Residential Care Facilities for the Elderly (RCFE) provide care, supervision, and assistance with activities of daily living, such as bathing and grooming. They may also provide incidental medical services under special care plans. The facilities provide services to persons 60 years of age and over and persons under 60 with compatible needs. RCFEs may also be known as assisted living facilities, nursing homes, and board and care homes. The facilities can range in size from fewer than six beds to over 100 beds. The residents in these facilities require varying levels of personal care and protective supervision.

Specify the activities that the jurisdiction plans to undertake during the next year to address the housing and supportive services needs identified in accordance with 91.215(e) with respect to persons who are not homeless but have other special needs. Link to one-year goals. 91.315(e)

The diminishing amount of funds to meet underserved needs continues to be the most significant obstacle to addressing the needs of underserved populations. The County supplements its federal funding with other resources and funds, including:

- The Housing Trust Silicon Valley is a public/private venture dedicated to increasing affordable housing in the county. The Trust makes available funds for developers to borrow for the construction of affordable units.
- Reissued Mortgage Credit Certificates (RMCC), a federal program issued by the County, allows homeowners to claim a federal income tax deduction equal to the amount of interest paid each year on a home loan. As of March 2019, applications are being accepted for the reissued program. Through an RMCC, a homeowner's deduction can be converted into a federal income tax credit that reduces the household's tax payments on a dollar for dollar basis, with a maximum credit equal to 15% of the annual interest paid on the borrower's mortgage. The homebuyer's lender will determine eligibility and will work with the application process with the County.
- McKinney Vento Homeless Assistance Funds are distributed by the County to organizations that provide services to homeless persons and persons at-risk of homelessness.
- Rental assistance provided by SCCHA will continue to be available to Urban County residents through the Moderate Rehabilitation Program and the Section 8 Program.
- The County Affordable Housing Fund was established to assist in the development of affordable housing, especially extremely low income and special needs people throughout the County.
- Measure A was a giant step towards reducing homelessness by creating affordable housing units, homebuyer's programs, and more options for supportive housing. In November 2016, the \$950 million Housing Bond was approved. This housing bond provides the County with an unprecedented opportunity to partner with cities, residents, and the affordable and supportive housing community to significantly address the housing needs of the community's poorest and most vulnerable residents.

For entitlement/consortia grantees: Specify the activities that the jurisdiction plans to undertake during the next year to address the housing and supportive services needs identified in accordance with 91.215(e) with respect to persons who are not homeless but have other special needs. Link to one-year goals. (91.220(2))

Please see above.

MA-40 Barriers to Affordable Housing - 91.410, 91.210(e)

Describe any negative effects of public policies on affordable housing and residential investment

The incorporated and unincorporated jurisdictions within the County face barriers to affordable housing that are common throughout the Bay Area. High on the list is the lack of developable land, which increases the cost of available real estate and increases housing development costs. Local opposition is another common obstacle as many neighbors have strong reactions to infill and affordable housing developments. Their opposition is often based on misconceptions, such as unforeseen increases in crime; erosion of property values; increase in parking and traffic congestion; and overwhelmed school safety. However, in order to ensure a healthy economy, the region must focus on strategies and investment that provide housing for much of the region's workforce – for example, salesclerks, secretaries, firefighters, police, teachers, and health service workers – whose incomes might significantly limit their housing choices.

Even when developments produce relatively affordable housing, in a constrained housing supply market, higher income buyers and renter households generally outbid lower income households. So, a home's final sale or rental price will generally far exceed the projected sales or rental costs. Public subsidies are often needed to guarantee affordable homes for LMI households.

Negative Effects of Public Policies on Affordable Housing and Residential Investment

The County identified several constraints to the maintenance, development, and improvement of housing and affordable housing in its 2015-2022 Housing Element update:

- Land use controls, including the General Plan, which governs unincorporated residential land use and development potential;
- The countywide growth management policies, referred to as the "Joint Urban Development Policies," shared by the County, cities, and LAFCO;
- The Land Use Plan policies, also referred to as the Land Use Element;
- The Zoning Ordinance;
- The County's subdivision ordinance; and
- The County regulation of single building sites.

Other specific development standards such as parking requirements and height limits, any growth control measures employed, policies and regulations regarding secondary dwelling units, and density bonuses.

Barriers to affordable housing in the region are examined during the process and creation of the AI. During this process, collaborating jurisdictions in the County identified the following priority factors for affordable housing to be:

- Displacement of residents due to economic pressures;
- Loss of affordable housing;
- Land use and zoning laws;

- Income discrimination;
- Community opposition;
- Availability, location, size, and type of affordable units;
- Lack of affordable, accessible housing in a range of unit sizes;
- Lack of access to opportunity due to high housing costs;
- Lack of affordable housing for individuals who need supportive services;
- Lack of assistance for housing accessibility modifications;
- Lack of resources for fair housing agencies; and
- Private discrimination.

MA-45 Non-Housing Community Development Assets - 91.410, 91.210(f)

Introduction

Strategies for increasing the housing supply must take into account a jurisdiction's jobs/housing balance, which is defined as the ratio of number of jobs to number of housing units in a given area. A more precise ratio is between the number of jobs and the number of employed residents, as some households have no workers while others have multiple workers. There should not only be a sufficient amount of housing at a range of prices, but also a variety of housing types appropriate for a range of needs and in locations that allow for access to transportation and employment opportunities. If there is an imbalance of appropriate housing for the number of employees in an area, the result can be longer commutes and greater traffic congestion as employees must then commute to places of employment.

Non-housing community development incentives and programs supported by the County include:

- The California Capital Access Program (CalCAP), which are small business loans for businesses that do not otherwise qualify for loans under customary banking practices.
- Registered Warrants and Tax Liability that provides additional investment opportunities.
- Silicon Valley Economic Development Alliance, which is a regional partnership of a four county area that brings together public and private resources.

The County provides a resource sheet on employment training resources found at: <https://www.sccgov.org/sites/oir/Documents/emplymt-trng-resources.pdf>

Describe the jurisdiction's need for Public Improvements:

Stakeholders at each of the ConPlan Regional Public Forums highlighted the lack of affordable and accessible transportation services in the County. Participants in the forums also emphasized the need for:

- Transit service expansion and bus service for seniors and homeless;
- Improvements to public infrastructure and facilities;
- Improve interim housing and services options for homeless population;
- Recreation and open spaces; and
- Mental health centers.

REGIONAL NEEDS SURVEY

Survey respondents rated the level of need for infrastructure improvements. The highest rated improvement was the cleanup of contaminated and or abandoned properties and buildings. Other high priorities identified include:

- Street improvements;
- Lighting improvements; and
- Water/sewer improvements.

Economic Development Market Analysis

As housing prices increase, the value of household income decreases. One prime example is that the inflation-adjusted value of the federal minimum wage has fallen by more than a third from its peak and is currently about 20% less than it was in 1981. Thus, the federal minimum wage has lost value and has not kept up with the rising cost of housing such as rent. Even in states such as California where the state minimum wage exceeds the federal minimum wage, one full-time minimum wage job is not enough for a household to afford a two-bedroom unit. As was discussed in MA-05, in the San José-Sunnyvale-Santa Clara, CA HUD Metro Fair Market Rent Area, renter households must earn higher than average wages in order to afford an apartment unit.

As shown in Table 45 below, the educational attainment for Urban County residents 25 years of age and older (184,107 individuals) is as follows:

- 7.0% have not graduated high school;
- 12.2% have graduated high school (including equivalency), but no further education;
- 17.0% have some college but no degree;
- 7.1% have an associate degree;
- 29.3% have a bachelor’s degree; and,
- 27.5% have a graduate or professional degree.

Overall, 93% of Urban County residents over the age of 25 have at least a high school diploma or higher, and 56.8% have a bachelor’s degree or higher.

Table 32 - Business Activity (Urban County)

Business by Sector	Number of Workers	Number of Jobs	Share of Workers %	Share of Jobs %	Jobs less workers %
Agriculture, Mining, Oil & Gas Extraction	1,763	2,344	2%	3%	1%

Educational Attainment	Median Earnings in the Past 12 Months
Less than high school graduate	\$22,034
High school graduate (includes equivalency)	\$30,723
Some college or Associate degree	\$41,755
Bachelor's degree	\$75,389
Graduate or professional degree	\$105,409

Data Source: 2011-2015 ACS

Based on the Business Activity table above, what are the major employment sectors within your jurisdiction?

As show in Table 39, the major employment sectors in the Urban County include Education and Health Care Services (18% or 16,569 jobs), Professional, Scientific, Management Services (17% or 15,232 jobs), Arts, Entertainment, Accommodations (13% or 12,182 jobs), and Retail Trade (10% or 9,107 jobs). Fifty-eight percent (58%) of the total jobs (53,090 jobs) in the Urban County are produced by these four employment sectors.

Describe the workforce and infrastructure needs of the business community:

Workforce Needs

The unemployment rate for the Urban County was 6.23% in according to the 2011-2015 ACS. This compares with an unadjusted unemployment rate of 9.9% for the entire state of California during the same period.

Infrastructure Needs

The economic health and the social well-being of a community is often reflected in the quality of its public infrastructure, including roads and highways, public transit systems, sewer and sewage treatment systems, water distribution systems, schools, parks and recreation areas, libraries, and other public buildings. Adequate public infrastructure is an important foundation for a healthy economy. Maintenance and expansion of public infrastructure in the County is not keeping pace with growth or with the deterioration of existing facilities. In the County’s General Plan, policies have been adopted and recommendations for implementation have been made to complete the

connection between the county government and the individual jurisdiction's infrastructure needs and the overall health of the County's and jurisdiction's economy.

Describe any major changes that may have an economic impact, such as planned local or regional public or private sector investments or initiatives that have affected or may affect job and business growth opportunities during the planning period. Describe any needs for workforce development, business support or infrastructure these changes may create.

There is a substantial regional effort lead by the County and the Santa Clara Valley Open Space Authority (OSA) to conserve Santa Clara Valley's farmland and ranchland. The Santa Clara Valley Agricultural Plan discusses strategies to further reduce greenhouse gas emissions by reducing conversion of working lands and focusing development into existing urban areas.

The Santa Clara Valley Transportation Authority (VTA) is a regional independent transit district that primarily does business in the Silicon Valley. The VTA Strategic Plan provides direction for future routes, public and private partnerships, sustainability goals, and ultimately reduce congestion and improve air quality.

The Bay Area Rapid Transit (BART) to San José project represents a final link to complete the 20-mile gap in the regional rail system around San Francisco Bay and tie together the region's three major metropolitan centers: San José, San Francisco, and Oakland.

In 2018, a new BART system was brought to the Berryessa neighborhood of North San José. The BART expansion also included a tunnel under Downtown San José and ultimately end near San José International Airport. Extension of the BART to the City of San José on the south end of the San Francisco Bay is into, perhaps, its most positive stage of development and realization. After years of stalled progress, funding sources are now identified and with a procurement program in place, the project developers are exploring signal bore options for the underground stations and track alignment ahead of plan start of construction in 2019.

Figure 1: Proposed BART Extension

How do the skills and education of the current workforce correspond to employment opportunities in the jurisdiction?

As was previously discussed, in the Urban County 56.8% of residents 25 years and older have a bachelor’s or higher. According to the median annual wages, residents in the Urban County who have a high school diploma or less can only expect to be employed in occupations that will provide them with incomes in the 0-50% AMI range.

Describe any current workforce training initiatives, including those supported by Workforce Investment Boards, community colleges and other organizations. Describe how these efforts will support the jurisdiction's Consolidated Plan.

There are several workforce training initiatives available to residents in the County. The Silicon Valley Workforce Investment Network’s Work2Future is the local administrative arm of the Workforce Innovation and Opportunity Act (WIOA). Work2Future operates one-stop centers that serve the areas of San José, Campbell, Morgan Hill, Los Altos Hills, Gilroy, Los Gatos, Saratoga, Monte Sereno, and the unincorporated areas of the County. The Department of Labor is the main funding stream for the centers. Other sources include state, local, and federal grants and corporate support. Strategically positioned within the Office of Economic Development, Work2Future addresses the workforce and economic development needs of the local area, in

collaboration with small and large businesses, educational institutions and community-based organizations.

The WIOA is updated biennially, and a local plan modification was introduced on March 15, 2019. Required components for local plan modifications include the following:

- Coordination of services for CalFresh recipients;
- Coordination of services with local Child Support Agency;
- Strategies to enhance Competitive Integrated Employment; and
- Services for English-language learners, the foreign-born and refugees.

Required components for the Regional Plan modifications include efforts to align, coordinate, and integrate reentry and workforce services for the formerly incarcerated and other justice-involved individuals.

Work2Future supports regional collaborative partnerships that include employers from priority industry sectors and targets leveraged investments in quality training in these sectors. Its regional economic and workforce analysis shows San José having great influence on the regional economy. While the report forecasts long-term job growth in most industries, it identifies the following priority industry sectors:

- Health;
- Advanced Manufacturing; and
- Information and Communication Technology and Digital Media.

Work2Future's Business Services Plan supports its priority industry sectors through existing and new regional workforce development networks and industry sector partnerships. Proactive rapid response through layoff aversion and Trade Adjustment Act assistance are also key components of the plan. Work2Future adult strategies emphasize career pathway approaches to workforce development in growth industry sectors utilizing earn-and-learn approaches. Its plan includes a robust business service operation that supports these types of training:

- Entrepreneurship;
- Customized and on-the-job training;
- Registered apprenticeship training; and
- Technology-based training and attainment of industry recognized certificates and credentials.

Their Plan commits at least 25% of their WIOA Adult and Dislocated Worker funds toward these training approaches and commits to serving all populations. Work2Future's youth strategies focus on collaboration with its youth partners to increase high school completion and support higher education and training opportunities in Science, Technology, Engineering and Math.

Does your jurisdiction participate in a Comprehensive Economic Development Strategy (CEDS)? If so, what economic development initiatives are you undertaking that may be coordinated with the Consolidated Plan? If not, describe other local/regional plans or initiatives that impact economic growth.

No, the County does not participate in a CEDS.

Discussion

See discussion above.

MA-50 Needs and Market Analysis Discussion

Are there areas where households with multiple housing problems are concentrated? (include a definition of "concentration")

Housing problems disproportionately affect low income and minority populations. For the disproportionate needs by racial/ethnic group, please see the discussion for NA-15, NA-20, and NA-25. Below is a summary of the disproportionate needs experienced by LMI households:

- 87.5% of Pacific Islander households in the 30-50% AMI category experience housing problems compared to 74.1% of the jurisdiction as a whole. This is the only category that meets the HUD standard for disproportionate needs, although it represents a small sample size. Two hundred and ten (210) out of the 240 households in this category have housing problems, a small number of the 71,895 households in the jurisdiction category as a whole.

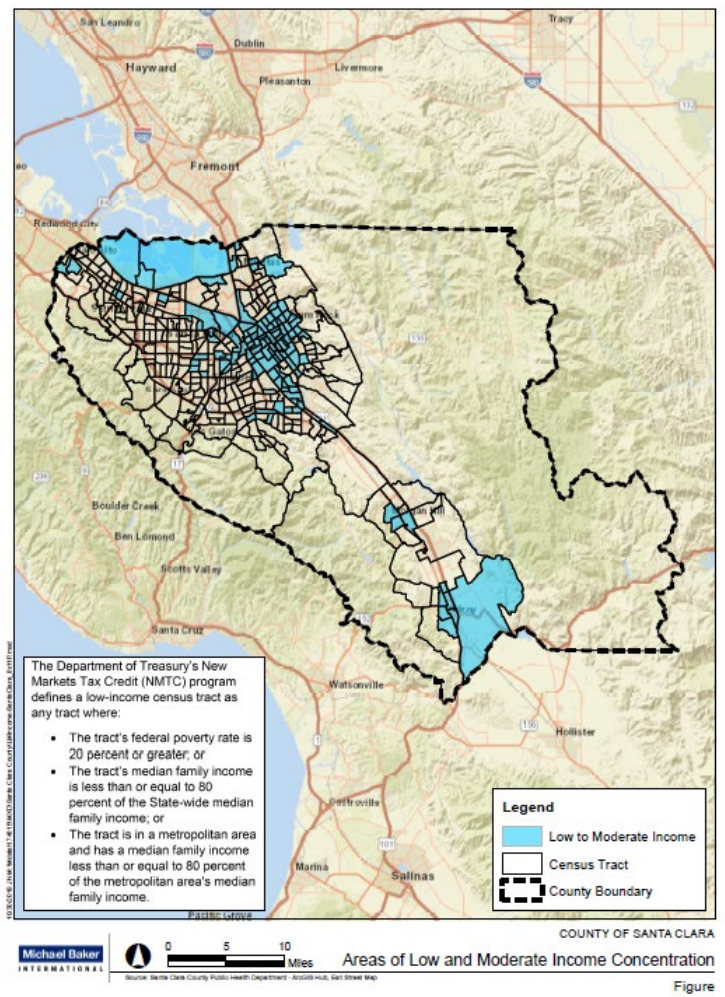

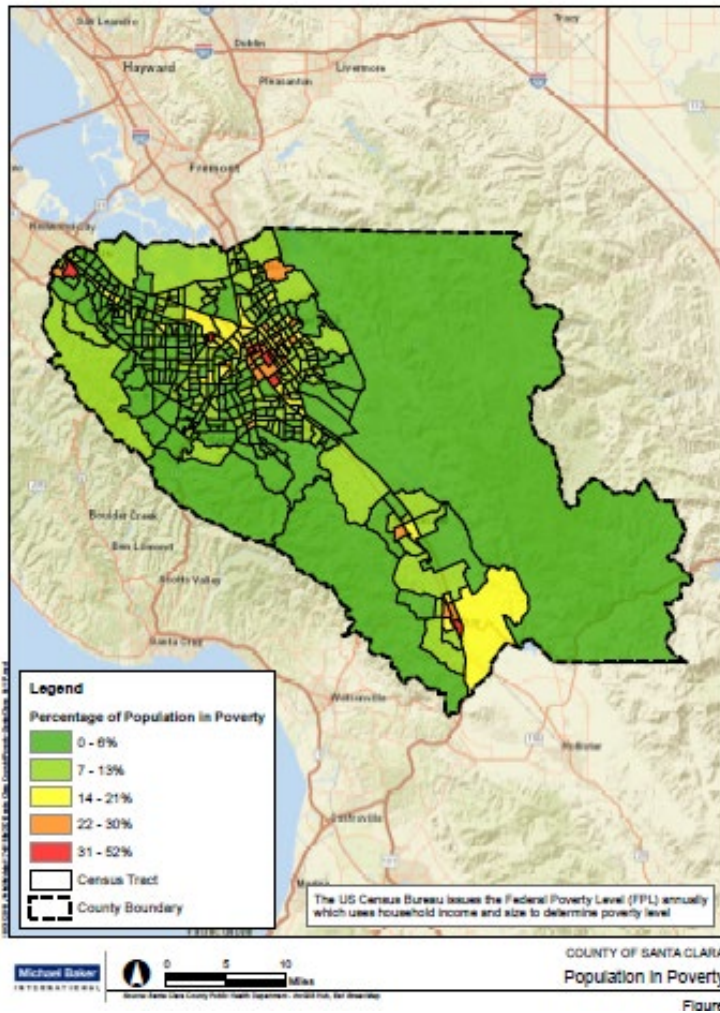

No other group meets the 10% HUD threshold, however, there are several groups effected more than others:

- Almost 90% of Black/African American households and 88% of Hispanic households within the 0-30% AMI category experience housing problems compared to 80% of the jurisdiction as a whole.
- Over 80% of Hispanic households and 78% of Black/African American households within the 30-50% AMI category experience housing problems compared to 74% of the jurisdiction as a whole.

Are there any areas in the jurisdiction where racial or ethnic minorities or low-income families are concentrated? (include a definition of "concentration")

Please see NA-30. Maps have been provided below for LMI and Poverty.

Map 3: Population in Poverty and Areas of Low- and Moderate-Income Concentration

What are the characteristics of the market in these areas/neighborhoods?

The County’s housing costs are among the highest in the nation. Multiple jurisdictions within the County – Los Altos, Saratoga, Los Gatos, and Morgan Hill - fall within the most expensive markets. (See MA-05.)

MA-60 Broadband Needs of Housing occupied by Low- and Moderate-Income Households - 91.210(a)(4), 91.310(a)(2)

Describe the need for broadband wiring and connections for households, including low- and moderate-income households and neighborhoods.

The Regional Needs Survey for the County included a few questions on broadband access in order to better understand the issue in the region. When asked if there were common or pressing broadband internet problems, the most common response was yes. Furthermore, respondents answered “No” 31.23% of the time when asked if LMI areas had adequate access to broadband compared to just 19.96% that said “Yes” (48.81% answered “Don’t Know”).

When asked to expand upon problems with broadband access, there were many responses pointing to inadequate service that was spotty or too slow in the County. In addition, respondents noted that some areas had such limited access that only one provider was available for their region. Others pointed to high costs as a main broadband issue.

When asked how broadband access could be improved, many pointed towards making advanced infrastructure more accessible. Fiber optics, for example, improve download speeds and clarity, however, these services are more expensive.

Describe the need for increased competition by having more than one broadband Internet service provider serve the jurisdiction.

The County has a need for increased competition between broadband internet providers. This is shown by responses in the Regional Needs Survey, where many cited that in some cases only one provider was available for their area. Others stated that Comcast had too much power, and that the lack of options allowed them to charge more than what was necessary. Overall, increased competition may help the market in the area, and help more households access the right services for their needs, including those in LMI households.

MA-65 Hazard Mitigation - 91.210(a)(5), 91.310(a)(3)

Describe the jurisdiction's increased natural hazard risks associated with climate change.

With increasing temperatures and more intense dry seasons, wildfires present an immediate risk for the County and its surrounding areas. This is highlighted by the North Bay Fires of 2017, one of the largest wildfires on record for the region. Another natural hazard associated with increasing temperatures and more intense dry seasons in the County is the increase in drought periods and heat waves. In addition to wildfires, the area is also subject to heavy storms as a result of climate change. These storms cause many problems in the area, such as flooding and mudslides. While not directly tied to climate change, earthquakes remain as an increased hazard risk for the County and surrounding areas.

Describe the vulnerability to these risks of housing occupied by low- and moderate-income households based on an analysis of data, findings, and methods.

Land development on floodplains is less expensive than in areas devoid of increased risk. Therefore, many LMI families can only afford households with an increased risk of flooding, which also subjects them to high flood insurance costs. The County has this issue in its jurisdictions as well. For example, the City of Gilroy's LMI and Minority concentrated Census Tracts almost entirely overlap with the floodplain for the area, according to the City's Hazard Mitigation Plan. Overall, LMI households are typically at a higher risk and are more vulnerable to natural hazards than wealthier households.

For the County overall, there are a couple of minor, intermittent areas of land that are present in a 100-year floodplain. However, there are two larger, more continuous areas of the County which are present in this 100-year floodplain, which represents a higher flood risk. This FEMA map that is present in the Hazard Mitigation Plan shows one large flood area towards the Northwest of the county, and another at the Southern point of the County. When examining the LMI Concentration map that has already been presented in MA-50, it becomes clear that these areas overlap with one another. The plan says that 10% of people in Census Tracts that intersect with the 100-year floodplain have an income of \$20,000 or less.

Strategic Plan

SP-05 Overview

Strategic Plan Overview

The ConPlan goals below represent high priority needs for the County and serve as the basis for strategic actions. Strategic Plan goals and descriptions have been prepared and will be followed over the next five years. The 2020-2025 ConPlan priority needs and goals, listed in no particular order, follow:

Priority Needs:

1. Affordable housing;
2. Vital services and homelessness prevention;
3. Assistance for families and individuals in transition from homelessness;
4. Increase in family income;
5. Assistance for special needs populations (including seniors and people with disabilities, who are homeless, live with HIV/AIDS, and have survived domestic violence);
6. Employment and workforce opportunities;
7. Improvements to aging community facilities and public infrastructure; and
8. Fair housing.

Goals:

1. Increase affordable and supportive housing;
2. Promote fair housing Countywide;
3. Maintain and expand activities designed to prevent and reduce homelessness;
4. Preserve existing affordable housing;
5. Provide essential services for special needs populations;
6. Maintain, improve, and expand community facilities and spaces; and
7. Strengthen employment and workforce opportunities.

The ConPlan update coincides with the development of the first year 2020-21 Annual Action Plan. The County awards CDBG and HOME funding to public entities and nonprofit agencies that provide public services and housing for LMI and special needs households that address County priorities. The County operates its public service grants on a five-year grant funding cycle for CDBG.

SP-10 Geographic Priorities - 91.415, 91.215(a)(1)

Geographic Area

The County does not have a designated target area. All project funding shall benefit the entire county-wide region.

Table 36 - Geographic Priority Areas

		Area Name:	Countywide
1	Area Type:		Regional Target area
	Other Target Area Description:		
	HUD Approval Date:		
	% of Low/Mod:		
	Revital Type:		
	Other Revital Description:		
	Identify the neighborhood boundaries for this target area.		
	Include specific housing and commercial characteristics of this target area.		
	How did your consultation and citizen participation process help you to identify this neighborhood as a target area?		
	Identify the needs in this target area.		
	What are the opportunities for improvement in this target area?		
	Are there barriers to improvement in this target area?		

General Allocation Priorities

Describe the basis for allocating investments geographically within the state.

SP-25 Priority Needs - 91.415, 91.215(a)(2)

Priority Needs

Table 37 – Priority Needs Summary

1	Priority Need Name	Affordable Housing
	Priority Level	High
	Population	Extremely Low Low Moderate Large Families Families with Children Chronic Homelessness Individuals veterans Elderly Persons with Mental Disabilities Persons with Physical Disabilities Persons with Developmental Disabilities
	Geographic Areas Affected	Countywide
	Associated Goals	Increase affordable and supportive housing. Preserve existing affordable housing.
	Description	Nearly 39% of households (or 242,035 households) in the County are extremely low income, low income , or moderately low income, with incomes ranging from 0-80% area median income (AMI). The 2019 PIT Count identified a total of 9,706 persons experiencing homelessness. As stated in the Needs Assessment, cost burden is the most common housing problem, with 36% of households in the County experiencing either cost burden or severe cost burden. Among owner-households, 29% are cost burdened and 12% are severely cost burdened. Among renter-households, 45% are cost burdened and 22% are severely cost burdened. When reviewing the 2015-2020 ConPlan the number of cost burden households rose by 11% particularly with the renter-households. From 2015 to 2020 the number of renter-households who were cost burdened rose 20%.
	Basis for Relative Priority	Qualitative feedback collected through the regional forums and regional community needs survey, which were substantiated by quantitative data reported in the Needs Assessment and Market Analysis, served as the basis for prioritization. The following were all considered highly important: <ul style="list-style-type: none"> • Affordability particularly for the extremely low income; starter homes are too expensive • Not enough affordable housing • Diversity of housing types for a diverse population are not available • Support for transitioning homeless i.e. financial, medical, and social • Affordable housing zoning

2	Priority Need Name	Vital services and homelessness prevention
	Priority Level	High
	Population	Extremely Low Low Moderate Large Families Families with Children Elderly Frail Elderly Chronic Homelessness Individuals Mentally Ill Chronic Substance Abuse Veterans Persons with HIV/AIDS Victims of Domestic Violence Unaccompanied Youth Persons with Mental Disabilities Persons with Physical Disabilities Persons with Developmental Disabilities Persons with Alcohol or Other Addictions Persons with HIV/AIDS and their Families
	Geographic Areas Affected	Countywide
	Associated Goals	Maintain and expand activities designed to prevent and reduce homelessness.
	Description	The 2019 PIT Count identified a total of 9,706 persons experiencing homelessness, and more than four in five persons experiencing homelessness were unsheltered.
	Basis for Relative Priority	Qualitative feedback collected through the regional forums and regional needs survey, which were substantiated by quantitative data reported in the Needs Assessment and Market Analysis, served as the basis for prioritization. Creating an inclusive Anti-Homeless Strategy is vital for the County, particularly including special needs populations. Regional meeting input included the following issues/solutions: <ul style="list-style-type: none"> ▪ Support is needed for other at-risk homeless due to high cost of living. i.e. college students, former homeless, those who cannot live alone, and those with a criminal history. ▪ Provide safe parking areas for unsheltered homeless populations having vehicles and RVs ▪ Develop a comprehensive Wrap-Around Services program for a variety of social service organizations to use. ▪ Increase the number of shelters in the County. ▪ Greater communication and integration of social service entities.

