more units per acre than otherwise permitted under the General Plan or zoning regulations. State law requires, in certain instances, a city or county to grant a density bonus when certain affordability provisions are met, namely, when a specified percentage of affordable housing is proposed and will be maintained as such for a period of 55 years.²⁰ The city or county is required to grant the concession or incentive proposed by the developer unless it finds that the proposed concession or incentive does not result in identifiable and actual cost reductions, would cause a public health

²⁰ Guide to the California Density Bonus Law, Revised 2021, by Jon Goetz and Tom Sakai, accessed 9/8/22 <https://www.meyersnave.com/wp-content/uploads/California-Density-Bonus-Law-2021.pdf>

or safety problem, would cause an environmental problem, would harm historical property, or would be contrary to law.²¹

The County's Zoning Ordinance provides for a density bonus in accordance with State laws under Section 4.20.030. The County's regulations refer to and rely upon existing State laws, including California Government Code Sections 65915 through 65918 and California Health and Safety Code Sections 50052.5 and 50053, rather than adopting extensive and complex provisions in the County's Zoning Ordinance, as density bonus laws are frequently updated. These regulations were adopted as part of the County's comprehensive Zoning Ordinance revision in 2003, which both simplified density bonus provisions and brought them into compliance with State laws. In June 2014, the County amended the density bonus requirements to ensure that they reflected the 2005 update to State density bonus laws. Additionally, the County will implement Program 2.18 – Facilitate State Permit Streamlining Laws, which will establish application requirements, eligibility criteria and decision making and processing criteria for applications associated with State Density Bonus Law.

Pursuant to the County's Inclusionary Housing Ordinance, at least 16 percent of new units in multi-family development shall be made available to rent or purchase at an Affordable Housing Cost to lower, very low, or extremely low-income households earning no more than eighty percent (80%) of the Area Median Income. The Applicant for a multi-family development providing Inclusionary Units upon the same site as the Market Rate Units may, at the Applicant's sole option, submit a written request for density bonus, waivers or incentives pursuant to California Government Code Section 65915 et seq. and Section 4.20.030 of the County Code, if the multi-family development includes the provision of affordable Inclusionary Units

within the development that meets the minimum thresholds for density bonus pursuant to California Government Code Section 65915 et seq. The incentives requested by the Applicant of the multi-family development shall be included in a proposed Affordable Housing Plan, and any incentives authorized by the County pursuant to Section 4.20.030 of the County Ordinance Code shall be included in the Affordable Housing Plan, if approved by the County, for the development.

Constraints Analysis

The use of the density bonus provisions of the Zoning Ordinance in urban unincorporated county projects has been limited. Most urban residential areas were fully subdivided and developed by the 1970s. Hence, the major subdivision tracts of 100-300 single-family residential lots that might have taken advantage of density bonuses were approved before density bonus provisions of State law took effect. Where urban area multi-family dwellings are permitted uses and eligible for redevelopment, and therefore might take advantage of density bonus provisions, the typical development process involves annexation to an adjacent city if the property is contiguous with existing city boundaries. Consequently, the remaining urban unincorporated areas, which are predominantly single-family tracts, do not produce development proposals capable of utilizing density bonus provisions. New single-family residential subdivisions of 10-20 parcels do not occur, given the larger minimum lot sizes within rural areas and limited number of larger parcels in urban areas. Developers have not elected to pursue density bonus opportunities because the number of units involved in a typical subdivision of two or three lots does not provide the economies of scale necessary to incorporate more affordable units or benefit from density bonuses sufficiently to be profitable.

²¹ Ibid.

In the rural areas, major subdivisions of five lots or more are infrequent. Those that might qualify to take advantage of the County's density bonus allowance are even more rare. As stated above, given the allowable densities in rural areas, minimum lot sizes, and lack of public services, new residential development typically is for above-moderate income households, and the cost of including affordable housing is not covered by the additional density that might be available through density bonus.

Implementation Measure

To expand opportunities and locations for development of affordable housing, the County adopted an Inclusionary Housing Ordinance that requires a 16 percent requirement for affordable units and allows for paying in-lieu fees in certain circumstances. Since the County has largely conferred the planning and multi-unit housing project development in urban areas to cities, the density bonus provisions of cities are those applicable to most of such projects. As detailed in Programs 2.23 and 2.24, the County will streamline the permitting process for multi-family units by providing the public with checklists and information about the processing online, and will create an administrative permit system for applications which meet basic objective standards, including at least the minimum required affordable housing units.

2.06k Green Building Requirements

Currently, the County's Ordinance Code incorporates and requires conformance with the State of California's 2022 Building Code, Mechanical Code, Plumbing Code, Electrical Code, Green Building Standards Code and Energy Code. Codes establish the minimum acceptable standards for construction of all kinds, including code requirements for energy conservation and fire protection in most rural areas. Costs associated with meeting code requirements for

energy conservation are typically recouped through energy savings over a short time.

The County adopted the California Green Building Standards Code (CalGreen) regulations in 2014 to require minimum green building standards for single-family residential development, in particular new homes and rebuilds, effective September 2015. CalGreen Tier 1 requirements apply to all new single-family and duplex residential buildings over 3,000 SF, and new multi-family or non-residential construction of buildings over 25,000 SF.

In 2021, to further reduce carbon emissions and air pollution, the County adopted amendments (Reach Codes) to the 2019 California Green Building Standards and 2019 California Energy Code to require electrification (electricity as the only source of energy) of new buildings, with certain exceptions, and increase the electric vehicle infrastructure in new construction. Pairing electrification of vehicles and buildings with the high amounts of renewable energy generation is considered a lower-cost and lower-risk emission-reduction strategies. Since 2017, unincorporated Santa Clara County communities have been able to receive 100 percent carbon-free electricity.

Green building is *"a holistic approach to design, construction, and demolition that minimizes the building's impact on the environment, the occupants, and the community"* (California Building Standards Commission). Green building is also an important part of the Santa Clara County Climate Change and Sustainability program. The County is committed to energy efficiency, resource conservation, waste reduction, and the health and productivity of building occupants.

The overall costs associated with utilizing green building concepts and materials have been estimated as typically 5-7% of total construction costs for non-residential uses, such as office buildings. The cost for residential development may vary depending on house

size. Green building requirements may also contribute to meeting future greenhouse gas emission reductions and lowering the carbon footprint of an individual residence.

Constraints Analysis

Although green building requirements may add certain upfront costs to housing production, both in terms of services and design, there are a variety of ways green building requirements reduce the overall cost of construction and maintenance over the life of a building. For example, in terms of energy efficiency requirements alone, high-efficiency heating and appliance choices can pay off through lower utility costs in as little as five years. In terms of water use efficiency and savings, there can be similar short-term and lifetime benefits. Insulation, lighting choices, and material choices can improve indoor air quality and comfort as well as benefit the environment. A study conducted by Silicon Valley Clean Energy (SVCE) and Peninsula Clean Energy found that the construction of all-electric buildings, including single-family homes, are typically less expensive to build without the cost of natural gas plumbing, metering, and venting. Green building has become an integral, mainstream aspect of development in recent years, due to its environmental benefits and market value. Green building is now generally viewed as an indispensable part of the State's efforts to meet AB 32 goals for greenhouse gas emission reductions and addressing impacts of climate change.

The County anticipates meeting or exceeding the minimum State requirements for energy and environmental design in building structures.

Implementation Measure

The County will continue to monitor and adopt CalGreen standards as the baseline requirements are raised. The County is continuing to develop its regulations to promote energy conservation and green

building beyond the CalGreen standards, in both the private sector and in County Government buildings.

2.06I Site Improvement Requirements

Site improvement requirements include streets, driveways, parking and turnaround areas, road construction standards, undergrounding of utilities, water service connections or on-site water wells and storage tanks, drainage, stormwater treatment, and similar requirements. It also includes providing septic tanks and leach fields or sanitary sewer connections. Such site improvements are typically addressed and imposed as components of either subdivisions, grading or drainage permits, or building site approval processes. They are also imposed through ministerial approvals, such as a building permit, where applicable and required by County codes. In some urban unincorporated areas, where road and utility improvements already exist, there may not be significant on-site improvements required on an individual, parcel-by-parcel basis for new residential development.

In rural areas, where urban services are not provided and there may not yet exist any road, infrastructure, or utility improvements to facilitate development, site improvements can represent a significant component of overall development costs. For example, the cost of road or driveway access improvements can be substantial when developing remote, rural, hillside parcels.

A private driveway serving one or two parcels must be 12 feet wide, with one three-foot shoulder. Access roads serving three developed parcels or more must be 18 feet wide with two three-foot shoulders for a total of 24 feet of pavement surface. Additionally, access roads in the State Responsibility Area and/or the Very High Fire Hazard Severity Zone, as designated by the California Department of Forestry and Fire Protection (CAL Fire), must comply with the State Minimum Fire Safe Regulations, which includes requirements for two

ten-foot-wide travel lanes and limits to the length of dead-end and one-way roads. Grade limitations are also imposed for the purpose of ensuring that emergency vehicles can gain access to a given site.

The County adopted a periodic update to the Fire Code based on the 2022 California Fire Code that went into effect on January 1, 2023. The updates included administrative and operational requirements in alignment with the requirements of neighboring jurisdictions, creating a more consistent application of the California Fire Code throughout Santa Clara County and enabling the County to enforce these provisions should the need arise in the unincorporated areas. Amendments include requirements for fire apparatus access roads, fire water supplies, fire sprinklers, fire extinguishing systems in chemical fume hoods, energy storage systems, fire site safety during construction, and hazardous materials use and storage. The amendments require that all access roads have a 20-foot drivable width and clarify when sprinkler systems must be installed. According to these updates, no final inspection or certificate of occupancy can occur prior to clearance that fire protection facilities and access have been installed. When access roads cannot be installed because of topography, waterways, non-negotiable grades, or other similar conditions, an approved alternative means of fire protection shall be provided.

There can also be drainage improvements on rural properties not served by a storm drainage system to ensure no harmful off-site impacts or additional drainage problems are created by new impervious surfaces and buildings. Stormwater treatment improvements may be required to meet the permitting requirements of the State Regional Water Quality Control Board. Sediment and erosion control plans are required for all construction projects larger than 500 square feet and review is based on standards for the applicable drainage basin (San Francisco Bay or Monterey Bay).

Constraints Analysis

Basic site improvements of the type discussed in this section are necessary pre-requisites to residential development. The individual standards and requirements are not deemed excessive. They provide the basis for meeting the fundamental public health, safety, and welfare objectives of the Zoning Ordinance, Ordinance Code, and other development-related standards of the County. The County reviews these standards regularly and reduces them where appropriate. County requirements are in line with State requirements as well as federal and international standards. These constraints encourage housing to be developed in already urbanized areas where services are currently in place and hazard risks are greatly reduced, which also support other County and State priorities discussed in this chapter. While these constraints are the minimum necessary, they are not without a cost. The grading, pavement, and retaining walls necessary for access roads and driveways, especially in areas of wildfire risk, can cost millions of dollars. Similarly, the development of onsite wastewater treatment systems (aka septic systems) requires costly testing to site in addition to construction costs. Because of their relation to public health and safety, these are not constraints the County can reduce beyond encouraging development to be sited in areas which already have adequate access and can be serviced by existing sanitary sewers. However, this does not impede the ability for the County to meet its RHNA as the County's sites inventory is located within the city's Urban Service Areas which can provide services to those sites.

Implementation Measure

Given the recent update to the County Fire Code, and the lack of sites inventory locations in the rural unincorporated areas, no additional implementation measures are forthcoming. The County Fire Code will be reviewed and updated every three years in line with the California Fire Code and International Fire Code updates.

2.06m Building Permit and Inspection Fees

The County has, since the mid-1990s, adopted a full cost-recovery policy for fees imposed to cover direct services to customers. This policy reflects a perspective that development should not be subsidized by County General Fund monies and that fees cannot exceed the cost of services.

The County adopts the current version of the California Building and Residential Codes every three years, including supplements and errata. The building codes of the County are based on the International Building and Residential Codes (IBRC), as compiled and published by the International Code Council. The IBRC are further modified in the County's Ordinance Code with additions, deletions, and amendments.

Typical building permit and inspection fees charged by the County for residential development are based on a formula that factors construction type, floor area, and valuation. Most new residential development in the unincorporated county is that of single-family residences and ADUs; few multi-family housing developments are in the unincorporated county other than at Stanford University. As part of the County's SB9 implementation effort, County staff used Assessor's Office data to determine the median size of a single-family dwelling and found it to be approximately 1,500 square feet.^[2]

Fees are collected at the time of application submittal and itemized in the receipt provided at the time of application. County building permit fees are updated on an annual basis, as necessary. Additional fees are also imposed to recover the costs of permitting, inspecting, and administering permits for violations of building and housing codes when required by citations or notices of violation.

Comprehensive Planning Fee Surcharge

In 2010, the County updated its Comprehensive Planning Fee (CPF) surcharge on building permits of \$25,000 valuation or greater to the rate of \$0.00123 per dollar valuation of a project, with a maximum fee of \$7,000.00 per permit, regardless of valuation. The fee indirectly benefits individual project applicants by enabling the County to maintain the General Plan.

Impact and Additional Fees

The County does not assess any impact fees for residential development, beyond a limited option to pay an Inclusionary Housing fee in lieu of constructing affordable units. This is the case for both single-family residential development (which are exempt from the County's Inclusionary Housing Ordinance) and multi-family residential development, in both urban and rural parts of the unincorporated county. Other entities and special districts do collect additional fees, such as the school impact fee and the Santa Clara Valley Habitat Conservation Plan development fee as appropriate for the particular development.

Building Permit Review and Processing Times

Typical building permit review and processing times can vary depending on the size and complexity of the project, and on available staff. For a typical single-family residence that is not subject to a prerequisite building site approval process, standard plan check and review time is four weeks for the initial plan review. Subsequent reviews to address any comments from the first round of review take approximately two weeks. Express plan check and permit issuance is available for small projects that are typically additions of less than 500 square feet. Express plan check service is appointment-based

^[2] San Martin Advisory Committee Staff Report, July 27, 2022 meeting, Item No. 5 <http://sccgov.ig2.com/citizens/FileOpen.aspx?Type=1&ID=12852&Inline=True>

and enables the applicant to submit a building permit application with the goal of obtaining a permit in one business day.

Constraints Analysis

Building permit and inspection fees, including associated surcharges, do not impose an undue burden or constraint to housing development. As a percentage of total construction costs for a typical 3,500-square-foot home with a 500-square-foot attached two-car garage, building permit and inspection fees represent only approximately 2.25% of costs.

Implementation Measure

Each year, the County evaluates and adjusts fees as necessary to comply with the full cost recovery mandate set by the Board of Supervisors. Fees may be adjusted downward as necessary to reflect real processing costs.

The Department of Planning and Development recommends no changes to current fees for building permit plan check, review, and inspection. The Department continually reviews and implements procedural improvements as appropriate that may enable applicants to obtain services faster and with fewer complications. For example, for new homes that could require building site approval or other land use processes as a pre-requisite, the Department implemented a new checklist procedure to ensure that applicants are informed of the sequence of applications and help avoid situations where building permit applications are inadvertently submitted prior to obtaining

necessary land use approvals, or where the proposed project scope would make the project site subject to annexation by an adjacent city. These changes have significantly reduced complications and the need to extend building permit approvals or re-apply and pay new fees for building permit approvals that expire prior to obtaining pre-requisite land use approvals, such as site approval or Williamson Act compatible use determinations.

2.06n Land Use and Development Application Fees

Since the mid-1990s, the County has adopted a full cost-recovery policy for fees imposed to cover direct services to customers. This policy reflects a perspective that development should not be subsidized by County General Fund monies and that fees cannot exceed the cost of services.

The land use and development application fees listed below are collected by the Department of Planning and Development for necessary zoning and land use approvals. These are distinct from the building permit and inspection fees. State law requires land use and development fees to be commensurate and reasonably related to the cost of providing services. Permit processing fees charged by the County are in conformance with this requirement. For certain application types, there is a minimum fee for initial application costs, and if processing costs exceed the initial fee or deposit, the applicant is charged for the total cost of processing the application prior to issuance of the permit.

Table 2.2224: Land Use and Development Application Fees

Application Type	Fee as of 12/07/2021
Architecture & Site Approval	\$9,198*
Building Site Approval (inside USA)	\$4,860*
Building Site Approval (outside USA)	\$10,984*
Certificate of Compliance	\$1,488
Design Review-No Hearing- Tier I- Gross Floor Area= <5,000	\$995
Design Review-ZA Hearing- Tier II- 5,001 <Gross Floor Area= <12,500	\$3,963
Design Review – PC Hearing- Tier III- Gross Floor Area> 12,500	\$8,932
Environmental Assessment	\$4,069*
Petition for Categorical Exemption/ Use of prior CEQA document	\$532
Geologic Report review (letter report)	\$621
Geologic Report review (in-depth report)	\$1,634
Grading Approval	\$3,587
Grading Approval filed concurrently w/ other land development permit	\$2,364
Special Permit (agricultural and temporary)	\$5,973*
Subdivision (minor, 4 lots or fewer)	\$12,078
Subdivision (major, 5 lots or more)	\$16,562
*Use Permit (standard)	\$9,258
Variance (standard)	\$2,030
Zone Change	\$6,651
<i>Notes:</i>	
1) *Asterisk indicates minimum fee for initial filing of application. Full cost of the fee is assessed at the completion of processing and charged to applicant.	
2) There are also final inspection fees for Fire Marshal and Land Development Engineering.	

Single Family Dwelling Development Cost Example

The first example of land use approval costs represents a typical rural area land development scenario, to provide a better understanding of the application fees associated with development of a new single-family dwelling used as a primary residence. Where the parcel is not an approved building site, it is not uncommon for the project to involve Building Site Approval and a Grading Approval and permit. Combined fees for these typical land use applications are \$14,411, including a petition for exemption from CEQA. These fees are based on typical processing costs and are in addition to the building permit fees discussed in the previous section. They represent the most common fees associated with residential development in rural areas. Neither a Building Site Approval nor Grading Approval would require a public hearing.

In areas subject to Design Review requirements, a Design Review process is required for a new single-family residence. The Design Review would be processed concurrently or bundled with Building Site Approval and Grading Approvals, if also necessary. Design Review zoning applies to most rural hillside lands immediately adjacent to and visible from the urban area or valley floor areas of the County. It may also be required as a condition of subdivision approval.

The Design Review process is intended to achieve excellence in residential design and make sure development blends with the natural hillsides as much as possible. Standards can require low reflectivity of painted surfaces and landscaping to blend with the natural hillsides and mitigate for visual impacts and may affect the placement of a home on a site for visual mitigation. The process allows for a residence that is 5,000 square feet or less to be processed without a public hearing. For structures that trigger design

review that exceed 5,000 square feet in size up to 12,500 square feet in size, a public hearing by the Zoning Administrator is required. Design Review residences that exceed 12,500 square feet in size require a Planning Commission public hearing. Minor projects, such as additional to an existing residence or accessory structures, may apply for an exemption or for administrative review without a public hearing. Decisions of the Zoning Administration Hearing Officer may be appealed to the Planning Commission, and Planning Commission decisions to the Board of Supervisors. Companion land use actions (i.e., Grading and Building Site Approval) are completed concurrent with Design Review and are referred to as Concurrent Land Use applications by the County Zoning Ordinance. Generally, Design Review takes 2-4 months. Design Review rarely results in project denial because the process is intended to identify and resolve issues that would result in an unacceptable final project design. Conditions of approval often include grading quantities, architectural refinements/limits, landscape requirements, and protection of existing vegetation.

Costs commonly associated with Design Review process include the County application fee (\$3,963) and consultant fees for design and modification of site improvements. Additional costs are often offset by savings associated with reduced grading, since Design Review (especially in conjunction with Grading review) often results in less grading on the site.

Multifamily Dwelling Development Cost Example

This second example of land use application costs represents a four-unit apartment project in an urban area zoned for multifamily development, in R1S, R3S, or R3. The project would require Architecture and Site Approval (ASA). There is no mandatory pre-application meeting requirement as there is for a non-residential Use

Permit or Subdivision. Accompanying the submittal is a form indicating that the density of the proposed development conforms to the applicable city General Plan. The ASA process is designed to ensure conformance with applicable development standards and reasonable conditions of approval. Generally, ASA addresses the adequacy of parking and driveways, landscaping, site layout, and design of the structure. ASA may also evaluate the relationship of the lot and its development with adjacent uses. Standard ASA fees are \$9,197, plus \$531 for the processing of a Categorical Exemption under CEQA.

Constraints Analysis

Each annual budget cycle, fees are assessed relative to service costs. In the current fee evaluation process, certain fees will be reduced to address the general or average cost of processing, while other lesser fees will become minimum deposit fees without being raised, to enable compliance with full cost recovery mandates. Fees may not be significantly increased except for the amount necessary to cover inflation in personnel costs. Fees for service is now a common means for local governments to address the costs of development-related services without relying on General Fund revenues. Fees are set by the Board of Supervisors to recover full costs of the services provided, thereby avoiding reliance on General Fund revenues to the greatest extent feasible. Reducing fees would necessitate increased reliance on General Fund revenues for planning and land use approval services.

Implementation Measure

Each year, the County evaluates and adjusts fees as necessary to comply with the full cost recovery mandate set by the Board of Supervisors. Fees may be adjusted downward as necessary to reflect real processing costs.

No changes to current land use and planning application fees are proposed to facilitate or accommodate projected housing demand or substantially reduce costs of development.

2.06o Impact Fees and Exactions

A development impact fee is a monetary exaction other than a tax or special assessment that is charged by a local governmental agency to an applicant in connection with approval of a development project for the purpose of defraying all or a portion of the cost of public facilities related to the development project (Gov. Code § 66000(b)). The legal requirements for enactment of a development impact fee program are set forth in Government Code §§ 66000-66025 (the "Mitigation Fee Act").²²

Two typical fees or exactions charged on housing development are permit processing fees for planning and land use entitlements and impact fees or exactions imposed to defray all, or a portion, of the public costs related to the development projects.²³ The County does not impose development impact fees of its own upon private residential development. Local school districts collect impact fees when a building permit for a new residence is being processed and provide documentation of payment to the County prior to the issuance of permits. Certain ADUs are exempt from this impact fee under State law. No other impact fees are levied upon private single-

²² A Short Overview of Development Impact Fees, by Peter N. Brown City Attorney, City of Carpinteria and Graham Lyons, Deputy City Attorney, City of Carpinteria, Dated

February 27, 2003, http://www.ca-ilg.org/sites/main/files/file-attachments/resources_overviewimpactfees.pdf accessed 8/16/22

²³ Fees and Exactions, <https://www.hcd.ca.gov/fees-and-exactions> accessed 8/16/22

family residential development in the unincorporated area. Projects which create three or more housing units (not counting ADUs or Junior ADUs, or units developed following an SB 9 urban lot split) are subject to the County's Inclusionary Housing Ordinance, which requires one out of every six units to be deed restricted affordable, or for the applicant to pay an in-lieu fee to the County's Office of Supportive Housing. This minimal application of impact fees helps reduce housing costs and it contrasts with the practices of most cities and many counties, which impose impact fees for libraries, parks, and a variety of other services to ensure new development pays a share of the costs of new facilities or upgraded facilities incurred due to new development.

2.06p Permit Process and Procedures

The County seeks to be as transparent as possible with applicants on permit processing and procedures. This includes posting checklists of required submittal materials on the Department of Planning and Development website, with helpful descriptions of required items and helpful links to examples, ordinance sections, fee schedules and guidelines to provide direction and context to the applicants.

Throughout the processing of applications, the County complies with the State's Housing Accountability and Permit Streamlining Acts.

Ministerial projects are reviewed by the County's subject matter experts for compliance with relevant State and County requirements (such as the California Building Code, County Grading Ordinance, and the County Zoning Ordinance) and permits issued unless the project does not comply.

In the unincorporated areas, the County allows many types of housing without a land use entitlement. Where applicable, the entitlements that may be required include Building Site Approval, Design Review (in certain districts), Grading Approval (should the project exceed a specified amount of earthwork), Architecture and

Site Approval (for some multi-family housing), and in rare cases, a Use Permit (when housing is proposed in a zone that is not a residential zone by nature). Accessory Dwelling Units do not require site approval or design review, although may be subject to grading approval. Multi-family housing in the Housing Opportunity Sites combining district (those properties listed in the Housing Element sites inventory) have the option of proceeding without any land use entitlements if certain conditions are met, including an affordability requirement.

Processing of land use and development applications that are not permitted by-right require a discretionary land use application administered by the Department of Planning and Development. In 2023 that process includes the following basic steps:

- **Application Submittal** – Intake of development application, receipt of fee or fees, review of submitted application materials to determine if submittal is acceptable for distribution to reviewing departments/agencies.
- **Application Review** – Referral to reviewing departments/agencies, receipt of comments. Review of development application for completeness within 30 days of submittal in accordance with Assembly Bill 884. If incomplete, letter sent indicating necessary revisions for re-submittal.
- **California Quality Act (CEQA) Compliance & Staff Report Preparation** – When the application is deemed complete, preparation of environmental review, as applicable, in addition to the preparation of preliminary conditions and staff evaluation documents.
- **Public Hearing** – Upon completion of review process, development applications requiring public hearing are scheduled for hearing before the hearing authority.

- **Hearing Authority Decision** – Granting authority approves, denies, or approves permit application, with conditions, as appropriate.
- **Appeal** – 15 calendar day appeal period following action by granting authority, after which, if no appeals are filed, land use entitlement becomes effective, and applicant may submit building permits for plan check.

Throughout the application review process, the County complies with the Permit Streaming Act and CEQA timeline requirements to ensure timely processing of applications. Other steps taken to ensure timely application review may include:

- Use of pre-application meeting requirements, intended to review prospective applications for completeness and feasibility prior to formal application submittal (example: use permit, subdivision, lot line adjustment).
- An optional pre-screening meeting available to property owners considering applying for a land use permit. Pre-

screening meetings are scheduled approximately four weeks from the customer’s submittal of development materials. Costs are as listed in the [current fee schedule](#). The pre-screening can give customers insight regarding next steps and identifies challenges an applicant might need to address.

- Tracking of compliance with initial 30-day Permit Streamlining Act review period for completeness determination after initial submittal or any formal re-submittal.

Typical timelines for land use entitlement and planning permits are indicated in the table below. These processing times are general averages. Where circumstances vary and projects may be more complicated or require more than one resubmittal, processing times may increase. The County does not require any period of time to elapse between the approval of a project and the submittal of development permit applications, although applicants are advised to wait until the 15-day appeal period has passed.

Table 2.2325: Land Use and Development Application Processing Timelines

Application Type	Typical Processing Time
Architecture & Site Approval (residential)	2-4 months
Building Site Approval (inside USA)	3-9 months
Building Site Approval (outside USA or > 30% slopes)	12-24 months
Certificate of Compliance	3-6 months
Design Review	3-4 months
Design Review Exemption	3-4 weeks
Environmental Assessment	2-3 months
Environmental Impact Report	6-12 months
Geologic Report review (letter report)	1 month
Geologic Report review (in-depth report)	1-2 months
Grading Approval	2-4 months
Grading Small	4-6 weeks
Special Permit (agricultural and temporary)	2-4 months
*Subdivision (minor, 4 lots or fewer)	2-6 months
*Subdivision (major, 5 lots or more)	6-12 months
*Use Permit (standard)	3-6 months
Variance (standard)	2-3 months
Zone Change (conforming with General Plan)	6-8 months

Constraints Analysis

A great deal of attention is often focused on permit processing and expediting such procedures as a primary means of facilitating development approvals, reducing processing costs, and speeding

residential development to construction phases. Some aspects of the typical development processing and review procedure are under the control of the local government, and some are not. Departments must assure that enough adequately trained staff are assigned to

manage the workload of application processing. Adequate coordination and internal review are also critical to ensuring that initial completeness reviews are performed within the 30-day period prescribed by State Permit Streamlining Act requirements. However, lack of competently prepared, legible, and adequate plans and supporting documents can lengthen review times, and the state of these documents is not within the control of the local government. In addition, depending on site-specific environmental factors and constraints, environmental assessment for potential adverse impacts and mitigation may be either simple or complex and time consuming.

County staff routinely monitors processing times to promote compliance with Permit Streamlining Act provisions. Changes to reduce permitting requirements, such as reduced requirements for minor grading projects, have also been implemented to reduce permitting costs and time consumed.

The Department of Planning and Development, including Planning, Development Services, and Fire Marshal Offices, has implemented three components of development review to potentially streamline and improve land use and permit review. First is a “developer’s roundtable” with staff to dialogue and discuss common issues that hamper efficient development review. Second, as described previously, the Department also offers an optional pre-screening meeting available to anyone considering applying for a land use permit. One benefit of pre-screening meetings is that applicants are subsequently more likely to have complete submittals and are better prepared to manage the application process. The Department also offers in-person and virtual meetings with anyone interested in developing a property to explain the application process as well as potential constraints prior to application submittal. Finally, in 2020 the Department implemented a new type of ministerial

nondiscretionary application called a Planning Clearance, an administrative level permit that is processed in 1-4 weeks. Currently, movable tiny homes and small scale agricultural and temporary agricultural housing are able to be processed through a Planning Clearance.

There are no constraints related to the timing of development permit applications following planning approvals, as there is no required waiting period. The County of Santa Clara generally does not impose restrictive requirements that delay property owners and project applicants from applying for building permits once a land use entitlement is granted. Almost all land use entitlements related to housing are valid for four years (five years in rare cases), and eligible for up to a two-year extension at the discretion of the approving authority (i.e., the Director of the Department of Planning and Development, the Zoning Administrator, the Planning Commission, or the Board of Supervisors). When the County applies timing conditions, they are generally items to be met prior to permit issuance or prior to final inspection, and do not require separate actions prior to application in almost all cases.

It should be noted that since 2020, the County has discouraged applicants from submitting “at-risk” applications, where a permit moves forward with all parties involved understanding that a land use entitlement is required but has not yet been approved. The County does not consider this policy to be a barrier to development, as there are often changes to the design of projects in rural areas that are required prior to the land use entitlement being approved, which would render the at-risk building permit application moot.

The County analyzed recent land use entitlements related to housing that were approved in relation to when the following development applications were submitted. There have been few, if any, multi-family developments in the unincorporated county since 1970, so

timelines for that housing type is not known. The County instead analyzed available data for single-family development. As of February 13, 2024, of the last 150 land use entitlements that were approved, 123 of them (82.0%) have resulted in development permit applications. A majority of these development permit applications (109, or 72.7% of the entitlements approved) were submitted within

one year of the prerequisite land use entitlement being approved, 49 of which were submitted within the first month of entitlement approval. Of the 150 approved entitlements, 27 have not yet materialized into development applications, 9 of which are currently still within the first year since the entitlement was approved. Additional analysis is summarized in the table below.

Table 2.2426: Time Between Approval of Housing-Related Land Use Entitlements and Building Permit Application

Time Between Approval of Housing-Related Land Use Entitlements and Building Permit Application														
<i>(Analyzing most recent 150 approvals, as of February 13, 2024)</i>														
Time Since Entitlement Approval	within 1st month		1 mo. - 1 yr.		1-2 yrs.		2+ yrs.		No application submitted*		Expired		Total	
Building Permit Applications Submitted	49	32.7%	60	40.0%	9	6.0%	5	3.3%	24	16.0%	3	2.0%	150	100%

* Not yet expired, but no building permit application submitted since land use entitlement approval; expiration is generally four years from approval of these entitlements. Of the 24, 9 are still within 1 year of approval, 11 are between 1-2 years, and 4 are already beyond 2 years.

There are several reasons why an applicant may be delayed in applying for their development permits after receiving their land use entitlement approval. In four instances, there were appeals of the decision by either the applicant or a neighbor which delayed the project advancing. In five cases, the applicant chose to modify their project significantly after receiving their approval. In one case, an applicant chose to annex into a sanitary district rather than develop an onsite wastewater treatment system, a process governed by the Santa Clara County Local Agency Formation Committee (LAFCO) and not by the Department of Planning and Development.

In five cases, applicants began their work after receiving their land use entitlement approval and without seeking their development

permits, in violation of the County Ordinance Code. The County Ordinance Code does not allow for permits to be issued on a property with a violation except when the permits do not expand an existing use or add a new use; the permits are immediately necessary to protect public health, safety, or welfare; the permits will allow for the full abatement of all existing violations on the premises; or the property owner enters into a compliance agreement with the County concerning the correction or legalization of the violations.

Additionally, based on anecdotal reporting from property owners, some applicants who have received their land use entitlements have subsequently faced financial or other hardships that have prevented them from moving forward with their projects. Some property

owners have reported having difficulty hiring surveyors or other experts needed to finalize plans, including the onsite wastewater treatment system. Others elect to delay their application until they have completed conditioned requirements, even those requirements could be handled concurrently with their permit review. Finally, some owners seek a land use entitlement to increase their asking price for the land and have no intention of developing the property themselves.

Implementation Measure

Improving customer service and reducing processing times are a high priority of the Department and will continue to be the primary focus of the Department's improvement efforts. The Department continues to evaluate other areas of its Zoning Ordinance and Ordinance Codes to streamline permit reviews through the new Planning Clearance application. The County will also implement Program 2.19 - Streamline Multi-Family Housing Development which removes permit processing constraints in zones which permit multi-family housing. Delays experienced between land use entitlement approval and development permit application are not within the control of the County, and therefore no program is proposed to remedy them.

2.06q Code Enforcement

The County's Department of Planning and Development is responsible for enforcement of the Zoning Ordinance, Building Code, and Fire Codes as they apply to land use and development. Code enforcement is performed through building plan checks and inspections, in response to complaints regarding alleged violations submitted for review, through routine observation and field visits, and coordinated agency efforts such as abatement procedures. Code enforcement is a necessary and important aspect of local land use and permitting authority. It also helps to ensure that violations do

not contribute to neighborhood or community deterioration that adversely affect housing stock, new housing opportunities, and housing needs.

The Code Enforcement Division has a Program Manager who supervises a team of code enforcement officers who are assigned code enforcement cases throughout the unincorporated county and a Permit Technician that is specifically dedicated to assist the Code Enforcement Division.

The Department utilizes a database for managing and tracking violation complaints to ensure timely reporting and actions and all staff in the Department can access and view violation reports, inspections, and all images taken at inspections sites. An administrative hearing process was developed during the 2015-2022 Housing Element cycle and is still implemented with the goal of promoting code compliance in the most timely and efficient manner. County Ordinance C1-71 was further amended in January 2021 to clarify that while a permit shall not be issued on a property that has a confirmed active violation, until and unless the violation is removed and abated directly or through a Compliance Agreement, the Department Director has discretion to issue a permit where (1) the permit does not expand an existing use or add a new use, (2) the permit is immediately necessary to protect public health, safety, or welfare, or (3) the permit will allow for full abatement of all existing violations on the premises. . County Ordinance Code section C1-71 will continue to be amended during this code cycle to allow for flexibility of permits to be issued where violation(s) exist on the parcel.

Constraints Analysis

Public outreach and communication regarding code enforcement generally have a positive net effect on housing and neighborhood

preservation. The County continues to evaluate various means of improving code enforcement efforts and abatement of violations.

Implementation Measure

No reduction in code enforcement efforts or resources is recommended during the current cycle of the Housing Element Update. The County and the Department should continue to implement planned improvements to the code enforcement program.

2.06r Regulations Influencing Housing for Persons with Disabilities

Government constraints or factors influencing housing for persons with disabilities derive from the Americans with Disabilities Act (ADA), Chapter 11A or Chapter 11B of the California Building Code (CBC), and Federal Housing Administration (FHA) for accessibility.

A privately funded single-family residence project (new or addition/remodel) is not subject to accessibility requirements but a property owner can voluntarily incorporate such features as ramps or other improvements. All multi-family residential structures must meet the applicable accessibility requirements (ADA, FHA, CBC 11A or 11B) depending on its funding. It is recommended that applicants meet with the County Building Division to understand the necessary requirements for accessibility and other code requirements when developing housing projects.

The County Zoning Ordinance includes the following definition of "family" which explicitly includes "necessary domestic help" to accommodate those with disabilities – *"Family: One or more persons occupying a premises and living as a single, nonprofit household, as distinguished from a group occupying a hotel, club, fraternity or sorority house. A family shall be deemed to include necessary domestic help."* The purpose of the definition of "family" is to distinguish

private residential dwelling units from hotels, bed and breakfasts, inns, clubs, and fraternity or sorority houses. Families are also allowed to rent out rooms to two persons who are not part of their family structure.

This definition does not pose a constraint on housing for persons with disabilities because it allows for necessary domestic help and does not include any requirement for a specific type of relationship between residents within a residential unit, be it a single-family residence, multi-family housing development, or "group home." For clarification, the reference to "nonprofit households" does not address the type of legal entity occupying the household, but rather clarifies that the group of individuals occupying the home is not doing so for a profit-seeking purpose (e.g., a hotel).

Where accessibility improvements are involved or required, they are reviewed and approved through the normal permitting process.

Special needs housing involving multi-family buildings or more institutional settings is more likely to be developed in the cities or unincorporated urban pockets because of the available sewer and water services and transportation accessibility.

For some populations of people with disabilities, "group homes" provide a desirable type of housing as they typically offer a variety of support and services to their residents. Our Zoning Ordinance does not define "group homes" and refers to such uses as Community Care Facilities. The County's Community Care use classification is defined as "Limited" when a development provides for six or fewer residents. Group homes or other Community Care – Limited uses are allowed as a matter of right, with no requirements restricting concentration of uses, discretionary requirements, and parking requirements other than those required under the building code for group home occupancies and accessibility requirements. Group homes or other forms of Community Care facilities providing for

more than six residents are allowed under the “Expanded” subcategory, subject to issuance of a Use Permit. Community Care Facilities are allowed in all zoning districts except for OS/F (Open Space and Field Research) and SCA (Special Conservation Areas).

“Limited” projects may be sited on any parcel in the unincorporated county outside of the OS/F and SCA zones. For “Expanded” projects, there is a supplemental finding requirement that the new facility would not lead to an undue concentration of group homes in the vicinity. There is no standard of separation from other existing facilities specified in the Zoning Ordinance, and to date the County has not denied any application due to concerns regarding the proximity to other Community Care facilities. Standard Use Permit findings and criteria would provide an evaluation of whether the proposed location of the use is appropriate relative to necessary support services and is otherwise appropriate for the site. Parking requirements for residential community care facilities such as group homes are specified in Ch. 4.30 of the Zoning Ordinance, requiring one space per six beds or residents, and one per employee. If either a Community Care facility or an Expanded Care facility is applied for, the structure is subject to accessibility requirements. By December 2026, the County will adopt revisions to the Zoning Ordinance and other County codes to allow “Expanded” projects in all zones that have similar residential uses, with objective standards and permit processes that are equivalent to similar residential uses.

For any parking facility serving the public, accessible parking spaces shall be provided. Of the required accessible spaces, at least one shall be van accessible. Standards for accessible parking spaces are found in 4.30.070 of the County Zoning Ordinance. Additionally, Electric Vehicle Charging Stations (EVCS) shall comply with accessibility standards (e.g., stall size, spacing, signage, accessible route, etc.).

The County does not require licensing for Community Care facilities, but State licensing requirements apply.

Reasonable Accommodation

The County’s approach is to seek reasonable accommodations whenever possible under Federal and State law. Aside from Federal and State accessibility regulations, the Zoning Ordinance provides for procedures which allow for exemptions from setback requirements or other development standards, permit requirements or building regulations to allow for accessibility devices and structures. The County has a process to address reasonable accommodation requests for persons with disabilities. The Zoning Administrator of the County of Santa Clara reviews and either denies, approves, or conditionally approves such request where the proposed building or improvements necessitate relief from a standard of the Zoning Ordinance, such as a setback. The reasonable accommodation procedures are intended to allow exceptions or modifications without application or consideration of a Variance or other defined discretionary approvals. Reasonable accommodation requests are not subject to the more restrictive nature of a Variance procedure and findings, including noticing and public hearing, rights of appeal, and fees. There are no fees charged for the reasonable accommodation review process.

The criteria and factors considered by the Zoning Administrator in processing a reasonable accommodation request are:

- Existing, applicable policies or regulations,
- Availability of solutions not requiring an exception or modification of standards,
- How the request directly relates to the needs of the owner/occupant with disabilities, and
- The exact nature of the exception or modification proposed.

In evaluating a proposed request for reasonable accommodation, the Zoning Administrator uses the above criteria and factors to determine whether the need expressed by the applicant can be met without granting undue relief from a Zoning Ordinance standard. If it is determined that the request necessitates deviation from some standard, such as a setback, the Zoning Administrator is authorized to approve the request, provided that the applicant provided the information validating the need of the owner or occupant with disabilities, and the request is not so extreme as to have an actual detrimental impact on an adjacent property.

To date, there have only been a small number of inquiries regarding the possibility of obtaining a reasonable accommodation request since it was instituted in 2003. Only one request has been filed; that request was filed in January 2009 and granted in February 2009. The County expects more reasonable accommodation requests in the future for modifications to buildings for accessibility, such as ramp and porch improvements, window and door modifications, and similar construction, as the overall population ages.

To further ensure the County is removing barriers that may make it more challenging for people with disabilities to develop housing, Program 2.33 – Reasonable Accommodation Policy will be implemented by December 2024, to review and further amend findings required to grant a reasonable accommodation.

Constraints Analysis

The County's permit requirements, procedures, and reasonable accommodation request process offer opportunities for homeowners to accommodate the special housing needs of those with disabilities. The procedures are prescribed, and processing time is approximately two to three weeks depending on possible need for further information and resubmittal. Staff works closely with applicants to ensure there is adequate information in each request to assess

whether or not a reasonable accommodation can be supported. However, the findings currently required may pose an unnecessary constraint. Therefore, the County will review and amend its required findings for granting a reasonable accommodation (refer to Program 2.33).

Implementation Measure

No changes are necessary to County requirements or procedures to accommodate housing needs for persons with disabilities, however, to increase the visibility of the reasonable accommodation option, Staff will propose options to the Board to codify this process within the Zoning Ordinance.

Additionally, the County is implementing Program 2.20 – Tracking and Ongoing Compliance with State Housing Laws, which includes updating the County's Zoning Ordinance, and any other relevant County codes and policies, on a regular basis so they continue to be in line with state law. The County will include an assessment of the regulations for group homes for seven or more persons in relation to state law as a part of Program 2.20.

2.06s Regulations Influencing Housing for Agricultural Workers

Agricultural workers are a specific subset of the population with special housing needs. The 2023 Farmworker Health Study published by UC Merced found that nearly all (92 percent) agricultural workers in the State are renters, and that these workers face a host of substandard housing issues ranging from inadequate drinking water, plumbing, heating and cooling systems, or are in need of major repairs due to problems such as termite infestation or water damage. Agricultural workers also face issues of overcrowding, with more than a quarter reporting that they live in a house with six or more than six people and sleep in a room with three or more people.

The State has set forth regulations relating to employee housing and labor camps in the California Health and Safety Code sections 17021.5, 17021.6, and 17021.8, which supersede any local ordinances. Housing that accommodates six or fewer employees must be treated as a single-family residence in terms of how they are permitted both in location and in processing. Medium-scale projects that include group quarters of up to 36 beds or up to 12 single-family units are classified as an agricultural use and cannot be subject to any requirements which other agricultural uses in the same zone would not be subject to.

The County makes special provision for agricultural employee housing, especially smaller-scale projects that do not qualify as employee housing under state law. In 2020, the County updated its Zoning Ordinance to re-classify agricultural employee housing as either *Small-Scale Permanent*, *Seasonal*, or *Large-Scale Permanent*. *Small-scale permanent* housing can include up to six family units or 18 beds in group housing. *Large-scale permanent* projects are those consisting of more units or beds than small-scale. *Seasonal* projects consist of multiple movable tiny homes and are onsite for no more than 180 days. The County also created a *Temporary Agricultural Residence* category, which allows for a single recreational vehicle or movable tiny home per property to provide temporary housing to a person engaged in an on-site agricultural operation, for up to five years.

The County streamlined the permitting process for all four of these housing categories. *Small-Scale Permanent* and *Temporary Agricultural Residences* are allowed subject to a non-discretionary Planning Clearance, with a cumulative cap of 100 units and 50 units, respectively. *Large-Scale Permanent* and *Seasonal* projects are allowed subject to a Special Permit.

Agricultural employee housing is contingent on the owner of each parcel submitting an annual verification form to the Department of Planning and Development by January 31 of each year, to verify and provide substantial evidence that any permanent agricultural employee housing was occupied by agricultural employees for a majority of the year and verify that any seasonal units will be removed from the property outside of the designated occupancy dates. A deed restriction is recorded on any property for any permanent agricultural employee housing to provide notice to subsequent property owners that such housing is to be used only for agricultural employee housing. A property owner shall also affirmatively disclose the existence of any such deed restriction before transfer of ownership of such a property.

The nature of commercial agriculture in Santa Clara County has evolved significantly over the decades since it was known primarily as an agricultural economy, nicknamed the “Valley of Heart’s Delight.” Santa Clara County, once the fruit capital of the world with over one hundred thousand acres planted in fruit and nut trees, has seen a significant loss of agricultural land since the 1940s. Recognizing the rapid conversion of prime farmland within the county over the past two decades, the County of Santa Clara adopted the Santa Clara Valley Agricultural Plan in January 2018 to identify and prioritize key strategy areas, policies, and programs that support and encourage existing and future agricultural operations. One key strategy and action was to facilitate construction of more workforce housing for both seasonal and year-round farmworkers.

The diversity of Santa Clara County’s crops, the labor-intensive nature of such crops, and the overall high cost of housing in the region compound the need for agricultural employee housing as a basis for maintaining agriculture within the county. Santa Clara County’s land values will continue to rise, encouraging high-value

specialty crop production, which tends to favor crops that are highly perishable and need sufficient personnel to be harvested and moved to market in a timely manner. Such crops require significant hand-scale labor for planting, pruning, weeding, and harvesting and are typically not well-suited to mechanization. As farms become more vertically integrated, with on-site value-added operations such as packing and shipping facilities, agricultural processing, and on-site sales, the need for agricultural labor may increase, becoming more stable and year-round rather than seasonal.

Constraints Analysis

Despite there being only three units developed in the two years since the amendments were made to streamline agriculture employee housing, interest in the new process has increased significantly during this time. According to the Santa Clara County 2021 Crop Report, there are approximately 8,000 agricultural workers in the county supporting a \$340 million industry that provides food to the local residents, region, and beyond. As the County implements additional measures to preserve agricultural lands, the need for agricultural worker housing is unlikely to diminish.

Interested property owners regularly call in or schedule meetings with planners to go over their options under the revised provisions and inquire about the process, with approximately four to six inquiries per month. Property owner interest has consistently centered on the *Small-Scale Permanent* category, which prior research indicated would be the most relevant and functional category in most circumstances. However, all four types of housing allowed under the approved amendments have been the subject of inquiries by property owners.

At least three property owners have initiated projects under the *Large-Scale Permanent* category, primarily with the intent to house seasonal workers operating under H-2A work visas, hosted by farm

labor contractors. In at least one case, land was purchased with the explicit intent of pursuing such a project. The primary challenge *Large-Scale Permanent* projects face is approval for drinking water. A water supply for any development consisting of five or more service connections is classified as a “state small water system” and water supply to a project serving 25 or more people per day, for at least 60 days per year, is classified as a “public water system.” Both water system classifications trigger oversight authority by the State’s Regional Water Quality Control Board, which in recent years has required that an applicant first attempt to obtain an urban service area connection prior to its consideration of an application. In most cases, an urban service area connection would necessitate city annexation. The Department is in discussion with staff from the Local Agency Formation Commission (LAFCO) of Santa Clara County regarding options and annexation. A smaller number of inquiries have been received regarding the *Seasonal* and *Temporary Agricultural Residence* categories. Both categories make use of movable tiny homes, which are required to connect to a permanent onsite wastewater treatment system (OWTS) under our County Local Agency Management Program (LAMP). Most prospective applicants are dissuaded from pursuing the *Seasonal* or *Temporary Agricultural Residence* categories once it is explained that they would first need to develop a permanent OWTS.

As evidenced by a six-month delay for the three-unit project discussed above, the *Small-Scale Permanent* category also faces challenges with establishing OWTS. At least a dozen prospective applicants have presented preliminary plans to develop agricultural employee housing, have been informed of the requirement to first obtain Department of Environmental Health approval for an OWTS and drinking water supply, and have not yet submitted a complete application. As a result of the amendments approved by the Board, the newly established planning process has been effectively

streamlined, allowing review and approval to be expedited through a ministerial evaluation of objective standards and requirements. However, the overall permitting process, namely the path to getting clearance for an OWTS and water supply, as well as the review and requirements by subject matter experts, continues to present significant delays and challenges in the path from proposal to final approval. It is important to note that the challenges related to water supplies are also challenges that originate at the state law level.

Implementation Measures

The Department is working with all relevant agency reviewers and subject matter experts to identify opportunities for further streamlining of the regulatory requirements and permitting process for agricultural employee housing. The County will continue to implement the new streamlined permitting process and monitor its effectiveness. Where potential streamlining opportunities require additional code amendments, the Department will coordinate with the relevant agencies to present such opportunities to the Board. On August 29, 2023, the Board of Supervisors directed the preparation of an Agricultural Worker Housing Workplan to facilitate and further support agricultural worker housing production.

Please see the implementation programs in Chapter 4 for multiple efforts aimed at further alleviating constraints on the development of housing for agricultural workers.

Please see Section X.6 of the Assessment of Fair Housing (Appendix L) for analysis of the housing need experienced by agricultural workers in the unincorporated county.

2.06t Regulations Influencing Additional Special Needs Housing

Regulations for Special Needs Housing includes populations such as the elderly; persons with disabilities, including a developmental disability, as defined in Section 4512 of the Welfare and Institutions Code; large families; farmworkers; families with female heads of households; and families and persons in need of emergency shelter. Cal. Gov't Code § 65583(a)(7). This section discusses housing for persons within these categories, and tools within the County Code to assist with residential modifications to enable a person to continue living in place.²⁴

Special needs housing includes community care facilities, assisted living centers, emergency shelter housing, and homelessness-related services. Community care facilities, also referred to as “group homes,” are defined as uses permitted in all urban base zoning districts that permit residential uses and all rural base districts. Small-scale (“Limited”) community care facilities, serving or housing six or fewer individuals, are permitted as a matter of right, while those serving more than six individuals (“Expanded”) are permitted subject to a conditional Use Permit. The use regulations of the County Zoning Ordinance are consistent with State laws.

Emergency shelters, homeless shelters, and combined shelter/service centers for the elderly and persons with disabilities are typically developed within city jurisdictions, where there are available sewer and water services, as well as public transportation, paratransit (on-demand transportation for those with special needs), and access to other important services. Emergency Shelter is permitted in Rural Residential (RR), Multifamily (R3), Commercial (CG and CN),

²⁴ The County has not identified any special needs in the unincorporated areas specific to large families or those with a female head of household, as per Government Code 65583(a)(7).

Administrative/Professional Office (AO), and Industrial (MH and ML) zones as well as the Public Services and Supportive Housing (-ps) combining district. Small scale (14 or fewer beds) emergency shelters are allowed “by right,” and large-scale shelters are allowed with a Use Permit approval. Religious and Non-profit institutions may also operate small-scale emergency shelters as an ancillary use “by right.” Emergency, homeless, and transitional shelters are not typically located in the rural unincorporated areas. Rural hillside and agricultural areas are not served by municipal sewer service, have no or very limited access to transit and social services, are far removed from other emergency response services and medical centers, schools, and amenities, and do not promote the societal integration of the populations served.

The focus of the County is to fund programs that provide emergency, transitional, and special needs housing within the urban areas of the 15 cities within Santa Clara County, which is where the needs and opportunities are greatest. The County devotes significant resources to the operation of emergency shelter housing throughout the urban areas, operating or assisting with a total of 211 shelters within Santa Clara County, including three major shelters in Sunnyvale, Gilroy, and San José. Funding assistance is also provided for many other resources aimed at preventing homelessness.

In the last Housing Element, the County identified funding as a significant constraint to combat homelessness. Since then, County voters approved an unprecedented [affordable housing bond measure of \\$950 million](#) in 2016, which the County has used to fund affordable housing projects, including 830 new homes in nine developments, which will serve more than 1,600 people, with another 1,280 affordable homes under construction. The County’s role has expanded from providing permanent housing, emergency housing, and homeless shelter/service centers, to also include advocacy and

tenant/landlord support services. Under what is called the “[Community Plan to End Homelessness](#),” the County gave itself [a deadline of 2025](#) to double its temporary shelter capacity, house 20,000 people through supportive housing, cut the annual inflow of people becoming unhoused by 30%, expand homelessness prevention programs to serve 2,500 people yearly, and address racial inequities that disproportionately affect people of color.

Constraints Analysis

The County General Plan, zoning regulations, and permitting requirements to accommodate certain special needs housing types described above do not constitute an undue burden or constraint on the production or supply of special needs housing. Within urban areas, the use classifications and regulations for special needs housing types are intentionally like those of the adjacent cities. The key issues or factors which pose constraints to meeting special needs housing continue to be the availability of suitable land, funding for programs and grants, ongoing need for intergovernmental coordination to provide such housing and related services, and providing the kinds of ongoing services needed to prevent re-occurrences of homelessness.

Implementation Measure

No changes to General Plan land use policies, zoning regulations, permitting procedures or development standards are necessary or appropriate to facilitate or accommodate special needs housing for the unincorporated areas.

2.06u State Required Permitting

The State has adopted several measures where local jurisdictions must approve projects which meet certain criteria, including SB 9, SB 35, SB 330, and the State ADU ordinances. The County is not yet subject to SB 35, but should it become so will fully comply with the

State's requirements. For SB 330, the County will revert to the State preliminary application, with no growth controls and only objective standards reviewed for qualifying applications. The County has adopted local implementing ordinances for SB 9 and ADUs, to incorporate the State's requirements and add minimal objective standards as allowed by the State. Should any of these State laws be amended, or new laws of a similar vein be adopted, the County will defer to State requirements when in conflict with the local County ordinances.

Constraints Analysis

The County permitting requirements to accommodate these housing application types described above do not constitute an undue burden or constraint on the production or supply of qualifying housing. Projects not qualifying for state required permitting often require discretionary approvals, such as Architecture & Site Approval for multi-family housing projects.

Implementation Measure

The County will create transparent processes, fees, and checklists for all State required permitting and make these available to public (Program 2.18). In addition, the County will work to streamline all multi-family housing developments through a streamlined permitting process with limited objective standards that will be applied first to properties on the sites inventory list and eventually to all zoning districts which allow multi-family housing development (Program 2.19). Lastly, the County will implement Program 2.20 - Tracking and Ongoing Compliance with State Housing Laws, which includes updating the County's Zoning Ordinance, and any other relevant County codes and policies, on a regular basis so they continue to be in line with state law.

2.06v Inclusionary Housing

The County adopted a countywide Inclusionary Housing Ordinance (IHO) in October of 2020 to foster a sufficient supply of housing for persons at all economic levels and relieve the burden placed on the housing market throughout Santa Clara County. The IHO applies to any application that creates three or more dwelling units. Of the proposed dwelling units, sixteen percent (16%) shall be made available for rent or for sale to at an affordable Housing cost to moderate, lower, very low, or extremely low-income households. The County adopted Inclusionary Housing Ordinance Guidelines in November of 2021 which serves as a guiding document for the implementation of the IHO.

Inclusionary Housing in the Stanford Community Plan Area

Applications within the Stanford Community Plan Area (SCPA) may bank the inclusionary for sale affordable units to be developed as rental inclusionary units at a later date. Applications within the SCPA may also construct the inclusionary units on site, off-site, convert an existing unit to an inclusionary unit, or transfer required inclusionary units to another residential development within the SCPA.

Inclusionary Housing outside the Stanford Community Plan Area

Required inclusionary units may be developed on-site, off-site, converted from an existing unit, or the applicant may choose to pay an in-lieu fee for developments that result in a fraction of a unit (a development that has less than 7 units).

Constraints Analysis

The intent of the program is to promote affordable housing development. To date, the County has not processed any residential development applications outside or within the SCP that would be subject to the IHO, therefore the County has not seen the IHO act as a constraint of proposed development projects. Additionally, the

development of ADUs, agricultural employee housing, student housing, residential community care facilities, and units created pursuant to SB9 are not subject to the IHO which limits constraints on building these types of units on properties. Lastly, the IHO offers a variety of options for the development of the required inclusionary unit(s) (on-site, off-site, conversion of units, etc.) which provides flexibility for the creation of the unit. As such, the IHO provides minimal constraints on housing supply and affordability.

Implementation Measures

The County will continue to implement the IHO as written and may perform future revisions if the County finds areas of improvements needed to achieve the IHO goals of affordable housing development.

2.06w Summary of Stanford University Constraints

Stanford University is the only significant unincorporated urban area that is excluded from countywide urban development policies that call for annexation of urban development into the adjacent city. Such exclusion is based upon a 1985 land use policy agreement among Stanford, the County of Santa Clara, and the City of Palo Alto (the “Tri-Party Agreement”).

Current County policies governing development at Stanford do not constrain affordable housing development. Through the Stanford Community Plan (SCP) and the 2000 General Use Permit (2000 GUP), the University is required to develop housing of a variety of types in conjunction with new academic building development. The SCP stipulates that Stanford will supply its own urban services for academic development, which includes housing for academic faculty and staff, and that lands with non-academic uses will be annexed

into Palo Alto. Stanford University has sited housing development adjacent or in close proximity to the academic programs that they support. Upon approval of an updated SCP that is being processed in parallel with this Housing Element Update, SCP policies are being amended to promote the construction of housing near transportation, the campus, and services/amenities.

Constraints Analysis

The County requires a linkage between academic development and housing, to balance housing, jobs, and available transportation. The linkage is expressly defined in the SCP and the 2000 GUP. Within University lands located in the unincorporated county, there is capacity to meet at least half (1,680 units) of the housing needs of this Housing Element Update. The County is currently updating the SCP, which would require Stanford to provide housing, both affordable and market-rate, on campus or on contiguous Stanford-owned land grant properties.

Beginning with Annual Report No. 12 (2013) Table C-2 of each Annual Report includes a column that indicates the RHNA units provided in each reporting period since the adoption of the 2000 GUP.²⁵ This helps the County track the RHNA units constructed on the Stanford Campus in relation to the remaining capacity under the GUP.

Implementation Measures

The revised SCP policies will require development of housing in the Academic Campus land use designation at minimum densities of 30 dwelling units per acre (currently the required density is a minimum of 15 dwelling units per acre) to enhance access to affordable

²⁵ Annual Reports for Stanford University can be found here: <https://plandev.sccgov.org/policies-programs/stanford-university/2000-general-use-permit/annual-reports>.

housing. In addition, a streamlined approval process for on-campus housing within a half mile of a public transit station or high-capacity transit stop is being developed as part of the SCP, consistent with Senate Bill (SB) 35, along with objective design standards for the three sites on the Stanford campus identified in the Housing Element, to further facilitate streamlined review of housing projects while addressing neighborhood compatibility.

2.06x Summary of Rural Unincorporated Area Constraints

Since its inception, the County General Plan has been built around a longstanding vision for rural unincorporated areas to remain rural. As such, **none of the sites selected to meet the County's RHNA are located in the rural unincorporated areas.** The selected sites are all located within a city's urban service area or on Stanford Campus, which is an area planned to provide infrastructure and utilities to properties it encompasses. Refer to the Housing Element Update EIR Section 4.16 and Appendix C for more information regarding the utility services planned for the selected sites.

Unincorporated areas consisting of steep hillsides, open spaces, farmland, and rangeland, are considered rural and are intended to remain in non-urban uses and densities, deemed inappropriate and unsuitable for urban development. Moreover, these areas have significant physical and environmental constraints to development; they are often prone to natural hazards, such as wildfire, flooding, and geological hazards, contain protected habitat species, protected waterways, and protected scenic vistas, and have limited viable water supply and steep slopes.

These areas are often void of sidewalks, public transit, and other amenities that would serve typical residential development, such as

schools and grocery stores. Supportive infrastructure is prohibitively costly for development on certain parcels. Higher density housing is dependent on provision of urban services like sewer and water, which are available only in cities and Urban Service Areas. Very low- and low-income households particularly benefit from other urban services and amenities like schools, transportation, and retail establishments, none of which are provided in the rural areas. Local, regional, and state planning policies and incentives such as *Plan Bay Area 2050* and transit-oriented development enabling legislation focus development in areas where there is already existing infrastructure, proximity to transit and work centers, and where environmental impacts can be minimized. As such, the County's policies for the rural unincorporated areas are aligned with broader regional and state goals.

In rural unincorporated areas, new residential uses are limited to one primary, single-family dwelling per lot (except for agricultural employee housing and accessory dwelling units), and densities for subdivision purposes are low. With the addition of Senate Bill 9 (SB9), the minimum lot size of qualifying parcels is reduced to 1,200 square feet. Under SB 9, eligible parcels in the unincorporated county must be designated as wholly within an urban area according to the U.S. Census Bureau and be residentially zoned (Parcels in R1, R1E, RHS, R1S, RR, or A1 Zoning Districts) and not be located within a hazardous area.²⁶ Over two-thirds of the land in the county (including parcels within the 15 cities and towns) would not be eligible under the provisions of SB 9. In rural zoning districts, allowable densities range between 5 and 160 acres per lot.

In rural unincorporated areas of the County, several factors present constraints to housing development, but constitute appropriate

²⁶ County of Santa Clara website; SB9 information page; <https://plandev.sccgov.org/senate-bill-9> accessed 11/17/22

policy and regulatory approaches to development in the variety of steep, vulnerable, protected, and hazardous areas that make up over two-thirds of the land area of the County. Protection of the rural districts does not present an undue burden or constraint upon housing for the urban area population, which as a matter of policy should be located within existing urban areas to the greatest extent possible to avoid sprawl and other unintended consequences. To summarize:

- Countywide, longstanding development policies require that urban scale development occur only in cities and not in rural unincorporated areas.
- Regional land use, housing, and transportation policies as reflected in the region’s Sustainable Communities Strategy focus growth in the urban core of the Bay Area, and particularly in urban areas near transit.
- The vast majority of rural unincorporated development is single-family residential on existing lots of record, agricultural uses, or open space.
- Rural areas do not have access to municipal sewers or water systems, and most areas rely upon on-site wells and small private water systems. Limited groundwater supplies, soils, slopes, and high groundwater conditions limit the feasibility of development. Multi-family housing development is not consistent with the density policies for rural areas and typically could not be approved without urban infrastructure.
- Steep terrain, limited road access, and prevalent natural hazards make most of the county’s vast rural hillside areas infeasible and unsuitable for housing at urban densities.

2.06y Summary of Urban Unincorporated Area Constraints

The unincorporated urban islands or pockets in Santa Clara County are mostly comprised of residential neighborhoods that were

developed prior to the County’s first General Plan, during a time when the County approved urban subdivision tracts in unincorporated areas. These urban pockets are scattered over a 250 square mile area. The best means of improving the efficiency of urban service delivery and making more logical political boundaries is to annex the islands into their surrounding cities. Better municipal organization, logical boundaries, and improved service efficiency promotes the provision of an affordable housing supply. To that end, utilizing the streamlined annexation provisions of state law, the cities of Santa Clara County have successfully annexed 16 islands during the fifth Housing Element cycle, from 2015 to May 2021. The City of San José alone has annexed 11 of those islands during this time.

Constraints to the development of affordable housing in urban unincorporated areas include:

- Urban unincorporated islands are largely built-out and devoted to single-family residential uses. Large-scale redevelopment of established neighborhoods with higher density uses would be difficult to coordinate and is therefore unlikely.
- Selected areas may be eligible for higher density development in accordance with city general plans, but most areas designated for multi-family residential uses have been annexed already or must be annexed into cities prior to redevelopment of any kind, consistent with joint city/County policies and as a means of accessing sewer and water services.
- While there are islands that remain unincorporated, County-approved development in these pockets must be consistent with the General Plans of the cities surrounding them to assure compatibility with the larger, surrounding city neighborhood of which they are a part. Annexation promotes the attainment of higher density housing, planned

unit developments, and other urban development that better ensures affordable housing opportunities.

The longstanding joint city/County policies are founded in cooperative planning, intended to be respectful of city general plans and interests, and provide greater opportunities for infill development than if the islands remained unincorporated.

2.06z Summary of County-Owned Lands Constraints

County-owned properties provide important but somewhat limited housing development opportunities. The sale of surplus properties to non-government entities for use in housing or mixed-use developments is one means of facilitating housing development. Another means is through County retention of land rights and partnership with a private developer to create new housing or mixed-use developments. In either case, the use of land for development (for a non-governmental purpose) is governed by the applicable city general plan when located within a city's Urban Service Area.

Analysis of the constraints affecting development of individual County-owned properties for affordable housing projects is more difficult than analyzing the constraints affecting residential development on privately-owned lands because:

- Opportunities for the development of County-owned lands is limited by the small number of properties and the financial considerations involved in determining the disposition of those properties.
- For those projects that may require city approvals, the parcels involved may not initially have residential designations in the cities' general plans and/or necessary pre-zoning that would indicate how many residential units the cities would allow to be built on them.

- The residential land use designations the cities would apply to County-owned lands proposed to be used for housing are likely to be "planned unit development" designations that allow for a relatively wide range of densities and development types and as such lack specificity and predictability.

The use of surplus County-owned properties does not involve significant constraints to housing development. Rather, it promotes housing development if the property is located within city Urban Service Areas and meets the needs of both the County and city within which development is proposed.

2.07 Non-Governmental Factors Influencing Housing Production

2.07a Overview

Housing supply and costs are influenced by many factors beyond the control of local government. State and national economic conditions have considerable bearing on the pace of local development, the availability of construction lending and financing, and mortgage interest rates. Many of the costs associated with home building, such as construction labor and materials, are outside of the County's control. The County can, and does, provide assistance in constructing low- and moderate-income housing through land-cost write-downs and construction loans through the Community Development Block Grant and other programs. However, to a great extent, the costs associated with producing and acquiring housing are beyond the direct control or influence of County government.

There may be significant capacity under existing General Plan and Zoning designations for housing, but cities and the County must rely on the housing market to create most new housing or spur

rehabilitation. Several non-governmental factors that can constrain housing development are discussed in the sections below.

2.07b The Regional Housing Market and National Economy

Following a decade of economic prosperity and sustained global growth, the COVID-19 pandemic triggered widespread economic uncertainty and consumer panic. While the national, state, and regional economies have mostly rebounded from the pandemic shock, the recovery is still resulting in sweeping economic fluctuations. After gradually returning to pre-pandemic levels by the end of 2020, the stock market slid during the first half of 2022 over fears of inflation, labor scarcity, global supply issues, political instability, and vulnerabilities to climate-induced disasters. Average long-term U.S. mortgage rates have risen due to inflation worries. As published by [Freddie Mac](#) on August 25, 2022, the 30-year rate rose to 5.55% from 2.87% the year prior and reached 7.08% by November 10, 2022.

Despite the pandemic upheaval, the San Francisco Bay Area continues to be one of the costliest housing markets in the state and the nation. According to [Zillow statistics](#), the average price of a single-family house in San José was \$1.45 million in June of 2022, up 18.5% from \$1.22 million in June 2021. Even though the high-income tech industry and limited availability of housing continues to drive up home and rental costs, the housing market has recently experienced a cooling due to the increase in borrowing interest rates.

Historically, highly profitable venture capital firms and software companies in Silicon Valley have created a prosperity that has driven prices higher in the most desirable housing areas. However, a disparity in wealth of white collar vs. blue collar workers exists in the

county. As the [National Low Income Housing Coalition](#) reports, software developers (with a median hourly wage of \$71.47) represent only a small fraction of employees in the largest occupations in Santa Clara County. Collectively, there are many more workers (janitors, farm laborers, retail salespersons, fast food staff, etc.) who make less than \$20 per hour. The resultant wage gaps between income and housing costs have pushed affordable housing out of reach for many renters and potential buyers. To afford a two-bedroom rental home in Santa Clara County, with a fair market monthly rent of \$2,418, the average worker would need to make at least \$46.50 an hour.

One of the County's hurdles to processing housing permits stems from a dwindling inventory of easily buildable lots, which is pushing residents to build on hillsides, prime farmland, and areas where a high groundwater level creates additional challenges for establishing onsite wastewater treatment systems. As climate change and drought have contributed to the increasingly common danger of wildfire, feasible lots in areas less threatened by fire are in increasingly short supply. Additionally, several areas of the county are impacted by flooding, with 50-year and 100-year storm levels occurring more often after drought periods and resulting in major flooding and destruction of residential neighborhoods and preservation land.

2.07c Home and Land Costs

In the Bay Area, the costs of housing have long been among the highest in the nation. The average home value across Santa Clara County was estimated at \$1,695,548²⁷ by the end of 2020, per data collected by the Santa Clara County Associated of Realtors. This average increased to \$1,995,986 by the end of 2021.²⁸

²⁷ Year End 2020: Santa Clara County": Single-Family Residence, accessed 9/12/22 <https://www.sccaor.com/pdf/stats/2020.pdf>

²⁸ Year End 2021: Santa Clara County: Single-Family Residence, accessed 9/12/22 <https://www.sccaor.com/pdf/stats/2021.pdf>

Aside from the prices of homes in Santa Clara County, the cost of land is a critical component of the overall price of housing, especially new construction. The price of unimproved land varies greatly within Unincorporated Santa Clara County, depending on location, existing infrastructure, and the existence of or difficulty in obtaining Building Site Approval or other entitlements necessary for development of the site. Urban unincorporated areas also vary greatly, and most are already developed with single-family homes. In terms of cost, areas of unincorporated East San José are very different from the unincorporated areas of Los Gatos, Los Altos, and Cupertino. According to LandWatch, an online rural real estate listing platform, in 2021 there were more than 22,700 acres of land for sale (farms, ranches, and other) in Santa Clara County, with an average cost of approximately \$4 million per transaction.²⁹

Rural area parcels vary greatly in price depending on whether building site approval has been obtained, the remoteness of the site, whether the property has a view, and the property’s proximity to desirable communities like Monte Sereno, Los Gatos, or Saratoga, among others.

2.07d Construction and Labor Costs

Construction and labor costs are also significant components of housing cost. These costs include site improvements (not land costs) necessary to prepare a site for development, as well as the actual costs of labor and materials for the dwelling. As part of the County Inclusionary Housing In-Lieu fee analysis, Keyser Marston Associates produced a [2020 report](#) on the costs of providing affordable units. The report concluded in part that the average cost of home sales has increased. Below is a table from the report showing the median and

average cost of a new home based on the sale of homes the unincorporated Santa Clara County between the years of 2016-2019.³⁰

Table 2.3527: Median and Average Characteristics of Home Sales in Unincorporated Santa Clara County

Year Sold	Beds	Baths	Size (SF)	Lot Size (Acres)	Sale Price	Price per SF
Median of Sales in						
2016	4	4	3,922	0.39	\$2,221,500	\$536
2017	4	4	3,751	0.40	\$2,300,000	\$654
2018/2019	5	5	4,158	0.75	\$2,562,500	\$709
Average of Sales in						
2016	5	5	4,415	1.25	\$2,854,000	\$658
2017	4	4	3,991	2.04	\$2,739,000	\$726
2018/2019	5	5	4,939	1.67	\$3,391,000	\$781

Source: CoreLogic, May 2019. Reflects homes built since 2000.

The median size home in urban areas over the last several years has slightly increased from 4,000 to almost 5,000 square feet, which means that a typical 4,500 square foot home in the unincorporated county could cost approximately \$3,150,000 to construct (\$700/sq.ft.). This does not include the cost of the underlying land.

Few multi-family units are built in unincorporated Santa Clara County, due to the lack of sewer and water services. According to analysis by the UC Berkeley Turner Center for Housing Innovation, the per-square-foot hard costs for constructing multifamily projects

²⁹ LandWatch, Santa Clara County Land Information, accessed 9/13/22 <https://www.landwatch.com/california-land-for-sale/santa-clara-county>

³⁰ Inclusionary Housing and Supplemental Housing Mitigation Fee Ordinance prepared by Keyser Marston Associates (2020), [available here](#).

in California climbed 25 percent over the course of 2008-2018, reaching \$222 per square foot on average statewide. In the Bay Area, including Santa Clara County, the average cost in 2018 was \$380 per square foot, representing an increase of 119 percent from 2008.³¹

2.07e Availability of Financing

The COVID-19 pandemic has significantly altered the financial landscape for development and real estate within Santa Clara County. Since the start of the pandemic in early 2020 and the increasing prevalence of remote working in Silicon Valley, the general population has had an increase in demand for single-family residences in the county. The demand of single-family residences has led to a significant increase in home prices due to historically low mortgage interest rates, consistently decreasing until 2022. Construction costs have also seen a significant increase due to labor costs as well as high demand of lumber. The Federal Reserve has steadily raised interest rates to combat high inflation of 8.2% in mid-2022³² thereby slowly making it more expensive for developers and homebuyers to borrow.

The County's ability to mitigate for these effects is somewhat limited. However, in 2016 the voters of Santa Clara approved a \$950 Million Affordable Housing Bond with up to \$50 million set aside for homeownership programs. Launched in 2017, the County in partnership with Housing Trust Silicon Valley administers a \$25 Million [Empower Homebuyers SCC](#) program that offers down payment assistance to eligible first-time homebuyers.

2.07f Conclusion Regarding Non-Governmental Factors

Non-governmental factors in housing costs and production are ultimately the primary factors that determine price, availability, and affordability. In metropolitan areas that are largely built-out, redevelopment and infill development are a major source of new housing development opportunities. Urban land markets tend to place a premium on land the closer it is to central business districts, with good access, or in areas where higher densities are available.

Chapter 3: Fifth Cycle Performance Review and Sixth Cycle Housing Strategies and Policies

The purpose of this chapter is two-fold: to review the County’s performance in meeting the fifth cycle Housing Element goals and to introduce the County’s sixth cycle strategies and policies.

3.01 Review of County’s Fifth Cycle RHNA Assignment Performance

The County’s actual housing production during the fifth cycle, from 2015-2022, exceeded the RHNA assignment and projections for the planning period.

Table 3.1 summarizes the County’s fifth cycle RHNA targets, projected development, and actual production from 2015-2022. ABAG’s RHNA process for the fifth cycle allocated a housing need of 277 units to unincorporated Santa Clara County. A total of **3,214** units have been permitted as of December 31, 2022, over 1,000 percent above the assigned 277 units. Roughly eighty percent of the approved units were constructed in a series of high-density development projects on Stanford University campus in 2019. These units consisted of much-

needed moderate-income housing to meet the University’s faculty and graduate student housing demand.

During the fifth cycle, housing demand increased for the unincorporated county. The increase in housing permits can, in part, be attributed to the passing of new State legislation allowing Accessory Dwelling Units (ADUs) and Junior Accessory Dwelling Units (JADUs) in all areas zoned to allow single-family or multifamily uses, and other streamlining provisions. Following these laws coming into effect on January 1, 2020, there was a rise in ADU permit applications, and a related rise in permitting, to roughly three times the rate of applications preceding these laws.

Table 3.1: RHNA, Projections, and Achieved Housing Production

	Very Low	Low	Moderate	Above Moderate	Total
Fifth Cycle, 2015-2022					
RHNA Assignment	22	13	214	28	277
Projected	440	87	0	1555	2,082
Achieved	86	0	2,597	531	3,214
Sixth Cycle, 2023-2031					
RHNA Assignment	828	477	508	1,312	3,125
Projected	975	637	1,186	3,945	6,745

3.02 Recent Unincorporated County Housing Development Activity

The purpose of this section is to document how the County met its RHNA target for the 2015-2022 planning period, as measured by permits issued during that period for different dwelling types.

3.02a Single-Family Residential Units

All primary single-family dwelling development is assumed to have been constructed and/or sold at market rates and are assumed to be affordable only to those with above-moderate incomes. Many single-family residences built within unincorporated urban pockets are new units that are replacing units that already existed, however, the statistic provided for single family dwellings is a 'gross' figure, consistent with the reporting standard for HCD's Annual Housing Element Progress Report.

3.02b Graduate Student Housing Development at Stanford University

Stanford University currently provides graduate student housing for 75% of its graduate students, and most graduate students occupy their apartments year-round for multiple years while they obtain their degrees. Additionally, the University houses approximately 97% of its undergraduates on campus. Of the graduate students at Stanford, an estimated 93% do not have children, including 70% in single households and 23% in couple households. Approximately 7% of graduate students are estimated to have one or more children under the age of 18.