3	Priority Need Name	Assist families and individuals in transition from homelessness
	Priority Level	High
	Population	Extremely Low Income Low Income Moderate Income Large Families Families with Children Chronic Substance Abuse Veterans Persons with HIV/AIDS Victims of Domestic Violence Persons with Alcohol or Other Addictions Persons with HIV/AIDS and their Families
	Geographic Areas Affected	Countywide
	Associated Goals	Maintain and expand activities designed to prevent and reduce homelessness. Provide essential services for special needs populations.
	Description	Families in transition are struggling to make it because: their household income is low, lack of supportive housing or permanent affordable housing or they have been displaced by redevelopment or have been evicted. Solutions for families that are at risk of homelessness are desperately needed. Regional meeting input included the following issues/solutions: <ul style="list-style-type: none"> • More transitional housing and programs for families in transition • Programs that support families so they can remain in their homes • Local and regional support for displacement policies
	Basis for Relative Priority	Qualitative feedback collected through the regional forums and regional needs survey, which were substantiated by quantitative data reported in the Needs Assessment and Market Analysis, served as the basis for prioritization.
4	Priority Need Name	Increase family income
	Priority Level	High
	Population	Extremely Low Low Moderate Large Families Families with Children Persons with Alcohol or Other Addictions Persons with HIV/AIDS and their Families Non-housing Community Development Economic development
	Geographic Areas Affected	Countywide

	Associated Goals	Maintain and expand activities designed to prevent and reduce homelessness. Provide essential services for special needs populations.
	Description	There is a specific need to support services and facilities that could increase a family's earning capacity. LMI households and special needs populations require a multifaceted network to address needed professional, vocational, and life skills training. This coupled with programs and policies that stabilize rents and create and financial planning, LMI households will begin to plan more effectively for rainy-day times and misfortunate events.
	Basis for Relative Priority	Qualitative feedback collected through the stakeholder interviews, regional public meetings and the Regional Needs Survey, which were substantiated by quantitative data reported in the Needs Assessment and Market Analysis, served as the basis for prioritization.
5	Priority Need Name	Assist special needs populations (including seniors and people with disabilities and who are homeless, live with HIV/AIDS, and survived domestic violence)
	Priority Level	High
	Population	Extremely Low Income Low Income Moderate Income Large Families Families with Children Chronic Substance Abuse Veterans Persons with HIV/AIDS Victims of Domestic Violence Persons with Alcohol or Other Addictions Persons with HIV/AIDS and their Families
	Geographic Areas Affected	Countywide
	Associated Goals	Provide essential services for special needs populations.
	Description	The number of special needs individuals with mental, behavior health issues is growing. Most local Housing Element reports do not provide guidance for special needs populations. Regional social service agencies report: <ul style="list-style-type: none"> • there is increasing at-risk youth and victims of domestic violence populations • many neighborhoods do not have access to vital services, and • there is a lack of aging services.
	Basis for Relative Priority	Qualitative feedback collected through the stakeholder interviews, regional public meetings and the Regional Needs Survey, and local and regional Housing Elements, which were substantiated by quantitative data reported in the Needs Assessment and Market Analysis, served as the basis for prioritization.

6	Priority Need Name	Employment and workforce opportunities
	Priority Level	Medium
	Population	Extremely Low Low Moderate Large Families Families with Children Persons with Alcohol or Other Addictions Persons with HIV/AIDS and their Families Non-housing Community Development Economic development
	Geographic Areas Affected	Countywide
	Associated Goals	Provide essential services. Improve community facilities and infrastructure.
	Description	Low- and moderate-income households and individuals living in temporary housing need essential workforce development and training. Increasing household earning capacity and affording housing are tied to employment and transportation opportunities. Such services also include counseling services that assist people with interviewing, finding jobs, computer training and transportation needs.
	Basis for Relative Priority	Community input was collected through stakeholder interviews, regional public meetings and the Regional Needs Survey.
7	Priority Need Name	Improvements to aging community facilities and public infrastructure
	Priority Level	High
	Population	Extremely Low Low Moderate Large Families Elderly Frail Elderly Chronic Homelessness Individuals Families with Children Veterans Persons with Mental Disabilities Persons with Physical Disabilities Persons with Developmental Disabilities Persons with Alcohol or Other Addictions Persons with HIV/AIDS and their Families Victims of Domestic Violence
	Geographic Areas Affected	Countywide

	Associated Goals	Improve community facilities and infrastructure.
	Description	Engagement activities and previous CDBG grantee projects continuously express the need the need for ongoing maintenance and upgrades to local public facilities, such as parks, community centers, educational facilities for children and seniors, youth and senior centers, sidewalks and lighting, water/wastewater infrastructure, and others.
	Basis for Relative Priority	Community input was collected through stakeholder interviews, regional public meetings and the community needs survey served as the basis for prioritization. Energy efficiency, water conservation, and greenhouse gas reduction are all growing policy concerns for the Urban County. Public facilities that serve low income and special needs households should be upgraded to improve their energy and water efficiency.
8	Priority Need Name	Fair Housing
	Priority Level	High
	Population	Extremely Low Low Moderate Large Families Elderly Frail Elderly Chronic Homelessness Individuals Families with Children Veterans Persons with Mental Disabilities Persons with Physical Disabilities Persons with Developmental Disabilities Persons with Alcohol or Other Addictions Persons with HIV/AIDS and their Families Victims of Domestic Violence
	Geographic Areas Affected	Countywide
	Associated Goals	Promote fair housing County-wide
	Description	Fair housing represents an ongoing concern in the County. Of the 1,472 total survey respondents, 192 (16%) said they have experienced some form of housing discrimination. The majority of respondents (29%) who experienced discrimination indicated that race was the primary factor for that discrimination. Additionally, 66% indicated they were discriminated against by a landlord or property manager. Interviews with local service providers indicate that many home seekers and landlords are unaware of federal and state fair housing laws.
	Basis for Relative Priority	Qualitative feedback collected through the regional forums and regional needs survey, which were substantiated by quantitative data reported in the Needs Assessment and Market Analysis, served as the basis for prioritization.

Narrative (Optional)

Based on the Needs Assessment, Market Analysis, and community outreach and engagement activities conducted, goals were established based on the priority needs. Projects will only be considered for funding within the ConPlan period if they address these high priority needs, summarized in the table above. Knowing the region is one of the wealthiest in the nation. The County is tasked with determining how to maintain economic growth while assisting the most vulnerable populations. Reducing the income gap between the upper income and low-and moderate income households is a priority that requires significant services and new opportunities.

The Needs Assessment and Market Analysis, in concert with the qualitative data collected through the surveys, forums, and meetings, highlight the Urban County's clear and detailed need for investment in economic development, affordable housing, and appropriate assistance for the homeless and other special need groups.

SP-30 Influence of Market Conditions - 91.415, 91.215(b)

Table 38 – Influence of Market Conditions

Affordable Housing Type	Market Characteristics that will influence the use of funds available for housing type
Tenant Based Rental Assistance (TBRA)	According to the Needs Assessment, 36% of households in the County experiencing either cost burden or severe cost burden and paying more than 50% of their income toward housing costs. Nearly 39% of households (or 242,035 households) in the County are extremely low income, low income, or moderately low income
TBRA for Non-Homeless Special Needs	As discussed in the Needs Assessment and Market Analysis, special needs populations generally face unique housing needs, such as physical limitations, low household incomes, and rising costs of healthcare and/or childcare. Housing affordability may be a key issue for those living on fixed incomes. High housing costs within the County can make it difficult to transition from care facilities or group homes to private rental units without rental subsidies. This may put those special needs groups at a higher risk of becoming homeless.
New Unit Production	There are currently 157,875 units in the County that are affordable for households earning 80% AMI or less, yet there are 242,035 households within this income bracket in need of affordable housing. In addition, the 2019 PIT Count identified a total of 9,706 persons experiencing homelessness. This reflects a total large deficit of affordable housing units for LMI households. The production of new units, rehabilitation of vacant/deteriorated units is an important tool for growing the affordable housing stock.
Rehabilitation	According to the Needs Assessment and Market Analysis, 65% of the County’s housing stock (over 427,000 homes) is over 40 years old and may require maintenance and repair.
Acquisition, including preservation	Within the Urban County additional affordable housing units are needed to satisfy the housing needs of the population earning below 80% AMI. With a decreasing amount of vacant land for new development within existing jurisdictions, acquisition and preservation are important tools for growing the affordable housing stock.

SP-35 Anticipated Resources - 91.420(b), 91.215(a)(4), 91.220(c)(1,2)

Introduction

Table 39 - Anticipated Resources

Program	Source of Funds	Uses of Funds	Expected Amount Available Year 1				Expected Amount Available Remainder of ConPlan \$	Narrative Description
			Annual Allocation: \$	Program Income: \$	Prior Year Resources: \$	Total: \$		
CDBG	Public - Federal	Housing Rehab Economic Development Housing Public Facilities Public Services Admin and Planning	\$1,500,000	0	0	\$1,500,000	\$6,000,000	CDBG funds will be used for the creation and/or preservation of affordable units for LMI households and for public services that benefit LMI and special needs households.
HOME	Public - Federal	Acquisition Homebuyer assistance Homeowner rehab Multifamily rental new construction Multifamily Rental rehab New construction for ownership TBRA	\$950,000	0	0	\$950,000	\$3,800,000	This program is designed exclusively to create and preserve affordable housing for low income households.

Explain how federal funds will leverage those additional resources (private, state, and local funds), including a description of how matching requirements will be satisfied

Entitlement Funds

Leverage, in the context of entitlement funding, means bringing other local, state, and federal financial resources to maximize the reach and impact of the Urban County's HUD Programs. HUD, like many other federal agencies, encourages the recipients of federal monies to demonstrate that efforts are being made to strategically leverage additional funds in order to achieve greater results. Leverage is also a way to increase project efficiencies and benefit from economies of scale that often come with combining sources of funding for similar or expanded scopes. Funds will be leveraged if financial commitments toward the costs of a project from a source other than the originating HUD program are documented.

Match Requirements

The majority of ConPlan activities carried out by the Urban County involve the leveraging of a variety of resources. For example, during the FY2018-2019 reporting period, the County utilized proceeds from the 2016 Measure A –Housing Bond to match HOME funds. The Housing Bond provides the County with an opportunity to partner with cities, residents, and the affordable and supportive housing community to significantly address the housing needs of the community's poorest. In the last several years, the County has leveraged a total of \$18,584,708 in matching funds.

Other Federal Grant Programs

In addition to the entitlement dollars listed above, the federal government has several other funding programs for community development and affordable housing activities. These include: the Section 8 Housing Choice Voucher Program, Section 202, Section 811, the Affordable Housing Program (AHP) through the Federal Home Loan Bank, and others.

Additionally, the Low-Income Housing Tax Credit (LIHTC) provides a tax incentive to construct or rehabilitate affordable rental housing for low-income households. The LIHTC subsidizes the acquisition, construction, and rehabilitation of affordable rental housing for low- and moderate-income tenants.

It should be noted that in most cases the Urban County would not be the applicant for these funding sources as many of these programs offer financial assistance to affordable housing developers rather than local jurisdictions.

If appropriate, describe publicly owned land or property located within the jurisdiction that may be used to address the needs identified in the plan

County-owned properties provide important but somewhat limited housing development opportunities. The sale of surplus properties to non-government entities for use in housing or mixed use developments is one means of facilitating housing development. Another means is through County retention of land rights and partnership with a private developer to create new housing or mixed use developments. In either case, the use of land for redevelopment, not for a governmental purpose or structure, is governed by the applicable city general plan if located within a city Urban Service Area.

Analysis of the constraints affecting development of individual County-owned properties for affordable housing projects is more difficult than analyzing the constraints affecting residential development on privately-owned lands because:

- Opportunities for redevelopment on County-owned lands is limited by the number of properties and the financial considerations involved in determining the disposition of those properties.
- For those projects that may require city approvals, the parcels involved may not initially have residential designations in the cities' general plans and/or necessary pre-zoning that would indicate how many residential units the cities would allow to be built on them.
- The residential land use designations the cities would apply to County-owned lands proposed to be used for housing are likely to be "planned unit development" designations that allow for a relatively wide range of densities and development types. Estimates of housing development would be case-by-case.

On the whole, use of surplus County-owned properties does not involve significant constraints to housing development. Rather, it promotes housing development if located within the Urban County and meets the needs of both the County and the city within which development is proposed. (Source: County of Santa Clara. "Housing Element Update 2015-2022." See: https://www.sccgov.org/sites/dpd/DocsForms/Documents/HealthElement_2015_Adopted_Final.pdf.)

Discussion

Please see discussion above.

SP-40 Institutional Delivery Structure – 91.415, 91.215(k)

Explain the institutional structure through which the jurisdiction will carry out its ConPlan including private industry, non-profit organizations, and public institutions.

Table 40 - Institutional Delivery Structure

Assess of Strengths and Gaps in the Institutional Delivery System

Strengths

The Urban County manages the institutional delivery structure surrounding the acceptance and allocation of federal grant funds for ConPlan programs. To assure widespread information and access to the programs, especially by LMI households, the funding process involves the participation of an elected official from each of the cities and towns in the Urban County and one representative from the County’s Board of Supervisors. In this way, local policy makers and administrators can identify LMI neighborhoods and evaluate applications accordingly. Through this sharing of responsibilities geographical balance can also be achieved.

The County utilizes a web-based grants management system. This online system reduces burdensome administration, eliminates obscure regulations for potential subrecipients, and expedites the entire process. The web-based monitoring of contracts will assure that LMI households are served as the system will not allow for payments for ineligible uses.

As standard practice, CDBG Entitlement Jurisdictions from throughout the County hold quarterly meetings known as the CDBG Coordinators Group. These meetings are often attended by HUD representatives and their purpose is to share information, best practices, new developments, and federal policy and appropriations updates among the local grantee staff, as well as to offer a convenient forum for HUD to provide ad-hoc technical assistance related to federal grant management. Meeting agendas cover such topics as projects receiving multi-jurisdictional funding, performance levels and costs for contracted public services, proposed annual funding plans, HUD program administration requirements, and other topics of mutual concern.

These quarterly meetings provide the opportunity for the Urban County to consult with other jurisdictions on its proposed use of federal funds for the upcoming Program Year. The CDBG Coordinators Group meetings are often followed by a Regional Housing Working Group meeting, which is open to staff of entitlement and non-Entitlement Jurisdictions. The Working Group provides a forum for jurisdictions to develop coordinated responses to regional housing challenges.

In addition, the Countywide Fair Housing Task Force includes representatives from the Urban County and the other Entitlement Jurisdictions, fair housing providers, legal service providers, and other community service providers. Since its inception, the Task Force has implemented a calendar of countywide fair housing events and sponsors public information meetings, including an accessibility training, first-time homebuyer training, and predatory lending training.

Availability of services targeted to homeless persons and persons with HIV and mainstream services

Table 41 - Homeless Prevention Services Summary

Describe how the service delivery system including, but not limited to, the services listed above meet the needs of homeless persons (particularly chronically homeless individuals and families, families with children, veterans and their families, and unaccompanied youth)

As part of the institutional delivery system, the Urban County participates in the County CoC, a multi-sector group of stakeholders dedicated to ending and preventing homelessness in the County. The CoC’s primary responsibilities are to coordinate large-scale implementation of efforts to prevent and end homelessness in the County. The CoC is governed by the CoC Board, which stands as the driving force committed to supporting and promoting a systems change approach to preventing and ending homelessness in the County.

Destination: Home, a public-private partnership committed to collective impact strategies to end chronic homelessness, serves as the backbone organization for the CoC and is responsible for implementing by-laws and protocols that govern the operations of the CoC. Destination: Home is also responsible for ensuring that the CoC meets the requirements outlined under the Homeless Emergency Assistance and Rapid Transition to Housing Act of 2009.

Describe the strengths and gaps of the service delivery system for special needs population and persons experiencing homelessness, including, but not limited to, the services listed above

The County funds and provides emergency shelters, transitional and supportive housing, and housing for other special needs populations countywide. Although a considerable gap continues to exist, collectively these efforts make strides in closing the gap. The 2019 CAPER reports that CDBG and HOME funds are annually utilized to create more affordable, below-market rate housing and special needs housing. Over the past five years over 2,900 non-homeless and or special needs persons have been assisted. In 2019 three special needs households were provided affordable housing units. The County significantly contributes to affordable housing and housing preservation specifically funding:

- Construction, rehabilitation, and housing preservation;
- Rental subsidies;
- Shelter programs and transitional housing programs;
- Federal tax credit programs for first-time homebuyers through the Countywide Mortgage Credit Certificate (MCC) program; and
- New housing opportunities on surplus County-owned lands.

Over the past 12 months the County’s Board of Supervisors has approved significant capital in permanent supportive housing funds. In addition to this, a 66-unit affordable housing project in

the City of Sunnyvale is under construction, of which 13 units will be set-aside as permanent supportive housing units for those with special needs.

The 2019 Community Plan to End Homelessness in the County, originally prepared by the CoC in 2014, outlines a roadmap for community-wide efforts to end homelessness in the County. The updated Plan included homeless statistics, causes of homelessness, three pillars and proposed strategies. The strategies and action steps included in the plan were informed by members who participated in a series of community summits designed to address the needs of homeless populations. The Plan was created to guide the County, cities, nonprofits, and other community members as they make decisions about funding, programs, priorities, and needs. County progress since 2014 Plan include:

- Helped 8,884 households resolve their homelessness, representing 14,132 people.
- Launched a new homelessness prevention system that now serves 1,000 households annually;
- Led a community-wide campaign that has successfully housed more than 1,600 veterans and engaged nearly 800 private landlords in the effort;
- Voters approved a \$950 million General Obligation Bond to develop affordable and supportive housing and raised another \$100 million in private contributions to support the implementation of the Community Plan;
- Doubled the number of supportive housing units in Santa Clara County; and
- Doubled temporary housing and emergency shelter capacity.

Recent Accomplishments:

- In 2018 97% of families and individuals remained housed while receiving homelessness prevention services. Ninety percent (90%) of families and individuals were stably housed for at least 12 months after they stopped receiving homelessness prevention services.
- The number of households seeking assistance dropped, from 5,486 (2017) to 4,415 (2018), for the first time.
- A priority 2020 goal of the 2014 Plan was to add 6,000 housing units/vouchers (2,146 units/vouchers, 9561 units in the pipeline, and 2,893 units/vouchers) to be completed by 2020. The County is 52% of the way to making this goal.

However, even with such a plan in place, the number of people experiencing homelessness continues to rise. The number of homeless people rose from 7,394 in 2017 to 9,706 in 2019, nearly a 24% increase. The Plan reports the reasons why there is a resurgence in homelessness include:

1. Economic Dislocation;
2. Reduced Social Safety Nets;
3. Failed Housing Policy;
4. Mass Incarceration;

5. Family Instability;
6. Structural Racism; and
7. Individual Causes.

When asking what led an individual to become homeless: lost job; alcohol or drug abuse; eviction; domestic family disputes; and incarceration. (Source: Santa Clara County Homeless Census & Survey: Comprehensive Report (2019), Applied Survey Research.)

Provide a summary of the strategy for overcoming gaps in the institutional structure and service delivery system for carrying out a strategy to address priority needs

The County is striving to improve intergovernmental and private sector cooperation to synergize efforts and resources and develop new revenues for community service needs and the production of affordable housing. Collaborative efforts that are being encouraged include:

- Regular quarterly meetings between Entitlement Jurisdictions;
- Joint jurisdiction Request for Proposals and project review committees; and
- Coordination on project management for projects funded by multiple jurisdictions.

SP-45 Goals - 91.415, 91.215(a)(4)

Goals Summary Information

Table 42 – Goals Summary

Sort Order	Goal Name	Start Year	End Year	Category	Geographic Area	Needs Addressed	Funding	Goal Outcome Indicator
1	Increase affordable and supportive housing	2020	2025	Affordable Housing	Countywide	-Assist families and individuals in transition -Affordable housing -Increase family income	CDBG: \$2,310,000 HOME: \$2,300,000	Rental units constructed: 60 Housing Units
2	Promote fair housing Countywide	2020	2025	Affordable housing	Countywide	-Fair housing -Affordable housing -Assist families and individuals in transition	CDBG: \$240,000	Public service activities other than Low/Moderate Income Housing Benefit: 250 Persons Assisted
3	Maintain and expand activities designed to prevent and reduce homelessness	2020	2025	Homeless, Non-Homeless Special Needs Non-Housing Community Development	Countywide	Vital services and homeless prevention -Assist families and individuals in transition -Increase family income -Assist special needs populations -Emergency relief for vulnerable populations	CDBG: \$500,000	Public service activities other than Low/Moderate Income Housing Benefit: 700 Persons Assisted 125: Homeless shelter
4	Preserve existing affordable housing	2020	2025	Affordable housing	Countywide	Community Services	CDBG: \$2,150,000 HOME: \$1,500,000	Owner-occupied housing Rehabilitation: 180 Housing Units

Sort Order	Goal Name	Start Year	End Year	Category	Geographic Area	Needs Addressed	Funding	Goal Outcome Indicator
5	Provide essential services for special needs populations	2020	2025	Homeless, Non-Homeless Special Needs Non-Housing Community Development	Countywide	-Assist special needs populations -Homes prevention	CDBG: \$1,000,000	-Individuals assisted with housing needs -individuals assisted with rental assistance -facilities/ or programs enhanced for disabilities
6	Maintain, improve, and expand community facilities and spaces	2020	2025	Non-Housing Community Development	Countywide	-Emergency relief for vulnerable populations -Improve aging community facilities and public infrastructure	CDBG: \$800,000	-Public Facility or Infrastructure Activities other than Low/Moderate Income Housing Benefit: 25,000 Persons Assisted
7	Strengthen employment and workforce opportunities	2020	2025	Non-Housing Community Development	Countywide	-increase family income -employment and workforce opportunities	\$500,000	Jobs created Programs created Individuals receiving job training
TOTALS							CDBG: \$7,500,000 HOME: \$4,750,000	

Table 43 – Goal Descriptions

Proposed 2020-2025 Consolidated Plan Goals & Description		
1	Goal Name	Increase affordable and supportive housing
	Goal Description	Provide funding for new housing development and or programs that assist low- and moderate-income families with finding housing solutions including programs that increase homeownership, access to affordable rental opportunities, development of housing for special needs populations, support integrated housing solutions and plans, and reduce barriers to affordable housing consistent with the County’s Analysis for Impediment to Fair Housing Choice.
2	Goal Name	Promote Fair Housing Countywide
	Goal Description	The County will continue to collaborate with social service entities, surrounding cities, and unincorporated areas to provide assistance for families and individuals seeking counselling and or legal solutions to fair housing and discrimination problems. Funds will also be used for other planning initiatives, such as strategies to further fair housing and safe routes to school infrastructure planning.
3	Goal Name	Maintain and expand activities designed to prevent and reduce homelessness
	Goal Description	Provide needed public services that assist individuals and families in the following ways: crisis intervention, crime prevention, homeless prevention, services for at-risk families, shelter in-take services, senior and special needs services, mental and preventative health services, job training and search assistance for those who are homeless or at -risk of homelessness, and other vital social services.
4	Goal Name	Preserve existing affordable housing
	Goal Description	Provide programs and funding for housing maintenance and rehabilitation including activities related to essential exterior and interior home repairs, given that 69.6% of homes in the County were built in 1980 or earlier. Such activities may also include lead testing and clearance testing, remediation of lead/asbestos hazards of housing units constructed prior to 1978.
5	Goal Name	Provide essential services for special needs populations
	Goal Description	Provide programs and services that increase the quality of life for special needs individuals or households. Special needs populations include senior households, persons with disabilities, domestic violence survivors, large households, female-headed households, and persons who are homeless and/or living with AIDS/HIV.
6	Goal Name	Maintain, improve and expand community facilities and spaces
	Goal Description	Support a higher quality of life through enhancing recreational spaces, supporting community and social service facilities, improve and enhance existing infrastructure such as streets, sidewalks, curbing and other public facilities, safe routes to school infrastructure, and addressing public safety concerns.
7	Goal Name	Strengthen employment and workforce opportunities
	Goal Description	Support programs and or the development or expansion of facilities that provide future employment opportunities for homeless and or low- and moderate-income individuals.

Estimate the number of extremely low-income, low-income, and moderate-income families to whom the jurisdiction will provide affordable housing as defined by HOME 91.315(b)(2)

The Urban County estimates that entitlement funds will be used to provide affordable housing to approximately 60 rental housing units and 180 owner-occupied rehabilitated units over the next five years.

SP-50 Public Housing Accessibility and Involvement – 91.415, 91.215 (c)

Need to Increase the Number of Accessible Units (if Required by a Section 504 Voluntary Compliance Agreement)

Not applicable.

Activities to Increase Resident Involvements

SCCHA is proactive in incorporating resident input into the agency's policy-making process. An equitable and transparent policy-making process that includes the opinions of public housing residents is achieved through the involvement of two tenant commissioners, one being a senior citizen, on the SCCHA board. Furthermore, SCCHA has installed a Resident Counsel which is comprised of five residents from all HUD-funded programs (Multifamily Housing, LIHTC, HOME, public housing, and Section 8). The Resident Counsel works with SCCHA staff on evaluating the effectiveness and efficiency of the agency's rental assistance programs. This grants members the opportunity to provide input on necessary program modifications.

As previously noted, SCCHA has been a Moving to Work (MTW) agency since 2008. In this time the agency has developed 31 MTW activities. The vast majority of their successful initiatives have been aimed at reducing administrative inefficiencies, which in turn opens up more resources for programs aimed at LMI families. The following is excerpted from SCCHA's August 2014 Board of Commissioner's report:

"SCCHA's Family Self Sufficiency (FSS) Program is designed to provide assistance to current SCCHA Section 8 families to achieve self-sufficiency. When a family enrolls in the five-year program, HPD's FSS Coordinator and LifeSTEPS service provider help the family develop self-sufficiency goals and a training plan, and coordinates access to job training and other services, including childcare and transportation. Program participants are required to seek and maintain employment or attend school or job training. As participants increase their earned income and pay a larger share of the rent, SCCHA holds the amount of the tenant's rent increases in an escrow account, which is then awarded to participants who successfully complete the program. SCCHA is currently in the initial stages of creating a pilot successor program to FSS under the auspices of its MTW flexibility called Focus Forward."