From January 2015 to December 2022, the County reported the construction of 2,597 moderate-income units on Stanford lands.

According to Stanford University Graduate Student Housing Affordability Analysis Report (prepared by Keyser Marston Associates in May 2022), rents for 85% of graduate student housing spaces are within a range affordable to households with low- or moderate-incomes. Monthly rents for apartments at Stanford range from \$1,473 to \$3,616 per month, depending on the number of bedrooms in the apartment and the size of the household sharing the apartment. Using this analysis and the determination of affordability categories in the [HCD Official State Income Limits for 2022](#), the 493 studios for graduate students built since January 2015 would be affordable to low-income households. The remaining 892 two-bedroom apartments would be affordable to moderate-income households.

3.02c ADU Development

During the 2015-2022 planning period, 276 accessory dwelling units (ADUs) were permitted in unincorporated county, an average of 34.5 per year. In 2019, the State legislature passed multiple new laws streamlining the construction of ADUs and Junior ADUs (JADUs). These laws went into effect on January 1, 2020, and the County accordingly modified its Zoning Ordinance to reflect the updated State laws, effective March 10, 2020. These amendments resulted in a significant rise in ADU and JADU permit applications. From 2015 through 2019, the County approved roughly 21 ADU permits per year on average. In the three years since the ADU regulations were changed, 2020 through 2022, the County has approved increasingly more ADU permits each year: 40, 54, and 79, respectively. Looking forward, the County anticipates that the level of ADU permit applications will fluctuate over time and the best rate to project through the 2023-2031 planning period is the average taken from 2018 through 2022, approximately 45 permits per year, yielding a projected 360 units in total during the sixth cycle planning period.

Table 3.2: Accessory Dwelling Permit issued 2015-2021

YEAR	ADU PERMITS ISSUED
2015	20
2016	13
2017	16
2018	22
2019	32
2020	40
2021	54
2022	82
8-year average	34.875
2018-2022 average	46

3.02d Agricultural Employee Housing Development

From 2015-2021, there were no agricultural employee housing permits issued in unincorporated county. In December 2020, the County significantly updated its Zoning Ordinance provisions for agricultural employee housing to streamline the planning approval and expand options for such housing. Since the adoption of these changes, three permits have been issued for new single-family units of small-scale permanent agricultural employee housing.

Although not consisting of dwelling units for the purposes of reporting on RHNA progress in Annual Progress Reports, the County approved a 200-bed project for agricultural employees during the planning period,

with building permits finalized in 2021. In addition, on August 29, 2023, the Board of Supervisors directed the preparation of an Agricultural Worker Housing Workplan to facilitate and further support agricultural worker housing production.

3.03 Review of County’s Investment in Countywide Housing Efforts During Fifth Cycle and Beyond

In December 2014 the Board of Supervisors affirmed the County’s role in promoting affordable housing, especially for vulnerable populations, and therefore the County must take an active role in developing, financing, and supporting various types of affordable housing for the populations the County serves. The Board further established that the County’s priorities were to:

- Increase the supply of housing that is affordable to extremely low-income (ELI) households;
- Increase the scope and breadth of supportive housing for special needs populations, including homeless and chronically homeless people; and,
- Improve coordination and collaboration among the County, the cities, other governmental agencies, and the affordable housing community.

Since 2015 the Board of Supervisors has approved approximately \$1 billion in funds to support 66 housing development projects in 10 cities, yielding 6,231 multifamily residential units.

Concurrently, in an effort to accelerate the pace of development, the County has made available County owned properties for the

production of affordable and supportive housing and worked with other governmental agencies to identify underutilized parcels that could be made available for housing. The County of Santa Clara has a variety of County-controlled and County-owned properties, some of which are suitable for residential development. Many of the County-controlled and County-owned properties suitable for residential are located within cities and the County's development of these properties to provide housing units does not count towards the County's RHNA assignment. Nevertheless, the County has invested in numerous projects that create affordable housing in incorporated cities as a part of its longstanding commitment to providing all county residents with appropriate housing options. The County has established a process to give community stakeholders and other jurisdictions an opportunity to work in partnership with the County to develop County-controlled and -owned sites for affordable housing. The benefit of this collaborative approach includes a more streamlined entitlement process and the opportunity to leverage local funding available for housing production.

In 2019, the County Office of Supportive Housing (OSH) created a pool of prequalified affordable housing developers who could respond to solicitations to develop affordable housing on County-owned land. This Developer Qualified Pool (DQP) consists of 16 experienced developers that are aligned with the County's goals of increasing affordable

housing for Santa Clara County's most vulnerable and poorest residents. As County-controlled properties become available, the

County issues a Request for Offers to accept development proposals from the DQP. The following five projects have been approved for development on County-owned sites, within city jurisdictional boundaries, utilizing the pool of selected developers:

231 Grant Avenue - Palo Alto

OSH is partnering with Mercy Housing and Abode Communities to develop 110 affordable rental workforce apartments for teachers, school employees, and their families. The project is being developed with

a donation by Meta (formerly Facebook) and in partnership with the City of Palo Alto and five local school and community college districts. In January 2022, the Board of Supervisors approved the project and construction started in August 2023. Please visit the [231 Grant | Mercy Housing California & Abode Communities](#) project website for more information.

Mitchell Park - Palo Alto

Located at 525 East Charleston Road, this project is a partnership with Eden Housing to develop 50 affordable rental apartments and 2,750 square feet (sq. ft.) of service space for AbilityPath – a nonprofit that provides support services to individuals with special needs and developmental disabilities in the greater Bay Area. This development includes 25 apartments and services for individuals with intellectual and/or developmental disabilities and their families. Land use entitlements were approved by the Palo Alto City Council on March 8,

2022, and on July 25, 2023 Eden Housing received an allocation of tax credits. Construction is expected to begin January 2024. Please visit the [Eden Housing project website](#) for more information.

The Hub - San José

Located at 1510-1540 Parkmoor Avenue, this project is a partnership with Allied Housing to develop affordable rental apartments, including units for transitioned age foster youth, and The Hub, a youth-led community center dedicated to supporting current and former foster youth. Allied Housing has secured all necessary entitlements and financing. Construction is scheduled to begin in November 2023. Please visit the [Abode Services](#) project website and [The Hub Youth Center](#) website for more information.

Distel Circle - Los Altos

Located at 330 Distel Circle, this project is a partnership between OSH, the City of Los Altos, and EAH Housing to develop affordable rental apartments. The development includes 90 housing units. Land use entitlements were approved by Los Altos in September 2022. The developer is in the process of submitting tax credit application for funding. Please visit the [EAH Housing project website](#) for more information.

EAST SANTA CLARA MASTER PLAN SITE

SCCHA PROPERTY:	5 acres
COUNTY PROPERTY:	7 acres
TOTAL:	12 acres

East Santa Clara – San José

Located at 725 East Santa Clara Street, this project is a partnership between OSH and Eden Housing and The Core Companies to develop affordable housing in accordance with the East Santa Clara Master Plan. Please visit the [County project website](#) for more information on the East Santa Clara Master Plan. **Additional Sites to be Developed During Sixth Cycle**

In addition to these sites, the County has identified three additional sites within incorporated areas that together could yield the production of a minimum of 617 units of affordable, workforce and supportive housing during the 6th Cycle Housing Element.

Retaining Ownership of Property in Housing Development Projects

The County Board of Supervisors has directed County Administration to, when possible and feasible, negotiate and incorporate County ownership of property into multifamily affordable housing transactions. Towards that directive, the County maintains ownership of property for the purposes of affordable and supportive housing by: 1) Negotiating property acquisitions as part of developer-led housing development projects, and 2) County-led efforts to increase the production of housing through proactive acquisitions of private properties or by using existing underutilized County-owned properties. In both cases, the County enters a long-term ground lease with the developer and all obligations to maintain and operate the site are the responsibility of the developer.

At present, using a combination of funds from the County's 2016 "Measure A" Affordable Housing Bond, the State program *No Place Like Home*, and the County General Fund, the County has invested in, and OSH is managing, the following 68 projects:

- 22 developments funded by the 2016 Measure A Housing Bond, wherein the land is owned by the County and the housing development is managed/operated by a housing developer;
- 11 properties for which the County has approved Housing Bond funds and the Administration has negotiated an option to acquire;
- 15 properties for which the County has approved Housing Bond funds but the properties are not directly controlled by the County;
- 21 properties acquired by the County and funded by the Housing Bond, where the County is either already working with a development partner or will be issuing a request for offer to select a development partner; and
- 34 County-owned properties not funded by the Housing Bond, which are currently used for supportive housing and/or are under consideration to be used as supportive housing.

Additionally, the County distributes federal funding through a variety of housing programs (see Chapter 4 for a summary of the housing programs the County offers). The County's many housing programs affirmatively further fair housing and support the provision of housing, particularly affordable housing, across the entirety of Santa Clara County and not only those unincorporated areas within County's planning jurisdiction. The County will be continuing the above approach to housing investments and policies in the sixth cycle, serving the entirety of Santa Clara County and not only unincorporated areas.

3.04 2015 Housing Element Update Program Outcomes

Housing Element law requires an analysis and evaluation of programs implemented during the prior planning period as part of the 2023-2031 update process. A description of program outcomes from 2015-2023 for the programs identified during the previous housing cycle is

captured in Appendix K and references the housing program numbers for the 2015-2023 cycle. Most of the programs listed in the 2015 Update were successful in meeting their objectives, and in general the County was highly engaged and productive in creating housing opportunities countywide, including by developing County-owned lands, funding development of affordable housing in the incorporated cities, and offering robust housing-related services to county residents. As County agencies evolve, many of the programs have been closed out and/or consolidated into new programs.

3.05 Sixth Cycle Housing-Related Strategies and Policies

This section lists the strategies and policies of the County's General Plan related to housing, including new strategies that are being added for the sixth cycle. This section is an update and continuation of the County's 2015 Update. In addition, this section lists the implementation programs relevant to each strategy and policy, with more detailed program descriptions provided in Chapter 4.

The Housing Element Update is a part of and is required to be consistent with the County's General Plan, including the countywide growth management policies, health and transportation elements, and relevant portions of other elements. However, with a RHNA assignment that has increased by 1,028 percent from the previous cycle, the County will need to make a few significant changes to the County's General Plan policies, namely, to enable the County to plan for development within urban unincorporated islands inside of an adjacent city's USA. Nevertheless, this 2023 Housing Element Update will ensure that the General Plan goals, strategies, and policies related to the promotion of compact, urban development and preservation of open

space and prime farmland will continue to be promoted in a purposeful manner.

The strategies and policies of the 2015 Update have been reviewed in accordance with current State requirements as part of the 2023 Update. There are modest changes to the 2015 Update policies and strategies, and the addition of a significant set of new policies and a new strategy addressing the impacts of climate change on housing in the county. Furthermore, the 2023 Update adds new policies to address the Federal program of Affirmatively Furthering Fair Housing (AFFH) in accordance with new State law requirements.

The policies delineated below are organized according to overall strategies or topics that provide a broad policy direction.

3.05a Strategies

Over the last two Housing Element cycles, the County has focused on increasing the housing supply countywide in the urban areas as well as on the Stanford University campus. Market-rate housing development has largely been led by individual cities, through development within urban unincorporated county islands that are annexed into adjacent cities. Concurrently, through the direction of the Board of Supervisors and implemented by OSH, the County has focused its efforts on assisting with the development of primarily extremely low-income and low-income units. The provision of adequate housing for a growing and diverse population requires a complex, comprehensive approach beyond development alone. To successfully address current and projected housing needs, the location, the type, and the price of new housing are all key factors. Accordingly, the primary objective of the strategies and policies of the County's Housing Element is to achieve and maintain a balanced housing supply countywide while affirmatively furthering fair housing and remedying past harms. A balanced housing supply is defined here as one that is affordable and accessible to all

residents, adequate to meet the overall demand, and appropriately distributed across the county. A balanced housing supply depends upon maintenance, preservation, improvement, and development of housing.

The below strategies will guide the County as it progresses toward achieving balance in its housing supply. They ensure increased housing opportunities for households at all economic levels and do so while balancing other economic, social, and environmental objectives that enjoy broad popular support in Santa Clara County. In doing so, the strategies and the policies that seek to balance the practical and constitutional limits on local governments while taking into account the genuine and universal need of all our residents for just and affordable housing.

To ensure that these strategies meet the needs of the community, substantial outreach was conducted (see Chapter 1, Section 1.08). The outreach led to the creation of new strategies and policies to address concerns raised by local housing advocates and the community at large. Existing policies were modified, where appropriate. The categorization of policies under strategies, and in some cases, the creation of a policy cluster headed by a new strategy, was guided by the results of the outreach.

Brief descriptions of the County's ten strategies are below, followed by detailed tables linking each strategy—explained in further detail—to policies and implementing programs.

Strategy No. 1: Plan for a Balanced, Countywide Housing Supply
Support every Santa Clara County jurisdiction in developing diverse housing types within existing and new communities to meet the needs of all households, affordable housing production goals, State Housing Element requirements, and regional land use and transportation planning objectives.

Strategy No. 2: Promote Cooperation and Collaboration on Residential Development

Explore every feasible opportunity to assist developers in building more affordable housing projects. By working with neighborhood residents, community organizations, and the private sector to promote a diverse housing supply, the County can capitalize on all the ideas, expertise, and untapped resources within the county.

Strategy No. 3: Provide Financial Assistance for Extremely Low-Income Housing

Housing in the county, and in the Bay Area in general, is expensive to build and these costs have been increasing over the last decade. To ensure that the housing needs of all residents are met—and with a focus on extremely low-income housing—the County will continue to work with developers and use “Measure A” Housing Bond funds to make housing projects financially feasible.

Strategy No. 4: Remove Unnecessary Barriers to Housing

Utilize expedited project review, adaptable development standards, funds for affordable housing programs, additional density bonuses, and other measures to reduce housing development costs.

Strategy No. 5: Ensure Support for Fair Housing Law and Practices

Discriminatory housing practices are still a challenge for low-income, disabled, and racial/ethnic minority households. This discrimination further restricts access to permanent housing and temporary housing. This strategy focuses on furthering fair housing efforts and educating residents on tenant and landlord rights and responsibilities.

Strategy No. 6: Provide for Special Needs Households

To create a balanced housing supply, the County must include housing suitable for to meet the needs of households with special needs. This includes housing for people of all ages who have physical or

intellectual challenges, or those with extremely low or no income. The policies pertaining to housing for special needs households encourage a closer partnership between developers and the County and cities to ensure that new housing is built to accommodate different type of households.

Strategy No. 7: Address Homelessness Consistent with Housing First Principles

The County and cities are experiencing a crisis of homelessness, and there is a need to prioritize and increase programs and efforts to provide immediate shelter and assistance in attaining permanent housing. Homeless shelters shall continue to be supported by service providers with the full range of assistance needed by the homeless. Temporary emergency shelters shall be used only as part of a continuum of care that leads to permanent housing.

Strategy No. 8: Maintain and Expand the Supply of Farm Worker Housing

The State considers housing for farm workers to be one form of special needs housing. Farm worker housing is vital to a viable agricultural economy and healthy communities in the county. This strategy focuses on addressing farm worker housing needs, particularly for year-round farm workers and their families.

Strategy No. 9: Conserve and Rehabilitate the Existing Housing Stock

Preserving and rehabilitating existing homes is an effective way to sustain the supply of affordable housing. The policies in this strategy encourage replacement of older, affordable housing lost through redevelopment or conversion to market rate housing. The policies also promote timely neighborhood improvements to prevent decay. The reuse and repurpose of underutilized buildings should be encouraged with adequate improvements to meet building and safety codes.

Strategy No. 10: Plan for Climate Change Impacts on Existing and Future Housing Stock

Santa Clara County is already experiencing the effects of the climate crisis. The County needs to ensure that existing and future housing stock is resilient to the impacts of climate change and extreme weather events. Policies under this strategy promote greater energy efficiency and resiliency in new and existing housing stock.

These strategies are designed not only to implement policies and programs that will effectively address countywide housing needs, but also to promote the other land use and development objectives expressed elsewhere in the General Plan, thereby supporting the housing-related goals in the Vision Statement of the General Plan and indirectly supporting other community goals. The strategies also span the entire County, though individual implementation measures may apply to only the unincorporated areas, to the County as a governmental entity, or countywide.

3.05b Completed Policies & Programs

The strategies and policies of the 2015 Update have been reviewed in accordance with the State requirements as part of the 2023 Housing Element Update. Changes to the 2015 Update primarily focuses on consolidating and updating policies and programs to reflect the County’s current organizational structure and its focus on ending and preventing homelessness in Santa Clara County. The main changes include removing programs where funding sources for affordable housing production have been consolidated into a single over-the-counter Notice of Funding Availability, organizing the County’s homelessness policies to be more consistent with the [2020-2025 Community Plan to End Homelessness](#), and introducing new policies and programs that address the County’s commitment to affirmatively further fair housing. Appendix K provides an assessment of the status, progress, and accomplishments of each of the policies and programs in

the 2015-2022 Housing Element. Notable accomplishments during fifth Housing Element cycle include:

- The voter-approved \$950 million 2016 “Measure A” Affordable Housing Bond, which is projected to fund 120 new affordable housing developments over ten years, including 4,800 new units dedicated to extremely low-income and very low-income households. As of November 1, 2022, the Board of Supervisors has approved 47 developments that will yield over 4,000 affordable and supportive housing.
- Streamlined housing development funds into one over-the-counter Notice of Funding Availability, which allowed the County to fund over 50 new development projects across ten of the fifteen incorporated cities in the county.
- Merged the County’s Office of Affordable Housing and Office of Homelessness Concerns to form the Office of Supportive Housing, which positioned the County to rapidly scale the production of supportive housing, adding more than 2,700 units and housed over 21,000 people since 2015.

3.05c Ongoing and New Policies and Implementation Measures by Strategy

In this section, each Strategy is discussed in turn, and the associated Policies and Implementation Measures are listed. Housing Policies are identified by an indicator of “HG” followed by the associated Strategy number and then the policy number. Policies with subparts are indicated with a hyphenated suffix—for example, HG1-1 is a subpart of Housing Policy HG1. Implementation Measures are labeled by the associated Strategy number, followed by an “(i)” and a letter—for example, HG1(i) A. Programs associated with each Implementation Measure are listed beneath each Measure. The full program descriptions are provided in Chapter 4.

Strategy No. 1: Plan for a Balanced Countywide Housing Supply

A balanced housing supply is one that is adequate to meet housing needs and is affordable and accessible to all residents. "Balanced" refers not only to a sufficient amount of housing at various income levels, but also refers to a variety of housing types appropriate for a range of needs, and a variety of locations that complement transit opportunities and concentrations in employment. "Balance" goes beyond mere parity between the quantity of housing and the number of jobs. The housing stock must reflect household income and lifestyle profiles. The existing housing crisis in the State and in the Bay Area underscores the urgent need to provide a balanced housing supply in the county, ensuring that new housing projects fill in the gaps in the housing market, as well as encouraging the creation of diverse, walkable neighborhoods where in there is a mix of population, ages, and incomes. The County will support the production of housing of diverse size and type that is affordable to extremely low-income, very low-income, low-income, moderate-income, and special needs populations.

The County is obligated by State housing law to support equity and ensure that it plans for, to the extent feasible, housing opportunities in the unincorporated area that are affordable to moderate-, low-, very low-, and extremely low-income households. For a variety of reasons, the majority of those opportunities will continue to be more commonly found in the urban unincorporated areas inside city USAs. The County's General Plan goal is to have all unincorporated areas within USAs annexed by the respective cities to ensure all urban areas are managed by cities, and therefore the cities are authorized to plan the future growth of these USAs. However, given the new housing allocation methodology utilized by ABAG – allocating units partly based on existing population within jurisdictions – the County will update its General Plan to allow the County to plan for housing in these urbanized islands when cities do not have a plan for annexation. The policies under this strategy are set forth below.

Policies		Implementation Measures
HG1-1	Planning for the supply and diversity of housing types in urbanized areas of the County shall include consideration of both current and projected employment, household income needs, and a variety of housing types.	<p>HG1(i) A</p> <p>Maintain and, where necessary, strengthen County and cities' joint land use policies and agreements that direct urban development to areas within city urban service areas.</p> <p><i>Program 2.10: Joint Urban Development Policies</i></p> <p><i>Program 4.03: Coordinated Annexation and RHNA Transfer</i></p>
HG1-2	Housing at urban densities shall generally be built within the cities and their urban service areas, not in rural areas.	<p>HG1(i) B</p> <p>Encourage public support of city efforts to create a balanced housing supply, which includes housing affordable to special needs, farmworkers, and extremely low-income households.</p> <p><i>Program 1.01: Supportive Housing Development Fund Notice of Funding Availability (SHDF NOFA)</i></p>
HG1-3	Focus the County's limited housing production resources on special needs populations, farmworkers, and extremely low-income households.	

HG1-4	Encourage homeownership opportunities for lower-income households.	<p><i>Program 2.27: Replacement Housing Policy</i></p> <p>HG1(i) C</p> <p>Continue to implement new homeownership programs that provide an opportunity for lower-income households that would otherwise struggle to afford a home, furthering the equity and sustainability of homeownership.</p>
HG1-5	Prioritize suitable County-owned, underutilized parcels within cities and Urban Service Areas for affordable, supportive, and workforce housing development.	<p><i>Program 1.01: Supportive Housing Development Fund Notice of Funding Availability (SHDF NOFA)</i></p>
HG1-6	Ensure housing development projects within unincorporated Urban Service Areas contain an equitable mix of housing typology and housing options for different household income levels.	<p><i>Program 1.02: Limited Equity Housing Cooperative Projects (LEHCs)</i></p> <p><i>Program 1.03: Homeownership Projects</i></p>
HG1-7	Work with local transit authorities to locate housing within one-quarter mile walking distance to a transit station or stop to provide connectivity to services (such as schools, grocery stores, parks, etc.), and to prioritize constructing multi-modal transportation networks (sidewalks, bicycle lanes, trails, etc.), and other amenities within existing unincorporated neighborhoods.	<p><i>Program 1.04: Empower Homebuyers SCC</i></p> <p><i>Program 1.05: Mortgage Credit Certificate Program (MCC)</i></p> <p><i>Program 1.06: Below Market Partnership Program</i></p> <p><i>Program 1.32: Community Development Corporation Grant Program</i></p>
HG1-8	Until a city annexes the unincorporated islands within its USA, the County will plan for housing development in these areas, as necessary to address Housing Element law during a planning cycle and Regional Housing Needs Allocations (RHNA).	<p>HG1(i) D</p> <p>Continue consideration of County owned lands suitable for the construction of extremely low-income housing and prioritize the development of County-owned sites suitable for housing development and when possible adjacent to transit.</p> <p><i>Program 1.07: County-Led Housing Development</i></p> <p><i>Program 1.17: Permanent Supportive Housing for Persons with a Serious Mental Illness</i></p> <p><i>Program 2.01: Housing Suitability and Prioritization Tool for County-Owned Properties</i></p> <p><i>Program 2.07: Housing Adjacent to Transit</i></p> <p><i>Program 2.26: Mid-Cycle Review</i></p> <p><i>Program 3.01: SCC Mental Health Department Evans Lane Wellness and Recovery Center</i></p> <p>HG1(i) E</p> <p>Amend General Plan and Zoning Ordinance to Plan for Housing in Unincorporated USAs and Stanford University Lands.</p> <p><i>Program 2.02: Planning for Housing Development in Unincorporated USAs and Stanford University Lands</i></p>

		<p><i>Program 2.18: Facilitate State Permit Streamlining Laws</i></p> <p><i>Program 2.19: Streamline Multi-Family Housing Development</i></p> <p><i>Program 2.22: Objective Standards for Multi-Family Housing</i></p> <p><i>Program 2.25: Incentivize Lot Consolidation</i></p>
HG1-9	Ensure that place-based neighborhood improvements to infrastructure and services are focused on the areas which have been historically underserved.	<p>HG1(i) F</p> <p>Coordinate improvements and services with other County agencies and Departments.</p> <p><i>Program 2.29: Place-Based Planning and Neighborhood Improvements</i></p>
HG1-10	<u>Promote access to racially concentrated areas of affluence to a wide range of residents.</u>	<p>HG1(i) G</p> <p><u>Seek opportunities for the County to work with institutional landowners to develop housing affordable to a wide range of income levels and backgrounds.</u></p> <p><u><i>Program 2.30 – Explore Housing Opportunities in the RCAA</i></u></p>

Strategy No. 2: Promote Cooperation and Collaboration on Housing Development

There are numerous housing agencies and advocacy groups within the county with opportunities to cooperate and collaborate to address housing issues, thus saving time and money, and expediting the introduction of innovative ideas and best practices throughout the housing community. The County and cities are well-positioned to work jointly to promote interjurisdictional and public/private efforts to expand the housing supply, and within County Departments, there are several agencies that either rely upon or provide housing services. For example, the County's Office of Supportive Housing (OSH) has a mission to increase the supply of housing and supportive housing that is affordable and available to extremely low-income and/or special needs households. Additionally, the County administers the Community Development Block Grant (CDBG) and Home Investment Partnerships Program (HOME Program). The County CDBG program is administered for the cities of Campbell, Los Altos, Los Altos Hills, Los Gatos, Monte Sereno, Morgan Hill, and Saratoga, while it manages the HOME program for the cities of Cupertino, Gilroy, and Palo Alto.

There are many instances of collaboration between County and city governments to attain balance in the county's housing supply. The primary existing mechanism is the set of 40-year-old joint growth management policies of LAFCO, the cities, and the County that focus urban growth inside cities' Urban Service Areas (USAs). These growth management policies are designed to place most of the County's housing growth in the cities of the County, and results in most of the high density and affordable housing being created primarily in the cities. In November of 2016, Santa Clara County voters approved Measure A – the \$950 million affordable housing bond (Housing Bond). The Housing Bond provides the County with an unprecedented opportunity to partner with cities, residents, and the affordable and supportive housing community to significantly address the housing needs of the community's poorest and most vulnerable residents. The County, through the Office of Supportive Housing, has accelerated the production of affordable, supportive, and workforce housing throughout the County in partnerships with cities and other governmental entities through its implementation of the Housing Bond.

Policies

Implementation

HG2-1	The County and the cities should work cooperatively to ensure that there is a balanced housing supply sufficient to achieve countywide economic, social, and environmental objectives. Further opportunities for inter-agency, intergovernmental, interregional, and public/private cooperation should be sought out and encouraged.	<p>HG2(i) A</p> <p>Maintain intergovernmental agreements to address countywide housing objectives and to ensure an adequate supply of affordable housing countywide.</p> <p><i>Program 1.08: Joint Development Memoranda of Understanding (MOU)</i></p>
HG2-2	Intergovernmental and public and private cooperation shall be encouraged to achieve an adequate supply of affordable housing that meets changing demographic needs in Santa Clara County.	<p><i>Program 1.09: Housing Trust of Silicon Valley</i></p> <p><i>Program 1.10: Santa Clara County CDBG and Housing Coordinators' Convening</i></p> <p><i>Program 1.16: Collaborate with the Santa Clara County Housing Authority (SCCHA)</i></p>
HG2-3	Housing resources should be combined, and their use coordinated, among County Departments.	<p>HG2(i) B</p> <p>Establish and expand intergovernmental processes to more effectively define and achieve local and regional housing objectives.</p> <p><i>Program 1.10: Santa Clara County CDBG and Housing Coordinators' Convening</i></p> <p><i>Program 2.08: Santa Clara County Association of Planning Officials</i></p> <p><i>Program 2.24: Apply for Prohousing Designation</i></p> <p>HG2(i) C</p> <p>Continue to support cross-agency integration of housing services within the County Departments through internal agency agreements.</p> <p><i>Program 1.11: Internal County Coordination of Housing Funds and Services</i></p> <p><i>Program 2.08: Santa Clara County Association of Planning Officials</i></p> <p><i>Program 2.24: Apply for Prohousing Designation</i></p>

Strategy No. 3: Provide Financial Assistance for Extremely Low-Income Housing

Extremely low-income (ELI) households are those households with an income less than 30% of the area median income (AMI). In a high-cost and low-vacancy housing market, such as Santa Clara County, financial assistance to home builders, buyers, and renters is necessary to ensure that housing affordable to ELI and special needs households is built. However, public funds for this purpose are limited. Therefore, publicly funded housing programs should give priority to housing for ELI households. The goal of any public housing assistance program should be to ensure the availability of housing that is suitable and affordable to those not provided for by the current market.

By ensuring that a sufficient amount of new housing will be affordable to ELI households, the policies in this Strategy will also help to achieve the vision of the General Plan for social diversity and economic growth. Effective partnerships between home builders and local government will ensure that affordable housing is built in ways which also support the full range of land use objectives supported by Santa Clara County residents.

Policies		Implementation
HG3-1	Local funds for housing shall be targeted to households earning less than 30% of the County median income and special needs populations.	<p>HG3(i) A</p> <p>Participate in intergovernmental efforts to secure Federal and State legislation, which will ensure adequate funding for, and tax and other incentives for, the construction and preservation of extremely low-, very low-, low- and moderate-income ownership and rental housing.</p> <p><i>Program 1.12: Coordinate with Bay Area Housing Finance Authority</i></p> <p><i>Program 1.13: Supportive Housing and Innovation Fund</i></p> <p><i>Program 1.16: Collaborate with the Santa Clara County Housing Authority (SCCHA)</i></p> <p>HG3(i) B</p> <p>Continue to use suitably located surplus publicly owned lands for housing affordable to extremely low-, very low-, and low-income households through the sale or lease of such land to a government entity, or to nonprofit or private home builders with appropriate terms and conditions guaranteeing long term affordability.</p> <p><i>Program 1.16: Collaborate with the Santa Clara County Housing Authority (SCCHA)</i></p> <p><i>Program 2.01: Housing Suitability and Prioritization Tool for County-Owned Properties</i></p> <p><i>Program 1.07: County-Led Housing Development</i></p>
HG3-2	The provision of permanent supportive housing for extremely low-income households shall be given high priority in housing assistance programs.	

Strategy No. 4: Remove Unnecessary Barriers to Housing

Another important means by which County and city governments can cooperatively encourage affordable housing is to work with developers to reduce the costs of development. Lengthy project review times and important, but increasingly complex, development requirements (such as green building requirements), are costly for developers, who then pass additional costs to the future occupant.

State housing law requires each jurisdiction, as part of their Housing Element Update process, to review their development standards and review procedures for opportunities to remove unnecessary constraints. Over the last Housing Element cycle, the County has taken several steps to allow for more housing opportunities, as well as improving the permit review and approval process, primarily investing in new technological systems that improve the permitting and recordkeeping process. As part of the County’s commitment to keep improving the permit process, there is a continuous review of processes to seek improvements and revisions to ordinances to facilitate the building of housing.

With new State laws in response to the housing crisis that allow for the development of Accessory Dwelling Units (ADUs), Junior Accessory Dwelling Units (JADUs) and second primary units (Senate Bill 9 or SB9 units – referred to as Urban Primary Units in the County ordinances) in areas zoned for single-family development, it is imperative that the County continue to streamline the regulatory and permit review process for these types of development.

To reaffirm this intent, the County continually reviews development trends, policy interpretation implications, and new State laws. If necessary, the County’s policies and standards are revised to ensure that housing and development objectives are met and are aligned with State objectives.

Policies		Implementation
HG4-1	The County should continually review its land use and development procedures for opportunities to remove unnecessary constraints to, and provide new opportunities to fund, the construction of affordable housing.	<p>HG4(i) A</p> <p>Identify and utilize a forum for sharing of best practices for removing governmental and nongovernmental constraints to housing development.</p> <p><i>Program 1.10: Santa Clara County CDBG and Housing Coordinators’ Convening</i></p> <p><i>Program 2.08: Santa Clara County Association of Planning Officials</i></p> <p><i>Program 2.26: Mid-Cycle Review</i></p>
HG4-2	Review and reduce, where appropriate, regulations and processing procedures regarding the development of ADUs, JADUs, and SB9 Units.	<p>HG4(i) B</p> <p>Implement Inclusionary Housing Fee Program for affordable housing project types.</p> <p><i>Program 2.03: In Lieu Fee Program for State Density Bonus and Affordable Housing</i></p>
HG4-3	Update parking standards to allow more flexibility for a variety of housing types.	<p>HG4(i) C</p> <p>Monitor and modify development standards as needed, including the trends of ADU, JADU, and SB 9 development, to ensure development standards are objective, up to date with current State law, and reported to the State Department of Housing and Community Development annually, <u>and remove barriers to housing development.</u></p> <p><i>Program 2.06: Streamline ADU Processing</i></p> <p><i>Program 2.09: Digital Tracking System for ADU, JADU, & SB9 Units.</i></p> <p><i>Program 2.18: Facilitate State Permit Streamlining Laws</i></p>

Program 2.19: Streamline Multi-Family Housing Development

Program 2.20: Tracking and Ongoing Compliance with State Housing

Program 2.22: Objective Standards for Multi-Family Housing

[Program 2.30 – Explore Housing Opportunities in the RCAA](#)

HG4(i) D

Create opportunities for adaptive reuse of non-residential buildings where single-family residential uses are allowed in the County Zoning Ordinance. The County will remove barriers related to development standards, such as providing exceptions to setbacks, building heights, and parking requirements, when a non-residential building is converted to a single-family residence.

Program 2.11: Update the Zoning Ordinance for Re-use of Non-Residential Buildings to Residential.

Program 2.19: Streamline Multi-Family Housing Development

Program 2.25: Incentivize Lot Consolidation

Program 2.26: Mid-Cycle Review

HG4(i) E

Ensure access for all by reviewing application requirements and design requirements, globally and/or through an accommodation process.

Program 2.28: Reasonable Accommodation Policy

Strategy No. 5: Ensure Support for Fair Housing Law and Practices

Illegal housing discrimination limits access to an already inadequate supply of affordable housing, which further exacerbates the imbalance between available housing and household needs, particularly for those of modest means. Discriminatory acts can be so subtle that many victims cannot readily detect them.

Ensuring equal access to housing for all residents is a responsibility of government. The County’s goal is to promote equal housing opportunities and to eliminate discriminatory housing practices. Despite the escalating costs of enforcement, County anti-discrimination programs have been effective. By ensuring equal access to housing, the County will achieve its housing goals and the objective of social equity and harmonious diversity expressed in the vision of the County General Plan.

Fair housing challenges often occur within an existing landlord / tenant relationship. Such challenges include unanticipated rent increases, changes in the terms of occupancy, evictions, lack of information regarding recourse for tenants, maintenance and condition of the leased property, late rental payments, and occupant behavior. Introducing financial assistance to rehabilitate properties and/or counseling services to address issues such as rent increases can help to resolve such tenant and landlord disagreements.

The County provides funding to several non-profit organizations that assist tenants and landlords. Funding is limited and these organizations are often understaffed. Consistent and adequate funding would increase the likelihood of both eliminating discrimination and improving tenant/landlord relations. In addition to aiding improvements in tenant and landlord relations. The efforts to resolve tenant/landlord problems should be continued and, where necessary, reinforced.

In 2018, the State passed Assembly Bill (AB) 686 as the Statewide framework to Affirmatively Furthering Fair Housing (AFFH). AB 686 requires that a local jurisdiction promote inclusive communities, further housing choice, and address racial and economic disparities through government programs, policies, and operations. This law is an important tool to address systemic racism in housing and achieve positive impacts for all. AB 686 applies to all public agencies in all activities related to housing and community development. In response to the new law, the County has added new policies and implementation programs to meet AB 686 under this strategy.

Racially and ethnically concentrated areas of poverty (R/ECAPs) have become a policy focus for the federal Department of Housing and Urban Development (HUD). R/ECAPs are neighborhoods where residents are largely people of color and have lower incomes. State statute requires the Housing Element’s Assessment of Fair Housing to analyze R/ECAPs as well as racially concentrated areas of affluence (RCAAs). In contrast to R/ECAPs, RCAAs are neighborhoods where the population is disproportionately white and affluent.

“Burdened Households” are those with burdened with a rent cost that is 30 percent or more of their monthly income.

The policies and implementation programs set forth below continue existing policies and include new policies that work towards AFFH goals and serve county residents in all R/ECAPs countywide (i.e., not just in unincorporated areas).

Policies		Implementation
HG5-1	The County shall continue its work to enforce laws and foster policies and programs aimed towards preventing discrimination against people of protected status under Federal and State law.	<p>HG5(i) A</p> <p>Facilitate access to Federal and State home rehabilitation loans or grants to qualifying persons of extremely low-income.</p> <p><i>Program 1.04: Empower Homebuyer SCC</i></p>
HG5-2	Fair housing services shall be available in all parts of the County.	<p>HG5(i) B</p> <p>Fair housing services shall continue to offer standardized protection and outreach services throughout the County.</p>

HG5-3	The rights of tenants and landlords shall be recognized and protected, and opportunities for mediation of disputes shall be provided.	<p><i>Program 1.14: Fair Housing Assistance Program</i></p> <p><i>Program 1.15: Fair Housing Audit & Education Program</i></p> <p>HG5(i) C</p> <p>Fair housing services provided shall be respectful of language, culture, and special needs.</p> <p><i>Program 1.20: San Andreas Regional Center</i></p>
HG5-4	Reduce displacement of low-income household tenants and increase tenant protections prior to eviction proceedings.	<p><i>Program 1.14: Fair Housing Assistance Program</i></p> <p><i>Program 3.01: SCC Behavioral Health Services Department Evans Lane Wellness and Recovery Center</i></p> <p>HG5(i) D</p> <p>Continue to support organizations active in ensuring the rights of all persons to obtain and retain housing.</p> <p><i>Program 1.19: Eviction Diversion Program</i></p> <p><i>Program 1.14: Fair Housing Assistance Program</i></p> <p><i>Program 1.15: Fair Housing Audit & Education Program</i></p> <p><i>Program 2.12: Monitor R/ECAP and Burdened Household Areas</i></p> <p>HG5(i) E</p> <p>Maintain tenant/landlord dispute mediation services in all areas of the County.</p> <p><i>Program 1.18: Tenant/Landlord Dispute Mediation Services</i></p> <p><i>Program 4.01: Dispute Resolution Program</i></p>
HG5-5	Identify and increase access to services and other opportunities for residents of historically disinvested low-income communities (R/ECAPs and Burdened Households) across unincorporated county.	<p>HG5(i) F</p>
HG5-6	Support cities in improving opportunities within neighborhoods and areas identified as R/ECAPs and/or neighborhoods with a majority of Burdened Households.	<p>Identify R/ECAP and communities with Burdened Households and identify areas of improvement that will increase access to amenities and resources such as (but not limited to) transit, parks, fresh groceries, and health improvement facilities.</p>
HG5-7	Promote residential racial and ethnic integration and reduce displacement by increasing the supply of affordable housing in High Opportunity Areas, in areas with ongoing displacement, and in areas where residents are at risk of displacement.	<p><i>Program 2.12: Monitor R/ECAP and Burdened Household Areas</i></p> <p><i>Program 2.23: Tracking Housing Conditions</i></p>

Strategy No. 6: Provide for Special Needs Housing

Many Santa Clara County households encounter extraordinary difficulty in finding both affordable and accessible housing. In addition to the housing constraints already imposed by limited income, there are additional burdens faced by special needs and vulnerable populations, such as the elderly, large families, female-headed households, at-risk youth, victims of domestic violence, agricultural employee families (addressed specifically in Strategy No. 8), the homeless (addressed specifically in Strategy No. 7), and by those that are differently abled. These types of households are identified as special needs households. The needs of these groups call for specific program responses.

Community input showed significant interest and concern for the housing needs of all special needs populations. The input affirmed the need for policies promoting housing with support services. In addition, the community emphasized the need to adopt new policies that facilitate aging in place, such as incorporating Universal Design²⁷ in building codes. The community input also sought collaborative efforts by and among all cities, County agencies, and nonprofit housing-related organizations to ensure housing resources are well advertised and better utilized to prevent homelessness, address special needs, and provide paths to permanent housing.

Because homes for special needs households often require design features not typically required by other households, housing suitable for special needs households is rarely provided by the private market without some public assistance. The County and cities can encourage the production of special needs housing by identifying the scope of need in each community and using housing funds to enable builders to construct the needed extremely low-income (ELI) units in coordination with County’s direct referral services to ensure access to vulnerable and special needs populations. Through reducing constraints, local governments can improve the economics of such projects without compromising standards for health and safety (this approach is implemented through Strategy No. 4 addressing constraints to housing production).

The latest U.S. Census continues to indicate a growing elderly population in the county. Since 2000, the population share of residents in unincorporated county 65 years and older has increased to 15% of the total population and is projected to increase to over 20% by 2030 and reach 25% around 2045. This is a higher percentage of elderly population than the State of California (11 %), and country (13 %) as a whole. As such, planning for the senior population will be a growing need for the County to address. It is imperative that new housing suitable to the needs of a variety of senior households be integrated into every community.

The following policies continue existing policies identified in the previous Housing Element, while adding new policies to help the County update its understanding of the demand for special needs housing in the county, including senior housing.

Policies		Implementation
HG6-1	Encourage the development of affordable housing that is suitable for a variety of special needs populations.	HG6(i) A Advocate for the expansion of Federal and State programs and funding to assist local government in developing special needs housing not provided through the private market. <i>Program 1.01: Supportive Housing Development Fund Notice of Funding Availability (SHDF NOFA)</i> <i>Program 1.12: Coordinate with Bay Area Housing Finance Authority</i> <i>Program 1.16: Collaborate with the Santa Clara County Housing Authority (SCCHA)</i> <i>Program 1.17: Permanent Supportive Housing for Persons with a Serious Mental Illness</i>
HG6-2	An adequate supply of affordable housing suitable for individuals at all stages of life should be available in every community.	

²⁷ Universal Design is a building concept that incorporates products, general design layouts, and characteristics into residences in order to make the residence usable by the greatest number of people, respond to the changing needs of the resident, and improve the marketability of the residence.

HG6-3	Expand the Home Repair and Modification Program to include the retrofit of existing housing units to become ADA compliant.	<p><i>Program 3.01: SCC Behavioral Health Department Evans Lane Wellness and Recovery Center</i></p> <p>HG6(i) B</p> <p>Develop and implement policies and ordinances that create housing that is adaptable to the needs of physically, developmentally, and emotionally challenged persons.</p>
HG6-4	Incorporate Universal Design Principles into existing residential building standards.	<p><i>Program 1.01: Supportive Housing Development Fund Notice of Funding Availability (SHDF NOFA)</i></p> <p><i>Program 1.20: San Andreas Regional Center</i></p> <p><i>Program 2.13: Universal Design in Housing Development</i></p> <p><i>Program 3.01: SCC Behavioral Health Services Department Evans Lane Wellness and Recovery Center</i></p> <p>HG6(i) C</p> <p>Maintain existing programs to provide “Housing for All Ages,” including housing for multigenerational households.</p> <p><i>Program 1.31: Minor Home Repair and Maintenance Program</i></p> <p><i>Program 2.16: Expand Home Repair and Modifications to Include ADA Upgrades</i></p> <p><i>Program 2.17: Training and Support to Homeowners Aging in Place</i></p> <p>HG6(i) D</p> <p>Maintain existing programs to provide housing suitable for families with children in need.</p> <p><i>Program 1.11: Internal County Coordination of Housing Funds and Services</i></p> <p>HG6(i) E</p> <p>Support implementation of housing-related policies in the county.</p> <p><i>Program 1.24: Community Plan to End Homelessness</i></p> <p><i>Program 3.01: SCC Behavioral Health Services Department Evans Lane Wellness and Recovery Center</i></p> <p><i>Program 2.27: Replacement Housing Policy</i></p>

Strategy No. 7: Address Homelessness Consistent with Housing First Principles

Homelessness is a persistent and chronic problem for many individuals, but its effects touch whole communities. The countywide unhoused population remained between 7,200 and 7,500 people from 2007 to 2017, when there was a significant jump. From 2017 to the present, the unhoused population has increased. In a survey conducted in 2022, the unhoused population had grown to 10,000. Families with children, seniors, individuals with disabilities, veterans, youth, and young adults are all represented in the county’s diverse unhoused population.

The growing income gap between higher-income and lower-income populations in the county and the lack of housing development particularly at the lowest income levels contribute to the homelessness crisis. According to the Public Policy Institute of California, families at the highest income levels in the Bay Area (the 90th percentile) have more than 12 times the income of families at the bottom (the 10th percentile).²⁸ Those at the lower end of the income level have not shared in the region’s significant economic growth. In Santa Clara County, between 2000 and 2015, workers with earnings in the 10th percentile saw their income decline by 12%.²⁹

In 2015, the community came together to create a roadmap for ending homelessness in Santa Clara County. The *2015-2020 Community Plan to End Homelessness* centered around a collective impact response and the proven Housing First model. The Plan helped 8,884 households resolve their homelessness, doubled the number of supportive housing units, and increased temporary and emergency shelter capacity. Following a robust community engagement process and coordination, the County and its partners updated the roadmap for ending homelessness in the *2020-2025 Community Plan to End Homelessness*, focusing on three core strategies: 1) Address the root causes of homelessness through system and policy change; 2) Expand homelessness prevention and housing programs to meet the need; and 3) Improve quality of life for unsheltered individuals and create healthy neighborhoods for all. The *Community Plan to End Homelessness* continues to guide the County, cities, non-profit agencies, and community members on decisions about funding, programs, and needs for addressing the root causes of homelessness in the county.

Policies		Implementation
HG7-1	Expand homelessness prevention programs to support individuals and families most at risk of becoming homeless.	HG7(i) A Transition the Homelessness Prevention System Pilot into an ongoing housing intervention within the Supportive Housing System and continue to secure public and private funding to aid 2,500 households annually. <i>Program 1.11: Internal County Coordination of Housing Funds and Services</i> <i>Program 1.21: Homelessness Prevention System</i> <i>Program 1.22: Emergency Assistance Network</i> <i>Program 1.24: Community Plan to End Homelessness</i>
HG7-2	Expand supportive housing programs, including permanent supportive housing and rapid rehousing programs.	
HG7-3	Improve the quality of life of unsheltered individuals by expanding the capacity of temporary housing programs and providing basic needs services to individuals experiencing unsheltered homelessness.

Strategy No. 8: Maintain and Expand the Supply of Agricultural Employee Housing

Santa Clara County has a long history as a significant producer of agricultural products. Once known as the Valley of the Heart’s Delight, the region still produces over \$320 million of agricultural products per year.³⁰ The County is proud of its agricultural heritage and desires to promote food security by ensuring viable agricultural production including access to affordable and safe housing for agricultural workers and their families. The provision of affordable and safe agricultural employee housing can also promote the continuation of the county’s agricultural tradition by making the farms throughout the County more productive and more competitive. Moreover, through the development and implementation of the *Santa Clara Valley Agricultural Plan (Ag Plan)*, it has become clear that the County’s agricultural lands and the workers who steward them play an essential role in mitigating and adapting to climate change.

Agricultural employee households are considered a special needs household in State planning guidelines. Providing housing for agricultural employees continues to be a priority for the County and for communities and organizations countywide. Prioritizing agricultural employees extends to individuals who seasonally migrate to the County for employment at local farms and in processing plants, as well as to a substantial and growing portion of agricultural employees who are permanent, year-round County residents and who often live with their families. Year-round crops need year-round workers, and many farmers strive to provide work for their employees in the off-season to increase the likelihood that their employees will be available during crucial periods of high-labor needs. These dynamics are particularly true during times of labor shortages and a competitive job market. A large supply of seasonal workers is also necessary for the labor-intensive work of planting and harvesting highly perishable seasonal crops. Migrant and seasonal agricultural workers are often more challenged than year-round workers to find adequate housing and are more likely to endure long commutes from their place of residence to their place of work. By providing adequate opportunities for agricultural employee housing in Santa Clara County, the County’s agricultural industry can gain a competitive advantage, especially for seasonal workers during periods when agricultural workers are scarce. Importantly, the term agricultural employee also includes the significant population of self-employed farm and ranch operators, permanent County residents who also face significant housing challenges.

In 2018, the County adopted the Ag Plan, recognizing the need to ensure that the region’s agricultural economy continues to thrive, and that it is integrated into the County’s efforts to tackle climate change and regional resilience. The plan identifies the development of new agricultural employee housing as a crucial aspect to improving the agriculture-supportive infrastructure of the region. In response to the plan, the County updated its Zoning Ordinance to expand options for agricultural employee housing and streamline the planning approval process. The Ag Plan also calls for the facilitation of construction of more agricultural employee housing by identifying opportunities, including siting and funding options, for such projects.

The policies under this strategy continue existing policies identified in the 2015 Update, while adding new policies that work in conjunction with policies identified under Strategy No. 1 (Plan for a Balanced Countywide Housing Supply).

Policies		Implementation
HG8-1	Facilitate agricultural employee housing by improving the permitting process.	HG8(i) A Convene other jurisdictions for capacity-building and conduct a farmworker housing needs assessment. <i>Program 2.04: Assess Farmworker Housing Needs and Collaborate with Other Jurisdictions</i>
HG8-2	The County shall promote and support programs that maintain and expand appropriately located housing suitable for and affordable to farmworker households. Such support shall prioritize the needs of seasonal workers.	

³⁰ Source: [Santa Clara County 2021 Crop Report](#)

		<p>HG8(i) B</p> <p>Identify and pursue additional opportunities to support the development of agricultural employee housing.</p> <p><i>Program 2.14: Expanded Streamlining of Agricultural Employee Housing</i></p> <p><i>Program 2.20: Tracking and Ongoing Compliance with State Housing Laws</i></p> <p><i>Program 4.02: Agricultural Worker Housing Workplan</i></p>
HG8-4	Seek new funding sources to support the construction of farmworker housing.	<p>HG8(i) C</p> <p>Monitor new State and Federal Funding regarding farmworker rental and homeownership programs and collaborate with housing developers to identify sites suitable for farmworker housing.</p> <p><i>Program 1.29: Farmworker Affordable Homeownership and Farmworker Housing Pilot Program.</i></p> <p><i>Program 4.02: Agricultural Worker Housing Workplan</i></p>

Strategy No. 9: Conserve and Rehabilitate the Existing Housing Stock

One means of ensuring the availability of affordable housing is by maintaining the existing supply of older, less costly units. Rehabilitation programs assist lower income owners and tenants in upgrading their housing and maintaining its affordability. Older single-family houses provide starter homes for many first-time home buyers, and many older apartments and duplexes provide safe, decent, and affordable housing for low-income seniors, students, and an increasing number of families with children.

These more affordable housing opportunities can and have been lost through demolition and rebuilding of newer, larger homes. It is appropriate and necessary that some areas in every community evolve to different uses as time goes by. However, communities must address the resulting displacement of existing long-term lower income rental residents out of the area. Programs to rehabilitate existing homes should ensure that low-income households can continue to live in their existing communities. Additionally, the rehabilitation of owner-occupied housing could be a means for seniors to be able to age in place.

Funds from Federal and State housing programs have been used to assist qualified low- and moderate-income homeowners and rental property owners in rehabilitation and maintenance efforts. Many of these neighborhoods are also in need of public infrastructure improvements, such as street repaving, sidewalk repairs, and installation or repair of storm drains, curbs, and gutters. Community development funds have been used to make public improvements of this sort. These improvements in turn provide residents with a safer living environment, as well as an increased pride in their neighborhood and homes. They further encourage an increase in private investment in the area.

Those programs should be continued and, as resources permit, expanded to ensure that the maximum number of units affordable to lower income residents remain available in those areas.

When rental units are rehabilitated, owners or landlords will frequently raise rents either to cover costs or because the upgraded units command higher rent on the market. The County and the cities should make every effort to ensure that public grants or low interest loans for the purposes of rehabilitation do not result in the displacement of lower income tenants or the loss of below market rate housing. Monitoring of rental costs has also proven to help with tracking the increasing cost of housing in the county.

The policies under this strategy maintain the County's goal to facilitate the preservation of the existing housing stock, while also ensuring that displacements due to such improvements are limited.

Policies		Implementation
HG9-1	The conservation and rehabilitation of the existing housing supply shall be encouraged and facilitated.	HG9(i) A Maintain ongoing programs for monitoring the physical condition of neighborhoods to assist in guiding rehabilitation program efforts, scheduling infrastructure maintenance activities, and to provide accurate information for Federal and State programs. Expand monitoring component to include rent price information. <i>Program 1.31: Minor Home Repair and Maintenance Program</i> <i>Program 2.05: Rent Price Monitoring Program</i> <i>Program 2.21: Streamlined Rehabilitation and Replacement</i> <i>Program 2.27: Replacement Housing Policy</i>
HG9-2	Publicly assisted housing rehabilitation efforts should not have the effect of reducing the available supply of housing for extremely low-income households.	
HG9-3	The inventory of land zoned and suitable for residential development shall be maintained.	

HG9-4

Support retaining existing deed restricted affordable and supportive housing units.

HG9(i) B

Maintain existing County and cities' joint land use policies and agreements that direct urban development to areas within city USAs and preserve rural areas for rural development.

Program 2.10: Joint Urban Development Policies

HG9(i) C

Strengthen the County's loan portfolio management system to track when existing affordable and supportive housing projects are eligible for syndication of their tax credits and work towards extending affordability terms.

Program 1.30: Asset Management Portfolio Expansion

Strategy No. 10: Plan for Climate Change Impacts on Existing and Future Housing Stock

Santa Clara County is already experiencing the effects of the climate crisis.³¹ The County needs to ensure that future housing stock is resilient to the impacts of climate change. It also needs to ensure that the current housing stock are periodically upgraded to reduce the impacts of climate change and extreme weather events. The policies under this strategy promote greater energy and water efficiency in new and existing housing stock and promote the development of resiliency against extreme weather in future housing stock.

The County's *Climate Roadmap 2030* and its *Sustainability Master Plan* (adopted in 2021) provide the larger vision and broad goals for climate smart housing. The policies below complement Strategy 2.1 and Strategy 6.3 of the *Sustainability Master Plan*. These policies will ensure that existing and future housing stock are contributing to lowering our greenhouse gas (GHG) footprint and protecting our existing housing stock from extreme weather events and natural disasters.

Policies		Implementation
HG10-1	Promote energy and water efficiency and electrification in new and existing residential buildings to reduce energy costs, conserve water, provide quality and resilient housing, improve safety, and comfort, and reduce greenhouse gas emissions.	<p>HG10(i) A</p> <p>Adopt new energy efficiency, electrification, water conservation and building performance standards for existing and new buildings.</p> <p><i>Program 2.15: Adoption of "Reach" Codes</i></p>
HG10-2	Continue to limit development of new housing in areas likely to face high risk to climate related disasters, such as, wildfires and floods.	<p>HG10(i) B</p> <p>Maintain low-density land use and zoning designations for properties within hazard areas.</p> <p><i>Program 2.10: Joint Urban Development Policies</i></p>
HG10-3	Facilitate programs and assistance to upgrade existing housing stock to better withstand extreme weather events, while keeping energy efficiency in mind.	<p>HG10(i) C</p> <p>Encourage retrofitting of existing homes.</p> <p><i>Program 1.31: Minor Home Repair and Maintenance</i></p> <p><i>Program 2.21: Streamlined Rehabilitation and Replacement.</i></p>

³¹ See [Silicon Valley 2.0 Climate Adaptation Guidebook](#) for more on the County's efforts to demonstrate the effects of climate change locally.

Chapter 4: County Housing Strategies, Policies, and Programs

4.01 Overview

Chapter 4 delineates housing policy programs to be implemented during the 2023-2031 Housing Element planning period. These programs are associated with the Strategies and Policies covered in Chapter 3. This chapter organizes the implementation programs by the lead responsible County agency. The numbering of these programs reflects the lead agency, followed by the program number. Section 4.02 lists all County programs and cross-references the relevant Strategies and Policies from Chapter 3. Programs that are new for this Housing Element cycle are marked as (New). Section 4.03 provides a detailed discussion of each program. Several programs address the contributing factors listed in the Assessment of Fair Housing (AFH) and each program discussion includes a reference to the relevant contributing factor(s). Appendix N lists proposed goals and actions recommended in the AFH and cites the appropriate programs that addresses each goal.

4.02 List of Implementation Programs

Table 4.1: List of Implementation Programs

PROGRAM NUMBER	PROGRAM	COMPLETION DATE	TIMEFRAME	STRATEGY & POLICY
1. OFFICE OF SUPPORTIVE HOUSING (OSH)				
1.01	Supportive Housing Development Fund Notice of Funding Availability (SHDF NOFA)	2026	Medium Term	HG1-3, HG1(i) B, HG1(i) C, HG6-1, HG6(i) A, HG6(i) B
1.02	Limited Equity Housing Cooperative Projects (LEHCs)	2026	Medium Term	HG1-4, HG1(i) C
1.03	Homeownership Projects	2026	Medium Term	HG1-4, HG1(i) C
1.04	Empower Homebuyers SCC	2026	Medium Term	HG1-4, HG1(i)C, HG5-5, HG5(i) A
1.05	Mortgage Credit Certificate (MCC) Program	2023	Short Term	HG1-4, HG1(i)C,
1.06	Below Market Partnership Program	2026	Medium Term	HG1-4, HG1(i)C,
1.07	County-Led Housing Development	Ongoing	Continuous	HG1-5, HG1(i)D, HG3-1, HG3(i) B
1.08	Joint Development Memoranda of Understanding (MOU)	2024	Short Term	HG2-1, HG2(i) A
1.09	Housing Trust of Silicon Valley	Ongoing	Continuous	HG2-1, HG2(i) A
1.10	Santa Clara County CDBG and Housing Coordinators' Convening	Ongoing	Continuous	HG2-2, HG2(i) A, HG2(i) B, HG4-1, HG4(i) A
1.11	Internal County Coordination of Housing Funds and Services	Ongoing	Continuous	HG2-3, HG2(i) C, HG 6-2, HG6(i) D, HG7-1, HG7(i) A
1.12	Coordinate with Bay Area Housing Finance Authority	Ongoing	Continuous	HG3-1, HG3(i) A, HG6-1, HG6(i)A
1.13	Supportive Housing and Innovation Fund	Ongoing	Continuous	HG3-1, HG3(i) A
1.14	Fair Housing Assistance Program	Ongoing	Continuous	HG5-1, HG5-2, HG5(i)B
1.15	Fair Housing Audit & Education Program	Ongoing	Continuous	HG5-1, HG5-2, HG5(i) B, HG5(i) D
1.16	Collaborate with the Santa Clara County Housing Authority (SCCHA)	Ongoing	Continuous	HG2-1, HG2(i) A, HG3-1, HG3(i) A, HG3(i) B, HG6-1, HG6(i) A,
1.17	Permanent Supportive Housing for Persons with a Serious Mental Illness	2026	Medium Term	HG1-5, HG1(i) D, HG6-1, HG6(i) A
1.18	Tenant/Landlord Dispute Mediation Services	Ongoing	Continuous	HG5-3, HG5(i) E
1.19	Eviction Diversion Program	Ongoing	Continuous	HG5-4, HG5(i) D
1.20	San Andreas Regional Center	Ongoing	Continuous	HG5-5, HG5(i) C, HG6-2, HG6(i)B
1.21	Homelessness Prevention System (New)	Ongoing	Continuous	HG7-1, HG7(i) A
1.22	Emergency Assistance Network	Ongoing	Continuous	HG7-1, HG7(i) A
1.23	City Revenue Agreements (New)	Ongoing	Continuous	HG7-2, HG7(i) B

1.24	Community Plan to End Homelessness (New)	December 2025	Short Term	HG6-1, HG6(i) E, HG7-3, HG7(i) A, HG7(i) B, HG7(i) C, HG7(i) D, HG7(i) F, HG7(i) G
1.25	Temporary Housing Programs	Ongoing	Continuous	HG7-3, HG7(i) C
1.26	Homekey Application Strategy (New)	Ongoing	Continuous	HG7-3, HG7(i) E
1.27	Service Enriched Shelter Forgiveness Loan Program (New)	Ongoing	Continuous	HG7-5, HG7(i) D
1.28	Lived Experience Advisory Board (LEAB) (New)	Ongoing	Continuous	HG7-6, HG7(i) C, HG7(i) G
1.29	Farmworker Affordable Homeownership and Farmworker Housing Pilot Program (New)	2024	Short Term	HG8-4, HG8(i) C
1.30	Asset Management Portfolio Expansion (New)	Ongoing	Continuous	HG9-4, HG9(i) C
1.31	Minor Home Repair and Maintenance Program	Ongoing	Continuous	HG6-2, HG6(i) C, HG9-1, HG9-4, HG9(i) A, HG10-3, HG10(i) C
1.32	Community Development Corporation Grant Program (NEW)	Ongoing	Continuous	HG1-4, HG(i) C
1.33	Expand Access to UPLIFT Program	Ongoing	Continuous	HG7-6, HG7(i) C
2. DEPARTMENT OF PLANNING AND DEVELOPMENT (DPD)				
2.01	Housing Suitability and Prioritization for County-owned Properties (New)	December 2023	Short Term	HG1-5, HG1(i) D, HG3-2,, HG3(i)B
2.02	Planning for Housing Development in Unincorporated USAs and Stanford University Lands (New)	December 2023	Short Term	HG1-8, HG1(i) E
2.03	In-Lieu Fee Program for State Density Bonus and Affordable Housing	Ongoing	Continuous	HG4-1, HG(i) B
2.04	Assess Farmworker Housing Needs and Collaborate with Other Jurisdictions	December 2026	Medium Term	HG8-1, HG8(i) A
2.05	Rent Price Monitoring Program	Ongoing	Continuous	HG9-1, HG9(i) A
2.06	Streamline ADU processing	December 2024	Short Term	HG4-2, HG4(i) C
2.07	Housing Adjacent to Transit (New)	Ongoing	Continuous	HG1-7, HG1(i) D
2.08	Santa Clara County Association of Planning Officials	Ongoing	Continuous	HG2-1, HG2-2,HG2(i) B, HG2(i) C, HG4-1, HG4(i) A
2.09	Digital Tracking System for ADUs, JADUs & SB9 Units	December 2023	Short Term	HG4-2, HG4(i) C
2.10	Joint Urban Development Policies	Ongoing	Continuous	HG1-1, HG1(i) A, HG9-3, HG9(i) B, HG10-2, HG10(i) B
2.11	Update Zoning Ordinance for Re-use of Non-Residential Buildings to Residential (New)	December 2029	Long Term	HG4-1, HG4(i) D
2.12	Monitor R/ECAP and Burdened Household Areas (New)	December 2023	Short Term	HG5-5, HG5-6, HG5(i) D, HG5(i) F
2.13	Universal Design in Housing Development (New)	June 2024	Short Term	HG6-4, HG6(i) B
2.14	Expanded Streamlining of Agricultural Employee Housing	December 2028	Long Term	HG8-1, HG8(i) B
2.15	Adoption of "Reach" Codes (New)	Ongoing	Continuous	HG10-1, HG10(i) A
2.16	Expand Home Repair and Modifications to Include ADA Upgrades (New)	Ongoing	Continuous	HG6-4, HG6-(i) C

2.17	Training and Support to Homeowners Aging in Place (New)	January 2027	Medium Term	HG6-3, HG6(i) C
2.18	Facilitate State Permit Streamlining Laws (New)	December 2024	Short Term	HG1-8, HG1(i) E, HG4-1, HG4(i) C
2.19	Streamline Multi-Family Housing Development (New)	January 2027	Medium Term	HG1-8, HG1(i) E, HG4-1, HG4(i) C, HG4(i) D
2.20	Tracking and Ongoing Compliance with State Housing Laws (New)	Ongoing	Continuous	HG4-2, HG4(i) C, HG8-1, HG8(i)B
2.21	Streamlined Rehabilitation and Replacement (New)	December 2025	Medium Term	HG9-1, HG9(i) A, HG10-3, HG10(i) C
2.22	Objective Standards for Multi-Family Housing (New)	December 2025	Medium Term	HG1-8, HG1(i) E, HG4-1, HG4(i) C
2.23	Tracking Housing Conditions (New)	December 2025	Medium Term	HG5-1, HG5-5 HG5(i) F
2.24	Apply for Prohousing Designation (New)	December 2024	Short Term	HG2-3, HG2(i) B, HG2(i) C
2.25	Incentivize Lot Consolidation (New)	December 2025	Medium Term	HG1-8, HG1(i) E, HG4-1, HG4(i) D
2.26	Mid-Cycle Review (New)	December 2027	Long Term	HG1-1 to HG1-8, HG4-1, HG4-2, & HG4-3, HG4(i) A, HG4(i) D, HG1(i) D
2.27	Replacement Housing Policy (New)	December 2026	Medium Term	HG1-3, HG1-6, HG1(i) B, HG6(i) E, HG9-1, HG9-2, HG9(i) A
2.28	Reasonable Accommodation Policy (New)	December 2026	Medium Term	HG4-1, HG4(i) E
2.29	Place-Based Planning and Neighborhood Improvements (New)	January 2031	Long Term	HG1-9, HG1(i) F, HG9(i) A
<u>2.30</u>	<u>Explore Housing Opportunities in the RCAA (New)</u>	<u>December 2030</u>	<u>Long Term</u>	<u>HG1-10, HG1(i) G, HG4-1, HG4(i) C</u>
3. DEPARTMENT OF BEHAVIORAL HEALTH				
3.01	SCC Behavioral Health Services Department Evans Lane Wellness and Recovery Center	Ongoing	Continuous	HG1-5, HG1(i) D, HG5-5, HG5(i) C, HG6-1, HG6(i) A, HG6(i) E
3.02	Substance Use Recovery Residences	Ongoing	Continuous	HG6-1, HG6(i) (B)
4. OFFICE OF COUNTY EXECUTIVE				
4.01	Dispute Resolution Program	Ongoing	Continuous	HG5-3, HG5-4, HG5(i) E
4.02	Agricultural Worker Housing Workplan (New)	December 2023	Continuous	HG8-1, HG8(i) B, HG8-4, HG8(i) C
4.03	Coordinated Annexation and RHNA Transfer (New)	Ongoing	Continuous	HG1-1, HG1(i) A

4.03 Program Descriptions

This section describes the programs listed in Section 4.02 of this chapter, organized by the lead agencies responsible for implementation.

4.03a Office of Supportive Housing Programs

The Office of Supportive Housing's (OSH's) mission is to increase the supply of housing and supportive housing that is affordable and available to extremely low-income and/or special needs households countywide. One of OSH's primary aims is to support the County of Santa Clara's mission of promoting a healthy, safe, and prosperous community by ending and preventing homelessness. OSH's major activities include efforts to organize and operate homeless services countywide, including homelessness prevention, crisis response, and Permanent Supportive Housing and Rapid Rehousing programs (collectively, the Supportive Housing System). In addition, OSH strives to increase the supply of housing by funding and spurring the development of housing for low-income households, with a particular focus on extremely low-income households. OSH is the lead department within the County implementing the 2016 "Measure A" Affordable Housing Bond, a \$950M general obligation bond, serves as the collaborative applicant for the Santa Clara County Continuum of Care, and serves as the primary convener of housing staff across the County in collaboration with cities on joint housing and homelessness concerns. The 2020-2025 Community Plan to End Homelessness serves as our community's roadmap to ending homelessness and serves as the basis of OSH's annual workplan.

Collectively, Programs 1.01 – 1.33 provide a wholistic approach to addressing the housing and homelessness issues facing Santa Clara County communities. While some programs are new, continued programs have been modified to reaffirm the County's commitment

to create an environment that brings stakeholders together to streamline housing producing, that address displacement and impediments to fair housing, and leverages limited resources to maximize the assistance that is provided to special needs populations across the county. Most importantly, these programs have been designed to address the disproportionate housing needs of households who are cost burdened, at highest risk of displacement, and housing insecure. At a time when over half of U.S. renters across the Country cannot afford to pay their rent, the County of Santa Clara through OSH has designed priorities, strategies, and actions to address these contributing factors.

Program 1.01- Supportive Housing Development Fund Notice of Funding Availability (SHDF NOFA).

In December 2014, the County of Santa Clara's Board of Supervisors affirmed the County's role in promoting affordable housing, especially for vulnerable populations. Housing special needs populations is a county service and therefore the County must take an active role in developing, financing, and supporting various types of affordable housing for the populations that the County serves. The Board further established that the County's priorities were to:

- Increase the supply of housing that is affordable to extremely low-income (ELI) households;
- Increase the scope and breadth of supportive housing for special needs populations, including homeless and chronically homeless persons; and
- Improve coordination and collaboration among the County, the cities, other governmental agencies, and the affordable housing community.

These priorities have assisted the County in directly addressing contributing factors to fair housing issues including but not limited

to a lack of affordable, accessible housing in a range of unit sizes. ELI and very low-income (VLI) households are significantly more likely to be cost burdened in the county than other income groups.

Unfortunately, the county’s rental market has fallen short in meeting the affordability needs of these households. The most impactful tool for the County to address the disproportionate housing needs includes a local ballot measure intended to raise funds to accelerate the development of affordable and supportive housing.

In November 2016, Santa Clara County residents approved the 2016 “Measure A” Affordable Housing Bond (Housing Bond), a \$950 million general obligation bond that will create new affordable rental and homeowner housing opportunities. The Housing Bond has provided the County with an unprecedented opportunity to partner with cities, residents, and the affordable and supportive housing community to significantly address the housing needs of the community’s poorest and most vulnerable residents. The bond proceeds are projected to fund 120 new affordable housing developments over ten years, including 4,800 new units dedicated to extremely low-income and very low-income households. The Housing Bond is part of an ongoing effort to:

- Increase affordable housing opportunities for our community’s most vulnerable and poorest residents; and

- Prevent and reduce homelessness throughout Santa Clara County.

The SHDF NOFA includes funding sources for the development of new, permanent affordable and supportive housing for the community’s most vulnerable populations. Special needs groups include but are not limited to unhoused individuals, seniors, transition aged youth, agricultural workers, and people with a disabling condition. As a funder of affordable and supportive housing throughout the County, OSH works closely with the affordable housing development community and local jurisdictions to facilitate the development of housing from identifying properties through the entitlement process and financing stages to the lease up process for special needs units. This over-the-counter process will continue to consolidate all County-controlled housing production funds into one primary procurement method to accelerate housing development. Central to this work is the partnership and collaboration that OSH has with the affordable housing development community and the 15 incorporated cities in the county. Together we manage a countywide housing development pipeline. Since 2015, the County has funded the development of 7,183 housing units across the county of which 2,997 are set aside for homeless individuals or families that may also be seniors, transition aged youth, veterans, agricultural workers and/or those with a disabling condition.

Table 4.2: SHDF NOFA

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • Approve funding to support at least 18 new housing development sites resulting in 1,657 units of affordable and supportive housing for special needs populations by June 30, 2025. OSH will proactively meet with the cities in the County to facilitate the land use approval process with an emphasis on leveraging land use streamlining legislation like SB 35 and AB 2161, provide predevelopment and acquisition funding, as well as facilitate applications for funding through the State of California’s Housing and Community Development Super NOFA. Through these partnership meetings, OSH staff provides technical assistance to staff, makes connections to other cities facing similar challenges, and attends City Council meetings as requested.
--------------------	---

	<ul style="list-style-type: none"> ○ On December 5, 2023, the Board approved funding for six entitled multifamily rental housing developments totaling 716 new apartments. ○ Concurrently, the Office of Supportive Housing is underwriting six additional multifamily rental housing developments that are working on seeking their entitlements. These recommendations are expected to be presented to the Board of Supervisors by September 2024. ● Over the 2023-2031 period, OSH will meet monthly with the cities of Campbell, Cupertino, Los Gatos, Morgan Hill, Mountain View, Santa Clara, and San José to provide technical assistance, coordinate interest from the development community, and chart a land use and financing plan for properties that have been identified by the County in these cities that can be developed for extremely low income and special needs affordable housing. Collectively the intent is to develop a clear land use approval process and reduce the time it takes to get through the approval process, work together to identify funding opportunities and submit joint application as applicable, and engage collaboratively with the affordable housing development community to reduce costs and deliver housing more quickly. OSH expects the outcomes of these convenings to lead to the production of additional affordable housing by working together to develop a regional housing development pipeline. OSH will track the outcomes of these meetings to demonstrate the impact and benefit of working collaboratively to remove the governmental constraints associated with building affordable and supportive housing for special needs populations ● Over the 2023-2031 period, bi-annually convene affordable housing development partners to discuss financing opportunities and co-create a housing development pipeline, discuss land use streamlining opportunities, and work together to strategically position projects so that they are not competing with each other for scarce resources. OSH expects the outcomes of these convenings to give developers the opportunity to learn about the County’s priorities and processes, reduce uncertainty, and foster an environment that will yield more affordable housing units. We expect to have at least 20 different developers in attendance at each convening. <ul style="list-style-type: none"> ○ On November 30, 2023, the County in partnership with SV@Home convened a Developer Roundtable to discuss upcoming funding applications and opportunities. ● Over the 2023-2031 period, annually seek approval for funding for at least six new development proposals for affordable and supportive housing to the Board of Supervisors. <ul style="list-style-type: none"> ○ By fall of every year, underwrite six housing development projects and schedule a 1:1 meeting with each developer to confirm funding assumptions and review all related due diligence items. ○ Draft staff analysis and deliver presentation to the OSH Director prior to presenting the list of projects for the Board’s approval. ○ Once the Board approves the funding, issue funding commitment letter, negotiate term sheet, and identify any pre-development funding that may be needed. ● Annually review the SHDF Guidelines to ensure that the current underwriting criteria is consistent with State and Federal capital funding sources for housing development. Outreach to the development community for input and host at least one listening session to discuss possible changes. Seek approval from the Board of Supervisors to formalize changes.
GEOGRAPHIC SERVICE AREA	Countywide
LEAD AGENCY	Office of Supportive Housing
FUNDING SOURCE	<p>The funding sources in the NOFA include:</p> <ul style="list-style-type: none"> ● 2016 “Measure A” Affordable Housing Bond (Housing Bond): A \$950 million general obligation bond approved by the voters in 2016.

	<ul style="list-style-type: none"> • No Place Like Home (NPLH): As an alternative county, the County of Santa Clara received a direct allocation of NPLH funds to administer locally. To date the County has received funding over four funding rounds totaling \$106,085,749. • Housing Funds for Persons with Intellectually and Developmentally Disabilities (I/DD): \$40 million in County General fund support the construction of extremely low-income and very low-income housing for to develop persons with intellectual and/or developmental disabilities and their families. • Stanford Affordable Housing Fund (SAHF): A special revenue fund to account for in-lieu fees received from Stanford University for General Use Permit (GUP). Funding affordable housing projects within 6-mile radius of boundary of the Stanford campus. • HOME Investment Partnership Program (HOME): A special revenue fund to account for the HOME Investment Partnerships Program awarded by the U.S. Department of Housing and Urban Development. Approximately \$1 million is available annually. • Community Development Block Grant (CDBG): A U.S. Department of Housing and Urban Development Block Grant awarded to eligible communities for housing and community development activities. As an Urban County, the County receives an annual allocation of funds directly from HUD. Additional revenue is generated from loan repayments of outstanding loans and from interest earned on funds. • Permanent Local Housing Allocation (PLHA): Funds are used to for the development of new affordable housing for households earning up to 60% AMI.
<p>POLICIES AND IMPLEMENTATION:</p>	<ul style="list-style-type: none"> • HG1-3: Focus the County's limited housing production resources on special needs populations, farmworkers, and extremely low-income households. • HG1(i) B: Encourage public support of city efforts to create a balanced housing supply, which includes housing affordable to special needs, farmworkers, and extremely low-income households. • HG1(i) C: Continue to implement new homeownership programs that provide an opportunity for lower-income households that would otherwise struggle to afford a home, furthering the equity and sustainability of homeownership. • HG6-1: Encourage the development of affordable housing that is suitable for a variety of special needs populations. • HG6(i) A: Advocate for the expansion of Federal and State programs and funding to assist local government in developing special needs housing not provided through the private market. • HG6(i) B: Develop and implement policies and ordinances that create housing that is adaptable to the needs of physically, developmentally, and emotionally challenged persons.
<p>CONTRIBUTING FACTORS</p>	<ul style="list-style-type: none"> • Availability of affordable units in a range of sizes • Lack of access to opportunity due to high housing costs • Location and type of affordable housing • Loss of affordable housing

Program 1.02 - Limited Equity Housing Cooperative Projects (LEHCs)

This program focuses on extremely low-income households, particularly those that face displacement due to economic pressures. A significant portion of these households have historically faced severe obstacles in accessing homeownership, which may reinforce their current economic status. ELI households have substantially lower rates of homeownership than overall households and other special needs households. LEHCs have aspects of both homeownership and rental projects and are a unique opportunity to provide equity to extremely low-income households and others who may not otherwise be able to achieve homeownership. LEHC developments are cooperatively owned by a resident board of directors (Cooperative Board). Residents pay affordable monthly dues or "rent" to the Cooperative Board and receive a modest equity share at the end of their residency. Projects are expected to include on-site services and would likely require Project Based Vouchers to support ongoing operations.

The Supportive Housing Development Fund Notice of Funding Availability (Program 1.01) includes the opportunity for developers to submit a funding application for Project Type 5 which promotes opportunities for "Limited Equity Housing Cooperative projects as defined under the California Business and Professions Code." The County anticipates funding at least one project in the planning period.

This program aims to overcome one or more contributing factors that create, contribute to, perpetuate, or increase the severity of one or more fair housing issues. Specifically, the County intends to demonstrate the opportunities that LEHCs can provide those that face displacement due to economic pressures and lack access to opportunity due to high housing costs. OSH intends to fund one project during the planning period to help determine the impact a program like this can have to directly address the high levels of displacement of low-income residents, who are disproportionately likely to be Black, Vietnamese, Latinx, or have disabilities.

Table 4.3: LEHCs

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • By June 2024, identify at least one County-owned site to pilot a LEHC project. This process includes reviewing the County’s portfolio of properties to determine which is best suited for this pilot project without jeopardizing the overall housing production goals for any given site. • Launch the community engagement strategy in partnership with the City of San José’s Housing Department in Summer 2024. <ul style="list-style-type: none"> ○ Identify key stakeholders and hold three listening sessions with ELI households who are interested in developing a vision for the site and the pilot LEHC project. ○ Work with the Santa Clara County Housing Authority to apply by December 2026 for funding or vouchers to support the rental subsidy needed to make the LEHC project feasible. • Identify a development partner using the County Developer Qualified Pool and select a partner by Summer 2024. The following provides a timeline to help achieve this goal: <ul style="list-style-type: none"> ○ Circulated internal draft of Request for Offer in March 2024 ○ Issue Request for Offer by June 2024 ○ Evaluate proposals and select development partner by September 2024
--------------------	---

	<ul style="list-style-type: none"> ○ Receive Board approval by October 2024 ○ Initiate Community Engagement and design work by November 2024. ● Receive entitlements from the City of San José by December 2025. ● Seek financing in 2026 and start construction by 2027. ● Complete project by 2029.

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> ● HG1-4: Encourage homeownership opportunities for lower-income households. ● HG1(i)C: Continue to implement new homeownership programs that provide an opportunity for lower-income households that would otherwise struggle to afford a home, furthering the equity and sustainability of homeownership.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> ● Displacement of residents due to economic pressures ● Lack of access to opportunity due to high housing costs

Program 1.03 - Homeownership Projects

This program helps to support the production of new for-sale homes. Possible projects in this program may have a similar scale to multifamily affordable apartments, but smaller developments are also eligible. Within each proposed project, a minimum of 33% of the homes shall be sold to very low-income households, up to 33% to moderate-income buyers, and the balance to low-income buyers. In the case of common interest developments, each unit would be separately owned and would be a member of a Homeowners

Association which would be responsible for the maintenance of common elements and facilities. In November 2021, the Supportive Housing Development Fund Notice of Funding Availability (Program 1.01) was amended to include Project Type 6 which promotes opportunities for *"Homeownership projects which commit a minimum of 33% of the units for very low income (VLI) households, a maximum of 33% of the units for moderate-income households, and the balance of the units for households at 80% AMI or below."* **As noted above, lower income households are less likely to achieve homeownership.**

Table 4.4: Homeownership Projects

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • Complete construction of a total of 18 new for sale affordable homeownership units by December 2026. Implementing actions include providing financing to close the funding gap and working with the developer to remove any land use barriers by working closely with the local jurisdiction's planning staff. • Implement the approved \$1M funding for Habitat for Humanity East Bay/Silicon Valley and assist with the completion of the 4th and Reed Homeownership project consisting of 4 new homeownership units by August 2024. On May 16, 2023, the Board approved up to \$1,000,000 for this project. The project has secured all financing and is getting prepared to start construction. Construction is expected to be completed by Spring 2025. • Implement the approved funding for Habitat for Humanity Easy Bay/Silicon Valley and assist with the completion of the Jackson Avenue Townhomes project consisting of 14 new for sale affordable townhomes by March 2026. On November 1, 2022, the Board approved up to \$4,000,000 for this project. Construction is expected to be completed by Spring 2026.

Program 1.04 - Empower Homebuyers SCC

Empower Homebuyer Santa Clara County (Empower) was created to increase homeownership opportunity for low-income and moderate-income households. Empower is a loan program to help low- and moderate-income first-time homebuyers purchase a home by assisting them with the required down payment, which is usually 20% of the purchase price. The Housing Trust Silicon Valley (HTSV) administers the Empower Program from FY2019-FY2023 on the County’s behalf. The program offers up to \$250,000 for low-income to moderate-income first-time homebuyer to put towards the cost of

down payment on a qualified property in the county. The loans bear zero interest and are deferred up to 30 years. The borrower shall repay the original amount of their loan plus a share of the appreciation of their home when the loan matures, or when the borrower decides to sell their home or refinance their mortgage. The program increases homeownership opportunities to low-income individuals and families, of which may consist of individuals with special needs. A secondary aim of this program is to help in eliminating lending discrimination that is a prevalent problem faced by lower income households of color.

Table 4.5: Empower Homebuyers SCC

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> On June 27, 2023, the Board of Supervisors approved modifications to the program. OSH then worked closely with HTSV to make the necessary operational changes to the program. Approved program changes took place in October 2023 and this has yielded additional loans being issued. HTSV has been proactively reaching eligible households to make them aware of the changes to the program. The additional outreach is intended to increase the number of loans issued. Implementing actions include hosting 50 educational workshops or other similar events to educate homebuyers, realtors, lenders, and other interested parties about the program. OSH anticipates issuing 50 first-time homebuyer loans by 2027.
GEOGRAPHIC SERVICE AREA	Countywide

HG5-5: Identify and increase access to services and other opportunities for residents of historically disinvested low-income communities (R/ECAPs and Burdened Households) across unincorporated county. HG5(i) A: Facilitate access to Federal and State home rehabilitation loans or grants to qualifying persons of extremely low-income.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> Lack of access to opportunity due to high housing costs Location and type of affordable housing

Program 1.05 - Mortgage Credit Certificate (MCC) Program

Mortgage Credit Certificates (MCCs) provide financial assistance in the form of individual federal income tax credits to first-time homebuyers of single-family homes, townhomes, and condominiums. The MCC Program grants a federal income tax credit on the annual mortgage interest paid, thereby reducing overall federal income taxes. The credit may not exceed 20% of the interest paid on the borrower’s first mortgage. The County’s current tax credit rate of 15% was set in January 2001. In Santa Clara County, the MCC tax credit rate has varied from 10% to 20%, based on past performance, the potential demand for MCCs, and the likely amount of tax credit allocation awarded by the California Debt Limit

Allocation Committee (CDLAC). Since 1994, the County has offered a Reissue of Mortgage Credit Certificate (RMCC) Program for existing MCC holders wishing to retain their tax credit following refinancing. The Program generates revenue through homebuyer application and participating lender fees. The Mortgage Credit Certificate Program was authorized by the Tax Reform Act of 1984. Federal law limits the dollar amount of tax-exempt authority that can be used in each State to issue private activity bonds (including MCCs). CDLAC is granted sole authority for allocating the annual ceiling on private activity bond allocations in the State of California. The Program provides financial assistance in the form of individual federal income tax credit to low-income individuals and families, of which may consist of individual(s) with special needs.

Table 4.6: Mortgage Credit Certificate (MCC) Program

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • By December 2024, issue the remaining 10 MCCs. • Proactively promote the availability of the remaining MCCs in partnership with the County’s preferred lending pool and cities Below Market Rate housing programs. • The County will prioritize its remaining MCCs for agricultural workers and other lower income households with incomes at 50% AMI or below. These MCCs will help lower income homebuyers afford homes that would otherwise need to be sold to households with higher incomes. Specifically, MCCs will allow a lower income buyer to be able to devote more of their annual income towards qualifying for a first mortgage, because this can be offset by the buyer’s tax savings. This allows potential buyers with lower incomes to afford a sales price that they would not otherwise be able to afford without the benefit of the MCC. • Between 2015-2022, the County planned to issue approximately 130 MCCs annually for low- and moderate-income households. However, 92 MCCs were issued for low-and moderate-income households. CDLAC has not made new funding available for the Mortgage Credit Certificate Program since 2020. Currently, the County only has the authorization to issue 10 more MCCs. <ul style="list-style-type: none"> ○ In 2016, the County issued 24 MCCs ○ In 2017, the County issued 28 MCCs ○ In 2018, the County issued 13 MCCs ○ In 2019, the County issued 10 MCCs ○ In 2020, the County issued 9 MCCs ○ In 2021, the County issued 8 MCCs ○ In 2022, the County issued 1 MCC ○ In 2023, the County will issue 10 MCCs

Program 1.06 - Below Market Partnership Program

Homeownership has long been associated with many secondary benefits, including housing security, educational achievement, and the ability to build wealth. However, there are many barriers to purchasing a home within Santa Clara County. As of August 2022, the median home price in the county exceeded \$1.4 million, putting the dream of homeownership out of reach for more than half of the County’s residents. In addition to the extremely high cost of homes, many other market factors and industry standards compound the issue, including significant down payment and credit requirements and a highly competitive market where successful offers must also waive significant contingencies, offer quick closes, bid above assessed value, and compete against all-cash offers to be seriously considered by home sellers. These factors are challenging for all buyers and commonly become insurmountable barriers for low- and

very low-income households. The Below Market Rate Partnership Program is intended to promote affordable homeownership opportunities, particularly for very low- and low-income households. This program will provide deferred subordinate loans to eligible households purchasing a home within Santa Clara County. Deferred subordinate loans are mortgages under which no principal or interest payments are due during the term of the loans, and the loans have a junior lien priority to the borrower’s first mortgage. The County has received an award of CalHome funding that will be leveraged to supplement local funding in partnership with other governmental agencies who operate within Santa Clara County and nonprofit organizations which have experience operating homeownership programs. Eligible homes under the Program include single-family homes, townhomes, condominiums, manufactured homes, mobile homes, and ADUs or JADUs located within the county.

Table 4.7: Below Market Partnership Program

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • By January 2031, issue 100 deferred subordinate loans to eligible low-income households. To achieve this goal, OSH will coordinate with the other cities in the county who administer Below Market Rate programs. • On June 27, 2023, received approval from the Board of Supervisors for version 2 of the Below Market Rate Partnership Program policies and procedures. • In September 2023, the County started to administer the program and developed a workflow with Partner Agencies.
--------------------	---

	<ul style="list-style-type: none"> In December 2023, the County issued loans to the first two households under this new program in partnership with the City of Morgan Hill, for a total of \$185,000 in Housing Bond funds. Both homes were sold to low-income households. In 2024 OSH will continue to work with partner agencies to expand implementation of the program. This includes meeting with the cities in the county that have current BMR programs and who are interested in leveraging the County’s newly established program that targets lower income households. Since this is a newer program OSH expects to see a steady increase in subordinate loans every year. In 2025 OSH will convene the cities in the county who administer BMR programs who have not engaged with the Below Market Partnership Program with the goal of establishing commitments from at least three cities.

Program 1.07 County-Led Housing Development

The County has a variety of County-controlled and County-owned properties, some of which are suitable for residential development. The County has established a process to give the community an opportunity to work in partnership with the County to develop these sites with affordable housing. Because the majority of these sites are located in the incorporated urban areas of the county, the Office of Supportive Housing works closely with the housing and planning staff of each city to develop a land use path for each site that is owned or controlled by the County before it is released through a solicitation process. This predevelopment work establishes early partnerships with the host city, their elected officials and the immediate community to shape the future design and target

population for the property. The intent of this strategy is to accelerate the construction of affordable and supportive housing by removing governmental constraints that are often impediments to housing.

Streamlined Solicitation Process

On September 4, 2019, the County of Santa Clara Office of Supportive Housing issued a Request for Qualifications to create a pool of prequalified affordable housing developers who could respond to solicitations to develop affordable housing on County-owned land. This Developer Qualified Pool (DQP) consists of 16 experienced developers that are aligned with the County’s goals of increasing affordable housing for Santa Clara County’s most

vulnerable and poorest residents. As County-controlled properties become available, the County issues a Request for Offers to accept development proposals from the DQP. The County has selected a developer from the DQP for five county-owned sites in incorporated cities. The sites are summarized below:

- Grant Avenue Educator Workforce Housing – Palo Alto: The County is partnering with Mercy Housing and Abode Communities to develop 110 affordable rental workforce apartments for teachers, school employees, and their families. The project is being developed in partnership with Meta (formerly Facebook), and five local school and community college districts.
- Mitchell Park Place – Palo Alto: The County is partnering with Eden Housing to develop 50 affordable rental apartments. This development includes 25 apartments and services for individuals with intellectual and/or developmental disabilities and their families.
- The Hub – San José: The County is partnering with Allied Housing to develop affordable rental apartments, including units for transitioned age youth, and The Hub, a youth-led community center dedicated to supporting current and former foster youth. The Planning application under review proposes 81 housing units.
- Distel Circle – Los Altos: The County and the City of Los Altos are partnering with EAH Housing to develop 90 affordable rental apartments.
- East Santa Clara – San José: The County is partnering with Eden Housing and The Core Companies to develop

affordable housing in accordance with the East Santa Clara Master Plan.

Building on this moment, it is the County's intention to scale this program and accelerate the production of housing on County-owned sites with an emphasis on parcels in high opportunity areas. Specifically, the County will be focusing its efforts in the cities of Cupertino, San José and Gilroy for the first half of the 6th Cycle Planning Period to position 3 County-controlled sites for development into affordable, workforce and supportive housing. Examples of this partnership include working closely with the City of Cupertino to ensure the county-controlled site is listed as a housing opportunity site in Cupertino 6th Cycle Housing Element. The sites are summarized below:

Wolfe Road – Cupertino: The County is in control of a 5-acre site in the City of Cupertino to explore the development of affordable, supportive and workforce housing.

Senter Road – San José: The County acquired a 6.2-acre site in the City of San José to explore the development of affordable, supportive and homeownership housing.

East 8th and Alexander – Gilroy: The County and the City of Gilroy are currently exploring the possibility of developing affordable housing on this County-owned site.

Table 4.8: County-Led Housing Development

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • Complete construction of 240 affordable, workforce and supportive housing units for special needs populations by January 2026 through the Grant Avenue Educator Workforce Housing Development, Mitchell Park Place and the Hub Housing Development. <ul style="list-style-type: none"> ○ Construction for the Grant Avenue Educator Workforce Housing started July 2023 ○ Construction for the Mitchell Park Place started February 2024 ○ Construction for the Hub Housing Development started November 2023 • Complete construction on the Distel Circle project in Los Altos by December 2026 which will result in 90 units of affordable and supportive housing in a high opportunity area of the county. OSH is proactively tracking funding opportunities to help the developer fill financing gaps. Most recently on May 21, 2024, the Board approved allocation additional funding that will allow the project to apply for tax credits in August 2024. • Complete construction on the East Santa Clara site in San Jose by 2031 that will result in a three phased development totaling 214 units. The County, through OSH, has selected Eden and the Core Companies to serve as co-developers. OSH worked closely with the development partners and the City of San José to submit an SB 35 streamlining Land Use application for the project. Entitlements are expected to be received through a ministerial process by December 2024. OSH will then return to the Board of Supervisors to pursue approval of any remaining financing commitments needed by the County for the project. • By September 2024, initiate the community engagement process for the County-owned sites in Cupertino, San José, and Gilroy, in partnership with city partners that could yield a minimum of 617 new housing units that would be completed by 2031. <ul style="list-style-type: none"> ○ On February 6, 2024, the Board approved the selection of Eden Housing as the developer for the Cupertino site. One-on-one stakeholder engagement has started, and entitlements are expected to be obtained by January 2025. The Cupertino site is located in a high resources area and may include educator workforce housing, special needs housing, and housing for families. The final target population will be determined by January 2025 when the project is expected to received final land use approvals. OSH worked proactively with the City of Cupertino to list the property on the City’s opportunity sites as part of their 6th cycle housing element update. ○ By June 2024, issue a Request for Offer to select an affordable housing development team for the Senter Road site in San José and the 8th and Alexander site in Gilroy. The Gilroy site will focus on affordable workforce housing for ag workers and homeless families. With all County-led sites, OSH can ensure that the County is addressing the disproportionate housing needs of lower income households of color. • By October 2024, select a development partner for the Gilroy and San José sites. Implementing actions include the issuance of the Request for Offer by June 2024 and convening a panel to review the proposals submitted by August 2024. Negotiate terms with the developer by September 2024. • By March 2025, execute Development and Disposition Agreements with the future selected development partners. • By June 2025, present recommendations to the Board of Supervisors for financing opportunities for the Cupertino, Gilroy, and San José sites.

LEAD AGENCY	Office of Supportive Housing
FUNDING SOURCE	The funding sources vary. For a full list of funding sources used by the County, please refer to Program 1.01.

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none">• HG1-5: Prioritize suitable county-owned underutilized parcels within Cities and Urban Service Areas for affordable, supportive and workforce housing development.• HG1(i) D: Continue consideration of publicly owned lands suitable for the construction of extremely low-income housing and develop a priority of county-owned sites suitable for housing development.• HG3-1: Local funds for housing shall be targeted to households earning less than 30% of the County median income and special needs populations.• HG3(i) B: Continue to use suitably located surplus publicly owned lands for housing affordable to extremely low-, very low-, and low-income households through the sale or lease of such land to a government entity, or to nonprofit or private home builders with appropriate terms and conditions guaranteeing long term affordability.
CONTRIBUTING FACTORS	<ul style="list-style-type: none">• Availability of affordable units in a range of sizes• Lack of access to opportunity due to high housing costs• Location and type of affordable housing• Land use and zoning laws

Program 1.08 - Joint Development Memorandum of Understanding (MOU)

One of the contributing factors to fair housing issues is a lack of regional cooperation. To remove this impediment and accelerate the development of housing, the County developed a strategy that includes partnering with cities and other governmental agencies to achieve our common goals of building more affordable and supportive housing throughout the County. To date the most notable example includes a partnership between the County, the City of Los Altos, and the Midpeninsula Regional Open Space District. Through this partnership the City of Los Altos approved its first 100% affordable housing development which will include 90 new units of deed restricted affordable housing. While each MOU is slightly

different, the County has also teamed up with Destination: Home, which offers cities planning grants to help fill gaps within their teams. By working with cities, the County can leverage resources and work more effectively with affordable housing developers and address community opposition together.

Since 2020, the County has proactively been coordinating with local jurisdictions and other government agencies to develop new ways to partner to achieve common housing goals. The County has set a goal of developing at least one Housing Bond funded development in each of the 15 incorporated cities. As of November 2022, the County is still working with the remaining cities and the Joint Development Memoranda of Understanding is an opportunity to help facilitate those conversations.

Table 4.9: Joint Development Memorandum of Understanding (MOU)

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • By December 2024, wrap up conversations with Palo Alto, Campbell, Cupertino, and/or San José about the possibility of developing housing production strategies that can be memorialized in an MOU. Implementing actions include quarterly check-in meetings to discuss the benefits and possible terms of the MOU. Most importantly, the conversations will be guided by each jurisdiction’s 6th Cycle Housing Element Update. OSH will then pursue approval by each City Council and the Board of Supervisors. Assuming that an MOU is negotiated, OSH would then leverage the work captured under Program 1.01- Supportive Housing Development Fund Notice of Funding Availability to approve funding for the identified sites and projects. • By December 2024, conclude conversation with the Valley Transportation Authority about the possibility of amending the existing cost sharing agreement to add the Housing Sites at Hostetter Station as the fifth partnership site. To achieve this program objective, OSH will identify a potential funding source that can be leveraged in partnership with the VTA and pursue approval by the Board of Supervisors to execute an amendment to the MOU by June 2025. Once the MOU is amended OSH will work with VTA to take the following actions: <ul style="list-style-type: none"> ○ By January 2026, issue a Request for Offer to select a development partner. ○ By March 2026, kick off the community engagement process to solicit input from the community that will inform the design of the affordable and supportive housing project. ○ By December 2026, seek approval from the VTA Board for the final housing development project. ○ By June 2027, seek approval from the Board of Supervisors for additional project financing. ○ By February 2028, submit applications for funding including but not limited to federal and/or state tax credits.
--------------------	--

	<ul style="list-style-type: none"> ○ By November 2028, start construction. ○ By November 2030, complete the project and start operations.

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> ● HG2-1: The County and the cities should work cooperatively to ensure that there is a balanced housing supply sufficient to achieve countywide economic, social, and environmental objectives. Further opportunities for inter-agency, intergovernmental, interregional, and public/private cooperation should be sought out and encouraged. ● HG2(i) A: Maintain intergovernmental agreements to address countywide housing objectives and to ensure an adequate supply of affordable housing countywide.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> ● Availability of affordable units in a range of sizes ● Lack of access to opportunity due to high housing costs ● Lack of affordable, accessible housing in a range of unit sizes ● Lack of affordable, integrated housing for individuals who need supportive services ● Lack of local or regional cooperation ● Land use and zoning laws; Location of accessible housing ● Location and type of affordable housing

Program 1.09 - Housing Trust of Silicon Valley

Housing Trust Silicon Valley (Housing Trust) is a nonprofit Community Development Finance Institution (CDFI) that makes loans to create and preserve affordable rental housing, housing for the homeless and persons with special needs, and provides loans for first-time homebuyers. Housing Trust is a unique public-private partnership created through the collaboration of the Silicon Valley

Leadership Group, County Board of Supervisors, and the County Collaborative on Housing and Homelessness. In response to community need, Housing Trust provides affordable housing opportunities through a variety of programs, including the Multifamily Lending Program and First Time Homebuyer Assistance Programs.

Table 4.10: Housing Trust of Silicon Valley

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> ● On June 27, 2023, the Board approved an amended contract with Housing Trust to continue supportive the County in administering Empower Homebuyer program. This agreement is connected with Program 1.04 - Empower Homebuyers SCC. Together these two programs help the County make homeownership for households who need downpayments assistance. Most recently after receiving feedback from the community and with the increase in interest rates, OSH worked with HTSV to modify program guidelines to remove barriers to entry into the program.
---------------------------	--

	<ul style="list-style-type: none"> • By June 2026, amend existing agreement related to the Supportive Housing Fund to continue to offer below rate predevelopment and/or acquisition loans. <ul style="list-style-type: none"> ○ Schedule meeting with HTSV after June 30, 2025, to evaluate the status of the county’s revolving funds and how much of the funding is obligated in a loan agreement versus how much of the funding has been expended to cover administrative costs. ○ By June 30, 2026, develop recommendations relating to the future of the fund and how to continue leveraging the funding to support the construction of new affordable and supportive housing. ○ By December 2026, OSH will pursue approval from the Board of Supervisors to extend the existing agreement.

Program 1.10 - Santa Clara County CDBG and Housing Coordinators Convenings

Participate and host monthly meetings to discuss topics intended to further the goals of additional affordable and equitable housing. Involvement of the 15 incorporated cities further the regional approach to further housing objectives and address fair housing issues. Primary contributing factors to fair housing issues include community opposition and a lack of regional cooperation. These convenings offer the County and the 15 incorporated cities a forum to collectively discuss issues that include but are not limited to land

use and zoning laws, integrated housing for individuals who need supportive services, and development of local housing strategies that increase access to safe and stable housing.

Historically these convenings have afforded collaboration, support and technical assistance to help expand inclusionary housing and commercial linkage fee policies, coordinating efforts around tenant protection ordinances (i.e., source of income), emergency shelter crisis and joint funding applications. During the 6th cycle Housing Element planning period, the County anticipates a regional approach to implementing goals that various cities have included in their

respective Housing Element update. For instance, the County is currently working with the City San Jose to provide input and feedback on two tenant protection ordinances related to anti-displacement and tenant preferences.

Table 4.11: Santa Clara County CDBG and Housing Coordinators Convenings

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> Over the 2023-2031 period, host monthly meetings and introduce new topics intended to partner and provide technical assistance to the 15 incorporated cities within the county address housing and homelessness concerns. The objective of these convenings is intended to increase regional collaboration and to create a space where local jurisdictions can learn from each other. OSH’s goal is to build a network of city staff that can work collaboratively to achieve a common goal of addressing the needs of the county’s most vulnerable populations and find ways to support each other’s efforts. OSH’s role in these convenings is to provide technical assistance, share funding opportunities, serve as the lead application for new funding opportunities, and increase coordination amongst the cities in the county. Ensured that every eligible city in Santa Clara County (San José, Palo Alto, Mountain View, Sunnyvale, and Milpitas) accesses the Permanent Local Housing Allocation in December 2023. An implementing action includes to continue to serve as the PLHA consortium lead. Currently the County is the consortium lead for the cities of Cupertino, Gilroy, and Santa Clara. To facilitate this partnership, OSH has developed a menu of services consistent with the Santa Clara County PLHA plan priorities. OSH will provide technical assistance to cities interested in pursuing joint funding application. The remaining cities participate directly through the County. Coordinate discussion related to nexus studies, inclusionary housing, and tenant protections. One potential outcome of these conversations may include sharing costs of these studies at the regional level. Work with the Town of Los Gatos and the City of Saratoga to identify at least one affordable housing development in their jurisdiction by December 2025 and/or efforts to address the growing housing insecurity amongst older adults. Work together to develop a robust housing production and preservation strategy. OSH will achieve this objective by meeting with each city to discuss potential sites that are prime for the development of affordable and supportive housing. In addition, OSH will work closely with the cities of Mountain View and San Jose to develop an engagement plan related to the creation of a county-wide preservation strategy by December 2025.

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> HG2-2: Intergovernmental and public and private cooperation shall be encouraged to achieve an adequate supply of affordable housing that meets changing demographic needs in Santa Clara County. HG2(i) A: Maintain intergovernmental agreements to address countywide housing objectives and to ensure an adequate supply of affordable housing countywide. HG2(i) B: Establish and expand intergovernmental processes to more effectively define and achieve local and regional housing objectives. HG4-1: The County should continually review its land use and development procedures for opportunities to remove unnecessary constraints to, and provide new opportunities to fund, the construction of affordable housing.

	<ul style="list-style-type: none"> • HG4(i) A: Identify and utilize a forum for sharing of best practices for removing constraints to housing development.
<p>CONTRIBUTING FACTORS</p>	<ul style="list-style-type: none"> • Lack of access to opportunity due to high housing costs • Lack of local or regional cooperation • Land use and zoning laws • Location and type of affordable housing • Location of employers • Availability of affordable units in a range of sizes • Lack of affordable, accessible housing in a range of unit sizes • Lack of affordable, integrated housing for individuals who need supportive services • Location of accessible housing • Displacement of residents due to economic pressures; • Loss of affordable housing; Private discrimination

Program 1.11 Internal County Coordination of Housing Funds and Services

To end homelessness in our community, we must address its root causes. This program includes coordination with various county departments and agencies to leverage critical housing dollars for the county’s most vulnerable residents. Strategy 1 of the 2020-2025 Community Plan to End Homelessness is focused on addressing the root causes of homelessness through systemic and policy change including any regulatory barriers that prevent people from accessing critical supportive services. This plan sets a five-year goal of reducing new unhoused individuals and families in a given year by 30%. The system we live in has created social, economic, and racial disparities and it will take monumental shifts in policies and priorities to make effective change. While eliminating these disparities across our community will take more than the five years covered by the Community Plan, we can make substantial progress towards this important goal by implementing the strategies below, which are

targeted to address the entrenched economic and societal causes of homelessness through transformational systemic and policy change.

Examples of the implementing programs under the Community Plan and subject to internal County coordination include but are not limited to the following:

- Permanent Supportive Housing for Public Safety and Justice: Through programming coordinated by the County of Santa Clara Behavioral Health Services Department, the County seeks to interrupt the complex feedback loop between homelessness and incarceration by connecting high-needs incarcerated individuals who would otherwise exit to homelessness without permanent supportive housing. The program employs a range of medical, behavioral health, and housing-related supports to reduce the rate of incarceration of individuals with serious mental illness and to address the social and health factors that can lead to further involvement with the justice system. This program serves 90 individuals annually with serious mental illness and a history of chronic

homelessness who would otherwise exit jail to the streets or emergency shelters.

- **Rapid Rehousing for Public Safety and Justice:** In partnership with the County of Santa Clara Office of Reentry Services, the County of Santa Clara Office of Supportive Housing offers a rapid rehousing program to address a significant risk factor for long-term homelessness in Santa Clara County by providing much needed linkages to housing and case management for persons experiencing homelessness who are reentering society after involvement with the criminal justice system. This includes leveraging AB 109 funds.
- **Bringing Families Home:** A common challenge among families involved in the child welfare system is the issue of housing instability. To be considered for family reunification, parents must be able to provide a safe and stable, though not necessarily long-term or permanent, living environment for the child. Temporary living arrangements, such as emergency shelters, transitional housing, and staying with friends and family, often cannot provide the type of stability that the child welfare system requires. This instability has

been shown to cause stress within families, which can persist for at least six months following reunification, and can increase the risk factors resulting in reentry to the child welfare system. In Santa Clara County, the Bringing Families Home program, a partnership between the Office of Supportive Housing and the Department of Family and Children Services, addresses these risk factors by providing stable housing to promote family reunification.

- Funded through a state legislative initiative targeted to families with connections to child welfare, the program provides rapid rehousing, including a rental subsidy and housing location services, to families at any point in the reunification process. This includes families with a child currently placed out of the home or families who have recently reunified who may be precariously housed, to assist them in achieving housing stability faster, exiting the child welfare system more quickly, and preventing re-entry.

Table 4.12: Internal County Coordination of Housing Funds and Services

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • Serve 1,000 justice involved people annually receiving housing assistance services through a partnership with the Office of Diversion and Reentry Services at the Reentry Resource Center. These programs include the Rapid Rehousing Exceptions Program and the Emergency Assistance Program. The County has an agreement with HomeFirst Services. In calendar year 2023, the program served 342 reentry clients with Emergency Financial Assistance. • Serve 250 households annually through the Wellness and Housing Stabilization Program in partnership with the Behavioral Health Services Department. This program is intended to serve households receiving specialty mental health services who are at imminent risk of becoming homeless. <ul style="list-style-type: none"> ○ On August 15, 2023, the Board approved a contract with Abode Services relating to providing homelessness prevention services for 235 individuals and families who are at risk of homelessness and currently enrolled in specialty mental health services. OSH will seek approval of the continuation of this program on an annual basis as part of the County's budget process.
--------------------	---

	<ul style="list-style-type: none"> Over the 2023-2031 period, attend monthly meetings with various County Departments to coordinate the programming of new housing funds and services. The purpose of these meetings is to continue to establish shared goals that are consistent with the Board’s priorities to address the disproportionate housing needs of ELI and VLI households of color. Annually report to the Board of Supervisors on the progress of these efforts. Identify primary points of contacts for each program. Given staff turnover, OSH will update contact information for each program on an annual basis to ensure continuity of the program without any disruption. This again is intended to remove governmental constraints that can limit access to housing and critical safety net services. Continue to provide education and training material to County departments about how to access housing services for homeless individuals and families including those at risk of becoming homeless. Remove regulatory barriers to providing housing and supportive services for persons with disabilities. through implementation of the CalAIM ECM and Community Supports By August 2024, negotiate amendments with the Managed Care Plans for Round 2 of one time Housing and Homelessness Incentive Program funds.

Program 1.12 - Coordinate with Bay Area Housing Finance Authority

The Bay Area Housing Finance Authority (BAHFA) is the first regional housing finance authority in California. Established by California State Legislature AB 1487 (2019, Chiu) to support the production and preservation of affordable housing by placing new revenue options on the ballot, BAHFA has the potential to raise hundreds of millions of dollars to help address affordable housing and housing stability in the Bay Area. One of the contributing factors to fair housing issues in

Santa Clara County includes a loss of affordable housing and lack of financial resources to support the preservation of existing housing. This program is intended to position the County to participate in regional discussions. The County will continue to provide information to BAHFA as it relates to the County’s housing development pipeline and lessons learned in the implementation of the 2016 “Measure A” Affordable Housing Bond and will participate in regional discussions about housing needs.

Table 4.13: Coordinate with Bay Area Housing Finance Authority

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • Participate in BAHFA convenings related to future ballot measures that would increase available resources for the production and preservation of housing. • Seek endorsement of the BAHFA Regional Housing Bond by the Board of Supervisors by September 2024 and develop an expenditure plan by February 2025. <ul style="list-style-type: none"> ○ Convene at least one community engagement meeting in each supervisorial district in partnership with the cities within the district. ○ Leverage Program 1.10 - Santa Clara County CDBG and Housing Coordinators Convenings to prioritize projects that serve ELI and VLI households who are severely cost burdened and at risk of displacement due to gentrification. • Bi-annually provide an updated housing development pipeline for Santa Clara County.

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG3-1: Local funds for housing shall be targeted to households earning less than 30% of the county median income and special needs populations. • HG3(i)A: Participate in intergovernmental efforts to secure federal and state legislation which will ensure adequate funding for, and other incentives, for the construction and preservation of extremely low-, low-and moderate-income ownership and rental housing. • HG6-1: Encourage the development of affordable housing that is suitable for a variety of special needs populations. • HG6(i) A: Seek expanded state and federal programs and funding to assist local government in developing special needs housing not provided through the private market.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Access to financial services • Loss of affordable housing

Program 1.13 - Supportive Housing and Innovation Fund

Established in 2018 with a \$50 million gift from Cisco, the Supportive Housing and Innovation Fund provides the private sector with a means to strategically partner with local government, leverage public funding, and share in a joint approach towards ending homelessness in our community. In late 2019, Apple also announced a \$50 million contribution to the fund. The Office of Supportive Housing works in

partnership with Destination: Home to implement the “Supportive & ELI Housing Development” program by vetting development proposals early and often to ensure that development proposals are being planned consistent with the County’s supportive and affordable housing production goals. Through this partnership the County has an opportunity to incentivize the development of affordable and supportive housing in high opportunity areas.

Table 4.14: Supportive Housing and Innovation Fund

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • In March 2023, provided Destination: Home with a list of eligible housing sites they will consider for funding. The housing sites are consistent with Program 1.01- Supportive Housing Development Fund Notice of Funding Availability (SHDF NOFA). • In September 2023, identified new funding applications for housing sites identified in partnership with Destination Home. Continue to provide housing development pipeline information and early input to developers seeking funding through the Supportive Housing and Innovation Fund on a quarterly basis. • Work with Destination: Home to raise \$25M in private philanthropy funding by 2026. <ul style="list-style-type: none"> ○ Destination Home will meet with at least four private philanthropic partners to raise private funding to supplemental local government funding. OSH will provide data and information about the Countywide housing development pipeline to demonstrate the use of the funds to support the construction of affordable and supportive housing.

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG3-1: Local funds for housing shall be targeted to households earning less than 30% of the county median income and special needs populations. • HG3(i) A: Participate in intergovernmental efforts to secure federal and state legislation which will ensure adequate funding for, and tax and other incentives for, the construction and preservation of extremely low-, low- and moderate-income ownership and rental housing.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Availability of affordable units in a range of sizes • Lack of access to opportunity due to high housing costs • Location and type of affordable housing • Loss of affordable housing

Program 1.14 - Fair Housing Assistance Program

Community input received through the planning process for, identified priority needs, and five-year goals established in the 2020-2025 Urban County Consolidated Plan drive how the County will allocate its federal CDBG public service funding. Community engagement through this planning process made it clear that fair housing is a priority need in the Urban County (i.e., Campbell, Los Altos, Los Altos Hills, Los Gatos, Monte Sereno, Morgan Hill, Saratoga, and the unincorporated areas of the County, including those in San José). As such, the County prioritizes fair housing education and services to help lower-income families and individuals in the Urban County to obtain and keep their housing and redress fair housing claims.

The County will utilize its CDBG public service funding to enable a community-based organization to provide tenant-landlord and fair housing services to Urban County residents. These services will include three key types of programs: education for community members and service providers; investigation of fair housing violation claims; and advocacy on behalf of lower-income, special needs, and disabled community members so they may obtain disability-related accommodations, preserve their housing subsidies, and/or resolve disputes to obtain new or keep their existing housing. The Fair Housing Assistance Program will also provide a forum for local governments and community-based organizations to share information about new and proposed tenant protections and programs that further fair housing.

Table 4.15: Fair Housing Assistance Program

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • Annually pursue approval by the Board of Supervisors to allocate CDBG funding to service provider Project Sentinel to enable it to assist Urban County residents by providing the following: <ul style="list-style-type: none"> ○ Serve a minimum of 67 lower-income persons with fair housing complaint investigation, information and referral, and/or advocacy services and 50 community members through outreach and education. • Between the summer of 2024 and spring of 2025, engage community members and community-based organizations through the 2025-2030 Consolidated Planning process about priority needs; evaluate CDBG public service allocations; and incorporate modifications to this program as needed. • On an annual basis have a service agreement in place each July to enable the community-based organization to provide this program’s specified services. Action to achieve this goal include completion of a competitive procurement process by Fall 2024 for a new five-year agreement that would start July 1, 2025 (FY 2026). • Over the 2023-2031 period, meet on a quarterly basis with the community-based organization awarded the service agreement to review and, if necessary, collaborate to amend their community engagement and client services plans to help ensure that they achieve service agreement deliverables. • Over the 2023-2031 period, host meetings and meet on a quarterly basis with other local governments and community-based organizations, including non-profit legal services providers, to share information about fair housing and other tenant protections and programs that help lower-income tenants obtain and keep housing. •

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG5-1: The County shall continue its work to enforce laws and foster policies and programs aimed towards preventing discrimination against people of protected status under federal and state law. • HG5-2: Fair housing services shall be available in all parts of the county. • HG5(i) B: Fair housing services shall continue to offer standardized protection and outreach services throughout the county. • HG5(i) C: Fair housing services provided shall be respectful of language, culture, and special needs. • HG5(i) D: Continue to support organizations active in ensuring the rights of all persons to obtain and retain housing.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Access to transportation for persons with disabilities • Availability, type, frequency, and reliability of public transportation • Lack of access to opportunity due to high housing costs • Displacement of residents due to economic pressures

Program 1.15 - Fair Housing Audit & Education Program

Fair Housing audits are conducted regularly by Project Sentinel, a long-standing fair housing organization serving Santa Clara County residents, to monitor the presence and prevalence of housing discrimination based upon protected classes under both Federal and State fair housing laws.

Project Sentinel’s Civil Rights Investigation Coordinators train testers in all classes of fair housing protection and design specific tests to conduct audits. Testers are dispatched to residential sites and conduct phone inquiries about available units, posing as home seekers of different protected classes to uncover disparate treatment. Audit results from tests performed help to determine whether a property provider is discriminating against a certain group of people, such as people with disabilities who use service animals. They can also help to determine if new multi-family housing meets accessibility standards, or if families with children are denied housing opportunities in contravention of fair housing and other tenant protection laws.

Audit results are then used to evaluate and/or address claims of fair housing and tenant protection violations, as well as shape outreach-education campaigns. Social media campaigns, flyers, brochures, and educational presentations and workshops are formulated to address forms of housing discrimination. The education of property owners and property managers, along with residents, is key to elevating awareness about fair housing protections to remedy housing discrimination.

This program, as well as the previous one (program 1.14, Fair Housing Assistance Program), serve many special needs populations, including people with disabilities, veterans, victims of domestic violence, immigrants, seniors, and those with criminal histories. This program’s outcomes compliments and informs Program 1.14 activities, including community engagement.

The County does not currently fund this Project Sentinel program. Through the Urban County’s 2025-2030 Consolidated Planning process, the County will engage community members and community-based organizations to learn if this program is a priority need and, if it is so identified, pursue monetary and non-monetary resources to support this program

Table 4.16: Fair Housing Audit & Education Program

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • Project Sentinel will train testers, conduct audits, design effective outreach campaigns, and educate residents, housing providers and property managers about fair housing protections. • Project Sentinel will represent, and/or coordinate experienced legal representation of, bona fide plaintiffs where investigation has produced evidence of a meritorious fair housing case. • During 2023-2031, this program will conduct 32 audits, work on 48 cases, provide education material to 450 people, and assist with or file 3 enforcement cases when warranted by evidence of discrimination. • During community engagement for the Urban County’s 2025-2030 Consolidated Plan, the County will engage with community members about whether the work under this program is a priority need in the Urban County.
--------------------	---

	<ul style="list-style-type: none"> • If identified as a priority need during the 2025-2030 Consolidated Planning process, the County will pursue state and federal funding and non-monetary resources to support this program. • .

Program 1.16 – Collaborate with the Santa Clara County Housing Authority (SCCHA)

The Santa Clara County Housing Authority (SCCHA) was established by the County Board of Supervisors to administer a federal rent subsidy program administered under the Federal Housing Act of 1937. SCCHA’s mission is to provide and inspire affordable housing solutions to enable low-income people in Santa Clara County to achieve financial stability and self-reliance. SCCHA has constructed, rehabilitated, and/or served as developer for over 30 affordable housing developments. SCCHA currently owns 31 housing projects serving families, seniors, persons with disabilities, and the homeless within the county.

As a Moving to Work (MTW) demonstration agency, SCCHA also strives to meet the following three MTW statutory goals established by Congress:

- Decrease administrative costs and increase cost effectiveness in housing program operations,
- Promote participants’ economic self-sufficiency, and
- Expand participants’ housing choices.

SCCHA utilized its MTW flexibility to facilitate expansion and improve program efficiencies, such as streamlining the Section 8 Project Based Voucher Program (PBV) competitive process and raising the maximum share of units that can be project-based, from 20% to 40% of SCCHA’s total authorized units. The PBV is a component of the Housing Choice Voucher Program (HCV). SCCHA may allocate up to 40% of its voucher assistance authority to specific housing units. In

the Project Based Voucher (PBV) program, rental subsidies are attached to contracted units for a period of typically 20 years. Eligible low-income tenants typically pay about one third of their monthly income for rent.

SCCHA’s designation as an MTW demonstration agency has afforded our community the opportunity to establish a preference for chronically homeless individuals and families. One of the County’s housing priorities is to increase supportive housing for chronically homeless and other special needs populations. In order to be successful, special needs populations require that affordable housing and ongoing support services be provided in a coordinated manner. While the County and its partners should support increasing affordable housing for all residents, special needs populations (e.g., extremely low-income seniors, extremely low-income individuals with a serious mental illness, and chronically homeless persons) will likely access supportive housing only through carefully planned programs.

In 2011, SCCHA established the Chronically Homeless Direct Referral Program (CHDR) and allocated 200 Section 8 Housing Choice Vouchers to CHDR. In 2012, SCCHA allocated an additional 100 vouchers to CHDR, and in 2016 it allocated an additional 500 vouchers to CHDR. Today, this partnership includes a Special Needs Direct Referral program and a streamlined procurement process in alignment with the County’s Supportive Housing Development Fund Notice of Funding Availability (SHDF NOFA) (Program 1.01). Most recently the SCCHA has been focused on exploring a combination of placed based investments and mobility programs.

Table 4.17: Collaborate with the Santa Clara County Housing Authority (SCCHA)

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • Over the 2023-2031 period, participate in monthly Section 8 coordination and operation meetings with SCCHA and the City of San José’s Housing Department to address barriers that voucher holders experience, streamline the lease up process, and explore policy changes that increase
--------------------	---

	<p>housing choice in high resources areas of the county. The purpose of these meetings is to ensure that households who are severely cost burdened are being connected to housing opportunities.</p> <ul style="list-style-type: none"> • In December 2023, developed a strategic spending plan for future rental subsidies and housing production pipeline consistent with the negotiated Memorandum of Understanding between the County and SCCHA. OSH and SCCHA in partnership with Destination Home and other key stakeholders will seek approval from the U.S. Department of Housing and Urban Development for a new 2025 – 2026 Move to Work Activity that will allow SCCHA to launch a new shallow subsidy program targeting ELI and VLI households who are cost burdened in existing affordable housing developments. The intent of the program is to ensure that households are not paying more than 30% of their income but that the development has enough funding to operate decent and stable housing. • Work with SCCHA on the development of a Mobility Program in alignment with HUD’s Mobility Demonstration Program that will be submitted to HUD in June 2024 with implementation beginning in January 2025. Because lower income households face greater instances of housing insecurity, this strategy is intended to better leverage rental subsidies to give families the opportunity to live in healthier communities with greater access to education and employment.
GEOGRAPHIC SERVICE AREA	Countywide

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG2-1: The County and the cities should work cooperatively to ensure that there is a balanced housing supply sufficient to achieve countywide economic, social, and environmental objectives. Further opportunities for inter-agency, intergovernmental, interregional, and public/private cooperation should be sought out and encouraged. • HG2(i) A: Maintain intergovernmental agreements to address countywide housing objectives and to ensure an adequate supply of affordable housing countywide. • HG3-1: Local funds for housing shall be targeted to households earning less than 30% of the County median income and special needs populations. • HG3(i) A: Participate in intergovernmental efforts to secure Federal and State legislation which will ensure adequate funding for, and tax and other incentives for, the construction and preservation of extremely low-, very low-, low- and moderate-income ownership and rental housing. • HG3(i) B: Consider using suitably located surplus publicly owned lands for housing affordable to extremely low-, very –low-, and low-income households through the sale or lease of such land to a government entity, or to nonprofit or private home builders with appropriate terms and conditions guaranteeing long term affordability. • HG6-1: Encourage the development of affordable housing which is suitable for a variety of special needs populations. • HG6(i) A: Advocate for the expansion of Federal and State programs and funding to assist local government in developing special needs housing not provided through the private market.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Access to publicly supported housing for persons with disabilities • Impediments to mobility • Lack of affordable, integrated housing for individuals who need supportive services • Lack of access to opportunity due to high housing costs • Lack of affordable, accessible housing in a range of unit sizes

Program 1.17 - Permanent Supportive Housing for Persons with a Serious Mental Illness

The current capacity levels for the Behavioral Health Services Department (BHSD) intensive outpatient programs (e.g., FSP, IFSP, etc.) can be used as an initial estimate of need for permanent supportive housing (PSH) program “slots.” Across all BHSD divisions, intensive outpatient programs have the capacity to serve about 1,700 individuals or households per year. BHSD and contractors estimate that about 90% of intensive outpatient program participants were homeless when referred to the program, had recently experienced homelessness, or have experienced multiple episodes of homelessness in their lives.

BHSD’s goal is to provide 1,500 units of PSH over the next two and a half years. This strategy goal is consistent with the needs of intensive outpatient program participants, could reduce unnecessary utilization and management of temporary shelter and treatment programs and improve health outcomes for program participants,

and aligns with the 2020-2025 Community Plan to End Homelessness. Some PSH capacity will be met by leasing existing housing units, while others will be met by developing new housing units. Housing units include apartments, shared single-family residences, and semi-congregate settings. Since licensed residential care facilities (RCFs) serve a subset of individuals who need PSH, RCFs are separated from other housing units. BHSD estimates that approximately 20% of PSH clients would need an RCF.

Of the 1,500 PSH units needed, the Administration has developed the following goals:

- Expand tenant based rental assistance programs to serve an additional 785 individuals or households;
- Construct at least 219 apartments that will be used as PSH for persons with a serious mental illness; and
- Develop or support the development of RCFs that will increase the system capacity by 171 beds.

Table 4.18: Permanent Supportive Housing for Persons with a Serious Mental Illness

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • By June 2024, enter into an agreement with a rental subsidy provider to expand tenant based rental assistance programs to serve an additional 785 individuals or households. • OSH will work closely with the County Administration and the Behavioral Health Services Department to understand the implementing actions of Proposition 1 which combine SB 326 (changes to the Mental Health Services Act) and AB 532 (The Behavioral Health Infrastructure Bond Act of 2023). By gaining a better understanding of the changes, OSH will be better prepared to identify funding opportunities that will yield additional PSH units for persons with a serious mental illness and the critical services needed to remain housed.

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG1-5: Prioritize suitable county-owned underutilized parcels within Cities and Urban Service Areas for affordable, supportive and workforce housing development. • HG1(i) D: Continue consideration of publicly owned lands suitable for the construction of extremely low-income housing and develop a priority of county-owned sites suitable for housing development. • HG6-1: Encourage the development of affordable housing which is suitable for a variety of special needs populations. • HG6(i) A: Seek expanded Federal and State programs and funding to assist local governments in developing special needs housing not provided through the private market.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • State or local laws, policies, or practices that discourage individuals with disabilities from living in apartments, family homes, supportive housing and other integrated settings • Lack of affordable, integrated housing for individuals who need supportive services • Access to publicly supported housing for persons with disabilities

Program 1.18 - Tenant/Landlord Dispute Resolution Services

Community engagement for the 2020-2025 Urban County Consolidated Plan identified vital legal services and homelessness prevention as priority needs in the Urban County. In light of this, the County prioritizes CDBG public services funding for programs, including the Tenant-Landlord Services program, that address these needs in the Urban County (i.e., Campbell, Los Altos, Los Altos Hills, Los Gatos, Monte Sereno, Morgan Hill, Saratoga, and the unincorporated areas of the County, including those in San José).

The County currently funds Project Sentinel to provide services to Urban County residents through the Tenant Landlord Dispute Resolution Services program. This program helps lower-income families and individuals by providing them with information and referral, housing-related education and counseling services, and dispute resolution services that seek to prevent tenant displacement and homelessness. Specific services to be provided include the following:

- Providing information and referral services to approximately 600 callers on an annual basis.

- Opening and processing approximately 74 cases on an annual basis.
- Providing housing-related education and counseling, intervention, and dispute resolution to improve quality of life and prevent homelessness.
- Maintaining housing stability for individuals/families at risk of homelessness/eviction by intervening in disputes and helping negotiate a resolution.
- Empowering people through education and counseling to advocate on behalf of themselves.
- Educating tenants and housing providers to understand housing law.
- Intervening with lending institutions to assist households to avoid foreclosure.
- Working with housing industry groups to educate owners and managers on their obligations under fair housing and other tenant protection laws.

Services are provided to the following communities: Campbell, Los Gatos, Saratoga, Monte Sereno, Morgan Hill, and unincorporated San José areas.

Table 4.19: Tenant/Landlord Dispute Resolution Services

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • Annually, through FY 2025, and consistent with Board of Supervisors’ direction, allocate CDBG public service funds to service provider Project Sentinel to enable it to assist Urban County residents by: serving at least 600 people through information and referral and 74 lower-income persons through tenant-landlord services cases/casework (e.g., education and counseling intervention and dispute resolution) to reduce displacement and homelessness. • Between the summer of 2024 and spring of 2025, engage community members and community-based organizations through the Urban County’s 2025-2030 Consolidated Planning process about priority needs; evaluate CDBG public service allocations; and incorporate modifications to this program as needed. • On an annual basis have a service agreement in place each July to enable the community-based organization to provide this program’s specified services. • Over the 2023-2031 period, meet on a quarterly basis with the community-based organization awarded the service agreement to review and, if necessary, collaborate to amend their community engagement and client services plans to help ensure that they achieve service agreement deliverables. • Over the 2023-2031 period, host meetings and meet on a quarterly basis with other local governments and community-based organizations, including non-profit legal services providers, to share information about fair housing and other tenant protections and programs that help lower-income tenants obtain and keep housing. •

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG5-3: The rights of tenants and landlords shall be recognized and protected, and opportunities for mediation of disputes shall be provided. • HG5(j) E: Maintain tenant/landlord dispute mediation services in all areas of the county.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Displacement of residents due to economic pressures

Program 1.19 - Eviction Diversion Program

The Eviction Diversion program is a collaboration between the County of Santa Clara; the City of San José and other cities in the

county; community-based organizations, like Sacred Heart Community Services and Destination: Home; non-profit mediation services and legal services providers; and the Santa Clara County

Superior Court to help community members at-risk of homelessness preserve their existing housing or transition to alternate housing opportunities. The goal of the program is to help tenants secure resources (e.g., case management, rental and other assistance resources, legal assistance, etc.), and help tenants and landlords access dispute resolution assistance, to prevent homelessness or help tenants transition to other housing opportunities. One of the County’s goals and strategies to affirmatively furthering fair housing includes collaboratively working with the Santa Clara County Superior Court and other partners to facilitate access to resources for vulnerable tenants engaged in eviction provisions.

The Eviction Diversion Program workshops coincide with the Superior Court’s unlawful detainer (eviction) calendar. Through these workshops, tenants are connected with resources (e.g., case management, rental and other assistance resources, legal assistance, etc.) to help them respond to and address landlords’ claims for back-rent owed and lack of compliance with rental rules. Tenants and landlords are also connected to dispute resolution assistance to aid these parties in developing workable solutions (e.g., payment plan for owed rent, unit repairs, etc.) that help keep tenants housed or transition to alternate housing opportunities. Through the Eviction Diversion program, cities and service providers meet on a monthly basis to provide eviction diversion and other resource updates and share best practices.

Table 4.20: Eviction Diversion Program

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • In January 2023, launched program to support the disproportionate housing needs of households at greatest risk of housing insecurity. • In June 2023, provided assistance to 60 households and complete first phase of the program. • By June 2025, secure additional funding to initiate a continuation of the program to serve 50 households a year. Implementing actions include seeking funding as part of the County’s Fiscal Year 2025 – 2026 Budget process.

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG5-4: Reduce displacement of low-income household tenants and increase tenant protections prior to evictions proceedings. • HG5(i) D: Continue to support organizations active in ensuring the rights of all persons to obtain and retain housing.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Displacement of residents due to economic pressures • Private discrimination

Program 1.20 - San Andreas Regional Center

The San Andreas Regional Center (SARC) is a community-based, private nonprofit corporation that is funded by the State of California

to serve individuals with an intellectual and development disability (I/DD) as required by the Lanterman Developmental Disabilities Act. SARC serves residents in four counties, including Santa Clara County,

and provides comprehensive support services, such as: case management, supported living or independent living, health and clinical supports, adaptive equipment and environmental modifications, day activities, and vocational services and supports. On Jun 15, 2020, the County and SARC entered a Memorandum of Understanding (MOU) to further coordinate funding and onsite services to help individuals obtain and retain permanent housing. The MOU with SARC describes each organization’s respective roles and responsibilities relating to: a) helping OSH clients experiencing homeless or who formerly experienced homelessness and who have

reported an I/DD to access SARC’s services; b) helping SARC’s clients who are experiencing or are at-risk of homelessness to access supportive housing or homelessness prevention services; and c) ensuring that individuals or families who move into County-funded housing units for individuals with an I/DD receive the services they need to obtain and maintain their housing, and live as independently as possible. One of the contributing factors to fair housing issues is access to publicly supported housing for persons with disabilities. This partnership aims to remove housing barriers and provide households with access to affordable, integrated housing.

Table 4.21: San Andreas Regional Center

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • By July 2024, convene a debriefing session with SARC and Alta Housing about the lease up process for Wilton Court in Palo Alto. • By July 2025, revisit SARC MOU to develop an annual report that summarizes the services delivered through the MOU and additional services provided to Santa Clara County residents. • Construct approximately 55 dedicated affordable housing units for persons with an intellectual and development disability by 2029. <ul style="list-style-type: none"> ○ Over the 2023-2031 period, quarterly track progress of the projects approved by the Board of Supervisors as part of this partnership to ensure construction is completed.

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG5-5: Identify and increase access to services and other opportunities for residents of historically disinvested low-income communities (R/ECAPs and Burdened Households) across unincorporated county. • HG5(i) C: Fair housing services provided shall be respectful of language, culture, and special needs. • HG6-2: An adequate supply of affordable housing suitable for individuals at all stages of life should be available in every community. • HG6(i) B: Develop and implement policies and ordinances that create housing that is adaptable to the needs of physically, developmentally, and emotionally challenged persons.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Access to publicly supported housing for persons with disabilities • Lack of affordable, integrated housing for individuals who need supportive services • Regulatory barriers to providing housing and supportive services for persons with disabilities • State or local laws, policies, or practices that discourage individuals with disabilities from living in apartments, family homes, supportive housing and other integrated settings

Program 1.21 – Homelessness Prevention System

As a component of the Supportive Housing System, the Homelessness Prevention System pilot brings together a network of community partners to provide flexible financial assistance and resources for households in crisis, channeling support to families and individuals most at risk of losing their housing and preventing them from entering the homeless system. Under the leadership and coordination of Destination: Home, the Homelessness Prevention System pilot re-envisioned the community’s approach to preventing homelessness. In Year 1, the annual budget was \$1.6M and helped serve 215 households. In Year 6, the annual budget is \$16.9M and the system has the capacity to serve 1,600 households. Over the past five years, the HPS Pilot has served 12,367 individuals from 4,455 households at imminent risk of homelessness.

This pilot program streamlines access to essential resources for families in crisis, targets resources to those most at risk of homelessness, and uses data to measure the collective impact of the prevention system. The agencies participating in the Homelessness Prevention System pilot use a standard assessment tool to target resources to households with the highest risk of homelessness. The use of a single intake assessment allows the system to better identify which households are most likely to experience homelessness, and to prevent it. As a coordinated system with standardized data collection requirements, the Homelessness Prevention System pilot will provide a rich source of information about the nature of housing crises in Santa Clara County and which tools are most effective at permanently stabilizing housing for at-risk families.

Table 4.22: Homelessness Prevention System

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • In March 2023, amended the existing contract to add additional funding to support more families in need. • In July 2023, increased system capacity to serve 1,700 households. It is estimated that a total of 13,600 households will be assisted during between 2023 and 2031. • Issued a Joint Request for Proposals in January 2024 to select a system administrator and network partners. • In May 2024, received approval from the Board of Supervisors to continue the program to serve households with housing insecurity who are at risk of becoming homeless. • By July 2024, launch new County-led Homelessness Prevention System with the capacity to serve 2,500 households by combining efforts into one overarching prevention strategy • Over the 2023-2031 period, annually work with Destination Home to host quarterly investor briefing sessions to secure additional resources for all homelessness prevention programs.

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG7-1: Expand homelessness prevention programs to support individuals and families most at risk of becoming homeless. • HG7(i) A: Transition the Homelessness Prevention System Pilot into an ongoing housing intervention within the Supportive Housing System and continue to secure public and private funding to provide assistance to 2,500 households annually.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Displacement of residents due to economic pressures

Program 1.22 – Emergency Assistance Network

The Emergency Assistance Network (EAN) agencies in Santa Clara County provide eligible households with emergency financial assistance in order to prevent homelessness. Eligible households include those who are at imminent risk of becoming homeless and have income below 50% of Area Median Income, those who have not received emergency financial assistance in the previous 12 months, and households who have sufficient household income to maintain

housing after receiving emergency financial assistance. In addition to financial assistance, the EAN provides emergency aid for rent, food, work-related transportation, medical expenses, or utilities. The EAN plays a critical role in providing low-income individuals and families with emergency funds to pay for rent, utilities, and other housing costs to prevent homelessness. In addition, households are connected to other service providers that can help individuals and families on the path toward self-sufficiency.

Table 4.23: Emergency Assistance Network

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • In March 2023, amended existing contracts to increase funding and issue Request for Proposals as required by the County for contracts that exceed a 5-year term. • In June 2023, made recommendations to the Board of Supervisors. • In July 2023, launched new five-year contracts serving up to 1,840 households annually. • In June 2024, approved agreements with the EAN’s to serve households in Fiscal Year 2024-2025. While the funding to support these programs is ongoing, OSH will seek annual approval from the Board of Supervisors to formally approve annual agreements with the EANs.

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • Policy HG7-1: Expand homelessness prevention programs to support individuals and families most at risk of becoming homeless. • HG7(i) A: Transition the Homelessness Prevention System Pilot into an ongoing housing intervention within the Supportive Housing System and continue to secure public and private funding to provide assistance to 2,500 households annually.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Access to financial services • Displacement of residents due to economic pressures

Program 1.23 – City Revenue Agreements

In order to expand the capacity of the Supportive Housing System, the County has pooled resources from various cities. These partnerships increase efficiency and reduce the duplication of services throughout the county. The funded services continue to

prevent and reduce homelessness throughout Santa Clara County. The programs supported by these revenue funding sources are aligned with the goals of the 2020-2025 Community Plan to End Homelessness and promote racial equity in homeless services by increasing the availability of community-based supportive services throughout the County.

Table 4.24: City Revenue Agreements

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • In May 2023, presented cities with a menu of options of services they can fund. • By September 2023, finalized list of services for each housing intervention type. • By December 2023, received confirmation from interested cities. • In the first half of 2024, presented funding recommendations through the County's budget process. • By July 2024, begin to administer expanded programs. • Starting in July 2023, provide supportive services for 180 chronically homeless households from San José. Assuming funding continues annually through 2031, this Revenue Agreement with the City of San José would serve 1,620 chronically homeless households from San José. Implementing actions include seeking approval from the San José City Council as part of their annual budget approval process and subsequent approval from the County Board of Supervisors. These actions will continue annually through 2031. • Starting in July 2023, serve 400 homeless households from San José through a centralized hotline for individuals and families seeking shelter services or shelter diversion services. Assuming funding continues annually through 2031, this Revenue Agreement with the City of San José would serve 3,600 homeless households from San José. Implementing actions include seeking approval from the San José City Council as part of their annual budget approval process and subsequent approval from the County Board of Supervisors. These actions will continue annually through 2031. • Starting in July 2023, serve 20 households from the City of Santa Clara and 20 households from the City of Mountain View with permanent supportive housing services and rental assistance. Assuming funding continues annually through 2031, these Revenue Agreements with the cities of Santa Clara and Mountain View would serve 360 households. Implementing actions include seeking approval from the San José City Council as part of their annual budget approval process and subsequent approval from the County Board of Supervisors. These actions will continue annually through 2031. • Starting in July 2023, serve 133 vehicle dwellers from the City of Mountain View by providing homeless households a temporary, overnight, safe location to park, as well as case management support. Assuming funding continues annually through 2031, this Revenue Agreement with Mountain View would serve 1,197 vehicle dwellers. Implementing actions include seeking approval from the San José City Council as part of their annual budget approval process and subsequent approval from the County Board of Supervisors. These actions will continue annually through 2031.

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG7-2: Expand supportive housing programs, including permanent supportive housing and rapid rehousing programs. • HG7(i) B: Continue to collaborate with affordable housing developers, non-profit agencies, county departments, local and regional partners to expand the capacity of the supportive housing system.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Lack of affordable in-home or community-based supportive services

Program 1.24 - Community Plan to End Homelessness

The 2020-2025 Community Plan to End Homelessness will serve as our roadmap for ending homelessness in Santa Clara County and is organized around three main strategies: (1) Address the root causes of homelessness through system and policy change, (2) Expand homelessness prevention and housing programs to meet the need, and (3) Improve quality of life for unsheltered individuals and create healthy neighborhoods for all. The strategies included in this plan are grounded in evidence-based practices, lessons learned over the past five years, and robust conversations and input from more than 8,000 members of our community, including people with lived experience of homelessness, subject matter experts, key stakeholders, and community members. In addition, this plan sets aggressive targets designed to reverse the current growth in homelessness we are experiencing and bring us one step closer to our collective goal of eliminating homelessness in our community.

The plan’s focused goals are: (1) house 20,000 people through the supportive housing system, (2) achieve a 30% reduction in the annual inflow of people becoming homeless, (3) double temporary housing and shelter capacity to reduce the number of people sleeping outside, and (4) expand the Homelessness Prevention System and other early interventions to serve 2,500 households per year. The first two strategies of the plan seek to end and prevent homelessness for as many people as possible over the next five years. However, the

reality is that many people will remain unhoused due to an extreme housing crisis and increasing income inequality. To address this immediate crisis in our community and ensure healthy neighborhoods for all, we must begin by doubling our temporary housing and shelter capacity to serve 2,000 additional households each night; increase investment in health, safety, and other basic services to better meet the needs of people living in unsheltered conditions; and build connections to housing programs and safety net services offered throughout the county.

Implementation of the strategies in the Community Plan to End Homelessness will raise the voices of people with lived experience and share power with our unhoused and recently-housed neighbors. We will focus on policies and programs that reduce racial inequity, in an effort to reverse the disproportionately high rates of people of color who are unhoused. The County through its administration of Homeless Housing, Assistance and Prevention (HHAP) Rounds 3 and 4 funding have set various goals related to *“Underserved Populations and Populations Disproportionately Impacted by Homelessness” that are connected to each of the HHAP goals.*

The focus of this program is to report outcomes for the implementing programs that help the County and overall community meet the goals of the 2020-2025 Community Plan to End Homelessness. For instance, one goal is to “expand the Homelessness Prevention System and other early interventions to

serve 2,500 households per year” and one of the implementing actions is Program 1.21 – Homelessness Prevention System.

With this program as a roadmap, it is intended to work together and through a series of interrelated programs in the Housing Element to

accomplish its goals. Such programs include 1.11, 1.17, 1.23, 1.26, 1.27, and 1.28, which should be considered alongside and in conjunction with 1.24.

Table 4.25: Community Plan to End Homelessness

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • House approximately 3,200 people annually through implementation of the Community Plan to End Homelessness. Assuming the current reduction rate and the number of people served annually, we project housing 25,600 people between 2023 – 2031. <ul style="list-style-type: none"> ○ On February 2024, published the 2023 Community Plan to End Homelessness Progress report. Since 2020, our progress is as follows: <ul style="list-style-type: none"> ▪ 13, 817 people have been connected to stable housing. ▪ 19,575 people were placed in temporary housing and shelter. ▪ 28,235 people received homelessness prevention assistance. • Annually convene the strategy leads to develop annual focused implementation plans. These plans cannot be set in advance because there are a lot of factors that are taken into consideration when developing priorities. The purpose of this plan is to shape and guide our work through a collective impact model. Seek approval from the Continuum of Care Executive Board on the priorities for annual workplans. This includes, but is not limited to, the supportive housing system improvement work, supporting the work of the Lived Experience Advisory Board to improve service delivery, and the coordinated entry redesign work. Collectively these efforts are intended to continuously improve how unhoused individuals and families are served through the Santa Clara County Supportive Housing System. • In March 2023, issued Annual Progress Report for Year 3. • In March 2023, received notification from the U.S. Department of Housing and Urban Development on new grant applications that will increase the system capacity and allow the County to administer new programs. • In August 2023, issued the Mid-Year Progress Report for Year 4. • In January 2024, received notification from the U.S Department of Housing and Urban Development on new grant applications that resulted in \$7.9M more in funding over the prior year. • In March 2024, issued Annual Progress Report for Year 4. See above for latest progress report outcomes. • By September 2024, issue the Mid-Year Progress Report for Year 5. • By March 2025, issue the Annual Progress Report for Year 5. • In 2025, initiate the process to update the Community Plan to End Homelessness. Seek approval from the Continuum of Care Board on the community outreach and stakeholder engagement plan. Once a draft is developed, seek endorsement from the Board of Supervisors, the 15 incorporated cities, the Santa Clara County Housing Authority, the Valley Transportation Authority, the Santa Clara Valley Water Board, the various School and College Districts and other governmental and non-governmental partners. • By September 2025, complete the draft 2026-2031 Community Plan to End Homelessness, and adopt by January 2026.
--------------------	--

	<ul style="list-style-type: none"> In 2026, once the new Community Plan to End Homelessness is in place, will seek approval from each city on the development of a local implementation plan. OSH will offer technical assistance and support to each city either directly or through a consultant.

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> HG6-1: Encourage the development of affordable housing that is suitable for a variety of special needs populations. HG6(i) E: Support implementation of housing-related policies in the county. HG7-2: Expand supportive housing programs, including permanent supportive housing and rapid rehousing programs. HG7-3: Improve the quality of life of unsheltered individuals by expanding the capacity of temporary housing programs and providing basic needs services to individuals experiencing unsheltered homelessness. HG7(i) A: Transition the Homelessness Prevention System Pilot into an ongoing housing intervention within the Supportive Housing System and continue to secure public and private funding to aid 2,500 households annually. HG7(i) B: Continue to collaborate with affordable housing developers, non-profit agencies, county departments, local and regional partners to expand the capacity of the supportive housing system. HG7(i) C: Continue to support community-based organizations that provide services to the unhoused population. HG7(i) D: Coordinate with cities to construct service enriched emergency shelters consistent with the Community Plan to End Homelessness's goal to double the number of temporary shelter beds by 2025. HG7(i) F: Promote the County's Service Enriched Emergency Interim Housing Challenge Grant by partnering with cities to help achieve the goals contained in the Community Plan to End Homelessness to double the number of temporary shelter beds. HG7(i) G: Raise the voices of people with lived experience and share power with unhoused and recently housed neighbors by including them in the decision-making process when making decisions about homelessness-related policies.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> Admissions and occupancy policies and procedures, including preferences in publicly supported housing Quality of affordable housing information programs Inaccessible government facilities or services Lack of local or regional cooperation

Program 1.25 – Temporary Housing Programs

While supportive housing programs—and building more units to increase the system’s capacity—are central to the community’s mission to end homelessness, the reality remains that individuals currently experiencing homelessness need programs and services that address their immediate needs. The supportive housing system includes a range of crisis response strategies, which help to identify and engage with at-risk or homeless households, prevent homelessness before it begins whenever possible, and provide

shelter and other basic needs to individuals and families experiencing homelessness. For many households, these programs are the first step back to stable housing, and each component of this housing crisis response system works in alignment with the community’s supportive housing programs and other permanent housing resources to help clients achieve long-term housing stability. The County manages 37 programs providing a variety of services and contracts for 22 shelters countywide.

Table 4.26: Temporary Housing Programs

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • By June 2024, the County will enter into new agreements to expand existing basic needs services and temporary housing programs. • Complete construction of the Palo Alto and San José Interim Housing sites that will result in a total of 308 new shelter units by 2027. <ul style="list-style-type: none"> ○ Construction of the Palo Alto Interim Housing site started in October 2023 ○ Construction of the San José Interim Housing site started in April 2023 • Given the recent budget reductions at the State level it does not appear that the County will receive funding for the Santa Clara Homekey project. The Office of Supportive Housing will need to identify a different funding source or find different opportunities to expand temporary housing options.

CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Displacement of residents due to economic pressures

Program 1.26 - Homekey Application Strategy

In July 2021, the County of Santa Clara challenged the 15 cities in our community to identify 10 possible Homekey sites that could be submitted as part of Round 2 funding. One of the biggest gaps we have in our Supportive Housing System is a lack of accessible shelter beds throughout the County. However, we have developed a strategy that places people who are enrolled in a housing program into interim housing while they are in housing search. Homekey has afforded our community with the opportunity to scale this work. Collectively, Santa Clara County has been awarded a total of \$222,104,646 in Homekey funding across 10 projects in Rounds 1 and 2 resulting in the following:

- 270 hotel rooms converted into 224 permanent affordable and supportive housing units; with 21 of those units for transitional housing;

- 283 hotel rooms rehabbed and used for emergency internal housing that will later be converted to permanent housing; and
- 412 new units of emergency interim housing using modular construction (LifeMoves at Mountain View, Palo Alto, and San José).

As new funding becomes available and is more competitive, the County and cities need to work collaboratively to develop a strategy for Round 3 that fills any remaining gaps and that is consistent with the Community Plan to End Homelessness strategies and goals. This strategy also affords the County to serve a lead local coordinator in addressing contributing factors to fair housing issues by ensuring the equitable distribution of shelters across the county that are close to transit, amenities, employment, and schools.

Table 4.27: Homekey Application Strategy

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • In January 2023, hosted community meetings across the County about the next round of Homekey funds. • Submitted two new projects Countywide for Homekey Round 3 in partnership with the cities of Santa Clara and San José. • Given the structural deficit at the State level, it is unlikely that the County or the City of San José will receive an award of Homekey Round 3. As such, our current focus is to ensure all Round 2 Homekey sites are delivered. <ul style="list-style-type: none"> ○ Construction of the San José Interim Housing site started in April 2023. ○ The Crestview hotel conversion began construction July 2023 and is expected to complete construction August 2024. ○ The Palo Alto Homekey Emergency Interim Housing began site work and construction in October 2023. ○ The Pacific Motor Inn Interim to Permanent Housing project began construction in January 2024.
GEOGRAPHIC SERVICE AREA	Countywide
LEAD AGENCY	Office of Supportive Housing
FUNDING SOURCE	State Homekey Funds, local city funding, Homeless Housing, Assistance and Prevention (HHAP)

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG7-3: Improve the quality of life of unsheltered individuals by expanding the capacity of temporary housing programs and providing basic needs services to individuals experiencing unsheltered homelessness. • HG7(i) E: Continue to support community-based organizations that provide services to the unhoused population.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Displacement of residents due to economic pressures

Program 1.27 - Service Enriched Shelter Forgivable Loan Program

While the County continues prioritizing permanent housing developments and programs, the County recognizes the need to sustain and expand the emergency shelter and transitional housing system. Over the last three years, the County took extraordinary measures to increase operational funding for existing and new emergency shelter and transitional housing programs. These measures ensured that all major shelter and transitional housing facilities in Santa Clara County were available for use. One of the goals of the 2020 – 2025 Community Plan to End Homelessness includes doubling temporary housing and shelter capacity to reduce

the number of people sleeping outside. The purpose of the Service Enriched Shelter Forgivable Loan Program is to provide capital funding and operating subsidies to non-profit organizations, as sole applicants or in partnership with cities or other entities, to create new service-enriched shelters. Applicants are required to demonstrate cost savings and time advantages as compared to traditional shelter construction. The Service Enriched Shelter Forgivable Loan Program has been designed and is proposed as an over-the-counter application process whereby applications can be accepted and assessed on an ongoing basis. This enables prospective respondents to obtain a commitment early on and affords the County the opportunity to manage the production pipeline and leverage the State Homekey Program and other funding sources.

Table 4.28: Service Enriched Shelter Forgivable Loan Program

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • Complete construction of the Palo Alto and San José Interim Housing sites that will result in a total of 308 new shelter units by December 2027. <ul style="list-style-type: none"> ◦ Construction of the Palo Alto Interim Housing site started in October 2023 ◦ Construction of the San José Interim Housing site started in April 2023 • In March 2023, identified at least three new sites for funding and develop pathway for project approvals and funding. • Annually determine if additional funding can be set aside to reach the County’s goal of a \$40 million investment that would incentivize the construction of service enriched housing. Seek approval from the Board of Supervisors as part of the County’s Fiscal Year 2027-2028 budget cycle to secure new funding.
GEOGRAPHIC SERVICE AREA	Countywide
LEAD AGENCY	Office Supportive Housing
FUNDING SOURCE	County General Fund

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG7-5: Continue to incentivize the construction of new Service Enriched Emergency Interim Housing by partnering with cities. • HG7(i) D: Coordinate with cities to construct service enriched emergency shelters consistent with the Community Plan to End Homelessness' goal to double the number of temporary shelter beds by 2025
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Access to transportation for persons with disabilities • Impediments to mobility

Program 1.28 - Lived Experience Advisory Board (LEAB)

Santa Clara County’s Lived Experience Advisory Board (LEAB) is a leadership development body consisting of members who are currently or previously unhoused. The LEAB serves as a platform for people who have experienced homelessness, especially people of color and LGBTQI+ persons, to provide meaningful input to improve the Santa Clara County’s supportive housing system. The County’s Continuum of Care and Destination: Home, among others, consult with the LEAB to center input from people who are currently or formerly unhoused in development of planning, like the 2020-2025 Santa Clara County Community Plan to End Homelessness and procurement processes. The LEAB’s consultation and advocacy work relating to improving the Santa Clara County’s supportive housing system serves community members with special needs, including community members who are low-income people of color, seniors, unhoused or at risk of becoming unhoused, female-headed households, large families, those with limited English proficiency,

children and youth, and individuals with mental or physical health disabilities.

The LEAB’s strategies include:

- Provide leadership opportunities for people with lived experience of homelessness to shape how we address homelessness in our community.
- Center the voices of people who have lived experience of homelessness, especially people of color, in the policy and program design decisions of the supportive housing system.
- Within the supportive housing system, incentivize hiring of people who have lived experience of homelessness to reflect the client population— especially people of color and LGBTQI+ persons.
- Provide opportunities for people who have lived experience of homelessness to provide peer-to-peer support.