Is the public housing agency designated as troubled under 24 CFR part 902?

No.

Plan to remove the 'troubled' designation

See discussion above.

SP-55 Strategic Plan Barriers to Affordable Housing - 91.415, 91.215(h)

Barriers to Affordable Housing

The unincorporated and incorporated jurisdictions within the County face barriers to affordable housing that are common throughout the Bay Area. High on the list is the lack of developable land, which increases the cost of available real estate and increases housing development costs. Local opposition is another common obstacle as many neighbors have strong reactions to infill and affordable housing developments. Their opposition is often based on misconceptions, such as a foreseen increase in crime; erosion of property values; increase in parking and traffic congestion; and overwhelmed schools. However, in order to ensure a healthy economy, the region must focus on strategies and investment that provide housing for much of the region's workforce whose incomes might significantly limit their housing choices. In 2020, when the AI is completed a listing of barriers and impediments to fair housing will be included in this document.

Even when developments produce relatively affordable housing, in a constrained housing supply market higher income buyers and renter households generally outbid lower income households and a home's final sale or rental price will generally far exceed the projected sales or rental costs. Public subsidies are often needed to guarantee affordable homes for LMI households.

In the 2020 Economic and General Fund Financial Outlook for Santa Clara County, unaffordable housing remains a long-term challenge for the region as well as California. The ratio of the median home price over the median household income indicates six of the seven least affordable metropolitan statistical areas for homeowners were in California in 2018. San José, Los Angeles, San Francisco, and San Diego were the least affordable followed by New York, Sacramento, and Riverside.

However, housing market activity slowed down in 2019, and the median home price increased just by 2.1%. Rent affordability (rent over income) is also a challenge for the State. Five of the seven least affordable metropolitan areas were also located in California in 2018. Nevertheless, both housing indices have been gradually improving as Californians' income increases. Housing market activities in the County cooled down in late 2018 after rapid increases of home prices and mortgage rates in early 2018. Recent data suggest this was a healthy adjustment and will stabilize over time, assuming no further raising interest rates in the near future. Housing price values growth was projected to slow down to 0.0 percent in 2019 and rise 2 percent by 2023. Legal services, in 2019, include limited scope representation to 750 individuals and families and full-scope representation to 175 individuals and families, placing cases with pro bono attorneys, and program staff for representation in court proceedings, including trial. Additionally, the County developed a house sharing pilot to increase access to affordable housing without incurring the costs or time associated with building additional units.

Strategy to Remove or Ameliorate the Barriers to Affordable Housing

In general, the County’s policies, regulations, permit processes, and related factors do not pose an undue burden or constraint on housing development. The 2020 AI is under development, and the following barriers or impediments to fair housing have been described:

- Displacement of residents due to economic pressures;
- Loss of affordable housing;
- Land use and zoning laws;
- Income discrimination;
- Community opposition;
- Availability, location, size, and type of affordable units;
- Lack of affordable, accessible housing in a range of unit sizes;
- Lack of access to opportunity due to high housing costs;
- Lack of affordable housing for individuals who need supportive services;
- Lack of assistance for housing accessibility modifications;
- Lack of resources for fair housing agencies; and
- Private discrimination.

Other Barriers to Affordable Housing

The County identified several constraints to the maintenance, development, and improvement of housing and affordable housing in its 2015-2022 Housing Element update. These include:

- Land use controls, including the General Plan, which governs unincorporated residential land use and development potential;
- The countywide growth management policies, referred to as the “Joint Urban Development Policies,” shared by the County, cities, and LAFCO;
- The Land Use Plan and policies also referred to as the Land Use Element;
- The Zoning Ordinance;
- The County’s subdivision ordinance;
- The County regulation of single building sites; and
- Other specific development standards such as parking requirements and height limits, any growth control measures employed, policies and regulations regarding secondary dwelling units, and density bonuses.

County Support for Reducing Barriers to Affordable Housing:

Additionally, the Urban County is addressing the barriers to affordable housing by administering or participating in the following programs and ordinances:

Stanford Affordable Housing Fund:

The Stanford Affordable Housing Fund was established in 2000. For each 11,763 square feet of academic development built, Stanford University must either provide one affordable housing unit on campus or make an appropriate cash in-lieu payment. All payments are deposited into an

escrow account for the purpose of funding affordable housing projects within a 6-mile radius of the university. The County maintains the fund and distributes it through a Notice of Funding Availability (NOFA) process. The Stanford Coalition for Planning an Equitable 2035 was created in 2019. Stanford's obligation to fully mitigate its impacts by building affordable housing must be non-negotiable. Stanford must build the number of units listed in the County's draft Conditions of Approval. Stanford also created trip standards and policies for employees living closer to their workplaces. As of 2019 the Stanford Affordable Housing Trust Fund had \$93,037 remaining.

In 2019, Stanford University provided the following information: In 2016 Stanford proposed a new General Use Permit to govern land use on the University's lands in the unincorporated County over the next two decades. The permit would have allowed the University to expand the availability of housing, including affordable housing, and gradually build new academic facilities at a rate of about 1 percent per year to support its mission. The proposal also included a range of features to limit traffic congestion, protect open space, promote sustainable development, and provide accountability measures to the community. During meetings with supervisors in November 2019, Stanford officials indicated the university was no longer requesting credit for existing housing projects and was willing to build or fund 2,172 new workforce units, including 933 affordable units-the same amount of housing including in the County administration recommended conditions of approval. In addition, through a development agreement, some of this housing could have been provided more quickly than through the conditions of approval.

2016 Measure A - Affordable Housing Bond:

In November 2016, County voters approved Measure A – the \$950 million affordable housing bond. The housing bond provides the County with an unprecedented opportunity to partner with cities, residents, and the affordable and supportive housing community to significantly address the housing needs of the community's poorest and most vulnerable residents. It will provide affordable housing for vulnerable populations including veterans, seniors, the disabled, low- and moderate-income individuals or families, foster youth, victims of abuse, the homeless and individuals suffering from mental health or substance abuse issues. The bond proceeds would contribute to the creation and/or preservation of approximately 4,800 affordable housing units.

The Housing Bond will enhance the County's ability to achieve its housing priorities which include:

- Increasing the scope and breadth of supportive housing for special needs populations, including homeless and chronically homeless persons;
- Increasing the supply of housing that is affordable to extremely low income (ELI) households; and
- Improving coordination and collaboration among the County, the cities, other governmental agencies, and the affordable housing community.

The County and its partners have moved quickly to utilize the bond funds, which are projected to fund 120 new affordable housing developments over ten years, including 4,800 new units

dedicated to extremely low-income households and individuals, families exiting homelessness, and other underserved populations.

2016 Measure A Progress:

On November 8, 2016, the people of the County approved Measure A, a proposition authorizing the County to issue up to \$950 million in general obligation bonds to acquire or improve real property for the purpose of providing affordable housing for vulnerable populations throughout the County. We provide the following highlights about the Measure A Program (Program):

- Program funds are targeted to help construct 4,800 units of affordable housing, in addition to assisting about 235 families to secure loans to finance their first homes.
- In October 2017, after adopting a range of program guidelines over the use of Program funds, the County issued its first bond tranche of \$250 million.
- As of September 30, 2019, the Program has committed over \$271 million, of which \$25 million is committed to the first-time homebuyer loan program, \$11.9 million has been committed to a Supportive Housing Fund for predevelopment loans, and about \$234 million has been committed to 19 housing developments. In year 2 of implementation there were 1,437 new apartments built, 484 units were renovated, 19 new housing developments and \$25 million was spent on funding homebuyers through a first-time homebuyer's program.
- These housing developments are in the process of adding 1,416 units of affordable housing included in the County's housing goals, and an additional 203 units of low-income housing that are not addressed in the Program's housing goals (as discussed in the Housing Program Goals section below).
- As detailed in the program overview dashboard below, this means that 28.5% of all bond proceeds are financing the development of 29.5% of the Program's housing goals.
- In addition, for every dollar invested by the Program, the Program incentivizes an average of \$2.78 from outside investments (Public/Private Leveraging Ratio). Housing Community Development Fund was created to administer Measure A. In 2020 the County allocated \$1,492,125 to pay for four full time employees.

Supportive Housing Fund:

The Supportive Housing Fund is a partnership between the County and Housing Trust Silicon Valley. Funded with \$16.7 million in County funds and \$5 million from Housing Trust, Supportive Housing Fund loans finance acquisition, predevelopment, or construction of permanent housing with supportive services for extremely low income individuals and families and those with special needs.

Flexible Financial Assistance Pool:

This program, administered by the County's OSH, supports clients by eliminating barriers to obtaining housing. The fund will be used to incentivize landlords to rent to clients with weak housing credit or criminal histories; pay utility deposits and fees; provide housing application fees for clients with no or little income; secure motel rooms as interim housing; gain immediate access to detox services; purchase basic furniture and other move-in supplies; hold a unit for up to 60

days during the process of application, housing inspection, and lease execution; pay for special services, equipment, or fees associated with the housing unit; and meet other unique needs. This funding is projected to serve at least 250 households, with an average assistance amount of \$3,000. The on-going cost for this program is \$743,750 annually.

Management Information System for Victim Service Providers:

Funding was approved to implement a shared database system that will help the County manage scarce resources, measure program outcomes, leverage funding, and strategically align resources across the homeless system of care. In 2020 this system development project was funded \$212,400.

Density Bonus Program:

The County maintains a Density Bonus Program fund, established in 1979, and deposits of in-lieu fees paid by developers of housing on lots subject to the 10% density bonus ordinance. The fund balance will be used to increase the supply of LMI housing.

SP-60 Homelessness Strategy - 91.415, 91.215(d)

Describe how the jurisdiction's strategic plan goals contribute to:

Reaching out to homeless persons (especially unsheltered persons) and assessing their individual needs

The County has a supportive housing system in place to combat homelessness and support these populations as well as households on the verge of homelessness. This supportive housing system is overseen by the County's OSH. OSH's mission is to increase the supply of housing and supportive housing that is affordable and available to extremely low income and or special needs households. The OSH supports the County mission of promoting a healthy, safe, and prosperous community by ending and preventing homelessness. The following section outlines additional initiatives for the County in the Strategic Plan, which will use CDBG and HOME funds to supplement the supportive housing system in the area.

The PIT Count is an annual countywide collaborative effort to help assess regional homeless needs. The Urban County participates with other jurisdictions to conduct a biennial countywide homeless count. The data from the Census is used to plan, fund, and implement actions for reducing chronic homeless and circumstances that bring about homelessness. Several formally homeless persons are on the CoC Board. Homeless outreach primarily occurs in the City of San José, although outreach efforts to the rest of the County, including the Urban County jurisdictions, are expected to increase in the next 12 months. The Urban County financially contributes and participates in the countywide Homeless Census survey that took place in 2019 and will financially contribute and participate in the upcoming 2020 survey. The 2019 homeless count identified a total of 9,706 persons experiencing homelessness showing a 23% rise in homeless population. An estimated 82% of all homeless persons in the County remain unsheltered.

Addressing the emergency and transitional housing needs of homeless persons

OSH targets populations for Transitional Housing include:

- Transition youth age 16-24;
- Domestic violence survivors; and
- Those in recovery from substance use disorders.

Supportive services from the County include temporary rent subsidy; case management and/ or counseling; and other types of employment and life skill support. Transitional housing is generally provided for a limited time period, depending on the program - the maximum duration being 24 months. Transitional Housing requires the program participants to pay a portion of their monthly income for rent and usually provides a temporary rent subsidy for the duration of the program.

OSH also created Project Welcome Home program (PWH). This program is the first "*pay for success*" project launched in the State of California. A custom designed and integrated data platform was created to support PWH. The platform identifies the highest need utilizers in the County's systems in order to enroll applicants and begin conducting outreach efforts. The system

also monitors and tracks client's progress in the permanent supportive housing program. The County and Abode Services, a provider of services for homeless residents in the County, serves 150-200 chronically homeless individuals who are also frequent users of the County's emergency services, mental health facilities and jails.

Helping homeless persons (especially chronically homeless individuals and families, families with children, veterans and their families, and unaccompanied youth) make the transition to permanent housing and independent living, including shortening the period of time that individuals and families experience homelessness, facilitating access for homeless individuals and families to affordable housing units, and preventing individuals and families who were recently homeless from becoming homeless again.

Over the last five years the County has rehabilitated 187 owner-occupied units and constructed 59 rental units. Specifically, production of new housing units for special needs households has increased through the construction of several new apartment developments including Morgan Hill Family apartments and Edwina Benner Plaza collectively adding 106 affordable housing units with 28 units set aside as permanent supportive housing. Seven new affordable senior units within Redwoods and Wheeler Manor in the City of Gilroy were constructed for households earning up to 60% of the area median income.

In addition, the County funded or directly assisted over 4,000 persons were assisted with homeless services and or services to prevent homeless.

Community Plan to End Homelessness.

The County partners with the CoC in a coordinated effort to address homelessness in the County. As previously discussed, in fall 2014 the CoC released the Community Plan to End Homelessness in Santa Clara County, which outlined a roadmap for community-wide efforts to end homelessness in the County by 2020. In 2019 a revised 2020-2025 plan was drafted to include updated homeless statistics, causes of homelessness, three policy pillars, details of supportive/affordable housing production and proposed strategies. The strategies and action steps included in the plan were informed by members who participated in a series of community summits designed to address the needs of homeless populations. The plan will guide the County, cities, nonprofits, and other community members as they make decisions about funding, programs, priorities, and needs.

Progress from 2014 to 2019:

- \$950 million was procured through the 2016 Measure A Affordable Housing Bonds;
- 1,537 apartments with supportive services were built;
- A supportive housing system was established;
- 6,937 people found a home; and
- Created a new homelessness prevention system and increased capacity by 340%.

Other efforts to end homelessness include the:

- Creation of outreach teams in San José, Palo Alto, and Gilroy;
- Improvements in Discharge Planning for all area hospitals; and
- Use of a Tenant Based Housing Assistance Program with intensive case management for 200 disabled homeless individuals.

To address the needs of homeless individuals and individuals at risk of homelessness, the Community Plan to End Homelessness (2014 & 2019 update) aims to implement the following strategies:

1. Disrupt systems: Develop disruptive strategies and innovative prototypes that transform the systems related to housing homeless people.
2. Build the solution: Secure the right amount of funding needed to provide housing and services to those who are homeless and those at risk of homelessness.
3. Serve the person: Adopt an approach that recognizes the need for client-centered strategies with different responses for different levels of need and different groups, targeting resources to the specific individual or household.

Help low-income individuals and families avoid becoming homeless, especially extremely low-income individuals and families who are likely to become homeless after being discharged from a publicly funded institution or system of care, or who are receiving assistance from public and private agencies that address housing, health, social services, employment, education or youth needs

BHS provides many forms of assistance for individuals, families, children and young adults, and elderly care and services on the behalf of the County. BHS services are divided into the following program categories:

- Call center;
- Emergency services;
- Inpatient and outpatient services;
- Substance abuse services; and
- Suicide prevention and crisis services/Hotline.

There are many social services located in the County that provide critical assistance to families and individuals in need. Residents can find vital links and connections on the County's website to social services including: transportation, substance abuse and recovery services, clothing, medical, faith-based resource centers, domestic violence, employment, health clinics, childcare, food, nutrition, teen pregnancy, financial counseling, family health, veterans, lead prevention and remediation, LGVTQ issues, and legal services. Links to social services can be found on the BHS website:

https://www.sccgov.org/sites/bhd/info/suts-resources-info/Pages/SUTS_Resources.aspx

SP-65 Lead-based Paint Hazards - 91.415, 91.215(i)

Actions to address LBP hazards and increase access to housing without LBP hazards

The Urban County addresses lead based paint (LBP) hazards by conducting screening and abatement procedures through various rehabilitation programs. The Housing Rehabilitation Program informs all applicants and tenants of rental housing about the dangers and hazards of LBP. The Program conducts visual assessment, paint testing or risk assessment on all of its projects. Lead hazard reduction activities include paint stabilization, interim controls, standard treatments, lead abatement, safe work practices and clearance to confirm that no lead based paint hazards remain when work is complete. The program also requires that all participating contractors must have completed the state training on safe work practices.

The County of Santa Clara Public Health Childhood Lead Poisoning Prevention Program is a state-funded program aimed at identifying and treating children who are at risk for lead poisoning. Their mission is to identify children with elevated blood lead levels, and to subsequently investigate, find, and remediate the source of lead poisoning if possible. The program works with children from birth to age 21, and involves a multidisciplinary team consisting of a coordinator, a public health nurse, a registered environmental health specialist, and a community worker. Through a coordinated team effort, they provide case management for children who have elevated blood lead levels that meet program requirements, and with collaboration with community partners, they aim to lower blood lead levels of all children in the County.

How are the actions listed above related to the extent of lead poisoning and hazards?

The County addresses LBP hazards by conducting screening and abatement procedures through various rehabilitation programs as noted in section MA-20 Housing Market Analysis: Condition of Housing. According to the Market Analysis, building age is used to estimate the number of homes with LBP, as LBP was prohibited on residential units after 1978. Units built before 1980 are used as a baseline for units that contain LBP. Sixty five point six percent (65.6%) of all housing units in the County were built before 1980 and have potential exposure to LBP. As explained in the Needs Assessment, 38.6% of the households in the County are 0-80% AMI. Using this percentage as a baseline, it is estimated that 156,113 LBP units are occupied by LMI families.

How are the actions listed above integrated into housing policies and procedures?

All properties being rehabilitated or acquired for affordable housing are inspected for LBP. No federally funded rehabilitation is allowed to occur without due screening for LBP hazards. The County's Housing Rehab Program conducts visual assessment, paint testing or risk assessment on all of its projects. Lead hazard reduction activities include paint stabilization, interim controls, standard treatments, lead abatement, safe work practices and clearance to confirm that no LBP hazards remain when work is complete.

SP-70 Anti-Poverty Strategy - 91.415, 91.215(j)

Jurisdiction Goals, Programs and Policies for reducing the number of Poverty-Level Families

As stated in the Needs Assessment, over one-third of households (38.6% or 242,035 households) in the County are LMI, with incomes ranging from 0-80% AMI. To address this, the County employs a multi-tiered anti-poverty strategy, with each of the goals and programs described in this plan addressing poverty directly or indirectly. The County, in its continuing effort to reduce poverty, will prioritize funding agencies that provide direct assistance to the homeless and those in danger of becoming homeless. Additionally, the County has made a commitment to improve the communication and service delivery capabilities of agencies and organizations that provided programs to assist the homeless.

Other recent developments since the last ConPlan have helped the city combat poverty. Notably, in 2016 the County approved Measure A, a \$950 million affordable housing bond. This gives the County an opportunity to significantly address the needs of the City's poorest and most vulnerable residents to better access affordable housing. It addresses housing issues for many vulnerable populations including veterans, seniors, the disabled, LMI individuals and families, foster youth, victims of abuse, the homeless and individuals living with mental health disabilities or substance abuse issues. This measure will contribute to the creation and or preservation of an estimated 4,800 affordable housing units.

How are the Jurisdiction poverty reducing goals, programs, and policies coordinated with this affordable housing plan

Historically the County has provided funding to agencies such as Sacred Heart Community Services, LifeMoves, Community Solutions, and several other service providers. Although the Urban County is not currently providing direct funding for economic development or job training projects, the funding provided to these agencies is for housing-related services, which are integral components of the total services provided by these agencies that assist in reducing poverty in the Urban County. One of the most important services of these agencies is to help families obtain stable housing and reduce the percentage of their income paid for housing, allowing them to use a greater percentage of their income for other essential goods and services (food, clothing, medical care, etc.) The services that these agencies provide that assist in the reduction of poverty include:

- Affordable housing information and referral;
- Information and counseling on tenant/landlord issues;
- Shared housing counseling and placement;
- Counseling, shelter services, and general assistance to very low-income or homeless populations;
- Services that address the needs of the frail-elderly, or persons with disabilities; and
- Services that address the needs of low-income children and their families.

Additionally, NOVA is a local nonprofit agency that addresses poverty issues for North County residents, including the Urban County City of Los Altos. To support workforce mobility, NOVA provides:

- Real-time labor market information about in-demand skills;
- Skill-building and enhancements to match market demand;
- Navigation tools for the ever-changing and entrepreneurial new labor market;
- Advocacy for necessary infrastructure to support workers between opportunities, such as unemployment insurance for all and portable benefits; and
- Interconnected support system for multiple career pathways for youth.

Other Countywide programs that serve the Urban County and have a positive impact on the elimination of poverty are the FSS Program administrated by SCCHA and CalWORKS administered by the Social Services Agency of Santa Clara County.

SP-80 Monitoring - 91.230

Describe the standards and procedures that the jurisdiction will use to monitor activities carried out in furtherance of the plan and will use to ensure long-term compliance with requirements of the programs involved, including minority business outreach and the comprehensive planning requirements

Monitoring

The Housing and Community Development (HCD) Program of the OSH has developed a Monitoring Plan to address the various financial and programmatic monitoring requirements. In addition to on-site monitoring, the Plan requires funded agencies to submit quarterly reports on the status of their projects. The County reports out on projects located in participating cities as well as all funded agencies in the annual CAPER. Project reimbursement requests are held until quarterly reports are current and approved by the project monitor. Projects that are not substantially meeting contract goals are discussed for possible action. Projects that continue to fall behind meeting goals could be subject to withholding reimbursement until corrective action is productive. The Rehab Grant program was established to allow for the spending of Rehab Grant funds more rapidly than in the past.

The County monitors the HOME Program annually by selecting a sample of HOME-assisted units for property inspection and a request to the funded agency for verification of tenant's income and rental data. The units to be inspected are drawn from a sample of 10% of the HOME-assisted units. Deficiencies are noted by the Asset Management Team and follow up inspections are made to verify that the recommended corrections were made. As part of the Urban County's annual HOME monitoring, HOME rental projects consisting of five or more HOME-assisted units will be reviewed for affirmative marketing. An evaluation is prepared for each of the affirmative marketing plans for the effectiveness of leasing vacant units.

The County CDBG program provides funds to nonprofit agencies utilizing service agreements. Service agreements require that, where feasible, the agency utilize MBE/WBE contractors. Housing rehabilitation projects are managed through adopted procedures established in the County Rehabilitation Program. The Program requires that all contractors complete a County Housing Rehabilitation Program Contractor's Questionnaire and a Statement of Bidder's Qualifications form. These requirements also request that the contractor provide ethnicity, minority, or female-owned business information.

First Year Action Plan - 2020/2021 Annual Action Plan – Expected Resources

AP-15 Expected Resources – 91.220(c)(1,2)

Introduction

The County expects to receive approximately \$1,540,720 in CDBG entitlement funds and \$1,010,604 in HOME funds for FY 2020/2021.

Table 53 - Expected Resources – Priority Table

Program	Source of Funds	Uses of Funds	Expected Amount Available Year 1				Expected Amount Available Remainder of ConPlan \$	Narrative Description
			Annual Allocation: \$	Program Income: \$	Prior Year Resources: \$	Total: \$		
CDBG	Public-Federal	Acquisition. Admin and Planning. Economic Development. Housing. Public Improvements. Public Services.	\$1,540,720	\$400.00	\$0.00	\$1,940,720	\$6,080,000	CDBG funds will be used for the creation and/or preservation of affordable units for low- and moderate-income (LMI) households and for public services that benefit LMI and special needs households.
HOME	Public-Federal	Acquisition. Homebuyer assistance. Homeowner rehab. Multi-family rental new construction. Multi-family rental rehab. New construction for ownership TBRA.	\$1,010,604	\$0.00	\$0.00	\$1,010,604	\$3,800,000	This program is designed to create and preserve affordable housing for extremely low- and low-income households, as well as create designated units for special needs populations.

Explain how federal funds will leverage those additional resources (private, state and local funds), including a description of how matching requirements will be satisfied

Entitlement Funds

Leverage, in the context of entitlement funding, means bringing other local, state, and federal financial resources to maximize the reach and impact of the Urban County's HUD Programs. HUD, like many other federal agencies, encourages the recipients of federal monies to demonstrate that efforts are being made to strategically leverage additional funds in order to achieve greater results. Leverage is also a way to increase project efficiencies and benefit from economies of scale that often come with combining sources of funding for similar or expanded scopes. Funds will be leveraged if financial commitments toward the costs of a project from a source other than the originating HUD program are documented.

Match Requirements

The majority of ConPlan activities carried out by the Urban County involve the leveraging of a variety of resources. For example, during the FY2018-2019 reporting period, the County utilized proceeds from the 2016 Measure A – Affordable Housing Bond (Housing Bond) to match HOME funds. The Housing Bond provides the County with an opportunity to partner with cities, residents, and the affordable and supportive housing community to significantly address the housing needs of the community's poorest. In the last several years, the County has leveraged a total of \$18,584,708 in matching funds.

Other Federal Grant Programs

In addition to the entitlement dollars listed above, the federal government has several other funding programs for community development and affordable housing activities. These include: the Section 8 Housing Choice Voucher Program, Section 202, Section 811, the Affordable Housing Program (AHP) through the Federal Home Loan Bank, and others.

Additionally, the Low-Income Housing Tax Credit program (LIHTC) provides a tax incentive to construct or rehabilitate affordable rental housing for low-income households. The LIHTC subsidizes the acquisition, construction, and rehabilitation of affordable rental housing for low- and moderate-income tenants.

It should be noted that in most cases the Urban County would not be the applicant for these funding sources as many of these programs offer financial assistance to affordable housing developers rather than local jurisdictions.

If appropriate, describe publicly owned land or property located within the jurisdiction that may be used to address the needs identified in the plan

County-owned properties provide limited housing development opportunities. The sale of surplus properties to non-government entities for use in housing or mixed-use developments is

one means of facilitating housing development. Another means is through County retention of land rights and partnership with a private developer to create new housing or mixed-use developments. In either case, the use of land for redevelopment, not for a governmental purpose or structure, is governed by the applicable city General Plan if located within the Urban Service Area.

Analysis of the constraints affecting development of individual County-owned properties for affordable housing projects is more difficult than analyzing the constraints affecting residential development on privately-owned lands because:

- Opportunities for redevelopment on County-owned lands is limited by the number of properties and the financial considerations involved in determining the disposition of those properties.
- For those projects that may require city approvals, the parcels involved may not initially have residential designations in the cities' general plans and/or necessary pre-zoning that would indicate how many residential units the cities would allow to be built on them.
- The residential land use designations cities would apply to County-owned lands proposed to be used for housing are likely to be "planned unit development" designations that allow for a relatively wide range of densities and development types. Estimates of housing development would be case-by-case.