Table 4.29: LEAB

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • In January 2023, kicked-off Supportive Housing System Improvement work including the work of LEAB. • By June 2024, develop a toolkit for the establishment of Tenant Association’s for every 100% Permanent Supportive Housing Development. • OSH will continue to work with the LEAB to make improvements to the supportive housing system. The County will continue its commitment of inviting LEAB members and others with lived expertise of homelessness to participate in funding decisions and policy changes.
--------------------	---

	<ul style="list-style-type: none"> Seek approval from the Board of Supervisors by June 30, 2024 to increase the County's support for the various participation stipends that are offered to LEAB.

FUNDING SOURCE	U.S. Department of Housing and Urban Development, Continuum of Care Funding
POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> HG7-6: Continue to support feedback mechanisms that provide those with lived experience of homelessness the opportunity to inform and shape improvements to the Supportive Housing System and the delivery of services. HG7(i) C: Continue to support community-based organizations that provide services to the unhoused population. HG7(i) G: Raise the voices of people with lived experience and share power with our unhoused and recently housed neighbors.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> Lack of affordable in-home or community-based supportive services

Program 1.29 - Farmworker Affordable Homeownership and Farmworker Housing Pilot Program

Building on the progress made through the housing needs survey conducted during the 2015-2022 Housing Element planning period, the County is exploring the development of several new programs designed to 1) assist agricultural operators and landowners in providing housing for extremely low- and very low-income farmworkers, and 2) provide funding for either the rehabilitation of owner-occupied homes, mortgage assistance, and/or new home construction. HCD published a Notice of Funding Availability in January 2023 that included the Joe Serna, Jr. Farmworker Housing Grant (FWHG) Program. Eligible project types include both traditional homeownership and cooperative housing. In all cases, resale restrictions are required for a minimum of 20 years. Deferred FWHG loans are issued to buyers and a portion of the loans is forgiven each year, with loans being fully forgiven after 20 years. In addition to single-family homes, FWHG funding may also be used to develop projects involving multiple homeownership units, including single-

family subdivisions for lower-income agricultural employees and their families.

The Farmworker Affordable Homeownership component of the Program will first leverage funding from Program 1.06 – Below Market Partnership Program. Specifically, \$1 million in funding is set aside for mobile homes and manufactured housing. The County will work with the cities of Gilroy, Morgan Hill, and other stakeholders in South County to market the program to the farmworker community. The focus of this component of the program is primarily focused on individual households.

The Farmworker Housing Pilot component of the Program will focus on providing financing to help agricultural operators and landowners provide housing for “very low-income” farmworkers by creating new housing, rehabilitation or repairing existing housing, or replacing existing dilapidated mobile home units that have been used as farmworker housing at any time in the past. The focus of this component of the program is primarily focused on operators and landowners.

Together these two components are expected to meet an existing housing gap that cannot be achieved through high density multi-family housing development. In addition, on August 29, 2023, the Board of Supervisors directed the preparation of an Agricultural Worker Housing Workplan and, as a result of the Workplan,

additional agricultural worker housing programs may be launched by the County. The intent of this pilot program is to issue a total of 10 loans by 2031 and then determine the viability of scaling the program in future planning periods.

Table 4.30: Farmworker Affordable Homeownership and Farmworker Housing Pilot Program

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • Monthly monitoring of new funding available and quarterly meetings with potential developers interested in developing Farmworker Affordable Homeownership units. • By July 2024, develop program guidelines for the Farmworker Housing Pilot Program and share the draft with partners so that they can provide input and feedback. • By July 2024, soft launch of focused community engagement. Note that OSH will seek the list of stakeholders that are engaging in the countywide ag worker housing survey. OSH is participating in four community outreach events taking place in June 2024 with growers and seasonal and year-round ag workers. Through this effort OSH will be providing housing navigation services to ag workers to ensure they are provided with a safe and stable housing • By December 2024, circulate draft program guidelines for Farmworker Affordable Homeownership Program. Seek approval from the Board of Supervisors by April 2025. • By July 2025, soft launch of Farmworker Affordable Homeownership Program. • By December 2025, issue first loan and serve 10 households by 2031. • Ongoing: the County will continue to work with non-profit organizations to provide funding resources, as appropriate, and assistance with the production of housing for ownership and multifamily farmworker housing opportunities, focusing these efforts to areas that have access to transit, medical services, and education opportunities. • <u>Ongoing: On an annual basis, the County will review the progress of this program, assessing the number of applications, building permits issued and loans made for farmworker housing.</u>

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG8-4: Seek new public and private funding sources to support the construction of farmworker housing. • HG8(i) C: Monitor new State and Federal Funding regarding farmworker rental and homeownership programs and collaborate with housing developers to identify sites suitable for farmworker housing.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Lack of access to opportunity due to high housing costs • Land use and zoning laws

- Location and type of affordable housing
- Location of employers

Program 1.30 - Asset Management Portfolio Expansion

The County, as a lender, is responsible for overseeing and monitoring the operation and financial performance of the affordable and multifamily rental projects that have been developed with financial and other forms of support from the County of Santa Clara. These projects serve a variety of low-income populations: families, seniors, disabled individuals, veterans, chronically homeless people, transition-age youth, and people with HIV/AIDS, among others. With the passage of the 2016 "Measure A" Affordable Housing Bond, the County's portfolio of loans is expected to grow substantially once the measure is fully implemented. It continues to be important that the County adequately service each loan, monitor each site for compliance, and closely review annual audits to ensure the County is receiving its fair share of residual receipts. There are several goals central to this program which ensure that all projects financed by the County are:

- Serving the intended low-income populations with affordable rents;
- Well-managed and provide decent, safe, and sanitary housing; and
- Financially sound and sustainable in the long term.

In performing its duties, the Office of Supportive Housing through the Asset Management Team acts as a steward of public resources and works to mitigate risk to the County's investments wherever possible. Furthermore, through this effort the County will preserve existing deed-restricted affordable housing by negotiating to extend the County's affordability restrictions in its existing portfolio.

The County, as a leader in advancing affordable housing production and preservation will work collaboratively with the 15 incorporated cities in the county to centralize efforts to preserve affordable housing that is at risk of conversion to market rate housing. For instance, in 2016 the County worked closely with the City of Sunnyvale and the Santa Clara County Housing Authority to develop a relocation strategy for households at risk of displacement from a housing development site with an expired restrictive covenant. Through this partnership, the County was able to find alternative housing options for several households that were not able to afford the new market rate rents. Successful management of the County's Loan Portfolio will result in additional financial resources through loan repayments that can potentially be used to preserve housing at risk of conversion through partnerships with other key regional stakeholders.

Table 4.31: Asset Management Portfolio Expansion

PROGRAM OBJECTIVES

- Selected a new vendor in June 2023 that will manage the data related to the County's single-family and multifamily loan portfolio.
- By June 2024, generate first draft of compliance reports and fund balance statements.
- Conduct annual monitoring and site visits of at least 25% of the County's property portfolio annually.

	<ul style="list-style-type: none"> • Service a total of 209 permanent deferred interest multifamily loans through 2031. • Over the 2023-2031 period, annually review the Subsidized Affordable Housing At Risk Report prepared by the California Housing Partnerships. • By June 2025, create a Housing Preservation Fund that can be funded through loan repayments the County anticipates receiving from residual receipt payments. Seek Board approval for new program by December 2025.
GEOGRAPHIC SERVICE AREA	Countywide

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG9-4: Support retaining existing deed restricted affordable and supportive housing units. • HG9(i) C: Strengthen the County’s loan portfolio management system to track when existing affordable housing projects are eligible for syndication of their tax credits and work towards extending affordability terms.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Displacement of residents due to economic pressures; Loss of affordable housing

Program 1.31 – Minor Home Repair and Maintenance

The County will continue to provide funding to assist low-income owner-occupied residents with minor home repair and maintenance services. The County proposes to continue its partnership with Rebuilding Together Silicon Valley (RTSV), who offers repair and rehabilitation assistance to low-income, urban County residents who are owner-occupants, particularly the elderly and disabled. All repairs are provided free of charge to the homeowner. Primary efforts include the “Safe At Home Program” and “Rebuilding Days.” Program assistance addresses home safety repairs, fall prevention, accessibility and mobility, aging in place, weatherization, and home and fire safety of owner-occupied residences. The County plans to continue funding RTSV to further several goals in the 2020-2025 Urban County Consolidated Plan that identify the County’s housing and community development priorities: preventing and reducing homelessness,

preserving existing affordable housing, and providing essential services to special needs populations. This program expects to complete repairs on 45 homes per year during the 2023-2031 planning period.

Table 4.32: Minor Home Repair and Maintenance

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> Over the 2023-2031 period, annually, by April, present funding recommendations to the Housing and Community Development Advisory Committee (HCDAC) to approve the continued funding of this program. Annually, by June, present funding recommendations to, and seek approval from, the Board of Supervisors. Annually, by July, begin offering services to the eligible households. Both the HCDAC and the Board of Supervisors approved OSH’s request for Fiscal Year 2024-2025 and the application has also been submitted to the U.S. Department of Housing and Urban Development. As in prior years, this program will begin offering services on July 1, 2024. Provide minor home repair and maintenance services to 45 households annually and approximately 400 between 2023 and 2031.

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> HG6-2: An adequate supply of affordable housing suitable for individuals at all stages of life should be available in every community. HG6(i) C: Maintain existing programs to provide “Housing for All Ages,” including housing for multigenerational households. HG9-1: The conservation and rehabilitation of the existing housing supply shall be encouraged and facilitated HG9-4: Support retaining existing deed restricted affordable and supportive housing units. HG9(i) A: Maintain ongoing programs for monitoring the physical condition of neighborhoods to assist in guiding rehabilitation program efforts, scheduling infrastructure maintenance activities, and to provide accurate information for Federal and State programs. Expand monitoring component to include rent price information.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> Lack of assistance for housing accessibility modifications

Program 1.32 – Community Development Corporation Grant Program

CDCs have three distinguishing characteristics: (1) nonprofit status under section 501(c)(3) of the Internal Revenue Code; (2) involvement in community development projects, usually with an emphasis on affordable housing expansion; and (3) a governing board composed in significant part of community members.

CDCs devote themselves to revitalizing the areas in which they are located. In most cases, these areas are low-income neighborhoods that have experienced significant disinvestment. While all CDCs aim

to improve the quality of neighborhood life, they may do so in a variety of ways, including by producing housing, promoting commercial development, regenerating open spaces, and/or administering support programs (such as employment services). Experts in community development have explained that one of CDCs’ main advantages over entities with similar missions is their ability to play multiple roles, including that of community organizer and project developer, when leading community development initiatives.

The County of Santa Clara’s (County) Community Development Corporation Grant Program (Grant Program) helps community-based organizations play more substantial roles in acquiring, developing,

rehabilitating, and/or managing properties to increase affordable rental and/or ownership housing opportunities (collectively, “affordable housing development”). Grant recipients are 501(c)(3) nonprofit corporations whose missions are to revitalize, build community among, and/or enhance the quality of life of residents in specific communities, neighborhoods, or small cities. Selected organizations would also be committed to including residents in decision-making at program-/project-, strategic, and organizational

levels. All recipients must use grant funds to increase their ability to undertake affordable housing development activities; however, the organizations may also undertake development activities that would increase economic, cultural, health, or social service resources in their communities. The capacity building grants would expand the network of community-based organizations capable of affordable housing development while giving residents more opportunities to shape the future of their communities

Table 4.33: Community Development Corporations

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • Work closely with the three Round 1 CDC Grantees (SOMOS Mayfair, African American Cultural Center, and the South Bay Community Land Trust to implement. • By December 2025 assist the African American Cultural Center with securing all the necessary funding for their signature project located at 2001 the Alameda in San José. • By June 2024, complete workplan for SOMOS Mayfair to help them acquire their first property. • By July 2025 select Round 2 CDC grant recipients.
GEOGRAPHIC SERVICE AREA	Countywide
LEAD AGENCY	Office of Supportive Housing
FUNDING SOURCE	County General Fund
POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • Encourage homeownership opportunities for lower-income households. • HG1(i) C: Continue to implement new homeownership programs that provide an opportunity for lower-income households that would otherwise struggle to afford a home, furthering the equity and sustainability of homeownership.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Availability of Affordable Units in a Range of Sizes • Displacement of Residents Due to Economic Pressures • Loss of Affordable Housing

Program 1.33 – Expand Access to UPLIFT Program

The Universal Pass for Life Improvement From Transportation (UPLIFT) Program provides quarterly Valley Transportation Authority (VTA) transit passes for adults experiencing homelessness or who are at risk of losing their housing due to lack of transportation. The goal

of UPLIFT is to help people get housing or employment by improving access to public transit. The program, a partnership between and subsidized by the County of Santa Clara, VTA, and the City of San José, is operated at no cost to the clients or referring organizations. Since the inception of the UPLIFT Program in 2008, the program has

provided VTA transit passes for thousands of people experiencing homelessness or are at-risk of homelessness. These individuals receive ongoing case management from partner agencies, including shelter providers, homeless services agencies, community re-integration programs, vocational services providers, behavioral healthcare providers, and others.

The UPLIFT Program has seen growth in demand throughout the years. The number of partner agencies has increased from 28 in 2008 to 44 in 2023.

In addition to providing the valuable service of transportation, the UPLIFT Program also provides service to connect people to the community’s Coordinated Assessment System by requiring partner agencies to refer Clients who are literally homeless to the community queue for permanent housing programs.

Table 4.34: Expand Access to UPLIFT Program

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • Serve 2,500 homeless individuals and families quarterly. • In July 2023, updated the UPLIFT User Guide to ensure partners agencies are able to train new staff on the County’s process for accessing passes for their respective organization. • By July 2028 renegotiate an agreement with VTA relating to continued expansion of the UPLIFT Program
GEOGRAPHIC SERVICE AREA	Countywide
LEAD AGENCY	Office of Supportive Housing
FUNDING SOURCE	County General Fund Revenue from the City of San José
POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG7-6: Continue to support feedback mechanisms that provide those with lived experience the opportunity to inform and shape improvements to the Supportive Housing System and the delivery of service. • HG7(i) C: Continue to support community-based organizations that provide services to the unsheltered population.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Access to transportation for persons with disabilities • Availability, type, frequency, and reliability of public transportation • Lack of access to opportunity due to high housing costs

4.03b Department of Planning & Development Programs

The Department of Planning and Development (DPD) balances the need for development with the environmental, social, safety, and other needs of the community and its residents. DPD meets these needs by adopting and enforcing community standards, ordinances, and codes approved by the Board of Supervisors. Additionally, DPD issues and monitors permits for various activities including activities as broad as parades, construction of new buildings, and mining to ensure compliance with standards and applicable laws. DPD also investigates any reported violations of codes and offers assistance and paths to compliance.

Program 2.01 - Housing Suitability and Prioritization Tool for County-Owned Properties

The County has prioritized facilitating the construction of more affordable housing countywide, including evaluating opportunities for building affordable housing on County-owned properties. The

County continues to examine opportunities to increase construction of seasonal and permanent farmworker housing to maintain the agricultural economy's viability.

To assist in this effort, the County applies a GIS tool to identify and facilitate low- and middle-income housing development opportunities for County-owned parcels as well as any identified opportunities to support housing development at higher densities in unincorporated county Urban Service Areas (USAs). To help identify and prioritize housing sites on County-owned parcels, the DPD developed an Affordable and Farmworker Housing Prioritization Assessment (AFHPA) tool for all County-owned parcels. The tool will be utilized to rank County-owned parcels on their suitability for housing. It will help other departments, such as the Office of Supportive Housing and the Facilities and Fleet Department, identify and prioritize County-owned parcels for housing development. The process for County-Led Housing Development is detailed in Program 1.07.

Table 4.35 Housing Suitability and Prioritization Tool for County-Owned Properties

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • By April 2023, the AFHPA tool was introduced to the Facilities and Fleet (FAF) Department and Office of Supportive Housing (OSH). • By June 2023, training was completed to utilize the tool and housing sites were subsequently identified. • By September 2024, initiate the community engagement process for the County-owned sites in Cupertino, San José, and Gilroy, in partnership with city partners that could yield a minimum of 617 new housing units that would be completed by 2031. • On February 6, 2024, the Board approved the selection of Eden Housing as the developer for the Cupertino site. One-on-one stakeholder engagement is underway, and entitlements are expected to be obtained by January 2025. The Cupertino site is located in a high resources area and may include educator workforce housing, special needs housing, and housing for families. The final target population will be determined by January 2025 when the project is expected to received final land use approvals. OSH worked proactively with the City of Cupertino to list the property on the City's opportunity sites as part of their 6th cycle housing element update that was recently certified by State HCD. • By June 2024, issue a Request for Offer to select an affordable housing development team for the Senter Road site in San José and the 8th and Alexander site in Gilroy. The Gilroy site will focus on affordable workforce housing for ag workers and homeless families. With all County-led sites, OSH can ensure that the County is addressing the disproportionate housing needs of lower income households of color.
--------------------	---

	<ul style="list-style-type: none"> • By October 2024, select a development partner for the Gilroy and San José sites. Implementing actions include the issuance of the Request for Offer by June 2024 and convening a panel to review the proposals submitted by August 2024. Negotiate terms with the developer by September 2024. • By March 2025, execute Development and Disposition Agreements with the future selected development partners. • By June 2025, present recommendations to the Board of Supervisors for financing opportunities for the Cupertino, Gilroy, and San José sites.

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG1-5: Prioritize suitable County-owned underutilized parcels within Cities and Urban Service Areas for affordable, supportive, and workforce housing development. • HG1(i) D: Continue consideration of publicly owned lands suitable for the construction of extremely low-income housing and develop a priority of County-owned sites suitable for housing development. • HG3-2: The provision of permanent supportive housing for extremely low-income households shall be given high priority in housing assistance programs. • HG3(i) B: Consider using suitably located surplus and publicly owned lands for housing affordable to extremely low-, very low-, and low-income households through the sale or lease of such land to a government entity, nonprofit, or private home builders with appropriate terms and conditions guaranteeing long term affordability
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Availability of affordable units in a range of sizes • Lack of access to opportunity due to high housing costs • Location and type of affordable housing • Land use and zoning laws

Program 2.02 - Planning for Housing Development in Unincorporated USAs and Stanford University Lands

Since its inception, the County General Plan has been designed around foundational policies that aim to curtail sprawl and carbon emissions by focusing growth within urban, incorporated areas and urban parts of the unincorporated county, specifically within Urban Service Areas (USAs). To facilitate more cohesive development patterns between incorporated and unincorporated urban areas, the County’s General Plan sets forth three important strategies: 1)

Promote Eventual Annexation, 2) Ensure Conformity of Development with Cities’ General Plans, and 3) Provide Services as Efficiently and Equitably as Possible. These strategies guide County policy in urban unincorporated areas, which are presumed to eventually require annexation. The major exception to this is the Stanford University academic campus, which the County, the City of Palo Alto, and Stanford University agreed in 1985 would remain unincorporated.

Following from these strategies are a series of general land use management policies (see General Plan [Book B, Urban](#)

[Unincorporated Area Issues and Policies, U-LM 5 through 10](#)) that require the County to only accept an application for new residential development on a parcel eligible for annexation if the applicable city has stated that annexation has been considered and denied, and require major development applications to conform with city General Plan designations and accompanying standards and policies. In effect, these policies have resulted in the County conferring long-range land use planning for these areas to the applicable city, by following the city's lead for urban unincorporated areas and seeking conformance with city planning wherever possible.

Given the 2023-2031 RHNA target of 3,125 units for unincorporated areas, and specifically the ABAG methodology that includes unincorporated USAs in the analysis used to assign units to the County, the County must plan for housing in unincorporated USAs to accomplish the RHNA assignment and avoid conflicts with existing land use policies.

To plan for and facilitate major residential development in unincorporated USAs, the County was required to amend the above-mentioned General Plan policies. As a result of the amendments, the General Plan no longer requires multi-family and mixed used development in the Housing Opportunity Sites combining district to be in conformance with the city's long-range land use planning for selected sites, and the County Zoning Ordinance has been updated to restrict development on the County's sites inventory (including Stanford University Lands) to multi-family residential and limited mixed uses. This rezoning program, completed in December 2023, conforms with the provisions of California Government Code Section 65583.2 subdivision (c) and removes constraints to the development of such parcels. Section 3.75.040 of the County Zoning Ordinance now provides housing opportunity sites with the option to pursue a streamlined project review and approval by way of a Planning

Clearance, which conforms with the definition of "use by right" in California Government Code Section 65583.2 subdivision (i). Section 5.20.240 of the County Zoning Ordinance defines Planning Clearance as "a ministerial, nondiscretionary process for uses that require adherence to the Zoning Ordinance but for which no discretionary permit is required." To qualify for such processing, projects must meet objective eligibility criteria, including conditions and requirements for minimum levels of affordability. [While the County's Zoning Ordinance was amended and compliant with State law in December 2023, in November 2024, the County adopted clarifying text edits to the Zoning Ordinance Chapter 3.75 to respond to HCD's comments.](#)

As such, any future development on these sites would be required to comply with the combining district. If the developer proposes a specified number of affordable units, then the project will be reviewed and processed with a streamlined, nondiscretionary permit, as required under California housing law. If the application does not include the percentage of affordable units specified in the zoning ordinance to qualify for the streamlined, nondiscretionary permit, then a discretionary review of either Architecture and Site Approval (ASA) or a Use Permit is required, which can take 2 to 6 months. Although the discretionary review process is longer, it still allows for development to take place within the planning period.

All development standards applicable to the Housing Opportunity Sites are objective and were designed to ensure high-quality and equitable housing, and to provide basic amenities to all residences, while avoiding any subjective findings that may impose potential constraints on the project. All "-os" development standards may be modified pursuant to a development agreement approved by the County Board of Supervisors. Details can be found in Section 2.06f of this Housing Element and in Zoning Ordinance Chapter 3.75.

Of the sites selected for inclusion in this sixth cycle planning period analysis, only the Stanford University *Escondido Village* site is both considered non-vacant and was previously selected as a housing site (in the fourth cycle planning period). The two other Stanford sites (*Quarry Arboretum* and *Quarry El Camino*) were previously identified in the fourth and fifth cycles and were not developed during the fourth or fifth cycles.

Development on Stanford lands within the three locations identified in the Housing Sites Inventory follow the same process as other sites rezoned with the “-os” combining district. Should Stanford wish to, it may apply for the streamlined, nondiscretionary Planning Clearance, provided the application conforms with the objective standards established in the County’s updated Zoning Ordinance, as amended in December 2023 [and November 2024](#). Stanford University may also pursue a discretionary review process through ASA (a separate Use Permit for structures on Stanford lands is not required because the existing zoning and existing General Use Permit allow for a variety of housing types and other uses pertinent to a large academic institution across the majority of the academic campus). While academic building space on campus is limited based on a General Use Permit, the County does not place any limitations on the amount of housing units or square footage of housing that Stanford may construct, whether within the three housing inventory sites or elsewhere on the academic campus.

Stanford University will determine the timing of any application submittal based on an assessment of housing needs at that time; however, the Stanford Community Plan (updated in 2023) is clear in its requirements for Stanford to provide adequate housing to students, educators, staff, and other workers, commensurate with the

University’s plans for expansion. Streamlined, nondiscretionary permits could be issued in as few as 30 days after the application is submitted, while projects requiring an ASA could take up to 6 months for approval.

The County holds monthly meetings with representatives of Stanford University and will use these in part to discuss any constraints or barriers Stanford University encounters when developing housing on these three sites. If these constraints or barriers persist, the County will explore options to remove them as part of the mid-cycle review process.

If an applicant chooses to develop housing on one of the County’s inventory sites (including Stanford) through the *discretionary approach*, the process will typically include the following steps:

1. Submittal of application materials.
2. Staff’s review of submitted materials (typically within 30 days).
3. A review letter issued by staff either requesting more information or deeming the application complete.
4. When the application is deemed complete, the application is scheduled for a public hearing before either the County Zoning Administrator for ASA permits, or the Planning Commission for Use Permits.
5. Once the Zoning Administrator or Planning Commission approves the application, the developer must wait an additional 15 days until the appeal period is completed. If an appeal is received, the appeal will be heard by either the Planning Commission (ASA permits) or Board of Supervisors (Use Permits).
6. If no appeal is received, the developer may submit their building permits for construction.
7. County staff will then review each building permit and provide comment on deficient areas or issue the permits.

8. Following issuance of the permits, County staff will conduct applicable inspections throughout the construction until the development is formally completed and ready for occupancy.

If an applicant chooses to develop housing on one of the County's inventory sites (including Stanford) through the *streamlined approach*, the process would typically include the following steps:

1. Submittal of application materials.
2. Staff review of submitted materials (typically within 30 days).
3. A review letter issued by staff either requesting more information or deeming the application complete.
4. When the application is deemed complete, the developer may proceed directly to submit their building permits for construction.
5. County staff will then review each building permit and provide comment on deficient areas or issue the permits.

6. Following issuance of the permits, County staff will conduct applicable inspections throughout construction until the development is formally completed and ready for occupancy.

The County is committed to conducting a mid-cycle review of the Housing Element (refer to Program 2.26). Given that Stanford lands have been assigned a significant portion of the County's projected development to meet its RHNA requirements, the County will pay particular attention to Stanford's development applications in the mid-cycle review. Should it become evident that Stanford will not produce the number of units that the County has projected before the end of the sixth cycle, the County will pursue additional strategies, which may include selecting additional sites and removing any additional barriers to housing development.

Table 4.36: Planning for Housing Development in Unincorporated USAs and Stanford University Lands

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • In December 2023, the County reviewed and amended: (1) the relevant strategies, policies, and implementation provisions of the County General Plan; (2) the relevant Zoning Ordinance provisions that implement these General Plan policies; and (3) the applicable zoning and land use designations for sites within urban USAs that have been identified for housing development to meet the County's obligation under RHNA during a housing planning cycle. • <u>In November 2024, the County adopted clarifying amendments to the relevant Zoning Ordinance provisions.</u> • Throughout the planning period, the County will meet monthly with representatives of Stanford University and explore options to overcome constraints and barriers to housing development. The below tim • The County anticipates estimates receiving an application for housing on the Stanford sites that qualifies for the streamlined, ministerial process, by June 2026 <u>December 2025</u>, in which case the following projected schedule may apply, <u>in accordance with the Permit Streamlining Act and Assembly Bill 2234</u>: <ul style="list-style-type: none"> ○ By January-July 2026 (30-day review), staff review of submitted materials and letter issued of complete letter/incomplete letter, requesting additional information.
--------------------	---

	<ul style="list-style-type: none"> ○ By MarchSeptember 2026 (60-day resubmittal), receive resubmittal from applicant addressing County comments, second submission from Stanford. ○ By AprilOctober 2026 (30-day review), deem application complete and issue conditions of approval-staff review of submitted materials and deemed complete. ○ By OctoberNovember 2026, submit plan check application for building permit review, receive first building permit application(s) from Stanford. ○ By November 2026, staff review of submitted materials and provide comment. ○ By January 2027, receive second submission of building permit application(s) from Stanford. ○ By FebruaryDecember 2026/2027, staff review complete and building permits issued, issue building permits. ● By December 2025, and annually thereafter, the County will monitor the production of new housing units, evaluating the trend of development and levels of affordability in relation to the realistic capacity of sites analyzed and overall RHNA obligation for the planning period. <ul style="list-style-type: none"> ● If the County does not receive an application from Stanford by June 2026, the County will work with Stanford to facilitate the submittal of a housing development application. The County would pursue additional actions, including but not limited to, the selection of additional housing sites on Stanford Campus, rezoning, and/or permit processing improvements. See Program 2.26 (Mid-Cycle Review). ● By January 2027, the County will adopt any necessary changes to policies or ordinances that remove unreasonable constraints or barriers to housing development on sites listed in the Housing Inventory for the sixth cycle. See Program 2.26 (Mid-Cycle Review).

POLICIES AND IMPLEMENTATION	<p>HG1-8: Until a city annexes the unincorporated islands within its USA, the County will plan for housing development in these areas, as necessary to address Housing Element law during a planning cycle and Regional Housing Needs Allocations (RHNA).</p> <p>HG1(i) E: Amend General Plan and Zoning Ordinance to Plan for Housing in Unincorporated USAs</p>
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> ● Availability of affordable units in a range of sizes ● Lack of access to opportunity due to high housing costs ● Lack of affordable, accessible housing in a range of unit sizes ● Land use and zoning laws ● Location and type of affordable housing ● Location and type of affordable housing ● Loss of affordable housing

Program 2.03 – In-Lieu Fee Program for State Density Bonus and Affordable Housing

On October 3, 2020, the County adopted a Countywide Inclusionary Housing Ordinance for residential development of three units or more within the unincorporated lands of Santa Clara County. Any project subject to the inclusionary requirement can avail itself of existing density bonus provisions in Section 4.20.030 of the County's Zoning Ordinance, consistent with the State density bonus requirements (California Government Code Section 65915, *et. seq.*), if eligible. Eligible projects can request a density bonus, waivers, or

reductions in development standards that would physically prevent the project from being built, and incentives and concessions related to reduced development standards for parking, height, and setback requirements. As the County inclusionary requirement is set at 16%, it is likely that many projects providing inclusionary units on sites pursuant to the requirements of the Inclusionary Housing Ordinance could be eligible for density bonuses and related incentives.

The County has not yet processed any projects of this type. The County's Zoning Ordinance will be updated to include density bonus provisions, as needed.

Table 4.37: In-Lieu Fee Program for State Density Bonus and Affordable Housing

PROGRAM OBJECTIVES	The County will continue to comply with density bonus laws if and when an application is presented. The County will ensure developers of three or more units will deed restrict one sixth of all units for affordability or collect in-lieu fees to be used to support affordable housing efforts.

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG4-1: The County should continually review its land use and development procedures for opportunities to remove unnecessary constraints and provide new opportunities to fund the construction of affordable housing. • HG4(i) B: Inclusionary Housing Fee Program for Affordable Housing project types.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Location and type of affordable housing • Land use and zoning laws • Lack of affordable, accessible housing in a range of unit sizes • Availability of affordable units in a range of sizes

Program 2.04 – Assess Farmworker Housing Needs and Collaborate with Other Jurisdictions

In 2020, as an implementation measure of the Santa Clara Valley Agricultural Plan, the County adopted Zoning Ordinance

amendments to streamline the planning approval process for agricultural employee housing. In furtherance of this effort, there are two components of this program.

First, the County will collaborate with other jurisdictions in the region to both: (a) share best practices from the County’s streamlining efforts thus far, and (b) grow the collective understanding of challenges facing farmworkers in the region and the capacity to address those challenges. With support and partnership of ABAG, this work began in 2022 and is expected to continue through 2025.

Second, the County has found that additional work, beyond streamlined planning approval, is required to facilitate the development of agricultural employee housing and better meet the housing needs of farmworkers. Therefore, the County will conduct a comprehensive Farmworker Housing Needs Assessment.

The Housing Element currently relies upon data from Federal, State, and regional sources. Local data on farmworker housing is either imperfectly aligned with data needs or exists only in anecdotal form. A more thorough and localized Farmworker Housing Needs Assessment will provide the County with a deeper understanding of the number of farmworkers that are present in the county and at what time of year; an understanding of the types and conditions of housing in which they live based on how they self-report this information; and an improved ability to address farmworker housing needs by creating affordable housing options.

In 2018, the Department conducted extensive public outreach and analysis on this topic through the development of the Santa Clara Valley Agricultural Plan. This effort included distributing farmworker housing needs surveys to farm industry and farmworker community representatives and evaluating related studies associated with nearby counties. This effort was not, however, a comprehensive Farmworker Housing Needs Assessment.

Farmworkers are considered a special needs population as they are challenged with finding affordable housing in and near their places of employment. This program will directly benefit this population.

This program will be closely coordinated with Program 2.04 and associated programs, including an Agricultural Worker Housing Workplan (Program 4.02) that the Board of Supervisors directed the preparation of at its meeting on August 29, 2023.

Lastly, on an annual basis, the County will identify new opportunities for facilitating the development of farmworker housing, for example in partnership with nonprofit developers (among others); see Program 1.29 for additional objectives related to funding resources and assistance with the production of housing.

Table 4.38: Assess Farmworker Housing Needs and Collaborate with Other Jurisdictions

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • By December 2024, the County will work begin working annually with ABAG and other jurisdictions in the region to share best practices and build capacity to address farmworker housing needs. • By December 2025, the County will complete a comprehensive Farmworker Housing Needs Assessment. • By December 2026, the County will pursue ordinance and policy amendments, as appropriate, to address farmworker housing needs. • Throughout the planning period, the County will coordinate efforts to address farmworker housing needs across departments, including but not limited to the following related program objectives:
---------------------------	---

	<ul style="list-style-type: none"> ○ Program 1.01 – <i>Supportive Housing Development Fund Notice of Funding Availability</i>: pursue approval of funding for new development proposals involving farmworker housing. ○ Program 1.05 – <i>Mortgage Credit Certificate (MCC) Program</i>: prioritize remaining MCCs for agricultural workers. ○ Program 1.07 – <i>County-Led Housing Development</i>: pursue approval of new farmworker housing within County-led development. ○ Program 1.29 – <i>Farmworker Affordable Homeownership and Farmworker Housing Pilot Program</i>: issue a total of 10 loans to farmworker households by 2031. ● Program 2.01 – <i>Housing Suitability and Prioritization Tool for County-Owned Properties</i>: pursue approval of new farmworker housing on County-owned properties. ● Program 2.14 – <i>Expanded Streamlining of Agricultural Employee Housing</i>: pursue Zoning Ordinance amendments to further streamline the production of agricultural employee housing. <ul style="list-style-type: none"> ○ Program 4.02 – <i>Agricultural Worker Housing Workplan</i>: develop a comprehensive approach to addressing farmworker housing needs in the county. ● Ongoing: the County will partner with developers to assist with farmworker housing site identification, work with growers to identify strategies, and periodically meet with developers and the agriculture industry to identify the constraints and solutions to development of farmworker housing, focusing these efforts to areas that have access to transit, medical services, and education opportunities. ● <u>Ongoing: On an annual basis, the County will review the progress of this program, assessing the coordination across departments, outreach programs and policy changes.</u>

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> ● HG8-1: Facilitate agricultural employee housing by improving the permitting process. ● HG8(i) A: Convene other jurisdictions for capacity-building and conduct a farmworker housing needs assessment.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> ● Location and type of affordable housing ● Land use and zoning laws ● Lack of access to opportunity due to high housing costs ● Lack of local or regional cooperation ● Location of employers

Program 2.05 – Rent Price Monitoring Program

At every Annual Housing Element Progress Report update, staff conducts research on the respective rental rates for various types of

units throughout the unincorporated county compared to nearby jurisdictions. Rental rates continue to rise for the unincorporated county, as well as the region. The data presented each year serves to monitor existing conditions and bring awareness to the costs of

housing in our community. Through the Annual Housing Element Progress Report, the Board will be presented with data on rent prices by reporting, evaluating, and considering actions necessary to address significant changes in rental rates. DPD will continue to monitor rent prices countywide and in unincorporated county

pockets. DPD will also track and present rent data that can act as indicators of the presence of rent escalation in urban unincorporated pockets associated with the City of San José’s Urban Villages planning process

Table 4.39: Rent Price Monitoring Program

PROGRAM OBJECTIVES	Annually, the department will provide to the Board of Supervisors in its Annual Housing Element Progress Report updates on rent prices and to consider actions necessary to address significant changes in rental rates.
GEOGRAPHIC SERVICE AREA	Unincorporated County, Countywide
LEAD AGENCY	Department of Planning and Development
FUNDING SOURCE	N/A
POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG9-1: The conservation and rehabilitation of the existing housing supply shall be encouraged and facilitated. • HG9(i) A: Maintain ongoing programs for monitoring the physical condition of neighborhoods to assist in guiding rehabilitation program efforts, scheduling infrastructure maintenance activities, and to provide accurate information for Federal and State programs. Expand monitoring component to include rent price information.

Program 2.06 – Streamline ADU Processing

Since the 2014 Housing Element update, zoning regulations have been revised pursuant to State law to permit conforming ADUs and JADUs as a matter of right, reducing the regulatory burden on property owners and streamlining the approval process in terms of both cost and time.

Since the implementation of the current ADU and JADU ordinance that was adopted in March 2020, 104 permits for ADUs and JADUs have been issued by the County.

The County will continue to consider additional minor modifications to certain standards for ADUS and JADUs to provide greater

flexibility and facilitate additional units as part of routine Zoning Ordinance review, and in accordance with any future amendments necessitated by state law. The County’s current ADU and JADU ordinance defers to Government Code Sections 65852.2 and 65852.22, as those laws may be amended from time to time. While the County may choose to further update the ADU provisions of the Zoning Ordinance, the County considers both sections to be compliant because they explicitly defer to the California Government Code if any provisions conflict with the local ordinance code.

Staff will also evaluate the use of pre-approved plans for ADU applications to streamline the development, and provide a menu of incentive options to the Board of Supervisors to consider adopting.

Table 4.40: Streamline ADU Processing

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • By December 2024, update and modify development standards in the County Zoning Ordinance for ADUs, JADUs, and subdivisions related to SB9, to ensure development standards are objective, aligned with current state law, and reported to the State Department of Housing and Community Development. • By December 2024, the County will complete pre-approved building plans for ADUs and on an ongoing basis <u>(at least annually)</u> provide education and promotion by proactively marketing the pre-approved ADU plans. • Ongoing: the County will monitor ADUs to track approval timelines and levels of affordability. • By December 2025, the County will pursue options to incentivize ADU construction, including but not limited to modifying development standards and seeking funding for ADU development. • By June 2026, the County will pursue Zoning Ordinance amendments to incentivize the construction of ADUs. • <u>By December 2026, the County will review ADU construction rates. Should the number of units lag expectations, the County will pursue adopting incentives that will encourage additional ADU construction, such as grants offered by the state for the construction of ADUs.</u>

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG4-2: Review and reduce, where appropriate, regulations and processing procedures regarding the development of ADUs, JADUs and SB9 Units. • HG4(i) C: Monitor and modify development standards as needed, including the trends of ADU, JADU and SB-9 development, to ensure development standards are objective, and up to date with current State law and reported to the State Department of Housing and Community Development annually.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Location and type of affordable housing • Land use and zoning laws • Availability of affordable units in a range of sizes • Lack of access to opportunity due to high housing costs • Loss of affordable housing

Program 2.07 – Housing Adjacent to Transit

One of the County’s policies is to strongly support increasing the proximity of housing to transit. One tool is by working with local transit authorities such as, the Santa Clara Valley Transportation Authority (VTA) to locate housing within one-quarter mile walking distance of a transit station or stop to provide connectivity to

services (such as, schools, grocery stores, parks, etc.). Another policy is prioritizing construction of active transportation infrastructure (sidewalks, bicycle lanes, trails, etc.), and other amenities within existing unincorporated neighborhoods, illustrating how major arteries and thoroughfares can be retrofitted, redesigned, and

planned to promote shared access for bus ways, bicycling, multi-level mixed uses, and pedestrian improvements.

Table 4.41: Housing Adjacent to Transit

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • With an initial meeting by December 2024, meeting annually to coordinate with HCD and VTA in support of utilizing Senate Bill 791, to facilitate the development of surplus agency-owned land into housing. • With an initial meeting by December 2024, meeting annually to coordinate with cities and VTA to support streetscaping and similar policies. • December 2026, complete stakeholder mapping and coordination • August 2027, complete early community engagement • January 2028, complete developer selection • July 2029, complete entitlement, and financing • August 2031, complete construction and operation
GEOGRAPHIC SERVICE AREA	Unincorporated County, Countywide
LEAD AGENCY	Department of Planning and Development
FUNDING SOURCE	N/A
POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG1-7: Work with local transit authority(ies) to locate housing within one-quarter mile walking distance of a transit station or stop to provide connectivity to services (such as, schools, grocery stores, parks, etc.). Prioritize constructing active transportation infrastructure (sidewalks, bicycle lanes, trails etc.), and other amenities within existing unincorporated neighborhoods. • HG1(i) D: Continue consideration of publicly owned lands suitable as sites for the construction of extremely low-income housing and develop a priority of County-owned sites suitable for housing development.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Availability of affordable units in a range of sizes • Lack of access to opportunity due to high housing costs • Location and type of affordable housing • Land use and zoning laws • Lack of public investments in specific neighborhoods, including services or amenities

Program 2.08 – Santa Clara County Association of Planning Officials

The County and cities are encouraged to explore every feasible opportunity to assist developers in building more affordable housing projects. By working collectively with neighborhood residents, the

private sector, and community organizations to promote a diverse housing supply, the County and cities can capitalize on all the ideas, expertise, and untapped resources.

The County will regularly attend and support the Santa Clara County Association of Planning Officials (SCCAPO), which is a monthly meeting of planning officials from each jurisdiction in the county,

where planning issues of common relevancy are discussed. SCCAPO is also a forum where regional entities, such as ABAG, may address local jurisdictions.

Table 4.42: Santa Clara County Association of Planning Officials

PROGRAM OBJECTIVES	Through SCCAPO, establish ongoing workplans to expand intergovernmental process to achieve local and regional housing targets.
GEOGRAPHIC SERVICE AREA	Unincorporated County, Countywide
RESPONSIBLE AGENCY	Department of Planning and Development
FUNDING SOURCE	N/A
POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG2-1: The County and the cities should work cooperatively to ensure that there is a balanced housing supply sufficient to achieve countywide economic, social, and environmental objectives. Further opportunities for inter-agency, intergovernmental, interregional, and public/private cooperation should be sought and encouraged. • HG2-2: Intergovernmental and public and private cooperation shall be encouraged to achieve an adequate supply of affordable housing that meets changing demographic needs in Santa Clara County. • HG2(i) B: Establish and expand intergovernmental processes to more effectively define and achieve local and regional housing objectives. • HG2(i) C: Continue to support cross-agency integration of housing services within the County Departments through internal agency agreements. • HG4-1: The County should continually review its land use and development procedures for opportunities to remove unnecessary constraints to, and provide new opportunities to fund, the construction of affordable housing. • HG4(i) A: Identify and utilize a forum for sharing of best practices for removing governmental and nongovernmental constraints to housing development
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Displacement of residents due to economic pressures • Lending discrimination • Private discrimination • Source of income discrimination

Program 2.09 – Digital Tracking System for ADUs, JADUs & SB9 Units

With the increase in development of various housing options, such as ADUs, JADUs, and SB9 development, ongoing tracking and monitoring is needed to not only address any opportunities to

streamline housing but to also understand and report development activity. The County obtained a new online permit system, Accella, during the last Housing Element reporting period and is continuously working to improve its usability and tracking features. Once the system can automatically populate housing data and building

permits submitted for certain housing types, the County will be able to streamline reports and better monitor progress and patterns of development throughout unincorporated county.

Table 4.43: Digital Tracking System for ADUs, JADUs & SB9 Units

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> By June 2025, DPD will continue to work on refining the digital tracking system. January 2026, DPD anticipates posting housing data online via the public portal.
GEOGRAPHIC SERVICE AREA	Unincorporated County, Countywide

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> HG4-2: Review and reduce, where appropriate, regulations and processing procedures regarding the development of ADU, JADU, and SB9 Units. HG4(i) C: Monitor and modify development standards as needed, including the trends of ADU, JADU, and SB-9 development, to ensure development standards are objective and up-to-date with current State law and reported to the State Department of Housing and Community Development annually.

Program 2.10 – Joint Urban Development Policies

In the aftermath of the “annexation wars” in the 1960s, the cities, the County, and Local Agency Formation Commission (LAFCO) developed and implemented a system for urban growth management that has been in place since the early 1970s. These policies are the foundational growth management strategies guiding long-term land use for the urban areas and the rural unincorporated areas outside the USAs.

Table 4.44: Joint Urban Development Policies

PROGRAM OBJECTIVES	Continue to engage with LAFCO on ongoing land use growth policies and principles.
GEOGRAPHIC SERVICE AREA	Unincorporated County, Countywide
LEAD AGENCY	Department of Planning and Development

FUNDING SOURCE	County, Cities
POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG1-1: Planning for the supply and diversity of housing types in urbanized areas of the County shall include consideration for both current and projected employment, household income needs, and a variety of housing type. • HG1(i) A: Maintain and, where necessary, strengthen County and cities' joint land use policies and agreements that direct urban development to areas within city urban service areas. • HG9-3: The inventory of land zoned and suitable for residential development shall be maintained. • HG9(i) B: Maintain existing County and cities' joint land use policies and agreements that direct urban development to areas within city USAs and preserve rural areas for rural development.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Lack of local or regional cooperation

Program 2.11 – Update Zoning Ordinance for Re-use of Non-Residential Buildings to Residential

The underutilization of non-residential buildings can provide an opportunity to meet the dire need for housing by creating opportunities for adaptive reuse of non-residential buildings where single-family residential uses are allowed in the County Zoning Ordinance. Converting a non-residential structure to a residential use can come with challenges including setback requirements, height limitations, and parking requirements to comply with residential development standards. To address some of these challenges, the

County must update its Zoning Ordinance to allow adaptive reuse of non-residential buildings to a single-family residence without creating unnecessary hurdles while establishing secure and safe housing that meets single-family residential development standards.

The Zoning Ordinance amendment would be in line with existing anti-displacement efforts and may include incentives to encourage adaptive reuse for special needs populations, including persons with disabilities, large households, or female-headed households.

Table 4.45: Update Zoning Ordinance for Re-use of Non-Residential Buildings to Residential

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • By late 2027, initiate engagement with local development community to solicit barriers they may face in development. • By mid-2028, create recommendations for a Zoning Ordinance amendment. • Approved changes anticipated to be in effect in Winter of 2028.
GEOGRAPHIC SERVICE AREA	Unincorporated County, Countywide
LEAD AGENCY	Department of Planning and Development
FUNDING SOURCE	N/A
POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG4-1: The County should continually review its land use and development procedures for opportunities to remove unnecessary constraints and provide new opportunities to fund the construction of affordable housing. • HG4(i) D: Create opportunities for adaptive reuse of non-residential buildings where Single-Family residential uses are allowed in the County Zoning Ordinance. The County will remove barriers related to development standards, such as, providing exceptions to setbacks, building heights, and parking requirements, when a non-residential building is converted to a single-family residence.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Land use and zoning laws • Location of accessible housing • Regulatory barriers to providing housing and supportive services for persons with disabilities • State or local laws, policies, or practices that discourage individuals with disabilities from living in apartments, family homes, supportive housing and other integrated settings • Availability of affordable units in a range of sizes; Lack of access to opportunity due to high housing costs • Location and type of affordable housing; Loss of affordable housing

Program 2.12 – Monitor R/ECAP and Burdened Households Areas

Racially and ethnically concentrated areas of poverty (R/ECAPs) have become a policy focus for the U.S. Department of Housing and Urban Development (HUD). R/ECAPs are neighborhoods where residents are mostly people of color with lower incomes. State statute requires the Housing Element’s Assessment of Fair Housing to analyze R/ECAPs as well as racially concentrated areas of affluence (RCAAs).

Residents in neighborhoods with concentrated poverty tend to be secluded from resources and programs that could otherwise assist

them. Additionally, research shows that children living in neighborhoods with concentrated poverty have higher risks for adverse health outcomes, lower educational attainment, poor employment, and lower lifetime earnings.¹

By monitoring areas of concentrated poverty, the County can better assist in ensuring inclusion in housing development and ensures equal access to amenities, such as parks, grocery stores, quality schools, and employment centers.

Table 4.46: Monitor R/ECAP and Burdened Households Areas

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> By June 2024, the County collected necessary data to assess R/ECAP and burdened household areas and assess opportunities for improvement. On an annual basis, the County will continue to monitor R/ECAPs and burdened household areas and opportunities will be identified and available for the public and housing agencies to use, including through implementation of Program 2.29 – Place-Based Planning and Neighborhood Improvements.
GEOGRAPHIC SERVICE AREA	Countywide
LEAD AGENCY	Department of Planning and Development

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> HG5-5: Monitor and increase access to services and other opportunities for residents of historically disinvested low-income communities (R/ECAP and Burdened Households) across unincorporated county. HG5-6: Support cities in improving opportunities within neighborhoods and areas identified as R/ECAPs and/or neighborhoods with a majority of burdened households. HG5(i) D: Continue to support organizations active in ensuring the rights of all persons to obtain and retain housing. HG5(i) F: Monitor R/ECAP and communities with Burdened Households to identify areas of improvements that will increase access to amenities and resources, such as, but not limited to, transit, parks, groceries, and health facilities.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> Lack of public investment in specific neighborhoods, including services or amenities

¹ City of Anderson, Fair Housing Assessment, <https://www.cityofanderson.com/DocumentCenter/View/3897/Section-C---RE--CAP-Area-Analysis>, accessed 12/3/2022.

Program 2.13 – Universal Design in Housing Development

Universal design is also referred to as barrier-free design and focuses on making a house safe and accessible for everyone, regardless of

age, physical ability, or stature. Universal design in housing ensures a house is accessible for the users and their family and friends. It promotes safety to avoid injury and the ability to live independently despite any mobility changes throughout a lifetime.

Table 4.47: Universal Design in Housing Development

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • Take active steps to ensure compliance with accessibility design standards as required by the California Building Code, ADA Requirements, and Uniform Federal Accessibility Standards (UFAS). • Continue research on inclusion of universal design principles in accordance with State and Federal fair housing laws. • First quarter 2027, begin formulating options for universal design in new housing development and continue public review process. • By Winter 2027, complete applicable ordinance updates for improved accessible universal design principles.
GEOGRAPHIC SERVICE AREA	Unincorporated County, Countywide
LEAD AGENCY	Department of Planning and Development
FUNDING SOURCE	N/A
POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG6-4: Incorporate universal design principles into existing residential building standards. • HG6(i) B: Develop and implement policies and ordinances that create housing that is adaptable to the needs of physically, developmentally, and emotionally challenged persons.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Lack of assistance for housing accessibility modifications • State or local laws, policies, or practices that discourage individuals with disabilities from living in apartments, family homes, supportive housing and other integrated settings

Program 2.14 – Expanded Streamlining of Agricultural Employee Housing

Streamlined planning approval processes for agricultural employee housing in the unincorporated county were adopted in 2020. The approved Zoning Ordinance amendments include provisions for a variety of forms of agricultural employee housing, namely *Small-Scale Permanent, Large-Scale Permanent, Seasonal, and Temporary Agricultural Residences*. All four forms of agricultural employee housing are now subject to a streamlined planning approval process and available to property owners in all four rural base districts in the unincorporated county.

During the development and implementation of this effort, the County identified opportunities for further streamlining of the regulatory requirements and permitting process for agricultural employee housing, particularly those aspects outside of the planning-specific review of development applications – for example,

environmental health, fire safety, and road access. The County will continue to monitor the new processes and present appropriate amendments to further streamline and facilitate the development of these much-needed forms of housing. On an annual basis, the County will identify new opportunities for facilitating the development of farmworker housing, for example in partnership with nonprofit developers.

The County’s current Agricultural Employee Housing provisions comply with Health and Safety Code sections 17021.5, 17021.6, and 17021.8.

This program will be closely coordinated with Program 2.04 and associated programs, the latter of which is an Agricultural Worker Housing Workplan that the Board of Supervisors directed the preparation of at its meeting on August 29, 2023.

Table 4.48: Expanded Streamlining of Agricultural Employee Housing

PROGRAM OBJECTIVES:	<ul style="list-style-type: none"> By June 2025, solicit feedback from development application review agencies, the development community, the public, and the agricultural community on opportunities for improvement. By December 2026, the County will pursue Zoning Ordinance amendments to further streamline the production of agricultural employee housing. On an annual basis, the County will identify new opportunities for facilitating the development of farmworker housing, for example in partnership with nonprofit developers (among others).

- Lack of access to opportunity due to high housing costs
- Loss of affordable housing

Program 2.15 - Adoption of “Reach” Codes

Every three years, the State of California adopts new Building Standards Code contained within Title 24 of the California Code of Regulations. Each city and county may adopt new building codes that exceed the state requirements, commonly known as “Reach” codes. These codes can require or encourage such improvements as electrification of buildings and additional electric vehicle (EV) infrastructure.

On December 7, 2021, the Board of Supervisors approved an ordinance that requires all new construction in unincorporated

county areas to use electricity (not natural gas) for water heating, space heating, cooking, clothes drying, indoor and outdoor fireplaces, and decorative appliances. The ordinance, through electrification of new buildings and expansion of electric vehicle (EV) infrastructure, will support increased EV usage and accomplish the following goals:

- Reduce greenhouse gas emissions,
- Improve indoor air quality and safety, and;
- Meet California Energy Commission (CEC) new construction cost-effectiveness requirements.

Table 4.49: Adoption of “Reach” Codes

PROGRAM OBJECTIVES	The County will continue to implement the ordinance in the next Housing Element cycle.

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG10-1: Promote energy, water efficiency, and electrification in new residential buildings to reduce energy costs, conserve water, provide quality and resilient housing, improve safety, comfort, and reduce greenhouse gas emissions. • HG10(i) A: Adopt new energy efficiency, electrification, water conservation, and building performance standards for existing and new buildings.

Program 2.16 - Expand Home Repair and Modifications to Include ADA Upgrades

For aging adults, housing preferences vary greatly depending on their needs and changing physical abilities. According to a report issued by the U.S. Census Bureau,² as people age and experience the onset of physical decline, areas of their home may become unsafe or difficult to navigate. Many adults are faced with the choice of either

relocating to be closer to family or friends or deciding to age in their own homes within their existing neighborhood. Migration studies of older adults have indicated that they are less likely to change their residence and instead stay in their own homes. As such, there is a need to upgrade or repair homes to better support residents’ changing needs.

Table 4.50: Expand Home Repair and Modifications to Include ADA Upgrades

PROGRAM OBJECTIVES:	<ul style="list-style-type: none"> By October 2025, complete background and technical studies to form the basis of a County-wide program or policy to aid in the improvement and modification of homes for seniors. By December 2025, conduct public outreach on potential programs or policies. By 2026, if feasible, introduce draft policy and/or ordinance for consideration. By 2027, implementation and public outreach.

<https://www.census.gov/content/dam/Census/library/publications/2022/demo/p23-218.pdf>

Program 2.17 - Training and Support to Homeowners Aging in Place

Staying in your home as you grow older is referred to as “aging in place” and it is an increasingly popular desire of older Americans. Multiple benefits are associated with aging in place, including the comfort of home, family and friends nearby, proximity to familiar

networks, and social engagement in one’s community. Although there is a cost associated with modifying a home to accommodate a person’s changing needs, this cost is typically less than that of a home care setting. Identifying barriers of opportunities to support aging in place can help ensure, to the extent possible, that people are able to age in place and are not displaced.

Table 4.51: Training and Support to Homeowners Aging in Place

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> Engage with organizations focused on aging and housing program and policies. Assess whether there are any feasible updates to our existing codes and ordinances that will better support homeowners wishing to age in place by early 2026. By 2027, begin to involve stakeholders with possible updates. By early 2028, adopt any applicable updates.

Program 2.18 – Facilitate State Permit Streamlining Laws

The State continues to adopt permit streamlining laws with the goal of increasing housing production, for example SB 35, SB 330, SB 9, and the State Density Bonus law. In order for applicants to clearly understand the requirements of each of these processes, the County

will prepare and publicly post checklists, standards, eligibility requirements, fees, and the review process for each type of streamlined application. This will allow applicants to proceed with confidence that if an application meets the requirements, they can expect it to be approved, and at what cost to them.

Table 4.52: Facilitate State Permit Streamlining Laws

PROGRAM OBJECTIVE	<ul style="list-style-type: none"> • By December 2025, technical analysis and policy document preparation. • By December 2025, publication of checklists and associated information.

LEAD AGENCY	Department of Planning and Development
FUNDING SOURCE	N/A
POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG1-8: Until a city annexes the unincorporated islands within its USA, the County will plan for housing development in these areas, as necessary to address Housing Element law during a planning cycle and Regional Housing Needs Allocations (RHNA). • HG1(i) E: Amend General Plan and Zoning Ordinance to Plan for Housing in Unincorporated USAs. • HG4-1: The County should continually review its land use and development procedures for opportunities to remove unnecessary constraints to, and provide new opportunities to fund, the construction of affordable housing. • HG4(i) C: Monitor and modify development standards as needed, including the trends of ADU, JADU, and SB 9 development, to ensure development standards are objective, up to date with current State law, and reported to the State Department of Housing and Community Development annually.

Program 2.19 – Streamline Multi-Family Housing Development

Currently, the County requires multi-family housing, where it is allowed, to go through an Architecture & Site Approval (ASA) process, which includes discretionary reviews and a public hearing. While designed to provide maximum community input and allow decision-makers flexibility in deciding what development standards will apply to a particular project, in practice, these subjective and non-mandatory guidelines and standards create uncertainty, which in turn can deter applicants from seeking to develop multi-family housing, with or without affordable units, in the unincorporated county.

Currently, applications for an ASA require review by the County’s subject matter experts who provide recommendations and proposed conditions of approval to the Zoning Administrator, who makes an approval decision at a public hearing. The main basis for the decision is the County’s ASA guidelines, adopted by the County’s Planning Commission in 1981.

The ASA Guidelines include subjective requirements, such as “excellence of design,” a “pleasing sense of scale,” and colors, materials, and designs that blend with the surrounding area “or positive trends.” Plantings should “enhance the architectural quality of the proposed buildings.”

To support meeting the County’s Sixth Cycle RHNA requirements, the County will create a Housing Opportunity Sites zoning designation comprised of the parcels listed in the housing sites inventory. This new zoning designation will not require eligible multi-family development proposals to go through the ASA process. These applications will instead go through a ministerial Planning Clearance process which will focus only on adherence to established codes, such as the California Building Code, the County’s Water Efficiency Ordinance, and the County’s Inclusionary Housing Ordinance, and

other objective standards designed to incorporate desirable characteristics while providing minimal barriers to development.

By January 2027, the County will seek to replace the ASA process for multi-family housing with the Planning Clearance in all districts that allow multi-family housing. Expanding this approach to properties not listed on the housing sites inventory will take additional time to go through the public review and ordinance approval process.

The County is currently in the process of revising all checklists for development applications in order to provide additional clarity to applicants. As part of this process, the County will create written procedures and checklists for all multi-family and mixed-use residential development and post these procedures and requirements to the County’s website. This will include streamlined application types required by various state laws. While Senate Bill 35 does not currently apply to the County, it may in the future, therefore these procedures and checklists will include this application type, as well as Senate Bill 330 and other state-required streamlined permit applications.

Table 4.53: Streamline Multi-Family Housing Development

PROGRAM OBJECTIVE	<ul style="list-style-type: none"> By July 2024, post application procedures and checklists of required items on the County website. By January 2028, develop a ministerial application process for all multi-family housing.

HG4-1: The County should continually review its land use and development procedures for opportunities to remove unnecessary constraints to, and provide new opportunities to fund, the construction of affordable housing. HG4(i) C: Monitor and modify development standards as needed, including the trends of ADU, JADU, and SB 9 development, to ensure development standards are objective, up to date with current State law, and reported to the State Department of Housing and Community Development annually. HG4(i) D: Create opportunities for adaptive reuse of non-residential buildings where single-family residential uses are allowed in the County Zoning Ordinance. The County will remove barriers related to development standards, such as providing exceptions to setbacks, building heights, and parking requirements, when a non-residential building is converted to a single-family residence.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> Land use and zoning laws

Program 2.20 – Tracking and Ongoing Compliance with State Housing Laws

The State continues to adopt legislation that promotes the development of a variety of housing types, including ADUs, transitional housing, group homes, and single room occupancy (SRO) units. It is the County’s intent to proactively track state housing laws and maintain County ordinance codes, policies, and other regulations to ensure ongoing compliance with state housing laws. Where any provisions of County regulations conflict with state law, then those provisions shall be void and state law shall apply, and moreover, the County will work to revise the implicated regulations as appropriate.

To ensure the County’s regulations are consistently in conformance with state law, the County will track and review state legislation and bring forward code amendments on an annual basis to address discrepancies or inconsistencies. Throughout this process, the County will collaborate with HCD to bring current codes into compliance, as needed.

The County is aware of recent legislation that will require the County to review and in some cases make amendments to the County Zoning Ordinance, particularly regarding the following topics:

- Transitional and supportive housing, to comply with Government Code Section 65583(c)(3);
- Permanent supportive housing, to comply with Government Code Section 65651;
- Low Barrier Navigation Centers, to comply with Government Code Sections 65660-65661;
- Single Room Occupancy (SRO) units;
- Group homes of seven or more; and
- Emergency Shelters, to comply with Government Code Section 65583(a)(4).

For example, the County will be amending its Zoning Ordinance and related development standards for SRO units, Group Homes for seven or more residents, and Emergency Shelters. Such amendments will:

- Encourage and facilitate SRO units in the appropriate zones where residential uses are allowed (e.g., multi-family, commercial, mixed-use, etc.) and consider allowing conversion of nonresidential development to SRO Units;
- Allow Group Homes for seven or more residents (referred to as Community Care–Expanded in the County Zoning Ordinance) in all zones that have similar residential uses, with objective standards and permit processes that are equivalent to similar residential uses;
- Revise the definition of Emergency Shelters in the Zoning Ordinance to include expansion for “interim interventions” (e.g., counseling, resources, etc.), and conduct an analysis to ensure there is a sufficient amount of area zoned to allow emergency shelters to meet the demand in the unincorporated county pursuant to Assembly Bill 2339 (2022);
- Permit large-scale Emergency Shelter projects without discretionary action in one or more zones that allow residential uses, with appropriate standards to encourage the development, ensuring access to transit and services, and with sufficient overall capacity for the assessed need; and
- Ensure County compliance with all other requirements emerging from State Housing Laws.

The County’s current Agricultural Employee Housing provisions comply with Health and Safety Code sections 17021.5, 17021.6, and 17021.8.

The County’s current Accessory Dwelling Unit (ADU) and Junior ADU ordinance provisions defer to Government Code Sections 65852.2

and 65852.22, and the County’s Urban Primary Unit (aka Senate Bill 9) ordinance defers to Government Code Sections 65852.2, 65852.21, and 65852.22, as those laws may be amended from time to time. While the County may choose to further update the ADU and Senate Bill 9 provisions of the Zoning Ordinance, the County considers both sections to be compliant because they explicitly defer to the California Government Code if any provisions conflict with the local ordinance code.

As noted in the table below, the County will review its current ordinance codes and determine what amendments are needed by December 2024, make such necessary amendments by December 2026, and review new legislation on an annual basis.

Table 4.54: Tracking and Ongoing Compliance with State Housing Laws

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • By December 2024, the County will review its codes and regulations against recent state laws and identify areas that require updating. • By December 2025, the County will adopt revisions to County codes and regulations necessary to comply with recent state laws, including but not limited to Government Code sections 65583(a)(4), 65583(c)(3), 65651, 65660-65661, 65852.2, 65852.21, and 65852.22. • By the end of each year thereafter, the County will continue to track and review its codes and regulations and identify areas that may require updates.

CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Land use and zoning laws

Program 2.21 – Streamlined Rehabilitation and Replacement

Due to the County’s policy for the past 50 years to encourage cities to annex unincorporated lands where multi-family development is proposed, there are currently a limited number of multi-family buildings of four or more units in the unincorporated county. The County has identified 97 such developments, of which only 12 have 10 or more units and only 2 have 20 or more units. These relatively larger developments are located on the Stanford University Campus, the rural unincorporated area of San Martin, and in the Cambrian Park, Fruitdale, Burbank, Parkmoor, and Alum Rock neighborhoods of San José. They were established between 1917 and 1998. Smaller multi-family buildings (less than 10 units) were primarily constructed in the 1950s, when the County experienced a housing and population boom following World War 2. Out of these 97 developments, 94 were constructed prior to 1970.

The County has identified 179 two- and three-unit residential buildings within the unincorporated county, not including ADUs. No such units have been constructed since 2016, and only two new buildings and one rehabilitated building have been constructed since 2000. Some 158 buildings are at least 50 years old, 73 are at least 75 years old, and 30 are at least 100 years old. Many of these units were built prior the County requiring building permits (1947), or prior to current zoning requirements, leaving many in a legal nonconforming status. This status provides a serious disincentive to any property owner seeking to renovate or rebuild these older units, as significant work may require compliance with the existing zoning standards.

The County additionally has two condominium developments in the unincorporated county; Fairway Gardens constructed in 1972, which consists of 20 duet homes and one single-family residence, and Holmes Estates constructed in 1982, which consists of 19 attached

and semi-detached homes. Both developments are located in the East Foothills area of San José.

The overwhelming majority of units in the unincorporated area are single-family dwellings. None of these units are considered below market rate, although some have developed accessory dwelling units (ADUs) or Junior ADUs that could be rented out at differing levels of affordability. The County has identified 17,737 single-family homes and 52 duet homes in the unincorporated county. These residences range in age from the Victorian era to newly constructed. 12,301 of these single-family residences (69.1%) were constructed more than 50 years ago, with only 715 of such units undergoing a major rehabilitation. See Chapter 2, section 2.04d for further analysis and discussion.

In most cases, single-family residences can be rehabilitated or replaced through existing streamlined processes without any planning entitlements or other County-imposed requirements prior to building permit application. However, some sites are eligible for an administrative annexation into a neighboring city (when located in an urban service area and adjacent to or within 300 feet via a public right-of-way to a city). Other single-family residences require building site approval (BSA) to be replaced, or when rehabilitation is significant in scope and considered a “rebuild.” More about the BSA process is detailed in Chapter 2, section 2.06e.

Beginning in 2025, the County will review options to allow rehabilitation or replacement of aging multi-family units without compromising their legal nonconforming status. In 2026, the County will develop ordinance or policy updates to help streamline such rehabilitation and replacement of older multi-family units. The County will also consider opportunities to preserve the affordability of existing units, whether required or naturally occurring. This may

include partnering with community development corporations to acquire, rehabilitate, and preserve the affordability of units.

The County works with Rebuilding Together Silicon Valley to promote critical home repairs in a successful program that has provided support to 430 property owners of very low-, low-, or moderate-income, from 2015 to 2022 (refer to Program 1.31). Such aid totals over \$1.4 million over this period. The County will continue this partnership and seek out opportunities to work with other community-based organizations to facilitate rehabilitation of existing units (refer to Program 1.32).

Lastly, the County will assess the housing stock and conditions of agricultural worker housing and explore related opportunities to streamline rehabilitation and replacement of such units, as appropriate (refer to Program 2.04 and associated programs).

Table 4.55: Streamlined Rehabilitation and Replacement

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> By December 2025, the County will review options to allow for the rehabilitation or replacement of older multi-family units without losing legal nonconforming status. By December 2026, the County will pursue ordinance or policy amendments to streamline such rehabilitation or replacement, with a specific focus on addressing agricultural employee housing needs. By December 2031, the County’s quantified objective for rehabilitation of affordable units, most likely to be multi-family, is 380 units; the County’s quantified objective for rehabilitation of above moderate-income units, most likely to be single family residences, is 667 units. Ongoing: the County will seek out opportunities to work with community development corporations and other community-based organizations to rehabilitate and preserve existing housing.

Expand monitoring component to include rent price information.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> Land use and zoning laws Deteriorated and abandoned properties

Program 2.22 – Objective Standards for Multi-Family Housing

Currently, the County relies on subjective development standards when considering Use Permits, Architecture & Site Approvals, and Design Review. Therefore, it is currently difficult for a developer seeking to build multi-family housing to know what development and design criteria are necessary to include for their project to be approved. To increase certainty, the County will develop objective development standards for all multi-family housing.

The County is committed to removing barriers to multi-family and mixed-use residential development on the sites identified in the housing sites inventory in the short-term, and more broadly in the long-term.

The County is considering requirements for sites listed in the housing sites inventory, both on the Stanford University campus and within the San José urban service area, but the County will also pursue

extending objective standards to all other multi-family housing projects. This will include a review of parking standards for multi-family developments, including requirements for guest/short-term parking intended for drop-off/delivery and a sliding scale of parking requirements for varying unit types (i.e., different standards for studios, one-bedrooms, two-bedrooms, etc.).

Creating such standards will also better align the County with new state housing laws that require ministerial approval under certain circumstances, where only objective standards may be applied. These standards may be neighborhood-specific, tiered based on the number of units, or general enough to apply to all project types. The County intends to limit these standards to those that will not create prohibitive costs or other impediments to development of multi-family housing.

Table 4.56: Objective Standards for Multi-Family Housing

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> By June 2024, the County will complete a study of potential objective standards for multi-family housing projects on the Stanford University campus. By June 2025, the County will present objective standards for multi-family housing projects on the Stanford University campus to the Board of Supervisors for adoption. By December 2025, the County will complete a study of potential objective standards for multi-family housing projects on housing opportunity sites in the San José urban service area and consider adoption of these standards. By December 2025, the County will complete a study of potential objective standards for all multi-family housing projects and consider adoption of these standards. By December 2026, the County will pursue Zoning Ordinance amendments to reduce governmental constraints in the development of multi-family housing.

<p>CONTRIBUTING FACTORS</p>	<ul style="list-style-type: none"> • Land use and zoning laws • Availability of affordable units in a range of sizes • Lack of access to opportunity due to high housing costs • Location and type of affordable housing • Loss of affordable housing

Program 2.23 – Tracking Housing Conditions

The County currently tracks building, grading, and zoning violations; however, the County’s database does not easily allow for identification of violation types beyond those three broad categories. In 2024, the County will add a subcategory that allows for violations related to housing conditions to be easily identified and tracked. This will allow greater clarity in reporting, and allow County staff to better connect those impacted by housing-related violations with the appropriate resources.

The County will add a housing-related subcategory to violation records in the County’s database by December 2024, track such violations during the following year, and by December 2025 create a webpage to connect those impacted by housing-related violations to the appropriate public resources, including the ability to report substandard housing conditions online and anonymously.

Following the Farmworker Housing Needs Assessment (Program 2.04), and one year of tracking reports of housing-related violations, the County will assess the need for a broad housing conditions survey and seek partners and resources to conduct such a survey, as appropriate.

Table 4.57: Tracking Housing Conditions

<p>PROGRAM OBJECTIVES</p>	<ul style="list-style-type: none"> • By December 2025, the County will add a housing-related subcategory to violation records in the County’s database. • By December 2026, the County will create a webpage to connect those impacted by housing-related violations to the appropriate public resources, including the ability to report substandard housing conditions. • By December 2026, the County will assess the need for a broad housing conditions survey and seek partners and resources to conduct such a survey, as appropriate.

Program 2.24 – Apply for Prohousing Designation

The State has created a Prohousing Designation Program that HCD can bestow on jurisdictions that meet certain criteria demonstrating an overall commitment to proactively helping the State meet its goal of building two million new housing units. Jurisdictions with such a designation will be eligible to receive funds to facilitate housing

production. Once the County adopts a certified Housing Element, it will begin work toward submitting an application to HCD for the Prohousing Designation. To qualify for the program, additional policy or ordinance changes may be required, and the County will consider implementing changes that will increase the likelihood of earning entry to the program.

Table 4.58: Apply for Prohousing Designation

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • By December 2025, the County will review all existing policies in relation to the Prohousing Designation criteria. • By December 2026, the County will consider changes to existing polices and ordinances to better align with the program and submit an application.

CONTRIBUTING FACTOR	<ul style="list-style-type: none"> • Lack of access to opportunity due to high housing costs • Location and type of affordable housing

Program 2.25 – Incentivize Lot Consolidation

The unincorporated areas within the City of San José’s urban service area have a historic land use pattern of small parcels that are less than 0.5 acres in size. Within these urban pockets, approximately 96 percent of parcels are less than 0.5 acre and 87 percent are less than 0.3 acres in size. The average parcel size in these areas is 0.35 acres and the median parcel size is 0.18 acres. In built-out communities such as Burbank, Fruitdale, and Alum Rock, parcels that allow mixed-use zoning can be incentivized to develop lower-income housing. However, most vacant and nonvacant parcels within these neighborhoods are relatively small legal lots under 0.5 acres. The County is aware that multi-family housing, especially projects including affordability-restricted units, are less likely to be built on lots smaller than 0.5 acres. Therefore, the County will aim to facilitate the consolidation of these smaller lots when possible.

To facilitate lot consolidation, the County currently allows for neighboring lots to be consolidated through a voluntary merger of contiguous parcels for a nominal fee. The County will implement a

Table 4.59: Incentivize Lot Consolidation

technical assistance program to educate property owners and facilitate their voluntary lot merger. To further incentivize multi-family development, the County will adopt strategies to encourage the consolidation of smaller lots in areas suitable for such development. Lot consolidation strategies may include increased densities, additional process streamlining for projects that include affordable housing units, the reduction of development standards, and deferral or reduction of fees, both of which are already minimal in the unincorporated county. Once these new strategies have been implemented, the County will conduct annual outreach to owners of adjacent small lots to encourage that they take advantage of a voluntary lot merger.

The County has a history of completing lot consolidations, usually when property owners own multiple full or partial lots that are not large enough to develop a single-family residential project. Once adopted, the County will advertise lot consolidation incentives to existing property owners and prospective mixed-use and affordable housing developers.

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> By June 2025, the County will publish a technical assistance brochure on the County’s website. By December 2025, the County will research policy and ordinance changes to encourage and streamline lot consolidation. By December 2026, the County will pursue the necessary code amendments to encourage and streamline lot consolidation, based on the outcome of the previous year’s research. In 2027, and each year thereafter, the County will conduct property-owner outreach to facilitate small-lot consolidation.
GEOGRAPHIC SERVICE AREA	Unincorporated County, Countywide
LEAD AGENCY	Department of Planning and Development
FUNDING SOURCE	N/A
POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> HG1-8: Until a city annexes the unincorporated islands within its USA, the County will plan for housing development in these areas, as necessary to address Housing Element law during a planning cycle and Regional Housing Needs Allocations (RHNA). HG1(i) E: Amend General Plan and Zoning Ordinance to Plan for Housing in Unincorporated USAs.

	<ul style="list-style-type: none"> • HG4-1: The County should continually review its land use and development procedures for opportunities to remove unnecessary constraints to, and provide new opportunities to fund, the construction of affordable housing. • HG4(i) D: Create opportunities for adaptive reuse of non-residential buildings where single-family residential uses are allowed in the County Zoning Ordinance. The County will remove barriers related to development standards, such as providing exceptions to setbacks, building heights, and parking requirements, when a non-residential building is converted to a single-family residence.
<p>CONTRIBUTING FACTORS</p>	<ul style="list-style-type: none"> • Availability of affordable units in a range of sizes • Lack of access to opportunity due to high housing costs • Lack of affordable, accessible housing in a range of unit sizes • Land use and zoning laws • Location and type of affordable housing

Program 2.26 – Mid-Cycle Review

To ensure the County meets its sixth cycle RHNA obligations, the County will complete a mid-cycle review by December of 2026. This program will include a review of permits issued in unincorporated areas, units transferred as the result of annexation, and a forecast for the remainder of the sixth cycle. The mid-cycle review will determine whether the County is on track to meet the its RHNA obligations by the end of the cycle. Depending on the outcome of such review, the County will evaluate opportunities to expand the sites inventory and to incentivize additional housing development through County rezoning and other programs. This program will focus on additional ways to remove barriers to the production of housing at the affordability levels shown to be most needed. As the result of the

mid-cycle review, the County will take additional actions as needed to meet the County’s RHNA obligations by the end of the sixth cycle, which may include:

- Selection of additional sites in unincorporated areas appropriate for housing development affordable to households with a range of incomes.
- Selection of additional sites in unincorporated areas appropriate for County-led housing affordable development.
- Removal of barriers to the production of housing at the affordability levels shown to be most needed, for example, by rezoning, streamlining CEQA and permit processing, and removal or reduction of any remaining fees or subjective requirements.

Table 4.60: Mid-Cycle Review

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> By December 2026, complete review of permits issued in unincorporated areas, units transferred as the result of annexation, and a forecast for the remainder of the sixth cycle. Should the mid-cycle review indicate that the County is not on track to meet its RHNA obligations, additional actions will be taken by December 2027.

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG1-3: Focus the County’s limited housing production resources on special needs populations, farmworkers, and extremely low-income households. • HG1-6: Ensure housing development projects within unincorporated Urban Service Areas contain an equitable mix of housing typology and housing options for different household income levels. • HG1(i) B: Encourage public support of city efforts to create a balanced housing supply, which includes housing affordable to special needs, farmworkers, and extremely low-income households. • HG6(i) E: Support implementation of housing-related policies in the county. • HG9-1: The conservation and rehabilitation of the existing housing supply shall be encouraged and facilitated. • HG9-2: Publicly assisted housing rehabilitation efforts should not have the effect of reducing the available supply of housing for extremely low-income households. • HG9(i) A: Maintain ongoing programs for monitoring the physical condition of neighborhoods to assist in guiding rehabilitation program efforts, scheduling infrastructure maintenance activities, and to provide accurate information for Federal and State programs. Expand monitoring component to include rent price information.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Availability of affordable units in a range of sizes • Lack of access to opportunity due to high housing costs • Location and type of affordable housing • Loss of affordable housing

Program 2.28 – Reasonable Accommodation Policy

To ensure the County is removing barriers that may prevent or make it more challenging for people with disabilities to develop housing, the Department of Planning and Development allows applicants to seek a reasonable accommodation, as determined by the County’s Zoning Administrator. The criteria and factors considered by the Zoning Administrator in processing a reasonable accommodation request are:

- Existing, applicable policies or regulations,
- Availability of solutions not requiring an exception or modification of standards,

- How the request directly relates to the needs of the owner/occupant with disabilities, and
- The exact nature of the exception or modification proposed.

Prior to December 2024, the County will review and amend the findings required to grant a reasonable accommodation such that only the following three questions are being considered:

- Is the request for a person with a disability?
- Does the request fundamentally alter or invert the zoning and land use?
- Is there a financial/administrative burden?

Table 4.62: Reasonable Accommodation Policy

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> By December 2024, the County will review and amend its policies and procedures for reasonable accommodations.

HG4(i) E: Ensure access for all by reviewing application requirements and design requirements, globally or through an accommodation process.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> Inaccessible government facilities or services

Program 2.29 – Place-Based Planning and Neighborhood Improvements

The County dissolved its Department of Public Works in 1974 and now relies on several different departments to conduct capital improvement projects, including the Department of Roads and Airports, Department of Parks and Recreation (County Parks), the Department of Facilities and Fleet, and the Office of Sustainability. Additionally, the County coordinates capital improvement projects with special districts such as the 2-3 Sanitary District, Burbank Sanitary District, and the Santa Clara Valley Transit Authority.

Through the implementation of this program, the Department of Planning and Development will serve as a facilitator and liaison, meeting annually with internal and external stakeholders to track and explore further opportunities for place-based planning and neighborhood improvements in unincorporated areas of the county that have been historically underserved. In most cases, the County’s place-based investments are overseen by other entities and require outside approval; the Department of Planning and Development’s role is primarily to coordinate and facilitate such efforts.

The County will continue to invest in and implement place-based measures for community revitalization and equitable quality of life throughout the county, with a focus on unincorporated areas that have higher concentrations of affordable housing or lower income households. Such areas include: the unincorporated San José neighborhoods of Alum Rock, East Foothills, Burbank, Fruitdale, and Fairgrounds, Stanford University Campus, and the rural South County communities of San Martin and unincorporated Gilroy.

The County’s approach to place-based measures will generally consist of three components: Outreach, Planning, and Investment.

Outreach: The County will utilize a variety of methods to ensure transparency, access, and meaningful input from the most impacted segments of the community. Outreach will be used to frame and help direct the County’s place-based efforts and prioritize unincorporated community planning and investment.

Planning: The County will pursue planning activities in targeted unincorporated communities and coordinate with adjacent jurisdictions and relevant planning entities, as appropriate. Planning will be comprehensive and address a variety of elements, such as land use, circulation, safety (including evacuation routes),

environmental justice, community facilities and resources, and open space and recreation.

Investment: The County will continue to invest in and implement capital improvement projects that aim to revitalize unincorporated neighborhoods and communities in targeted areas. Investments include a variety of neighborhood improvements and community development based on outreach and planning, such as transit, community meeting facilities, recreation opportunities, parks, public art, community programming, streetscapes, accessibility, safe routes to school, and active transportation. Examples of currently planned public improvements and place-based strategies include:

- The County is working to facilitate the development of public recreation facilities at the Fairgrounds, which is adjacent to a residential area of incorporated San José with low-income households and qualifies as a R/ECAP.
- County Parks manages 28 regional parks encompassing over 52,000 acres of land, including Penitencia Creek (just over a mile from Alum Rock), Los Gatos Creek County Park (less than a mile from Fruitdale), Coyote Lake Harvey Bear Ranch County Park (less than a mile from San Martin), and Chitactac-Adams Heritage County Park (3 miles from Gilroy and San Martin). County Parks are free to enter on foot or by active transportation (e.g., bicycles, scooters, etc.). There is a \$6 daily or \$95 annual vehicle entry fee, with reductions for people with disabilities, senior citizens, low-income earners, and active military personnel and their dependents. The Parks Department is currently in design for renovation and expansion of the Valley View Campgrounds at Mount Madonna County Park west of Gilroy, with construction tentatively scheduled to start in 2025. Other approved projects at Mount Madonna County Park that are not in progress include design and construction of a new visitor center, children’s adventure play area, and picnic areas near the existing visitor center. A Master Plan Amendment process for Coyote Lake – Harvey Bear Ranch County Park Master Plan has been budgeted and is slated to begin in late 2024 or early 2025, depending on progress of other current projects. County Parks recently put out to bid a trail construction project for the Coyote Canyon property in unincorporated Morgan Hill/San Martin. Construction will start by mid-2024 and is scheduled to be completed by end of 2024. Once opened, the Coyote Canyon property will be incorporated into Coyote Lake – Harvey Bear Ranch County Park.
- The County Office of Sustainability is in the process of planting 3,000 trees in disadvantaged neighborhoods (as defined by Cal Fire) throughout the county.
- The County Department of Environmental Health has initiated a new Lead Safe Homes Program in 2024. The program will help identify and eliminate hazards posed by lead-based paint in private residential units throughout Santa Clara County. The program provides residents with no or low-cost lead paint inspections and abatement services. This program will aim to provide services equitably across the county, ensuring the highest risk and highest need groups are prioritized for services, including areas that have higher concentration of affordable housing and lower-income households. The program will accomplish this by working with community leaders and stakeholders throughout underserved areas of the county to ensure barriers to entry are minimized and community input is obtained throughout the planning, implementation, and evaluation process. The program is currently in the planning phase and will begin a pilot phase at a limited number of properties in early 2025, followed by countywide implementation during the second half of 2025.
- As a result of the recently adopted update to the Stanford Community Plan, Stanford University is required to plan for housing for all new students and employees related to additional

academic and research building development. Sites identified for housing in this Housing Element are already situated close to high-frequency transit stops, jobs on campus, and amenities on campus or in nearby neighborhoods. The County will continue to work with the University to eliminate barriers to housing and other community amenities for low-income students and employees of Stanford.

- With support from the County, the City of San José Libraries operate branches in Alum Rock and Fruitdale with community spaces and robust programming, which will continue.
- With support from the County, the Valley Transit Authority connects Alum Rock to job centers in the downtowns of San José and Mountain View, as well as office parks in northern San José, Milpitas, Santa Clara, and Sunnyvale, and event spaces such as Levi Stadium and SAP Center, through its light rail service since

2004, and through a bus rapid transit (BRT) line since 2017. The opening of the Milpitas BART station in 2020 (a VTA light rail transfer point) has further connected Alum Rock to locations throughout the Bay Area, and the BART extension into Santa Clara County continues to move forward.

In the first quarter of each calendar year, starting in 2025, the Department of Planning and Development will initiate coordinating meetings with internal and external stakeholders to track outreach, planning, and investment associated with County’s various place-based measures. Through these meetings, the County will explore further opportunities for place-based planning and neighborhood improvements in unincorporated areas of the county that have been historically underserved.

Table 4.63: Place-Based Planning and Neighborhood Improvements

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • By March of 2025, and each year thereafter, the Department of Planning and Development will initiate annual coordinating meetings to prioritize capital improvement projects and planning in unincorporated areas of the county that have been historically underserved. • As the result of annual coordinating meetings, by July of 2025, and each year thereafter, the Department of Planning and Development will identify further opportunities for place-based planning and neighborhood improvements and present them to the County Board of Supervisors through the Housing, Land Use, Environment, and Transportation Committee. • On an annual basis, County offices which are eligible to receive regional, state, and federal funding will submit applications for funds to support capital improvements, sustainable development, active transportation, and affordable housing. • By July of 2029, the Department of Planning and Development will identify and facilitate at least eight place-based strategies that result in community investment and tangible neighborhood improvements in areas that have higher concentrations of affordable housing or lower-income households.

Program 2.30 – Explore Housing Opportunities in the RCAA

To ensure the County is affirmatively furthering fair housing, the County will explore ways to remove barriers that may prevent or make it more challenging for people of all backgrounds and income levels from accessing or developing housing in neighborhoods where the population is disproportionately white and affluent. The unincorporated areas of the County contain two only two census-designated places identified as racially concentrated areas of affluence (RCAA), the Lexington Hills area and Loyola.

RCAAs exist due to both historical and present-day decisions by private developers and government actions. While race-based discriminatory practices were outlawed through the federal Fair Housing Act of 1968, factors such as restrictive zoning, lack of vacant land, and high land values can continue to create barriers to fair housing. Both Lexington Hills and Loyola have additional constraints to increased housing development. Please refer to Appendix N: Assessment of Fair Housing section X.6 (ii) for a full analysis of the unincorporated County’s RCAAs.

Lexington Hills describes a series of small communities located in the Santa Cruz Mountains. Population growth and rising costs of housing in the valley areas of the County have pushed more residents to seek homes in the Lexington Hills area, in addition to those seeking a

more remote and rustic lifestyle. However, the area has high fire risk and is in close proximity to the San Andreas Fault. The area also lacks public transportation, sewer service, and, in many cases, piped water. These considerations, which also influence property insurance rates, make the development of housing types that are more affordable to low- and moderate-income households infeasible by necessitating large lot sizes. Doing so would also result in moving more low- and moderate-income people into areas with high risks of devastating wildfires, earthquakes, and landslides caused by geologic and rain events.

Unincorporated RCAAs in Santa Clara County that do not contain census-designated places generally have the same obstacles to creating more inclusive communities as Lexington Hills, and often to an even greater degree.

Loyola, particularly the portions of it east of I-280, is not subject to as significant environmental constraints as Lexington Hills. Notwithstanding, lot sizes within the community tend to be quite large, consistent with historical development patterns dating back to the 1920s and current zoning requirements. The initial development of Loyola as an affluent and all-white community was driven principally by speculative private sector investment, enforced by deed restrictions, rather than County policy, but County policy later

reinforced those choices. In 1994, the County adopted a zoning overlay district for the Loyola area at the request of residents, and with the justification of aligning the district with standards found in the neighboring City of Los Altos, to which the County expected the neighborhood would eventually be annexed. These restrictions added a maximum floor area ratio (FAR) of 35% in most cases, with an absolute floor area cap on larger lots, to the existing larger minimum lot sizes. As tech companies expanded in the west valley area and San Francisco peninsula, Loyola’s draw as a wealthy bedroom community has grown, and with it there has been a demographic shift. In 2010, 2,222 of the 3,261 residents identified as White alone (68%), while 757 identified as Asian alone (23%). In 2020, 2,001 of the 3,491 residents (57%) identified as White alone, while 1,109 (32%) identified as Asian alone.

Today, while a 35% floor area ratio restriction exists to more closely align with development restrictions of the neighboring city in anticipation of annexation, the applicable County zoning is not the only barrier to building more racially and socioeconomically inclusive housing in Loyola. The area lacks proximity to job centers, services, and transportation, but perhaps the greatest barrier is the high land costs and the lack of vacant or underutilized parcels. The County will

have to be opportunistic and provide a comprehensive approach to overcome those hurdles.

One possible option would be for the County to acquire parcels with single-family homes that may be at the end of their useful life in the future, however this approach would be prohibitively expensive unless there is a drastic change to the real estate market. A more realistic option would entail partnering with religious congregations, like the Antiochian Orthodox Church of the Redeemer, that own land within Loyola.

Prior to December 2025 and December 2029, the County will contact institutional landowners in the Loyola area to gauge interest in allowing affordable housing on their sites to potentially be included in the mid-cycle review or 7th cycle housing element update.

Prior to December 2029, the County will review the County Zoning Ordinance and analyze what amendments might reduce barriers to developing a more diverse community in the Loyola district, including, but not limited to, promoting ADU and Junior ADU development. The Department of Planning and Development will propose a set of amendments to the Board of Supervisors by December 2030 if RHNA targets have not been met.

Table 4.64: Explore Housing Opportunities in the RCAA

<p>PROGRAM OBJECTIVES</p>	<p><u>If the County does not meet its RHNA targets by the required mid-cycle, the County will conduct the following process:</u></p> <ul style="list-style-type: none"><u>By December 2025, the County will engage with institutional property owners in the Loyola area to encourage affordable housing development on their properties for inclusion in the County's mid-cycle review.</u><u>By December 2029, the County will engage with institutional property owners in the Loyola area to encourage affordable housing development on their properties for inclusion in the County's mid-7th cycle housing element update.</u><u>By December 2029, the County will review the County Zoning Ordinance and analyze what amendments might reduce barriers to developing a more diverse community in the Loyola district.</u>

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG1-10: Promote access to racially concentrated areas of affluence to a wide range of residents. • HG1(i) G: Seek opportunities for the County to work with institutional landowners to develop housing affordable to a wide range of income levels and backgrounds. • HG4-1: The County should continually review its land use and development procedures for opportunities to remove unnecessary constraints to, and provide new opportunities to fund, the construction of affordable housing. • HG4(i) C: Monitor and modify development standards as needed, including the trends of ADU, JADU, and SB 9 development, to ensure development standards are objective, up to date with current State law, reported to the State Department of Housing and Community Development annually, and remove barriers to housing development.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Lack of access to opportunity due to high housing costs • Location and type of affordable housing

4.03c Behavioral Health Services Department

The Behavioral Health Services Department (BHSD) is the public behavioral health system for Santa Clara County. The mission of BHSD is to assist individuals in our community affected by mental illness and serious emotional disturbance to achieve their hopes, dreams, and quality of life goals. To accomplish this, services must be delivered in the least restrictive, non-stigmatizing, most accessible environment within a coordinated system of community and self-care, respectful of a person's family and loved ones, language, culture, ethnicity, gender, and sexual identity.

Program 3.01 - SCC Behavioral Health Services Department Evans Lane Wellness and Recovery Center

The Evans Lane Wellness and Recovery Center is dedicated to serving individual adults who suffer from a mental illness, substance use, and co-occurring disorders who are involved in the criminal justice

system. The center is overseen by the BHSD's Forensic, Diversion and Reintegration Division. The program works in collaboration with Santa Clara County Superior Court, Santa Clara County Adult Probation Department, and the California Department of Corrections and Rehabilitation. The program is a community environment based on wellness and recovery. The participants of this program are active community members. This is demonstrated through the community governance meetings, which are facilitated by the participants of the program. In addition, the participants display ownership of their recovery, the program, and the community environment by contributing to a variety of tasks. The program includes both residential and outpatient services. These two distinct programs are featured on one campus. The residential program provides housing, support, and care to the justice-involved population and supports the participants by providing evening and weekend groups and activities. This program is fully implemented, and clients released

from federal, state prisons, and local jails access this program on an ongoing basis. In addition, referrals to this program come from our

justice partners. The program served 434 clients between FY21 and FY22 and is ongoing.

Table 4.654: SCC Behavioral Health Services Department Evans Lane Wellness and Recovery Center

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • Within the first 30 days of residence, the client will have completed a transition plan for self-sufficiency which will include employment/education and housing. The plan will detail the behaviorally measurable goals that are needed for development to transition from Evans Lane within the 6-month period. The recovery philosophy of "harm reduction" is applied at Evans Lane. • Social skills training is aimed at teaching specific skills to clients for getting their interpersonal needs met and for handling common situations involving alcohol, drugs use, and other high-risk behaviors. Group sessions are focused primarily on teaching particular skills that are important for functioning without alcohol and drugs and staying on psychiatric medications. • Program length for social skill building varies based on the needs of the client and the range of social skills that are being addressed. The fewer the skills taught the shorter the duration. Curricula can include a variety of skills pertinent to the underlying dual-diagnosis issues as well as the skills to live within the Evans Lanes environment.
GEOGRAPHIC SERVICE AREA	Countywide
LEAD AGENCY	County Department of Behavioral Health Services
FUNDING SOURCE	Mental Health Services Act, General Fund and AB109 Funding
POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG1-5: Prioritize suitable county-owned underutilized parcels within Cities and Urban Service Areas for affordable, supportive and workforce housing development. • HG1(i) D: Continue consideration of publicly owned lands suitable for the construction of extremely low-income housing and develop a priority of county-owned sites suitable for housing development. • HG5-5: Identify and increase access to services and other opportunities for residents of historically disinvested low-income communities (R/ECAPs and Burdened Households) across unincorporated county. • HG5(i) C: Fair housing services provided shall be respectful of language, culture, and special needs. • HG6-1: Encourage the development of affordable housing which is suitable for a variety of special needs populations. • HG6(i) A: Advocate for the expansion of Federal and State programs and funding to assist local government in developing special needs housing not provided through the private market. • HG6(i) E: Support implementation of housing-related policies in the county.

Program 3.02 – Substance Use Recovery Residences (formerly Department of Alcohol and Drugs Services)

The Behavioral Health Services – Substance Use Treatment Services (SUTS) provides 310 recovery residence beds for eligible clients.

While being housed, clients attend substance use treatment service programs. The SUTS recovery residences provide housing for men, women, women with children, and men with children. SUTS recovery residences served 471 clients in FY22 and is ongoing.

Table 4.6566: Substance Use Recovery Residences (formerly Department of Alcohol and Drugs Services)

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> Substance Use Treatment Services (SUTS) provides 310 Recovery Residence beds for eligible clients. 4.03d Office of County Executive

Program 4.01 – Dispute Resolution Program

Santa Clara County Office of Mediation and Ombuds Services (OMOS) formerly referred to as DRP has provided mediation services to Santa Clara County residents since 1977, paid for from County funds and provided free of charge to County residents. These services include mediation, conciliation, and coaching services to any and all landlords and tenants within Santa Clara County. OMOS empowers people by facilitating communication and increasing education in conflict resolution principles, thereby providing a model for effective efficient resolution of disputes. OMOS provides specific

services tailored to meet the diverse individual needs of those involved in daily disputes or those affected locally by national and global events. By being proactive, OMOS supports a community where individual differences are respected while responsibility for conflict and out comes are encouraged.

OMOS previously considered adopting a sliding scale fee for service but did not adopt a sliding scale due to the cost to administer such a program. Instead, OMOS continues to provide services free to County residents. OMOS has updated its website and partnered with the City of San José Housing Department to reach more vulnerable populations. Mediation services are provided by OMOS via Zoom or in person.

Table 4.667: Dispute Resolution Program

PROGRAM OBJECTIVES	The program will continue to expand outreach to high-risk and vulnerable populations and otherwise maintain the program.

POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG5-3: The rights of tenants and landlords shall be recognized and protected, and opportunities for mediation of disputes shall be provided. • HG5-4: Reduce displacement of low-income household tenants and increase tenant protections prior to evictions proceedings. • HG5(i) E: Maintain tenant/landlord dispute mediation services in all areas of the county.
CONTRIBUTING FACTORS	<ul style="list-style-type: none"> • Displacement of residents due to economic pressures • Loss of affordable housing • Private discrimination

Program 4.02 – Agricultural Worker Housing Workplan

In 2020, as an implementation measure of the Santa Clara Valley Agricultural Plan, the County adopted Zoning Ordinance amendments to streamline the land use entitlement approval process for agricultural employee housing based on objective development standards and requirements. During the first two years of implementation, only three new units of privately funded housing were developed.

The County Board of Supervisors directed County staff and County Counsel on August 29, 2023, to develop an Agricultural Worker Housing Workplan to be presented to the Board in 90 days, which may consist of the following components:

- *Process, Informational, and Funding Strategies* – Including further research into the housing conditions and needs of agricultural workers, engaging specialists, and establishing a stakeholder committee.

- *Permitting Process Improvements* – Including research and proposals to make the permitting process for agricultural worker housing more understandable and easier to undertake with more parcel-specific information to help developers make better informed business decisions.
- *Strategies Utilizing County Land* – Including exploration of partnerships to develop agricultural worker housing on County-owned land.
- *Legislative and Partnership Strategies* – Including work with the state, other jurisdictions, and agencies to explore funding and policy strategies for developing agricultural worker housing.

Once the workplan is complete, the County will begin its implementation.

This program will be closely coordinated with Program 2.04 and associated programs.

Table 4.6768: Agricultural Worker Housing Workplan

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • By December of 2024, finalize a work plan to further promote agricultural worker housing and begin implementation, revising the work plan from time to time, as needed. • <u>Ongoing: On an annual basis, the County will review the progress of this program, assessing the number of applications, building permits issued and loans made for farmworker housing.</u>

CONTRIBUTING FACTORS	<p>HG8(i) C: Monitor new State and Federal Funding regarding farmworker rental and homeownership programs and collaborate with housing developers to identify sites suitable for farmworker housing.</p> <ul style="list-style-type: none"> • Location and type of affordable housing • Lack of access to opportunity due to high housing costs
----------------------	---

Program 4.03 – Coordinated Annexation and RHNA Transfer

Background

For over 50 years, the County has worked cooperatively with [the 15 cities in Santa Clara County](#) and LAFCO to facilitate the annexation and efficient use of urban unincorporated islands. According to agreements reached in the early 1970s, all unincorporated territory within urban service areas that are planned for development should be annexed into the adjacent cities, and any land within city limits that is outside of the urban service areas and not planned for development should be detached/de-annexed back to unincorporated areas. [These policies are still in effect. \(Santa Clara County LAFCO, Island Annexation Policies \(Rev. Oct. 14, 2009\). Pursuant to state law, many unincorporated properties within the USAs are eligible for streamlined annexation by the cities without LAFCO approval or property owner protest procedures. \(Government Code §§ 56375.3, 56757; Santa Clara County LAFCO. Policies Relative to Annexation/Reorganizations for Cities and Special Districts \(Jan. 1, 2003\). However, completion of these annexations has not occurred despite this powerful annexation authority.](#)

[In 2001, the County entered into an agreement with the City of San José \(City\) and its former Redevelopment Agency \(“2001 RDA Agreement”\). The 2001 RDA Agreement generally addresses redevelopment issues, but also includes some land use provisions. \(2001 RDA Agreement, § VII.H–M.\) These provisions obligate the City to annex unincorporated pockets. \(§ VII.I.7.\) In exchange, the County](#)

[would continue implementing its land use policies calling for urban development to occur within incorporated USAs. \(§ VII.I.\) This agreement essentially resulted in the stagnation of the unincorporated pockets in San José’s USA because the City would not annex the pockets and the County would not process applications for any significant development or redevelopment in those areas.](#)

[ABAG assigned the County a 6th cycle RHNA of 3,125 new units, which exceeded the prior cycle’s RHNA by 1,028%. This unprecedented increase was largely based on the unincorporated islands in the City of San José’s USA that the City failed to annex for over 50 years \(e.g., Pleasant Hills Golf Course site\), in clear violation of the 2001 RDA Agreement and the longstanding joint policies between LAFCO, the 15 cities, and the County.](#)

[During the period of time when the County was developing its Housing Inventory list through to the submittal to HCD of a draft Housing Element update, County and City planning staff were in regular conversation to coordinate the selection of County Housing Element sites that were inside the City’s USA.](#)

[Many unincorporated properties within the USAs of the county are eligible for streamlined annexation into cities pursuant to County Ordinance Code C1-52, LAFCO policies, and as provided under State law. When a new residential development is proposed to the County on properties that are within a USA and contiguous to a city \(directly neighboring the city limits, separated from the city by a road, or](#)

~~within 300 feet of the city limits as measured along public rights-of-way), it is required that the applicable city already providing urban services complete a ministerial form, either approving the parcel for annexation or waiving the annexation, prior to the County processing the development application. This annexation referral applies to most of the San José sites selected in the Housing Sites Inventory.~~

Continued County Support for Annexation of Unincorporated Islands Within USAs

The County continues to supports the annexation of all parcels that are within ~~urban service areas~~city USAs, regardless of whether they are eligible for the streamlined annexation or require further discretionary review and LAFCO approval. ~~In annexation, However, state law does not give the County's any role in the annexation process. is limited to~~The County typically only receiving notification ~~that~~after an annexation has already occurred, at which time the County Surveyor will update the official maps and the Department of Planning and Development's Geographic Information Systems (GIS) team will update online maps and flag the parcels as no longer being in the County's jurisdiction.

The City of San José acknowledged in a July 12, 2024 letter to HCD that development of unincorporated sites within the City's USA "are most appropriately permitted through City processes, which would also correspond with a concurrent annexation process to properly deliver municipal and other services to these sites." Yet in a September 30, 2024 meeting between City and County officials, the

³ Several courts have held that a public agency may not contract away its police power or bind future boards or councils to exercise—or refrain from exercising—its legislative power in a particular way. (See, e.g., *Avco Community Developers, Inc. v. South Coast Regional Com.* (1976) 17 Cal.3d 785, 800; *Tiburon Open Space Committee v. City of Tiburon* (2022) 78

City admitted it had no future plans to initiate annexation of unincorporated islands and would not initiate the annexation process for a property unless and until it receives a specific development application for the site.

Notwithstanding this annexation dilemma—over which the County has no control—the County remains committed to encouraging and facilitating city annexation of all unincorporated islands within USAs. In furtherance of this longstanding commitment, upon being notified of a potential development project in an unincorporated island within a city's USA, the County will do the following:

- promptly notify the relevant city of the development proposal and encourage the city to proactively annex the site; and
- strongly encourage the developer to file a development application with the city and pursue annexation.

If the city or developer does not initiate annexation of the property and the developer files an application with the County, the County does not have the legal authority to refuse to accept or process the application. The law also requires the County to apply its adopted General Plan policies, Zoning Ordinance, and other ordinances and standards to such applications and may not delegate authority or veto power to another public agency³. However, the County commits to do the following for all such applications:

- strongly encourage the developer to design the project to conform with city standards and requirements while still

Cal.App.5th 700, 730-33; *County of Ventura v. City of Moorpark* (2018) 24 Cal.App.5th 377; *108 Holdings, Ltd. v. City of Rohnert Park* (2006), 136 Cal.App.4th 186, 195; *Alameda County Land Use Association v. City of Hayward* (1995) 38 Cal.App.4th 1716, 1724.)

meeting all applicable County standards, to the maximum extent feasible;

- provide the city with a copy of the application and any related materials within 15 days after the application is submitted;
- convene a joint meeting with the developer and the city within 30 days after the application is submitted to address any city concerns about the project (e.g., city's ability to provide water, sewer, and any other urban services for the project)⁴;
- hold joint meetings with the developer and the city at least once every two months while the County is processing the application and as otherwise requested by the city; and
- provide the city with written notice for all significant project events, including but not limited to the following:
 - County completeness/incompleteness letters issued pursuant to the Permit Streamlining Act, Gov. Code § 65920 et seq.;
 - Developer application resubmittals;
 - County determinations regarding what type of environmental review, if any, will be done for the project pursuant to the California Environmental Quality Act (CEQA), Pub. Res. Code § 21000 et seq.;
 - County notices issued pursuant to CEQA (e.g., notice of exemption, notice of preparation for an

environmental impact report (EIR), notice to adopt a negative declaration/mitigated declaration, notice of availability of a draft EIR); and

- Notices of community meetings, public hearings, and other public meetings/forums.

~~Under State law, when a parcel is annexed into a city and then the city subsequently issues permits for development on the parcel, any resulting RHNA credit for such development would accrue to the city. However, under the final RHNA methodology adopted by ABAG and approved by HCD, the development potential of parcels in unincorporated USAs was the basis to assign RHNA obligations to the County rather than to the cities into which the parcels are likely to be annexed.~~

~~As a result of the final RHNA methodology approved for the 2023-2031 planning period, the units assigned to the County increased by 1,028%, necessitating that the County plan for increased housing in unincorporated USAs, despite likely annexation. If a site is annexed prior to development, any future development, permitted by the city, accrues RHNA credit toward the city. The only available mechanism for counties to address their RHNA when an unincorporated site is annexed for development is through a commensurate transfer of RHNA units from the county to the annexing city.~~

~~For the County to meet the RHNA obligations assigned to it, the County must pursue RHNA transfers with the applicable city when an annexation occurs. State law provides for such a process; pursuant to Government Code Section 65584.07(d), "within 90 days after the date of annexation, either the transfer [of RHNA units], by income~~

Housing Opportunity sites inventory, including that of the former Pleasant Hills Golf Course site.

⁴ Pursuant to Government Code section 65583.2(b)(5), the County Housing Element and accompanying Environmental Impact Report (EIR) describe and analyze the supply of utilities to all sites in the

~~category, agreed upon by the city and county, or a written request for a transfer, shall be submitted to the council of governments, subregional entity, and to the department.”~~

~~Therefore, upon annexation of an unincorporated parcel, the County will coordinate with the applicable city and ABAG to effectuate a commensurate transfer of RHNA units from the County to the jurisdiction annexing County lands, within 90 days of annexation. The County anticipates that its RHNA will be reduced during the 2023-2031 planning period, as parcels are annexed into the cities and commensurate RHNA units are transferred between County and city.~~

~~The County anticipates that its RHNA will be reduced during the 2023-2031 planning period, as parcels are annexed into the cities and commensurate RHNA units are transferred between the County and the cities. However, for reasons described above, city annexations~~Annexations can be difficult to predict. In the fifth housing cycle from 2015 to 2022, the City of San José completed 7 annexations from the unincorporated County for a total of 63.5 acres. The most recent large-scale annexations occurred in the fourth housing cycle, 274 acres at Communications Hill in 2014 and two 100-plus acre sites in East San José in 2010.

The County will proactively monitor annexation applications, proactively communicate with LAFCO and the cities, and take any steps appropriate to support and coordinate with the cities and LAFCO for a smooth recordation of any annexations as they occur.

Infrastructure Capacity

Pursuant to Government Code section 65583.2(b)(5), the County Housing Element and accompanying Environmental Impact Report (EIR) describe and analyze the supply of utilities to all sites in the Housing Opportunity sites inventory, including that of the former Pleasant Hills Golf Course site. Appendix C of the EIR includes a

Water Supply Assessment prepared by San José Water Company (SJWC), approved by the SJWC Board, and further analyzed by EIR consultants Environmental Science Associates and West Yost. SJWC would serve all Housing Element sites within the urban service areas of San José. Regarding the Pleasant Hills Golf Course site, the Water Supply Assessment concluded:

The impact of this project is not consequential and SJW has the capacity to serve this project through buildout based on current water supply capacity and Valley Water’s proposed water supply projects ... After comparing estimated demand associated with this project to water supplies, based on both the SJW and Valley Water Urban Water Management Plans, SJW has determined that the water quantity needed is within normal growth projections and expects for there to be sufficient water available to serve the Project.

Wastewater generated by all Housing Element sites within the City of San José’s USA would be treated at the San José-Santa Clara Regional Wastewater Facility (RWF). Based on 2020 data, the RWF was estimated to be at approximately 61 percent of its design capacity, and the City of San José was at about 61 percent of its treatment allocation. (EIR § 4.16.2.)

Other utility services, including electricity, natural gas, telecommunications, and solid waste collection, are readily available at all Housing Element sites within the USA of San José, including the Pleasant Hills Golf Course site.

The County Housing Element and accompanying EIR therefore determine, based on substantial evidence, that there is ample infrastructure capacity to support the development of all Housing Element sites, including the Pleasant Hills Golf Course site, within the range of units analyzed.

Despite the EIR's analysis, the City of San José has expressed concern that there may not be adequate infrastructure capacity to serve development of the Pleasant Hills Golf Course site at the density analyzed by the County. The City has not provided any evidence to support this claim. Moreover, the City asserts that the County should require development of this site at an even higher density than required in the County Zoning Ordinance. The City's conflicting assertions cannot be reconciled.

Government Code section 65589.7(a) requires public agencies or private entities that provide water or sewer services within the County's territory to "grant a priority" to proposed housing developments that include affordable units. Pursuant to section 65589.7(c), a public agency or private entity that provides such services may only deny extension of the services for a proposed affordable housing development if it makes specific written findings that denial (or conditional approval) is necessary for certain reasons (e.g., insufficient water supply, treatment, collection, or distribution capacity to serve the development). Based on the information in the Water Supply Assessment and EIR described above, it would be difficult for the City of San José to make the necessary findings or to argue that it is unduly burdensome to extend services to any of the housing sites, including the Pleasant Hills Golf Course site.

RHNA Transfer

If the County approves a project application and issues the building permits for a site before annexation occurs, the County would still

receive the RHNA credit for the housing units. If not, upon annexation by a city, the County would have a 90-day window under state law to reach agreement with the City to transfer a portion of the County's RHNA obligation to the City (Gov. Code § 65584.07(d)). If the County and City cannot reach an agreement, ABAG would decide the number of units that should be transferred to the City's RHNA allocation. State law does not provide any guidance to ABAG for making this determination.

Should a developer choose to submit an application to the County, prior to annexation, the County will continue to coordinate with the city regarding the development of these parcels, including infrastructure to provide the necessary urban services and future annexation, as appropriate.

Mid-Cycle Review

The County will conduct a mid-cycle review by December 2026 to determine if the combination of permits issued and units transferred via annexation are in line with projections to meet the County's RHNA obligations by the end of the cycle. Should these numbers fall below projections in this Housing Element, the County will re-evaluate its sites inventory list and explore additional ways to incentivize and remove barriers to housing production, especially at the affordability levels highlighted through the mid-cycle review (refer to Program 2.26).

Table 4.6869: Coordinated Annexation and RHNA Transfer

PROGRAM OBJECTIVES	<ul style="list-style-type: none"> • Quarterly meetings with LAFCO and city staff to discuss and coordinate around prospective annexations. • <u>Upon being notified of a potential development project in an unincorporated island within a city's USA, the County will:</u> <ul style="list-style-type: none"> ○ <u>promptly notify the relevant city of the development proposal and encourage the city to proactively annex the site;</u> ○ <u>strongly encourage the developer to file a development application with the city and pursue annexation; encourage the developer to design the project to conform with city standards and requirements while still meeting all applicable County standards, to the maximum extent feasible;</u> ○ <u>provide the city with a copy of the application and any related materials within 15 days after the application is submitted;</u> ○ <u>convene a joint meeting with the developer and the city within 30 days after the application is submitted to address any city concerns about the project (e.g., city's ability to provide water, sewer, and any other urban services for the project);</u> ○ <u>hold joint meetings with the developer and the city at least once every two months while the County is processing the application and as otherwise requested by the city; and</u> ○ <u>provide the city with written notice for all significant project events, including but not limited to County completeness/incompleteness letters, Developer application resubmittals, County determinations regarding what type of environmental review, if any, will be done for the project pursuant to the California Environmental Quality Act (CEQA), County notices issued pursuant to CEQA, and notices of community meetings, public hearings, and other public meetings/forums.</u> • Upon annexation of an unincorporated parcel, the County will coordinate with the applicable city and ABAG to effectuate a commensurate transfer of RHNA units within 90 days. • <u>By December 2026, complete review of permits issued in unincorporated areas, units transferred as the result of annexation, and a forecast for the remainder of the sixth cycle.</u>
GEOGRAPHIC SERVICE AREA	Unincorporated County, Countywide
LEAD AGENCY	Office of County Executive
FUNDING SOURCE	General Fund
POLICIES AND IMPLEMENTATION	<ul style="list-style-type: none"> • HG1-1: Planning for the supply and diversity of housing types in urbanized areas of the County shall include consideration of both current and projected employment, household income needs, and a variety of housing types. • HG1(i) A: Maintain and, where necessary, strengthen County and cities' joint land use policies and agreements that direct urban development to areas within city urban service areas.

Appendix B: Engagement Summaries

Housing Element Update: Stakeholder Workshop #1

Meeting Summary

Subject	County of Santa Clara Housing Element – Stakeholder Workshop #1
Date Time	July 6, 2022 10:00am – 11:30am
Location	Zoom (Meeting Recording – here)

Workshop Purpose

The County of Santa Clara (County) invited stakeholders to a workshop to launch the **2023-2031 Housing Element Update**. The County assembled a list of organizations, service providers, advocacy groups and other stakeholders to discuss key housing issues occurring and emerging in the County. Feedback from this meeting will be used to identify a series of opportunities and challenges to be addressed when engaging the County's broader community. The meeting agenda can be found in **Appendix A**.

Attendance

Representatives from local organizations were invited to the first Stakeholder Workshop to solicit input in support of identifying housing challenges and opportunities. The following list demonstrates the organizations present at the workshop:

- Burbank Community Association
- County of Santa Clara Department of Aging and Adult Services
- County of Santa Clara Office of Supportive Housing
- County of Santa Clara Parks and Recreation Department
- County of Santa Clara Public Health Department
- Green Foothills
- Greenbelt Alliance
- Latinos United for a New America
- Midpeninsula Regional Open Space District
- Milligan Land Company
- Rebuilding Together Silicon Valley
- San Antonio Hills Homeowners Association
- San Martin Neighbourhood Association
- Silicon Valley at Home (SV@Home)
- Silicon Valley Leadership Group
- Silicon Valley Open Space Authority
- South Bay YIMBY
- Stanford University

Feedback Summary

The workshop focused on gathering input from attendees regarding housing opportunities and challenges in the County. This section includes the questions asked and a summary of the participant feedback. The participants were randomly partitioned into four breakout groups for a 45-minute in-depth discussion.

The participants' input were grouped by topics, demonstrating the key themes from the discussion. The meeting agenda can be found in **Appendix A**. Notes taken during the facilitation can be found in **Appendix B**.

- The high cost of construction is impacting the production of new housing
- Infill development is not being prioritized as it should be, difficulties exist in changing the character of neighbourhoods that are already built out and sometimes underutilized
- Local Agency Formation Commission has shown some aversion to annexation, which could free up land for new development
- New development tends to be out of the price range of low-income residents
- Anti-development and Not in My Backyard (NIMBY) sentiments can hinder the approval of new development
- Consider expediting the annexation of unincorporated urban service area pockets into cities
- The gradual aging of the County's housing stock poses an issue related to the expense of upkeep and maintenance. The County is reliant on property owners to invest in the responsible upkeep of private property
- Some older housing units may not meet the current safety standards identified in the building code (e.g., lead paint)
- The quality of affordable units needs to be maintained without associated increases in affordability
- Foreign investment in housing development may exacerbate housing supply issues

Key theme: Environmental Impact

- The protection of farmland should be prioritized
- Water resources are limited, particularly in Southern Santa Clara County
- Climate change poses a threat to all residents and the housing supply (e.g., flooding, fire in the east and west mountain ranges)
- Address nitrate issues due to septic density in areas like San Martin
- New development in proximity to active farms can limit agricultural productivity (e.g., managing pesticide plumes and dust)

Key theme: Farm Worker Housing

- Adequate servicing and utilities are needed in rural areas to support farm worker housing. Sourcing water and building independent septic systems can be prohibitive

Key theme: Services

- Certain areas cannot accommodate more housing due to insufficient services (e.g., water, septic)
- Access to support services (e.g., social services, healthcare, community services) and amenities (e.g., grocery stores, green space, recreation) is lacking in some areas
- A diversity in transportation options is missing from some communities (e.g., public transit, cycling routes, trails)
- New development out of range of high-quality jobs can be detrimental to quality of life
- Increased investment is needed for vulnerable communities (e.g., people with disabilities)
- Affordable housing is sometimes concentrated in underprivileged communities leading to issues of concentrated poverty
- The cost burden of upgrading a septic system can be prohibitive for the creating of new housing opportunities

3. Question: What are the greatest housing challenges facing the County?

Key theme: Housing Affordability

- Provide funding opportunities to subsidize ADU development, particularly for low-income residents
- Create policies that provide tenants with an opportunity to purchase their rental unit (Tenant Opportunity to Purchase Act)
- Create programming to address homelessness such as a Heading Home Campaign or a community plan to end homelessness
- Strengthen rent stabilization, just cause eviction and create a tenant right to counsel
- Remove barriers to and prioritize affordable housing unit development in areas with community amenities
- Create education campaigns and engage with the public more on the RHNA process
- Create preferential policies for displaced residents

Key theme: Housing Accessibility

- Streamlining the review and approval process for ADUs can increase housing availability
- Create incentive programs to convert existing uses into housing (e.g., office buildings, warehouses, historic buildings)
- Create incentives and education programs regarding SB9 to encourage individual homeowners to build ADUs
- Refer to the County's new Master Plan on Aging for solutions to housing for people of all ages and stages

Key theme: Housing Supply

- Create efficiency by streamlining permitting (e.g., remove parking minimums in proximity to higher order transit, reduce public hearings, limit discretionary language) and other regulatory processes for new development, particularly for affordable housing
- Consider consultation with housing developers to pinpoint challenges in the permitting process
- Coordinate with LAFCO to annex more unincorporated lands and introduce services to develop more housing
- Additional student housing on Stanford Campus can alleviate some housing pressure
- Explore opportunities for development in urban services areas such as Los Altos, Los Gatos and Morgan Hill
- Explore development opportunities in northeast San Jose
- Encourage infill development in urban areas and dense development along urban corridors and near transit hubs (e.g., Bascom Avenue in San Jose)
- Partner with and provide funding for community development organizations
- Incentivize dense development
- Prioritize 100% deed restricted development on public owned land

Key theme: Farmworker Housing

- Create policy that allows onsite development on agricultural land
- Create farmworker housing funding opportunities

Key theme: Aging Housing Stock

- Create a retrofit program that incentivizes landlords and property managers to invest in upgrades and property maintenance

Key theme: Environmental Impact

- Incorporate conservation goals into Housing Element policies
- Incorporate urban forestry and greening into affordable housing development policies
- Create education programs on water availability including information on where water comes from, how much water is available and how water availability impacts development
- Address the potential for urban sprawl that may threaten natural areas
- Collaborate with the Office of Sustainability on a climate action plan that considers the housing stock and development standards
- Maintain collaboration with community partners who provide relief from extreme weather (e.g., cooling centers)
- Develop a program to provide air filters to those affected by wildfire smoke and other air quality issues

Key theme: Services

- Create affordable transportation policies (trip-based policies)
- Ensure access to green space and parks in proximity to affordable housing
- Prioritize development in areas where multimodal transportation opportunities exist

4. Question: What are the top five priorities for the Housing Element Update?

Participants were asked to identify the top five priorities that should be considered for the Housing Element Update. Participants were encouraged to reflect on the input they provided for the previous two questions in identifying priorities. The table below demonstrates the priorities chosen by each breakout discussion group.

Breakout Group 1	Breakout Group 2
<ul style="list-style-type: none"> • Land availability • Stanford as an opportunity for new housing • Servicing Infrastructure (water and public sewer) • Affordability (re-use of existing structures, homelessness) • Strategies for aging in place 	<ul style="list-style-type: none"> • Incentives • Streamline permitting process • Good development policies in urban centers • Access for affordable housing • Clustering development (density)
Breakout Group 3	Breakout Group 4
<ul style="list-style-type: none"> • Incentives • Homelessness • Affordability 	<ul style="list-style-type: none"> • Streamlining permit process • Understand process barriers affecting development • Address threat of climate change

Breakout Group 1

- Lessening barriers for communities to obtain housing
- Regulatory streamlining to expedite affordable housing development

Breakout Group 2

- Incentivizing infill development
- Increasing access to affordable housing for residents of all races and incomes

Next Steps

Feedback collected from stakeholders during this workshop will be used to inform engagement with the community in upcoming public workshops. All inputs will help inform the project team's development of preliminary policies for inclusion in the draft Housing Element.

A second Stakeholder Workshop is tentatively scheduled for August 2, 2022, where results from the first round of meetings will be shared. Visit sccgov.org/housing-element for event updates.

Appendix B: Discussion Activity

Housing Element Update: Community Workshop #1 – Rural Focus

Meeting Summary

Subject	County of Santa Clara Housing Element – Community Workshop #1 – Rural Focus
Date Time	July 19, 2022 6:00pm – 7:00pm
Location	Zoom (Meeting Recording can be found on the project website)

Workshop Purpose

The County of Santa Clara (County) invited community members to a workshop to support the **2023-2031 Housing Element Update**. The meeting presented an opportunity to hear from residents of rural parts of the county on housing issues occurring and emerging in the County. Feedback from this meeting will be used to identify a series of opportunities and challenges to be addressed in the Housing Element Update.

A total of 32 members of the community attended the workshop.

Feedback Summary

The workshop focused on gathering input from attendees regarding housing opportunities and challenges in the County. Feedback opportunities included a series of poll questions asking for participants to choose their top opportunities for the Housing Element Update under the themes of housing affordability, housing accessibility, housing supply, environmental impact and services. The polling exercises were followed by an open discussion where participants could ask questions or provide additional feedback. The following section summarizes the feedback heard from participants.

Polling Exercises

Attendees were asked to participate in a series of polls to identify the top opportunities for the Housing Element Update. Each poll provided a series of five options to choose from selected from input received during the first Stakeholder Workshop hosted on July 6, 2022. The information below shows how the opportunities were prioritized under each key theme area where 1 is the top priority and 5 is the lowest priority. Pictures of the polling results can be found in **Appendix A**.

Housing Affordability

1. Secondary unit subsidies
2. Fund development & streamline development (tie)
3. Homelessness support programs
4. Education on government programs

Housing Supply

1. Housing for vulnerable populations
2. Rural housing & promote secondary units (tie)
3. Address housing discrimination & accessible unit design (tie)

Housing Supply

1. Fund farmworker housing
2. Permit on-site farmworker housing & development efficiencies (tie)
3. Address construction costs & retrofit programs (tie)

Environmental Impact

1. Preserve agricultural land
2. Climate change resilience
3. Environmental conservation
4. Maintain agricultural uses
5. Address septic nitrates

Services

1. Transportation opportunities
2. Access to greenspace & access to support services (tie)
3. Develop near jobs
4. Fund septic system upgrades

Discussion

Following the polling exercises, participants were given the opportunity to provide input to the team. Discussion was centered around the question, “What additional housing opportunities should we consider?” Input received during this discussion has been thematically organized below reflecting the key points raised by attendees. Picture of the discussion notes can be found in **Appendix B**.

Affordability

- Expand tenant protections currently available in urban areas like San Jose, Palo Alto and Mountainview to residents in unincorporated areas
- Provide education on what housing support benefits are available to residents in unincorporated areas

Supply

- Communities like Morgan Hill need farmworker housing
- Farmworker housing needs to be close to agricultural operations as possible
- Provide opportunities for financing to support the development of farmworker housing
- Consider a program where farmworker housing can be opened to other populations when not occupied for farming operations

Environment

- The preservation of agricultural land is critical when considering where to develop new affordable housing
- Development should be focused within and around existing urbanized areas to avoid consuming essential habitats that are important to natural lands

Services

- Provide opportunities for basic shelter and safe parking to provide people experiencing homelessness with privacy, security and dignity
- Ensure services (e.g., sanitary sewers and emergency services) in rural areas are adequate to support new housing development

Next Steps

Feedback collected during this workshop will be used to inform the County's research of housing challenges and opportunities. A second community workshop will be hosted on July 21, 2022, focusing on urban housing. All inputs from both meetings will help inform the project team's development of preliminary policies for inclusion in the draft Housing Element.

The next round of community workshops will be held in September 2022 where draft policies will be shared for awareness and input. Visit sccgov.org/housing-element for event updates.

Appendix A: Polling Exercises

Affordable Housing: Vote for the top opportunity

Affordable Accessibility: Vote for the top opportunity

Affordable Supply: Vote for the top opportunity

Environmental Impact: Vote for the top opportunity

Services: Vote for the top opportunity

Appendix B: Discussion notes

 **What additional housing opportunities should we consider?**

Affordability	Housing affordability is top priority	Determine impact of Measure A in South County/ Gilroy	Housing cost risen in City of Gilroy dramatically	Increase tenant protection	Preserve agriculture and open space	Provide basic shelter and safe parking
Accessibility						
Supply	Farm worker housing: Affordability and proximity	Consider impact to rural services and infrastructure	Ensure adequate utilities and infrastructure: sewer, water and emergency	Midpeninsula Regional Open Space District – consider environmental impacts, specifically habitats and natural landscapes	What to do with farmer working housing that are vacant	Address sewer infrastructure
Environment						
Services	Farm worker housing needs, esp. close to work					

Use “raise hand” feature 

Housing Element Update: Community Workshop #2 – Urban Focus

Meeting Summary

Subject	County of Santa Clara Housing Element – Community Workshop #2 – Urban Focus
Date Time	July 21, 2022 6:00pm – 7:00pm
Location	Zoom (Meeting Recording can be found on the project website)

Workshop Purpose

The County of Santa Clara (County) invited community members to a workshop to support the **2023-2031 Housing Element Update**. The meeting presented an opportunity to hear from residents of urban parts of the county on housing issues occurring and emerging in the County. Feedback from this meeting will be used to identify a series of opportunities and challenges to be addressed in the Housing Element Update.

A total of 30 members of the community attended the workshop.

Feedback Summary

The workshop focused on gathering input from attendees regarding housing opportunities and challenges in urban areas of the County. Feedback opportunities included a series of poll questions asking for participants to choose their top opportunities for the Housing Element Update under the themes of housing affordability, housing accessibility, housing supply, environmental impact and services. The polling exercises were followed by an open discussion where participants could ask questions or provide additional feedback. The following section summarizes the feedback heard from participants.

Polling Exercises

Attendees were asked to participate in a series of polls to identify the top opportunities for the Housing Element Update. Each poll provided a series of five options to choose from selected from input received during the first Stakeholder Workshop hosted on July 6, 2022. The information below shows how the opportunities were prioritized under each key theme area where 1 is the top priority and 5 is the lowest priority. Pictures of the polling results can be found in **Appendix A**.

Housing Affordability

1. Streamline development
2. Fund development & homelessness support programs (tie)
3. Secondary unit subsidies
4. Education on government programs

Housing Supply

1. Housing for vulnerable populations
2. Address housing discrimination, building reuse (e.g., offices, warehouse), promote secondary units (tie)
3. Accessible unit design

Housing Supply

1. Address anti-development attitudes
2. Dense development
3. Address construction costs
4. Retrofit programs & development efficiencies (tie)

Environmental Impact

1. Climate change resilience
2. Limit urban sprawl
3. Environmental conservation
4. Preserve agricultural land & maintain agricultural uses (tie)

Services

1. Transportation opportunities
2. Develop near jobs
3. Distribute affordable housing
4. Access to greenspace
5. Access to support services

Discussion

Following the polling exercises, participants were given the opportunity to provide input to the team. Discussion was centered around the question, “What additional housing opportunities should we consider?” Input received during this discussion has been thematically organized below reflecting the key points raised by attendees. A picture of the discussion notes can be found in **Appendix B**.

Affordability

- Expand rent control to low-income tax credit and below market rate units to expand rent control
- Develop policies focused on anti-displacement initiatives

Accessibility

- Develop accessible units that adhere to universal design standards
- Require ADUs to meeting accessibility standards

Supply

- Prioritize the development of affordable and deeply affordable housing units on the County's surplus lands
- Develop housing policies that seek to rectify injustices related to economic segregation, racial segregation and historic redlining in various county communities (e.g., Burbank, Seven Trees)
- Apply Affirmatively Furthering Fair Housing policies to build housing across the county to combat patterns of segregation and to foster inclusive communities
- Apply an incentive-based strategy for developers rather than a restrictive policy to encourage affordable housing development

- Streamline the ADU process through planning and permitting. Pair streamlining initiatives with education to encourage uptake

Environment

- Prevent urban sprawl and the premature conversion of natural habitat by prioritizing development in urban areas
- Prioritize dense development in urban areas rather than expanding the footprint of development

Services

- Build within proximity of transportation options
- Develop in existing urban services areas (including farmworker housing)
- Prioritize services for people with physical and mental disabilities
- Invest in improvements in low-income neighbourhoods to improve infrastructure such as sidewalks
- Prioritize the development of mixed-use housing to ensure affordable housing residents are near amenities and resources
- Develop in proximity to established employment centers
- Leverage programs from government agencies like MTC that allow cities to receiving funding for transit oriented affordable housing developments (learn more [here](#))

Other Feedback

- Develop policies with specific language describing how the County intends to reach an intended outcome

Next Steps

Feedback collected during this workshop will be used to inform the County's research of housing challenges and opportunities. All inputs from this workshop and the previous community workshop held on July 19th (focusing on rural areas) will help inform the project team's development of preliminary policies for inclusion in the draft Housing Element.

The next round of community workshops will be held in September 2022 where draft policies will be shared for awareness and input. Visit sccgov.org/housing-element for event updates.

Appendix A: Polling Exercises

Affordable Housing: Vote for the top opportunity

Affordable Accessibility: Vote for the top opportunity

Affordable Supply: Vote for the top opportunity

Environmental Impact: Vote for the top opportunity

Services: Vote for the top opportunity

Appendix B: Discussion notes

What additional housing opportunities should we consider?

Affordability	Housing should be near transportation and should be accessible	LAFCO supports more housing within urban land area, including farm worker housing	Curb urban sprawl	Preserve natural lands	Ensure accessibility covers all, not only physical	Use vacant lands for affordable housing	Prioritize tenant protections to align with protections in the TPO	Examine racial and economic segregation – ensure housing is invested in these communities
Accessibility								
Supply	Invest in better infrastructure in Unincorp. SCC (i.e. sidewalks)	Stay away from broad language in HEU. Be specific with outcomes	Rent control protection	Differentiate true urban pockets vs. other Unincorp. Areas. Focus on housing density in urban pockets	Maximize RHNA allocation on Stanford lands	Work with ABAG re: RHNA methodology	Clear list of options tied to TDM. Incentive based strategies	Streamline ADU process through planning and permitting
Environment								
Services	Mixed-use housing	Make ADU's accessible. Consider caregivers	Capitalize on Stanford land to address housing challenges and identify sites	Protection, preservation, and production	Capitalize on funding opportunities to address anti-displacement and PPP	Access to job centers		

Use "raise hand" feature 

Housing Element Update: Stakeholder Workshop (Development Focus)

Meeting Summary

Subject	County of Santa Clara Housing Element – Stakeholder Workshop (Development Focus)
Date Time	August 2, 2022 10:00am – 11:00am
Location	Zoom (Meeting Recording – visit the project website)

Workshop Purpose

The County of Santa Clara (County) invited select development-focused stakeholders and housing advocates to a second workshop in support of the **2023-2031 Housing Element Update**. The meeting asked participants to provide feedback specific to the challenges encountered when developing affordable housing in unincorporated areas of the County. Feedback from this meeting will be used to identify strategies and policies to streamline development to meet the County’s Regional Housing Needs Assessment (RHNA) allotment for the 2023-2031 Housing Element cycle.

Attendance

Representatives from local development organizations and housing advocacy organizations invited to attend the workshop. The following list demonstrates the organizations that attended:

- Adobe Services
- City of Gilroy
- Housing Trust Silicon Valley
- Santa Clara County Office of Supportive Housing
- Eden Housing
- Santa Clara LAFCO
- Santa Clara County Housing Authority
- Housing Choices
- Silicon Valley at Home (SV@Home)
- Allied Housing
- Charities Housing
- Bay Area Building Industry Association
- Dividend Homes
- Santa Clara County Office of the County Counsel
- Greenbelt Alliance
- MH Engineering
- Habitat East Bay/Silicon Valley

Feedback Summary

Following the presentation, participants were led through a facilitated group discussion focused to identify challenges in the development process and opportunities for streamlining. Three questions were posed:

1. What constraints have you encountered in the development process? What would simplify or streamline this process?
2. What are other jurisdictions doing well?
3. What types of incentives should the County consider?

The following is a thematic summary of the feedback heard. Pictures of the live notetaking can be found in **Appendix A**.

Theme: General Plan

- **Identified Challenge:**
 - The County General Plan’s low-density zoning, limited density allowances and protection of agricultural land limits the ability to construct small urban developments in Unincorporated

Santa Clara. These factors make development unattractive or unfeasible for private and nonprofit developers.

- **Proposed Solutions:**

- Revise the General Plan to allow for development through conforming zoning and revising densities and make development more attractive
- Examine the General Plan for areas that are suitable for higher density designation and conforming rezoning

Theme: LAFCO Process

- **Identified Challenge:**

- The LAFCO annexation process is lengthy and can be cost prohibitive due to the Environmental Impact Report process. Additionally, LAFCO has a different definition of vacant developable land than Counties, which leads to the assumption that all vacant land in a city must be developed prior to the annexation of additional lands. However, it may be the case that some vacant lands are not suitable for development.

- **Proposed Solutions:**

- Facilitate dialogue between county, municipalities and LAFCO to settle on an agreeable definition of vacant land to rationalize the need for more annexation of unincorporated county land
- Engage in dialogue with LAFCO to streamline timelines for annexation to reduce costs
- Communicate housing goals with LAFCO to reach RHNA allocation numbers through annexation as necessary

Theme: Streamlined Process

- **Identified Challenge:**

- Required coordination between the County and local municipalities can create confusion for developers about regulatory overlay, policy interpretation and approval authority.

- **Proposed Solutions:**

- Establish a process for early coordination meetings between the county and local jurisdictions to streamline communication and mutual understanding between involved parties. This includes policy interpretation, regulatory overlay, timeline, oversight and identifying who has final approval.

Theme: Incentives

- **Identified Challenge:**

- Development in Unincorporated in Santa Clara County can be undesirable due to reduced densities, high construction costs, distance from services and amenities and other reasons. Targeted incentives may help to attract development to achieve the County's RHNA allocation.

- **Proposed Solutions:**

- Reduce processing times and fees and exactions
- Waving fees (e.g., exactions, impact fees) for infrastructure improvements (e.g., traffic impact mitigation) can help incentivize development
- Reduce the number of development application reviews as multiple rounds of review increases costs and can be prohibitive

- Consider density bonuses and incentives for alternatives to fees and exactions, a menu of choices developers can take regarding future development
- Look at the sites that are available for development and consider incentives tailored to having those sites developed
- Survey developers for sites of interest for development to understand market interest

Theme: Services

- **Identified Challenge:**
 - A lack of servicing infrastructure, transportation options, social services and community amenities limits the attractiveness and feasibility of development in certain areas of Unincorporated Santa Clara County. This is especially true when infrastructure improvements are required to be made by developers.
- **Proposed Solutions:**
 - Coordinate with municipalities for infrastructure agreements for improvements such as sidewalks, sewer, water and stormwater management to facilitate housing
 - Make sites available for development that are approximate to services and transportation

Theme: Additional Feedback

- Consider creative interpretations of what housing can look like, or what forms affordable housing can take (e.g., moderate density through townhomes that blend into existing community character)
- Consider partnerships with community developers
- Facilitate housing for the unhoused, formerly incarcerated and undocumented residents

Next Steps

Feedback collected from stakeholders during this workshop will be used to inform policies and strategies to streamline the development process. A second Stakeholder Workshop is scheduled for August 17th, 2022. Visit sccgov.org/housing-element for event updates.

Appendix A: Discussion Activity

What constraints have you encountered in the development process?
What would simplify or streamline this process? (governmental and non-governmental challenges)

Early coordination and communication with local jurisdiction re: streamline development process	Coordination with LAFCO	Early communication: Policy interpretation and regulatory	Consideration: geological and natural boundaries	Infrastructure agreements between County and City (i.e. sidewalk, sewer, and storm)	RE: Unhoused communities. Rely services near population development sites
Early communication: Timeframe, approval process and who has final approval	Clarity on approval authority	Sites? Areas of development unclear. LAFCO is challenge	Flexible about what affordable housing typology looks like	Permitting time and cost	Subsize mitigation fees
County to revise General Plan to allow residential development and revise density	RE: farmworker housing. Lack of infrastructure and public utilities. i.e. sewer and water. Guided by infrastructure	Price of infrastructure should not be covered by developers	County Islands – getting city and county on the same page re: infrastructure improvements (i.e. sidewalks to schools)	Consider: Housing for undocumented and unhoused population. Including services to get people back to baseline	

What are other jurisdictions doing well? (e.g., policies or initiatives to be considered)

Gilroy is open to early conversations with housing developers and advocates	Gilroy HEU: looking at policies to incentivize ADU, microunits, farmworker units, large family housing units	Reduce round of reviews for developer plans	Challenge: LAFCO procedure (potential EIR processes)	RE: LAFCO. Vacant land vs Vacant Lane available	Dialogue with jurisdiction (esp. LAFCO) to define vacant land
---	--	---	--	---	---

What types of incentives should the County consider?

- Relook at General Plan, consider areas for higher density designation and rezoning
- Definition of vacant land available for development
- Streamline process
- Density bonuses
- Facilitate the incentives for developers on newly selected sites
- Developer surveys re: market interest and site selections
- Look at Caltrain stations for potential sites (San Martin station)

Housing Element Update: Stakeholder Workshop #2

Meeting Summary

Subject	County of Santa Clara Housing Element – Stakeholder Workshop #2
Date Time	August 17, 2022 10:00am – 11:30am
Location	Virtual
Details	Visit the project website for the meeting recording and slide deck

Workshop Purpose

The County of Santa Clara (County) invited stakeholders to a second workshop in support of the 2023-2031 Housing Element Update. Building off the previous workshops, participants reviewed previous strategies, actions taken, and feedback heard to date; asking stakeholders for input on how the strategies could be updated to reflect current and forecasted housing challenges. The discussion focused on seeking input related to five key challenges, including housing production, housing affordability, access to housing, homelessness and climate change. Feedback from this meeting will be used to refine the strategies as the project team works to create policies for implementation over the 2023-2031 Housing Element cycle.

Attendance

Representatives from various stakeholder interest groups representing developers, advocates, county departments and other organizations were invited to attend the workshop. Over 30 participants attended the meeting representing the following organizations, groups or county departments:

- Burbank Community Association
- City of Morgan Hill
- County of Santa Clara Board of Supervisors
- County of Santa Clara Department of Aging and Adult Services
- County of Santa Clara Department of Public Health
- County of Santa Clara Office of Supportive Housing
- Eden Housing
- Gilroy Historical Society
- Green Foothills
- Greenbelt Alliance
- Housing Choices
- Law Foundation of Silicon Valley
- LUNA
- Mountain View YIMBY
- New York Life
- Ruggeri-Jensen-Azar
- San Martin Neighbourhood Association
- Silicon Valley at Home (SV@Home)
- Silicon Valley Coalition for the Unhoused
- Silicon Valley Independent Living Center
- Stanford University
- West Valley Community Services

Feedback Summary

The County of Santa Clara team provided a brief presentation to review the most pressing housing-related challenges facing the county and outlined the strategies developed for the previous Housing Element relative to each challenge. The review also included a summary of the actions taken by the county to address each of the five challenges and a summary of feedback heard from the stakeholders and the community through the Housing Element Engagement Process to date. The presentation was followed by breakout group discussions to seek input on updates needed to refine the strategies to meet current and forecasted conditions. The following is a thematic summary of the feedback heard tied to each of the discussion questions.

A picture of the live notetaking Mural exercise can be found in **Appendix A**.

1. Question: How should existing Housing Element strategies be updated?

- **Key Theme: Current strategy update suggestions:**
 - Define what “balanced” means when planning for countywide housing supply, including a definition of affordability levels - currently most new housing is provided on Stanford lands
 - Examine the effectiveness of coordination between the County and cities in developing housing and what the challenges are to update the strategy
 - Update the “remove unnecessary barriers to housing” strategy to include and address the specific barriers to developing housing (e.g., public perception, financial barriers, development barriers)
 - Clarify what a “continued review” of land use policies means (e.g., what policies would be reviewed and what actions might be taken)

- **Key Theme: Factors to be considered when updating current strategies:**
 - Build more extremely low-income housing
 - Expand rent control
 - Create equitable access to housing
 - Explicitly address racism not just discriminatory practices
 - Create a strategy for farmworker housing
 - Ensure services are increased to match the demand for housing units
 - Ensure increased housing does not impact community services and health
 - Protect the health and wellbeing of all residents (e.g., in light of impacts of sewage runoff from Morgan Hill to San Martin)

2. Question: What do we need to consider when developing new strategies/policies related to...

- **Housing Production**
 - Preserve the existing stock of affordable units through rehab, maintaining protections and providing financing
 - Prioritize the reuse existing vacant buildings for affordable housing
 - Create more funding or subsidize accessory dwelling unit (ADU) production
 - Incentivize the production and rental of ADUs for low-income populations
 - Analyze threats to the existing housing stock and create safeguards tailored to address the threats

- **Housing Affordability**
 - Create rent control policies
 - Prioritize affordable housing on Stanford lands

- **Access to Housing**
 - Develop more socially and racially inclusive neighbourhoods that overcome past and present discrimination
 - Unit rehabilitation should consider the Americans with Disabilities Act
 - Expand County rental assistance to offset evictions
 - Create outreach to communities with high rates of rental assistance to prevent evictions and loss of housing
 - Create policies to prevent evictions and displacement (e.g., COVID housing programs)

- **Homelessness**
 - Secure state funding to create new housing for low-income populations
 - Create equal opportunity housing for all demographics
 - Create access to transitional housing

- **Climate Change**
 - Concentrate development in urban zones away from fire hazard and flood zones
 - Provide access to open space in proximity of new housing development
 - Consider environmental justice issues (e.g., natural resource disasters and inequitable impacts)
 - New housing development and existing housing stock needs to be adaptable to climate change
 - Limit the climate impacts caused by urban sprawl by prioritizing housing development in urban islands within unincorporated Santa Clara

Next Steps

Feedback collected during this meeting will inform refinements to the draft Housing Element Update strategies that will be presented for additional feedback during the third Stakeholder Workshop. The third stakeholder workshop is currently scheduled for August 29th, 2022. Visit sccgov.org/housing-element for event updates.

Appendix A: Discussion Activity

Housing Element Update: Stakeholder Workshop #3

Meeting Summary

Subject	County of Santa Clara Housing Element – Stakeholder Workshop #3
Date Time	August 29, 2022 10:00am – 11:30am
Location	Virtual
Details	Visit the project website for the meeting recording and slide deck

Workshop Purpose

The County of Santa Clara (County) invited stakeholders to a third workshop in support of the 2023-2031 Housing Element Update. The meeting presented new and updated Housing Element strategies based on input from the previous Stakeholder and Community Workshops. The purpose of the meeting was to seek feedback on refined and proposed policies to address each of the broader housing challenges. Feedback received during this workshop will help confirm and validate new/updated policies for the 2023-2031 Housing Element cycle.

Attendance

Representatives from various stakeholder interest groups representing developers, advocates, county departments and other organizations were invited to attend the workshop. A total of 32 participants attended the meeting representing the following organizations, groups or county departments:

- Boys & Girls Club of Silicon Valley
- CARAS
- City of Morgan Hill
- City of Santa Clara
- County of Santa Clara Agricultural Division
- County of Santa Clara Department of Aging and Adult Services
- County of Santa Clara Department of Planning
- County of Santa Clara Department of Public Health
- County of Santa Clara Office of County Counsel
- County of Santa Clara Office of Supportive housing
- County of Santa Clara Office of Sustainability
- Eden Housing
- Gilroy Dispatch
- Gilroy Historical Society
- Law Foundation of Silicon Valley
- MidPen Housing
- Ruggeri-Jensen-Azar
- San Antonio Hills Homeowners' Association
- Santa Clara LAFCO
- Santa Clara Valley Open Space Authority
- Silicon Valley at Home (SV@Home)
- South Bay YIMBY
- Stanford University

Feedback Summary

The County of Santa Clara provided a presentation systematically outlining strategies related to six housing challenges to be addressed by the Housing Element Update:

1. Housing Production
2. Housing Affordability
3. Access to Housing
4. Fairness in Housing ([Affirmatively Furthering Fair Housing](#))
5. Homelessness
6. Climate Change

In addition to the identified strategies, the County team provided existing policies and proposed policy goals for participant consideration. In between each of the six challenge areas, participants were asked to provide feedback to determine priorities and what additional policies should be included in the Housing Element Update. Participants were asked the following questions:

- What should the focus be under these goals?
- What is missing that we should consider?

The following is a thematic summary of feedback received about the proposed policies tied to each challenge area. A picture of the live notetaking captured during discussion can be found in **Appendix A**. The full presentation and recording can be found on the [project website](#).

1. Challenge: Housing Production

Strategies
<ul style="list-style-type: none"> • Plan for a balanced countywide housing supply. • Promote cooperation and collaboration on residential development.
Proposed Policy Goals
<ul style="list-style-type: none"> • Plan for housing development within USAs not planned for annexation during a RHNA cycle. • Ensure housing projects contain an equitable mix of housing type & household income levels. Plan new housing near transit & prioritize building active transportation infrastructure in existing neighborhoods.

Participant Feedback

- Consider how development will occur within Urban Service Areas given General Plan and Local Agency Formation Commission (LAFCO) policies
- Streamline the housing approval process in addition to streamlining policies
- Include more non-government organizations (e.g., affordable housing developers) in collaboration for residential development
- In addition to planning development in proximity of existing transportation services, coordinate with the Santa Clara Valley Transit Authority (VTA) to plan for transit network expansion in growing communities where development is approved and proposed
 - Attempting to build affordable housing that does not have existing access to transit can act as a barrier to project financing
- Collaborate with VTA to expand services to South County
- Ensure the financial feasibility of desired development
- Create specific policies and programs to ensure robust affordable housing development for low-income populations on Stanford lands, especially near transit. These policies/program can be in the form of land dedication, zoning overlays, rezoning, specific percentage of affordable housing dedications, and/or funding structures to make development viable

2. Challenge: Housing Affordability

Strategies
<ul style="list-style-type: none"> • Plan for a balanced countywide housing supply. • Provide financial assistance for extremely low-income housing.
Proposed Policy Goals
<ul style="list-style-type: none"> • Prioritize suitable county-owned surplus lands for affordable housing development. • Streamline of affordable housing permit process in areas with high amenities and resources.

Participant Feedback

- Prioritize tenant protections for tenants already in affordable units with policies such as a Tenant Protection Ordinance and Fair Chance at Housing Ordinance
- Supportive programs and services are needed in proximity to extremely low-income housing like case management services
- Prioritize extremely low-income housing to boost opportunities for extremely low-income populations
- Reduced regulation on affordable housing to incentivize development (i.e. higher height, higher floor area ratio)
- Avoid development in Morgan Hill and Gilroy areas outside Urban Service Areas (USAs) as it may set a dangerous precedent for overdevelopment

3. Access to Housing

Strategies
<ul style="list-style-type: none"> • Remove unnecessary barriers to housing. • Maintain and expand the supply of farm worker housing.
Proposed Policy Goals
<ul style="list-style-type: none"> • Streamline & prioritize housing development that includes low-income units. • Provide permanent farmworker housing by prioritizing and incentivizing it outside of USAs.

Participant Feedback

- Prioritize agricultural workers’ housing through streamlined approvals
- Consider subsidy programs to encourage low-income ADU development
- Collaborate with Water Districts to create policies and ordinances to support farmworker housing due to the reliance on existing wells and septic systems
- Provide farmworker housing that accommodates both families and single occupants

4. Challenge: Fairness in Housing (AFFH)

Strategies
<ul style="list-style-type: none"> • Ensure support for fair laws and practices.
Proposed Policy Goals
<ul style="list-style-type: none"> • Support cities in improving opportunities within HUD identified Racially/Ethnicly Concentrated Areas of Poverty (R/ECAPs). • Increase access to opportunity for residents of historically disinvested low-income communities. <ul style="list-style-type: none"> ◦ Example: Burbank and Alum Rock/East Foothills. • Promote racial/ethnic integration and reduce displacement by increasing the supply of affordable housing in high opportunity areas, areas with ongoing and risk of displacement.

Participant Feedback

- Offer fair housing and housing law workshops to areas with concentrated areas of poverty to provide education and awareness to residents for where to access resources
- Create a rent registry that serves as a database of rent costs in unincorporated Santa Clara County to determine which communities may be more at risk of displacement
- Create policies to support formally incarcerated persons and undocumented immigrants

5. Challenge: Homeless

Strategies
<ul style="list-style-type: none"> • Reduce homelessness consistent with housing first principles.
Proposed Policy Goals
<ul style="list-style-type: none"> • Promote racial equity in homeless services and permanent housing supportive services. • Diversity sensitivity training for service providers.

Participant Feedback

- Consider a case management approach as a key protective measure to address chronic homelessness
- Support housing for reentry clients (those returning to housing after experiencing homelessness, addiction treatment or incarceration)
- Integrate policies from the [Community Plan to End Homelessness](#)

6. Challenge: Climate Change

Strategies
<ul style="list-style-type: none">• Plan for Climate Change impacts on Existing and Future Housing Stock.
Proposed Policy Goals
<ul style="list-style-type: none">• Promote energy efficiency in new and existing residential buildings.• Limit development of new housing in high climate risk areas (wildfire, floods etc.).• Facilitate programs & assistance to upgrade existing housing stock against extreme weather events.• Educate property owners in high-risk areas in methods to reduce their risk of an event.

Participant Feedback

- Promote energy efficiency in new and existing residential buildings in order to reduce energy costs, provide quality and resiliency housing, improve building comfort, and reduce greenhouse gas emissions
- Incorporate air conditioning or other measures in new housing to help adapt to extreme heat
- Create local energy and green building standards for new residential construction, renovations, and existing buildings
- Address climate justice, prioritize low-income and Black, Indigenous and People of Color (BIPOC) communities for upgrades, risk reduction, adaptations etc.
- Provide community services/trainings and workshops to communities that focus on climate vulnerabilities and where to seek services and resources
- Consider streamline permitting for Electric Vehicles, solar and other green energy initiatives

Next Steps

Feedback collected during this meeting will inform refinements to the draft policies for the Housing Element Update.

Further engagement will occur at the third Community Workshop scheduled for September 7th, 2022.

Appendix A: Discussion Notetaking

Housing Production

Strategies

- Plan for a balanced countywide **housing supply**
- **Promote cooperation and collaboration** on residential development

Proposed Policy Goals

- **Plan for housing development within USAs** not planned for annexation during a RHNA cycle.
- Ensure housing projects contain **an equitable mix of housing type & household income levels.** *
- Plan new housing near transit & prioritize building active transportation infrastructure in existing neighborhoods.

*AFFH: Affirmatively Further Fair Housing goal (HUD)

What should the focus be under these goals? What is missing that we should consider?

Consider how development will occur within USAs given General Plan and LAFCO policies	Streamline housing approval process	Include more non-gov org in collaboration
Collaborate with VTA re: active transportation (esp. future plans in unincorporated areas)	Ensure the financial feasibility of desired development	Create specific policies and programs to ensure robust affordable housing development for low-incomes on Stanford lands, esp near transit. These policies/program can be in the form of land dedication, zoning overlays, rezoning, specific % of affordable housing dedications, and/or funding structures to make development viable

11

Housing Affordability

Strategies

- Plan for a balanced countywide **housing supply**
- Provide **financial assistance** for extremely low-income housing

Key Existing Policies

- **HG 6:** Local funds to target households under **30% of county AMI** & special needs populations.
- **HG 7: Prioritize ELI households** in housing assistance programs

Proposed Policy Goals

- Prioritize suitable county-owned surplus lands for affordable housing development.
- **Streamline** of affordable housing **permit process** in areas with high amenities and resources *

*AFFH: Affirmatively Further Fair Housing goal (HUD)

What should the focus be under these goals? What is missing that we should consider?

Ag workers' housing streamlining and approvals	Prioritize tenant protection in collab with OSH	ELI: Add program services, like case management services/hub
Prioritize ELI housing	Reduced regulation on affordable housing (i.e. higher height, higher FAR)	

12

Access to Housing

Strategies

- Remove unnecessary **barriers to housing**
- Maintain and **expand the supply of farm worker housing**

Proposed Policy Goals

- Streamline regulations to encourage the development of **ADU & SB9 Units**.
- Review **Parking standards** for housing near transit
- Streamline & prioritize housing development that includes low-income units.
- **Provide permanent farmworker housing** by prioritizing and incentivizing it outside of USAs.

*AFFH: Affirmatively Further Fair Housing goal (HUD)

What should the focus be under these goals? What is missing that we should consider?

Consider subsidy programs to encourage lower-income ADU developments	RE: Farm worker housing. Collab. with Water District policies/ordinances	In addition to ADUs, consider streamline permitting for EVs, solar etc.
Provide farmworker housing that accommodates families and single occupants		

13

Fairness in Housing (AFFH)

Strategy

- Ensure support for **fair laws and practices**

Proposed Policy Goals

- **Support cities in improving opportunities** within HUD identified *Racially/Ethnically Concentrated Areas of Poverty (R/ECAPs)* *
- Increase **access to opportunity** for residents of historically disinvested low-income communities.*
– Example: *Burbank and Alum Rock/East Foothills*.
- Promote racial/ethnic integration and reduce displacement by increasing the supply of **affordable housing in high opportunity areas**, areas with ongoing and risk of displacement*

*AFFH: Affirmatively Further Fair Housing goal (HUD)

What should the focus be under these goals? What is missing that we should consider?