On the whole, use of surplus County-owned properties does not involve significant constraints to housing development. Rather, it promotes housing development if located within the Urban County and meets the needs of both the County and the city within which development is proposed. *(Source: County of Santa Clara. "Housing Element Update 2015-2022." See https://www.sccgov.org/sites/dpd/DocsForms/Documents/HealthElement_2015_Adopted_Final.pdf)*

Discussion

AP-20 Annual Goals and Objectives

Table 54– Goals Summary

Sort Order	Goal Name	Start Year	End Year	Category	Geographic Area	Needs Addressed	Funding	Goal Outcome Indicator
1	Increase affordable and supportive housing	2020	2025	Affordable Housing	Countywide	-Assist families and individuals in transition -Affordable housing -Increase family income	CDBG: \$424,891 HOME: \$909,544	Rental units constructed: 10 Housing Units
2	Promote fair housing County-wide	2020	2025	Affordable housing	Countywide	-Fair housing -Affordable housing -Assist families and individuals in transition	CDBG: \$123,894	Public service activities other than Low/Moderate Income Housing Benefit: 250 Persons Assisted
3	Maintain and expand activities designed to prevent and reduce homelessness	2020	2025	Homeless, Non-Homeless Special Needs Non-Housing Community Development	Countywide	Vital services and homelessness prevention -Assist families and individuals in transition -Increase family income -Assist special needs populations -Employment and Workforce Opportunities	CDBG: \$93,004	Public service activities other than Low/Moderate Income Housing Benefit: 700 Persons Assisted 125: Homeless shelter
4	Preserve existing affordable housing	2020	2025	Affordable housing	Countywide	-Affordable Housing -Assist special needs populations	CDBG: \$425,000	Owner-occupied housing Rehabilitation: 180 Housing Units

Sort Order	Goal Name	Start Year	End Year	Category	Geographic Area	Needs Addressed	Funding	Goal Outcome Indicator
5	Provide essential services for special needs populations	2020	2025	Homeless, Non-Homeless Special Needs Non-Housing Community Development	Countywide	Vital services and homelessness prevention -Assist families and individuals in transition -Increase family income -Assist special needs populations -Employment and Workforce Opportunities	CDBG: \$130,960	-Individuals assisted with housing needs -individuals assisted with rental assistance -facilities/ or programs enhanced for disabilities
6	Maintain, improve and expand community facilities and spaces	2020	2025	Non-Housing Community Development	Countywide	-Employment and workforce opportunities -Improve aging community facilities and public infrastructure	CDBG: \$366,577	-Public Facility or Infrastructure Activities other than Low/Moderate Income Housing Benefit
7	Strengthen employment and workforce opportunities	2020	2025	Non-Housing Community Development	Countywide	-Increase family income -employment and workforce opportunities	\$0	Jobs created Programs created Individuals receiving job training
TOTALS							CDBG: \$1,411,089 HOME: \$909,544	

Table 55– Goal Descriptions

Proposed 2020-2025 Consolidated Plan Goals & Description		
1	Goal Name	Increase affordable and supportive housing
	Goal Description	Provide funding for new housing development and or programs that assist low and moderate income families with finding housing solutions including programs that increase homeownership, access to affordable rental opportunities, development of housing for special needs populations, support integrated housing solutions and plans, and reduce barriers to affordable housing consistent with the County’s Analysis for Impediment to Fair Housing Choice.
2	Goal Name	Promote Fair Housing Countywide
	Goal Description	The County will continue to collaborate with social service entities, surrounding cities, and unincorporated areas to provide assistance for families and individuals seeking counselling and or legal solutions to fair housing and discrimination problems. Funds will also be used for other planning initiatives, such as strategies to further fair housing and safe routes to school infrastructure planning.
3	Goal Name	Maintain and expand activities designed to prevent and reduce homelessness
	Goal Description	Provide needed public services that assist individuals and families in the following ways: crisis intervention, crime prevention, homelessness prevention, services for at-risk families, shelter in-take services, mental and preventative health services, job training and search assistance for those who are homeless or at -risk of homelessness, and other vital social services.
4	Goal Name	Preserve existing affordable housing
	Goal Description	Provide programs and funding for housing maintenance and rehabilitation including activities related to essential exterior and interior home repairs, given that 69.6% of homes in the County were built in 1980 or earlier. Such activities may also include lead testing and clearance testing, remediation of lead/asbestos hazards of housing units constructed prior to 1978.
5	Goal Name	Provide essential services for special needs populations
	Goal Description	Provide programs and services that increase the quality of life for special needs individuals or households. Special needs populations include senior households, persons with disabilities, domestic violence survivors, large households, female-headed households, and persons who are homeless and/or living with AIDS/HIV.
6	Goal Name	Maintain, improve and expand community facilities and spaces
	Goal Description	Support a higher quality of life through enhancing recreational spaces, supporting community and social service facilities, improve and enhance existing infrastructure such as streets, sidewalks, curbing and other public facilities, safe routes to school infrastructure, and addressing public safety concerns.
7	Goal Name	Strengthen employment and workforce opportunities
	Goal Description	Support programs and or the development or expansion of facilities that provide future employment opportunities for homeless and or low-and moderate-income individuals.

AP-35 Projects – 91.220(d)

Introduction

The Consolidated Plan goals below represent high priority needs for the County and serve as the basis for the strategic actions the County will use to meet these needs. The goals are:

1. Increase affordable and supportive housing.
2. Promote Fair Housing Countywide.
3. Maintain and expand activities designated to prevent and reduce homelessness.
4. Preserve existing affordable housing.
5. Provide essential services for special needs populations.
6. Maintain, improve and expand community facilities and spaces.
7. Strengthen employment and workforce opportunities.

Table 56 – Project Information

No.	Project Name	Type
1.	HO-21-01 Office of Supportive Housing	Housing Development
2.	CDBG-21-01 Rebuilding Together	Home Repair/Maintenance
3.	CDBG-21-02 Office of Supportive Housing	Multifamily Acquisition & Rehab of Emergency Shelters and Transitional Housing
4.	SC-21-52 Rehab Services	Costs related to Housing Rehabilitation and activity delivery fee for such costs
5.	PS-21-01 Catholic Charities	Ombudsman Program
6.	PS-21-02 Boys and Girls Club	El Toro Youth Center
7.	PS-21-03 Community Solutions	La Isla Pacifica – Domestic Violence Shelter
8.	PS-21-05 Family Supportive Housing	Bridges Aftercare
9.	PS-21-06 Family Supportive Housing	San Jose Family Shelter
10.	PS-21-07 Live Oak Adult Day Services	Day Care in Los Gatos and Morgan Hill
11.	PS-21-08 Project Sentinel	Fair Housing Consortium (Includes Project Sentinel and Asian Law Alliance)
12.	PS-21-09 Next Door Solutions to Domestic Violence	Domestic Violence Shelter and Support Services Program
13.	PS-21-10 Project Sentinel	Tenant-Landlord Services
14.	PS-21-11 Saratoga Area Senior Coord. Council	Adult Day Care Program
15.	PS-21-12 Senior Adults Legal Assistance (SALA)	Legal Services in Campbell, Los Gatos, Morgan Hill, and Saratoga
16.	PS-21-13 Silicon Valley Independent Living Center (SVILC)	Housing Programs for Persons with Disabilities
17.	PS-21-14 West Valley Community Center	Community Access to Resources and Education (CARE)
18.	PS-21-15 YWCA Silicon Valley	Domestic Violence Services and Shelter
19.	PS-21-16 Sacred Heart Community Services	Homeless Prevention Program

Describe the reasons for allocation priorities and any obstacles to addressing underserved needs

These projects will address the priority needs described in the ConPlan and enhance services to the homeless, residents at risk of homelessness, LMI residents, special needs populations, and others mentioned in the ConPlan.

AP-35 Project Summary

Project Summary Information

Table 57 – Project Summary

1.	Project Name	HO-21-01 Office of Supportive Housing
	Target Area	Countywide
	Goals Supported	Increase affordable and supportive housing
	Needs Addressed	Affordable housing
	Funding	HOME: \$909,544
	Description	New construction of multi-family rental units
	Target Date	6/30/2021
	Estimate the number and type of families that will benefit from the proposed activities	10 families will benefit from the proposed project.
	Location Description	Countywide
	Planned Activities	Funding will be used for soft and hard costs associated with the project.
2.	Project Name	CDBG-21-01 Rebuilding Together
	Target Area	Countywide
	Goals Supported	Preserve existing affordable housing
	Needs Addressed	Affordable Housing
	Funding	CDBG: \$300,000
	Description	Provide a safe living environment for qualified low- and moderate-income households of single-family, owner-occupied, housing units, through minor rehabilitation, repair or home maintenance.
	Target Date	6/30/2021
	Estimate the number and type of families that will benefit from the proposed activities	67 low-income, owner-occupied, housing units will be repaired.
	Location Description	Within the County jurisdictions
	Planned Activities	Low-to-moderate income owner-occupied, minor and emergency housing rehabilitation.
3.	Project Name	CDBG-21-02 Office of Supportive Housing
	Target Area	Countywide
	Goals Supported	Increase affordable and supportive housing
	Needs Addressed	Affordable Housing
	Funding	CDBG: \$424,891
	Description	Funding for the acquisition and/or rehabilitation of multifamily housing, emergency shelters, and transitional housing facilities serving low- and very-low income individuals, families, and homeless persons countywide. Applicants will be drawn from the County's Supportive Housing Development Loan Program Notice of Funding Availability and future Capital Improvement Program (CIP) Notice of Funding Availability. Should the County receive unplanned program income, the funding will be placed into this category.
	Target Date	6/30/2021

	Estimate the number and type of families that will benefit from the proposed activities	5 low- or very low-income households
	Location Description	Countywide
	Planned Activities	Funding will be used for costs associated with the installation of energy efficiency and costs to administer the program.
4.	Project Name	SC-21-52 Office of Supportive Housing
	Target Area	Countywide
	Goals Supported	Preserve existing affordable housing
	Needs Addressed	Affordable Housing
	Funding	CDBG: \$125,000
	Description	Funding to provide low interest, deferred payment housing rehabilitation loans and/or grant serving low to moderate-income homeowners. Also, for costs related to the administration of the Urban County single-family Housing Rehabilitation Program.
	Target Date	6/30/2021
	Estimate the number and type of families that will benefit from the proposed activities	5 low-to-moderate-income homeowner households
	Location Description	County jurisdictions
	Planned Activities	Activities include planning and the construction of single-family housing rehabilitation.
5.	Project Name	PS-21-01 Catholic Charities – Ombudsman Program
	Target Area	Countywide
	Goals Supported	Provide essential services to special needs populations
	Needs Addressed	Assist special needs populations (including those who are senior, disabled, homeless, living with HIV/AIDS, and survivors of domestic violence).
	Funding	CDBG: \$12,118
	Description	The project will provide low-income seniors in long-term care facilities with an Ombudsman who will work to resolve client problems and bring about changes to improve their care.
	Target Date	6/30/2021
	Estimate the number and type of families that will benefit from the proposed activities	60 low-income seniors will benefit
	Location Description	Countywide
	Planned Activities	Site visits to various senior care facilities and case management for those clients with open cases.
6.	Project Name	PS-21-02 Boys and Girls Club – El Toro Youth Center
	Target Area	Countywide
	Goals Supported	Provide essential services to special needs populations
	Needs Addressed	Assist special needs populations (including those who are senior, disabled, homeless, living with HIV/AIDS, and survivors of domestic violence).

	Funding	CDBG: \$12,118
	Description	The project will provide at-risk Morgan Hill youth ages 6-18 with accessibility to “out-of-school” enrichment programs, course work assistance, and mentorship.
	Target Date	6/30/2021
	Estimate the number and type of families that will benefit from the proposed activities	100 at-risk youth
	Location Description	City of Morgan Hill
	Planned Activities	Activities include enrichment, assistance, and mentorship programs for at-risk youth.
7.	Project Name	PS-21-04 Community Solutions – La Isla Pacifica Domestic Violence Shelter
	Target Area	Countywide
	Goals Supported	Maintain and expand activities designed to prevent and reduce homelessness
	Needs Addressed	Vital services and homelessness prevention
	Funding	CDBG: \$23,353
	Description	To provide shelter and supportive services for 28 ELI unduplicated adults plus their minor children.
	Target Date	6/30/2021
	Estimate the number and type of families that will benefit from the proposed activities	17 low-income homeless adults with children
	Location Description	Morgan Hill
	Planned Activities	Shelter and Support Services
8.	Project Name	PS-21-05 Family Supportive Housing – Bridges Aftercare
	Target Area	Countywide
	Goals Supported	Maintain and expand activities designed to prevent and reduce homelessness
	Needs Addressed	Assistance for families and individuals in transition from homelessness.
	Funding	CDBG: \$12,118
	Description	This project will provide an additional 9 months of support and services to 24 unduplicated homeless families.
	Target Date	6/30/2021
	Estimate the number and type of families that will benefit from the proposed activities	24 very low-income adults with children
	Location Description	San Jose
	Planned Activities	Project will provide 9 months of additional support and services to those adults with children who have transitioned out of the San Jose Family Shelter.
9.	Project Name	PS-21-06 Family Supportive Housing – San Jose Family Shelter
	Target Area	Countywide
	Goals Supported	Maintain and expand activities designed to prevent and reduce homelessness
	Needs Addressed	Assistance for families and individuals in transition from homelessness.

	Funding	CDBG: \$12,118
	Description	Project provides up to 90 days of temporary housing to 22 homeless families with children.
	Target Date	6/30/2021
	Estimate the number and type of families that will benefit from the proposed activities	22 homeless families with children
	Location Description	San Jose
	Planned Activities	Shelter and Supportive Services
10.	Project Name	PS-21-07 Live Oak Adult Day Services – Day Care in Los Gatos and Morgan Hill
	Target Area	Countywide
	Goals Supported	Provide essential services to special needs populations
	Needs Addressed	Assist special needs populations (including those who are senior, disabled, homeless, living with HIV/AIDS, and survivors of domestic violence).
	Funding	CDBG \$22,000
	Description	Adult day care services in the cities of Los Gatos and Morgan Hill.
	Target Date	6/30/2021
	Estimate the number and type of families that will benefit from the proposed activities	31 very-low and low-income seniors
	Location Description	Cities of Los Gatos and Morgan Hill
	Planned Activities	Day Care facility which will provide client intake and assessment, socialization and recreation, physical stimulation.
11.	Project Name	PS-21-08 Project Sentinel – Fair Housing
	Target Area	Countywide
	Goals Supported	Promote Fair Housing Countywide
	Needs Addressed	Fair Housing
	Funding	CDBG: \$30,657
	Description	Fair Housing Assistance for 35 individuals and families. Prevent wrongful eviction for persons with disabilities.
	Target Date	6/30/2021
	Estimate the number and type of families that will benefit from the proposed activities	64 persons with disabilities will be assisted.
	Location Description	Countywide
	Planned Activities	Provide educational presentations, outreach, and brochures at a variety of venues. Provide information and referral services and investigate cases of alleged discrimination.
12.	Project Name	PS-21-09 Next Door Solutions – Domestic Violence Shelter
	Goals Supported	Provide essential services to special needs populations
	Needs Addressed	Assist special needs populations (including those who are senior, disabled, homeless, living with HIV/AIDS, and survivors of domestic violence).
	Funding	CDBG: \$12,118

	Description	Shelter & Support Services to victims of domestic violence.
	Target Date	6/30/2021
	Estimate the number and type of families that will benefit from the proposed activities	204 victims of domestic violence will be assisted
	Location Description	Countywide
	Planned Activities	Emergency shelter and support services. 24-hour domestic hotline, housing services, crisis counseling, legal, and self-sufficiency services.
13.	Project Name	PS-21-10 Project Sentinel – Tenant Landlord
	Goals Supported	Promote Fair Housing Countywide
	Needs Addressed	Fair Housing
	Funding	CDBG: \$36,490
	Description	Fair Housing /Tenant Landlord Services for low income individuals or families.
	Target Date	6/30/2021
	Estimate the number and type of families that will benefit from the proposed activities	74 low-income individuals and/or families
	Location Description	Countywide
	Planned Activities	Information and client referral services on housing issues. Renal dispute resolution. Counseling and conciliation.
14.	Project Name	PS-21-11 Saratoga Area Senior Coord. Council (SASCC) – Adult Day Care
	Goals Supported	Provide essential services to special needs populations
	Needs Addressed	Assist special needs populations (including those who are senior, disabled, homeless, living with HIV/AIDS, and survivors of domestic violence).
	Funding	CDBG; \$11,880
	Description	Adult Day Care Facility
	Target Date	6/30/2021
	Estimate the number and type of families that will benefit from the proposed activities	41 low-income seniors, ages 65+
	Location Description	City of Saratoga
	Planned Activities	Day care facility, socialization, physical activity, creative activities, and meals provided.
15.	Project Name	PS-21-12 Senior Adults Legal Assistance (SALA)
	Goals Supported	Provide essential services to special needs populations
	Needs Addressed	Assist special needs populations (including those who are senior, disabled, homeless, living with HIV/AIDS, and survivors of domestic violence).
	Funding	CDBG: \$36,490
	Description	Legal Assistance for low income seniors in the Cities of Campbell, Los Gatos, Morgan Hill, and Saratoga.
	Target Date	6/30/2021
	Estimate the number and type of families that will benefit from the proposed activities	140 low-income seniors will be assisted

	Location Description	Cities of Campbell, Los Gatos, Morgan Hill, Saratoga
	Planned Activities	Legal assistance, including advising and counseling on basic rights. Facilitation access to public benefits to meet basic life needs and legal planning.
16.	Project Name	PS-21-13 Silicon Valley Independent Living Center (SVILC) – Housing Persons with Disabilities
	Goals Supported	Provide essential services to special needs populations
	Needs Addressed	Assist special needs populations (including those who are senior, disabled, homeless, living with HIV/AIDS, and survivors of domestic violence).
	Funding	CDBG: \$12,118
	Description	Housing Program for Persons with Disabilities
	Target Date	6/30/2021
	Estimate the number and type of families that will benefit from the proposed activities	110 LMI individuals or families with disabilities will benefit
	Location Description	Countywide
	Planned Activities	Assist low-income residents with disabilities in their search for affordable and accessible housing. Provide education and training workshops on how to conduct a housing search to transition from homelessness, from a health care facility, unstable or temporary housing.
17.	Project Name	PS-21-14 West Valley Community Center – Community Access to Resources and Education (CARE)
	Goals Supported	Provide essential services to special needs populations
	Needs Addressed	Assist special needs populations (including those who are senior, disabled, homeless, living with HIV/AIDS, and survivors of domestic violence).
	Funding	CDBG: \$12,118
	Description	Community Access to Resources and Education (CARE)
	Target Date	6/30/2021
	Estimate the number and type of families that will benefit from the proposed activities	80 LMI individuals or families
	Location Description	County jurisdictions
	Planned Activities	Provide intensive case management and education to each client.
18.	Project Name	PS-21-15 YWCA Silicon Valley – Domestic Violence Services and Shelter
	Goals Supported	Maintain and expand activities designed to prevent and reduce homelessness
	Needs Addressed	Assistance for families and individuals in transition from homelessness.
	Funding	CDBG: \$12,118
	Description	Shelter for victims of domestic violence
	Target Date	6/30/2021

	Estimate the number and type of families that will benefit from the proposed activities	40 victims of domestic violence will benefit
	Location Description	Countywide
	Planned Activities	Activities include emergency shelter, basic needs, including food and clothing, case management, and safety.
19.	Project Name	PS-21-16 Sacred Heart Community Services Homeless Prevention Program
	Goals Supported	Maintain and expand activities designed to prevent and reduce homelessness
	Needs Addressed	Assistance for families and individuals in transition from homelessness.
	Funding	CDBG: \$22,118
	Description	Emergency Shelter for homeless individuals and families.
	Target Date	6/30/2021
	Estimate the number and type of families that will benefit from the proposed activities	140 LMI households at risk of eviction and/or homelessness
	Location Description	Countywide
	Planned Activities	Activities will provide housing counseling, information and referral services.
20.	Project Name	PS-21-17 LifeMoves – Opportunity Services Center
	Goals Supported	Maintain and expand activities designed to prevent and reduce homelessness
	Needs Addressed	Assistance for families and individuals in transition from homelessness.
	Funding	CDBG: \$11,179
	Description	Services at the Opportunity Services Center, a comprehensive, one-stop, multi-service, drop-in day center providing critically needed services for residents of Santa Clara County and the surrounding areas who are homeless or at risk of homelessness.
	Target Date	6/30/2021
	Estimate the number and type of families that will benefit from the proposed activities	12 unduplicated homeless individuals will be provided with services at the Opportunity Center.
	Location Description	Unincorporated County
	Planned Activities	Activities include food, showers, laundry and will receive referrals to medical and other community services while also receiving intensive case management.
21.	Project Name	FH-21-01 Project Sentinel – Fair Housing (Admin.)
	Goals Supported	Promote Fair Housing Countywide
	Needs Addressed	Fair Housing
	Funding	CDBG: \$50,194
	Description	Fair Housing Services funded from CDBG Admin.
	Target Date	6/30/2021
	Estimate the number and type of families that will benefit from the proposed activities	See PS-21-08
	Location Description	Countywide

	Planned Activities	Activities include consultations, investigations, educational workshops to landlords and tenants, technical assistance and housing rights brochures to landlords and rental property owners.
22.	Project Name	SC-21-91 CDBG Planning and Admin.
	Goals Supported	All
	Needs Addressed	All
	Funding	CDBG: \$251,397
	Description	Personnel costs related to the administrative costs of managing the Urban County CDBG Program.
	Target Date	6/30/2021
	Estimate the number and type of families that will benefit from the proposed activities	N/A
	Location Description	N/A
	Planned Activities	Oversight related to implementing the programs and projects funded with CDBG.
23.	Project Name	HO-21-91 HOME Admin
	Goals Supported	All
	Needs Addressed	All
	Funding	HOME: \$101,060
	Description	Personnel costs related to the administrative costs of administering the Urban County HOME program.
	Target Date	6/30/2021
	Estimate the number and type of families that will benefit from the proposed activities	N/A
	Location Description	N/A
	Planned Activities	Oversight related to implementing the programs and projects funded with CDBG.

AP-60 Public Housing – 91.220(h)

Introduction

In 2008 the Santa Clara County Housing Authority (SCCHA) entered into a ten-year agreement with HUD to become a Moving to Work (MTW) agency. The MTW program is a federal demonstration program that allows greater flexibility to design and implement more innovative approaches for providing housing assistance. SCCHA is currently in the process of updating its Strategic Plan. The updated plan will promote informed decision-making about how to achieve overall objectives in support of the agency's mission. Until the update is completed the SCCHA will continue to utilize its current MTW Strategic Pan.

Additionally, SCCHA has used Low-Income Housing Tax Credit financing to transform and rehabilitate 535 units of public housing into SCCHA-controlled properties. The agency is an active developer of affordable housing and has either constructed, rehabilitated, or assisted with the development of more than 30 housing developments that service a variety of households, including special needs households. SCCHA assists approximately 17,000 households through the federal Section 8 Housing Choice Voucher program. The Section 8 waiting list contains 3,486 households, and it is closed.

Actions planned during the next year to address the needs to public housing

Not applicable, there are no public housing developments in the Urban County.

Actions to encourage public housing residents to become more involved in management and participate in homeownership

While the majority of their units have been converted to affordable housing stock, SCCHA is proactive in incorporating resident input into the agency's policy-making process. An equitable and transparent policy-making process that includes the opinions of residents is achieved through the involvement of two tenant commissioners, one being a senior citizen, on the SCCHA board.

If the PHA is designated as troubled, describe the manner in which financial assistance will be provided or other assistance

Not applicable.

Discussion

See Discussion above.

AP-65 Homeless and Other Special Needs Activities – 91.220(i)

Introduction

The Santa Clara region is home to the fourth-largest population of homeless individuals (9,706 single individuals) and the second highest percentage of unsheltered homeless of any major city (81.6% of homeless people sleep in places unfit for human habitation). The Supportive Housing System is governed by the Continuum of Care (CoC) and the CoC Board, and the Destination: Home Leadership Board. Membership of the CoC is a collaboration of representatives from local jurisdictions comprised of community-based organizations, the SCCHA, governmental departments, health service agencies, homeless advocates, consumers, the faith community, and research, policy and planning groups. The management information system utilized by the CoC is referred to as the Help Management Information System (HMIS). The HMIS monitors outcomes and performance measures for all the homeless services agencies funded by the County.

The CoC also works closely with the Lived Experience Advisory Board (LEAB). The LEAB is a leadership development body consisting of members with current or past experience of homelessness. Members participating on the Board learn about and evaluate the system of care and to make recommendations for improvement.

Describe the jurisdictions one-year goals and actions for reducing and ending homelessness including:

Reaching out to homeless persons (especially unsheltered persons) and assessing their individual needs

The Homeless Census is a countywide collaborative effort to help assess regional homeless needs. The Urban County participates with the other jurisdictions in the region to conduct a biennial countywide homeless count. The data from the census is used to plan, fund, and implement actions for reducing chronic homeless and circumstances that bring about homelessness. The Urban County financially contributed and participated in the countywide Homeless Census survey that took place in 2019 and will financially contribute and participate in future surveys. Additionally, two formally homeless persons participate on the CoC Board of Directors. The Urban County will leverage the following Supportive Housing System Strategies:

- **Client Engagement Team**: To reach and house clients more swiftly, the Office of Supportive Housing has committed its Client Engagement Team, an outreach team with expertise in locating and building relationships with individuals experiencing homelessness, to take on this role. The Client Engagement Team is charged with mobilizing immediately to make contact with households as they are referred through

the Coordinated Assessment. This team explains available housing opportunities to households and helps put them in contact with the supportive housing program.

- **Mobile Crisis Services Team:** The crisis response system is designed to meet the immediate needs of people experiencing or at risk of homelessness, providing emergency assistance to avoid homelessness, emergency shelter, and support for other basic needs. While the supportive housing system strives to ensure that homelessness is rare, brief, and nonrecurring for Santa Clara County residents, the demand for safe, affordable, stable housing far exceeds the system's current capacity, necessitating short-term solutions. In 2018, the many partners involved in the crisis response system incubated and grew a variety of promising programs to provide critical support for individuals and families at risk of and experiencing homelessness. Often the first step back to stable housing, these programs work together with the community's supportive housing system to help clients achieve long-term housing stability.

Addressing the emergency shelter and transitional housing needs of homeless persons

Individuals currently experiencing homelessness need programs and services that address their immediate needs. Each night, emergency shelters in Santa Clara County provide a safe place to rest for hundreds of people experiencing homelessness, a fundamental role of the supportive housing system. Emergency shelter program models vary significantly across the system, with many providing an array of on-site services through partnerships with the County and other safety net providers. From meeting basic needs, such as food, showers, and access to health care, to case management and connection to employment, emergency shelters are a critical resource hub for many people experiencing homelessness. All emergency shelters also act as access points for the Coordinated Assessment System, administering the standard assessment used to prioritize households for the community's permanent and transitional housing opportunities.

Helping homeless persons (especially chronically homeless individuals and families, families with children, veterans and their families, and unaccompanied youth) make the transition to permanent housing and independent living, including shortening the period of time that individuals and families experience homelessness, facilitating access for homeless individuals and families to affordable housing units, and preventing individuals and families who were recently homeless from becoming homeless again.

The supportive housing system relies on three central elements to support participants as they obtain and retain stable housing: affordable housing, case management, and supportive services, including medical and behavioral health services. Performance measurement is used to evaluate and improve the effectiveness of these tools.

Affordable Housing can take the form of rental subsidies, which cover part or all of a client's housing costs and may be short-term (1-3 months), medium-term (3-24 months), or long-term (over 2 years). Subsidies are used in physical housing units owned or leased by a housing

program, in units that are part of the market-rate housing stock, or in affordable apartments developed and set aside for households exiting homelessness.

Case management involves one or more trained staff members working closely with a client to establish client-driven goals to attain and retain stable housing and connect the client to the best resources to help reach those goals.

Supportive services are a diverse array of resources that help clients obtain or maintain permanent housing, including assistance with public benefits applications, legal services, credit repair, childcare, job training and employment programs, assistance with housing location or rental applications, and help building relationships with landlords. Medical and behavioral health services, including services to address mental health and substance use challenges, are essential to helping clients address barriers to housing and stabilize once they are housed.

Helping low-income individuals and families avoid becoming homeless, especially extremely low-income individuals and families and those who are: being discharged from publicly funded institutions and systems of care (such as health care facilities, mental health facilities, foster care and other youth facilities, and corrections programs and institutions); or, receiving assistance from public or private agencies that address housing, health, social services, employment, education, or youth needs.

Recognizing the critical role that prevention plays in reducing inflow into the supportive housing and crisis response system, in 2017, the CoC developed the Homelessness Prevention System to provide a range of supports to help residents at risk of losing their housing to regain stability. Through a combination of public and private resources from partners including the Packard Foundation, Sunlight Giving, Google.org, the City of San José, the City of Santa Clara, the City of Morgan Hill, and the County of Santa Clara, over \$4.2 million was initially raised to launch a pilot program with the goal of implementing a countywide homelessness prevention system and ultimately preventing all instances of homelessness. These efforts were spearheaded by the Office of Supportive Housing, Destination: Home, and the Emergency Assistance Network agencies, who provide a variety of essential services for low-income households across the county.

Owing to its diverse and adaptable funding sources, the Prevention System is able to provide support tailored to each household's needs to stabilize its housing. These services include help paying future and past-due rent or mortgage payments, security deposits, utility bills, and other expenses that place the household at risk of homelessness, such as transportation costs, medical bills, and childcare. Partner agencies also offer case management and follow up to provide additional support if participants find themselves at risk of homelessness again in the

future. The program leverages the following strategies to provide comprehensive support to at-risk households:

- Coordinating to provide “no wrong door” access to prevention services.
- Partnering to provide streamlined access to legal assistance in landlord-tenant proceedings.

Discussion

AP-75 Barriers to affordable housing – 91.220(j)

Introduction:

The unincorporated and incorporated jurisdictions within the County face barriers to affordable housing that are common throughout the Bay Area. High on the list is the lack of developable land, which increases the cost of available real estate and increases housing development costs. Local opposition is another common obstacle as many neighbors have strong reactions to infill and affordable housing developments. Their opposition is often based on misconceptions, such as a foreseen increase in crime; erosion of property values; increase in parking and traffic congestion; and overwhelmed schools. However, in order to ensure a healthy economy, the region must focus on strategies and investment that provide housing for much of the region's workforce whose incomes might significantly limit their housing choices. In 2020, when the Analysis of Impediments (AI) is completed a final listing of barriers and impediments to fair housing will be included in this document.

Even when developments produce relatively affordable housing, in a constrained housing supply market higher income buyers and renter households generally outbid lower income households and a home's final sale or rental price will generally far exceed the projected sales or rental costs. Public subsidies are often needed to guarantee affordable homes for LMI households.

Actions it planned to remove or ameliorate the negative effects of public policies that serve as barriers to affordable housing such as land use controls, tax policies affecting land, zoning ordinances, building codes, fees and charges, growth limitations, and policies affecting the return on residential investment

Discussion:

Please see discussion above.

AP-85 Other Actions – 91.220(k)

Introduction:

Actions planned to address obstacles to meeting underserved needs

The diminishing amount of funds to meet underserved needs continues to be the most significant obstacle to addressing the needs of underserved populations. The Urban County supplements its federal funding with other resources and funds, such as:

- 2016 Measure A – Affordable Housing Bond.
- The Housing Trust Silicon Valley is a public/private venture dedicated to increasing affordable housing in the county. The Trust makes available funds for developers to borrow for the construction of affordable units.
- Mortgage Credit Certificates (MCC), a federal program issued by the County, allows homeowners to claim a federal income tax deduction equal to the amount of interest paid each year on a home loan. Through an MCC, a homeowner's deduction can be converted into a federal income tax credit that reduces the household's tax payments on a dollar for dollar basis, with a maximum credit equal to 10 to 20 percent of the annual interest paid on the borrower's mortgage.
- McKinney Vento Homeless Assistance Funds are distributed by the County to organizations that provide services to homeless persons and persons at-risk of homelessness.
- Rental assistance provided by the SCCHA will continue to be available to Urban County residents through the Moderate Rehabilitation Program and the Section 8 Program.

Actions planned to foster and maintain affordable housing

Historically, the Urban County's primary role in housing development has been to provide financial assistance to create more affordable and supportive housing and below-market rate housing. This role has included making a significant contribution in a variety of ways to housing affordability and preservation, including, but not limited to the following:

- Funding for construction, rehabilitation, and preservation;
- Providing rental subsidies;
- Creating and assisting shelters and special needs housing;
- Providing home financing for first-time and low-income homebuyers;
- Offering and funding services to address housing discrimination and dispute resolution;
- Generating opportunities for new housing on surplus County-owned lands; and
- Facilitating advocacy and education.

Actions planned to reduce lead-based paint hazards

The Urban County addresses lead based paint (LBP) hazards by conducting screening and abatement procedures through various rehabilitation programs. The Housing Rehabilitation Program informs all applicants and tenants of rental housing about the dangers and hazards of LBP. The Urban County's Housing Rehab Program conducts visual assessment, paint testing or risk assessment on all of its projects. LBP hazard reduction activities include paint stabilization, interim controls, standard treatments, lead abatement, safe work practices and clearance to confirm that no lead based paint hazards remain when work is complete. The program also requires that all participating contractors have completed the state training on safe work practices.

Actions planned to reduce the number of poverty-level families

Historically the Urban County has provided funding to agencies such as Sacred Heart Community Services, Community Solutions, and several other service providers.

Although the Urban County is not currently providing direct funding for economic development or job training projects, the funding provided to these agencies is for housing-related services, which are integral components of the total services provided by these agencies that assist in reducing poverty in the Urban County. One of the most important services of these agencies is to help families obtain stable housing and reduce the percentage of their income paid for housing, allowing them to use a greater percentage of their income for other essential goods and services (food, clothing, medical care, etc.) The services that these agencies provide that assist in the reduction of poverty include:

- Affordable housing information and referral;
- Information and counseling on tenant/landlord issues;
- Shared housing counseling and placement;
- Counseling, shelter services, and general assistance to very low-income or homeless populations;
- Services that address the needs of the frail-elderly, or persons with disabilities; and
- Services that address the needs of low-income children and their families.

Actions planned to develop institutional structure**Actions planned to enhance coordination between public and private housing and social service agencies**

The Urban County benefits from a strong jurisdiction and region-wide network of housing and community development partners, such as the CDBG Coordinators Meeting, Regional Housing Working Group and the CoC. To improve intergovernmental and private sector cooperation, the

County will continue to participate with other local jurisdictions and developers in sharing information and resources.

Discussion:

Please see above.

AP-90 Program Specific Requirements – 91.220(I)(1,2,4)

Introduction:

**Community Development Block Grant Program (CDBG)
Reference 24 CFR 91.220(I)(1)**

Projects planned with all CDBG funds expected to be available during the year are identified in the Projects Table. The following identifies program income that is available for use that is included in projects to be carried out.

1. The total amount of program income that will have been received before the start of the next program year and that has not yet been reprogrammed	\$0
2. The amount of proceeds from section 108 loan guarantees that will be used during the year to address the priority needs and specific objectives identified in the grantee's strategic plan	\$0
3. The amount of surplus funds from urban renewal settlements	\$0
4. The amount of any grant funds returned to the line of credit for which the planned use has not been included in a prior statement or plan.	
5. The amount of income from float-funded activities	\$0
Total Program Income	

Other CDBG Requirements

1. The amount of urgent need activities

**HOME Investment Partnership Program (HOME)
Reference 24 CFR 91.220(I)(2)**

1. A description of other forms of investment being used beyond those identified in Section 92.205 is as follows:
 - The Urban County does not use HOME Funds in any other manner than those described in Section 92.205
2. A description of the guidelines that will be used for resale or recapture of HOME funds when used for homebuyer activities as required in 92.254, is as follows:

In the event the Property should no longer be the principal residence of the Borrower for the Affordability Period, then County shall recapture all or a portion of the HOME funds, as set forth in the Loan Documents/Agreement, from the proceeds of the sale which shall consist of the sales price less non-HOME loan repayments and eligible closing costs plus interest due.

An exception to this rule would be that after the Property is sold, and in the event of a foreclosure, short sale, or transfer in lieu of foreclosure, there are insufficient proceeds from the sale, then the County shall accept a partial or zero repayment of the HOME Funds. This Recapture provision is described in the Promissory Note. These provisions are

consistent with 24 CFR 92.254. The County intends to exercise the Recapture Provision of the HOME regulations for First-Time Homebuyer Down Payment Assistance loans made with HOME funds. The County will recapture the entire amount of the HOME investment from the borrower provided there are net proceeds sufficient to repay the County HOME loan. The value of the property assisted with HOME funds may not exceed 95% of the area median utilizing data from the HUD 203b limits.

3. A description of the guidelines for resale or recapture that ensures the affordability of units acquired with HOME funds? See 24 CFR 92.254(a)(4) are as follows:

In certain circumstances, the County may permit the assisted homebuyer to sell the assisted unit at a restricted resale price to another income eligible borrower, who is willing and able to assume the County loan and affordability restrictions. In these instances, the County will not require the full repayment of the initial HOME subsidy. The HOME subsidy would be transferred to the new buyer in the form of a deferred repayment down payment assistance loan. All other HOME assisted buyers will sell their homes at fair market value and the County will exercise the recapture option as outlined and in accordance with CFR Section 92.254(5)(ii)(a).

In the event the Property should no longer be the principal residence of Borrower for the Affordability Period, then County shall recapture all or a portion of the HOME funds, as set forth in the Loan Documents, from the proceeds of the sale which shall consist of the sales price less non-HOME loan repayments and eligible closing costs plus interest due. An exception to this rule would be that after the Property is sold, and in the event of a foreclosure, short sale, or transfer in lieu of foreclosure, there are insufficient proceeds from the sale, then the County shall accept a partial or zero repayment of the HOME Funds. This Recapture provision is described in the NOTE. These provisions are consistent with 24 CFR 92.254. The County intends to exercise the Recapture Provision of the HOME regulations for First-Time Homebuyer loans made with HOME funds. The County will recapture the entire amount of the HOME investment from the borrower provided there are net proceeds sufficient to repay the County HOME loan. The value of the property assisted with HOME funds may not exceed 95% of the area median utilizing data from the HUD 203b limits.

4. Plans for using HOME funds to refinance existing debt secured by multifamily housing that is rehabilitated with HOME funds along with a description of the refinancing guidelines required that will be used under 24 CFR 92.206(b), are as follows:

HOME funds will not be used to refinance existing debt.

Appendix A – Terms and Definitions

- **Annual Action Plan:** The Action Plan summarizes the activities that will be undertaken in the upcoming Fiscal Year (FY) to meet the goals outlined in the Consolidated Plan. The Action Plan also identifies the federal and non-federal resources that will be used meet the goals of the approved Consolidated Plan.
- **Community Development Block Grant:** HUD's CDBG program provides communities with resources to address a wide range of housing and community development needs that benefit very low and low income persons and areas.
- **Consolidated Annual Performance Evaluation Report:** The CAPER assesses the County's annual achievements relative to the goals in the Consolidated Plan and proposed activities in the Action Plan. HUD requires the County to prepare a CAPER at the end of each fiscal year.
- **Department Of Housing And Urban Development:** HUD is the federal government agency that creates and manages programs pertaining to federal home ownership, affordable housing, fair housing, homelessness, and community and housing development.
- **Displacement:** Displacement refers to the involuntary relocation of individuals from their residences due to housing development and rehabilitation activities paid for by federal funds.
- **Eligible Activity:** Activities that are allowable uses of the CDBG funds covered by the CPP as defined in the Code of Federal Regulations Title 24 for HUD.
- **Emergency Solutions Grant:** HUD's ESG program provides communities with resources to serve homeless individuals and families via Street Outreach, Emergency Shelter, Homelessness Prevention, Rapid Re-Housing Assistance, Homeless Management Information System (HMIS), and Administrative Activities.
- **Entitlement Jurisdiction:** A city with a population of at least 50,000, a central city of a metropolitan area, or a qualified urban county with a population of at least 200,000 that receives grant funding from HUD.
- **Five Year Consolidated Plan:** HUD requires entitlement jurisdictions to prepare a Consolidated Plan every five years. The Consolidated Plan is a strategic plan that identifies housing, economic, and community development needs and prioritizes funding to address those needs over a five-year period.
- **HOME Investment Partnerships Program:** The HUD HOME program provides resources to fund a wide range of activities that build, buy, and/or rehabilitate affordable rental or homeownership housing or provide direct rental assistance to low-income people.

Appendix B - Acronyms

- AHP - Affordable Housing Program
- AI – Analysis of Impediments to Fair Housing
- CAPER - Consolidated Annual Performance Evaluation Report

- Section 8 - Section 8 Housing Choice Voucher Program
- HCV – Housing Choice Voucher
- TBRA - Tenant-Based Rental Assistance
- WIOA - Workforce Innovation and Opportunity Act
- HA – CalWORKs Homeless Assistance Program

Appendix C – Citizen Participation Plan

Introduction

The Santa Clara Urban County (Urban County) includes the unincorporated communities within Santa Clara County (County) and seven small jurisdictions: the cities of Campbell, Los Altos, Los Altos Hills, Los Gatos, Monte Sereno, Morgan Hill, and Saratoga. The Urban County, along with the Entitlement Jurisdictions within the County that receive federal funding administered by the U.S. Department of Housing and Urban Development (HUD), are the lead agencies for the 2015-2020 Consolidated Plan.

The Urban County and Entitlement Jurisdictions receive federal entitlement grant funding for the following programs:

- Community Development Block Grants (CDBG)
- HOME Investment Partnership Program (HOME)
- Housing Opportunities for People with AIDS (HOPWA)
- Emergency Solutions Grants (ESG)

As a recipient of entitlement funding, the Urban County is required to prepare a:

- Five Year Consolidated Plan (Consolidated Plan) that includes a Citizen Participation Plan
- Annual Action Plan (Action Plan)
- Annual Consolidated Annual Performance Evaluation Report (CAPER)

Under HUD’s Code of Final Regulations for the Consolidated Plan (24 CFR Part 91 Sec. 91.105), the Urban County must adopt a Citizen Participation Plan (CPP) that sets forth the Urban County’s policies and procedures for citizen participation in the planning, execution, and evaluation of the Consolidated Plan, Action Plans, and CAPER. This CPP provides guidelines for the Urban County to provide and encourage public participation by residents, community stakeholders, and grant beneficiaries in the process of drafting, implementing, and evaluating the Consolidated Plan and related documents. The citizen participation process includes outreach, public hearings, community forums, and opportunities for comment.

Definitions

- **Annual Action Plan:** The Action Plan summarizes the activities that will be undertaken in the upcoming Fiscal Year (FY) to meet the goals outlined in the Consolidated Plan. The Action Plan also identifies the federal and non-federal resources that will be used to meet the goals of the approved Consolidated Plan.

- **Citizen Participation Plan:** The CPP provides guidelines by which the Urban County will promote engagement in the planning, implementation, and evaluation of the distribution of federal funds, as outlined in the Consolidated Plan, Action Plan, and CAPERs.
- **Community Development Block Grant:** HUD's CDBG program provides communities with resources to address a wide range of housing and community development needs that benefit very low and low income persons and areas.
- **Consolidated Annual Performance Evaluation Report:** The CAPER assesses the Urban County's annual achievements relative to the goals in the Consolidated Plan and proposed activities in the Action Plan. HUD requires the Urban County to prepare a CAPER at the end of each fiscal year.
- **Department Of Housing And Urban Development:** HUD is the federal government agency that creates and manages programs pertaining to federal home ownership, affordable housing, fair housing, homelessness, and community and housing development.
- **Displacement:** Displacement refers to the involuntary relocation of individuals from their residences due to housing development and rehabilitation activities paid for by federal funds.
- **Eligible Activity:** Activities that are allowable uses of the CDBG funds covered by the CPP as defined in the Code of Federal Regulations Title 24 for HUD.
- **Emergency Solutions Grant:** HUD's ESG program provides communities with resources to serve homeless individuals and families via Street Outreach, Emergency Shelter, Homelessness Prevention, Rapid Re-Housing Assistance, Homeless Management Information System (HMIS), and Administrative Activities.
- **Entitlement Jurisdiction:** A city with a population of at least 50,000, a central city of a metropolitan area, or a qualified urban county with a population of at least 200,000 that receives grant funding from HUD.
- **Five Year Consolidated Plan:** HUD requires entitlement jurisdictions to prepare a Consolidated Plan every five years. The Consolidated Plan is a strategic plan that identifies housing, economic, and community development needs and prioritizes funding to address those needs over a five-year period.
- **HOME Investment Partnerships Program:** The HUD HOME program provides resources to fund a wide range of activities that build, buy, and/or rehabilitate affordable rental or homeownership housing or provide direct rental assistance to low-income people.
- **Housing Opportunities for Persons with AIDS:** The HUD HOPWA program provides resources that benefit low-income persons medically diagnosed with HIV/AIDS and their families, including housing and social services, chemical dependency treatment, nutritional services, case management, and assistance with daily living.
- **Low and Moderate Income:** As defined annually by HUD, Low and Moderate Income (LMI) is 0-80 percent of area median family income (AMI) for a jurisdiction, with adjustments for smaller or larger families. This includes those individuals presumed by HUD to be principally LMI (abused children, battered spouses, elderly persons, severely

disabled adults, homeless persons, illiterate adults, persons living with AIDS and migrant farm workers). HUD utilizes three income levels to define LMI households:

- Extremely low income: Households earning 30 percent or less than the AMI (subject to specified adjustments for areas with unusually high or low incomes)
- Very low income: Households earning 50 percent or less than the AMI (subject to specified adjustments for areas with unusually high or low incomes)
- Low and moderate income: Households earning 80 percent or less than the AMI (subject to adjustments for areas with unusually high or low incomes or housing costs)
- **Public Hearing:** Public hearings are designed to provide the public the opportunity to make public testimony and comment. Public hearings related to the Consolidated Plan are to be advertised in local newspapers and made accessible to non-English speakers and individuals with disabilities.
- **Substantial Amendments:** Amendments are considered “Substantial” whenever one of the following is proposed:
 - A change in the allocation priorities or a change in the method of fund distribution.
 - A substantial change which increases or decreases the amount allocated to a category of funding within the Urban County’s entitlement grant programs by 25 percent.
 - To implement an activity using CDBG funds for new programs that were not described in the Consolidated Plan.
 - To change the purpose or intended beneficiaries of an activity approved for CDBG funding, e.g., instead of primarily benefitting lower income households the activity instead proposes to benefit mostly moderate income households.

Roles, Responsibilities, and Contact Information

The Urban County and Entitlement Jurisdictions within the County receive grant funding from HUD.

The County’s Board of Supervisors is responsible for approving the Urban County’s Consolidated Plan, Action Plans, Substantial Amendments, and CAPERs prior to their submission to HUD.

It is the intent of the Urban County to provide for and encourage citizen participation, with particular emphasis on participation by lower income persons who are beneficiaries of or impacted by entitlement- funded activities. The Urban County encourages participation in all stages of the Consolidated Planning process by all residents, including minorities and non-English speaking persons, as well as persons with mobility, visual or hearing impairments, and residents of assisted housing developments and recipients of tenant-based assistance.

In general, hearings will be held at the County of Santa Clara Board Chambers, located at 70 W. Hedding Street, San José, CA 95112, due to its central location, convenient access, and disability

accessibility. Translation services will be provided when there is an indication that non-English speaking persons will be attending. Other reasonable accommodations will be provided on a case-by case basis.

The General Contact Information for the Urban County’s HUD Entitlement Programs is:

Urban County Region of Santa Clara County

Ky Le, Director Office of Supportive Housing
County of Santa Clara, Office of Supportive Housing (OSH)
3180 Newberry Drive, Suite 150
San José, CA 95118
(408) 793-0550
Ky.Le@hhs.sccgov.org

Citizen Participation Policies

Public Hearings

The Urban County will hold public hearings for Consolidated Plans, Annual Action Plans, CAPERs, amendments made to the CPP, and Substantial Amendments.

The Consolidated Plans, Annual Action Plans, CPP amendments, and Substantial Amendments require two public hearings. One required hearing is the Housing and Community Development Advisory Committee (HCDAC), a Board recommending Committee and one required hearing is before the Board of Supervisors for document adoption. The CAPER requires one hearing before the Board of Supervisors for document adoption.

Community hearings will be held in a community space with consideration for the convenience to beneficiaries of the entitlement program resources.

The Board of Supervisors public hearings will be held at Board Chambers located at 70 W. Hedding, San Jose, CA 95110. Listening devices, interpretation services, and other assistance to disabled persons or those with limited English proficiency will be provided upon request, ranging up to five business days prior notification to the Clerk of the Board. Requests for disability-related modifications or accommodations required to facilitate meeting participation, including requests for auxiliary aids, services or interpreters, require different lead times, ranging up to five business days. For this reason, it is important to provide as much advance notice as possible to ensure availability. Assistive Listening Devices (ALDs) are available upon request.

Notice of Hearings and Review Periods

To allow the public time to provide comments prior to the submission of approved documents to HUD, the Urban County will hold a minimum 30-day public review and comment period for the Consolidated Plan, Action Plan, and Substantial Amendment. The Urban County will establish a public review period of at least 15 days for each CAPER and amendments to the CPP. Copies of the draft plans will be available to the public at the County's Office of Supportive Housing, 3180 Newberry Drive, Suite 150, San José, CA 95118.

The Urban County will place public notices online through the Urban County's website, and through advertisement in a local newspaper of general circulation in advance of a 30-day public review and comment period.

To ensure that the public, including minorities, persons with limited English proficiency, persons with disabilities, residents of public housing, and LMI residents are able to participate in the public review process, the Urban County will provide residents, public agencies, and other stakeholders with notices on applicable public review periods and public hearings that adhere to the following:

- The notices will be published prior to the start of the public comment period and at least 15 days before the final public hearing and will include information regarding how to request accommodation and services available for persons with disabilities who wish to attend the public hearings.
- The notices will be distributed to persons and agencies on the contact list maintained by the Urban County for those parties expressing interest in receiving information and updates related to the Urban County's Consolidated Plan, Action Plan, CAPER, Substantial Amendments and CPP. Interested parties may request to be added to this contact list by sending an email to tracy.cunningham@hhs.sccgov.org, by calling (408) 793-0560 or by writing to the County's Office of Supportive Housing, 3180 Newberry Drive, Suite 150, San José, CA 95118.
- The notices will be distributed through a variety of methods, including e-mail, newspaper publications and the County's website at www.sccgov.org. The notices will include information on how to obtain a copy of the draft documents and scheduled hearing dates, times, and locations.

The public may file comments on draft plans in writing to the County's Office of Supportive Housing, 3180 Newberry Drive, Suite 150, San José, CA 95118; via email to tracy.cunningham@hhs.sccgov.org; by phone at (408) 793-0560. Comments may also be submitted in person at the County's Office of Supportive Housing, 3180 Newberry Drive, Suite 150, San José, CA 95118, Monday through Friday during business hours, and during the Council adoption hearing.

When necessary or applicable, the Urban County may combine notices complying with several individual requirements into one comprehensive notice for dissemination and publication.

Comments/Complaints on Adopted Plans

Comments or complaints from residents, public agencies, and other stakeholders regarding the adopted Consolidated Plan or related amendments and performance reports may be submitted in writing or verbally to the General Contact at the County's Office of Supportive Housing, 3180 Newberry Drive, Suite 150, San José, CA 95118. Written comments or complaints will be referred to appropriate County staff for consideration and response. The County will attempt to respond to all comments or complaints within 15 business days and maintain a correspondence file for this purpose.

Availability of Draft and Approved Documents

The draft and final versions of the Consolidated Plan, Action Plan, CAPER, all related amendments, records, and regulations will be available online at the County's website: www.sccgov.org/sites/oah. Hard copies of all documents will be available at the County's Office of Supportive Housing, 3180 Newberry Drive, Suite 150, San José, CA 95118 and upon written request. If the County is unable to provide immediate access to the documents requested, it will make every effort to provide the documents and reports within 15 business days from the receipt of the request.

During the 30-day public review and comment period, copies of the document will be available to the public for review at through the County's website at www.sccgov.org/sites/oah.

Relocation Policy

As part of the CPP, the County must maintain a Relocation policy. Relocation refers to the involuntary relocation of individuals from their residence due to housing development and rehabilitation paid for with federal funds. The County will continue to use existing federal and state relocation guidelines, as applicable, to minimize displacement and to alleviate the problems caused by displacement. Both the federal government and the State of California have specific requirements dictating the amount of benefits and assistance that must be provided to lower income persons and households relocated from their homes as a result of displacement. Depending on the funding source, displaced persons may be offered one or more of the following:

- A rent subsidy for another unit
- A cash payment to be used for rent or a down payment on the purchase of a dwelling unit
- Moving and related expenses

The County's rehabilitation programs may also incur relocation issues when they provide minor additions to existing dwellings in order to address overcrowding. Any temporary relocation costs are included in the rehabilitation loan package offered to clients.

Technical Assistance

The County will, to the extent feasible, respond to requests for technical assistance from entities representing LMI groups who are seeking federal entitlement funding in accordance with grant procedures. This may include, but is not limited to, providing information regarding how to fill out applications, other potential funding sources, and referrals to appropriate agencies within and outside the County. "Technical assistance," as used here, does not include the provision of funds to the entities requesting such assistance. Assistance will also be provided by Office of Supportive Housing staff to interested individuals and resident groups who need further explanation on the background and intent of the Housing and Community Development Act, interpretation of specific HUD regulations, and project eligibility criteria for federal grants.

Appendix D – Community Engagement Summary

**Outreach
Results**

**County of Santa Clara
2020-2025 Consolidated Plan
Community Engagement Summary**

Summary Introduction

The County of Santa Clara and each of its Cities helped create an engagement program that included community meetings, stakeholder interviews, focus group meetings, a community needs survey, and pop-up events. The engagement program began in its planning processes in October and was completed at the end of December. The following summarizes of the highlights of the engagement program. The table below lays out all engagement events including their dates, locations and attendance. Overall, it is estimated that these engagement efforts reached about 2,400 residents.