Offer fair housing and housing law workshops that have concentrated areas of poverty. Bring awareness, education and where to seek resources	Rent registry	Policy to support formally incarcerated and undocumented immigrants

14

Homelessness

Strategy

- Reduce **homelessness** consistent with housing first principles

Key Existing Policies

- **HG 16:** Prioritize provision of transitional & permanent supportive housing
- **HG 17:** Needs of the chronic homeless to be met with transitional & permanent supportive housing
- **HG 18 :** Fund organizations & programs on quick intervention to reduce chronic homelessness

Proposed Policy Goals

- **Promote racial equity** in homeless services and permanent housing supportive services. *
- Diversity sensitivity training for service providers.

*AFFH: Affirmatively Further Fair Housing goal (HUD)

What should the focus be under these goals? What is missing that we should consider?

Consider Case Management approach. Support chronic homeless housing participants	Support housing for reentry clients	Integrate policies from the Community Plan to End Homelessness

15

Climate Change

Strategy

- Plan for **Climate Change impacts** on Existing and Future Housing Stock

Proposed Policy Goals

- **Promote energy efficiency** in new and existing residential buildings
- **Limit development** of new housing in high climate risk areas (wildfire, floods etc.)
- Facilitate programs & assistance to **upgrade existing housing stock** against extreme weather events.
- Educate property owners in high-risk areas in methods to reduce their risk of an event.

What should the focus be under these goals? What is missing that we should consider?

Promote energy efficiency in new and existing residential buildings in order to reduce energy costs, provide quality and resiliency housing, improve building comfort, and reduce greenhouse gas emissions	Incorporate AC or other measures in new housing to help adapt to extreme heat	Create local energy and green building standards for new residential construction, renovations, and existing buildings
Address climate justice, prioritize low-income and BIPOC communities for upgrades, risk reduction, adaptations etc.	Provide community services/trainings and workshops to communities that focus on climate vulnerabilities and where to seek services and resources	

16

Housing Element Update: Community Workshop #3

Meeting Summary

Subject	County of Santa Clara Housing Element – Community Workshop #3
Date Time	September 7, 2022 6:00pm – 7:30pm
Location	Zoom (Meeting recording can be found on the project website)

Workshop Purpose

The County of Santa Clara (County) invited community members to a workshop to support the **2023-2031 Housing Element Update**. The meeting presented an opportunity to gather input from the community on the site selection process and the development of draft strategies and policy goals. Feedback from this meeting will be used to prepare the draft Housing Element Update for a thirty-day comment period prior to submission to the California Department of Housing and Community Development (HCD).

A total of 35 members of the community attended the workshop.

Feedback Summary

Part 1: Draft Policy Goals

The community workshop consisted of two presentation and two discussion segments. During the first portion of the meeting, County staff presented policy goals related to housing production, housing affordability, access to housing, fairness in housing (Affirmatively Furthering Fair Housing), homelessness and climate change. The presentation was followed by a discussion asking participants for feedback on the policy goals and any additions that should be considered.

The following is a summary of feedback received regarding the draft policy goals:

Housing Production

- Prioritize infill development in areas close to jobs and transit to reduce the overreliance on cars
- Avoid the unintended risk of stimulating development in unincorporated areas
- Distribute housing types throughout cities across the county
- Educate homeowners about the need for diverse housing types in their communities to reduce fears of affects to property values and not-in-my-backyard attitudes (NIMBY)

Housing Affordability

- Look at ways to provide more rent stabilization and shallow rent subsidies for older adults who are on fixed income
- Prioritize the development of housing for extremely low-income communities as they experience the highest housing cost burden and are at the highest risk of experiencing homelessness
- Build extremely low-income housing for seniors on fixed incomes facing pressures from rising costs and for people with disabilities and chronic illness
- Create policies to focus on the preservation of existing affordable housing

Fairness to Housing (AFFH)

- Create policies that go beyond AFFH standards to maximize inclusivity in housing

Climate Change

- Include a policy to locate affordable housing on or near public transit lines or near transit stations as a strategy to reduce community emissions
- Protect open natural space to protect food production and natural resources
- Prevention urban sprawl and preservation of farmland

General Feedback

- Add specificity to the policy goals as words like “review” and “consider” are too abstract
- Review the City of Alameda’s Housing Element as it was the first Association of Bay Area Governments Housing Element to be approved by HCD

Part 2: Initial Site Selection

For the second half of the presentation, County staff provided information on proposed site selection including site suitability criteria, considerations for urban and rural settings, and the location of initial sites in Stanford, San Jose, Gilroy and Morgan Hill. The following is a summary of feedback on initial site selection:

- Collaborate with Gilroy and Morgan Hill on density for affordable housing, including urban services
- Provide incentives to increase feasibility for developers to build extremely low-income housing in south county
- Include income brackets intended for housing development in the site selection - test feasibility with developers
- Adhere to long-standing General Plan policies to prioritize development in urban service areas to prevent sprawl and development outside of urban service areas
- Consider plan to annex the urban islands to address Regional Housing Needs Allocation numbers

Screenshots of the notes taken live during the discussion exercise can be found in **Appendix A**.

Next Steps

Feedback collected during this workshop will be used to inform the preparation of the Housing Element Update. The draft Housing Element Update will be released in the fourth quarter of 2022 for a 30-day public comment period prior to submission to HCD. Stay tuned to sccgov.org/housing-element for updates and subscribe for notice of the release of the draft HEU for event updates.

Appendix A: Live Discussion Notetaking

Draft Policy Goals

- Housing Production
- Housing Affordability
- Access to Housing
- Fairness in Housing
- Homelessness
- Climate Change

**What do you like about the proposed policy goals?
Is there anything else we should consider?**

Be more specific in policy goals	Suggest reviewing City of Alameda HEU (Approved)	Climate section: locate affordable housing on/near public transit or near transit stations	Allocate more housing for ELI (with and without disability) (x2)
Provide more rent-stabilized housing for older adults (x2)	Build above and beyond AFFH standards to be more inclusive	Maintain collaboration with agricultural/natural resources goals	Prevent sprawl and preserve farmland

Use "raise hand" feature

- Housing Production
- Housing Affordability
- Access to Housing
- Fairness in Housing
- Homelessness
- Climate Change

**What do you like about the proposed policy goals?
Is there anything else we should consider?**

Prioritize infill areas close to jobs and transit where they don't need to drive.	Rent stabilization, including shallow rent subsidies.	Prioritize ELI development as they are experiencing highest burden and highest risk of displacement	Avoid stimulating unintended development in unincorporated County
Educate homeowners on need for housing across the county			

Use "raise hand" feature

Initial Site Selection

What feedback do you have for the team on site selection?

Collaborate with Gilroy and Morgan Hill on density for affordable housing, including urban services

Provide incentives to increase feasibility for developers to build ELI housing in south county

Include income brackets intended for housing development in the site selection - test feasibility with developers

Adhere to long-standing General Plan policies to prioritize development in urban service areas to prevent sprawl and development outside of urban service areas

Consider plan to annex the urban islands to address RHNA numbers

Use "raise hand" feature

1 INTRODUCTION

The Bay Area continues to see growth in both population and jobs, which means more housing of various types and sizes is needed to ensure that residents across all income levels, ages, and abilities have a place to call home. While the number of people drawn to the region over the past 30 years has steadily increased, housing production has stalled, contributing to the housing shortage that communities are experiencing today. In many cities, this has resulted in residents being priced out, increased traffic congestion caused by longer commutes, and fewer people across incomes being able to purchase homes or meet surging rents.

The 2023-2031 Housing Element Update provides a roadmap for how to meet our growth and housing challenges. Required by the state, the Housing Element identifies what the existing housing conditions and community needs are, reiterates goals, and creates a plan for more housing. The Housing Element is an integral part of the General Plan, which guides the policies of Unincorporated Santa Clara County.

2 SUMMARY OF KEY FACTS

- **Population** - Generally, the population of the Bay Area continues to grow because of natural growth and because the strong economy draws new residents to the region. The population of Unincorporated Santa Clara County decreased by 12.8% from 2000 to 2020, which is below the growth rate of the Bay Area.
- **Age** - In 2019, Unincorporated Santa Clara County's youth population under the age of 18 was 15,398 and senior population 65 and older was 12,360. These age groups represent 18.4% and 14.8%, respectively, of Unincorporated Santa Clara County's population.
- **Race/Ethnicity** - In 2020, 46.1% of Unincorporated Santa Clara County's population was White while 1.9% was African American, 15.8% was Asian, and 31.1% was Latinx. People of color in Unincorporated Santa Clara County comprise a proportion below the overall proportion in the Bay Area as a whole.¹
- **Employment** - Unincorporated Santa Clara County residents most commonly work in the *Health & Educational Services* industry. From January 2010 to January 2021, the unemployment rate in Unincorporated Santa Clara County decreased by 12.2 percentage points. Since 2010, the number of jobs located in the jurisdiction increased by 13,520 (85.9%). Additionally, the jobs-household ratio in Unincorporated Santa Clara County has increased from 0.87 in 2002 to 1.1 jobs per household in 2018.
- **Number of Homes** - The number of new homes built in the Bay Area has not kept pace with the demand, resulting in longer commutes, increasing prices, and exacerbating issues of displacement and homelessness. The number of homes in Unincorporated Santa Clara County decreased, 6.3% from 2010 to 2020, which is *below* the growth rate for Santa Clara County and *below* the growth rate of the region's housing stock during this time period.
- **Home Prices** - A diversity of homes at all income levels creates opportunities for all Unincorporated Santa Clara County residents to live and thrive in the community.
 - **Ownership** The largest proportion of homes had a value in the range of \$2M+ in 2019. Home prices increased by 92.4% from 2010 to 2020.
 - **Rental Prices** - The typical contract rent for an apartment in Unincorporated Santa Clara County was \$1,630 in 2019. Rental prices increased by 42.9% from 2009 to 2019. To rent a typical apartment without cost burden, a household would need to make \$65,200 per year.²

¹ The Census Bureau's American Community Survey accounts for ethnic origin separate from racial identity. The numbers reported here use an accounting of both such that the racial categories are shown exclusive of Latinx status, to allow for an accounting of the Latinx population regardless of racial identity. The term Hispanic has historically been used to describe people from numerous Central American, South American, and Caribbean countries. In recent years, the term Latino or Latinx has become preferred. This report generally uses Latinx, but occasionally when discussing US Census data, we use Hispanic or Non-Hispanic, to clearly link to the data source.

² Note that contract rents may differ significantly from, and often being lower than, current listing prices.

- **Housing Type** - It is important to have a variety of housing types to meet the needs of a community today and in the future. In 2020, 77.1% of homes in Unincorporated Santa Clara County were single family detached, 3.8% were single family attached, 4.0% were small multifamily (2-4 units), and 13.0% were medium or large multifamily (5+ units). Between 2010 and 2020, the number of multi-family units increased more than single-family units. Generally, in Unincorporated Santa Clara County, the share of the housing stock that is detached single family homes is above that of other jurisdictions in the region.
- **Cost Burden** - The U.S. Department of Housing and Urban Development considers housing to be affordable for a household if the household spends less than 30% of its income on housing costs. A household is considered “cost-burdened” if it spends more than 30% of its monthly income on housing costs, while those who spend more than 50% of their income on housing costs are considered “severely cost-burdened.” In Unincorporated Santa Clara County, 20.6% of households spend 30%-50% of their income on housing, while 17.0% of households are severely cost burden and use the majority of their income for housing.
- **Displacement/Gentrification** - According to research from The University of California, Berkeley, 0.0% of households in Unincorporated Santa Clara County live in neighborhoods that are susceptible to or experiencing displacement, and 0.0% live in areas at risk of or undergoing gentrification. 68.6% of households in Unincorporated Santa Clara County live in neighborhoods where low-income households are likely excluded due to prohibitive housing costs. There are various ways to address displacement including ensuring new housing at all income levels is built.
- **Neighborhood** - 39.0% of residents in Unincorporated Santa Clara County live in neighborhoods identified as “Highest Resource” or “High Resource” areas by State-commissioned research, while 32.1% of residents live in areas identified by this research as “Low Resource” or “High Segregation and Poverty” areas. These neighborhood designations are based on a range of indicators covering areas such as education, poverty, proximity to jobs and economic opportunities, low pollution levels, and other factors.³
- **Special Housing Needs** - Some population groups may have special housing needs that require specific program responses, and these groups may experience barriers to accessing stable housing due to their specific housing circumstances. In Unincorporated Santa Clara County, 8.3% of residents have a disability of any kind and may require accessible housing. Additionally, 12.2% of Unincorporated Santa Clara County households are larger households with five or more people, who likely need larger housing units with three bedrooms or more. 8.1% of households are female-headed families, which are often at greater risk of housing insecurity.

Note on Data

³ For more information on the “opportunity area” categories developed by HCD and the California Tax Credit Allocation Committee, see this website: <https://www.treasurer.ca.gov/ctcac/opportunity.asp>. The degree to which different jurisdictions and neighborhoods have access to opportunity will likely need to be analyzed as part of new Housing Element requirements related to affirmatively furthering fair housing. ABAG/MTC will be providing jurisdictions with technical assistance on this topic this summer, following the release of additional guidance from HCD.

Many of the tables in this report are sourced from data from the Census Bureau’s American Community Survey or U.S. Department of Housing and Urban Development’s Comprehensive Housing Affordability Strategy (CHAS) data, both of which are samples and as such, are subject to sampling variability. This means that data is an estimate, and that other estimates could be possible if another set of respondents had been reached. We use the five-year release to get a larger data pool to minimize this “margin of error” but particularly for the smaller cities, the data will be based on fewer responses, and the information should be interpreted accordingly.

Additionally, there may be instances where there is no data available for a jurisdiction for particular data point, or where a value is 0 and the automatically generated text cannot perform a calculation. In these cases, the automatically generated text is “NODATA.” Staff should reword these sentences before using them in the context of the Housing Element or other documents.

Note on Figures

Any figure that does not specify geography in the figure name represents data for Unincorporated Santa Clara County.

3 LOOKING TO THE FUTURE: REGIONAL HOUSING NEEDS

3.1 Regional Housing Needs Determination

The Plan Bay Area 2050⁴ Final Blueprint forecasts that the nine-county Bay Area will add 1.4 million new households between 2015 and 2050. For the eight-year time frame covered by this Housing Element Update, the Department of Housing and Community Development (HCD) has identified the region's housing need as 441,176 units. The total number of housing units assigned by HCD is separated into four income categories that cover housing types for all income levels, from very low-income households to market rate housing.⁵ This calculation, known as the Regional Housing Needs Determination (RHND), is based on population projections produced by the California Department of Finance as well as adjustments that incorporate the region's existing housing need. The adjustments result from recent legislation requiring HCD to apply additional adjustment factors to the baseline growth projection from California Department of Finance, in order for the regions to get closer to healthy housing markets. To this end, adjustments focus on the region's vacancy rate, level of overcrowding and the share of cost burdened households, and seek to bring the region more in line with comparable ones.⁶ These new laws governing the methodology for how HCD calculates the RHND resulted in a significantly higher number of housing units for which the Bay Area must plan compared to previous RHNA cycles.

3.2 Regional Housing Needs Allocation

A starting point for the Housing Element Update process for every California jurisdiction is the Regional Housing Needs Allocation or RHNA - the share of the RHND assigned to each jurisdiction by the Association of Bay Area Governments (ABAG). State Housing Element Law requires ABAG to develop a methodology that calculates the number of housing units assigned to each city and county and distributes each jurisdiction's housing unit allocation among four affordability levels. For this RHNA cycle, the RHND increased by 135%, from 187,990 to 441,776. For more information on the RHNA process this cycle, see ABAG's website: <https://abag.ca.gov/our-work/housing/rhna-regional-housing-needs-allocation>

Almost all jurisdictions in the Bay Area are likely to receive a larger RHNA this cycle compared to the last cycle, primarily due to changes in state law that led to a considerably higher RHND compared to previous cycles.

In January 2021, ABAG adopted a Draft RHNA Methodology, which is currently being reviewed by HCD. For Unincorporated Santa Clara County, the proposed RHNA to be planned for this cycle is 3,125 units, a slated increase from the last cycle. **Please note that the previously stated figures are merely illustrative, as ABAG has yet to issue Final RHNA allocations. The Final RHNA allocations that local**

⁴ Plan Bay Area 2050 is a long-range plan charting the course for the future of the nine-county San Francisco Bay Area. It covers four key issues: the economy, the environment, housing and transportation

⁵ HCD divides the RHND into the following four income categories:

Very Low-income: 0-50% of Area Median Income

Low-income: 50-80% of Area Median Income

Moderate-income: 80-120% of Area Median Income

Above Moderate-income: 120% or more of Area Median Income

⁶ For more information on HCD's RHND calculation for the Bay Area, see this letter sent to ABAG from HCD on June 9, 2020: [https://www.hcd.ca.gov/community-development/housing-element/docs/abagrhna-final060920\(r\).pdf](https://www.hcd.ca.gov/community-development/housing-element/docs/abagrhna-final060920(r).pdf)

jurisdictions will use for their Housing Elements will be released at the end of 2021. The potential allocation that Unincorporated Santa Clara County would receive from the Draft RHNA Methodology is broken down by income category as follows:

Table 1: Illustrative Regional Housing Needs Allocation from Draft Methodology

Income Group	Unincorporated Santa Clara Units	Santa Clara County Units	Bay Area Units	Unincorporated Santa Clara Percent	Santa Clara County Percent	Bay Area Percent
Very Low Income (<50% of AMI)	828	32316	114442	26.5%	24.9%	25.9%
Low Income (50%-80% of AMI)	477	18607	65892	15.3%	14.4%	14.9%
Moderate Income (80%-120% of AMI)	508	21926	72712	16.3%	16.9%	16.5%
Above Moderate Income (>120% of AMI)	1312	56728	188130	42.0%	43.8%	42.6%
Total	3125	129577	441176	100.0%	100.0%	100.0%

Source: Association of Bay Area Governments Methodology and tentative numbers were approved by ABAG’s Executive board on January 21, 2021 (Resolution No. 02-2021). The numbers were submitted for review to California Housing and Community Development in February 2021, after which an appeals process will take place during the Summer and Fall of 2021. THESE NUMBERS SHOULD BE CONSIDERED PRELIMINARY AND SUBJECT TO CHANGE PER HCD REVIEW

4 POPULATION, EMPLOYMENT AND HOUSEHOLD CHARACTERISTICS

4.1 Population

The Bay Area is the fifth-largest metropolitan area in the nation and has seen a steady increase in population since 1990, except for a dip during the Great Recession. Many cities in the region have experienced significant growth in jobs and population. While these trends have led to a corresponding increase in demand for housing across the region, the regional production of housing has largely not kept pace with job and population growth. Since 2000, Unincorporated Santa Clara County’s population has decreased by 12.8%; this rate is below that of the region as a whole, at 14.8%. In Unincorporated Santa Clara County, roughly 15.9% of its population moved during the past year, a number 2.5 percentage points greater than the regional rate of 13.4%.

Table 2: Population Growth Trends

Geography	1990	1995	2000	2005	2010	2015	2020
Unincorporated Santa Clara	106173	107705	99813	97844	89960	88323	86989
Santa Clara County	1497577	1594818	1682585	1752696	1781642	1912180	1961969
Bay Area	6020147	6381961	6784348	7073912	7150739	7595694	7790537

Universe: Total population

Source: California Department of Finance, E-5 series

For more years of data, please refer to the Data Packet Workbook, Table POPEMP-01.

In 2020, the population of Unincorporated Santa Clara County was estimated to be 86,989 (see Table 2). From 1990 to 2000, the population decreased by 6.0%, while it decreased by 9.9% during the first decade of the 2000s. In the most recent decade, the population decreased by 3.3%. The population of Unincorporated Santa Clara County makes up 4.4% of Santa Clara County.⁷

⁷ To compare the rate of growth across various geographic scales, Figure 1 shows population for the jurisdiction, county, and region indexed to the population in the year 1990. This means that the data points represent the population growth (i.e. percent change) in each of these geographies relative to their populations in 1990.

Figure 1: Population Growth Trends

Source: California Department of Finance, E-5 series Note: The data shown on the graph represents population for the jurisdiction, county, and region indexed to the population in the first year shown. The data points represent the relative population growth in each of these geographies relative to their populations in that year. For some jurisdictions, a break may appear at the end of each decade (1999, 2009) as estimates are compared to census counts. DOF uses the decennial census to benchmark subsequent population estimates. For the data table behind this figure, please refer to the Data Packet Workbook, Table POPEMP-01.

4.2 Age

The distribution of age groups in a city shapes what types of housing the community may need in the near future. An increase in the older population may mean there is a developing need for more senior housing options, while higher numbers of children and young families can point to the need for more family housing options and related services. There has also been a move by many to age-in-place or downsize to stay within their communities, which can mean more multifamily and accessible units are also needed.

In Unincorporated Santa Clara County, the median age in 2000 was 32.6; by 2019, this figure had increased, landing at around 35 years. More specifically, the population of those under 14 has decreased since 2010, while the 65-and-over population has increased (see Figure 2).

Figure 2: Population by Age, 2000-2019

Universe: Total population

Source: U.S. Census Bureau, Census 2000 SF1, Table P12; U.S. Census Bureau, Census 2010 SF1, Table P12; U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B01001

For the data table behind this figure, please refer to the Data Packet Workbook, Table POPEMP-04.

Looking at the senior and youth population by race can add an additional layer of understanding, as families and seniors of color are even more likely to experience challenges finding affordable housing. People of color⁸ make up 23.4% of seniors and 38.4% of youth under 18 (see Figure 3).

⁸ Here, we count all non-white racial groups

Figure 3: Senior and Youth Population by Race

Universe: Total population

Notes: In the sources for this table, the Census Bureau does not disaggregate racial groups by Hispanic/Latinx ethnicity, and an overlapping category of Hispanic / non-Hispanic groups has not been shown to avoid double counting in the stacked bar chart.

Source: U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B01001(A-G)

For the data table behind this figure, please refer to the Data Packet Workbook, Table SEN-02.

4.3 Race and Ethnicity

Understanding the racial makeup of a city and region is important for designing and implementing effective housing policies and programs. These patterns are shaped by both market factors and government actions, such as exclusionary zoning, discriminatory lending practices and displacement that has occurred over time and continues to impact communities of color today⁹. Since 2000, the percentage of residents in Unincorporated Santa Clara County identifying as White has decreased - and by the same token the percentage of residents of all *other* races and ethnicities has *increased* - by 10.6 percentage points, with the 2019 population standing at 38,599 (see Figure 4). In absolute terms, the *Other Race or Multiple Races, Non-Hispanic* population increased the most while the *White, Non-Hispanic* population decreased the most.

⁹ See, for example, Rothstein, R. (2017). *The color of law : a forgotten history of how our government segregated America*. New York, NY & London, UK: Liveright Publishing.

Figure 4: Population by Race, 2000-2019

Universe: Total population

Notes: Data for 2019 represents 2015-2019 ACS estimates. The Census Bureau defines Hispanic/Latinx ethnicity separate from racial categories. For the purposes of this graph, the “Hispanic or Latinx” racial/ethnic group represents those who identify as having Hispanic/Latinx ethnicity and may also be members of any racial group. All other racial categories on this graph represent those who identify with that racial category and do not identify with Hispanic/Latinx ethnicity.

Source: U.S. Census Bureau, Census 2000, Table P004; U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B03002

For the data table behind this figure, please refer to the Data Packet Workbook, Table POPEMP-02.

4.4 Employment Trends

4.4.1 Balance of Jobs and Workers

A city houses employed residents who either work in the community where they live or work elsewhere in the region. Conversely, a city may have job sites that employ residents from the same city, but more often employ workers commuting from outside of it. Smaller cities typically will have more employed residents than jobs there and export workers, while larger cities tend to have a surplus of jobs and import workers. To some extent the regional transportation system is set up for this flow of workers to the region’s core job centers. At the same time, as the housing affordability crisis has illustrated, local imbalances may be severe, where local jobs and worker populations are out of sync at a sub-regional scale.

One measure of this is the relationship between *workers* and *jobs*. A city with a surplus of workers “exports” workers to other parts of the region, while a city with a surplus of jobs must conversely “import” them. Between 2002 and 2018, the number of jobs in Unincorporated Santa Clara County increased by 9.9% (see Figure 5).

Figure 5: Jobs in a Jurisdiction

Universe: Jobs from unemployment insurance-covered employment (private, state and local government) plus United States Office of Personnel Management-sourced Federal employment

Notes: The data is tabulated by place of work, regardless of where a worker lives. The source data is provided at the census block level. These are crosswalked to jurisdictions and summarized.

Source: U.S. Census Bureau, Longitudinal Employer-Household Dynamics, Workplace Area Characteristics (WAC) files, 2002-2018 For the data table behind this figure, please refer to the Data Packet Workbook, Table POPEMP-11.

There are 40,111 employed residents, and 54,132 jobs¹⁰ in Unincorporated Santa Clara County - the ratio of jobs to resident workers is 1.35; Unincorporated Santa Clara County is a *net importer of workers*.

Figure 6 shows the balance when comparing jobs to workers, broken down by different wage groups, offering additional insight into local dynamics. A community may offer employment for relatively low-income workers but have relatively few housing options for those workers - or conversely, it may house residents who are low wage workers but offer few employment opportunities for them. Such relationships may cast extra light on potentially pent-up demand for housing in particular price categories. A relative *surplus* of jobs relative to residents in a given wage category suggests the need to import those workers, while conversely, surpluses of workers in a wage group relative to jobs means the community will export those workers to other jurisdictions. Such flows are not inherently bad, though over time, sub-regional imbalances may appear. Unincorporated Santa Clara County has more low-wage *jobs* than low-wage *residents* (where low-wage refers to jobs paying less than \$25,000). At

¹⁰ Employed *residents* in a jurisdiction is counted by place of residence (they may work elsewhere) while *jobs* in a jurisdiction are counted by place of work (they may live elsewhere). The jobs may differ from those reported in Figure 5 as the source for the time series is from administrative data, while the cross-sectional data is from a survey.

the other end of the wage spectrum, the city has more high-wage *jobs* than high-wage *residents* (where high-wage refers to jobs paying more than \$75,000) (see Figure 6).¹¹

Figure 6: Workers by Earnings, by Jurisdiction as Place of Work and Place of Residence

Universe: Workers 16 years and over with earnings

Source: U.S. Census Bureau, American Community Survey 5-Year Data 2015-2019, B08119, B08519

For the data table behind this figure, please refer to the Data Packet Workbook, Table POPEMP-10.

Figure 7 shows the balance of a jurisdiction’s resident workers to the jobs located there for different wage groups as a ratio instead - a value of 1 means that a city has the same number of jobs in a wage group as it has resident workers - in principle, a balance. Values above 1 indicate a jurisdiction will need to import workers for jobs in a given wage group. At the regional scale, this ratio is 1.04 jobs for each worker, implying a modest import of workers from outside the region (see Figure 7).

¹¹ The source table is top-coded at \$75,000, precluding more fine grained analysis at the higher end of the wage spectrum.

Figure 7: Jobs-Worker Ratios, By Wage Group

Universe: Jobs in a jurisdiction from unemployment insurance-covered employment (private, state and local government) plus United States Office of Personnel Management-sourced Federal employment

Notes: The ratio compares job counts by wage group from two tabulations of LEHD data: Counts by place of work relative to counts by place of residence. See text for details.

Source: U.S. Census Bureau, Longitudinal Employer-Household Dynamics, Workplace Area Characteristics (WAC) files (Jobs); Residence Area Characteristics (RAC) files (Employed Residents), 2010-2018

For the data table behind this figure, please refer to the Data Packet Workbook, Table POPEMP-14.

Such balances between jobs and workers may directly influence the housing demand in a community. New jobs may draw new residents, and when there is high demand for housing relative to supply, many workers may be unable to afford to live where they work, particularly where job growth has been in relatively lower wage jobs. This dynamic not only means many workers will need to prepare for long commutes and time spent on the road, but in the aggregate it contributes to traffic congestion and time lost for all road users.

If there are more jobs than employed residents, it means a city is relatively jobs-rich, typically also with a high jobs to household ratio. Thus bringing housing into the measure, the *jobs-household ratio* in Unincorporated Santa Clara County has increased from 0.87 in 2002, to 1.1 jobs per household in 2018 (see Figure 8).

Figure 8: Jobs-Household Ratio

Universe: Jobs in a jurisdiction from unemployment insurance-covered employment (private, state and local government) plus United States Office of Personnel Management-sourced Federal employment; households in a jurisdiction

Notes: The data is tabulated by place of work, regardless of where a worker lives. The source data is provided at the census block level. These are crosswalked to jurisdictions and summarized. The ratio compares place of work wage and salary jobs with households, or occupied housing units. A similar measure is the ratio of jobs to housing units. However, this jobs-household ratio serves to compare the number of jobs in a jurisdiction to the number of housing units that are actually occupied. The difference between a jurisdiction’s jobs-housing ratio and jobs-household ratio will be most pronounced in jurisdictions with high vacancy rates, a high rate of units used for seasonal use, or a high rate of units used as short-term rentals.

Source: U.S. Census Bureau, Longitudinal Employer-Household Dynamics, Workplace Area Characteristics (WAC) files (Jobs), 2002-2018; California Department of Finance, E-5 (Households)

For the data table behind this figure, please refer to the Data Packet Workbook, Table POPEMP-13.

4.4.2 Sector Composition

In terms of sectoral composition, the largest industry in which Unincorporated Santa Clara County residents work is *Health & Educational Services*, and the largest sector in which Santa Clara residents work is *Health & Educational Services* (see Figure 9). For the Bay Area as a whole, the *Health & Educational Services* industry employs the most workers.

Figure 9: Resident Employment by Industry

Universe: Civilian employed population age 16 years and over

Notes: The data displayed shows the industries in which jurisdiction residents work, regardless of the location where those residents are employed (whether within the jurisdiction or not). Categories are derived from the following source tables: Agriculture & Natural Resources: C24030_003E, C24030_030E; Construction: C24030_006E, C24030_033E; Manufacturing, Wholesale & Transportation: C24030_007E, C24030_034E, C24030_008E, C24030_035E, C24030_010E, C24030_037E; Retail: C24030_009E, C24030_036E; Information: C24030_013E, C24030_040E; Financial & Professional Services: C24030_014E, C24030_041E, C24030_017E, C24030_044E; Health & Educational Services: C24030_021E, C24030_024E, C24030_048E, C24030_051E; Other: C24030_027E, C24030_054E, C24030_028E, C24030_055E

Source: U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table C24030

For the data table behind this figure, please refer to the Data Packet Workbook, Table POPEMP-06.

4.4.3 Unemployment

In Unincorporated Santa Clara County, there was a 12.2 percentage point decrease in the unemployment rate between January 2010 and January 2021. Jurisdictions through the region experienced a sharp rise in unemployment in 2020 due to impacts related to the COVID-19 pandemic, though with a general improvement and recovery in the later months of 2020.

Figure 10: Unemployment Rate

Universe: Civilian noninstitutional population ages 16 and older

Notes: Unemployment rates for the jurisdiction level is derived from larger-geography estimates. This method assumes that the rates of change in employment and unemployment are exactly the same in each sub-county area as at the county level. If this assumption is not true for a specific sub-county area, then the estimates for that area may not be representative of the current economic conditions. Since this assumption is untested, caution should be employed when using these data. Only not seasonally-adjusted labor force (unemployment rates) data are developed for cities and CDPs.

Source: California Employment Development Department, Local Area Unemployment Statistics (LAUS), Sub-county areas monthly updates, 2010-2021.

For the data table behind this figure, please refer to the Data Packet Workbook, Table POPEMP-15.

4.5 Extremely Low-Income Households

Despite the economic and job growth experienced throughout the region since 1990, the income gap has continued to widen. California is one of the most economically unequal states in the nation, and the Bay Area has the highest income inequality between high- and low-income households in the state¹².

In Unincorporated Santa Clara County, 54.5% of households make more than 100% of the Area Median Income (AMI)¹³, compared to 11.5% making less than 30% of AMI, which is considered extremely low-income (see Figure 11).

¹² Bohn, S. et al. 2020. Income Inequality and Economic Opportunity in California. *Public Policy Institute of California*.

¹³ Income groups are based on HUD calculations for Area Median Income (AMI). HUD calculates the AMI for different metropolitan areas, and the nine county Bay Area includes the following metropolitan areas: Napa Metro Area (Napa County), Oakland-Fremont Metro Area (Alameda and Contra Costa Counties), San Francisco Metro Area (Marin, San Francisco, and San Mateo Counties), San Jose-Sunnyvale-Santa Clara Metro Area (Santa Clara County), Santa Rosa Metro Area (Sonoma County), and Vallejo-Fairfield Metro Area (Solano County). The AMI levels in this chart are based on the HUD metro area where this jurisdiction is located. Households making between 80 and 120

Regionally, more than half of all households make more than 100% AMI, while 15% make less than 30% AMI. In Santa Clara County, 30% AMI is the equivalent to the annual income of \$39,900 for a family of four. Many households with multiple wage earners - including food service workers, full-time students, teachers, farmworkers and healthcare professionals - can fall into lower AMI categories due to relatively stagnant wages in many industries.

Note on Estimating the Projected Number of Extremely Low-Income Households

Local jurisdictions are required to provide an estimate for their projected extremely low-income households in their Housing Elements. HCD's official Housing Element guidance notes that jurisdictions can use their RHNA for very low-income households (those making 0-50% AMI) to calculate their projected extremely low-income households. For more information, visit HCD's Building Blocks page on Extremely Low-Income Housing Needs.

This document does not contain the required data point of projected extremely low-income households, as Bay Area jurisdictions have not yet received their final RHNA numbers. Once Unincorporated Santa Clara County receives its 6th Cycle RHNA, staff can estimate the projected extremely low-income households using one of the following three methodologies:

Option A: Assume that 59.8% of Unincorporated Santa Clara County's very low-income RHNA is for extremely low-income households.

According to HCD's Regional Housing Need Determination for the Bay Area, 15.5% of the region's housing need is for 0-30% AMI households while 25.9% is for 0-50% AMI households. Therefore, extremely low-income housing need represents 59.8% of the region's very low-income housing need, as 15.5 divided by 25.9 is 59.8%. This option aligns with HCD's guidance to use U.S. Census data to calculate the percentage of very low-income RHNA that qualifies for extremely low-income households, as HCD uses U.S. Census data to calculate the Regional Housing Need Determination.

Option B: Assume that 45.4% of Unincorporated Santa Clara County's very low-income RHNA is for extremely low-income households.

According to the data shown below (Figure 11), 6,474 of Unincorporated Santa Clara County's households are 0-50% AMI while 2,942 are extremely low-income. Therefore, extremely low-income households represent 45.4% of households who are 0-50% AMI, as 2,942 divided by 6,474 is 45.4%. This option aligns with HCD's guidance to use U.S. Census data to calculate the percentage of very low-income RHNA that qualifies for extremely low-income households, as the information in Figure 11 represents a tabulation of Census Bureau Data.

Option C: Assume that 50% of Unincorporated Santa Clara County's very low-income RHNA is for extremely low-income households.

HCD's guidance notes that instead of using U.S. Census data to calculate the percentage of very low-income RHNA that qualifies for extremely low-income households, local jurisdictions can presume that 50% of their RHNA for very low-income households qualifies for extremely low-income households.

percent of the AMI are moderate-income, those making 50 to 80 percent are low-income, those making 30 to 50 percent are very low-income, and those making less than 30 percent are extremely low-income. This is then adjusted for household size.

Figure 11: Households by Household Income Level

Universe: Occupied housing units

Notes: Income groups are based on HUD calculations for Area Median Income (AMI). HUD calculates the AMI for different metropolitan areas, and the nine county Bay Area includes the following metropolitan areas: Napa Metro Area (Napa County), Oakland-Fremont Metro Area (Alameda and Contra Costa Counties), San Francisco Metro Area (Marin, San Francisco, and San Mateo Counties), San Jose-Sunnyvale-Santa Clara Metro Area (Santa Clara County), Santa Rosa Metro Area (Sonoma County), and Vallejo-Fairfield Metro Area (Solano County). The AMI levels in this chart are based on the HUD metro area where this jurisdiction is located. The data that is reported for the Bay Area is not based on a regional AMI but instead refers to the regional total of households in an income group relative to the AMI for the county where that household is located. Local jurisdictions are required to provide an estimate for their projected extremely low-income households (0-30% AMI) in their Housing Elements. HCD’s official Housing Element guidance notes that jurisdictions can use their RHNA for very low-income households (those making 0-50% AMI) to calculate their projected extremely low-income households. As Bay Area jurisdictions have not yet received their final RHNA numbers, this document does not contain the required data point of projected extremely low-income households. The report portion of the housing data needs packet contains more specific guidance for how local staff can calculate an estimate for projected extremely low-income households once jurisdictions receive their 6th cycle RHNA numbers.

Source: U.S. Department of Housing and Urban Development (HUD), Comprehensive Housing Affordability Strategy (CHAS) ACS tabulation, 2013-2017 release

For the data table behind this figure, please refer to the Data Packet Workbook, Table ELI-01.

Throughout the region, there are disparities between the incomes of homeowners and renters. Typically, the number of low-income renters greatly outpaces the amount of housing available that is affordable for these households.

In Unincorporated Santa Clara County, the largest proportion of renters falls in the *Greater than 100% of AMI* income group, while the largest proportion of homeowners are found in the *Greater than 100% of AMI* group (see Figure 12).

Figure 12: Household Income Level by Tenure

Universe: Occupied housing units

Notes: Income groups are based on HUD calculations for Area Median Income (AMI). HUD calculates the AMI for different metropolitan areas, and the nine county Bay Area includes the following metropolitan areas: Napa Metro Area (Napa County), Oakland-Fremont Metro Area (Alameda and Contra Costa Counties), San Francisco Metro Area (Marin, San Francisco, and San Mateo Counties), San Jose-Sunnyvale-Santa Clara Metro Area (Santa Clara County), Santa Rosa Metro Area (Sonoma County), and Vallejo-Fairfield Metro Area (Solano County). The AMI levels in this chart are based on the HUD metro area where this jurisdiction is located.

For the data table behind this figure, please refer to the Data Packet Workbook, Table POPEMP-21.

Currently, people of color are more likely to experience poverty and financial instability as a result of federal and local housing policies that have historically excluded them from the same opportunities extended to white residents.¹⁴ These economic disparities also leave communities of color at higher risk for housing insecurity, displacement or homelessness. In Unincorporated Santa Clara County, Other Race or Multiple Races (Hispanic and Non-Hispanic) residents experience the highest rates of poverty, followed by Asian / API (Hispanic and Non-Hispanic) residents (see Figure 13).

¹⁴ Moore, E., Montojo, N. and Mauri, N., 2019. *Roots, Race & Place: A History of Racially Exclusionary Housing the San Francisco Bay Area*. *Hass Institute*.

Figure 13: Poverty Status by Race

Universe: Population for whom poverty status is determined

Notes: The Census Bureau uses a federally defined poverty threshold that remains constant throughout the country and does not correspond to Area Median Income. For this table, the Census Bureau does not disaggregate racial groups by Hispanic/Latinx ethnicity. However, data for the white racial group is also reported for white householders who are not Hispanic/Latinx. Since residents who identify as white and Hispanic/Latinx may have very different experiences within the housing market and the economy from those who identify as white and non-Hispanic/Latinx, data for multiple white sub-groups are reported here. The racial/ethnic groups reported in this table are not all mutually exclusive. Therefore, the data should not be summed as the sum exceeds the population for whom poverty status is determined for this jurisdiction. However, all groups labelled “Hispanic and Non-Hispanic” are mutually exclusive, and the sum of the data for these groups is equivalent to the population for whom poverty status is determined.

Source: U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B17001(A-I)

For the data table behind this figure, please refer to the Data Packet Workbook, Table ELI-03.

4.6 Tenure

The number of residents who own their homes compared to those who rent their homes can help identify the level of housing insecurity - ability for individuals to stay in their homes - in a city and region. Generally, renters may be displaced more quickly if prices increase. In Unincorporated Santa Clara County there are a total of 24,801 housing units, and fewer residents rent than own their homes: 31.3% versus 68.7% (see Figure 14). By comparison, 43.6% of households in Santa Clara County are renters, while 44% of Bay Area households rent their homes.

Figure 14: Housing Tenure

Universe: Occupied housing units

Source: U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25003

For the data table behind this figure, please refer to the Data Packet Workbook, Table POPEMP-16.

Homeownership rates often vary considerably across race/ethnicity in the Bay Area and throughout the country. These disparities not only reflect differences in income and wealth but also stem from federal, state, and local policies that limited access to homeownership for communities of color while facilitating homebuying for white residents. While many of these policies, such as redlining, have been formally disbanded, the impacts of race-based policy are still evident across Bay Area communities.¹⁵ In Unincorporated Santa Clara County, 33.9% of Black households owned their homes, while homeownership rates were 61.6% for Asian households, 56.2% for Latinx households, and 74.2% for White households. Notably, recent changes to state law require local jurisdictions to examine these dynamics and other fair housing issues when updating their Housing Elements.

¹⁵ See, for example, Rothstein, R. (2017). *The color of law : a forgotten history of how our government segregated America*. New York, NY & London, UK: Liveright Publishing.

Figure 15: Housing Tenure by Race of Householder

Universe: Occupied housing units

Notes: For this table, the Census Bureau does not disaggregate racial groups by Hispanic/Latinx ethnicity. However, data for the white racial group is also reported for white householders who are not Hispanic/Latinx. Since residents who identify as white and Hispanic/Latinx may have very different experiences within the housing market and the economy from those who identify as white and non-Hispanic/Latinx, data for multiple white sub-groups are reported here. The racial/ethnic groups reported in this table are not all mutually exclusive. Therefore, the data should not be summed as the sum exceeds the total number of occupied housing units for this jurisdiction. However, all groups labelled “Hispanic and Non-Hispanic” are mutually exclusive, and the sum of the data for these groups is equivalent to the total number of occupied housing units.

*Source: U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25003(A-I)
For the data table behind this figure, please refer to the Data Packet Workbook, Table POPEMP-20.*

The age of residents who rent or own their home can also signal the housing challenges a community is experiencing. Younger households tend to rent and may struggle to buy a first home in the Bay Area due to high housing costs. At the same time, senior homeowners seeking to downsize may have limited options in an expensive housing market.

In Unincorporated Santa Clara County, 62.0% of householders between the ages of 25 and 44 are renters, while 6.8% of householders over 65 are (see Figure 16).

Figure 16: Housing Tenure by Age

Universe: Occupied housing units

Source: U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25007

For the data table behind this figure, please refer to the Data Packet Workbook, Table POPEMP-18.

In many cities, homeownership rates for households in single-family homes are substantially higher than the rates for households in multi-family housing. In Unincorporated Santa Clara County, 83.7% of households in detached single-family homes are homeowners, while 4.2% of households in multi-family housing are homeowners (see Figure 17).

Figure 17: Housing Tenure by Housing Type

Universe: Occupied housing units

For the data table behind this figure, please refer to the Data Packet Workbook, Table POPEMP-22.

4.7 Displacement

Because of increasing housing prices, displacement is a major concern in the Bay Area. Displacement has the most severe impacts on low- and moderate-income residents. When individuals or families are forced to leave their homes and communities, they also lose their support network.

The University of California, Berkeley has mapped all neighborhoods in the Bay area, identifying their risk for gentrification. They find that in Unincorporated Santa Clara County, 0.0% of households live in neighborhoods that are susceptible to or experiencing displacement and 0.0% live in neighborhoods at risk of or undergoing gentrification.

Equally important, some neighborhoods in the Bay Area do not have housing appropriate for a broad section of the workforce. UC Berkeley estimates that 68.6% of households in Unincorporated Santa Clara County live in neighborhoods where low-income households are likely to be excluded due to prohibitive housing costs.¹⁶

¹⁶ More information about this gentrification and displacement data is available at the Urban Displacement Project's webpage: <https://www.urbandisplacement.org/>. Specifically, one can learn more about the different gentrification/displacement typologies shown in Figure 18 at this link: https://www.urbandisplacement.org/sites/default/files/typology_sheet_2018_0.png. Additionally, one can view maps that show which typologies correspond to which parts of a jurisdiction here: <https://www.urbandisplacement.org/san-francisco/sf-bay-area-gentrification-and-displacement>

Figure 18: Households by Displacement Risk and Tenure

Universe: Households

Notes: Displacement data is available at the census tract level. Staff aggregated tracts up to jurisdiction level using census 2010 population weights, assigning a tract to jurisdiction in proportion to block level population weights. Total household count may differ slightly from counts in other tables sourced from jurisdiction level sources. Categories are combined as follows for simplicity: At risk of or Experiencing Exclusion: At Risk of Becoming Exclusive; Becoming Exclusive; Stable/Advanced Exclusive At risk of or Experiencing Gentrification: At Risk of Gentrification; Early/Ongoing Gentrification; Advanced Gentrification Stable Moderate/Mixed Income: Stable Moderate/Mixed Income Susceptible to or Experiencing Displacement: Low-Income/Susceptible to Displacement; Ongoing Displacement Other: High Student Population; Unavailable or Unreliable Data Source: Urban Displacement Project for classification, American Community Survey 5-Year Data (2015-2019), Table B25003 for tenure.

For the data table behind this figure, please refer to the Data Packet Workbook, Table POPEMP-25.

5 HOUSING STOCK CHARACTERISTICS

5.1 Housing Types, Year Built, Vacancy, and Permits

In recent years, most housing produced in the region and across the state consisted of single-family homes and larger multi-unit buildings. However, some households are increasingly interested in “missing middle housing” - including duplexes, triplexes, townhomes, cottage clusters and accessory dwelling units (ADUs). These housing types may open up more options across incomes and tenure, from young households seeking homeownership options to seniors looking to downsize and age-in-place.

The housing stock of Unincorporated Santa Clara County in 2020 was made up of 77.1% single family detached homes, 3.8% single family attached homes, 4.0% multifamily homes with 2 to 4 units, 13.0% multifamily homes with 5 or more units, and 2.0% mobile homes (see Figure 19). In Unincorporated Santa Clara County, the housing type that experienced the most growth between 2010 and 2020 was *Multifamily Housing: Five-plus Units*.

Figure 19: Housing Type Trends

Universe: Housing units

Source: California Department of Finance, E-5 series

For the data table behind this figure, please refer to the Data Packet Workbook, Table HSG-01.

Production has not kept up with housing demand for several decades in the Bay Area, as the total number of units built and available has not yet come close to meeting the population and job growth experienced throughout the region. In Unincorporated Santa Clara County, the largest proportion of the housing stock was built 1940 to 1959, with 8,282 units constructed during this period (see Figure 20). Since 2010, 3.5% of the current housing stock was built, which is 951 units.

Figure 20: Housing Units by Year Structure Built

Universe: Housing units

Source: U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25034

For the data table behind this figure, please refer to the Data Packet Workbook, Table HSG-04.

Vacant units make up 7.6% of the overall housing stock in Unincorporated Santa Clara County. The rental vacancy stands at 5.6%, while the ownership vacancy rate is 1.5%. Of the vacant units, the most common type of vacancy is *Other Vacant* (see Figure 21).¹⁷

Throughout the Bay Area, vacancies make up 2.6% of the total housing units, with homes listed for rent; units used for *recreational or occasional use*, and units not otherwise classified (*other vacant*) making up the majority of vacancies. The Census Bureau classifies a unit as vacant if no one is occupying it when census interviewers are conducting the American Community Survey or Decennial Census. Vacant units classified as “for recreational or occasional use” are those that are held for short-term periods of use throughout the year. Accordingly, vacation rentals and short-term rentals like AirBnB are likely to fall in this category. The Census Bureau classifies units as “other vacant” if they are vacant due to foreclosure, personal/family reasons, legal proceedings, repairs/renovations, abandonment, preparation for being rented or sold, or vacant for an extended absence for reasons such as a work assignment, military duty, or incarceration.¹⁸ In a region with a thriving economy and housing market like the Bay Area, units being renovated/repared and prepared for rental or sale are likely to represent a large portion of the “other vacant” category. Additionally, the need for seismic retrofitting

¹⁷ The vacancy rates by tenure is for a smaller universe than the total vacancy rate first reported, which in principle includes the full stock (7.6%). The vacancy by tenure counts are rates relative to the rental stock (occupied and vacant) and ownership stock (occupied and vacant) - but exclude a significant number of vacancy categories, including the numerically significant *other vacant*.

¹⁸ For more information, see pages 3 through 6 of this list of definitions prepared by the Census Bureau: <https://www.census.gov/housing/hvs/definitions.pdf>.

in older housing stock could also influence the proportion of “other vacant” units in some jurisdictions.¹⁹

Figure 21: Vacant Units by Type

Universe: Vacant housing units
 Source: U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25004
 For the data table behind this figure, please refer to the Data Packet Workbook, Table HSG-03.

Between 2015 and 2019, 2,953 housing units were issued permits in Unincorporated Santa Clara County. 9.1% of permits issued in Unincorporated Santa Clara County were for above moderate-income housing, 87.9% were for moderate-income housing, and 3.0% were for low- or very low-income housing (see Table 3).

Table 3: Housing Permitting

Income Group	value
Moderate Income Permits	2597
Above Moderate Income Permits	268
Very Low Income Permits	88
Low Income Permits	0

Universe: Housing permits issued between 2015 and 2019
 Notes: HCD uses the following definitions for the four income categories: Very Low Income: units affordable to households making less than 50% of the Area Median Income for the county in which the jurisdiction is located. Low Income: units

¹⁹ See Dow, P. (2018). Unpacking the Growth in San Francisco’s Vacant Housing Stock: Client Report for the San Francisco Planning Department. University of California, Berkeley.

affordable to households making between 50% and 80% of the Area Median Income for the county in which the jurisdiction is located. Moderate Income: units affordable to households making between 80% and 120% of the Area Median Income for the county in which the jurisdiction is located. Above Moderate Income: units affordable to households making above 120% of the Area Median Income for the county in which the jurisdiction is located.

Source: California Department of Housing and Community Development (HCD), 5th Cycle Annual Progress Report Permit Summary (2020)

This table is included in the Data Packet Workbook as Table HSG-11.

5.2 Assisted Housing Developments At-Risk of Conversion

While there is an immense need to produce new affordable housing units, ensuring that the existing affordable housing stock remains affordable is equally important. Additionally, it is typically faster and less expensive to preserve currently affordable units that are at risk of converting to market-rate than it is to build new affordable housing.

The data in the table below comes from the California Housing Partnership’s Preservation Database, the state’s most comprehensive source of information on subsidized affordable housing at risk of losing its affordable status and converting to market-rate housing. However, this database does not include all deed-restricted affordable units in the state, so there may be at-risk assisted units in a jurisdiction that are not captured in this data table. There are 28 assisted units in Unincorporated Santa Clara County in the Preservation Database. Of these units, 0.0% are at *High Risk* or *Very High Risk* of conversion.²⁰

Note on At-Risk Assisted Housing Developments

HCD requires that Housing Elements list the assisted housing developments at risk of converting to market-rate uses. For more information on the specific properties that are at Moderate Risk, High Risk, or Very High Risk of conversion, local jurisdiction staff should contact Danielle Mazzella, Preservation & Data Manager at the California Housing Partnership, at dmazzella@chpc.net.

Table 4: Assisted Units at Risk of Conversion

Income	Unincorporated Santa Clara	Santa Clara County	Bay Area
Low	28	28001	110177
Moderate	0	1471	3375
High	0	422	1854
Very High	0	270	1053

²⁰ California Housing Partnership uses the following categories for assisted housing developments in its database: Very-High Risk: affordable homes that are at-risk of converting to market rate within the next year that do not have a known overlapping subsidy that would extend affordability and are not owned by a large/stable non-profit, mission-driven developer.

High Risk: affordable homes that are at-risk of converting to market rate in the next 1-5 years that do not have a known overlapping subsidy that would extend affordability and are not owned by a large/stable non-profit, mission-driven developer.

Moderate Risk: affordable homes that are at-risk of converting to market rate in the next 5-10 years that do not have a known overlapping subsidy that would extend affordability and are not owned by a large/stable non-profit, mission-driven developer.

Low Risk: affordable homes that are at-risk of converting to market rate in 10+ years and/or are owned by a large/stable non-profit, mission-driven developer.

	Income	Unincorporated Santa Clara	Santa Clara County	Bay Area
Total Assisted Units in Database		28	30164	116459

Universe: HUD, Low-Income Housing Tax Credit (LIHTC), USDA, and CalHFA projects. Subsidized or assisted developments that do not have one of the aforementioned financing sources may not be included.

Notes: While California Housing Partnership's Preservation Database is the state's most comprehensive source of information on subsidized affordable housing at risk of losing its affordable status and converting to market-rate housing, this database does not include all deed-restricted affordable units in the state. Consequently, there may be at-risk assisted units in a jurisdiction that are not captured in this data table. Per HCD guidance, local jurisdictions must also list the specific affordable housing developments at-risk of converting to market rate uses. This document provides aggregate numbers of at-risk units for each jurisdiction, but local planning staff should contact Danielle Mazzella with the California Housing Partnership at dmazzella@chpc.net to obtain a list of affordable properties that fall under this designation. California Housing Partnership uses the following categories for assisted housing developments in its database: Very-High Risk: affordable homes that are at-risk of converting to market rate within the next year that do not have a known overlapping subsidy that would extend affordability and are not owned by a large/stable non-profit, mission-driven developer. High Risk: affordable homes that are at-risk of converting to market rate in the next 1-5 years that do not have a known overlapping subsidy that would extend affordability and are not owned by a large/stable non-profit, mission-driven developer. Moderate Risk: affordable homes that are at-risk of converting to market rate in the next 5-10 years that do not have a known overlapping subsidy that would extend affordability and are not owned by a large/stable non-profit, mission-driven developer. Low Risk: affordable homes that are at-risk of converting to market rate in 10+ years and/or are owned by a large/stable non-profit, mission-driven developer.

Source: California Housing Partnership, Preservation Database (2020)

This table is included in the Data Packet Workbook as Table RISK-01.

5.3 Substandard Housing

Housing costs in the region are among the highest in the country, which could result in households, particularly renters, needing to live in substandard conditions in order to afford housing. Generally, there is limited data on the extent of substandard housing issues in a community. However, the Census Bureau data included in the graph below gives a sense of some of the substandard conditions that may be present in Unincorporated Santa Clara County. For example, 0.6% of renters in Unincorporated Santa Clara County reported lacking a kitchen and 0.3% of renters lack plumbing, compared to 0.4% of owners who lack a kitchen and 0.4% of owners who lack plumbing.

Note on Substandard Housing

HCD requires Housing Elements to estimate the number of units in need of rehabilitation and replacement. As a data source for housing units in need of rehabilitation and replacement is not available for all jurisdictions in the region, ABAG was not able to provide this required data point in this document. To produce an estimate of housing needs in need of rehabilitation and replacement, staff can supplement the data below on substandard housing issues with additional local information from code enforcement, recent windshield surveys of properties, building department data, knowledgeable builders/developers in the community, or nonprofit housing developers or organizations. For more information, visit HCD's Building Blocks page on Housing Stock Characteristics.

Figure 22: Substandard Housing Issues

Universe: Occupied housing units

Notes: Per HCD guidance, this data should be supplemented by local estimates of units needing to be rehabilitated or replaced based on recent windshield surveys, local building department data, knowledgeable builders/developers in the community, or nonprofit housing developers or organizations.

Source: U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25053, Table B25043, Table B25049 For the data table behind this figure, please refer to the Data Packet Workbook, Table HSG-06.

5.4 Home and Rent Values

Home prices reflect a complex mix of supply and demand factors, including an area’s demographic profile, labor market, prevailing wages and job outlook, coupled with land and construction costs. In the Bay Area, the costs of housing have long been among the highest in the nation. The typical home value in Unincorporated Santa Clara County was estimated at \$1,775,890 by December of 2020, per data from Zillow. The largest proportion of homes were valued between \$2M+ (see Figure 23). By comparison, the typical home value is \$1,290,970 in Santa Clara County and \$1,077,230 the Bay Area, with the largest share of units valued \$1m-\$1.5m (county) and \$500k-\$750k (region).

The region’s home values have increased steadily since 2000, besides a decrease during the Great Recession. The rise in home prices has been especially steep since 2012, with the median home value in the Bay Area nearly doubling during this time. Since 2001, the typical home value has increased 123.3% in **Unincorporated Santa Clara County from \$795,190 to \$1,775,890**. This change is below the change in Santa Clara County, and below the change for the region (see Figure 24).

Figure 23: Home Values of Owner-Occupied Units

Universe: Owner-occupied units

Source: U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25075

For the data table behind this figure, please refer to the Data Packet Workbook, Table HSG-07.

Figure 24: Zillow Home Value Index (ZHVI)

Universe: Owner-occupied housing units

Notes: Zillow describes the ZHVI as a smoothed, seasonally adjusted measure of the typical home value and market changes across a given region and housing type. The ZHVI reflects the typical value for homes in the 35th to 65th percentile range. The

ZHVI includes all owner-occupied housing units, including both single-family homes and condominiums. More information on the ZHVI is available from Zillow. The regional estimate is a household-weighted average of county-level ZHVI files, where household counts are yearly estimates from DOF's E-5 series. For unincorporated areas, the value is a population weighted average of unincorporated communities in the county matched to census-designated population counts.

Source: Zillow, Zillow Home Value Index (ZHVI)

For the data table behind this figure, please refer to the Data Packet Workbook, Table HSG-08.

Similar to home values, rents have also increased dramatically across the Bay Area in recent years. Many renters have been priced out, evicted or displaced, particularly communities of color. Residents finding themselves in one of these situations may have had to choose between commuting long distances to their jobs and schools or moving out of the region, and sometimes, out of the state.

In Unincorporated Santa Clara County, the largest proportion of rental units rented in the Rent \$1000-\$1500 category, totaling 27.5%, followed by 26.1% of units renting in the Rent \$1500-\$2000 category (see Figure 25). Looking beyond the city, the largest share of units is in the \$2000-\$2500 category (county) compared to the \$1500-\$2000 category for the region as a whole.

Figure 25: Contract Rents for Renter-Occupied Units

Universe: Renter-occupied housing units paying cash rent

Source: U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25056

For the data table behind this figure, please refer to the Data Packet Workbook, Table HSG-09.

Since 2009, the median rent has increased by 42.9% in Unincorporated Santa Clara County, from \$1,440 to \$1,630 per month (see Figure 26). In Santa Clara County, the median rent has increased 39.4%, from \$1,540 to \$2,150. The median rent in the region has increased significantly during this time from \$1,200 to \$1,850, a 54% increase.²¹

²¹ While the data on home values shown in Figure 24 comes from Zillow, Zillow does not have data on rent prices available for most Bay Area jurisdictions. To have a more comprehensive dataset on rental data for the region, the

Figure 26: Median Contract Rent

Universe: Renter-occupied housing units paying cash rent

Notes: For unincorporated areas, median is calculated using distribution in B25056.

Source: U.S. Census Bureau, American Community Survey 5-Year Data releases, starting with 2005-2009 through 2015-2019, B25058, B25056 (for unincorporated areas). County and regional counts are weighted averages of jurisdiction median using B25003 rental unit counts from the relevant year.

For the data table behind this figure, please refer to the Data Packet Workbook, Table HSG-10.

5.5 Overpayment and Overcrowding

A household is considered “cost-burdened” if it spends more than 30% of its monthly income on housing costs, while those who spend more than 50% of their income on housing costs are considered “severely cost-burdened.” Low-income residents are the most impacted by high housing costs and experience the highest rates of cost burden. Spending such large portions of their income on housing puts low-income households at higher risk of displacement, eviction, or homelessness.

rent data in this document comes from the U.S. Census Bureau’s American Community Survey, which may not fully reflect current rents. Local jurisdiction staff may want to supplement the data on rents with local realtor data or other sources for rent data that are more current than Census Bureau data.

Figure 27: Cost Burden by Tenure

Universe: Occupied housing units

Notes: Cost burden is the ratio of housing costs to household income. For renters, housing cost is gross rent (contract rent plus utilities). For owners, housing cost is “select monthly owner costs”, which includes mortgage payment, utilities, association fees, insurance, and real estate taxes. HUD defines cost-burdened households as those whose monthly housing costs exceed 30% of monthly income, while severely cost-burdened households are those whose monthly housing costs exceed 50% of monthly income.

Source: U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25070, B25091

For the data table behind this figure, please refer to the Data Packet Workbook, Table OVER-06.

Renters are often more cost-burdened than owners. While the housing market has resulted in home prices increasing dramatically, homeowners often have mortgages with fixed rates, whereas renters are more likely to be impacted by market increases. When looking at the cost burden across tenure in Unincorporated Santa Clara County, 25.8% of renters spend 30% to 50% of their income on housing compared to 17.9% of those that own (see Figure 27). Additionally, 22.3% of renters spend 50% or more of their income on housing, while 12.7% of owners are severely cost-burdened.

In Unincorporated Santa Clara County, 17.0% of households spend 50% or more of their income on housing, while 20.6% spend 30% to 50%. However, these rates vary greatly across income categories (see Figure 28). For example, 74.5% of Unincorporated Santa Clara County households making less than 30% of AMI spend the majority of their income on housing. For Unincorporated Santa Clara County residents making more than 100% of AMI, just 1.9% are severely cost-burdened, and 84.0% of those making more than 100% of AMI spend less than 30% of their income on housing.

Figure 28: Cost Burden by Income Level

Universe: Occupied housing units

Notes: Cost burden is the ratio of housing costs to household income. For renters, housing cost is gross rent (contract rent plus utilities). For owners, housing cost is “select monthly owner costs”, which includes mortgage payment, utilities, association fees, insurance, and real estate taxes. HUD defines cost-burdened households as those whose monthly housing costs exceed 30% of monthly income, while severely cost-burdened households are those whose monthly housing costs exceed 50% of monthly income. Income groups are based on HUD calculations for Area Median Income (AMI). HUD calculates the AMI for different metropolitan areas, and the nine county Bay Area includes the following metropolitan areas: Napa Metro Area (Napa County), Oakland-Fremont Metro Area (Alameda and Contra Costa Counties), San Francisco Metro Area (Marin, San Francisco, and San Mateo Counties), San Jose-Sunnyvale-Santa Clara Metro Area (Santa Clara County), Santa Rosa Metro Area (Sonoma County), and Vallejo-Fairfield Metro Area (Solano County). The AMI levels in this chart are based on the HUD metro area where this jurisdiction is located.

Source: U.S. Department of Housing and Urban Development (HUD), Comprehensive Housing Affordability Strategy (CHAS) ACS tabulation, 2013-2017 release

For the data table behind this figure, please refer to the Data Packet Workbook, Table OVER-05.

Currently, people of color are more likely to experience poverty and financial instability as a result of federal and local housing policies that have historically excluded them from the same opportunities extended to white residents. As a result, they often pay a greater percentage of their income on housing, and in turn, are at a greater risk of housing insecurity.

Black or African American, Non-Hispanic residents are the most cost burdened with 26.1% spending 30% to 50% of their income on housing, and *American Indian or Alaska Native, Non-Hispanic* residents are the most severely cost burdened with 71.4% spending more than 50% of their income on housing (see Figure 29).

Figure 29: Cost Burden by Race

Universe: Occupied housing units

Notes: Cost burden is the ratio of housing costs to household income. For renters, housing cost is gross rent (contract rent plus utilities). For owners, housing cost is “select monthly owner costs”, which includes mortgage payment, utilities, association fees, insurance, and real estate taxes. HUD defines cost-burdened households as those whose monthly housing costs exceed 30% of monthly income, while severely cost-burdened households are those whose monthly housing costs exceed 50% of monthly income. For the purposes of this graph, the “Hispanic or Latinx” racial/ethnic group represents those who identify as having Hispanic/Latinx ethnicity and may also be members of any racial group. All other racial categories on this graph represent those who identify with that racial category and do not identify with Hispanic/Latinx ethnicity.

Source: U.S. Department of Housing and Urban Development (HUD), Comprehensive Housing Affordability Strategy (CHAS) ACS tabulation, 2013-2017 release

For the data table behind this figure, please refer to the Data Packet Workbook, Table OVER-08.

Large family households often have special housing needs due to a lack of adequately sized affordable housing available. The higher costs required for homes with multiple bedrooms can result in larger families experiencing a disproportionate cost burden than the rest of the population and can increase the risk of housing insecurity.

In Unincorporated Santa Clara County, 21.1% of large family households experience a cost burden of 30%-50%, while 12.3% of households spend more than half of their income on housing. Some 20.5% of all other households have a cost burden of 30%-50%, with 17.7% of households spending more than 50% of their income on housing (see Figure 30).

Figure 30: Cost Burden by Household Size

Universe: Occupied housing units

Notes: Cost burden is the ratio of housing costs to household income. For renters, housing cost is gross rent (contract rent plus utilities). For owners, housing cost is “select monthly owner costs”, which includes mortgage payment, utilities, association fees, insurance, and real estate taxes. HUD defines cost-burdened households as those whose monthly housing costs exceed 30% of monthly income, while severely cost-burdened households are those whose monthly housing costs exceed 50% of monthly income.

Source: U.S. Department of Housing and Urban Development (HUD), Comprehensive Housing Affordability Strategy (CHAS) ACS tabulation, 2013-2017 release

For the data table behind this figure, please refer to the Data Packet Workbook, Table OVER-09.

When cost-burdened seniors are no longer able to make house payments or pay rents, displacement from their homes can occur, putting further stress on the local rental market or forcing residents out of the community they call home. Understanding how seniors might be cost-burdened is of particular importance due to their special housing needs, particularly for low-income seniors. 58.8% of seniors making less than 30% of AMI are spending the majority of their income on housing. For seniors making more than 100% of AMI, 83.5% are not cost-burdened and spend less than 30% of their income on housing (see Figure 31).

Figure 31: Cost-Burdened Senior Households by Income Level

Universe: Senior households

Notes: For the purposes of this graph, senior households are those with a householder who is aged 62 or older. Cost burden is the ratio of housing costs to household income. For renters, housing cost is gross rent (contract rent plus utilities). For owners, housing cost is “select monthly owner costs”, which includes mortgage payment, utilities, association fees, insurance, and real estate taxes. HUD defines cost-burdened households as those whose monthly housing costs exceed 30% of monthly income, while severely cost-burdened households are those whose monthly housing costs exceed 50% of monthly income. Income groups are based on HUD calculations for Area Median Income (AMI). HUD calculates the AMI for different metropolitan areas, and the nine county Bay Area includes the following metropolitan areas: Napa Metro Area (Napa County), Oakland-Fremont Metro Area (Alameda and Contra Costa Counties), San Francisco Metro Area (Marin, San Francisco, and San Mateo Counties), San Jose-Sunnyvale-Santa Clara Metro Area (Santa Clara County), Santa Rosa Metro Area (Sonoma County), and Vallejo-Fairfield Metro Area (Solano County). The AMI levels in this chart are based on the HUD metro area where this jurisdiction is located. Source: U.S. Department of Housing and Urban Development (HUD), Comprehensive Housing Affordability Strategy (CHAS) ACS tabulation, 2013-2017 release

For the data table behind this figure, please refer to the Data Packet Workbook, Table SEN-03.

Overcrowding occurs when the number of people living in a household is greater than the home was designed to hold. There are several different standards for defining overcrowding, but this report uses the Census Bureau definition, which is more than one occupant per room (not including bathrooms or kitchens). Additionally, the Census Bureau considers units with more than 1.5 occupants per room to be severely overcrowded.

Overcrowding is often related to the cost of housing and can occur when demand in a city or region is high. In many cities, overcrowding is seen more amongst those that are renting, with multiple households sharing a unit to make it possible to stay in their communities. In Unincorporated Santa Clara County, 3.3% of households that rent are severely overcrowded (more than 1.5 occupants per room), compared to 0.2% of households that own (see Figure 32). In Unincorporated Santa Clara County, 4.5% of renters experience moderate overcrowding (1 to 1.5 occupants per room), compared to 2.4% for those own.

Figure 32: Overcrowding by Tenure and Severity

Universe: Occupied housing units

Notes: The Census Bureau defines an overcrowded unit as one occupied by 1.01 persons or more per room (excluding bathrooms and kitchens), and units with more than 1.5 persons per room are considered severely overcrowded.

Source: U.S. Department of Housing and Urban Development (HUD), Comprehensive Housing Affordability Strategy (CHAS) ACS tabulation, 2013-2017 release

For the data table behind this figure, please refer to the Data Packet Workbook, Table OVER-01.

Overcrowding often disproportionately impacts low-income households. 2.3% of very low-income households (below 50% AMI) experience severe overcrowding, while 0.9% of households above 100% experience this level of overcrowding (see Figure 33).

Figure 33: Overcrowding by Income Level and Severity

Universe: Occupied housing units

Notes: The Census Bureau defines an overcrowded unit as one occupied by 1.01 persons or more per room (excluding bathrooms and kitchens), and units with more than 1.5 persons per room are considered severely overcrowded. Income groups are based on HUD calculations for Area Median Income (AMI). HUD calculates the AMI for different metropolitan areas, and the nine county Bay Area includes the following metropolitan areas: Napa Metro Area (Napa County), Oakland-Fremont Metro Area (Alameda and Contra Costa Counties), San Francisco Metro Area (Marin, San Francisco, and San Mateo Counties), San Jose-Sunnyvale-Santa Clara Metro Area (Santa Clara County), Santa Rosa Metro Area (Sonoma County), and Vallejo-Fairfield Metro Area (Solano County). The AMI levels in this chart are based on the HUD metro area where this jurisdiction is located.

Source: U.S. Department of Housing and Urban Development (HUD), Comprehensive Housing Affordability Strategy (CHAS) ACS tabulation, 2013-2017 release

For the data table behind this figure, please refer to the Data Packet Workbook, Table OVER-04.

Communities of color are more likely to experience overcrowding similar to how they are more likely to experience poverty, financial instability, and housing insecurity. People of color tend to experience overcrowding at higher rates than White residents. In Unincorporated Santa Clara County, the racial group with the largest overcrowding rate is *Other Race or Multiple Races (Hispanic and Non-Hispanic)* (see Figure 34)

Figure 34: Overcrowding by Race

Universe: Occupied housing units

Notes: The Census Bureau defines an overcrowded unit as one occupied by 1.01 persons or more per room (excluding bathrooms and kitchens), and units with more than 1.5 persons per room are considered severely overcrowded. For this table, the Census Bureau does not disaggregate racial groups by Hispanic/Latinx ethnicity. However, data for the white racial group is also reported for white householders who are not Hispanic/Latinx. Since residents who identify as white and Hispanic/Latinx may have very different experiences within the housing market and the economy from those who identify as white and non-Hispanic/Latinx, data for multiple white sub-groups are reported here. The racial/ethnic groups reported in this table are not all mutually exclusive. Therefore, the data should not be summed as the sum exceeds the total number of occupied housing units for this jurisdiction. However, all groups labelled “Hispanic and Non-Hispanic” are mutually exclusive, and the sum of the data for these groups is equivalent to the total number of occupied housing units.

*Source: U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25014
For the data table behind this figure, please refer to the Data Packet Workbook, Table OVER-03.*

6 SPECIAL HOUSING NEEDS

6.1 Large Households

Large households often have different housing needs than smaller households. If a city’s rental housing stock does not include larger apartments, large households who rent could end up living in overcrowded conditions. In Unincorporated Santa Clara, for large households with 5 or more persons, most units (74.2%) are owner occupied (see Figure 35). In 2017, 18.0% of large households were very low-income, earning less than 50% of the area median income (AMI).

Figure 35: Household Size by Tenure

Universe: Occupied housing units

Source: U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25009

For the data table behind this figure, please refer to the Data Packet Workbook, Table LGFEM-01.

The unit sizes available in a community affect the household sizes that can access that community. Large families are generally served by housing units with 3 or more bedrooms, of which there are 17,218 units in Unincorporated Santa Clara County. Among these large units with 3 or more bedrooms, 14.5% are owner-occupied and 85.5% are renter occupied (see Figure 36).

Figure 36: Housing Units by Number of Bedrooms

Universe: Housing units

Source: U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25042

For the data table behind this figure, please refer to the Data Packet Workbook, Table HSG-05.

6.2 Female-Headed Households

Households headed by one person are often at greater risk of housing insecurity, particularly female-headed households, who may be supporting children or a family with only one income. In Unincorporated Santa Clara County, the largest proportion of households is *Married-couple Family Households* at 59.9% of total, while *Female-Headed Households* make up 8.1% of all households.

Figure 37: Household Type

Universe: Households

Notes: For data from the Census Bureau, a “family household” is a household where two or more people are related by birth, marriage, or adoption. “Non-family households” are households of one person living alone, as well as households where none of the people are related to each other.

Source: U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B11001

For the data table behind this figure, please refer to the Data Packet Workbook, Table POPEMP-23.

Female-headed households with children may face particular housing challenges, with pervasive gender inequality resulting in lower wages for women. Moreover, the added need for childcare can make finding a home that is affordable more challenging.

In Unincorporated Santa Clara County, 26.9% of female-headed households with children fall below the Federal Poverty Line, while 8.4% of female-headed households *without* children live in poverty (see Figure 38).

Figure 38: Female-Headed Households by Poverty Status

Universe: Female Households

Notes: The Census Bureau uses a federally defined poverty threshold that remains constant throughout the country and does not correspond to Area Median Income.

Source: U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B17012

For the data table behind this figure, please refer to the Data Packet Workbook, Table LGFEM-05.

6.3 Seniors

Senior households often experience a combination of factors that can make accessing or keeping affordable housing a challenge. They often live on fixed incomes and are more likely to have disabilities, chronic health conditions and/or reduced mobility.

Seniors who rent may be at even greater risk for housing challenges than those who own, due to income differences between these groups. The largest proportion of senior households who rent make *0%-30% of AMI*, while the largest proportion of senior households who are homeowners falls in the income group *Greater than 100% of AMI* (see Figure 39).

Figure 39: Senior Households by Income and Tenure

Universe: Senior households

Notes: For the purposes of this graph, senior households are those with a householder who is aged 62 or older. Income groups are based on HUD calculations for Area Median Income (AMI). HUD calculates the AMI for different metropolitan areas, and the nine county Bay Area includes the following metropolitan areas: Napa Metro Area (Napa County), Oakland-Fremont Metro Area (Alameda and Contra Costa Counties), San Francisco Metro Area (Marin, San Francisco, and San Mateo Counties), San Jose-Sunnyvale-Santa Clara Metro Area (Santa Clara County), Santa Rosa Metro Area (Sonoma County), and Vallejo-Fairfield Metro Area (Solano County). The AMI levels in this chart are based on the HUD metro area where this jurisdiction is located.

Source: U.S. Department of Housing and Urban Development (HUD), Comprehensive Housing Affordability Strategy (CHAS) ACS tabulation, 2013-2017 release

For the data table behind this figure, please refer to the Data Packet Workbook, Table SEN-01.

6.4 People with Disabilities

People with disabilities face additional housing challenges. Encompassing a broad group of individuals living with a variety of physical, cognitive and sensory impairments, many people with disabilities live on fixed incomes and are in need of specialized care, yet often rely on family members for assistance due to the high cost of care.

When it comes to housing, people with disabilities are not only in need of affordable housing but accessibly designed housing, which offers greater mobility and opportunity for independence. Unfortunately, the need typically outweighs what is available, particularly in a housing market with such high demand. People with disabilities are at a high risk for housing insecurity, homelessness and institutionalization, particularly when they lose aging caregivers. Figure 40 shows the rates at which different disabilities are present among residents of Unincorporated Santa Clara County. Overall, 8.3% of people in Unincorporated Santa Clara County have a disability of any kind.²²

²² These disabilities are counted separately and are not mutually exclusive, as an individual may report more than one disability. These counts should not be summed.

Figure 40: Disability by Type

Universe: Civilian noninstitutionalized population 18 years and over

Notes: These disabilities are counted separately and are not mutually exclusive, as an individual may report more than one disability. These counts should not be summed. The Census Bureau provides the following definitions for these disability types: Hearing difficulty: deaf or has serious difficulty hearing. Vision difficulty: blind or has serious difficulty seeing even with glasses. Cognitive difficulty: has serious difficulty concentrating, remembering, or making decisions. Ambulatory difficulty: has serious difficulty walking or climbing stairs. Self-care difficulty: has difficulty dressing or bathing. Independent living difficulty: has difficulty doing errands alone such as visiting a doctor’s office or shopping.

Source: U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B18102, Table B18103, Table B18104, Table B18105, Table B18106, Table B18107.

For the data table behind this figure, please refer to the Data Packet Workbook, Table DISAB-01.

State law also requires Housing Elements to examine the housing needs of people with developmental disabilities. Developmental disabilities are defined as severe, chronic, and attributed to a mental or physical impairment that begins before a person turns 18 years old. This can include Down’s Syndrome, autism, epilepsy, cerebral palsy, and mild to severe mental retardation. Some people with developmental disabilities are unable to work, rely on Supplemental Security Income, and live with family members. In addition to their specific housing needs, they are at increased risk of housing insecurity after an aging parent or family member is no longer able to care for them.²³

In Unincorporated Santa Clara County, of the population with a developmental disability, children under the age of 18 make up 48.3%, while adults account for 51.7%.

²³ For more information or data on developmental disabilities in your jurisdiction, contact the Golden Gate Regional Center for Marin, San Francisco and San Mateo Counties; the North Bay Regional Center for Napa, Solano and Sonoma Counties; the Regional Center for the East Bay for Alameda and Contra Costa Counties; or the San Andreas Regional Center for Santa Clara County.

Table 5: Population with Developmental Disabilities by Age

This table is included in the Data Packet Workbook as Table DISAB-05.*

6.5 Homelessness

Homelessness remains an urgent challenge in many communities across the state, reflecting a range of social, economic, and psychological factors. Rising housing costs result in increased risks of community members experiencing homelessness. Far too many residents who have found themselves housing insecure have ended up unhoused or homeless in recent years, either temporarily or longer term. Addressing the specific housing needs for the unhoused population remains a priority throughout the region, particularly since homelessness is disproportionately experienced by people of color, people with disabilities, those struggling with addiction and those dealing with traumatic life circumstances. In Santa Clara County, the most common type of household experiencing homelessness is those without children in their care. Among households experiencing homelessness that do not have children, 87.1% are unsheltered. Of homeless households with children, most are sheltered in emergency shelter (see Figure 41).

Figure 41: Homelessness by Household Type and Shelter Status, Santa Clara County

Universe: Population experiencing homelessness

Notes: This data is based on Point-in-Time (PIT) information provided to HUD by CoCs in the application for CoC Homeless Assistance Programs. The PIT Count provides a count of sheltered and unsheltered homeless persons on a single night during the last ten days in January. Each Bay Area county is its own CoC, and so the data for this table is provided at the county-level. Per HCD's requirements, jurisdictions will need to supplement this county-level data with local estimates of people experiencing homelessness.

Source: U.S. Department of Housing and Urban Development (HUD), Continuum of Care (CoC) Homeless Populations and Subpopulations Reports (2019)

For the data table behind this figure, please refer to the Data Packet Workbook, Table HOMELS-01.

People of color are more likely to experience poverty and financial instability as a result of federal and local housing policies that have historically excluded them from the same opportunities extended to white residents. Consequently, people of color are often disproportionately impacted by homelessness, particularly Black residents of the Bay Area. In Santa Clara County, White (Hispanic and Non-Hispanic) residents represent the largest proportion of residents experiencing homelessness and account for 43.9% of the homeless population, while making up 44.5% of the overall population (see Figure 42).

Figure 42: Racial Group Share of General and Homeless Populations, Santa Clara County

Universe: Population experiencing homelessness

Notes: This data is based on Point-in-Time (PIT) information provided to HUD by CoCs in the application for CoC Homeless Assistance Programs. The PIT Count provides a count of sheltered and unsheltered homeless persons on a single night during the last ten days in January. Each Bay Area county is its own CoC, and so the data for this table is provided at the county-level. Per HCD's requirements, jurisdictions will need to supplement this county-level data with local estimates of people experiencing homelessness. HUD does not disaggregate racial demographic data by Hispanic/Latinx ethnicity for people experiencing homelessness. Instead, HUD reports data on Hispanic/Latinx ethnicity for people experiencing homelessness in a separate table. Accordingly, the racial group data listed here includes both Hispanic/Latinx and non-Hispanic/Latinx individuals.

Source: U.S. Department of Housing and Urban Development (HUD), Continuum of Care (CoC) Homeless Populations and Subpopulations Reports (2019); U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B01001(A-I) For the data table behind this figure, please refer to the Data Packet Workbook, Table HOMELS-02.

In Santa Clara, Latinx residents represent 42.7% of the population experiencing homelessness, while Latinx residents comprise 25.8% of the general population (see Figure 43).

Figure 43: Latinx Share of General and Homeless Populations, Santa Clara County

Universe: Population experiencing homelessness

Notes: This data is based on Point-in-Time (PIT) information provided to HUD by CoCs in the application for CoC Homeless Assistance Programs. The PIT Count provides a count of sheltered and unsheltered homeless persons on a single night during the last ten days in January. Each Bay Area county is its own CoC, and so the data for this table is provided at the county-level. Per HCD’s requirements, jurisdictions will need to supplement this county-level data with local estimates of people experiencing homelessness. The data from HUD on Hispanic/Latinx ethnicity for individuals experiencing homelessness does not specify racial group identity. Accordingly, individuals in either ethnic group identity category (Hispanic/Latinx or non-Hispanic/Latinx) could be of any racial background.

Source: U.S. Department of Housing and Urban Development (HUD), Continuum of Care (CoC) Homeless Populations and Subpopulations Reports (2019); U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B01001(A-I) For the data table behind this figure, please refer to the Data Packet Workbook, Table HOMELS-03.

Many of those experiencing homelessness are dealing with severe issues - including mental illness, substance abuse and domestic violence - that are potentially life threatening and require additional assistance. In Santa Clara County, homeless individuals are commonly challenged by severe mental illness, with 2,659 reporting this condition (see Figure 12). Of those, some 87.6% are unsheltered, further adding to the challenge of handling the issue.

Note on Homelessness Data

Notably all the data on homelessness provided above is for the entire county. This data comes from the Department of Housing and Urban Development’s (HUD) Point in Time count, which is the most comprehensive publicly available data source on people experiencing homelessness. HUD only provides this data at the county-level and not for specific jurisdictions. However, Housing Element law requires local jurisdictions to estimate or count of the daily average number of people lacking shelter. Therefore, staff will need to supplement the data in this document with additional local data on the number of people experiencing homelessness. If staff do not have estimates of people experiencing homelessness in their jurisdiction readily available, HCD recommends contacting local service providers such as continuum-of-care providers, local homeless shelter and service providers, food

programs, operators of transitional housing programs, local drug and alcohol program service providers, and county mental health and social service departments.²⁴

Figure 44: Characteristics for the Population Experiencing Homelessness, Santa Clara County

Universe: Population experiencing homelessness

Notes: This data is based on Point-in-Time (PIT) information provided to HUD by CoCs in the application for CoC Homeless Assistance Programs. The PIT Count provides a count of sheltered and unsheltered homeless persons on a single night during the last ten days in January. Each Bay Area county is its own CoC, and so the data for this table is provided at the county-level. Per HCD's requirements, jurisdictions will need to supplement this county-level data with local estimates of people experiencing homelessness. These challenges/characteristics are counted separately and are not mutually exclusive, as an individual may report more than one challenge/characteristic. These counts should not be summed.

Source: U.S. Department of Housing and Urban Development (HUD), Continuum of Care (CoC) Homeless Populations and Subpopulations Reports (2019)

For the data table behind this figure, please refer to the Data Packet Workbook, Table HOMELS-04.

In Unincorporated Santa Clara County, the student population experiencing homelessness totaled 299 during the 2019-20 school year and increased by 27.2% since the 2016-17 school year. By comparison, Santa Clara County has seen a 3.5% increase in the population of students experiencing homelessness since the 2016-17 school year, and the Bay Area population of students experiencing homelessness decreased by 8.5%. During the 2019-2020 school year, there were still some 13,718 students experiencing homelessness throughout the region, adding undue burdens on learning and thriving, with the potential for longer term negative effects.

The number of students in Unincorporated Santa Clara County experiencing homelessness in 2019 represents 13.0% of the Santa Clara County total and 2.2% of the Bay Area total.

²⁴ For more information, see HCD's Building Blocks webpage for People Experiencing Homelessness: <https://www.hcd.ca.gov/community-development/building-blocks/housing-needs/people-experiencing-homelessness.shtml>

Table 7: Students in Local Public Schools Experiencing Homelessness

AcademicYear	Unincorporated Santa Clara	Santa Clara County	Bay Area
2016-17	235	2219	14990
2017-18	320	2189	15142
2018-19	327	2405	15427
2019-20	299	2297	13718

Universe: Total number of unduplicated primary and short-term enrollments within the academic year (July 1 to June 30), public schools

Notes: The California Department of Education considers students to be homeless if they are unsheltered, living in temporary shelters for people experiencing homelessness, living in hotels/motels, or temporarily doubled up and sharing the housing of other persons due to the loss of housing or economic hardship. The data used for this table was obtained at the school site level, matched to a file containing school locations, geocoded and assigned to jurisdiction, and finally summarized by geography.

Source: California Department of Education, California Longitudinal Pupil Achievement Data System (CALPADS), Cumulative Enrollment Data (Academic Years 2016-2017, 2017-2018, 2018-2019, 2019-2020)

This table is included in the Data Packet Workbook as Table HOMEELS-05.

6.6 Farmworkers

Across the state, housing for farmworkers has been recognized as an important and unique concern. Farmworkers generally receive wages that are considerably lower than other jobs and may have temporary housing needs. Finding decent and affordable housing can be challenging, particularly in the current housing market.

In Unincorporated Santa Clara County, the migrant worker student population totaled 126 during the 2019-20 school year and has decreased by 40.6% since the 2016-17 school year. The trend for the region for the past few years has been a decline of 2.4% in the number of migrant worker students since the 2016-17 school year. The change at the county level is a 49.7% decrease in the number of migrant worker students since the 2016-17 school year.

Table 8: Migrant Worker Student Population

AcademicYear	Unincorporated Santa Clara	Santa Clara County	Bay Area
2016-17	175	978	4630
2017-18	171	732	4607
2018-19	126	645	4075
2019-20	104	492	3976

Universe: Total number of unduplicated primary and short-term enrollments within the academic year (July 1 to June 30), public schools

Notes: The data used for this table was obtained at the school site level, matched to a file containing school locations, geocoded and assigned to jurisdiction, and finally summarized by geography.

Source: California Department of Education, California Longitudinal Pupil Achievement Data System (CALPADS), Cumulative Enrollment Data (Academic Years 2016-2017, 2017-2018, 2018-2019, 2019-2020)

This table is included in the Data Packet Workbook as Table FARM-01.

According to the U.S. Department of Agriculture Census of Farmworkers, the number of permanent farm workers in Santa Clara County has increased since 2002, totaling 2,418 in 2017, while the number of seasonal farm workers has decreased, totaling 1,757 in 2017 (see Figure 45).

Figure 45: Farm Operations and Farm Labor by County, Santa Clara County

Universe: Hired farm workers (including direct hires and agricultural service workers who are often hired through labor contractors)

Notes: Farm workers are considered seasonal if they work on a farm less than 150 days in a year, while farm workers who work on a farm more than 150 days are considered to be permanent workers for that farm.

Source: U.S. Department of Agriculture, Census of Farmworkers (2002, 2007, 2012, 2017), Table 7: Hired Farm Labor For the data table behind this figure, please refer to the Data Packet Workbook, Table FARM-02.

6.7 Non-English Speakers

California has long been an immigration gateway to the United States, which means that many languages are spoken throughout the Bay Area. Since learning a new language is universally challenging, it is not uncommon for residents who have immigrated to the United States to have limited English proficiency. This limit can lead to additional disparities if there is a disruption in housing, such as an eviction, because residents might not be aware of their rights or they might be wary to engage due to immigration status concerns. In Unincorporated Santa Clara County, 5.0% of residents 5 years and older identify as speaking English not well or not at all, which is below the proportion for Santa Clara County. Throughout the region the proportion of residents 5 years and older with limited English proficiency is 8%.

Figure 46: Population with Limited English Proficiency

Universe: Population 5 years and over

Source: U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B16005

For the data table behind this figure, please refer to the Data Packet Workbook, Table AFFH-03.

Appendix D: Race and Homelessness in Santa Clara County

RACE AND HOMELESSNESS IN SANTA CLARA COUNTY, CALIFORNIA

JANUARY 2020

This project is a
collaboration between

DESTINATION: HOME

&

SPARC

with generous support from

ACKNOWLEDGEMENTS

This report is part of a year-long initiative on racial equity and homelessness in Santa Clara County, California. The initiative is a partnership between Destination: Home, a public-private partnership dedicated to ending homelessness in Santa Clara County, and SPARC (Supporting Partnerships for Anti-Racist Communities), a national initiative examining structural racism and homelessness. SPARC is a project of Boston-based C4 Innovations.

This report was authored by the SPARC Team: Jeff Olivet, Regina Cannon, Caty Wilkey, and Nastacia' Moore and made possible through the financial support and thought leadership of Cisco, as part of its larger efforts to address homelessness in Santa Clara County.

INTRODUCTION

This report is about helping our community improve and expand services for homeless men, women and children who are disproportionately people of color. Homelessness is an extreme manifestation of poverty. Along the continuum of safety-net services, our supportive housing system is at the end of the line. This report is about making sure that supportive housing services do not exacerbate or perpetuate the racial and social disparities in our community.

This report is also a lens through which we begin to perceive our circumstances more clearly. In a March 2018 report, SPARC (Supporting Partnerships for Anti-Racist Communities), wrote: “People of color are dramatically more likely than White people to experience homelessness in the United States. This is no accident; it is the result of centuries of structural racism that have excluded historically oppressed people—particularly Black and Native Americans—from equal access to housing, community supports, and opportunities for economic mobility.” To an extent, homelessness is the result of policy choices we’ve made.

We asked SPARC to help bring a racial equity lens to the valiant and amazing work that so many social workers, property managers, volunteers, doctors, nurses, and public servants are performing each day. From this effort, two things have become apparent. One, homelessness in Santa Clara County is characterized by many of the same racial and ethnic disparities seen in communities across the country. And two, we are only beginning to scratch the surface when it comes to understanding and addressing the underlying causes that are pushing individuals and families – especially people of color – into homelessness.

We hope this report serves as a jumping off point for the challenging, yet vital, work to eliminate these disparities in our community. By acknowledging the negative consequences of some of our policies, choices, and attitudes, and by embracing the core values and strategies outlined in this report, we can begin to undo the negative and detrimental impacts of decades of systemic racism for our most vulnerable neighbors.

EXECUTIVE SUMMARY

People of color are dramatically more likely than their white counterparts to become homeless in the United States. Recent national research has shown that such racial disproportionality is not limited to any particular geographical area or region of the country, but instead that patterns of racial disproportionality play out in community after community across the country.¹ Further, this is not simply an issue of poverty: people of color experience homelessness at rates significantly higher than the proportion of those living in poverty.² Indeed, the legacy of historical and contemporary structural racism is at the root of who becomes homeless.

Against this backdrop, Destination: Home partnered with the national SPARC Initiative (Supporting Partnerships for Anti-Racist Communities) to examine the link between racial inequity and homelessness in Santa Clara County.

Launched in February 2019, the initiative involves:

- Establishment of a Racial Equity Advisory Group to guide the process
- Assessment of the current state of race and homelessness in Santa Clara County through quantitative and qualitative approaches, including Homeless Management Information System (HMIS) and Annual Homelessness Assessment Report (AHAR) data; listening sessions with people of color experiencing homelessness; and stakeholder interviews
- Work with Destination: Home's Lived Experience Advisory Board to center racial equity
- Racial equity training for homeless service providers and city/county government staff
- Action planning to implement racial equity strategies within the Community Plan to End Homelessness

This report presents an assessment of the intersection of race and homelessness in Santa Clara County and offers recommendations for next steps. Three major themes emerged:

1. Disproportionately high rates of homelessness among specific racial and ethnic groups
2. Racial/ethnic variation in experiences of homelessness
3. Structural barriers, including lack of affordable housing and economic opportunity

Specific findings in each of these three areas create a preliminary understanding of the state of race and homelessness in the county.

Disproportionality

Overall, Santa Clara County is generally similar to other communities across the U.S., with high rates of homelessness among people of color:

- Black/African Americans are disproportionately represented in the homeless population (16.9%) compared to their numbers in the general population (2.5%). This ratio is significantly higher than other communities in which SPARC has conducted research.
- Similarly, American Indian/Native Alaskans experience homelessness in Santa Clara County at a ratio of 7:1 compared to their general population numbers (7.4% of homeless population compared to <1% of general population).
- Unique to Santa Clara County, people who identify as Hispanic/Latinx comprise 43.7% of the homeless (HMIS) population, compared to 27% of the general population; 65% of families presenting to the Coordinated Entry System are Hispanic/Latinx.

¹ Olivet, J., Dones, M., Richard, M., Wilkey, C., Yampolskaya, S., Beit-Arie, M. and Joseph, L. (2018). *Supporting Partnerships for Anti-Racist Communities: Phase One Findings*. Center for Social Innovation.

² Carter, G. (2011). From Exclusion to Destitution: Race, Affordable Housing, and Homelessness. *Cityscape: A Journal of Policy Development and Research* • Volume 13, Number 1

- Non-Hispanic people and those who identify as Asian/Asian American are both significantly underrepresented in the homeless population.

Racial/ethnic variation in experiences of homelessness

Our analysis found racial and ethnic disparities for some (but not all) HMIS data sets related to a person's homelessness experiences.

- Prior homeless experiences are generally proportionate by race and ethnicity to the HMIS population.
- Race is a statistically significant predictor of exiting into homelessness for American Indian/Alaska Native, who were 35% more likely to exit into homelessness.
- When assessed for vulnerability and housing need, a higher percentage of Non-Hispanic/Latinx families (45.7%) are assessed as needing Permanent Supportive Housing than Hispanic/Latinx families (39%).

Structural barriers

Stakeholders across the community cited systemic and structural inequities as a significant driver of housing insecurity and poverty in people of color.

- While housing affordability is an issue that affects people of all racial and ethnic background, people of color may be most severely impacted.
- The persistent wealth gap and lack of economic opportunity put communities of color at risk of homelessness.
- Disproportionately high rates of homelessness among people of color in the county mirror disproportionality in other safety net systems.

In addition to these major themes, we identified three underlying values to ground Destination: Home's racial equity work going forward. These include:

1. Integrating people of color with lived experience of homelessness in all program, policy, and funding decisions
2. Aligning racial equity work in the homelessness sector with other racial equity initiatives in Santa Clara County
3. Using a racial equity lens and data-driven decision making in the homelessness system and across other systems.

Based on the findings of this assessment, Destination: Home is poised to shift its work from analysis to planning and implementation of racial equity-based strategies in Santa Clara County's homelessness response system. An implementation strategy, as outlined in the recommendations of this report, should address inflow, crisis response and outflow. Through this work, Santa Clara County has the potential to address structural racism as a root cause of homelessness, and, in doing so, create a roadmap for other communities across the country.

APPROACH

In 2016, C4 Innovations launched the SPARC Initiative (Supporting Partnerships for Anti-Racist Communities), a multi-city effort to examine the connections between structural racism and homelessness across the United States. The project documented disproportionately high rates of homelessness among African Americans and Native Americans, with risk of homelessness especially high among families and youth of color.³ As SPARC communities have continued to examine their data and to shift from understanding the problem to developing equity-based strategies to reduce homelessness among people of color, various key components of racial equity implementation have emerged. These include: upstream prevention, cross-sector collaboration, organizational training and capacity building, targeted programming for specific at-risk groups, and long-term commitment to affordable housing and economic opportunities for communities of color.

To understand any potential racial disproportionality among people experiencing homelessness in Santa Clara County, California, Destination: Home partnered with the national SPARC Initiative. Initiated in February 2019, the collaborative effort includes three phases of work:

1. Assessment
2. Planning
3. Implementation

Throughout these phases, SPARC and Destination: Home (DH) are also focused on community engagement and buy-in, a recognition that tackling the important work of racial equity cannot be done in isolation, but instead in partnership and solidarity with partners across the community, including:

- People of color with lived experience of homelessness
- Homeless service providers
- City and County officials
- Advocates for specific racial and ethnic groups
- Faith community leaders
- Private sector/business leaders
- Philanthropy

³ Olivet, J., Dones, M., Richard, M., Wilkey, C., Yampolskaya, S., Beit-Arie, M. and Joseph, L. (2018). *Supporting Partnerships for Anti-Racist Communities: Phase One Findings*. Center for Social Innovation.

As a first stage of the work, SPARC led an assessment process that occurred between February and May 2019, and included a number of key activities:

1. Strategy meeting with the Racial Equity Advisory Group (REAG), which was formed to guide this project
2. Meetings with the Destination: Home Lived Experience Advisory Board (LEAB), DH Governing Board and other community partners
3. Listening sessions with people of color experiencing homelessness at four homeless service programs:
 - HomeFirst Boccardo Reception Center homeless shelter
 - Recovery Café
 - CityTeam Men’s Program
 - Life Moves Family Shelter
4. Stakeholder interviews with individuals representing a wide range of perspectives:

NAME	TITLE	ORGANIZATION
Ariel Blume	Executive Director	County of Santa Clara Office of Cultural Competence
Analilia P. Garcia	Racial & Health Equity Program Manager	County of Santa Clara Department of Public Health
Jermaine Hardy	Adult Services Division, Deputy Chief Probation Officer	County of Santa Clara Probation Department
Maritza Maldonado	Executive Director	Amigos de Guadalupe Center for Justice and Empowerment
Debra Porchia-Usher	Chief Deputy Director	County of Santa Clara Social Services Agency
Elena Rivera	Board Member	Lived Experience Advisory Board
Amber Siddle-Manas	Health Planning Specialist	County of Santa Clara Department of Public Health
Shari Slate	Vice President, Chief Inclusion & Collaboration Officer	Cisco
Toni Tullys	Behavioral Health Director	County of Santa Clara Department of Health and Human Services

5. Analysis of Homeless Management Information System (HMIS) data

Our team used Santa Clara County Homeless Management Information System (HMIS) and Coordinated Entry System (CES) data to analyze the current state of racial inequities among the population experiencing homelessness and to better understand the role of race in determining outcomes related to housing and homelessness. This analysis was guided by five research questions:

1. What is the current state of disproportionality by race and ethnic group?
2. What is the experience of Black, Indigenous, and People of Color (BIPOC) in previous homeless experience compared to Whites?
3. What are the differences by race in VI-SPDAT (Vulnerability Index-Service Prioritization Decision Assistance Tool) score and prioritization for permanent housing and other housing resources?
4. What role does race play in recidivism into homelessness?
5. What role does household type (i.e., family, single adults, youth) play in understanding inequities in the homeless service system?

Quantitative data from years 2014-2019⁴ were collected from the San Jose/Santa Clara City and County CoC HMIS system and Coordinated Entry System (specifically, VI-SPDAT). Data were cleaned, deduplicated, and analyzed using SPSS. The HMIS sample includes cases from 24,746 individuals and the VI-SPDAT sample included cases from 14,818 individuals and families. We conducted univariate and bivariate analyses to understand the demographics of this client sample and to describe the general nature of over- and under-representation by racial groups in certain circumstances. To better understand outcomes experienced by clients, we analyzed information pertaining to the most recent homeless event and entry in the HMIS system. Where possible, data were analyzed by household type to specifically understand the differences in experience and outcomes of clients presenting to the system as individuals (both single adults and youth) versus clients presenting as part of a household or family. Data on household type was extrapolated using the categories "Household without Children," "Households with only Children," and "Households with Children". The category "young adults" were defined as those under 25 and who were included in the category of "Household without Children"; however, it is unknown whether or not these individuals presented to the system alone. For CES data, to determine whether people of color differed from White clients on prioritization score, a one-way ANOVA was conducted. Pearson chi-square analysis was used to determine whether there is a statistically significant association between race and being classified into a specific vulnerability group (i.e., no housing intervention is needed, Rapid Re-Housing, or Permanent Supportive Housing/Housing First).

From these sources of information, the SPARC team documented the current state of race and homelessness in Santa Clara County. This report presents the findings from this assessment and offers potential directions forward as Destination: Home works to center racial equity in its county-wide homelessness response.

⁴ Some data dating back to 1998 were included in the dataset and analysis; however, the bulk of cases were from 2014 onward.

RACE AND HOMELESSNESS IN SANTA CLARA COUNTY

Through the assessment process, three themes of findings emerged:

- Disproportionately high rates of homelessness among specific racial and ethnic groups
- Racial/ethnic variation in experiences of homelessness
- Structural barriers, including lack of affordable housing and economic opportunity

In addition to these major themes, the assessment unearthed the need for three important cross-cutting values:

1. Integrate people of color with lived experience of homelessness in all program, policy, and funding decisions
2. Align racial equity work in the homelessness sector with other racial equity initiatives in Santa Clara County
3. Use a racial equity lens and data-driven decision making in the homelessness system and across other systems.

THEME 1:

Disproportionately high rates of homelessness among specific racial/ethnic groups

Figure 1 below presents a racial and ethnic breakdown of American Community Survey (ACS) data for Santa Clara County CoC (general population), poverty data, HMIS sample, and Annual Homelessness Assessment Report (AHAR) data. As Figure 1 shows, a simple comparison of the general population in the CoC with the population presenting to the homeless service system (HMIS) shows that Black/African Americans are dramatically overrepresented in the homeless service system (16.9% compared to 2.5% of the local population). This is almost seven (6.76) times greater than would be expected based on this group’s presence in the general population. AHAR data also reflects this inequity with 18.3% identifying as Black/African American.

Also shown in Figure 1 is the overrepresentation of the American Indian/Alaskan Native population, which accounts for 7.4% of the HMIS population and 7.1% of the AHAR data, despite making up only 0.5% of the general population. This is almost 15 (14.8) times greater than would be expected based on their presence in the general population.

By comparison, Asians are underrepresented in HMIS and AHAR, accounting for 5.0% and 2.8%, respectively, of populations experiencing homelessness, while accounting for more than a third (34.4%) of the general population. This representation is almost seven (6.89) times less than would be expected based on their presence in the general population.

IMPORTANT FINDINGS

- Black/African Americans are dramatically overrepresented in the homeless populations (16.9% compared to 2.5% of the general population).
- Hispanic/Latinx individuals represent 43.7% of the HMIS sample compared to 27% of the general population.
- High rates of Hispanic/Latinx family homelessness—65% of families experiencing homelessness.
- American Indian/Alaskan Natives are 0.5% of the general population but 7.4% of the homeless population.
- Poverty alone does not explain high rates of homelessness among people of color.

FIGURE 1. General Population, Poverty, HMIS, and AHAR Data by Race

FIGURE 2. General Population, Poverty, HMIS, and AHAR Data by Ethnicity

Whites are also overrepresented in the HMIS data, accounting for 63.2% of HMIS population compared to 46.9% in the general population. However, the magnitude of overrepresentation is not as great for Whites as it is for Black/AA and AI/AN race groups. Specifically, representation of Whites in HMIS is 1.34 times greater than what you would expect based on their presence in the general population. It’s also worth noting that AHAR data was generally proportional to the general population for Whites.

Also notable is the inequity for Hispanic/Latinx individuals, who represent 43.7% of the HMIS sample compared to 27% of the general population (see Figure 2). This overrepresentation is reflected in the AHAR data as well (40.1%).

Table 1 also shows that poverty cannot explain for racial and ethnic disproportionality in the homeless system (especially given that the percentage of Black/African Americans in poverty in this community is not dramatically disproportionate to the general population).

TABLE 1. Race & Ethnicity Breakdown Across General Population, Poverty, CES, HMIS, and PIT

	CO C ACS* (2016)	POVERTY (2011-2015)**	HMIS (2016)***	AHAR (2016)****
White	46.9%	45.0%	63.2%	44.0%
Black/AA	2.5%	5.0%	16.9%	18.3%
AI/AN	0.5%	1.0%	7.4%	7.1%
Asian (& NHOPI for poverty data)	34.4%	27.0%	5.0%	2.8%
NHOPI	0.4%	--	2.3%	1.5%
Two or More Races	15.4%	23.0%	5.1%	26.3%
Hispanic/Latinx	27.0%	44.0%	43.7%	40.1%

* “CoC ACS” refers to the general population numbers (according to the U.S. Census Bureau’s American Community Survey) for the geographical areas covered by the Santa Clara County Continuum of Care.

** The poverty numbers in this table are also drawn from ACS data

*** Homeless Management Information System (HMIS) data include all individuals served by the homeless services system in the county over the course of a year.

**** Annual Homelessness Assessment Report (AHAR) data represents the total unsheltered and sheltered residents in Santa Clara County, as measured by a standardized count methodology required by the federal government to document the scope of homelessness on an annual basis.

The data for Hispanic/Latinx families with children show similar disparities, representing 43% of the overall homeless population but 65% of families experiencing homelessness. Stakeholders described numerous issues facing this group, including language barriers, lack of culturally competent services, and gentrification that drives Hispanic/Latinx people out of their neighborhoods.

THEME 2:

Racial/ethnic variation in experiences of homelessness

HMIS data elements related to prior location before entering homelessness (i.e. before entering the HMIS system) were analyzed. These distributions were more or less proportionate to the HMIS population; in other words, each racial group presented to the homeless service system from situations/locations at generally the same rate as one would expect. These data are presented in Table 2.

TABLE 2. Prior Location by Race

	WHITE	BLACK/AA	AI/AN	ASIAN	NHOPI	TWO OR MORE RACES
Homeless	61.6%	17.1%	7.2%	4.6%	2.5%	7.1%
Permanent Housing/ Renting w/ subsidy	59.4%	22.9%	4.1%	4.3%	1.4%	7.8%
Permanent Housing/ Renting without subsidy	63.1%	16.6%	4.5%	5.5%	2.4%	7.9%
Institutionalized care	69.5%	14.6%	3.4%	5.0%	1.5%	5.9%
Correctional facility	64.4%	16.9%	5.4%	3.7%	2.4%	7.2%
Doubled up	63.8%	15.9%	6.2%	5.4%	2.2%	6.6%
Transitional care	62.3%	18.2%	5.5%	4.6%	2.6%	6.8%

We also analyzed the duration and frequency of homeless experiences. Specifically, *number of months homeless in the past three years* and *number of times homeless in the past three years* were analyzed by race and ethnicity. Prior homeless experiences are generally proportionate by race and ethnicity to the HMIS population.

TABLE 3. Number of Times Homeless & Number of Months Homeless in Past Three Years by Race and H/L ethnicity*

	WHITE	BLACK/AA	AI/AN	ASIAN	NHOPI	TWO OR MORE RACES	HISPANIC OR LATINX (of any race)
NUMBER OF TIMES HOMELESS							
1	62.7%	16.8%	6.5%	5.1%	2.7%	6.2%	42.6%
2	60.5%	17.5%	7.3%	5.0%	3.3%	6.4%	43.5%
3	59.3%	19.8%	7.3%	4.2%	1.9%	7.5%	43.0%
4 or more	60.6%	18.0%	7.2%	4.4%	2.2%	7.6%	41.9%
NUMBER OF MONTHS HOMELESS							
1 (this is the first month)	60.4%	17.0%	6.0%	7.1%	3.0%	6.5%	43.9%
Average for 2-12 months, Mean	5.97 mo.	6.10 mo.	6.58 mo.	5.90 mo.	5.83 mo.	6.18 mo.	5.93 mo.
More than 12 months	61.4%	17.7%	7.8%	4.0%	2.3%	6.9%	40.9%

*It is important to note the limitations of the HMIS data system as a data source to answer this research question. Specifically, the response options for these two questions are categorical and therefore force respondents to fit into a predetermined answer, which limits a true understanding of prior homeless experiences.

We examined whether or not race was a **predictor of exiting from programs back into homelessness**. Race is a statistically significant predictor of exiting into homelessness for American Indian/Alaska Native, who were 35% more likely to exit into homelessness. Gender is a significant predictor, with females 29% less likely to exit into homelessness than males.

We also examined whether or not race and other factors were predictors of exiting back into homelessness for different age/household groups. For young adults (single, aged 18-24), black youth were 2 times more likely ($p < .05$, OR 2.05) to exit back into homelessness than were their white counterparts. This was also true for Native Hawaiian and Other Pacific Islander youth, who were almost four times as likely ($p < .05$, OR 3.98). Also statistically significant for this age group was gender, where females were over two times less likely to exit into homelessness than males ($p < .01$, OR 0.46). For older single adults, the American Indian/Alaska Native population were 35% more likely to exit into homelessness ($p < .05$, OR 1.35) than whites, and Hispanic/Latinx individuals were 13% more likely than their non-Hispanic/Latinx counterparts (of any race) ($p < .05$, OR 1.13). Females in this age group were 37% less likely to exit into homelessness ($p < .05$, OR 0.73). Neither race nor gender were statistically significant in the models for family members.

An examination of VI-SPDAT data helps to understand how individuals and families are prioritized for housing services and whether there are any inequities by race or ethnicity. We examined mean final scores and service referral categorization. Figure 2 shows the variability in mean scores across race and ethnicity. One-way ANOVA found that for both individual and family samples, there was a statistically significant difference between race groups and ethnicity groups of final scores. However, scores were somewhat higher for non-White race groups in the family dataset, with AI/AN and individuals identifying as Two or More Races receiving higher prioritization scores.

IMPORTANT FINDINGS

- Prior homeless experiences are generally proportionate by race and ethnicity to the HMIS population.
- Race is a statistically significant predictor of exiting into homelessness for American Indian/Alaska Native, who were 35% more likely to exit into homelessness.
- Black youth were two times more likely to exit back into homelessness than their white counterparts.
- When assessed for vulnerability and housing need, a higher percentage of Non-Hispanic/Latinx families (45.7%) are assessed as needing Permanent Supportive Housing than Hispanic/Latinx families (39%).
- Gender is a significant predictor of returns to homelessness, with females 29% less likely than males to exit programs back into homelessness.

FIGURE 2. VI-SPDAT Mean Score by Race & H/L Ethnicity

The rate at which non-White individuals and families receive prioritization for Permanent Housing/Housing First following a VI-SPDAT assessment is important in understanding the inequities in the Coordinated Entry System. Figures 3 and 4 shows the distribution of prioritization category by race (BIPOC represents all combined non-White race groups) and ethnicity, respectively. Pearson chi-square analyses showed a statistically significant ($p < .05$) association between race and prioritization category for families only, and a statistically significant ($p < .05$) association between ethnicity and prioritization for both single adults and families.

FIGURE 3. Race and Prioritization Category

FIGURE 4. Ethnicity & Prioritization Category

THEME 3:

Structural barriers, including lack of affordable housing and economic opportunity

Lack of access to affordable housing was a major area of focus in the listening sessions. The following direct quotes from people of color with lived experience of homelessness who participated in one of four listening sessions illustrate barriers to housing and perceptions on the part of participants about the need for more housing. One participant connected housing stability with sobriety: “They need to give us more access to [set aside] units. People get frustrated and relapse and forget about the process.” Another said simply, “Everything is so expensive, you can’t do it alone.”

The stakeholder interviews echoed this theme of lack of affordable housing. The county’s public health department has conducted multiple community needs assessments in recent years, each of which, without exception, identified housing as one of the most pressing public health issues facing the county. Interviewees described people living in their cars, doubled up with friends and family, and renting couches, floor-space, or subdivided living rooms for a few hours a day. They talked about people who have lived in Santa Clara County their whole lives, but who have been pushed out by skyrocketing rents, only to drive more than an hour each way to get to work in the county or to keep their children in their schools of origin. As one stakeholder succinctly put it: “You can’t have luxury housing for everyone and not have sufficient housing for low-income individuals.”

While housing affordability is an issue that affects people of all racial and ethnic backgrounds, several of key stakeholders interviewed stated that people of color were more severely impacted. One reason for this may be the persistent **racial wealth gap** and **lack of economic opportunity** for people of color. Next to housing, economic inequality was the most regularly reported challenge named in the interviews. This focus is captured well in the words of one respondent: “We have to think about systemic structures that have not

IMPORTANT FINDINGS

- While housing affordability is an issue that affects people of all racial and ethnic background, people of color may be most severely impacted.
- The persistent wealth gap and lack of economic opportunity put communities of color at risk of homelessness.
- Disproportionately high rates of homelessness among people of color in the county mirror disproportionality in other Safety Net systems.

worked for people of color...Disinvestment from communities of color places them at a great disadvantage. When we talk about community violence and trauma, we come back to economic opportunity.”

While other issues were raised, including language barriers, criminalization of homelessness, behavioral health, education, and multi-generational homelessness, stakeholders continually brought the conversation back to housing and economic inequality as major drivers of homelessness among people of color in Santa Clara County.

The disproportionately high rates of homelessness among people of color in the county mirror **disproportionality in other Safety Net systems**. For example, one interviewee described similarities between disproportionately high rates of foster care and criminal justice involvement among Black and Hispanic/Latinx people—with both groups disproportionately represented compared to their general population numbers. Involvement in the child welfare and criminal justice system increases the risk of homelessness and may be creating pipelines into homelessness for people of color. An important area of future work will be to further analyze data across multiple systems to determine not just disproportionality, but also to understand patterns of cross-system involvement (e.g., someone who is ex-

periencing homelessness and has also been involved in foster care, criminal justice, or eviction systems). To date, such involvement is generally documented by self-report rather than data-sharing and analysis across multiple data sets.

Underlying Values to Guide Destination: Home's Racial Equity Work

In addition to these three major findings themes, three cross-cutting values emerged from the assessment process:

1. Integrate people of color with lived experience of homelessness in all program, policy, and funding decisions

The stakeholder interviews revealed a widespread belief that people with lived experience of homelessness should be included more in shaping policy and system responses to homelessness. "The mistake we make in housing," stated one stakeholder, "is that we're talking to people who are housed...I would challenge us to bring authentic voices to the table." Another noted that their agency is "designing programs that target specific communities. We are working on listening to those communities so that we have an impact...partnerships with individuals most impacted by the issue."

2. Align racial equity work in the homelessness sector with other racial equity initiatives in Santa Clara County

Multiple stakeholders identified the importance of aligning efforts to promote racial equity. One stated that "a coordinated, cross-departmental aligned effort" is essential to address racial inequities in homelessness, and that agencies working on racial equity need to "align and advance toward a common goal with something we can measure and truly evaluate our efforts." In the course of the interviews, several existing racial equity initiatives were underway in the county. These include:

1. GARE: The Government Alliance for Racial Equity, in which multiple city/county departments and staff are participating
2. A race equity committee in the justice system that has been meeting regularly for a number of years
3. A subcommittee on the school to prison pipeline
4. A committee within the Department of Health and Human Services focused on culture and diversity

As some stakeholders indicated, it will be important to develop a full catalog of such existing efforts, then determine the most effective strategies for aligning and coordinating these efforts.

3. Use a racial equity lens and data-driven decision making in the homelessness system and across other systems.

Across all of this work, interviewees, listening session participants, and members of the Racial Equity Advisory Group and DH's Lived Experience Advisory Board noted the importance of bringing racial equity into all of the organization's work to end homelessness. This suggests that a racial equity initiative should not exist in parallel to other efforts, but should instead permeate all of Destination: Home's work. The upcoming planning process to develop a five-year community plan to address homelessness offers an important opportunity to embed racial equity across multiple activities.

NEXT STEPS: STRATEGIES TO ADDRESS RACIAL EQUITY

The quantitative and qualitative findings outlined in this report confirms that significant racial disproportionality exists within the homeless population in Santa Clara County, especially for Black/African American, Native American people and Hispanic/Latinx individuals and families, pointing perhaps to similar levels of disproportionality in upstream safety net and criminal justice systems. It also paints a picture of the acute challenges and structural barriers, including lack of affordable housing and economic opportunity, present for the most vulnerable people in the community.

With these initial findings complete, Destination: Home and its partners now enter the second phase of work to leverage the data and information provided to identify and adopt a set of structural change objectives. To do so, Destination: Home will propose formally adding racial equity action items to the new Community Plan to End Homelessness. The plan, as well as the community engagement sessions leading up to it, will provide a formal adoption and planning process with a range of county stakeholders, creating the accountability to meaningfully move the racial equity work forward for this community.

Based on this report, we propose incorporating the following action items into the current Community Plan to End Homelessness:

- 1. Center and raise the voice of people of color who have experienced homelessness in the policy and program decisions of the supportive housing system.**

Our community has a vibrant Lived Experience Advisory Board (LEAB), and two of its members serve on the Racial Equity Advisory Group that guides this initiative. The next step is to ensure that people with lived experience of homelessness are included in a decision-making capacity around major policy and program design in concerted and consistent manner.

- 2. Partner with the safety net system to better understand and address the systemic causes of poverty and inequity.**

Based on some of the key findings in Theme 3 of this report, it is critical to fully understand which policies or practices constrain our safety-net systems and the extent to which our policies and institutions exacerbate the crisis of homelessness.

A comprehensive data study should be conducted that focuses on all systems that serve individuals with housing instability. The study should help policy makers understand housing instability of individuals and families as they interact with safety-net programs and the justice system, the housing outcomes associated with those programs and institutions, and all the resources available to individuals and families to end or prevent their homelessness.

The findings of this work should help to inform safety net system improvements that could eventually lead to an overall decrease of inflow into homelessness and a reduction in the current disproportionality found in the homeless population.

- 3. Adopt new housing and land use policies that help reverse longstanding housing disparities that have negatively impacted people of color.**

As noted earlier, numerous racial equity efforts are already underway in Santa Clara County, including work on affordable housing dispersion policies, anti-displacement, tenant protections, and local resident preferences. Significant involvement by staff across multiple city and county departments provides a strong foundation for bringing Destination: Home's equity work into alignment with other efforts. One approach would be to develop shared outcomes and strategies for measurement. Additionally, committees and task forces working on displacement, criminal justice, public health, and cultural competence across sectors offer the possibility of joint work, cross-sector pilot projects, and representation of a homelessness focus at those tables.

CONCLUSION

This report is a first step in documenting the intersection of race and homelessness in Santa Clara County. The findings begin to shed light on racial disparities as they related to housing and homelessness. Santa Clara County is not alone, as the SPARC Initiative has documented similar patterns in communities across the United States. This report provides a baseline assessment from which Destination: Home and its partners can develop and implement racial equity strategies to prevent and end homelessness. It takes courage to look candidly at the lasting impact of racism in this country, and to connect its legacy with the current epidemic of homelessness. Destination: Home has begun that courageous work.

Executive Summary

ES-05 Executive Summary – 24 CFR 91.200(c), 91.220(b)

1. Introduction

The Urban County of Santa Clara (Urban County) includes the unincorporated communities within Santa Clara County (County), in addition to seven small jurisdictions: the cities of Campbell, Los Altos, Los Altos Hills, Los Gatos, Monte Sereno, Morgan Hill, and Saratoga. The County and the Entitlement Jurisdictions within the County receive federal funding from the U.S. Department of Housing and Urban Development (HUD). These funds include the Community Development Block Grant Program (CDBG), and the HOME Investment Partnerships Program (HOME). The HOME Consortia consists of the cities of Cupertino, Gilroy, Palo Alto, and the Urban County.

The purpose of CDBG funding is to help jurisdictions address their community development needs. The County anticipates approximately \$7,500,000 in future CDBG grant funding from 2020-2025. CDBG eligible categories are:

- Public Services programs and projects include social services that provide direct support to individuals and households in need of assistance;
- Economic Development programs and projects focused on assisting private businesses and or business organizations with small business loans, commercial façade improvements, and or other business improvements;
- Public Facilities and Improvements;
- Code Enforcement;
- Housing Rehabilitation;
- Acquisition, Disposition, Clearance, and Rehabilitation; and
- Planning and Capacity Building.

HOME funding is dedicated to housing-related programs and activities that preserve or create affordable housing. Tenant-based rental assistance, homebuyer assistance, rehabilitation, and new construction are all eligible uses of HOME funds. The County anticipates approximately \$4,750,000 in new HOME grant funding from 2020-2025.

HUD requires that Entitlement Jurisdictions complete a Consolidated Plan (ConPlan) every five years. The ConPlan is a comprehensive planning document of the local government and application for funding under any of the Community Planning and Development formula grant programs. The ConPlan includes an analysis of the jurisdiction's market, affordable housing, and community development conditions. Entitlement Jurisdictions must also submit an Annual Action Plan (Annual Plan) to report the distribution of federal entitlement program funding over the ConPlan's five-year period. The Annual Plan identifies how funding allocations help meet the goals covered in the ConPlan. Jurisdictions must also report on accomplishments and progress toward ConPlan goals in the annual Consolidated Annual Performance Evaluation Report (CAPER). Additionally, complete an Analysis of Impediments to Fair Housing (AI).

HUD requests every Entitlement Jurisdiction to, through a robust public participation process and data analysis process, create and prioritize community needs and establish 5-year goals. These following priority needs and goals reflect the quantitative and qualitative data analysis:

PRIORITY NEEDS

Priority needs for the County related to housing, public services, and community and public facilities were synthesized into the following overarching needs:

1. Affordable housing;
2. Vital services and homelessness prevention;
3. Assistance for families and individuals in transition from homelessness;
4. Increase in family income;
5. Assistance for special needs populations (including seniors and people with disabilities, who are homeless, live with HIV/AIDS, and have survived domestic violence);
6. Employment and workforce opportunities;
7. Improvements to aging community facilities and public infrastructure; and
8. Fair housing.

FIVE YEAR GOALS

Five Year Goals presented in this plan are:

1. Increase affordable and supportive housing;
2. Promote fair housing Countywide;
3. Maintain and expand activities designed to prevent and reduce homelessness;
4. Preserve existing affordable housing;
5. Provide essential services for special needs populations;
6. Maintain, improve and expand community facilities and spaces; and
7. Strengthen employment and workforce opportunities.

PLANNING PROCESS

The planning process created for the ConPlan included the formation of a steering committee, which was led by the County of Santa Clara's Office of Supportive Housing's (OSH). This planning process included consultation with area service organizations, collection and analysis of data, and facilitation of community meetings. The planning process also included extensive community engagement, which is summarized in the Community Engagement Summary.

The process also requires strategic five-year planning which includes projections and funding allocation of future housing programs, homeless programs, and community and public projects. Finally, the process included ConPlan preparation, public review of the ConPlan, public hearings, ConPlan adoption, and HUD submission.

The planning process also required strategic five-year planning, which included projections and funding allocation of future housing programs, homeless programs, and community and public projects. The Strategic Plan identifies the County's priority needs and goals that help guide the distribution of future federal funding. Finally, the process included ConPlan preparation, public review of the ConPlan, public hearings, ConPlan adoption, and HUD submission.

The ConPlan is drafted utilizing a HUD developed template. The HUD template includes: Introduction, Process, Needs Assessment, Market Analysis, Strategic Plan and first year Action Plan. The majority of data utilized throughout the Needs Assessment and Market Analysis is provided by HUD. The data included in the ConPlan is Comprehensive Housing Affordability Strategy data "CHAS." CHAS data provides community profile data such as population and income as well as pertinent housing data. CHAS provides the City with housing data that shows the number of homes with extreme problems and needs, particularly for low income households. CHAS data informs local governments and provides guidance on how to allocate future HUD funds. This ConPlan includes updated 2012-2016 CHAS data and utilizes 2000, 2010 and American Community Survey (ACS) 2013-2017 five-year estimates. The Strategic Plan identifies the County's priority needs and goals that help guide the distribution of future federal funding.

2. Summary of the objectives and outcomes identified in the Plan Needs Assessment Overview

The County's population of over 1.8 million is the sixth largest in California, and it the largest among the nine Bay Area counties. Ninety-five percent of the County's population live in the incorporated cities. San José is the largest City in the County with a population of just over one million, and it is the administrative site of the County government. A significant portion of the County's 1,315 square miles is unincorporated ranch and farmland. The County has direct jurisdiction over urban unincorporated areas.

An analysis of the Needs Assessment section of the ConPlan shows a variety of important facts or trends. The highest priority for future County investment is the addition of affordable housing which includes new development or redevelopment of County lands and properties. This conclusion is verified by reviewing several data facts including: 1) 35.5% of households in the County are paying more than 30% of their income toward housing costs, and 2) 16.2% of households are paying more than 50% of their income toward housing costs.

Certain ethnicities in the County experience disproportionately greater housing problems and cost burden. Hispanic and Black households have the greatest needs according to tables included at NA-15, 20 and 25. Forty one percent (41%) of Hispanic households experience severe housing problems, which is more than double the rate for the County as a whole (20.25%).

Also, renters are a population that have disproportionately greater affordable housing need. As shown in NA-20 tables, 33.3% of renter households experience severe housing problems, compared to 15.3% of owners and 23.1% of all households in the jurisdiction. Among cost burdened households paying 30% to 50% of their income toward housing costs, there are no racial or ethnic groups that are disproportionately affected. However, among severely cost

burdened households paying more than 50% of their income toward housing costs, 28.1% of Hispanic households experience a disproportionate need compared to 17.3% of the jurisdiction as a whole.

A second priority for the County is to enhance programs that will reduce and prevent homelessness in the County. The 2019 Point in Time count (PIT Count) homeless survey identified 9,706 homeless residents of which 81.6%(7,922) were unsheltered and living in a place not fit for human habitation. It should also be noted that the total homeless population in the County increased by 31% since 2017, with the unsheltered population increasing by 45%.

A third priority for the County is to enhance programs and assistance for special needs populations and households. Forty-eight percent (48%) of low- and moderate-income elderly owner-occupied households and 72.3% of low- and moderate-income elderly renter occupied households in the County are cost burdened and spending more than 30% of their household income on housing. Persons with a disability represent 8.2% of the County's population. Eleven percent (11%) of households within the County are large-family households comprised of five or more persons.

In combination with data analysis, the ConPlan's public participation process helped further verify the County's priority needs. Residents and stakeholders who participated identified the following as high priority:

- Public Facilities: increase park space, increase homeless facilities, improve youth and senior centers, improve transit routes to home and work, and accessible (for seniors and disabled individuals) community facilities throughout the County.
- Housing: increase affordable housing opportunities through new construction and rehabilitation of existing homes.
- Public Services to assist and reduce homelessness: homelessness prevention programs, food assistance, rental assistance, and appropriate mental health counseling.
- Public Services for Special Needs Population: special needs populations mentioned most by participants included: mental and physical health care services for seniors and low-income families.
- Economic Development: workforce development and training, access to jobs and job placement assistance.

3. Evaluation of past performance

The County is responsible for ensuring compliance with all rules and regulations associated with the CDBG and HOME programs. The County recognizes that the evaluation of past performance is critical to ensuring that its subrecipients are implementing activities effectively and those activities align with the Urban County's overall strategies and goals.

The Urban County focuses its CDBG and HOME funding efforts on a combination of housing and community development activities and public services directed towards assisting low- and moderate-income (LMI) individuals and families. The bulk of federal assistance is committed to

housing development. The Fiscal Year 2019 CAPER captures expenditures, accomplishments, and the progress made on the strategies and goals outlined in the approved 2015-2020 ConPlan, for the CDBG and HOME programs approved by the County Board of Supervisors on May 5, 2015.

The Fiscal Year 2019 CAPER outlines achievements in affordable housing, homeless services, and community development programs and covers the time period starting July 1, 2018 to June 30, 2019 (FY 2019). It includes activities funded in previous fiscal years with accomplishments reported during FY 2019. As with most new construction projects, the outcomes are not reported until the completion of the project. During FY 2019, the County allocated over \$3.2 million in new grant funds, program income, and unspent funds from previous fiscal years to affordable housing, capital improvement and public service projects. Of the total amount allocated, over \$3.7 million was spent. The following accomplishments were achieved during FY 2019:

- Two (2) new housing development projects, Morgan Hill Family Apartments and Edwina Benner Plaza, completed their construction. These developments collectively added 106 affordable housing units with 28 units set aside as permanent supportive housing and two (2) manager units.
- Two (2) existing multi-family affordable housing developments, Redwoods and Wheeler Manor, consisting of 132 units of affordable housing and 2 unrestricted manager units, were renovated. In addition, these projects included the construction of seven (7) new units.
- Fifty-seven (57) low-income, owner-occupied, homeowners were assisted with maintenance and emergency repairs.
- Seven (7) low-income, owner-occupied, homeowners were assisted through the County's Housing Rehabilitation Grant Program.
- Through 17 Professional Service Agreements with community-based organizations, 1,856 low-income individuals were assisted with shelter, housing, legal services, counseling, and other supportive services.
- 134 low-income individuals were assisted with fair housing issues.

4. Summary of citizen participation process and consultation process

The County launched a comprehensive outreach strategy to enhance and broaden citizen participation in the preparation of the ConPlan. The County informed the public at regional community forums that it was in the process of creating the 2020-2025 ConPlan. The County encouraged public participation in the process by promoting participation in and completion of the Regional Needs Survey and attendance at four (4) regional community forums held on November 4, 7, 12, and 20, 2019.

Over 4,000 entities, organizations, agencies, and persons were directly engaged via outreach efforts and asked to share materials with their beneficiaries, partners, and contacts. These stakeholders were also encouraged to promote attendance at the public forums and to solicit responses to the Regional Needs Survey. Stakeholder engagement included phone calls, targeted emails, newsletter announcements, social media posts, and personalized requests from County

staff. The County provided public notice of the Regional Needs Survey and regional and community forums through various outreach methods, including newspaper postings, the internet, social media, and hard copy fliers distributed to various organizations and at local community centers and libraries.

The four regional and community forums were held in November 2019 in Morgan Hill, Palo Alto, Cupertino, and San José. A total of one thousand nine hundred and fifty (1,950) individuals completed the Regional Community Needs Survey. The County held a community meeting using zoom (video conferencing) on May 22, 2020 and provided an overview of the draft ConPlan, Action Plan, and preliminary funding recommendations. Attendees were invited to ask questions and provide comments.

5. Summary of public comments

The County and cities helped create an engagement program that included four types of activities: stakeholder interviews, community meetings, pop-up events, and a community needs survey. The engagement program began in its planning processes in October 2019 and was completed at the end of December 2019.

Four Regional Public Forums were held throughout County in the cities of Morgan Hill, Palo Alto, Cupertino, and San José. The Regional Meetings were held on/at the following dates and locations:

- November 4, 2019 @ Morgan Hill City Hall, California;
- November 7, 2019 @ Palo Alto City Hall, California;
- November 12, 2019 @ Cupertino Community Hall, California; and
- November 20, 2019 @ Roosevelt Community Center, San José, California.

A brief overview of the planning process for the 2020-2025 ConPlan was provided and a listening session with live polling was conducted.

Throughout the County twenty-one stakeholder interviews were held, typically at their places of business. The following provides a collective summary of the overarching themes associated with the eight questions mentioned on page two of the Community Engagement Summary. The following entities were interviewed:

- Asian Americans for Community Involvement
- Bridge Housing
- Charities Housing
- Community Services Agency
- CommUniverCity San Jose
- Destination Home
- Downtown Streets Team
- Eden Housing
- Health Trust Involvement
- Heart of the Valley
- Housing Choice
- LifeMoves
- Loaves and Fishes
- Rebuilding Silicon Valley
- Santa Clara Family Health Plan
- Silicon Valley FACES

- City of Gilroy Recreation Department
- Grid Alternatives
- WeHOPE
- Silicon Valley Leadership Group
- Vista Center

6. Summary of comments or views not accepted and the reasons for not accepting them

All comments were accepted during the engagement process.

The Process

PR-05 Lead & Responsible Agencies - 91.200(b)

1. Describe agency/entity responsible for preparing the Consolidated Plan and those responsible for administration of each grant program and funding source

The following are the agencies/entities responsible for preparing the ConPlan and those responsible for administration of each grant program and funding source.

Table 1 – Responsible Agencies

Agency Role	Name	Department/Agency
Lead Agency	Santa Clara County	
CDBG Administrator	Santa Clara County	Office of Supportive Housing
HOME Administrator	Santa Clara County	Office of Supportive Housing
Urban County CDBG & HOME Participants	Cities of Campbell, Los Altos, Los Altos Hills, Los Gatos, Monte Sereno, Morgan Hill, and Saratoga	Office of Supportive Housing

Narrative

Santa Clara County, also known as an “Urban County,” includes the unincorporated communities within the County, in addition to seven small jurisdictions: the cities of Campbell, Los Altos, Los Altos Hills, Los Gatos, Monte Sereno, Morgan Hill, and Saratoga. The Urban County in partnership with the entitlement jurisdictions within the County that receive HUD funding are the lead agencies for this joint planning process. Entitlement Jurisdictions receive entitlement funding (i.e., non-competitive, formula funds) from HUD, including but not limited to CDBG and HOME funding. In 2015 the County entered into a HOME Consortia with the cities of Cupertino, Gilroy, and Palo Alto. By federal law, each jurisdiction is required to submit to HUD a five-year ConPlan and Annual Action Plans that identifies priorities and strategies for the use of federal funds.

The ConPlan is a guide for how the Urban County will use its federal funds to meet the housing and community development needs of its populations.

PR-10 Consultation - 91.100, 91.200(b), 91.215(I)

1. Introduction

The County, through OSH, created a steering committee for the planning process of the Regional 2020-2025 Consolidated Plan. Seven Entitlement Jurisdictions and the County met regularly to discuss priorities, missing gaps in the data collection, and outreach program as well as education over the preparation of their ConPlan. The County Entitlement Jurisdictions includes the Cities of Cupertino, Gilroy, Mountain View, Palo Alto, Sunnyvale, San José, and Santa Clara.

Public participation plays a central role in the development of the ConPlan. The participating Entitlement Jurisdictions within the County launched an in-depth, collaborative regional effort to consult with community stakeholders, elected offices, city and County departments, and beneficiaries of entitlement programs to inform and develop the priorities and strategies contained within this five-year plan.

Provide a concise summary of the jurisdiction’s activities to enhance coordination between public and assisted housing providers and private and governmental health, mental health and service agencies (91.215(I)).

The County and seven participating jurisdictions facilitated a comprehensive outreach process to enhance coordination and discuss new approaches to working with public and assisted housing providers, legal advocates, private and governmental health agencies, mental health service providers, and other stakeholders that utilize funding for eligible activities, projects, and programs.

A Regional Community Needs Survey was conducted to solicit input from residents and workers in the region. Respondents were informed that participating jurisdictions were updating their respective ConPlans for federal funds that primarily serve LMI residents and areas. The Regional Needs Survey polled respondents about the level of need in their respective neighborhoods for various types of improvements that could be addressed by entitlement funds. A total of 1,950 survey responses were obtained in 2019.

REGIONAL PUBLIC FORUMS

The Entitlement Jurisdictions held four regional public forums to identify housing and community development needs and priorities for the next five years. The public forums were conducted as part of a collaborative regional approach to help the participating jurisdictions make data-driven, place-based investment decisions for federal funds. The Regional Public Forums were held:

- November 4, 2019 @ Morgan Hill City Hall, California
- November 7, 2019 @ Palo Alto City Hall, California
- November 12, 2019 @ Cupertino Community Hall, California
- November 20, 2019 @ Roosevelt Community Center, San José, California

A brief overview of the planning process for the AI report and the 2020-2025 Consolidated Plan was provided and a listening session with live polling was conducted.

COMMUNITY FORUMS IN LOCAL JURISDICTIONS

In addition to the Regional Public Forums, several Entitlement Jurisdictions conducted public outreach independent of the regional collaborative. The cities of San José and Mountain View, and the Urban County each held multiple community forums to solicit public input on local issues, needs and priorities. The community forums were held in tandem with the regional public forums to expand the outreach process and gather specific place-based input.

Printed flyers providing forum dates and information about the ConPlan were provided to the different jurisdictions to distribute throughout their communities. These flyers and survey were available in English, Chinese, Spanish, and Vietnamese languages.

Numerous entities, organizations, agencies, and persons were directly engaged via outreach efforts and asked to share materials with their beneficiaries, partners, and contacts. These stakeholders were also encouraged to promote attendance at the Regional Public Forums and to solicit responses to the Regional Community Needs Survey. Stakeholder engagement included phone calls, targeted emails, one-on-one interviews, and social media posts. Each participating jurisdiction also promoted the forums and survey link on their respective websites. Outreach materials and the survey links (including materials in English, Chinese, Spanish, and Vietnamese) were emailed to over numerous entities, organizations, and persons.

Describe coordination with the Continuum of Care and efforts to address the needs of homeless persons (particularly chronically homeless individuals and families, families with children, veterans, and unaccompanied youth) and persons at risk of homelessness

The Continuum of Care (CoC) is a multi-sector group of stakeholders dedicated to ending and preventing homelessness in the County. The CoC's primary responsibilities are to coordinate large-scale implementation of efforts to prevent and end homelessness in the County. The CoC is governed by the Santa Clara CoC Board (CoC Board), which stands as the driving force committed to supporting and promoting a systems change approach to preventing and ending homelessness in the County. The CoC works closely with the Lived Experience Advisory Board (LEAB). The LEAB is a leadership development body consisting of members with current or past experiences of homelessness. Members participating on the Board learn about and evaluate the system of care and to make recommendations for improvement.

The CoC Board also serve on the Destination: Home Leadership Board. Destination: Home is a public-private partnership committed to collective impact strategies to end chronic homelessness, serves as the backbone organization to the CoC and is responsible for implementing by-laws and protocols that govern the operations of the CoC. Destination: Home is also responsible for ensuring that the CoC meets the requirements outlined under the Homeless Emergency Assistance and Rapid Transition to Housing Act of 2009.

In 2015, the community came together to create a roadmap for ending homelessness in Santa Clara County. This plan— which was centered around a collective impact response and the proven Housing First model—set an ambitious goal to create 6,000 new housing opportunities and identified innovative strategies and programs for reducing homelessness. Progress since the 2014 Plan include:

- Helped 8,884 households resolve their homelessness, representing 14,132 people.
- Launched a new homelessness prevention system that now serves 1,000 households annually.
- Led a community-wide campaign that has successfully housed more than 1,600 veterans and engaged nearly 800 private landlords in the effort.
- Voters approved a \$950 million General Obligation Bond to develop affordable and supportive housing and raised another \$100 million in private contributions to support the implementation of the Community Plan.
- Doubled the number of supportive housing units in Santa Clara County.
- Doubled temporary housing and emergency shelter capacity.

In 2019 the CoC Steering Committee launched an effort to develop the 2020-2025 Community Plan to End Homelessness in the County (the Community Plan), which outlines a roadmap for community-wide efforts to end homelessness in the County. The Plan identifies strategies to address the needs of homeless persons in the County, including chronically homeless individuals and families, families with children, veterans, and unaccompanied youth as well as address the needs of persons at risk of homelessness. The draft Community Plan is organized around three main strategies:

- Address the root causes homelessness through system and policy change;
- Expand homelessness prevention and housing programs to meet the need; and
- Improve quality of life for unsheltered individuals and create healthy neighborhoods for all.

Concurrently, in early 2019, Destination: Home launched a new effort to examine how issues of race and homelessness intersect. Findings of the report conclude that, much like the U.S., the County has a high rate of homelessness among people of color (16.9% are African Americans and 43.7% are Hispanic). The report goes on to say, “While housing affordability is an issue that affects people of all racial and ethnic background, people of color may be most severely impacted. Disproportionately high rates of homelessness among people of color in the County mirror disproportionality in other systems.” (Source: Destination: HOME & SPARC; Race and Homelessness in Santa Clara County, California 2020 report).

Describe consultation with the Continuum(s) of Care that serves the jurisdiction's area in determining how to allocate ESG funds, develop performance standards and evaluate outcomes, and develop funding, policies and procedures for the administration of HMIS.

The County does not receive ESG funds through HUD. The County currently receives ESG funds through the State of California. The County provides a funding reference sheet that compares the differences between ESG and CoC with regards to homeless eligibility, income restrictions, assessment, rental assistance, housing standards, lease terms, eligible costs, eligible service costs, case management, service limitations and standards, policies and procedures. This funding reference sheet may be found here:

<https://www.sccgov.org/sites/osh/ContinuumofCare/CoC%20Toolkit/Documents/Resources/RH%20Funding%20Reference%20Chart%20-%20ESG%20vs%20CoC%20-%20May%202020.pdf>

2. Describe Agencies, groups, organizations and others who participated in the process and describe the jurisdictions consultations with housing, social service agencies and other entities

In August 2019, the Entitlement Jurisdictions contracted with Michael Baker International (MBI) to develop the 2020-2025 ConPlan. In partnership with the participating jurisdictions, MBI launched an in-depth, collaborative effort to consult with elected officials, city and County departments, community stakeholders, and beneficiaries of entitlement programs to inform and develop the priorities and strategies contained within the five-year plan.

Table 2 provides a list of all agencies, groups and organizations that attended the regional and community forums. Several of the agencies, groups and organizations identified in the table attended multiple forums. A comprehensive list of all stakeholders and local service providers contacted to provide input into the planning process at the ConPlan regional and community forums is included in the Community Engagement Summary.

Table 2 – Agencies, Groups, Organizations that Participated in the Process

1	Agency/Group/Organization	City of Gilroy, Recreation Department
	Agency/Group/Organization Type	Local Government
	What section of the Plan was addressed by Consultation?	Needs Assessment Strategic Plan
	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	Agency was consulted and provided e-mailed feedback.
2	Agency/Group/Organization	CommUniverCity San Jose
	Agency/Group/Organization Type	Education Services
	What section of the Plan was addressed by Consultation?	Needs Assessment Strategic Plan

Table 2 – Agencies, Groups, Organizations that Participated in the Process

	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	Agency attended stakeholder consultation conference call meeting on 11/25/19. Agency attended Regional Forum meeting in San José on 11/20/19.
3	Agency/Group/Organization	Community Services Agency
	Agency/Group/Organization Type	Senior Services, Community/Family Services and Organizations, Cultural Organizations
	What section of the Plan was addressed by Consultation?	Needs Assessment Strategic Plan
	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	Agency attended stakeholder consultation conference call meeting on 11/15/19.
4	Agency/Group/Organization	Destination: Home
	Agency/Group/Organization Type	Homeless Services (strategic initiatives)
	What section of the Plan was addressed by Consultation?	Needs Assessment Strategic Plan
	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	Agency attended Stakeholder consultation on via telephone meeting on 11/11/19.
5	Agency/Group/Organization	The Health Trust
	Agency/Group/Organization Type	Services-Health, HIV/AIDS Services, Disabled Services
	What section of the Plan was addressed by Consultation?	Needs Assessment and Strategic Plan
	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	Agency attended stakeholder consultation meeting on 11/21/19.
6	Agency/Group/Organization	Heart of the Valley
	Agency/Group/Organization Type	Senior Services
	What section of the Plan was addressed by Consultation?	Needs Assessment Strategic Plan

Table 2 – Agencies, Groups, Organizations that Participated in the Process

	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	Agency was consulted through interview questions covering a range of issues such as: community needs, areas in need of neighborhood revitalization, housing needs, low-mod income vulnerabilities, CDBG and HOME funding priorities. Agency provided e-mailed feedback.
7	Agency/Group/Organization	Rebuilding Together (Silicon Valley)
	Agency/Group/Organization Type	Housing
	What section of the Plan was addressed by Consultation?	Needs Assessment Strategic Plan
	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	Agency attended stakeholder consultation conference call meeting on 11/21/19.
8	Agency/Group/Organization	Asian Americans for Community Involvement
	Agency/Group/Organization Type	Community Organization
	What section of the Plan was addressed by Consultation?	Needs Assessment Strategic Plan
	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	Stakeholder meeting in San José, CA on 11/13/19 from 9-10 AM.
9	Agency/Group/Organization	Bridge Housing
	Agency/Group/Organization Type	Housing Services
	What section of the Plan was addressed by Consultation?	Needs Assessment Strategic Plan
	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	Participated in a Stakeholder interview.
10	Agency/Group/Organization	Charities Housing Development Corporation
	Agency/Group/Organization Type	Housing Services
	What section of the Plan was addressed by Consultation?	Needs Assessment Strategic Plan
	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	Participated in Stakeholder interview in San José, CA on 11/14/19 from 1-2 PM.

Table 2 – Agencies, Groups, Organizations that Participated in the Process

11	Agency/Group/Organization	Downtown Streets Team
	Agency/Group/Organization Type	Community Organization
	What section of the Plan was addressed by Consultation?	Needs Assessment Strategic Plan
	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	Participated in Stakeholder interview on 11/26/19 at 10 AM.
12	Agency/Group/Organization	Eden Housing
	Agency/Group/Organization Type	Housing Services
	What section of the Plan was addressed by Consultation?	Needs Assessment Strategic Plan
	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	Participated in a conference call on 11/13/19 from 1-2 PM.
13	Agency/Group/Organization	Grid Alternatives
	Agency/Group/Organization Type	Environmental Sustainability Organization
	What section of the Plan was addressed by Consultation?	Needs Assessment Strategic Plan
	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	Participated in a Stakeholder interview on 11/13/19.
14	Agency/Group/Organization	WeHOPE
	Agency/Group/Organization Type	Community Organization
	What section of the Plan was addressed by Consultation?	Needs Assessment Strategic Plan
	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	Participated in conference call on 11/21/19 from 2-3 PM.
15	Agency/Group/Organization	Vista Center for the Blind and Visually Impaired
	Agency/Group/Organization Type	Disabled
	What section of the Plan was addressed by Consultation?	Needs Assessment Strategic Plan

Table 2 – Agencies, Groups, Organizations that Participated in the Process

	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	Agency attended stakeholder consultation via audio meeting on 12/9/19.
16	Agency/Group/Organization	Housing Choices Coalition for Persons with Developmental Disabilities
	Agency/Group/Organization Type	Housing Services
	What section of the Plan was addressed by Consultation?	Needs Assessment Strategic Plan
	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	Participated in Stakeholder Interview on 11/11/19.
17	Agency/Group/Organization	LifeMoves
	Agency/Group/Organization Type	Community Organization
	What section of the Plan was addressed by Consultation?	Needs Assessment Strategic Plan
	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	Participated in Stakeholder Interview on 11/13/19 from 11-12 PM.
18	Agency/Group/Organization	Loaves and Fishes
	Agency/Group/Organization Type	Community Organization
	What section of the Plan was addressed by Consultation?	Needs Assessment Strategic Plan
	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	Participated in Stakeholder Interview on 11/12/19.
19	Agency/Group/Organization	Santa Clara Family Health Plan
	Agency/Group/Organization Type	Health Services
	What section of the Plan was addressed by Consultation?	Needs Assessment Strategic Plan
	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	Participated in conference call on 11/12/19 from 4-5 PM.
20	Agency/Group/Organization	Silicon Valley FACES

Table 2 – Agencies, Groups, Organizations that Participated in the Process

21	Agency/Group/Organization Type	Community Organization
	What section of the Plan was addressed by Consultation?	Needs Assessment Strategic Plan
	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	Participated in Stakeholder Interview on 11/13/19 from 11-12 PM.
	Agency/Group/Organization	Silicon Valley Leadership Group
21	Agency/Group/Organization Type	Community Organization
	What section of the Plan was addressed by Consultation?	Needs Assessment
	How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?	Participated in a Stakeholder Interview on 1/3/20 from 12-1 PM.

Identify any Agency Types not consulted and provide rationale for not consulting

All agency types consulted.

Other local/regional/state/federal planning efforts considered when preparing the Plan

Please see the following table.

Table 3 – Other Local / Regional / Federal Planning Efforts

Name of Plan	Lead Organization	How do the goals of your Strategic Plan overlap with the goals of each plan?
CoC	Regional CoC Council	The CoC works to alleviate the impact of homelessness in the community through the cooperation and collaboration of social service providers. This effort aligns with the Strategic Plan's goal to support activities to prevent and end homelessness.
Santa Clara County General Plan and the Housing Element (2015-2023)	County Planning Department	The Housing Element serves as a policy guide to help the County meet its existing and future housing needs. This effort aligns with the Strategic Plan's goal to assist in the creation and preservation of affordable housing.

Table 3 – Other Local / Regional / Federal Planning Efforts

Name of Plan	Lead Organization	How do the goals of your Strategic Plan overlap with the goals of each plan?
2013-2017 Comprehensive HIV Prevention & Care Plan	Santa Clara County HIV Planning Council for Prevention and Care	This plan provides a roadmap for the Santa Clara County HIV Planning Council for Prevention and Care to provide a comprehensive and compassionate system of HIV prevention and care services for the County. This effort aligns with the Strategic Plan's goal to support activities that provide community services to low income and special needs households.
Affordable Housing Funding Landscape & Local Best Practices	Cities Association of Santa Clara County and Housing Trust Silicon Valley	This report provides a comparison of the different funding strategies available for affordable housing in the County, and the best practices for funding new affordable housing. This effort aligns with the Strategic Plan's goal to assist in the creation and preservation of affordable housing.
Regional Housing Need Plan for SF Bay Area (2014-2022)	Association of Bay Area Governments	This plan analyzes the total regional housing need for the County and all of the Bay Area. This effort aligns with the Strategic Plan's goal to assist in the creation and preservation of affordable housing.
Community Plan to End Homelessness in Santa Clara (2015-2020) draft 2020-2025 Community Plan to End Homelessness	Destination: Home	The Community Plan to End Homelessness in the County is a five-year plan to guide governmental actors, nonprofits, and other community members as they make decisions about funding, programs, priorities, and needs. This effort aligns with the Strategic Plan's goal to support activities to prevent and end homelessness.
Santa Clara County Seniors' Agenda: A Quality of Life Assessment	Santa Clara County	This plan order explores current and future needs of baby boomers and seniors in the County. The purpose of this effort is to focus the County efforts on seniors themselves, through the education of individual and the community, through action planning to create a safety net for the vulnerable or under serviced. This effort aligns with the Strategic Plan's goal to support activities that provide community services to low income and special needs households.
Valley Transportation Authority Strategic Plan 2017-2022	Valley Transportation Authority (VTA)	This plan is the result of analysis of the agency's strengths, weaknesses, opportunities, and threats, as well as the input, observations and ideas from VTA employees, customers, and members of VTA's advisory committees and Board of Directors. It addresses the VTA's current situation and provides a framework to build an exciting mission. This plan aligns with the Strategic Plan's goal to maintain, improve, and expand community facilities and spaces.

Table 3 – Other Local / Regional / Federal Planning Efforts

Name of Plan	Lead Organization	How do the goals of your Strategic Plan overlap with the goals of each plan?
Bay Area Rapid Transit System Rebuilding Plan	Bay Area Rapid Transit (BART)	This plan outlines a system rebuild in order to begin a transition to a modern commuter rail system. BART is rebuilding and reinvesting throughout the entire area. This plan aligns with the Strategic Plan’s goal to maintain, improve, and expand community facilities.
Santa Clara Valley Agricultural Plan	Open Space Authority: Santa Clara Valley	This plan is an innovative approach to agricultural preservation that will reduce future conversion of local farmland and the associated increase in greenhouse gas emissions while growing a vibrant local food economy that contributes to quality of life. This aligns with the Strategic Plan’s goal to maintain, improve, and expand community spaces.
UC Berkeley Urban Displacement Project (UDP)	UC Berkeley	This project is a research and action initiative of UC Berkeley. UDP conducts community-centered, data-driven, applied research toward more equitable and inclusive futures for cities. Their research aims to understand and describe the nature of gentrification and displacement, and also to generate knowledge on how policy interventions and investment can respond and support more equitable development. This aligns with the Strategic Plan’s goal to preserve existing affordable housing and to maintain and expand activities designed to prevent and reduce homelessness.

Describe cooperation and coordination with other public entities, including the State and any adjacent units of general local government, in the implementation of the Consolidated Plan (91.215(I))

As mentioned previously, the County Entitlement Jurisdictions are collaborating on preparation of their 2020-2025 ConPlan. The outreach and the regional needs assessment for these jurisdictions was a coordinated effort. The County worked with the CoC to obtain as much updated data as possible to help prepare priority needs and goals of the ConPlan.

The CDBG Coordinators Group, made up of Entitlement Jurisdictions throughout the County, host quarterly meetings. These meetings are often attended by HUD representatives and their purpose is to share information, best practices, new developments, and federal policy and appropriations updates among the local grantee staff, as well as to offer a convenient forum for HUD to provide ad-hoc technical assistance related to federal grant management. Meeting agendas cover such topics as projects receiving multi-jurisdictional funding, performance levels and costs for contracted public services, proposed annual funding plans, HUD program administration requirements, and other topics of mutual concern. These quarterly meetings

provide the County opportunity to consult with other jurisdictions on its proposed use of federal funds for the upcoming Program Year. The CDBG Coordinators Group meetings are often followed by a Regional Housing Working Group meeting, which is open to staff of entitlement and non-Entitlement Jurisdictions. The Working Group provides a forum for jurisdictions to develop coordinated responses to regional housing challenges.