Events Table			
Event	Date	Location	Attendance
Community Needs Survey			
Community Needs Survey	October 25, 2019 – December 26, 2019	Online/Paper	Responses: 1,950
Regional Public Forums			
Morgan Hill Public Meeting	November 4, 2019	Morgan Hill Council Chambers	8
Palo Alto Public Meeting	November 7, 2019	Palo Alto City Hall Community Meeting Room	9
Cupertino Public Meeting	November 12, 2019	City of Cupertino Community Hall	14

Regional Public Forums – Location of Meeting

Four regional public forums were held throughout Santa Clara County in the Cities of Morgan Hill, San José, Palo Alto, and Cupertino. Over 2,700 flyers were distributed to advise residents about and encourage them to attend these forums. These Regional public forums were held on/at:

November 4, 2019 @ Morgan Hill City Hall, California

November 7, 2019 @ Palo Alto City Hall, California

November 12, 2019 @ Cupertino Community Hall, California

November 20, 2019 @ Roosevelt Community Center, San José, California

A brief overview of the planning process for the Analysis of Impediments to Fair Housing Choice and the 2020-2025 Consolidated Plan was provided and a listening session with live polling was conducted. The following questions were asked:

Question 1. What should the County’s top priorities be over the next 5 years?

Question 2. Where are any neighborhood revitalization target areas?

Question 3. What do you feel are the most common or pressing housing problems in the County?

Question 4. What are the ways to overcome these problems?

Question 5. How do you feel local organizations/service providers can better support your priorities?

Question 6. In what ways are LMI families vulnerable to crisis situations, such as natural

disasters?

Question 7. Do you feel there is an issue with broadband access and technical literacy? If not, what support is missing?

Question 8. How do you feel the County should spend their annual CDBG allocation? (*Eligible projects are: community and social services, economic development assistance; improvements to public infrastructure and facilities; affordable housing; homelessness; and housing rehabilitation*).

The major themes and outcomes from regional public forums were:

What should the County's top priorities be over the next 5 years?

Housing maintenance and rehabilitation

Continue to fund and create sustainable housing solutions

Increase affordable housing

Continue to work with and improve homeless prevention programs, shelters, education and job/housing placement

Provide more assistance for emergency assistance including transitional housing

Provide more services for special needs populations: particularly single-income families, seniors, and homeless youth

Increase services for senior citizens and mental health (consumers)

Provide needed workforce development Where are any neighborhood revitalization target areas? (priority order)

San José

Downtown San José

South San José

Central San José

San José-Monterey Road Corridor (poverty and lack of planning)

East San José (high gang activity)

Little Saigon, Alum Rock, Foothills

Coyote Creek

Alviso

Monterey Rd.

District 8

17th & Santa Clara St.

Mayfair

Rengstorff Park

Southwest Expressway

Tully Rd.

Wooster area

Roosevelt Park

Gilroy- (high gang activity)

East Gilroy and Glenview neighborhoods.

C. Morgan Hill (Boundary area between Morgan Hill and Gilroy)

D. El Camino Real

E. Other Areas Mentioned

BART, VTA, and Caltrain corridors

Mayfair (San José)

East Milpitas at Route 680 area

Stevens Creek

Older shopping areas and vacant lots throughout the County

What do you feel are the most common or pressing housing problem in the County?

Affordability, particularly for the extremely low income; starter homes are too expensive

Not enough affordable housing

Diversity of housing types are not available

Support for transitioning homeless (e.g., financial, medical and social)

Housing suitability for diverse population

Private sector funding for city or service programs

Affordable housing zoning

Amenities for concentrated areas of affordability

Tech companies in cities have driven the cost of housing up

Monitored portable bathroom sites

Subsidized auto repair and medical services

What are the ways to overcome these problems?

First-time homebuyer loans

Housing and employment assistance for foster youth who age out of system

Streamline planning, permitting and development processes

Community planning that supports sustainable density development. (i.e., TODs, incentives and infrastructure for affordable transportation, bicycles and pedestrians)

Regulatory requirements for housing diversity or alternative housing

Mobile home parks are being bought out and unit rent prices go up.

Family financial literacy

Job training for young farmers (i.e., education and support for new agricultural technologies)

Subsidies or prevention programs for families at risk of displacement

Increase the 15% cap for social services

Create a resource navigation center for individuals or social services to use and update

How do you feel local organizations/service providers can better support your priorities?

County, city and service organizations can collaborate and leverage more funding (e.g., City of Mountain View Safe Parking, Move Mountain View and Lots of Love are working together)

In what ways are LMI families vulnerable to crisis situations, such as natural disasters?

Lack of emergency funds for family emergencies, job loss, homelessness, single income families, and extremely low-income households

Emergency preparedness in the home and for a community-sized crisis

Efficient communication

Do you feel there is an issue with broadband access and technical literacy?

Mountain View and Morgan Hill have issues with cell service

Centralized facilities are needed for libraries and community centers

Rapid technology updates make it difficult for communities and/or families to keep up

Technology is needed at senior centers

Affordable collaborative internet service for qualified areas

How do you feel the County should spend their annual CDBG allocation? (*Eligible CDBG projects are: community and social services, economic development assistance; improvements to public infrastructure and facilities; affordable housing; homelessness; housing rehabilitation*).

Affordable housing particularly near employment centers

Housing rehabilitation – special needs populations

Homelessness – improve interim housing and services options

Home buyer programs

Transit service expansion and bus service for seniors and homeless

Community and social services

Mental health services

Economic development assistance

Improvements to public infrastructure and facilities

Recreation and open spaces

Stakeholder Interview Meetings

Throughout the County twenty-one stakeholder interviews were held, typically at their places of business. The same eight questions (shown on page 4) were asked of each of the stakeholders. The following provides a collective summary of the overarching themes associated with the eight questions mentioned on page two of this Community Engagement Summary. The following entities were interviewed:

Asian Americans for Community Involvement
 Bridge Housing
 Charities Housing
 Community Services Agency
 CommUniverCity San José
 Destination: Home
 Downtown Streets Team
 Eden Housing
 City of Gilroy Recreation Department
 Grid Alternatives
 WeHOPE

The Health Trust
 Heart of the Valley
 Housing Choices Coalition
 LifeMoves
 Loaves and Fishes Family Kitchen
 Rebuilding Together Silicon Valley
 Santa Clara Family Health Plan
 Silicon Valley FACES
 Silicon Valley Leadership Group
 Vista Center for the Blind and Visually Impaired
 Santa Clara County Continuum of Care (CoC)

Issue	Needs
Affordable Housing	
The market for housing is bigger than what is available	<p>Increase affordable housing options and alternatives (varieties are needed in size and income levels, particularly for extremely-low and low-income, homeless, disabled, singles, large families, and elderly residents) in the County. There is legislation requiring more affordable housing, but there is no timetable.</p> <p>Increase funds to build or rehab homes, old nursing/care units, and mobile home parks (particularly near places of employment and transit routes). Commuter numbers are high. There are 120,000 units proposed near transit in the Bay Area.</p> <p>Create grant or loan programs for property maintenance.</p> <p>Create land acquisition funding programs that purchase land dedicated to new housing. Work with Cities to target specific lands.</p> <p>Create housing plans that fund and implement housing for working families or “Middle Housing.”</p> <p>Revitalize mobile home parks, particularly in District 7 (in San José).</p> <p>Expand voucher programs to include motels, group homes, and other temporary housing.</p>
Homeownership is rapidly declining	<p>Increase and continue area-wide first-time home buyers’ programs.</p> <p>Increase subsidies for down payment.</p> <p>Review and fill the gaps that exist in mortgage affordability after upfront costs fulfilled.</p> <p>Provide assistance for housing needs when move-in occurs.</p> <p>Create incentives for property owners to sell to pre-established lists of LMI families.</p>

Issue	Needs
High cost of land and construction forces higher unit prices	Incentivize developers through subsidies to integrate affordable units. (Unit prices are based on economy, the better the economy the higher rent prices). Seek out more County distributed Housing Choice Vouchers.
The issue of market rate dependent housing and affordable housing are separate issues	Create affordable housing solutions that do not involve cutting back on market rate housing development.
We do not involve private companies who care	Approach private companies that employ below median income residents to assist in financing affordable housing development.
Affordable housing projects take too much time	Create solutions to reduce the time it takes to build affordable housing. Many granting agencies do not want to see a “built” project prior to funding. Takes too long to satisfy public policy. Many plans require variances which can be a lengthy process. Develop regional action to allocate land, target needs, and implement.
There is a lack of neighborhood planning and amenities	Create or revitalize neighborhoods with new housing and needed amenities including parks, lighting, and good infrastructure. Review proposals in the region that support neighborhood sustainability (e.g., District 1-Project HOPE – cultivates leadership and support from SJSU for 1-2 years to improve community involvement, cleanliness and crime reporting). Improve and create flexible zoning particularly in San José. Advocate that Cities update ordinances to include flexible, dense and inclusionary residential and mixed-use zoning. Create consistent land use policies for inclusionary housing. Morgan Hill has an inclusionary housing ordinance.
Annual rents and housing values are not affordable but continue to rise	Create local policies and advocacy for rent and housing value stabilization. Increase funding for rental subsidy programs. Create model policies/programs that promote more affordable housing (Review San Jose’s District 3 Community Leadership Council) (including Hensley and Hyde Neighborhoods)
Developers do not get involved in local planning	Engage housing developers and the business community when developing Specific/Master Plans and Housing Element background studies and recommendations.
Vital Services & Homelessness Prevention	
Lack of services for homeless residents	Provide appropriate training for intake staff (navigators) that includes a variety of individual needs. increase communication on needs, gaps and accomplishments.

Issue	Needs
	Create nutrition programs, cooking instruction and food delivery assistance where homeless exist.
Lack of an anti-homeless strategy (Homeless Prevention)	<p>Create an inclusive homeless strategy, particularly for special needs populations.</p> <p>Support is needed for other at-risk homeless due to high cost of living (e.g., college students, former homeless, those who cannot live alone, and those with a criminal history).</p> <p>Provide safe parking areas for unsheltered homeless populations having vehicles and RVs (Palo Alto and Mountain View prohibits RVs).</p> <p>Develop a comprehensive wrap-around services program for a variety of social service organizations to use.</p> <p>Increase the number of shelters and shelter space in the County; particularly cold weather shelter, emergency shelters and safe parking areas.</p> <p>Greater communication and integration of social service entities.</p> <p>Implement the CoC's Community Plan to End Homelessness.</p> <p>Establish goals and strategies that address the root cause of homelessness, housing affordability and barriers to new housing development. Build more housing for extremely low-income households.</p>
There are not enough social service entities to handle homelessness issues	Increase and or franchise reputable service entities to serve other locations.
Complex system for housing and homeless people	Reduce complexity and streamline intake systems for homeless needing housing.
There is a high turn-over rate in service provider staff	Increase wages and professional development for County and outside agency service providers and staff.
County services are strained and communication with other services is low.	The County should study the feasibility of outsourcing some of its services to existing social service agencies. Collaborating with other service entities may solve capacity problems.
CoC has limited communications	The CoC can become more effective if they could increase communication on needs, gaps and accomplishments.
Vital Services & Homelessness Prevention	
Individuals do not know what services are available	Update County resource guides and websites that point to the right agency. The resources could be listed by "need" and provide contact and address and emails. Service agencies could adopt response policies for service linkage. (It was reported there are sometimes 10 days that will go by without a response.)

Issue	Needs
Lack of food in certain areas of the County	<p>Prepare a list of the probable food desert areas and collaborate with service entities that can provide routine nutrition and food delivery service.</p> <p>Create and or expand food storage spaces.</p> <p>Work with local grocers to create secondary outlets in designated food deserts.</p> <p>Provide food subsidies to individuals with chronic health issues, particularly those at-risk (e.g., drug/alcohol/chronic health conditions, and those under 60 where other organizations cannot provide services).</p>
Increase Family Income	
Keeping up with the cost of living	<p>Increase earning capacity of the LMI County residents.</p> <p>Stabilize rent costs.</p> <p>Create rainy-day funds for LMI households (most LMI families are at-risk for homelessness).</p>
Families & Individuals in Transition	
Families in transition are struggling	<p>Create County-driven transitional housing programs and services.</p> <p>Services and assistance are needed for women with young children.</p>
Lack of transitional housing, permanent supportive housing and rapid rehousing units	<p>Increase transitional housing.</p> <p>Increase rapid rehousing units and services.</p>
Family displacement	<p>Create programs that serve residents who can no longer afford to remain in their homes. (This is due to rising housing bills - rents or property taxes - or when residents are forced out due to causes such as eminent domain, lease non-renewals, and or mandatory evictions to make way for new development.)</p> <p>East San José area, in particular, is experiencing displacement.</p> <p>County and its Cities should create displacement policies when new (re)development is occurring.</p>
Special Needs or Target Populations	
Increased number of individuals with mental/behavior health issues	<p>Increase funding for more trained counseling and referral personnel.</p> <p>Create life skills training in larger residential buildings where there is more demand.</p> <p>Research the feasibility of provide more mental health recovery centers.</p>
Housing elements do not improve conditions for special needs/target populations	<p>Realign Housing Elements, General Plans and Specific Plans to include to a larger degree the needs and goals for the underserved.</p>

Issue	Needs
Increased numbers of victims of domestic violence	Increased services for victims of domestic violence.
Lack of services for new immigrants	Increase housing and services for newly immigrated families. Services that help families with credit establishment and rental history for housing placement.
Unemployed special needs populations	Increase workforce training and employment assistance.
Language barriers	Reduce communication barriers for housing and services. Increase ESL classes.
Lack of elderly (aging) services	Funding assistance is needed for senior care and housing. Such programs require more oversight. Provide traveling classes that engage seniors in technology. Create nutrition programs and food delivery assistance to homebound seniors. Create policies that new housing units be accessible. Promote handicap accessibility with all new units by providing elevators, at-grade front entrances or first floor bedrooms, kitchens and bathrooms.
Increasing at-risk youth	Provide separate emergency shelter space. Create safe spaces to foster and provide oversight, particularly children of domestic violence. Provide technology resources to youth that are homeless or whose families are LMI. School district communication improvements for parents to provide homework and tutoring assistance.
Neighborhoods are not accessible	Increase visitable homes and places in neighborhoods (e.g., wheelchair ramps bathrooms, curbing, sidewalks, handrails).
Emergency/Natural Disaster Effect Vulnerable Populations	
Vulnerable populations are most impacted by power outages	Create policies on being electric dependent (e.g., San José may switch to all electric water heating).
Residents and older buildings are never ready for disasters	Promote flooding and emergency preparedness classes, making sure communication gaps are covered. Create a rapid emergency grant program that funds or insures from the government for vulnerable LMI residents (e.g., flooding, fire, etc.). Create programs to rehab properties that experience frequent damage from disasters. Create programs that fund LMI homeowners rebuilding projects.
Lack of emergency providers and low response times	Create more County-driven emergency management employment opportunities and positions.

Issue	Needs
Low access to services during a disaster	<p>Emergency providers should discuss the LMI issues and service needs to better determine needs.</p> <p>Services should include replacement of household basic needs (e.g., food and water replacement). Mobile home park households are particularly at risk.</p> <p>Provide interpreters when needed for services provided, particularly Vietnamese.</p> <p>Identify where vulnerabilities in the community or neighborhood exist, so they can be assisted first.</p>
Lack of emergency housing and solutions for displaced families	<p>Engage in post-disaster planning particularly for family displacement housing and food and health needs.</p> <p>Create places to park vehicles owned by displaced families.</p>
Emergency/Natural Disaster Effect Vulnerable Populations	
Broadband quality if low in certain areas of the County	<p>Public – Private partnership are encouraged to bridge the digital divide. Work with cellular providers to improve services in LMI areas.</p> <p>Continue to overcome the digital divide. Fund projects that increase digital inclusion and reduce cost to access.</p> <p>Build new affordable housing units with reduced cost WiFi.</p> <p>Provide technical support regarding WiFi safety for LMI families, particularly the elderly.</p> <p>Fund computer hardware and software upgrades in schools.</p>
Shelters lack full services for employment needs	<p>Increase employment and workforce training for shelter counselors and staff.</p>
Getting to transit routes and affording rides is difficult	<p>Improve ride-share programs, particularly transit payment systems.</p>
Lack of technology resources for LMI households	<p>Guide unemployed persons to places having direct access and public computer resources.</p>
Fair Housing	
Landlords do not respond to poor housing conditions and tenants needs	<p>Increase education for tenant rights.</p>
LMI residents are not engaged	<p>Create engagement activities and programs that help craft specific solutions, particularly with Vietnamese communities.</p>
Individuals with disabilities looking for housing have difficulty	<p>Increase local advocacy for planning for disabilities.</p>
Target Areas	

Issue	Needs
Neighborhood revitalization	<p>San José: Downtown San José; South San José; Central San José; San José- Monterey Road Corridor (poverty and lack of planning); East San José (high gang activity); Little Saigon; Alum Rock; Foothills; Coyote Creek; Alviso; Monterey Rd.; District 8; 17th and Santa Clara St; Mayfair; Rengstorff Park; Southwest Expressway; Tully Road; Wooster area; and Roosevelt Park.</p> <p>Gilroy (high gang activity): East Gilroy and Glenview neighborhoods.</p> <p>Morgan Hill (Boundary area between Morgan Hill and Gilroy)</p> <p>El Camino Real</p> <p>Other Areas Mentioned: BART/VTA/ and Caltrain corridors; East Milpitas, Route 680 area; Stevens Creek, off Route 85, near Mountain View; Cupertino; Milpitas; Story and Keene [King or Keyes]; Eastridge; Old Oakland Road (near mobile home park); Riverbend (near mobile home park); San Martin; and Older shopping areas and vacant lots throughout the County.</p>
Safety improvements	<p>McKinley; north of the McLaughlin Road ramps. Homeless encampments have caused some pedestrian safety issues.</p> <p>Washington: 1st and Oak Streets. Crime, child endangerment, constant trespassing and police issues.</p> <p>Jackson, between 10th and 11th, Grant Elementary has a traffic safety issues for students and pedestrians.</p> <p>Coyote Creek encampments and Scott & Keys low-income residents.</p>
Future CDBG Expenditures	
More affordable housing	<p>Invest in new housing and housing rehab programs and projects that increase the number of affordable units.</p> <p>Actively support and show advocacy for current and future local development proposals for affordable housing.</p> <p>Support efforts to create conversions of larger dwellings to multiple units.</p> <p>Create short-term housing while housing rehab or while new housing projects are being built.</p>
Poor housing conditions	<p>-Complete more housing rehabs.</p> <p>-Reduce the number of vacant homes and properties.</p>
Social Services/Homelessness	<p>Funding Priorities include:</p> <p>Homelessness prevention programs.</p> <p>Funding for staffing salaries.</p> <p>Wellness programs.</p> <p>Build more shelters and expand existing shelter capacity.</p>

Issue	Needs
	Seek out available housing and provide services particularly for elderly and disabled.
Transportation	Transit improvements to connect LMI areas to employment centers.
Community facilities	Revitalize older city infrastructure, particularly accessibility for seniors and disabled individuals.
Economic development	Fund private business needs for expansion or employee hire. Fund transportation and event costs for routine job fairs in various regions of the County.
Other Notes	
Notes: Difficult County and or City CDBG Application process	Decrease the paperwork associated with grant application preparation. It is often felt the process is not worth it. Increase funding for social services. Reduce the number of awarded applicant and give larger amounts to grantees to make a difference.
San José – Tax proposal	Property transfer tax ballot measure proposal for affordable housing. See: https://sanjosespotlight.com/san-jose-officials-propose-new-property-tax-for-affordable-housing/

Focus Group Meetings

There were four focus groups held on November 7, 2019, November 18, 2019, November 21, 2019 and December 10, 2019. There were a total of 7 attendees. Each of the attendees were from the following social service entities:

Boys and Girls Clubs of Silicon Valley

Healthier Kids Foundation

Live Oak Adult Day Services

San José Conservation Corps Charter

Agency Priorities:

Address the lack of housing stock and housing diversity and options

Address lack of housing through strong outreach programs – local and regional

County driven affordable housing projects

Increase alternatives for special needs residents, particularly those with disabilities

Improve transit and incentives to take transit

Improve health and safety, particularly mental health options for low income families

Workforce development, particularly for young adults

Target areas:

Downtown Gilroy (1st to 10th Streets on Monterey Blvd.) and east of railroad tracks

El Camino Real

Morgan Hill

Transit hubs all around the County

Most common/pressing problems:

Cost of housing. Morgan Hill Schools are closing due to low enrollment

Lack of variety of housing types and lack of land

Lack of financial support networks

Lack of transitional housing (e.g., tiny homes, accessory housing)

Lack of zoning regulations that are affordable housing friendly

Lack of funding for social services, particularly mental health and professional development (after high school)

Gentrification has pushed affordable housing outside the cities

Fair housing rules for discrimination seem to be unclear, particularly with individuals with criminal records, bankruptcy, or disabilities

Lack of coordination between resource organizations

How can we overcome these problems:

Create housing bond programs

Restructure federal funds policies, particularly with service or partner organization pulling funds together for a common project; too strict of spending caps with special needs populations

Create services that provide financial assistance when a catastrophic family event occurs (e.g., layoff, illness)

Grant writing assistance at the local level

Create measurements that prioritize affordable housing

Regional Community Needs Survey

Santa Clara County initiated a Community Needs Survey on October 25, 2019 to December 26, 2019. The survey received 1,950 responses. The survey was available to complete online or by hand, and it was distributed and made available in English, Spanish, Vietnamese and Chinese. Over 2,700 flyers were distributed to encourage participation in this survey. The following summary highlights survey responses in detail. Occasionally, write-in responses added additional insight when specific response options were not available, and they will be noted as a part of their question’s summary.

Introductory Questions						
Where do you live?			What language do you speak?			
City	#	%	English	Spanish	Vietnamese	Chinese
Campbell	21	1.1%	21	0	0	0
Cupertino	17	0.9%	16	1	0	0
Gilroy	511	26.2%	283	224	2	2
Los Altos	31	1.6%	29	0	0	2
Los Altos Hills	4	0.2%	4	0	0	0
Los Gatos	10	0.5%	10	0	0	0
Monte Sereno	0	0.0%	0	0	0	0
Milpitas	0	0.0%	0	0	0	0
Morgan Hill	55	2.8%	40	14	0	1
Mountain View	238	12.2%	206	22	0	10
Palo Alto	53	2.7%	51	1	0	1
San Jose	650	33.3%	630	17	2	1
City of Santa Clara	82	4.2%	80	0	0	2
Saratoga	10	0.5%	10	0	0	0
Sunnyvale	87	4.5%	81	6	0	0
Unincorporated Santa Clara County	16	0.8%	15	0	0	1
Don't Know	3	0.2%	3	0	0	0
Skipped Which City Question	162	8.3%	152	6	1	3
Total (Paper and Online)	1,950	100.0%	1,631	291	5	23

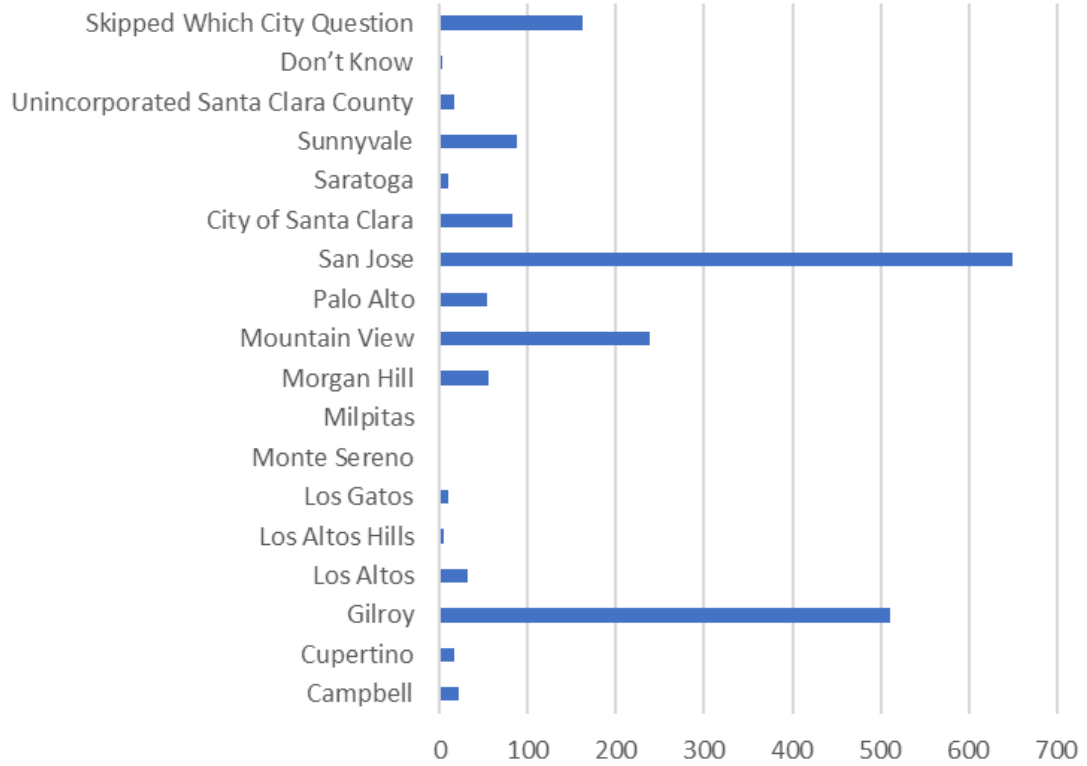

Note: We received one response from a Milpitas resident but note that Milpitas is not participating in the preparation of the 2020-2025 Consolidated Plan. Milpitas’ Consolidated Plan covers a different 5-year period.

The three following figures display the percent of surveys taken in each language, as well as the number of online and paper survey respondents per specified City, and a map showing responses per City. The most common language in which respondents responded was in English

(84%). Of the 1,950 survey responses received, most were provided by residents in the Cities of San José (650) and Gilroy (511).

Do you work in the County of Santa Clara?

Beyond questions of where survey respondents live within the County, further data was gathered on where respondents work within the County, and on how they best identify themselves (e.g., responding as a resident, business owner, service provider, etc.). The results follow.

Whether Respondents Work in County - Response Options	Responses	English	Spanish	Chinese	Vietnamese	Total
Yes	68.88%	1,037	224	11	3	1,275
No	30.09%	501	46	9	1	557
Unincorporated Santa Clara	0.32%	3	3	0	0	6
Don't Know	0.70%	12	1	0	0	13
Answered Question		1,553	274	20	4	1,851
Skipped Question		78	17	3	1	99

In Which City Do You Work?

Answer Choices	Responses	English	Spanish	Chinese	Vietnamese	Total
San Jose	36.46%	424	30	1	0	455
Gilroy	15.46%	118	74	0	1	193
Mountain View	10.74%	108	19	7	0	134
Palo Alto	8.41%	101	3	1	0	105
City of Santa Clara	6.81%	82	1	2	0	85
Sunnyvale	5.93%	72	2	0	0	74
Morgan Hill	4.73%	36	22	1	0	59
Cupertino	2.80%	33	2	0	0	35
Campbell	1.04%	13	0	0	0	13

Los Altos	0.88%	10	0	1	0	11
Unincorporated Santa Clara County	0.88%	10	0	1	0	11
Los Gatos	0.56%	7	0	0	0	7

Answered		1076	154	15	3	1248
Skipped		555	139	8	0	702

According to survey responses across all languages, 68.88% of respondents work within the County. Most respondents identified that their workplace is in San José (36.46%), followed by Gilroy (15.46%) and Mountain View (10.74%).