Narrative

Please see discussion above.

PR-15 Citizen Participation - 91.401, 91.105, 91.200(c)

1. Summary of citizen participation process/Efforts made to broaden citizen participation

Summarize citizen participation process and how it impacted goal-setting

In addition to the consultation efforts mentioned in PR-10, the following is an overview of the additional activities conducted to enhance and broaden citizen participation. A comprehensive summary of the citizen participation process and how it impacted goal-setting is provided in the Community Engagement Summary. An informational flyer was prepared for the various regional meetings. The flyer was distributed by City and County websites, mail, email, and handouts at area events, community centers, and libraries. Announcements were posted on Facebook and Twitter accounts of the County and Entitlement Jurisdictions and other community partners. An informational flyer was prepared in four languages: English, Chinese, Spanish, and Vietnamese.

STAKEHOLDER INTERVIEWS

Throughout the County twenty-one stakeholder interviews were held, typically at their place of business. The following provides a collective summary of the overarching themes associated with the eight questions mentioned on page two of this Community Engagement Summary. The following entities were interviewed:

- Asian Americans for Community Involvement
- Bridge Housing
- Charities Housing Development Corporation
- Community Services Agency
- CommUniverCity San Jose
- Destination: Home
- Downtown Streets Team
- Eden Housing
- City of Gilroy Recreation Department
- Grid Alternatives
- WeHOPE
- The Health Trust
- Heart of the Valley
- Housing Choice Coalition for Persons with Developmental Disabilities
- LifeMoves
- Loaves and Fishes
- Rebuilding Together (Silicon Valley)
- Santa Clara Family Health Plan
- Silicon Valley FACES
- Silicon Valley Leadership Group
- Vista Center for the Blind and Visually Impaired

Stakeholders provided a plethora of feedback acknowledging, from an agency’s perspective, the priority needs in the County. Priority needs for the County related to housing, services, and public facilities. These were summarized into several overarching themes, which were:

1. Affordable Housing
2. Vital services and homeless prevention
3. Assist families and individuals in transition
4. Increase family income
5. Assist special needs populations
6. Emergency relief for vulnerable populations
7. Improve aging community facilities and public infrastructure
8. Fair housing

FOCUS GROUP MEETINGS

Focus Group meetings were conducted to gain additional information from a group perspective. The following summarizes the five-year priorities participants identified through these meetings:

- Address the lack of housing stock and housing diversity and options;
- increase alternatives for special needs persons, particularly for persons with disabilities;
- Improve transit and incentives to take transit;
- Improve health and safety, particularly mental health options for low-income families;
- Workforce development, particularly for young adults;
- Address lack of housing through strong outreach programs – local and regional; and,
- County-driven affordable housing projects.

REGIONAL COMMUNITY NEEDS SURVEY

The County initiated a Community Needs Survey on October 25, 2019 to December 26, 2019. The survey received 1,950 responses. The following summary provides a highlight of the regional survey. A detailed survey summary was prepared and included in the Community Engagement Summary.

POP-UP ENGAGEMENT ACTIVITIES

The engagement program included several pop-up events to inform residents of the planning process for the 2020-2025 Consolidated Plan and to invite them to attend scheduled public meetings. Four pop-up events were held at/on:

- Farmers Market, City of Santa Clara, California, October 19, 2019
- Farmers Market, City of Sunnyvale, California October 26, 2019
- Farmers Market, City of Palo Alto, California, November 3, 2019
- Community Center, City of Sunnyvale, California, November 21, 2019

ZOOM COMMUNITY MEETING

A community meeting was held via zoom (video conferencing) on May 22, 2020. Residents and community-based organizations were invited via social media postings and email messages. Social media and Residents were More than 30 people attended this community meeting.

This meeting covered the following subjects: introduction, community engagement and draft priority needs and five-year goals for the 2020-2025 ConPlan; preliminary funding recommendations for the 2020-2021 Action Plan; next steps in the ConPlan and Action Plan hearing process, including invitation to attend the June 2, 2020, hearing on the County Subjects covered included. Attendees were also invited to participate, and participated, in a Question and Answer and Comment period. A copy of the PowerPoint and questions, comments, and answers are included in the Community Engagement Summary.

PUBLIC HEARINGS

A public meeting was held on June 2, 2020. The ConPlan included a 30-day public review and comment period. A public notice was published in the San Jose Mercury News, in advance notifying the public of upcoming public hearings as well as the 30-day public comment period. The ConPlan was available electronically at <https://www.sccgov.org/sites/osh/Pages/home.aspx>. The electronic version was sent to global distribution lists throughout the County, and residents had the option of contacting the OSH to request a copy. A summary of all public comments is included in the final ConPlan, along with any County response(s). In addition, public comment received at public hearings or submitted in writing was included in the final ConPlan. Written comments could be submitted directly to:

Office of Supportive Housing
Housing and Community Development Division

8	Print Outreach Flyers	Print surveys were distributed at community centers, libraries, City Halls, senior centers, and other high-traffic community hubs.	Over 2,700 printed flyers were distributed across the County.	See PR-15	All comments were accepted.	

Needs Assessment

NA-05 Overview

Needs Assessment Overview

The County, located in the Silicon Valley, is an area known for its technological enterprise and part of the San Francisco Bay Area. This region has distinct socio-economic stratification, containing many of the wealthiest households in the nation. The region boasts a high national median household income at \$106,761. However, this region contains an expensive rental market (Median Rent: \$1,955) and is known to be one of the least affordable places to live. Over 35% of its residents are cost burdened, meaning households are currently spending over 30% or more of their income on housing costs.

These statistics point to a widening gap between the highest earners and the middle- and lower-income populations. The income gap between low income and middle- and upper-income households is wide, with 65% of households earning more \$75,000 per year while 35% of total households earn less than \$75,000. Of the 65% of households, 53% earn greater than \$100,000 per year. Many lower income residents struggle with high housing costs, which are driven by a tight and competitive housing market that responds to the demands of the highest earning households. Both for-sale and rental housing costs have been driven up. In order to maintain housing affordability and meet the needs of a diverse and growing population, the jurisdictions within the County must work to preserve and expand the supply of housing for all income levels. This will be critical to maintaining the integrity, wellbeing, and economic prosperity of the region.

The County's population of approximately 1.9 million is the sixth largest in California, and it is the largest of the nine Bay Area counties. Ninety-five percent (95%) of the population lives in the incorporated cities. San José is the largest city in the County. Its population is just over one million, and it is the administrative site for the County government. A significant portion of the County's 1,315 square miles is unincorporated ranch and farmland. The County has direct jurisdiction over urban unincorporated areas.

Methodology

This ConPlan addresses the needs of the Urban County, which includes the unincorporated areas within the County in addition to seven small jurisdictions of: Campbell, Los Altos, Los Altos Hills, Los Gatos, Monte Sereno, Morgan Hill, and Saratoga. Within this Needs Assessment and the following chapters, data specific to the County is often not available. In these instances, data for the County as a whole is referenced.

The majority of data utilized throughout the Needs Assessment and Market Analysis is provided by HUD for the purpose of preparing the ConPlan. HUD periodically receives "custom tabulations" of data from the U.S. Census Bureau that are largely not available through standard Census products. These data, known as the "CHAS" data (Comprehensive Housing Affordability Strategy), demonstrate the extent of housing problems and housing needs, particularly for low income

households. The CHAS data are used by local governments to plan how to spend HUD funds, and may also be used by HUD to distribute grant funds.

When CHAS data is not available or appropriate other data is utilized, including 2000 and 2010 U.S. Census data and American Community Survey (ACS) 2013-2017 five-year estimates. While ACS one-year estimates provide the most current data, this report utilizes five-year estimates as they reflect a larger sample size and are considered more reliable and precise.

To adequately address the County's community needs and support its thriving economy, the County has identified and assessed the areas that could benefit the most from federal investment through HUD. Federal funds provided under the CDBG and HOME entitlement programs are primarily concerned with activities that benefit LMI households whose incomes do not exceed 80% of the area median family income (AMI), as established by HUD, with adjustments for smaller or larger families.

HUD utilizes three income levels to define LMI households:

- Extremely low income: Households earning 30% or less than the AMI (subject to specified adjustments for areas with unusually high or low incomes)
- Very low income: Households earning 50% or less than the AMI (subject to specified adjustments for areas with unusually high or low incomes)
- Low and moderate income: Households earning 80% or less than the AMI (subject to adjustments for areas with unusually high or low incomes or housing costs)

NEEDS ASSESSMENT CHAPTER OVERVIEW

The following provides a brief summary of the results of the Needs Assessment, which will be discussed in more detail in each corresponding section of this chapter.

Within the County, over one-third of households (38.6% or 242,035 households) are LMI with incomes ranging from 0-80% AMI.

- 15.4% (96,655 households) at 0-30% AMI
- 11.5% (71,900 households) at 30-50% AMI
- 11.7% (73,480 households) at 50-80% AMI

NA-10 Housing Needs Assessment

- 35.8% of households in the County are paying more than 30% of their income toward housing costs.
- 16.4% of households are paying more than 50% of their income toward housing costs.

NA-15 Disproportionately Greater Need: Housing Problems

- 88.9% of Black/African American households and 87.8% of Hispanic households within the 0-30% AMI category experience housing problems, compared to 80.3% of the jurisdiction as a whole.

- 87.5% of Pacific Islander households and 80.8% of Hispanic households within the 30-50% AMI category experience housing problems, compared to 74.1% of the jurisdiction as a whole.

NA-20 Disproportionately Greater Need: Severe Housing Problems

- 77.7% of Hispanic households, as well as 75% of Black/African American households, in the 0-30% AMI category experience severe housing problems, compared to 67.6% of the jurisdiction as a whole.
- 58.3% of Pacific Islander households and 51.0% of Hispanic households in the 30-50% AMI category experience severe housing problems, compared to 45.9% of the jurisdiction as a whole.
- 30.1% of Hispanic households in the 50-80% AMI category experience severe housing problems compared to 24.3% of the jurisdiction as a whole.

NA-25 Disproportionately Greater Need: Housing Cost Burden

- Among cost burdened households paying more than 30% of their income on housing, Hispanic households (49.7%) and Black African/American households (49.6%) are disproportionately affected when compared to the average jurisdiction rate of 35.8%.
- Among severely cost burdened households paying more than 50% of their income toward housing costs, no single group is disproportionately affected when compared to the jurisdiction rate of 16.4%. However, Black/African American households are impacted the most at a rate of 25.7%.

NA-35 Public Housing

- The Santa Clara County Housing Authority assists approximately 17,000 households through the federal Section 8 Housing Choice Voucher program (Section 8).
- The Section 8 waiting list contains 3,486 households.

NA-40 Homeless Needs

- As of the 2019 Point in Time Homeless Survey, the County had 9,706 homeless persons, with 81.8% sheltered and 18.2% unsheltered.

NA-45 Non-Homeless Special Needs Assessment

- 48.5% of LMI elderly owner occupied households and 72.3% of LMI elderly renter occupied households in the County are cost burdened and paying more than 30% of their income toward housing costs.
- Persons with a disability represent 8.2% of the County's population.
- 11.3% of households within the County are large-family households comprised of five or more persons.

NA-50 Non-Housing Community Development Needs

Residents and stakeholders who participated in the community outreach for the ConPlan identified the following non-housing community development needs as high priorities for the following three categories:

- Public Facilities: increase park space, increase homeless facilities, improve youth and senior centers, improve transit routes to home and work, community facility accessibility throughout the County.
- Public Improvements: Increase affordable housing opportunities through the rehabilitation of existing single-family homes, and increase economic development

initiatives through workforce development and training, access to jobs, and job placement assistance.

- Public Services: Homelessness prevention, food assistance and nutrition programs for vulnerable populations, and mental and physical health care services for seniors and low-income families.

NA-10 Housing Needs Assessment - 24 CFR 91.405, 24 CFR 91.205 (a,b,c)

Summary of Housing Needs

This section provides an overview of the housing needs present in the County, including the degree and distribution of housing problems within multiple income brackets. Within the CHAS data, HUD identifies four housing problems:

1. Housing unit lacking complete kitchen facilities;
2. Housing unit lacking complete plumbing facilities;
3. Household being overcrowded; and,
4. Housing being cost burdened.

A household is considered to be overcrowded if there is more than one person per room and severely overcrowded if there are more than 1.5 people per room. A household is considered to be cost burdened if the household is spending more than 30% of its monthly income on housing costs (including utilities) and severely cost burdened if the household is spending more than 50% of its monthly income on housing costs (including utilities). Tables in this section and further sections refer to Area Median Income (AMI) and HUD Area Median Family Income (HAMFI).

Data Source: 2012-2016 CHAS **Describe the number and type of single person households in need of housing assistance.**

The Santa Clara County Housing Authority assists approximately 17,000 households countywide through the federal Section 8 Housing Choice Voucher program (Section 8). The Section 8 waiting list contains 3,486 households, and it is closed.

Within the County, there are approximately 9,706 homeless persons, with 81.8% who are sheltered and 18.2% who are unsheltered.

Estimate the number and type of families in need of housing assistance who are disabled or victims of domestic violence, dating violence, sexual assault and stalking.

There are 5,492 disabled persons supported by Section 8 and HCV Programs. According to the 2019 Point-in-Time count for the County, about 27% of homeless persons on a given night, or 2,620 individuals, were victims of some form of domestic violence.

What are the most common housing problems?

The most common housing problems found in the County are issues with households being cost burdened, severely cost burdened, and households that are experiencing overcrowding. The following shows these problems in detail:

1) Cost Burden

The most common housing problem within the County is cost burden.

- 26.1% of households (161,825) in the County are LMI and cost burdened.
- 17.1% of households (105,825) in the County are LMI renter households who are cost burdened.
- 9.0% of households (55,990) in the County are LMI owner households who are cost burdened.

2) Severe Cost Burden

The second most common housing problem within the County is severe cost burden.

- 15.2% of households (94,135) in the County are LMI and severely cost burdened.
- 9.6% of households (59,495) in the County are LMI renter households who are severely cost burdened.
- 5.6% of households (34,635) in the County are LMI owner households who are severely cost burdened.

3) Overcrowding

The third most common housing problem is overcrowding.

- 4.8% of all households (30,159) are LMI and overcrowded.

Are any populations/household types more affected than others by these problems?

Severe cost burden is felt more by renter households (22.4%) than owner households (11.8%). Non-severe cost burden is also experienced by a higher percentage of renter households (22.5%) than by owner households (17.1%).

The data for housing problems shows that 81.2% of renter households with a housing problem (114,500 households) are LMI while only 52.4% of owner households with a housing problem (58,640 households) are LMI.

For severe housing problems, 98.9% of renter households experiencing severe housing problems are LMI, and 83.4% of owner households with severe housing problems are LMI.

Renter households are about five times as likely to be overcrowded, with 10.5% of renter households experiencing overcrowding compared to only 2.1% of owner households. Additionally, 86.9% of overcrowded renter households are LMI compared to 71.5% of overcrowded owner households.

Describe the characteristics and needs of low-income individuals and families with children (especially extremely low-income) who are currently housed but are at imminent risk of either residing in shelters or becoming unsheltered 91.205(c)/91.305(c)). Also discuss the needs of formerly homeless families and individuals who are receiving rapid re-housing assistance and are nearing the termination of that assistance

Homeless

The amount and diversity of data collected for and about the County's homeless population has increased over the last decade. Data from the 2019 PIT Count revealed the following:

1. **Male:** 62% of all homeless individuals are male.
2. **Female:** 36% of all homeless individuals are female. A gender shift is becoming prevalent, as, from 2017 to 2019, the number of homeless females rose by 45%.
3. **Sheltered:** Only 18% of all homeless individuals are sheltered.
4. **Veterans:** 7% of the homeless population are veterans.
5. **Age:** 28% of all homeless individuals are between 51-60 years of age.
6. **Race:** 44% of all homeless individuals are White, 43% are Hispanic, 24% are Multi-Racial, and 19% are Black.
7. **Family/Race:** 68% of all homeless families are Hispanic.
8. **Youth:** 16% of all homeless individuals are 25 years old and/or younger.
9. **Foster Care:** 19% of all homeless individuals are children of foster care.
10. **First Time Homeless:** 36% of all homeless individuals counted were homeless for the first time. Sixty four percent (64%) of all homeless persons may be considered chronically homeless.
11. **Employed:** 18% of all homeless individuals are employed.

Rapid Rehousing Services

Rapid rehousing is an evidence-based supportive housing strategy that quickly moves families and individuals who are experiencing homelessness into permanent housing and provides a time-limited rental subsidy, typically 6 to 24 months. During this time, clients have access to case management and supportive services, such as employment and training opportunities and childcare. These resources are aimed at increasing income and addressing other barriers to housing stability that families and individuals face. While rapid rehousing offers a promising path to housing stability for large numbers of families and individuals, the high cost of housing makes rapid rehousing program-design and implementation challenging in Santa Clara County. These challenges make cross-system partnerships to support clients in obtaining and maintaining stable housing all the more important – for rapid rehousing clients, finding living-wage employment and locating an affordable apartment can make the difference between long term housing stability and a continued risk of homelessness. Rapid Rehousing programs in the County follow:

- **Bringing Families Home.** Families involved in the child welfare system with a child placed out of the home must have safe and stable housing to be considered for reunification by the Department of Family and Children’s Services. Maintaining stable housing is critical in preventing future separation. In Santa Clara County’s high-cost housing market, this presents a daunting challenge for many vulnerable families. Launched in 2017, the Bringing Families Home program, a partnership between the OSH and the Department of Family and Children’s Services, addresses these risk factors by providing stable housing to promote family reunification. Funded through a State legislative initiative targeted to families with connections to child welfare, the program provides rapid rehousing, including a rental subsidy and housing location services, to families at any point in the reunification process.

Child welfare-involved families access the program through the County’s Coordinated Assessment System and by referral from Family and Children’s Services. This flexible approach ensures that vulnerable households quickly receive the support they need no matter where they seek help – a central element of achieving reunification because households have a narrow window of time to meet these requirements. Families with a child currently placed out of the home, or families who have recently reunified who may be precariously housed, are also eligible. These families, like other families who benefit from the program, have the opportunity to achieve housing stability faster, exit the child welfare system more quickly, and prevent re-entry.

Abode Services supports families in achieving stability. It does this by providing housing navigation and rental assistance and developing strengths-based individualized case plans focused on employment objectives and family maintenance goals. Together, the partners connect reuniting families with the support networks key to addressing the factors that led to child welfare involvement. These partners use the following collaborative strategies:

- Co-locating partnering agency services to better serve families and provide targeted interventions; and
 - Achieving housing stability and lasting family reunification by partnering to provide individualized, wrap-around support.
- **Rapid Rehousing for School-Age Children.** According to the 2017 Homeless Census and Survey, 72% of families with children experiencing homelessness in Santa Clara County were residing in shelters or transitional housing programs. This is a significant decrease since 2013, when 95% of families experiencing homelessness in Santa Clara County were sheltered. Often, families that do not access shelters or other typical entry points for the County’s supportive housing system can be more challenging to engage, and they risk falling through the cracks.

To reach these families, the OSH has developed a rapid rehousing program targeting families with school-aged children who are not accessing the system through traditional access points, such as shelters or other community services. For this program, the County partners with the Bill Wilson Center and local school districts’ McKinney-Vento Homeless Education liaisons to identify families experiencing homelessness. Eligible families with school-age children are referred to the program, which can serve 60 families annually, via the Coordinated Assessment System. Innovative approaches utilized by the program include:

- Meeting families where they are;
 - Forging new partnerships to better serve children and families; and
 - Creating opportunities for innovation.
- **Rapid Rehousing for Public Safety and Justice.** Through partnerships with 14 community-based organizations, 12 County agencies, and 38 faith-based organizations, the Reentry Resource Center is a hub where individuals reentering the community from incarceration can efficiently access a broad range of services to help reentry clients and their families during this transition. It has locations in San José and Gilroy. One of the Reentry Resource Center’s key partnerships is with the County of Santa Clara’s OSH, which, as of 2018, had provided housing assistance - including case management, connections to employment, and rental assistance. Since opening in 2012, the Reentry Resources Center has served more than 20,000 reentry clients.
 - **Rapid Rehousing for Survivors of Domestic Violence, Sexual Assault, and Human Trafficking.** Homelessness itself can be traumatic for individuals and families, and often those experiencing homelessness have coped with other traumatic events in their lives. National studies show that 80% of women with children experiencing homelessness have also experienced domestic violence, and one in five of all homeless women report that domestic violence was the immediate cause of their homelessness.

In many communities, service providers working with survivors operate independent of the supportive housing system; however, since 2015, the County of Santa Clara OSH, the YWCA of Silicon Valley, The Health Trust, and the City of San José have partnered to develop several rapid rehousing programs to support survivors of domestic violence, sexual assault, and human trafficking who are experiencing homelessness. These programs serve individuals and families coming from the streets, emergency shelters, or directly fleeing domestic violence, and bring together the expertise of domestic violence service providers with evidence-based supportive housing strategies.

The YWCA-SV works with survivors to locate safe and secure housing options, and the programs currently have the capacity to serve 77 households at a time, receiving referrals through a confidential process within the Coordinated Assessment System. The County and the City of San José provide local funding for the programs, which is combined with federal dollars. The programs utilize the following evidence-based and effective strategies:

- Providing client-centered, trauma-informed services; and
 - Ensuring ongoing and individualized support.
- **CalWORKs Homeless Assistance Program.** The California Work Opportunity and Responsibility to Kids (CalWORKs) program was established to help families meet the reasonable costs of securing housing. The CalWORKs Homeless Assistance (CalWORKs HA) program serves eligible recipients or eligible applicants who are homeless or at risk of homelessness. Eligible recipients/applicants are homeless or at risk of homelessness. All social service entities providing homeless and homeless prevention services must create and operate programs that meet the State’s definition of “homeless,” which is defined by Welfare and Institutions Code 11450. This definition includes, but is not limited, to:
 - Lacking a fixed or regular nighttime residence; and
 - residing in a shelter; or
 - residing in a place not designed as a regular sleeping accommodation; or
 - In receipt of a notice to pay rent or quit.

CalWORKs HA provides the funding needed to make payments for temporary shelter for up to sixteen consecutive calendar days. It also provides payments to secure or maintain housing, including a security deposit and last month’s rent or up to two months of rent arrearages. Applicants and recipients must have less than \$100 in liquid resources (cash on hand) and must be homeless or at risk of homelessness in order to qualify for CalWORKs HA benefits. Types of homeless assistance services include:

- Temporary HA, which helps families pay the costs of temporary shelter;

- Sixteen calendar days of motel vouchers (\$85 per day for a family of four or fewer and \$15 for each additional family member, up to \$145 daily);
- Permanent HA, which helps families secure housing or prevent eviction; and
- Security deposit and last month's rent or 2 months arrearages to prevent eviction.

In 2018, CalWORKs assisted 57,614 families find temporary housing and 6,276 families find permanent housing, costing over \$45,000,000 in temporary shelter and HA expenditures. Recent CalWORKS HA legislative changes include:

- Increased eligibility to once in a 12-month period, from once in a lifetime;
 - Expanded eligibility to applicants who are victims fleeing domestic abuse, without regard to the income or assets of the abuser;
 - Temporary benefits to parents engaged in family reunification; and
 - Increased daily rate for temporary homeless assistance to \$85 per night for a family of four.
- **Destination: Work**. For many individuals and families experiencing homelessness, one, or even multiple, low- or minimum-wage job(s) is/are simply not sufficient to cover housing costs and other basic necessities in Santa Clara County. Employment that provides a living wage can be the key to long-term housing stability, particularly for families receiving time-limited rental subsidies in rapid rehousing programs.
 - The new “Destination: Work” employment initiative, coordinated by Destination: Home and the County of Santa Clara’s OSH, aims to provide opportunities for living-wage employment for individuals and families experiencing homelessness. Through partnerships with programs offering job training, professional certifications, and paid work experience in high-growth industries, Destination: Work supports each client to identify pathways to increasing income and long-term career opportunities. Destination: Work forges new and more meaningful collaboration between employment and supportive housing programs that prioritize client-led problem solving and continual improvement in system design. Key strategies of this collaborative approach include the following:
 - Maximizing impact by tracking outcomes; and
 - Deepening partnerships with employment partners.
 - **Employment Pathways Initiative**. Short-term housing subsidies, such as those offered through rapid rehousing programs, are designed to help people get back on their feet. However, many rapid rehousing participants find it difficult to obtain living-wage jobs that will allow them to take over the rent at the end of the program and maintain long-term housing stability. This is due to barriers like lack of work history, a criminal record, and behavioral health issues. To address this gap, Destination: Home, the County of Santa Clara’s OSH, and the City of San José developed the Employment Pathways Initiative to

help ensure that households receiving rapid rehousing assistance, and other supportive housing program participants, are quickly connected to employment and training opportunities that will help them remain stably housed.

The Employment Pathways Initiative staff teams up with each participant's existing housing program case manager, empowering them to support their clients in securing employment. Through partnerships with private businesses and nonprofits, the program connects participants with opportunities in high-growth industries such as healthcare, building and construction trades, advanced manufacturing, and technology, depending on the client's employment goals and experience. Key strategies of this partnership include:

- Sustainable collaboration for mutual benefit of employers and participants; and
- Leveraging data and shared goals to increase employment and improve outcomes across the supportive housing system.

Of 178 participants through 2018, 61% were connected with full-time employment and 91% of employment placements were retained for 365 days.

If a jurisdiction provides estimates of the at-risk population(s), it should also include a description of the operational definition of the at-risk group and the methodology used to generate the estimates.

“At-risk” of homelessness is defined as households receiving Section 8 assistance whose gross annual income equals 30% or less than the current AMI per family size.

Specify particular housing characteristics that have been linked with instability and an increased risk of homelessness.

The following statistics display the primary causes of homelessness cited by respondents to the 2019 Homeless Census. Based on the Census, 30% reported job loss, 22% reported alcohol and drug use as the primary cause, followed by divorce/separation/breakup at 15%, and eviction at 14%.

This data suggests that inability to find affordable housing and the need for supportive services, such as drug and alcohol rehabilitation, might be the main indicators of increased risk of homelessness.

Discussion

Please see discussions above.

NA-15 Disproportionately Greater Need: Housing Problems - 91.405, 91.205 (b)(2)

Assess the need of any racial or ethnic group that has disproportionately greater need in comparison to the needs of that category of need as a whole.

Introduction

Per HUD definitions, a disproportionate need exists when any group has a housing need that is 10% or higher than the jurisdiction as a whole. This section presents the extent of housing problems and identifies populations that have a disproportionately greater need. The four housing problems are: 1) lack of complete kitchen facilities; 2) lacks complete plumbing facilities; 3) more than one person per room; and 4) cost burden greater than 30%.

Table 6 - Disproportionately Greater Need 0 - 30% AMI

Housing Problems*	Has one or more of four housing problems	Has none of the four housing problems	Household has no/negative income, but none of the other housing problems

Data Source: 2012-2016 CHAS

Discussion

Below is a summary of the disproportionate needs experienced by LMI households:

- 87.5% of Pacific Islander households in the 30-50% AMI category experience housing problems compared to 74.1% of the jurisdiction as a whole. This is the only category that meets the HUD standard for disproportionate needs, although it represents a small sample size. Two hundred and ten (210) out of the 240 households in this category have housing problems, which is a small portion of the 71,895 households in the category.

No other group meets the 10% HUD threshold, but there are still a few groups affected more than others:

- 88.9% of Black/African American households and 87.8% of Hispanic households within the 0-30% AMI category experience housing problems, compared to 80.3% of the jurisdiction as a whole.

- 80.8% of Hispanic households and 78.2% of Black/African American households within the 30-50% AMI category experience housing problems, compared to 74.1% of the jurisdiction as a whole.
- Another outlier is the Asian population in the 50-80% AMI category, where just 2.5% of this population experiences housing problems, compared to 57.5% of the jurisdiction as a whole.

NA-20 Disproportionately Greater Need: Severe Housing Problems - 91.405, 91.205 (b)(2)

Assess the need of any racial or ethnic group that has disproportionately greater need in comparison to the needs of that category of need as a whole.

Introduction

Per HUD definitions, a disproportionate need exists when any group has a housing need that is 10% or higher than the jurisdiction as a whole. A household is considered severely overcrowded when there are more than 1.5 persons per room and is severely cost burdened when paying more than 50% of its income toward housing costs, including utilities. This section analyzes the extent of severe housing problems and identifies populations that have a disproportionately greater need. Again, the four housing problems are: 1) lack of complete kitchen facilities; 2) lacks complete plumbing facilities; 3) more than one person per room; and 4) cost burden greater than 30%. Disproportionately greater need is explored below.

Table 10 – Severe Housing Problems 0 - 30% AMI

Severe Housing Problems*	Has one or more of four housing problems	Has none of the four housing problems	Household has no/negative income, but none of the other housing problems
Jurisdiction as a whole	65,345	25,445	5,870
White	20,695	9,300	2,210
Black / African American	2,975	770	220
Asian	17,160	8,865	2,520
American Indian, Alaska Native	114	115	0

Table 13 – Severe Housing Problems 80 - 100% AMI

Severe Housing Problems*	Has one or more of four housing problems	Has none of the four housing problems	Household has no/negative income, but none of the other housing problems
Jurisdiction as a whole	9,810	47,755	0
White	2,715	21,335	0
Black / African American	215	1,710	0
Asian	3,405	13,415	0
American Indian, Alaska Native	10	90	0
Pacific Islander	90	95	0
Hispanic	3,185	9,890	0

Data Source: 2012-2016 CHAS

Discussion

Below is a summary of the disproportionate needs experienced by LMI households:

- 77.7% of Hispanic households in the 0-30% AMI category experience severe housing problems, compared to 67.6% of the jurisdiction as a whole.
- Over half of Pacific Islander households (58.3%) in the 30-50% AMI category experience severe housing problems, compared to 45.9% of the jurisdiction as a whole. This sample size is small and represents 240 households out of 71,900 in this category as a whole.

While no other group is above the 10% disproportionate threshold set forth by HUD, it is worth noting that beyond the 0-30% AMI category, Hispanic households are consistently at least 5% higher than the jurisdiction average across all categories.

NA-25 Disproportionately Greater Need: Housing Cost Burdens - 91.405, 91.205 (b)(2)

Assess the need of any racial or ethnic group that has disproportionately greater need in comparison to the needs of that category of need as a whole.

Introduction

Per HUD definitions, a disproportionate need exists when any group has a housing need that is 10 percent or higher than the jurisdiction as a whole. A household is considered cost burdened when paying more than 30 percent of its income toward housing costs, including utilities, and is severely cost burdened when paying more than 50 percent of its income toward housing costs. This section analyzes the extent of cost burden and identifies populations that have a disproportionately greater cost burden.

Housing Cost Burden

Table 14 – Greater Need: Housing Cost Burdens AMI

Housing Cost Burden	<=30%	30-50%	>50%	No / negative income (not computed)
Jurisdiction as a whole	398,040	120,650	101,635	6,255
White	181,340	46,535	38,245	2,270
Black / African American	7,940	3,755	4,055	230
Asian	137,940	35,990	27,585	2,710
American Indian, Alaska Native	710	195	245	0
Pacific Islander	1,165	365	200	20
Hispanic	60,250	30,750	28,680	870

Data Source: 2012-2016 CHAS **Discussion**

The data indicates that, as a whole, 35.8% of households in the County are cost burdened and paying more than 30% of their income toward housing costs. Sixteen percent of households in the County are severely cost burdened and paying more than 50% of their income toward housing costs.

Among households paying more than 30% of their income towards housing costs, there are two groups that are disproportionately higher than the jurisdiction average of 35.8%. Hispanic households are disproportionately affected by housing cost burden, with 49.7% of households overpaying for housing. In addition, 49.6% of Black/African American households are disproportionately affected by housing cost burden and are overpaying for housing.

Among cost burdened households paying 50% or more of their income toward housing costs, there are no racial/ethnic groups that are disproportionately affected. While not meeting the HUD threshold for disproportionate need, the most affected groups are Black/African American (25.7%) and Hispanic (24.0%) when compared to the jurisdiction average of 16.4%.

Note: Households with no/negative income are not counted in the analysis, although they still may require housing assistance.

NA-30 Disproportionately Greater Need: Discussion - 91.205 (b)(2)

Are there any Income categories in which a racial or ethnic group has disproportionately greater need than the needs of that income category as a whole?

Please see the discussion for NA-15, NA-20, and NA-25. Below is a summary of the disproportionate needs experienced by LMI households:

- 77.7% of Hispanic households in the 0-30% AMI category experience severe housing problems, compared to 67.6% of the jurisdiction as a whole.
- Over half of Pacific Islander households (58.3%) in the 30-50% AMI category experience severe housing problems, compared to 45.9% of the jurisdiction as a whole. This sample size is small and represents 240 households out of 71,900 in this category as a whole.

While no other group is above the 10% disproportionate threshold set forth by HUD, it is worth noting that beyond the 0-30% AMI category, Hispanic populations are consistently at least 5% higher than the jurisdiction average across all categories. Data for determining disproportionate needs in terms of housing cost burden is summarized below:

- The data indicates that, as a whole, 35.8% of households in the County are cost burdened and paying more than 30% of their income toward housing costs. Sixteen point four percent (16.4%) of households in the County are severely cost burdened and paying more than 50% of their income toward housing costs.
- Among households paying more than 30% of their income towards housing costs, there are two groups that are disproportionately higher than the jurisdiction average of 35.8%. Hispanic households are disproportionately affected by housing cost burden, with 49.7% of households overpaying for housing. In addition, 49.6% of Black/African American households are disproportionately affected by housing cost burden and are overpaying for housing.
- Among cost burdened households paying 50% or more of their income toward housing costs, there are no racial/ethnic groups that are disproportionately affected. While not meeting the HUD threshold for disproportionate need, the most affected groups are Black/African American (25.7%) and Hispanic (24.0%) when compared to the jurisdiction average of 16.4%.

Note: Households with no/negative income are not counted in the analysis, although they still may require housing assistance.

If they have needs not identified above, what are those needs?

Needs have been identified above.

Are any of those racial or ethnic groups located in specific areas or neighborhoods in your community?

HUD requires Entitlement Jurisdictions to review the racial make-up of its region. A map was created to show predominant race/ethnicity group locations throughout the County. White and

Hispanic populations dominate the largest areas of the County. There are concentrations of Asian and Hispanic populations in the north western area of the County, in and around San José, and in the southern area of the County. Please see the Race/Ethnicity map that follows.

NA-35 Public Housing - 91.405, 91.205 (b)

Introduction

In 2008, the Santa Clara County Housing Authority (SCCHA) entered into a ten-year agreement with HUD to become a Moving to Work (MTW) agency. The MTW program is a federal demonstration program that allows greater flexibility to design and implement more innovative approaches for providing housing assistance. SCCHA is currently in the process of updating its Strategic Plan. The updated plan will promote informed decision-making about how to achieve overall objectives in support of the agency’s mission. Until the update is completed the SCCHA will continue to utilize its current MTW Strategic Plan.

Additionally, SCCHA has used Low-Income Housing Tax Credit financing to transform and rehabilitate 535 units of public housing into SCCHA-controlled properties. The agency is an active developer of affordable housing and has either constructed, rehabilitated, or assisted with the development of more than 30 housing developments that service a variety of households, including special needs households. SCCHA assists approximately 17,000 households through the federal Section 8 Housing Choice Voucher program. The Section 8 waiting list contains 3,486 households, and it is closed.

The following tables display the public housing inventory and housing vouchers maintained by SCCHA. SCCHA has four two-bedroom family public housing units in its portfolio, which are located in the City of Santa Clara. A total of 10,528 housing vouchers are in use countywide.

Specific SCCHA data is not available for the Urban County. The data below reflect SCCHA information for the entire County, which includes the Cities of Campbell, Los Altos, Los Altos Hills, Los Gatos, Monte Sereno, Morgan Hill and Saratoga and the County’s unincorporated areas. (Refer to the Service Area Map below.). Table 23 shows the public housing by program type including Non-Elderly Disabled, Mainstream One-Year, Mainstream Five-year, and Nursing Home Transition.

Data Source: PIC (PIH Information Center)

Section 504 Needs Assessment: Describe the needs of public housing tenants and applicants on the waiting list for accessible units:

None of the four public housing units owned and managed by SCCHA is accessible, and information about the need for accessible units is not collected for waiting list applicants.

What are the number and type of families on the waiting lists for public housing and section 8 tenant-based rental assistance? Based on the information above, and any other information available to the jurisdiction, what are the most immediate needs of residents of public housing and Housing Choice voucher holders?

SCCHA randomly samples its Section 8 participants to better understand the types of services and/or resources needed to increase their self-sufficiency. Approximately 400 participants responded. Affordable healthcare, job training, basic computer skills, English as a second language, and job placement resources were among the most-identified services. The majority of these services are related to workforce training, showing the need for economic development among Section 8 participants. The selection of affordable healthcare as the highest need indicates the need for additional health-related services.

How do these needs compare to the housing needs of the population at large

The needs of public housing and Section 8 tenant-based rental assistance, who are seeking self-sufficiency, mirror the needs of the general population who also seek economic achievement. High on their list of needs are:

- Affordable healthcare;
- Job training;
- Basic computer skills;
- Job placement; and
- Higher education.

Discussion

Please see discussion above.

NA-40 Homeless Needs Assessment - 91.405, 91.205 (c)

Introduction:

As was previously discussed, the Santa Clara region is home to a large population of homeless individuals (9,706 single individuals), and a high percentage of unsheltered homeless (81.6%). The Supportive Housing System is governed by the CoC and the CoC Board, and the Destination: Home Leadership Board. Membership of the CoC is a collaboration of representatives from local jurisdictions comprised of community-based organizations, the SCCCHA, governmental departments, health service agencies, homeless advocates, consumers, the faith community, and research, policy and planning groups. The management information system utilized by the CoC is referred to as the Help Management Information System (HMIS). The HMIS monitors outcomes and performance measures for all the homeless services agencies funded by the County.

Homeless Point-in-Time (PIT Count) Census and Survey

The PIT Count is conducted every two years and consists of data collected on the sheltered and unsheltered homeless population. Sheltered homeless persons include those occupying shelter beds on the night of the count. Data describing the number of sheltered homeless persons are obtained from HMIS where possible, and they are collected directly from providers not using HMIS as needed. Unsheltered homeless persons are counted by direct observation, and community volunteers partnered with homeless guides canvas the regions by car and on foot during the early morning hours of the chosen nights. A large subset of the sheltered and unsheltered population is subsequently surveyed, providing data that is then used to estimate demographic details of the homeless population as a whole at a single point-in-time.

The PIT Count is performed annually using HUD recommended practices for counting and surveying homeless individuals. This survey includes field enumeration of homeless individuals residing in the County for a given night in January. In January, the Cities of Gilroy and Morgan Hill, as well as portions of Campbell, Los Gatos, Milpitas, San José, Los Gatos, San José, and the unincorporated areas in the eastern and southwestern parts of the County are enumerated. The Cities of Cupertino, Monte Sereno, Mountain View, Los Gatos Hills, Palo Alto, Saratoga, Sunnyvale, Santa Clara, and the unincorporated areas in the northwestern part of the County were also enumerated.

The PIT Count completed for the County identified top barriers to affordable housing are:

- Lost job;
- Drug and alcohol abuse;
- Divorce/separation/breakup;
- Eviction; and
- Argument with family or friend.

Obstacles to obtaining permanent housing include:

- Affordable rent;
- No job or income;
- No housing available;
- No money for moving costs; and
- No transportation.

The following definitions below provide the methodology for Table 25:

Definitions

- No. Experiencing Homelessness Each Year – unduplicated count of all persons enrolled during the program year
- No. Becoming Homeless Each Year – unduplicated count of persons appearing in HMIS for the first time during the year
- No. Exiting Homelessness Each Year – unduplicated count of persons exiting programs to a permanent destination as defined by HUD
- No. of Days Persons Experience Homelessness – average of the sums of the lengths of stay for each person

Table 19 - Homeless Needs Assessment

Population	Estimate the # of persons experiencing homelessness on a given night		Estimate the # experiencing homelessness each year	Estimate the # becoming homeless each year	Estimate the # exiting homelessness each year	Estimate the # of days persons experience homelessness
	Sheltered	Unsheltered				
Persons in Households with Adult(s) and Child(ren)	700	221	921	-	-	-
Persons in Households with Only Children	N/A	N/A	N/A	-	-	-
Persons in Households with Only Adults	1,532	6,977	8,509	-	-	-
Chronically Homeless Individuals	371	2,099	2,470	-	-	-
Chronically Homeless Families	N/A	N/A	N/A	-	-	-
Veterans	209	444	653	-	-	-

Population	Estimate the # of persons experiencing homelessness on a given night		Estimate the # experiencing homelessness each year	Estimate the # becoming homeless each year	Estimate the # exiting homelessness each year	Estimate the # of days persons experience homelessness
	Sheltered	Unsheltered				
Unaccompanied Youth/Young Adult	14	254	276	-	-	-
Persons with HIV	29	165	194	-	-	-

Data Source: Santa Clara County 2019 Point in Time Count (PIT Count) and Survey Report. **If data is not available for the categories "number of persons becoming and exiting homelessness each year," and "number of days that persons experience homelessness," describe these categories for each homeless population type (including chronically homeless individuals and families, families with children, veterans and their families, and unaccompanied youth).**

While data for each specific homeless subpopulation is not available, the PIT Count did include broad data referring to the amount of days spent homeless for the population at large. However, the data is not presented to estimate a total number of days for the entire population. Instead it lists, by percentage, the length of homelessness in a few brackets. The data for 2019 is as follows:

- 7 Days or Less – 2%
- 8-30 Days – 4%
- 1-3 Months – 6%
- 4-6 Months – 12%
- 7-11 Months – 9%
- 1 Year or More – 67%

Estimate the number and type of families in need of housing assistance for families with children and the families of veterans.

Recent voucher data shows that 212 veteran families were in need of housing assistance through special vouchers by Veterans Affairs. Overall, there are an estimated 653 veterans experiencing homelessness on a given night. For the County, there are 269 families consisting of 921 individuals family members who need housing assistance. This number includes individuals in families with adults and children, as well as families with only children.

Describe the Nature and Extent of Homelessness by Racial and Ethnic Group.

Forty-four percent (44%) of homeless individuals are White, followed by 43% who are Hispanic. The third largest percentage of homeless individuals are Black or African American at 19% of the total number of homeless individuals.

Describe the Nature and Extent of Unsheltered and Sheltered Homelessness.

According to data from the 2019 PIT Count, out of the 9,706 homeless persons in the County at-large, 81.6% of individuals were unsheltered, with the remaining 18.4% being sheltered. Overall, the homeless population has increased in total by 31% since 2017, when the population was then 7,394 individuals. Since 2017, the total number of sheltered homeless persons has decreased by 8%, while the total number of unsheltered homeless persons has increased by 45%.

Discussion:

From 2013 through 2017 the number of persons in living with diagnosed with HIV infection increased by 5.1%. The 2017 number was 135,082 in CA. In 2017, 3,361 residents were living with HIV in the County. In 2017, 156 individuals were reported as newly diagnosed with HIV infection. (Source: HIV Epidemiology Annual Report, County of Santa Clara, 2017.)

NA-45 Non-Homeless Special Needs Assessment - 91.405, 91.205 (b,d)

Introduction

The following section addresses the needs of special populations and the housing and service needs they might require. The special needs populations considered in this section include:

- Elderly households
- Persons with disabilities
- Large households
- Female-headed households
- Persons living with AIDS/HIV and their families

Describe the characteristics of special needs populations in your community:

Elderly/Seniors

HUD defines elderly as age 62 and older and frail elderly as persons who require assistance with three or more activities of daily living such as eating, bathing, walking, and performing light housework. The U.S. Census commonly defines older adults as those aged 65 and older. For the purposes of this analysis, the term elderly refers to those aged 62 and older.

Elderly residents generally face a unique set of housing needs, largely due to physical limitations, lower household incomes, and the rising costs of health care. Unit sizes and access to transit, health care, and other services are important housing concerns for this population. Housing affordability represents a key issue for seniors, many of whom are living on fixed incomes. The demand for senior housing serving various income levels is expected to increase as the baby boom generation ages.

Eleven percent (11%) of County residents (202,304 individuals) are 65 years of age or older. Thirty percent (30%) of households (186,330) in the County contain at least one person who is elderly. Fifty percent (50%) of these households are LMI, compared to 36% of households for the County as a whole. Within the entire County, almost 49% of LMI owner-occupied households containing an elderly member, and 72% of LMI elderly renter-occupied households containing an elderly member, are cost burdened and paying more than 30% of their income toward housing costs.

Persons with Disabilities

HUD defines disability as a physical or mental impairment that substantially limits one or more of the major life activities for an individual. Persons with disabilities can face unique barriers to securing affordable housing that provides them with the accommodations they need. Persons with disabilities may require units equipped with wheelchair accessibility or other special features that accommodate physical or sensory limitations. Access to transit, health care, services, and shopping also are important factors for this population.

According to the 2013-2017 ACS, 8.2% of the County's population, as a whole, is affected by one or more disabilities.

Large Families

The U.S. Census Bureau defines large households as those with five or more persons. Large households may face challenges finding adequately-sized affordable housing. This may cause larger families to live in overcrowded conditions and/or overpay for housing. Approximately 11.3% of households within the County are large family households.

Persons Living with AIDS/HIV and their Families

Stable and affordable housing that is available to persons living with HIV/AIDS and their families helps assure they have consistent access to the level of medical care and supportive services that are essential to their health and welfare. Stable and affordable housing can also result in fewer hospitalizations and decreased emergency room care. In addition, housing assistance, such as short-term help with rent or mortgage payments, may prevent homelessness among persons with HIV/AIDS and their families.

What are the housing and supportive service needs of these populations and how are these needs determined?

Please see discussions above.

Discuss the size and characteristics of the population with HIV/AIDS and their families within the Eligible Metropolitan Statistical Area:

In California, the number of HIV individuals in 2017 was 135,082. In the County, there were 156 individuals reported as newly diagnosed, making the total residents living with HIV infection at 3,361. During the same time period, a cumulative number of 2,557 (40%) persons were known to have died, including 2,498 with a diagnosis of AIDS. (Source: HIV Epidemiology Annual Report, County of Santa Clara, 2017.)

Discussion:

Please see discussions above.

NA-50 Non-Housing Community Development Needs - 91.415, 91.215 (f)

Describe the jurisdiction's need for Public Facilities:

Public and community facilities in the County were discussed at the regional and local community forums and meetings, stakeholder interviews, as well as the Regional Needs Survey. These outreach activities were conducted to engage community members to document the community and or public facilities needed in the County. Participants identified the following priority community and or public facilities:

- Enhance transit systems and rider accessibility;
- Additional senior citizens and mental health facilities;
- Additional emergency shelters;
- Centers for education and job/housing placement;
- Centers for subsidized auto repair;
- Facilities for abused/abandoned/neglected children;
- Educational and healthcare facilities; and
- Childcare facilities.

How were these needs determined?

Feedback was gathered from the Regional Needs Survey and regional community forums, where residents and stakeholders of the City provided input community needs. Please see the Community Engagement Summary for more detail.

Describe the jurisdiction's need for Public Improvements:

Stakeholders at each of the ConPlan Regional Public Forums highlighted the lack of affordable and accessible transportation services in the County. Participants in the forums also emphasized the need for:

- Transit service expansion and bus service for seniors and homeless;
- Improvements to public infrastructure and facilities;
- Improve interim housing and services options for homeless population;
- Recreation and open spaces; and
- Mental health centers.

REGIONAL NEEDS SURVEY

Survey respondents rated the level of need for infrastructure improvements. The highest rated improvement was the cleanup of contaminated and or abandoned properties and buildings. Other high priorities identified include:

1. Street improvements;
2. Lighting improvements; and
3. Water/sewer improvements.

How were these needs determined?

Feedback was gathered from the Regional Community Needs Survey and Regional Public Forums, where residents and stakeholders of the City provided input community needs. Please see the Community Engagement Summary for more detail.

Describe the jurisdiction's need for Public Services:

During the forums, participants emphasized the need to support a broad range of community services. The need to increase services for homeless residents and homelessness prevention were key concerns identified by community members. Other priorities included providing the following enhanced services for special needs populations such as:

- Support is needed for other at-risk homeless due to high cost of living (i.e., college students, former homeless, those who cannot live alone, and those with a criminal history).
- Provide safe parking areas for unsheltered homeless populations who have vehicles and RVs.
- Develop a comprehensive Wrap-Around Services program for a variety of social service organizations to use.
- Increase the number of shelters in the County.
- Greater communication and integration of social service entities.

In addition, participants noted there was a lack of fresh food in certain areas of the County. Solutions for gaining food subsidies and services include:

- Prepare a list of known food desert areas in the County and collaborate with service entities that provide routine nutrition and food delivery services.
- Create and or expand food storage spaces.
- Work with local grocers to create secondary outlets in in designated food deserts.
- Provide food subsidies to individuals with chronic health issues particularly those at risk (e.g., drug/alcohol/chronic health conditions and those under 60 where other organizations cannot provide services)

The Regional Needs Survey respondents prioritized several public services that are needed most in the County. Respondents identified the following as the highest priority services:

1. Mental health;
2. Abused/abandoned/neglected children;
3. Homeless prevention;
4. Emergency housing assistance for homeless; and
5. Neighborhood cleanups.

How were these needs determined?

Feedback was gathered from the Regional Needs Survey and Regional Public Forums, where residents and stakeholders of the County provided comprehensive input about community needs. Please see the Community Engagement Summary for more detail.

Housing Market Analysis

MA-05 Overview

Housing Market Analysis Overview:

Affordable housing is paramount to addressing homelessness in the County. When incomes do not keep pace with housing costs, it becomes clear there is a need for more affordable housing.

The San José-Sunnyvale-Santa Clara, CA HUD Metro Fair Market Rent Area (HMFA) is one of the most expensive rental market in the nation. Renter households must earn higher than average incomes to afford the average two bedroom apartment. Multiple jurisdictions within the County fall within the top thirty most expensive markets, including: Los Altos, Saratoga, Los Gatos, and Morgan Hill.

Market analysis and public engagement activities indicated there is a tremendous need for additional affordable housing units to satisfy the housing needs of the homeless, households in transition, and cost-burdened population earning below 80% AMI. The 2020 Analysis of Impediments to Fair Housing Choice (AI) report contains a thorough analysis of housing needs for the County and its jurisdictions.

The following provides a brief overview of the results of the Market Analysis, with more detail included in each corresponding section. Housing and affordable housing in the County has taken a top position in terms of priority. A general housing background analysis was performed. The data shows that 57% of housing units in the County are occupied by owner-occupied households and 54% of units are occupied by renter households. Just over 50% of the housing units are single family residences (1-unit detached structures) and 34% of units are multi-family attached units.

The cost of housing has risen to the point where 36% of the County's households pay more than 30% of their income toward housing costs and 16% of households pay more than 50% of their income toward housing costs.

Affordable housing is a priority for the County. The County provides capital funding to developer for the construction of affordable and supportive housing. Another way the County provides affordable housing is through public housing. SCCHA develops, controls, and manages more than 2,600 affordable rental housing properties throughout the County. As per the 2017 Housing Inventory Count (HIC), 9,093 beds are available for homeless individuals and families in the County. Housing facilities for homeless individuals and families include emergency shelters, transitional housing, permanent supportive housing, and safe havens.

Other factors that contribute to affordability are housing conditions. When reviewing the overall housing stock age and conditions, low and moderate income household do not make enough for needed maintenance project work. Sixty-five percent (65%) of housing units in the County were constructed before 1980, and therefore are at risk of a Lead Based Paint (LBP) hazard. It is also

estimated that 39% of units at risk of LBP hazards are occupied by households making 80% or less than AMI.

The ConPlan’s Regional Forums, stakeholder interviews, and the Regional Needs Survey feedback was that enhanced services and facilities are needed for our special needs populations, particularly for individuals who are homeless, elderly, and live with disabilities and / or mental health needs. There are numerous special need facilities in the County, some of which are adult residential facilities that provide non-medical care for adults, group homes that service children or adults with chronic disabilities, and residential care facilities for the elderly. As per the Needs Assessment, 48% of elderly owner-occupied households and 72% of elderly renter-occupied households in the County are cost burdened and paying more than 30% of their incomes toward housing costs.

Currently the County is completing its AI. As part of this processes for the AI, the County must determine through data analysis and community engagement activities the barriers to Fair housing. Barriers or impediments to fair housing are:

- Lack of affordable housing in areas that are at risk of displacement;
- Rising housing and rent costs;
- High construction costs to build affordable housing;
- Decreasing homeownership;
- Limited resources for financial assistance for families;
- Support for inclusionary housing requirements varies from city to city;
- Lack of or limited fair housing monitoring and tenant protection efforts;
- Limited fair housing law education and outreach with landlords, municipal government, and social service agencies;
- Slow planning, permitting and development process;
- Costly code violations in older neighborhoods;
- Limited capacity for homeowners both financial and expertise for home maintenance;
- Increasing number of units that are not habitable;
- Environmental justice and housing equity;
- Lack of redevelopment target setting and planning;
- Lack of affordable house near employment or transit areas; and
- Lack of supportive housing for special needs populations (particularly for victims of domestic violence, persons with limited English proficiency, and individuals with chronic health problems).

The Housing Market Analysis section also provides data from industries that employ LMI households. This section also analyzes how far workers travel to work and level of education. The average one-way commute to work for people living in the County is 27 minutes, and that the average commute nationally is 25.5 minutes. Overall, 93% of County residents age 25 and older have at least a high school diploma or higher, and 56.8% have a bachelor’s degree or higher. Fifty-eight percent (58%) of the total jobs in the County are produced by

these four employment sectors: 1) Education and Health Care Services (18%); 2) Professional, Scientific, Management Services (17%); 3) Arts, Entertainment, Accommodations (13%); and 4) Retail Trade (10%).

MA-10 Housing Market Analysis: Number of Housing Units - 91,410, 91.210(a)&(b)(2)

Introduction

The County is primarily a jurisdiction of owner occupied, single-family housing units. The County contains 658,409 total units of which 63.4% are single family attached or detached structures. Multi-family developments units make up 33.5% percent of the County's housing stock. Fifty six point nine percent (56.9%) of units, or 358,864 units, are owner occupied and 43.1%, or 271,587 units, are renter occupied.

Table 20 – Residential Properties by Unit Number

Property Type	Number	%
1-unit detached structure	348,469	52.9%
1-unit, attached structure	69,412	10.5%
2-4 units	47,128	7.2%
5-19 units	70,047	10.6%
20 or more units	103,649	15.7%
Mobile Home, boat, RV, van, etc.	19,704	3.0%
Total	658,409	100.0%

Data Source: 2013-2017 ACS

Table 21 – Unit Size by Tenure

	Owners		Renters	
	Number	%	Number	%
No bedroom	1,320	0.4%	19,411	7.1%
1 bedroom	6,848	1.9%	76,879	28.3%
2 or 3 bedrooms	201,431	56.1%	153,823	56.6%
4 or more bedrooms	149,265	41.6%	21,474	7.9%

Data Source: 2013-2017 ACS

Describe the number and targeting (income level/type of family served) of units assisted with federal, state, and local programs.

The SCCHA Section 8 Housing Choice Voucher program and other voucher programs target assistance as follows: 75% entering the program must be at 0-30% AMI and the remaining 25% must be no higher than 50% AMI. SCCHA's housing properties mandate income limits.

Provide an assessment of units expected to be lost from the affordable housing inventory for any reason, such as expiration of Section 8 contracts.

Does the availability of housing units meet the needs of the population?

As described in the Needs Assessment, based on both the number of cost-burdened severely cost burdened households, high number of households on the SCCCHA waitlist, and the number of available affordable housing units do not meet the needs of the County's LMI residents.

While the County has been proactive in working to meet the affordable housing needs, the demand and resources have historically been out of balance due to the extreme cost of living in the Bay Area..

On November 8, 2016, voters in the County approved the 2016 Measure A – Affordable Housing Bond (Housing Bond), authorizing the County issue up to \$950 million in general obligation bonds to acquire or improve real property for the purpose of providing affordable housing for vulnerable populations throughout the County. Highlights of the County's Housing Bond include:

- Setting a target to construct 4,800 homes. As of March 10, 2020, \$234 million has been committed to 19 housing developments, adding 1,416 units of affordable housing and 203 units of low-income units.
- \$25 million committed towards a first-time homebuyer program to assist 235 families with down payment assistance loans.
- \$11.9 million committed to a supportive housing fund.

Each jurisdiction is required to produce a State mandated housing plan for its fair share of housing needs during a planning cycle. A jurisdiction's fair share housing need is determined through a three-step process:

1. The California Department of Finance and the Department of Housing & Community Development project population growth and housing needs over a period of time;
2. Statewide housing needs are allocated to regional Council of Governments (COGs) throughout California; and,
3. COGs work with the cities and counties within their purview to allocate the regional need to the local level in what is known as the Regional Housing Need Allocation (RHNA).

Another regional program that supports affordable rental housing, the Housing Search Assistance Program, is operated by the Silicon Valley Independent Living Center. The program provides assistance in finding accessible, affordable, and integrated housing options primarily for people living with disabilities and who are experiencing housing discrimination.

Describe the need for specific types of housing:

The County is seeing an aging low-income population emerging. As mentioned in the Needs Assessment, 11% of County residents (202,304 individuals) are over the age of 65 plus almost 30% of all households (186,330 households) in the County contain at least one person age 62 or older. And over 50% of those households are LMI. Elderly residents may benefit from additional accessible, affordable units that have greater access to transit, healthcare, and other services.

Additionally, several special needs populations, require affordable housing, such as the homeless or at-risk of homelessness, large households, female-headed households with children, seniors, and disabled individuals. SCCHA reports that smaller unit sizes and accessibility to transit, health care, and other services are housing needs for the senior population. The same often holds true for disabled individuals.

Discussion

Please see discussion above.

MA-15 Housing Market Analysis: Cost of Housing - 91.410, 91.210(a)

Introduction

Housing affordability is an important factor for evaluating the housing market, as well as quality of life, as many housing problems relate directly to the cost of housing. HUD standards measure affordability by the number of households paying no more than 30% of their gross income toward housing costs, including utilities.

As stated in the Needs Assessment, cost burden is the most common housing problem, with 35.8% of households in the County paying more than 30% of their incomes toward housing costs and 16.4% of households paying more than 50% of their incomes toward housing costs.

As discussed in MA-05, in the San José-Sunnyvale-Santa Clara, CA HUD Metro Fair Market Rent Area, which includes the Urban County, renter households must earn high incomes to afford a market rate apartment. This causes the area to be one of the most expensive rental market in the nation.

Table 22 – Cost of Housing

	2010	2017	% Change
Median Home Value	\$701,000	\$829,600	18.3%
Median Contract Rent	\$1,402	\$1,955	39.4%
Median Income	\$86,850	\$106,761	22.9%

Table 25 – Monthly Rent

Monthly Rent (\$)	Efficiency (no bedroom)	1 Bedroom	2 Bedroom	3 Bedroom	4 Bedroom
Fair Market Rent	\$1,507	\$1,773	\$2,220	\$3,078	\$3,545
High HOME Rent	\$1,310	\$1,405	\$1,688	\$1,942	\$2,148
Low HOME Rent	\$1,045	\$1,120	\$1,343	\$1,552	\$1,732

Data Source: HUD FMR and HOME Rents 2017

Is there sufficient housing for households at all income levels?

There is a disparity between need and availability of affordable housing in the County. Approximately 96,655 households are at 0-30% AMI, yet there are only 29,055 units available that are affordable to these households. In total, there are 82,055 units affordable for LMI households earning below 80% AMI, yet there are 242,035 households within this income bracket in need of housing.

How is affordability of housing likely to change considering changes to home values and/or rents?

Data was collected for median home values and median contract rents. This data demonstrates that from 2010 to 2017 there has been an 18.3% increase in the median home value (\$701,000 to \$829,600) and a 39.4% increase in the median rent (\$1,402 to \$1,955). As mentioned in the Needs Assessment, there has been a 22.9% increase in median income (\$86,850 to \$106,761) during the same time period. This indicates that the median household income in the County is not keeping pace with the cost of rental housing, which may pose financial challenges to people looking to rent a home.

How do HOME rents / Fair Market Rent compare to Area Median Rent? How might this impact your strategy to produce or preserve affordable housing?

As stated above, median contract rent for the County was \$1,955 per month in 2017. This is significantly higher than the HOME rates in every unit category except four-bedroom units, and higher than FMR rates for efficiency and 1 bedroom units.

In such a competitive, high-priced market, strategies that preserve or produce additional affordable housing do more to ensure long-term affordability for LMI residents. Due to the economics of the private market, programs such as Section 8 vouchers that provide tenant-based rental assistance might not be as feasible. Strategies that produce housing multiply the impact of available funds by increasing the number of households that can be served over a period of time, especially when HOME rents are considerably lower than those found throughout the County.

Discussion

Please see discussion above.

MA-20 Housing Market Analysis: Condition of Housing - 91.410, 91.210(a)

Introduction

HUD defines housing “conditions” similarly to the definition of housing problems previously discussed in the Needs Assessment. These conditions are:

1. More than one person per room;
2. Cost burden greater than 30%;
3. Lack of complete plumbing; and
4. Lack of complete kitchen facilities.

Describe the jurisdiction's definition for "substandard condition" and "substandard condition but suitable for rehabilitation."

The County defines substandard housing as buildings or units that are not in compliance with the California Health and Safety Code. This includes units having structural hazards; faulty weather protection; fire, health and safety hazards; or those lacking complete kitchen or plumbing facilities. Standard condition housing is defined as being in compliance with the California Health and Safety Code.

Table 26 - Condition of Units

Condition of Units	Owner-Occupied		Renter-Occupied	
	Number	%	Number	%
With One Selected Condition	106,323	29.6	120,829	44.5%
With Two Selected Conditions	3,998	1.1%	19,472	7.2%
With Three Selected Conditions	98	<0.1%	622	0.2%
With Four Selected Conditions	4	<0.1%	74	<0.1%
No Selected Conditions	248,441	69.2%	130,590	48.1%
Total	358,864	100.0%	271,587	100.0%

Data Source: 2013-2017 ACS

Table 27 – Year Unit Built

Year Unit Built	Owner-Occupied		Renter-Occupied	
	Number	%	Number	%

Abandoned Vacant Units	No Data	No Data	No Data
REO Properties	No Data	No Data	1
Abandoned REO Properties	No Data	No Data	No Data

Data Source: 2013-2017 ACS Estimates

Describe the need for owner and rental rehabilitation based on the condition of the jurisdiction's housing.

Characteristics commonly used to evaluate the housing supply include age of housing stock, the number of vacant/abandoned units, and the risk of lead-based paint (LBP). Unless carefully maintained, older housing stock can create health and safety problems for occupants. As seen in Table 33, a majority (65.6%) of the County's housing stock was constructed prior to 1980.

Estimate the number of housing units within the jurisdiction that are occupied by low- or moderate-income families that contain lead-based paint hazards. 91.205(e), 91.405

Building age is used to estimate the number of homes with LBP, as LBP was prohibited on residential units after 1978. For the purposes of this plan, units built before 1980 are used as a baseline for units that contain LBP. Sixty five point six percent (65.6%) of all housing units were built before 1980 and have potential exposure to LBP. As explained in the Needs Assessment, 38.6% of the households in the County (242,035 households) are 0-80% AMI. Using this percentage as a baseline, it is estimated that 156,113 LBP units are occupied by LMI families.

Discussion

Children six years of age and younger have the highest risk of lead poisoning, as they are more likely to place their hands and other objects into their mouths. The effects of lead poisoning include damage to the nervous system, decreased brain development, and learning disabilities. As shown in table 34, approximately 76,200 households with children age 6 or younger live in owner- and renter-occupied housing with risk of LBP .

MA-25 Public and Assisted Housing - 91.410, 91.210(b)

Introduction

SCCHA assists approximately 17,000 households through Section 8 Vouchers for housing. SCCHA also develops, controls, and manages affordable rental housing properties throughout the County. SCCHA’s programs are targeted toward LMI households, and more than 80% of their client households are extremely low-income families, seniors, veterans, persons with disabilities, and formerly homeless individuals.

SCCHA has used Low Income Housing Tax Credit financing to transform and rehabilitate 535 units of public housing into SCCHA-controlled properties. The agency is an active developer of affordable housing and has either constructed, rehabilitated, or assisted with the development of more than 30 housing developments that service a variety of households, including special needs households. Over ten years ago, SCCHA entered into a ten-year agreement with HUD to become a Moving to Work (MTW) agency. The MTW program is a federal demonstration program that allows greater flexibility to design and implement more innovative approaches for providing housing assistance.

The following tables display the public housing inventory and housing vouchers maintained by SCCHA. SCCHA has four two-bedroom family public housing units in its portfolio, which are located in the City of Santa Clara. Approximately 10,635 housing vouchers are in use countywide.

Specific SCCHA data on the number of units or vouchers available is only available for the City of San José (through the Housing Authority of the City of San José, administered by SCCHA) and the County as a whole.

Table 29 – Total Number of Units by Program Type

	Program Type								
	Certificate	Mod-Rehab	Public Housing	Vouchers					
				Total	Project-based	Tenant-based	Special Purpose Voucher		
							Veterans Affairs Supportive Housing	Family Unification Program	Disabled*
No. of units vouchers available	0	48	20	10,635	815	9,820	1,964	0	465
No. of accessible units									

*Includes Non-Elderly Disabled, Mainstream One-Year, Mainstream Five-year, and Nursing Home Transition

Data Source: PIC (PIH Information Center)

Describe the supply of public housing developments:

There are no public housing developments located in the jurisdiction.

Describe the number and physical condition of public housing units in the jurisdiction, including those that are participating in an approved Public Housing Agency Plan:

Not applicable. There are no public housing developments located in the jurisdiction.

Table 30 - Public Housing Condition

Public Housing Development	Average Inspection Score
N/A	N/A

Describe the restoration and revitalization needs of public housing units in the jurisdiction:

Not applicable. There are no public housing developments owned by the County.

Describe the public housing agency's strategy for improving the living environment of low- and moderate-income families residing in public housing:

As previously referenced, SCCHA has been a Moving to Work agency since 2008, during which time the agency has developed 31 MTW activities. The vast majority of its successful initiatives have been aimed at reducing administrative inefficiencies, which in turn opens up more resources for programs serving LMI families. The following is excerpted from SCCHA’s August 2014 Board of Commissioner’s report:

“SCCHA’s Family Self Sufficiency (FSS) Program is designed to provide assistance to current SCCHA Section 8 families to achieve self-sufficiency. When a family enrolls in the five-year program, HPD’s FSS Coordinator and LifeSTEPS service provider help the family develop self-sufficiency goals and a training plan, and coordinates access to job training and other services, including childcare and transportation. Program participants are required to seek and maintain employment or attend school or job training. As participants increase their earned income and pay a larger share of the rent, SCCHA holds the amount of the tenant’s rent increases in an escrow account, which is then awarded to participants who successfully complete the program. SCCHA is currently in the initial stages of creating a pilot successor program to FSS under the auspices of its MTW flexibility called Focus Forward.”

Every year, SCCHA provides a report to HUD on the previous year’s activities in its FSS program.

Discussion:

See above.

MA-30 Homeless Facilities and Services - 91.410, 91.210(c)

Introduction

Various organizations within the County provide housing facilities and services for residents who are homeless. Housing opportunities for homeless individuals and families include emergency shelters, transitional housing, permanent supportive housing, rapid re-housing, and safe havens. Housing opportunities are provided at facilities or through scattered-site housing models. Housing services available include outreach and engagement, housing location assistance, medical services, employment assistance, substance abuse recovery, legal aid, mental health care, veteran services, public assistance benefits advocacy and referrals, family crisis shelters and childcare, domestic violence support, personal good storage, and personal care/hygiene services.

Facilities Targeted to Homeless Persons

Table 31 - Facilities Targeted to Homeless Persons

	Emergency Shelter Beds		Transitional Housing Beds	Permanent Supportive Housing Beds	
	Year Round Beds (Current & New)	Voucher / Seasonal / Overflow Beds	Current & New	Current & New	Under Development
Households with Adult(s) and Child(ren)	205	0	144	466	0
Households with Only Adults	437	571	441	3,041	0
Chronically Homeless Households	0	0	0	2,251	0
Veterans	50	0	149	1,315	0
Unaccompanied Youth	23	0	0	0	0

Data Source and Comments: PIC (PIH Information Center); List includes DV Shelters. Numbers are duplicate for Unaccompanied Youth and Unaccompanied Children. Data includes entire continuum capacity and is aggregate for the County.

Describe mainstream services, such as health, mental health, and employment services to the extent those services are used to complement services targeted to homeless persons

Regional programs that highlight and demonstrate mainstream service connections for the homeless population include:

- The OSH mission is to increase the supply of housing and supportive housing that is affordable and available to extremely low income and /or special needs households. The OSH supports the County mission of promoting a healthy, safe, and prosperous community by ending and preventing homelessness.
- The Valley Homeless Healthcare Program (VHHP) is part of the Santa Clara Valley Medical Center and provides medical services to homeless individuals, including primary care and urgent care. VHHP also manages a Medical Respite program for homeless individuals

discharged from hospitals as well as a Backpack Homeless Health Care Program for those in encampments.

- The County's Social Services Agency has expedited the review process of homeless households' CalFresh applications so that they may receive benefits within three days.
- The County's Behavioral Health Services Department (BHS) has multiple programs to connect homeless individuals with housing or shelter assistance. BHS also treats those going through behavioral health crises.
- The County's Reentry Resource Center provides services to those who have been previously incarcerated and to individuals who are homeless upon release. Services include referrals to drug treatment, housing assistance, food assistance, counseling, and other benefits.

List and describe services and facilities that meet the needs of homeless persons, particularly chronically homeless individuals and families, families with children, veterans and their families, and unaccompanied youth. If the services and facilities are listed on screen SP-40 Institutional Delivery Structure or screen MA-35 Special Needs Facilities and Services, describe how these facilities and services specifically address the needs of these populations.

Specific homeless populations on a given night within the County include:

- Families: 269 (921 individuals);
- Families with Children: 921 individuals (includes households with adults and children);
- Veterans: 653 individuals;
- Unaccompanied youth/young adult: 1,876 individuals;
- Domestic violence: 27% of all homeless individuals in 2019;
- Chronic homelessness: 2,470 individuals or 25% of the overall PIT Count;
- Chronic homeless gender: 68% male, 30% female;
- Chronically homeless that are sheltered: 15%; and
- Health conditions of chronically homeless: 64% have psychiatric or emotional conditions; 53% PTSD; 51% drug or alcohol abuse; 38% chronic health problems, and 17% traumatic brain injury.

MA-35 Special Needs Facilities and Services - 91.410, 91.210(d)

Introduction

The County is a significant funder of housing for special needs persons including the elderly, individuals living with disabilities, mental health conditions, and HIV/AIDS as well as persons living with substance abuse issues. This chapter will provide statistics on special needs facilities in the County. The County currently operates and or provides funds for emergency shelters, transitional and supportive housing countywide.

Including the elderly, frail elderly, persons with disabilities (mental, physical, developmental), persons with alcohol or other drug addictions, persons with HIV/AIDS and their families, public housing residents and any other categories the jurisdiction may specify, and describe their supportive housing needs

Santa Clara County HIV Commission was created to provide an effective, compassionate, and comprehensive system of HIV prevention and care services for people living with HIV/AIDS in the County. The HIV Commission serves as a designated alternative to an HIV health services planning council pursuant to the Public Health Services Act for the receipt of Ryan White HIV/AIDS Program grant funds.

OSH prioritizes supportive housing for vulnerable populations including the elderly, homeless, veterans, persons with disabilities, foster youth, and survivors of domestic violence. Supportive housing services generally involves providing units that are accessible, have greater access to transportation and healthcare, and or could possibly be larger units to accommodate those who need assistance with one or more daily activities.

Elderly Residents

Results and recommendations of engagement activities include supporting elderly services, housing assistance and assistance with food delivery. Participants of engagement activities stated that seniors need better support systems so they can age in place in their own home. Elderly and frail elderly residents generally face a unique set of housing needs, largely due to physical limitations, lower household incomes, and the rising costs of health care. They have a range of housing needs, including retrofits to facilitate aging in place, downsizing to more convenient, urban, amenities-rich communities, and more intensive care facilities. In 2019 the County funded three senior-oriented projects 1) adult day care services at the Saratoga Senior Coordination Council 2) at-risk seniors program operated by the Community Services Agency in Los Altos and 3) legal services by Senior Adults Legal Assistance.

Persons with Disabilities

Currently the County provides vouchers to 369 persons with a disability however there are 4,980 vouchers in the San José-Sunnyvale- County region (Data Source: 2016 CHAS). The County currently prioritizes support for disabled elderly. This population generally has lower incomes and often face barriers to finding suitable employment or adequate affordable housing due to physical or structural obstacles. This segment of the population often needs affordable housing that is located near public transportation, services, medical facilities, and shopping. Persons with

disabilities may require units equipped with wheelchair accessibility or other special features that accommodate physical or sensory limitations. Depending on the severity of the disability, people may live independently with some assistance in their own homes or may require assisted living and supportive services in special care facilities. In 2019 the County funded a housing program for persons with disabilities run by Silicon Valley Independent Living Center.

HIV/AIDS

In California, the number of HIV individuals was 135,082 in 2017. In 2017, 156 individuals were reported as newly diagnosed making the total residents living with HIV infection 3,361 in the County (Source: HIV Epidemiology Annual Report, County of Santa Clara, 2017). The fatality rate due to HIV/AIDS has declined since 1995. Many people with HIV/AIDS are living longer lives, and therefore require assistance for a longer period of time. These individuals are increasingly lower income and homeless, have more mental health and substance abuse issues, and require basic services such as housing and food in order to ensure they adhere to the medications necessary to prolong their lives.

The County prepared a plan that provides a roadmap for the Santa Clara County HIV Planning Council for Prevention and Care to provide a comprehensive and compassionate system of HIV prevention and care services for the County. This effort aligns with the Strategic Plan's goal to support activities that provide community services to low income and special needs households. Another County program that provides assistance is Health Trust AIDS Services (THTAS). This program serves persons living with HIV/AIDS in the County. THTAS receives and administers contract funding for its housing subsidy program (Housing for Health) from HOPWA and HOPWA-PSH from the City of San José (grantee) and the County General Funds through the Public Health Department. In addition to tenant-based rental assistance (TBRA), these contracts include placement and support services provided by Case Managers, Registered Nurses and Master prepared Social Workers for the more medically acute clients. Housing clients are also eligible for additional services provided by Ryan White Care Act funding.

Describe programs for ensuring that persons receive appropriate supportive housing

The 2018 State of the Supportive Housing System in the County provides details about the supportive housing system. The system relies on several central elements to support participants as they obtain and retain stable housing including:

- Affordable housing;
- Case management; and,
- Supportive services (i.e. medical and behavior health services).

The County supports the national directive “All the Way Home”. This campaign seeks to end veteran homelessness across the County. Strategies to implement this initiative are strategies to incentivize landlords to rent to homeless veterans as well as offer supportive services and rental assistance. Collaborative partnerships in the County are: SSCHA, Abode Services, Destination: Home, Goodwill Silicon Valley, HomeFirst Services of Santa Clara County, Sunnyvale Community

Services, The Health Trust, U.S. Department of Veterans Affairs, and Veterans Voices of Santa Clara County.

The County also supports the Reentry Resource Center to assist individuals leaving the criminal justice system. Formerly incarcerated individuals are an at-risk of homeless population. The Center is funded by California's Public Safety Realignment Act and provides post-release supervision including employment services, case management, and rental assistance.

Describe programs for ensuring that persons returning from mental and physical health institutions receive appropriate supportive housing

The County has a total of 9,093 supportive housing beds available for persons with health-related conditions. This includes the following licensed care facilities:

Group Homes

Group Homes are facilities of any capacity and provide 24-hour non-medical care and supervision to children in a structured environment. Group Homes provide social, psychological, and behavioral programs for troubled youth.

Adult Residential Facility

Adult Residential Facilities (ARF) are facilities of any capacity that provide 24-hour non-medical care for adults ages 18 through 59 who are unable to provide for their own daily needs. Adults may be physically handicapped, developmentally disabled, and/or mentally disabled.

Residential Care Facilities for the Elderly