Who are You?

As shown below, the vast majority of survey respondents self-identified as residents of the County (86.24%). The remaining 13.76% of respondents self-identified as Community Based Organizations or Non-Profits (4.25%), Other (3.49%), Public Agencies (2.53%), and Business Owners (2.26%). A common write-in response showed that many identified as retirees, which was not a response option.

How Respondents Self-Identify – Response Options	Responses	English	Spanish	Chinese	Vietnamese	Total
Resident	86.24%	1,331	252	18	3	1,604
Business owner	2.26%	34	6	2	0	42
Service provider	1.24%	20	3	0	0	23
Public agency	2.53%	45	2	0	0	47

Community-based organization/ non-profit	4.25%	71	8	0	0	79
Other	3.49%	60	5	0	0	65
Answered		1,561	276	20	3	1,860
Skipped		70	15	3	2	90

Priority Overall Needs

Following introductory questions pertaining to place of residence, place of work, and self-identification, respondents were asked to rank levels of needs for specified areas within in the following categories: **1) Overall, 2) Housing, 3) Economic Development, 4) Public Facilities, 5) Public Services.** In each of these categories, respondents had the opportunity to write-in additional areas not specified in the survey. Respondents were asked to rate the need for the specified areas as “low,” “medium,” or “high” need or “don’t know.” “Low” need was assigned the number “1”, “medium” was assigned “2” and “high” need was assigned a “3.” Then, these responses were weighted to account for the number of responses received in each language category to produce an overall needs ranking.

For **Overall Needs**, respondents rated the level of need in their neighborhoods in the following areas:

- Create additional affordable housing available to low-income residents.
- Improve non-profit community services (such as senior, youth, health, homeless and fair housing).
- Improve city facilities that provide public services (such as parks, recreation or senior centers, parking facilities, and street improvement).
- Create more jobs available to low-income residents.

For these Overall Needs, the weighted responses for these areas are contained in the table that follows.

Overall Needs	English	Spanish	Chinese	Vietnamese	Combined Weighted Average
Create additional affordable housing available to low-income residents	2.47	2.79	1.75	3	2.5
Improve non-profit community services (such as senior, youth, health, homeless, and fair housing services)	2.37	2.75	2	3	2.4
Improve city facilities that provide public services (such as parks, recreation or senior centers, parking facilities, and street improvements)	2.25	2.66	2.5	3	2.3
Create more jobs available to low-income residents	2.28	2.81	1.92	3	2.3
Answered	1319	277	15	1	
Skipped	312	14	8	4	

Priority Housing Needs

Following Overall Needs, survey respondents were then asked to rate 13 different **Housing Needs** related improvements in their areas. The top needs were: 1) Increase affordable rental housing inventory; 2) Housing for other special needs (such as seniors and persons with disabilities); 3) Rental assistance (tenant-based rental assistance) for the homeless; Permanent supportive rental housing (housing with case management and supportive services) for people who are homeless; 5) Affordable housing located near transit; and 6) Healthy homes (free of mold, lead, etc.) (Note: Responses 3-6 tied with a weighted average of 2.3). The overall responses for all 13 options are displayed in the table that follows.

Housing Needs	English	Spanish	Chinese	Vietnamese	Combined Weighted Average
Increase affordable rental housing inventory	2.52	2.7	1.83	3	2.5
Housing for other special needs (such as seniors and persons with disabilities)	2.4	2.77	2.08	3	2.4

Housing Needs	English	Spanish	Chinese	Vietnamese	Combined Weighted Average
Rental assistance (tenant-based rental assistance) for the homeless	2.33	2.72	1.64	1	2.3
Permanent supportive rental housing (housing with case management and supportive services) for people who are homeless	2.35	2.74	1.64	3	2.3
Affordable housing located near transit	2.34	2.58	1.83	3	2.3
Healthy homes (free of mold, lead, etc.)	2.34	2.78	2	1	2.3
Energy efficiency and sustainability improvements	2.19	2.64	1.92	3	2.2
Down payment assistance to purchase a home	2.11	2.69	1.91	1	2.1
Code enforcement, in coordination with a neighborhood plan	2.19	2.55	1.92	1	2.1
Housing accessibility improvements	2.06	2.75	1.75	1	2.0
Rental housing rehabilitation	2.03	2.63	1.83	1	1.9
Emergency home improvement/repair	1.98	2.65	1.92	3	1.9
Owner-occupied housing rehabilitation	1.87	2.46	2.33	3	1.7
Answered	1,319	276	13	1	
Skipped	312	15	10	4	

Priority Economic Development Needs

The next needs area for respondents to rank options was **Economic Development: Job Creation in Low-Income Neighborhoods**. For this section, there were five different economic development related improvements to be rated by need. “Job training for people who are homeless” was identified as the largest need for this section. The full results follow. A common write-in response showed a need for public transportation access to job locations, which was not a response option.

Economic Development Needs	English	Spanish	Chinese	Vietnamese	Combined Weighted Average
Job training for people who are homeless	2.44	2.73	2.17	3	2.4
Financial assistance for low-income residents for business expansion and job creation	2.14	2.72	2.08	1	2.2
Storefront improvements in low-income neighborhoods	2.07	2.59	1.83	3	2.0
Microenterprise assistance for small business expansion (5 or fewer employees)	2.04	2.54	1.92	3	1.9
Public improvements to commercial / industrial sites	1.8	2.5	2.33	3	1.8
Answered	1,297	264	13	1	
Skipped	334	12	10	4	

Priority Public Facilities Needs

The next category in the survey was **Public Facilities**. This section had 14 improvement options to public facilities available for ranking. The top three rated needs were: 1) Mental health care facilities, 2) Facilities for children who are abused, abandoned and/or neglected, and 3) Homeless facilities (temporary housing and emergency shelters). The full results follow.

Public Facilities Needs	English	Spanish	Chinese	Vietnamese	Combined Weighted Average
Mental health care facilities	2.59	2.72	2.25	1	2.5
Facilities for children who are abused, abandoned and / or neglected	2.58	2.78	2.33	3	2.5

Priority Public Services Needs

Next, **Public Services** needs offered the most improvement options of any section with 24. Out of the 24 for this section only, the top needs were: 1) Mental health services, 2) Homeless services, 3) Services for children who are abused, abandoned and/or neglected, 4) Neighborhood cleanups (trash, graffiti, etc.), and 5) Emergency housing assistance to prevent homelessness – such as utility and rental assistance.

The top responses for this section highlight the same type of needs identified as the previous section, demonstrating that respondents in the County may have a very strong desire for better mental health and homeless services. The full results follow.

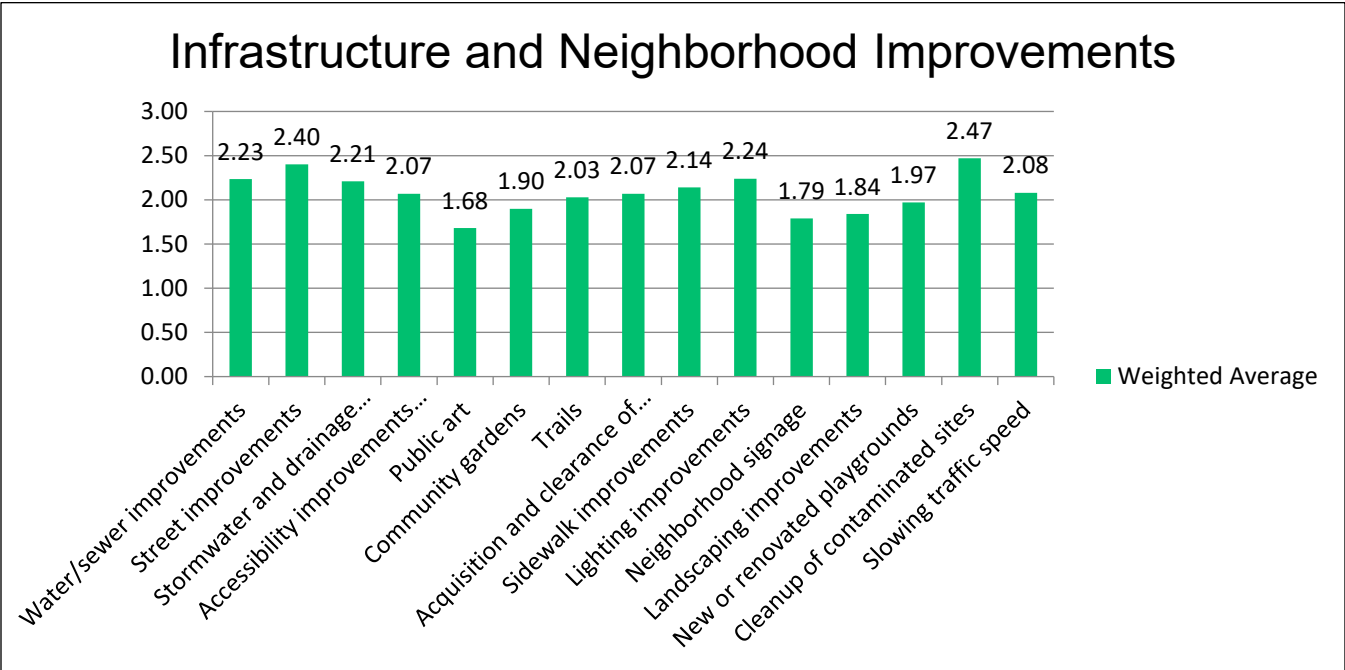

Public Services Needs	English	Spanish	Chinese	Vietnamese	Combined Weighted Average
Mental health services	2.61	2.73	2.17	3	2.5
Homeless services	2.44	2.78	1.58	3	2.4
Services for children who are Abused, abandoned and/or neglected	2.52	2.79	2.17	3	2.4
Neighborhood cleanups (trash, graffiti, etc.)	2.41	2.72	1.83	3	2.4
Emergency housing assistance to prevent homelessness – such as utility and rental assistance	2.41	2.77	1.83	3	2.4
Crime awareness/prevention services	2.35	2.81	2.42	1	2.3
Employment training services	2.36	2.69	2.25	3	2.3
Youth services	2.35	2.75	2.08	1	2.3
Transportation services	2.34	2.55	2.75	3	2.3
Access to fresh and nutritious foods	2.3	2.72	2	1	2.3
Battered and abused spouses' services	2.35	2.73	1.92	3	2.2

Answered	1,301	266	15	1	
Skipped	330	25	8	4	

The preceding questions invited residents to rank needs across five different areas. The survey also included questions about housing discrimination and broadband access. A summary of these responses follows.

Priority Infrastructure and Neighborhood Improvements

Top priority needs that were identified for **Infrastructure and Neighborhood Improvements** are shown in the graph below. The top needs were: 1) Clean-up of contaminated sites, 2) Street Improvements, 3) Lighting Improvements, 4) Water/sewer improvements, and 5) Stormwater and drainage improvements.

Housing Discrimination

The survey asked respondents about their personal experiences with discrimination in housing opportunities, like at apartment complexes or when applying for a mortgage. Nearly 72% of responses indicated that “no” that they had not personally experienced housing discrimination. But, about 19% said they had experienced housing discrimination. Of those who had experienced discrimination, nearly 45% of those who completed the survey in Spanish reported that they had experienced housing discrimination compared to about 14 % of those who completed the survey in English.

Have you ever personally experienced housing discrimination?

Response Options	Responses	English	Spanish	Chinese	Vietnamese	Total
No	71.71%	979	120	11	0	1,110
Yes	19.19%	186	109	1	1	297
Don't Know	9.11%	123	15	3	0	141
Answered		1,288	244	15	1	1,548
Skipped		343	47	8	4	402

Where did discrimination occur?

Further examining discrimination, the next question asked where the act of discrimination occurred. The majority of respondents said the discrimination occurred at an apartment complex (65%), followed by single-family neighborhood (16%) and when applying for City/County programs (14%).

Where did the act of discrimination occur?

Response Options	Responses	English	Spanish	Chinese	Vietnamese	Total
Apartment complex	65%	104	83	1	1	189
Single-family neighborhood	16%	45	2	0	0	47
When applying for City/County programs	14%	29	11	0	0	40

Response Options	Responses	English	Spanish	Chinese	Vietnamese	Total
Public or subsidized housing project	11%	28	4	1	0	33
When applying for a Mortgage or Homeowner's Insurance	7%	17	3	0	0	20
Other (please specify)	6%	14	3	0	0	17
Trailer or mobile home park	5%	6	9	0	0	15
Condo development	5%	12	2	0	0	14
Answered		182	105	1	1	289
Skipped		1,449	186	22	4	1,661

Why were you discriminated against?

The third question on discrimination asked respondent to identify which was the basis for this discrimination (e.g., race, national origin, disability, etc.). Respondents were allowed to identify all basis for discrimination. The top response by a wide margin was “race” at 54%. The next most common responses were: familial status (families with children under 18), 16%; source of income (e.g., receipt of federal housing assistance, Section 8), 16%; color, 12%; national origin, 11%; and sex, 8%. The full results follow. A common write-in response showed that many felt discriminated against due to their age, and this was not a response option.

On what basis do you believe you were discriminated against?

Response Options	Responses	English	Spanish	Chinese	Vietnamese	Total
Race	54%	79	72	1	1	153
Familial status (families with children under 18)	16%	38	8	0	0	46
Source of Income (e.g. federal housing assistance, Sect. 8)	16%	39	5	1	0	45
Color	12%	28	5	0	1	34
National origin	11%	19	12	0	0	31
Sex	8%	22	1	0	0	23

Response Options	Responses	English	Spanish	Chinese	Vietnamese	Total
Retaliation for Complaining about Housing Discrimination	7%	12	7	1	0	20
Disability	5%	14	1	0	0	15
Religion	3%	7	2	0	0	9
Sexual orientation	2%	5	1	0	0	6
Gender Identity	0%	0	0	0	0	0
Another Protected Category from above or Other	13%	31	7	0	0	38
Don't Know	7%	12	8	0	0	20
Answered		181	100	1	1	283
Skipped		1,450	191	22	4	

Who discriminated?

The survey asked respondents to identify who discrimination against them. Responses provided showed that most respondents believed that the Landlord/Property Manager was the person responsible (80%), followed by City/County staff (10%). The full results follow.

Who do you believe discriminated against you?

Response Options	Responses	English	Spanish	Chinese	Vietnamese	Total
Landlord/Property manager	80%	143	77	1	1	222
Real estate agent	7%	14	6	0	0	20
Mortgage lender	7%	15	3	0	0	18
City/County staff	10%	21	5	1	0	27
Homeowners' Insurer	2%	4	1	0	0	5
Neighbor	6%	8	6	1	1	16
Don't Know	4%	5	5	0	0	10

Response Options	Responses	English	Spanish	Chinese	Vietnamese	Total
Other	4%	8	2	0	0	10
Answered		176	98	1	1	276
Skipped		1,455	193	22	4	1,674

Access to Opportunities

Respondents were asked about their access to opportunities. These responses were not combined and weighted, as some responses above were. Instead, the responses were ordered based on preference, and remained separated by language. These questions were not weighted since the responses did not have different degrees to them and could not be combined across languages. The top responses by language follow.

Does the neighborhood you live in provide you access to opportunities?

English Responses

Spanish Responses

Vietnamese Responses

Broadband Issues

The final issue addressed on the Community Needs Survey was internet/broadband access and availability. More respondents believe there are common broadband questions (32.88%) than those who do not (30.43%).

Do you feel there are common/pressing broadband internet problems (e.g., high-speed connectivity, availability of providers, etc.)?

Answer Choices	Responses	English	Spanish	Chinese	Vietnamese	Total
Yes	32.88%	420	59	4	0	483
No	30.43%	395	46	5	1	447
Don't Know	23.14%	252	85	3	0	340
If yes, what are they	13.55%	180	19	0	0	199
Answered		1,247	209	12	1	1,469
Skipped		384	82	11	4	481

Further, respondents were asked if they believe low- and moderate-income areas have adequate broadband access. While most said they “don’t know” (48%), for those that responded “yes” or “no,” the most common answer (32%) was “no,” that low- and moderate-income areas do not have adequate broadband access.

Do you feel that low- and moderate-income areas have adequate broadband access?

Answer Choices	Responses	English	Spanish	Chinese	Vietnamese	Total
No	32%	386	54	1	0	441
Yes	20%	236	45	2	1	284
Don’t Know	48%	602	63	9	0	674
Answered		1,224	162	12	1	1,399
Skipped		407	129	11	4	551

Pop-Up Engagement Activities

The engagement program included attending several pop-up events to inform residents of the planning process for the 2020-2025 Consolidated Plan, public meetings that were scheduled, and that the Regional Needs Survey was available. Four pop-up events were held at/on:

Farmers Market, City of Santa Clara, California, October 19, 2019

Farmers Market, City of Sunnyvale, California October 26, 2019

Farmers Market, City of Palo Alto, California, November 3, 2019

Community Center, City of Sunnyvale, California, November 21, 2019

Over 220 residents were polled and were asked, “What is most needed in your community?” Some of the most common responses were:

A regional forum on housing

Affordable housing

Development built close to public transportation

Mixed use development along El Camino Real

Work to expand public transit route options

Property maintenance is a problem

Create viable alternative temporary housing options for homeless (e.g., tiny homes)

Control rising rent costs

Regional Meetings Notification

An informational flyer was prepared for the various regional meetings. Over 2,700 flyers were distributed through City and County channels, including through websites, email, and handouts at area events, and at community centers and libraries. The flyer was prepared in four languages: English, Chinese, Spanish and Vietnamese. See flyers that follow. Social media and newspaper postings were also used to notify and invite residents to attend the regional meetings and participate in the survey. Newspaper postings are attached for reference in the attachment, and social media samplings are attached in the attachment as well.

Zoom Community Meeting

A community meeting was held via zoom, or video conferencing, on May 22, 2020. Residents and community-based organizations were invited via social media postings and email messages. Social media and Residents were More than 30 people attended this community meeting.

This meeting covered the following subjects: introduction, community engagement and draft priority needs and five-year goals for the 2020-2025 ConPlan; preliminary funding recommendations for the 2020-2021 Action Plan; next steps in the ConPlan and Action Plan hearing process, including invitation to attend the June 2, 2020, hearing on the County Subjects covered included. Attendees were also invited to participate, and participated, in a Question and Answer and Comment period. A copy of the PowerPoint and questions, comments, and answers are included in the Community Engagement Summary.

Attendees asked questions and provided feedback primarily about the preliminary funding recommendations that would be submitted to the Board of Supervisors at their June 2, 2020, hearing on the ConPlan and Action Plan. The PowerPoint used, and questions and answers from the questions and comments period are included in the following pages.

REGIONAL FORUMS

Are you a resident, service provider, business owner or housing professional in Santa Clara County? **Join the Discussion!**

Please join the County and Cities of Santa Clara for a series of Regional Forums to help identify **affordable housing, homeless and community improvement needs** over the next five years. **We want to hear from you!**

Why is this important to you?

The County and Cities of Santa Clara receive federal funds to invest in improving local communities. **How should these funds be spent?** Your input will help City and County leaders prioritize spending for important services and community improvements.

How can you participate?

1. Come to one of our interactive Regional Forums
2. Take our short online survey:

English: https://www.surveymonkey.com/r/SCC_REGIONALSURVEY

Spanish: https://www.surveymonkey.com/r/SCC_REGIONALSURVEY_ESPANOL

Vietnamese: https://www.surveymonkey.com/r/SCC_REGIONALSURVEY_TIENG_VIET

Chinese https://www.surveymonkey.com/r/SCC_REGIONALSURVEY_CHINESE

For more information:

http://bit.ly/AFH_ConPlan or the websites of the cities listed below.

Participating jurisdictions include: Campbell, Cupertino, Gilroy, Los Altos, Los Altos Hills, Los Gatos, Monte Sereno, Morgan Hill, Mountain View, Palo Alto, City of Santa Clara, San Jose, Saratoga, Sunnyvale, and Unincorporated Santa Clara County.

We will provide reasonable accommodations to include all participants. We need at least three (3) business days to accommodate requests for language interpretation, translation and/or disability-related assistance. Please contact Santa Clara County's Office of Supportive Housing, at diana.castillo@hhs.sccgov.org or (408) 793-1841 for assistance.

CÁC CUỘC HỌP KHU VỰC

Có phải quý vị là cư dân, người cung cấp dịch vụ, chủ doanh nghiệp hay làm việc trong ngành nhà ở tại Quận Santa Clara không? **Hãy cùng trao đổi với chúng tôi!**

Xin mời quý vị tham gia với Quận và Thành Phố Santa Clara trong một loạt các Cuộc Họp Khu Vực nhằm xác định các **nhu cầu về nhà ở giá vừa phải, người vô gia cư và việc cải thiện cộng đồng** trong năm năm tới. Chúng tôi muốn biết ý kiến của quý vị!

Tại sao điều này quan trọng đối với quý vị?

Quận và Thành Phố Santa Clara có nguồn quỹ liên bang để đầu tư vào việc cải thiện các cộng đồng địa phương. **Tiền quỹ nên được chi tiêu như thế nào?** Những ý kiến đóng góp của quý vị sẽ giúp các lãnh đạo của Thành Phố và Quận ưu tiên các dịch vụ quan trọng và nhu cầu cải thiện cộng đồng cần được chi trả.

Quý vị có thể tham gia bằng cách nào?

1. Đến dự một trong các Cuộc Họp Khu Vực mang tính tương tác
2. Điền vào một bản khảo sát trực tuyến ngắn:

Tiếng Anh: https://www.surveymonkey.com/r/SCC_REGIONALSURVEY

Tiếng Tây

Ban Nha: https://www.surveymonkey.com/r/SCC_REGIONALSURVEY_ESPANOL

Tiếng Việt: https://www.surveymonkey.com/r/SCC_REGIONALSURVEY_TIENG_VIET

Tiếng Hoa: https://www.surveymonkey.com/r/SCC_REGIONALSURVEY_CHINESE

Để biết thêm chi tiết:

http://bit.ly/AFH_ConPlan hoặc vào xem trang web của các thành phố dưới đây.

Các khu vực tham gia bao gồm: Campbell, Cupertino, Gilroy, Los Altos, Los Altos Hills, Los Gatos, Monte Sereno, Morgan Hill, Mountain View, Palo Alto, Thành Phố Santa Clara, San Jose, Saratoga, Sunnyvale và các vùng Quận Santa Clara chưa được sáp nhập.

Chúng tôi sẽ cung cấp các tiện nghi hợp lý để giúp cho tất cả mọi người có thể tham gia. Cần thông báo trước ít nhất ba (3) ngày làm việc để chúng tôi có thời gian sắp xếp dịch vụ thông dịch, phiên dịch và/hoặc hỗ trợ người khuyết tật. Vui lòng liên lạc với văn phòng Office of Supportive Housing tại diana.castillo@hhs.sccgov.org hoặc (408) 793-1841 để được trợ giúp.

Plan Consolidado 2020 - 2025

FOROS REGIONALES

¿Es usted un residente, proveedor de servicios, dueño/a de negocio o profesional de vivienda en el Condado de Santa Clara? **¡Partícipe en la Discusión!**

Por favor únase con el condado y las ciudades de Santa Clara para una serie de Foros Regionales donde se identificarán **necesidades de mejoramiento para viviendas asequibles, lugares comunitarios y para personas sin hogar** dentro de los próximos cinco años. **¡Queremos su opinión!**

¿Por qué es importante para usted?

El condado y las ciudades de Santa Clara reciben fondos federales para invertir en el mejoramiento de las comunidades locales. **¿Cómo deben usarse esos fondos?** Su opinión ayudará a los líderes del condado y de las ciudades a priorizar servicios importantes y mejoramientos comunitarios.

¿Como se puede participar?

1. Venga a uno de nuestros Foros Regionales interactivos
2. Tome nuestra encuesta:

Inglés: https://www.surveymonkey.com/r/SCC_REGIONALSURVEY

Español: https://www.surveymonkey.com/r/SCC_REGIONALSURVEY_ESPANOL

Vietnamita: https://www.surveymonkey.com/r/SCC_REGIONALSURVEY_TIENG_VIET

Chino: https://www.surveymonkey.com/r/SCC_REGIONALSURVEY_CHINESE

Para más información:

Visite http://bit.ly/AFH_ConPlan o la página web de las ciudades listadas a continuación.

Jurisdicciones participantes incluyen: Campbell, Cupertino, Gilroy, Los Altos, Los Altos Hills, Los Gatos, Monte Sereno, Morgan Hill, Mountain View, Palo Alto, Ciudad de Santa Clara, San Jose, Saratoga, Sunnyvale, y el Condado de Santa Clara No Incorporado.

Proveeremos acomodaciones razonables para incluir a todos los participantes. Necesitamos por los menos tres (3) días hábiles para atender solicitudes de interpretación de idiomas, traducción y/o asistencia relacionada con una discapacidad. Por favor contacte a Diana Castillo, Condado de Santa Clara, Oficina de Vivienda de Apoyo, diana.castillo@hhs.sccgov.org o (408) 793-1841 para asistencia.

Zoom Meeting PowerPoint May 22, 2020

**Draft Urban County
Five-Year 2020-2025
Consolidated Plan and
Fiscal Year 2020-2021 Year
One Action Plan**

**May 22, 2020 Community
Meeting**

1

CONSOLIDATED PLAN INTRODUCTION

The Consolidated Plan (ConPlan)

- Created every 5 years
- Assists the County in determining community needs
- Provides a community-wide dialogue

Impactful Results

- Helps the County make data-driven investment decisions for federal funds
- Increases access and/or improves conditions for low-to-moderate-income (LMI) residents earning 0-80% of area median income, and those presumed to be LMI

3

AGENDA

- Draft 2020-2025 Consolidated Plan (ConPlan)
 - Introduction
 - Community Engagement
 - Priority Needs
 - 5-Year Goals
- Draft FY 2020-2021 Year One Action Plan
 - Funding Recommendations
 - Next Steps
- Questions and Comments

2

CONPLAN INTRODUCTION

Urban County of Santa Clara Jurisdictions

Campbell	Los Altos
Los Altos Hills	Los Gatos
Monte Sereno	Morgan Hill
Saratoga	Unincorporated Santa Clara County

4

CONPLAN INTRODUCTION

Federal Programs

- **Community Development Block Grant (CDBG)**
 - Provides resources to address housing and community development needs
 - Principally for LMI persons
- **HOME Investment Partnership (HOME)**
 - Designed exclusively to create affordable housing for low-income households

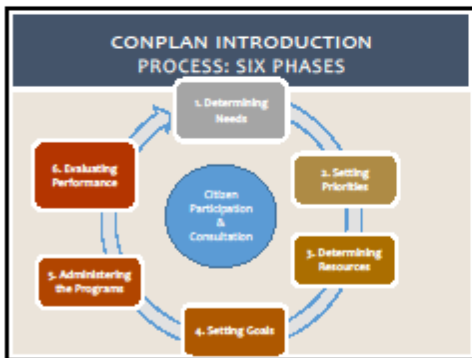

5

COMMUNITY ENGAGEMENT

- Four regional community engagement public meetings
- Twenty-one stakeholder interviews
- Four focus groups
- Four pop-up events for short interactions (e.g., farmers markets and community center) and to promote survey and regional meeting participation
- Community Needs Survey (Oct. – Dec. 2019): 1,950 responses
- Outreach to promote survey and regional meeting participation: newspaper ads and social media, emails to stakeholders, regional forum and survey flyer (multiple languages) distribution

7

6

PRIORITY NEEDS

Data and community engagement feedback regarding priority needs for housing, public services, community and public facilities were analyzed and synthesized into the following overarching needs:

- Affordable housing
- Vital services and homelessness prevention
- Assist families and individuals in transition from homelessness;
- Increase in family income
- Assist special needs populations (including seniors and people with disabilities and who are homeless, live with HIV/AIDS, and have survived domestic violence)
- Employment and workforce opportunities
- Improvements to aging community facilities and public infrastructure
- Fair housing

8

DRAFT FIVE-YEAR GOALS

Data and community engagement feedback were analyzed and synthesized into the following five-year goals:

FIVE YEAR GOALS

- = Increase affordable and supportive housing
- = Promote fair housing Countywide
- = Maintain and expand activities designed to prevent and reduce homelessness
- = Preserve existing affordable housing
- = Provide essential services for special needs populations
- = Maintain, improve and expand community facilities and spaces
- = Strengthen employment and workforce opportunities

9

FY21 CDBG FUNDING RECOMMENDATIONS

ACTIVITY	TOTAL
Public Services	\$ 291,908
Fair Housing Services	\$ 56,747
Housing Development, Preservation, Emergency Shelter, and Transitional Housing	\$ 849,891
City Pooled Funds	\$ 366,577
CDBG Administration	\$ 251,397
TOTAL	\$ 1,946,720

11

DRAFT FY 2020-21 YEAR ONE ACTION PLAN

- = Draft FY 2020-21 Year One Action Plan is the first of five programs covered by the 2020-25 ConPlan.
- = The Action Plan serves as the County's application to HUD for CDBG & HOME funds.
- = This year's funding recommendations include:
 - 17 public service projects including legal advice, emergency shelter services, case management and mentorship program for youth
 - Fair Housing Services
 - Funding for 70 minor home repairs for low-income homeowners

10

Zoom Meeting Questions and Comments

May 22, 2020

1 Question: How much is Rebuilding Together being funded and which pot does it come out of?

The recommended funding amount for FY21 is \$300,000 for Rebuilding Together. Rebuilding Together is funded with CDBG funding with funds dedicated to the preservation of existing housing.

2. Question: What kinds of assistance are you providing to “special needs” population?

For FY 21, in public service awards, the Silicon Valley Independent Living Center will be receiving funding for housing programs for persons with disabilities.

3. Do services for victims of domestic violence fit under essential services?

There are 3 agencies we are recommending for funding in FY21 that provide services specifically for domestic violence survivors: Next Door, Community Solutions, and YWCA. All 3 agencies provide emergency shelter services and Community Solutions provides permanent supportive housing opportunities.

4. Comment: Please consider adding universal design accessibility features into all new affordable housing so people can age in place.

These features are a requirement of all new affordable housing that is developed.

5. Question: Will it be proposed that Rebuilding Together be funded after the first year?

Yes, Rebuilding Together will be funded for a total of five years.

6. Question: Can you speak a bit more about the transitional housing support - particularly as it pertains to domestic violence survivors?

The County of Santa Clara OSH, the YWCA of Silicon Valley, The Health Trust, and the City of San José have partnered to develop several rapid rehousing programs to support survivors of domestic violence, sexual assault, and human trafficking who are experiencing homelessness. These programs serve individuals and families coming from the streets, emergency shelters, or directly fleeing domestic violence, and bring together the expertise of domestic violence service providers with evidence-based supportive housing strategies. Resources through family supportive housing and Bridges Aftercare Program were discussed and future funding opportunities were discussed.

7. Question: Are there separate pools of funds for affordable rental housing and affordable ownership housing?

Funding for the development of affordable rental housing is funded with HOME funds and the Measure A Affordable Housing Bond. Empower Homebuyers SCC, provides down payment assistance for first-time homebuyers who meet specific criteria and is funded with the Measure A Housing Bond.

8. Question: Is there a plan to include survivors of other forms of gender based violence - like human trafficking and sexual assault?

The current funding recommendations do not address gender based violence.

9. Question: Would a Safe Park be considered emergency shelter?

No, not at this time. However, there is additional guidance that will be provided by HUD related to additional CDBG funding for activities related to the prevention, preparation, and in response to coronavirus.

10. Comment: Thank you from Rebuilding Together Silicon Valley for your support of our work to provide critical, safety home repairs and modifications for low income homeowners--primarily older adults and people with disabilities. This is even more important to keep these vulnerable populations safe at home as they look to spending even more time in their home in the months and years ahead.

11. Question: For the Rebuilding Together program - have the units to receive repairs already been identified?

No, not for FY21. If new households need assistance, they can contact Rebuilding Together for assistance.

12. Comment: Rebuilding Together takes applications year round and serves qualified applications on a first-come, first-serve basis.

There are three agencies that provide services to survivors of domestic violence (YWCA, NextDoor Solutions, and Community Solutions) being recommended for funding.

13. Question: Can we submit comments until June 2? if so, how?

Yes. Comments will be received through June 2, 2020, concluding at the hearing before the Board of Supervisors. You may submit comments via email (diana.castillo@hhs.sccgov.org) or phone (408-278-6416). You may also submit comments by mail to Diana Castillo (Senior Management Analyst, Office of Supportive Housing, County of Santa Clara, 2310 N. First Street, Suite 201, San Jose, CA 95131). I am working remotely and there may be a delay in receipt of comments submitted by mail. You may also comment at the June 2, 2020, Board of Supervisors' hearing. For more information about accessing this hearing via teleconference, please visit <https://www.sccgov.org/sites/bos/Pages/Meetings.aspx>.

The Office of Supportive Housing will request that the Board of Supervisors approve a Delegation of Authority to include comments made through June 2, 2020 on the ConPlan and Action Plan.

14. **Question: Are there ever any misc. funds remaining for programs that may be "thought about" after the plan has been approved?**

If there are additional funds, contingency plans are outlined in the FY21 funding recommendations. If contingency plans are not outlined and if the County were to receive additional funding, the County would have to submit a substantial amendment to the Consolidated Plan.

15. **Question: Will you please send out the PP presentation so we can have more time to review the information?**

Yes. (The PowerPoint presentation was emailed on May 22, 2020.)

County of Santa Clara, California
November 15, 2019

Meet with us and share your ideas for how our local cities and the County should spend their federal funding to meet residents' and community needs. We welcome your opinion at an upcoming regional meeting:

Wednesday, Nov. 20, 2019, 6-8 p.m.
City of San José – Roosevelt Community Center
901 E. Santa Clara St., San José, CA 95116
For more information: <https://bit.ly/36DbMrC>

A Community Needs Survey is also available in four languages: English, Spanish, Vietnamese, or Chinese. The survey will close on Dec. 15, 2019.

Input Needed: 2020-2025 Consolidated Plan

Please join the County and Cities of Santa Clara for a series of Regional Forums to help identify affordable housing, homeless and community improvement needs over the next five years. Your input will help City and County leaders prioritize spending for important services and community improvements.

How can you participate?

1. Attend a Regional Forum:

- **Wed., Nov. 20, 2019, 6:00 pm – 8:00 pm:** City of San Jose, Roosevelt Community Center, 901 E. Santa Clara St., San Jose, CA 95116

2. Take a short online survey:

- [English](#)
- [Spanish](#)

For more information please visit the [County Office of Supportive Housing](#) website.

Check out the event flyer [here](#).

Community Engagement 2020-2025 Consolidated Plan and Assessment of Fair Housing

Upcoming Community Meeting Dates:

Monday, Dec 9th: 2:00 - 4:00 PM - Mountain View

Monday, Dec 9th: 6:00 - 8:00 PM - Palo Alto

Tuesday, Dec 10th: 6:00 - 7:30 PM - Cupertino

Wednesday, Dec 11th: 10:00 AM - 12:00 PM - Campbell*
(Urban County)

Wednesday, Dec 11th: 6:00PM - 8:00 PM - Gilroy

Thursday, Dec 12th: 6:00 - 7:30 PM - Sunnyvale

Wednesday, Jan 15th: 6:00 - 8:00 PM - Mountain View

*Meetings will be held in cities throughout the County. The Wednesday, December 11th (10 a.m. – noon) meeting in Campbell will be an Urban County conversation (focused on the Cities of Campbell, Los Altos, Los Altos Hills, Los Gatos, Monte Sereno, Morgan Hill, and Saratoga and the unincorporated areas of the County).

The County and Cities of Santa Clara are working together to update their five-year Consolidated Plans. These plans help the County and Cities assess their affordable housing and community development needs and determine their spending priorities for their federal Community Development Block Grant and HOME Investment Partnerships Program funds.

Santa Clara County

Community Needs Survey

October 25, 2019 to December 26, 2019

**County and Cities of Santa Clara | 2020 - 2025 CONSOLIDATED PLANS
REGIONAL NEEDS SURVEY**

What are the housing and community improvement needs in your neighborhood?

The County and Cities of Santa Clara are working together to update their five-year Consolidated Plans. The Consolidated Plan identifies housing and community improvement needs, and it outlines how federal funding will be used to address these needs.

This survey lets you tell us which improvements and services most are needed for your community. Your responses will help prioritize investments over the next five years. **We want to hear from you!** If you prefer to complete this survey online, please visit: https://www.surveymonkey.com/r/SCC_REGIONALSURVEY

- Do you live in the County of Santa Clara? Yes, No Unincorporated Area Don't Know
If **yes**, what city? _____
- Please provide your ZIP code. _____
- Do you work in the County of Santa Clara? Yes, No Unincorporated Area Don't Know
If **yes**, what city? _____
- Please check the box that best represents you [please select one]:
 Resident Business Owner Service Provider Public Agency Community-based Organization / Non-profit
 Other (please specify): _____
- Thinking about your neighborhood and the facilities and services currently available, please rate the level of need for improvements in the areas below.

Circle a number between 1 and 3 for each topic below. A rating of 1 indicates low need for improvement, a rating of 2 indicates medium need for improvement, and a rating of 3 indicates high need for improvement. A rating of "?" indicates you do not know or have no opinion. If your answer is "Other(s)" please write in your response.

Overall Needs	Level of Need Low...High ?	Level of Need Low... High ?
Improve city facilities that provide public services (such as parks, recreation or senior centers, parking facilities, and street improvements)	1 2 3 ?	Improve non-profit community services (such as senior, youth, health, homeless, and fair housing services)
Create additional affordable housing available to low-income residents	1 2 3 ?	Create more jobs available to low-income residents
Other(s):	1 2 3 ?	
Housing	Level of Need Low...High ?	Level of Need Low... High ?
Owner-occupied housing rehabilitation	1 2 3 ?	Rental housing rehabilitation
Down payment assistance to purchase a home	1 2 3 ?	Permanent supportive rental housing (housing with case management and supportive services) for people who are homeless
Increase affordable rental housing inventory	1 2 3 ?	Housing accessibility improvements
Rental assistance (tenant-based rental assistance) for people who are homeless	1 2 3 ?	Energy efficiency and sustainability improvements
Affordable housing located near transit	1 2 3 ?	Healthy homes (free of mold, lead, etc.)
Code enforcement, in coordination with a neighborhood plan	1 2 3 ?	Housing for other special needs (such as seniors and persons with disabilities)
Emergency home improvement / repair	1 2 3 ?	Other(s):
Economic Development: Job Creation in Low-Income Neighborhoods	Level of Need Low...High ?	Level of Need Low... High ?
Financial assistance for low-income residents for business expansion and job creation	1 2 3 ?	Microenterprise assistance for small business expansion (5 or fewer employees)
Public improvements to commercial / industrial sites	1 2 3 ?	Storefront improvements in low-income neighborhoods
Job training for people who are homeless	1 2 3 ?	Other(s):
Public Facilities	Level of Need Low...High ?	Level of Need Low... High ?
Senior centers	1 2 3 ?	Parks and park facilities
Youth centers	1 2 3 ?	Healthcare facilities
Centers for people who are disabled	1 2 3 ?	Educational facilities
Homeless facilities (temporary housing and emergency shelters)	1 2 3 ?	Facilities for children who are abused, abandoned and / or neglected
Childcare centers	1 2 3 ?	Facilities for people with HIV / AIDS
Mental health care facilities	1 2 3 ?	Parking facilities
Recreation facilities	1 2 3 ?	Other(s):
Drop-in day center people who are homeless	1 2 3 ?	

Participating jurisdictions in the Consolidated Plan process include Campbell, Cupertino, Gilroy, Los Altos, Los Altos Hills, Los Gatos, Monte Sereno, Morgan Hill, Mountain View, Palo Alto, City of Santa Clara, San Jose, Saratoga, Sunnyvale, and Unincorporated Santa Clara County.

Public Services	Level of Need Low...High ?	Level of Need Low... High ?
Senior services	1 2 3 ?	Services for people with HIV / AIDS
Disability services	1 2 3 ?	Crime awareness / prevention services
Legal services	1 2 3 ?	Tenant / landlord counseling services
Youth services	1 2 3 ?	Childcare services
Transportation services	1 2 3 ?	Services for children who are abused, abandoned and / or neglected
Battered and abused spouses' services	1 2 3 ?	Mental health services
Employment training services	1 2 3 ?	Homeless services
Services to increase neighborhood and community engagement	1 2 3 ?	Housing counseling for homebuyers and owners
Food banks	1 2 3 ?	Fair housing investigations, education
Access to fresh and nutritious foods	1 2 3 ?	Emergency housing assistance to prevent homelessness – such as utility and rental assistance
Veteran services	1 2 3 ?	Financial literacy and planning
Lead-based paint / lead hazard screens	1 2 3 ?	Neighborhood cleanups (trash, graffiti, etc.)
Other(s):	1 2 3 ?	
Infrastructure and Neighborhood Improvements	Level of Need Low...High ?	Level of Need Low... High ?
Water/sewer improvements	1 2 3 ?	Sidewalk improvements
Street improvements	1 2 3 ?	Lighting improvements
Stormwater and drainage improvements	1 2 3 ?	Neighborhood signage
Accessibility improvements to public facilities for people with disabilities	1 2 3 ?	Landscaping improvements
Public art	1 2 3 ?	New or renovated playgrounds
Community gardens	1 2 3 ?	Cleanup of contaminated sites
Trails	1 2 3 ?	Slowing traffic speed
Acquisition and clearance of vacant lots	1 2 3 ?	Other(s):

FAIR HOUSING

Fair Housing is a right protected by federal and state laws. Every resident is entitled to equal access to housing opportunities regardless of their membership in a protected class (i.e., race, color, ancestry, national origin, religion, disability (mental or physical), sex, gender, sexual orientation, gender identity, gender expression, genetic information, marital status, familial status, source of income, citizenship, primary language, or immigration status).

6. Have you ever personally experienced housing discrimination? Yes No Don't Know (If "No" or "Don't Know," go to Q. 10.)
7. Where did the act of discrimination occur?
 Apartment Condominium Single-family Home When Applying for City / County Programs
 Public or Subsidized Housing Trailer or Mobile home Park When Applying for a Mortgage or Homeowners' Insurance
 Other (please specify): _____
8. On what basis do you believe you were discriminated against?
 Race Color Religion Sex National Origin Disability Sexual Orientation
 Gender Identity Familial Status (families with children under 18) Source of Income (e.g. federal housing assistance, Sect. 8)
 Retaliation for Complaining about Housing Discrimination
 Another Protected Category Identified Above or Other (please specify): _____
 Don't Know
9. Who do you believe discriminated against you? (Check all that apply)
 Landlord/Property Management Staff Real Estate Agent Mortgage Lender City / County staff
 Homeowners' Insurer Neighbor Other (please specify): _____ Don't Know

ACCESS TO OPPORTUNITIES

10. Does the neighborhood you live in provide you access to opportunities? Please mark your response.

	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
High Performing Schools					
Affordable Public Transportation					
Frequent Public Transportation					
Jobs that Pay a Living Wage					
A Safe and Healthy Living Environment					

BROADBAND INTERNET ACCESS

11. Do you feel there are common / pressing broadband internet problems (e.g., high-speed connectivity, availability of providers, etc.)?
 Yes No Don't Know
 If yes, what are they? _____
12. Do you feel that low- and moderate-income areas have adequate broadband access? Yes No Don't Know
13. How can broadband internet access be improved? _____
- OTHER**
14. Do you have any other comments, questions, or concerns? _____
15. To receive updates on this planning process, please provide your email address: _____

THANK YOU for completing this survey! Please return it by **December 20th** to:
armond.bryant@mbakerintl.com or Armond Bryant, MBI, 3760 Kilroy Airport Way, #270, Long Beach CA 90806

聖克拉拉縣和各城市| 2020年至2025年綜合規劃 區域需求調查

您家居附近的房屋和社區改善需求有哪些？

聖克拉拉縣和各城市正在共同努力，更新其五年綜合計劃。綜合計劃確定了住房和社區改善的需求，並概述如何利用聯邦資金來滿足這些需求。

通過本調查，您可以告訴我們社區最需要哪些改進和服務。您的回答將有助於確定未來五年的投資優先次序。我們希望收到您的來信！如果您希望在線完成此調查，請訪問：

https://www.surveymonkey.com/r/SCC_REGIONALSURVEY_CHINESE

- 您住在聖克拉拉縣嗎？ 是 否 非建制地區 不知道
如果是的話，在哪個城市？ _____
- 請提供您的郵政編號。 _____
- 您在聖克拉拉縣工作嗎？ 是 否 非建制地區 不知道
如果是的話，在哪個城市？ _____
- 請勾選最能代表您身份的選項 [請選擇一項]：
 居民 業主 服務提供商 公共機構 社區組織/非營利機構
 其他（請註明）： _____
- 考慮到您所在的社區以及當前可用的設施和服務，請在以下方面評估改進的需求程度。

對於下面的每個主題，在1到3之間圈一個數字。等級1表示改進需求較低，等級2表示改進需求中等，等級3表示改進需求較高。評級為「？」表示您不知道或沒有意見。如果您的答案是「其他」請寫出您的回應。

總體需求	需求等級				需求等級		
	低	中	高		低	中	高
完善城市設施，提供公共服務（如公園，休閒或老年中心，停車場和街道改善）	1	2	3	提高非營利社區服務（如老人、青年、健康、無家可歸者、公平的住房服務）	1	2	3
創建額外的可負擔房屋提供給低收入居民	1	2	3	為低收入居民創造更多就業機會	1	2	3
其他：	1	2	3				
住房	需求等級				需求等級		
	低	中	高		低	中	高
業主自住房屋修復	1	2	3	出租房屋修復	1	2	3
購房首付補助	1	2	3	為無家可歸者提供永久性的支持性租賃住房（住房以及案例管理和支持服務）	1	2	3
增加可負擔租賃房屋庫存	1	2	3	住房無障礙改善	1	2	3
為無家可歸者提供的租金援助（基於租戶的租金援助）	1	2	3	能源效率和可持續性改善	1	2	3
位於交通附近的可負擔房屋	1	2	3	健康住宅（不含黴菌、鉛等）	1	2	3
與鄰里計劃協調的相關法規執行	1	2	3	滿足其他特殊需求的住房（例如老年人和殘障人士）	1	2	3
緊急房屋裝修/維修	1	2	3	其他	1	2	3
經濟發展：低收入社區的就業機會	需求等級				需求等級

公平住房

公平住房是一項受聯邦和州法律保護的權利。每位居民都有權平等地獲得住房機會，不論其應受保護的身份分類（即種族、膚色、血統、國籍、宗教、殘疾狀況（精神或身體）、生理性別、社會性別、性取向、性別認同，性別表達、遺傳信息、婚姻狀況、家庭狀況、收入來源、公民身份、主要語言或移民身份如何。

6. 您有沒有親身經歷過住房歧視？ 是 否 不知道（如回答「否」或「不知道」，請跳到問題10）
7. 歧視行為在哪裡發生？
 公寓 共管式公寓 獨棟住房 當申請市/縣住房計劃時
 公共或資助房屋 拖車或移動房屋園區 在申請抵押貸款或房屋保險時
 其他（請註明）：_____
8. 您認為您在哪些方面受到歧視？
 種族 膚色 宗教 性別 原住國 殘障 性取向 性別認同
 家庭狀況（有18歲以下子女） 收入來源（如接受聯邦住房援助） 因投訴住房歧視遭到報復
 在上方或其他上方標識的其他受保護狀況分類（請註明）：_____ 不知道
9. 您認為是誰歧視了您？（勾選所有適用項）
 業主/物業管理人員 房地產經紀人 抵押貸款貸款方 市/縣工作人員 房主保險公司
 鄰里 其他（請註明）：_____ 不知道

獲得機會

10. 請問您的鄰里是否為您提供機會？請註明您的回應。

	強烈反對	不同意	中立	同意	非常同意
優質學校					
經濟實惠的公共交通					
車次頻繁的公共交通					
保障生活的工作薪資					
安全健康的生活環境					

寬帶互聯網接入

11. 您是否感到社區存在普遍/緊迫的寬帶互聯網問題（例如，高速連接，是否有提供商提供服務等）？
 是 沒有 不知道 如果存在問題的話，請註明_____
12. 您覺得低收入和中等收入地區是否有足夠的寬帶接入？ 是 否 不知道
13. 如何改善寬帶互聯網接入？_____
- 其他
14. 您是否-有其他意見、問題或疑慮？_____
15. 如果您希望接收有關該計劃程序的最新資訊，請提供您的電子郵件地址：_____

El Condado y Las Ciudades de Santa Clara | 2020 - 2025 PLAN CONSOLIDADO ENCUESTA SOBRE NECESIDADES REGIONALES

¿Cuáles mejoramientos comunitarios y de vivienda se necesitan donde usted vive?

El condado y las ciudades de Santa Clara trabajan como equipo para actualizar sus Planes Consolidados de cinco años. El Plan Consolidado identifica las necesidades de mejoramientos comunitarios y de vivienda, y a la vez describe la manera en la cual se utilizarán fondos federales para atender esas necesidades.

Esta encuesta le permite darnos información sobre cuales mejoramientos y servicios son los que más se necesitan en su comunidad. Sus respuestas nos ayudaran a establecer prioridades para la inversión de fondos durante los próximos cinco años. **¡Queremos su opinión!** Si prefiere completar esta encuesta por computadora (en línea), por favor visite: https://www.surveymonkey.com/r/SCC_REGIONALSURVEY_ESPANOL

- ¿Vive usted en el condado de Santa Clara? Sí No No Sé Zona No Incorporada del Condado de Santa Clara
Si respondió sí, ¿en cuál ciudad? _____
- Por favor escriba su código postal. _____
- ¿Trabaja usted en el condado de Santa Clara? Sí No No Sé Zona No Incorporada del Condado de Santa Clara
Si respondió sí, ¿en cuál ciudad? _____
- Por favor seleccione la que mejor describa su situación [por favor solo seleccione una]:
 Residente Dueño/a de Negocios Proveedor/a de Servicios Agencia Gubernamental
 Organización Comunitaria / Sin Fines de Lucro Otra (por favor especifique): _____
- Piense en los lugares y servicios disponibles actualmente donde vive usted, y por favor identifique el nivel de necesidad de mejoramiento para cada área a continuación.

Circule uno de los números (1, 2 o 3) para cada tema a continuación. La calificación de 1 implica poca necesidad de mejoramiento, la calificación de 2 implica necesidad moderada de mejoramiento, y la calificación de 3 implica mucha necesidad de mejoramiento. La calificación de ? implica que usted no sabe o no tiene opinión al respecto. Si su respuesta es "Otra(s)," por favor escriba su respuesta.

Necesidades Generales	Nivel de Necesidad Poca..Mucha ?			Nivel de Necesidad Poca..Mucha ?			
Mejorar lugares municipales que ofrecen servicios públicos (como parques, centros de recreación, centros para personas mayores, lugares de estacionamiento, y reparaciones de carreteras)	1	2	3 ? Các Thành Phố và Quận Santa Clara | KẾ HOẠCH TỔNG HỢP 2020-2025

KHẢO SÁT NHU CẦU CỦA ĐỊA PHƯƠNG

Khu vực của quý vị có những nhu cầu gì trong việc cải tiến gia cư và cộng đồng?

Các Thành phố và Quận Santa Clara đang hợp tác để cập nhật Kế Hoạch Tổng Hợp năm năm. Kế Hoạch Tổng Hợp nhận định nhu cầu cải tiến nhà ở và phát triển cộng đồng, và hoạch định cách thức sử dụng ngân quỹ liên bang để đáp ứng những nhu cầu này.

Bản thăm dò này sẽ cho chúng tôi biết những dịch vụ và phát triển nào cần thiết nhất cho cộng đồng của quý vị. Ý kiến của quý vị sẽ giúp chúng tôi đặt ưu tiên các mục tiêu đầu tư trong vòng 5 năm tới. Chúng tôi muốn được nghe ý kiến của quý vị! Nếu quý vị muốn điền bản thăm dò này trên mạng, xin vui lòng vào trang:

https://www.surveymonkey.com/r/SCC_REGIONALSURVEY_Tiếng_Việt

1. Quý vị hiện đang sống trong Hạt Santa Clara? Có Không Khu chưa được kết hợp Không biết
Nếu có, ở thành phố nào? _____

2. Vui lòng cho biết khu bưu chính của quý vị _____

3. Quý vị đang làm việc trong Quận Santa Clara? Có Không Khu chưa được kết hợp Không biết
Nếu có, ở thành phố nào? _____

4. Đánh dấu vào ô tiêu biểu nhất cho bạn (vui lòng chọn một ô):

- Cư dân Chủ doanh nghiệp Cung cấp dịch vụ Cơ quan công cộng Tổ chức cộng đồng/Bất vụ lợi
 Những việc khác (xin cho biết cụ thể) _____

5. Hãy nghĩ đến khu vực quý vị đang cư ngụ và các cơ sở cùng dịch vụ hiện có và đánh giá mức nhu cầu cần cải tiến về các lãnh vực dưới đây.

Khoanh tròn một số từ 1 đến 3 cho mỗi đề mục dưới đây. Số 1 cho biết ít nhu cầu cần cải tiến. Số 2 cho biết có nhu cầu cần cải tiến trung bình và số 3 cho biết rất cần cải tiến. Đánh giá "?" có nghĩa quý vị không biết hay không có ý kiến. Nếu quý vị trả lời "Ý kiến khác", vui lòng cho biết ý kiến của quý vị.

Nhu Cầu Chung	Mức Cần Thiết ít...Nhiều ?	Mức Cần Thiết ít...Nhiều ?	
Cải tiến các cơ sở cung cấp dịch vụ công cộng trong thành phố (như công viên, nơi giải trí hay trung tâm cao niên, bãi đậu xe và tu bổ đường xá)	1 2 3 ?	Cải tiến các dịch vụ bất vụ lợi trong cộng đồng (dành cho người cao niên, thanh thiếu niên, y tế, người vô gia cư và dịch vụ hỗ trợ gia cư bình đẳng)	1 2 3 ?
Tạo thêm nhà ở giá phải chăng cho cư dân có thu nhập thấp	1 2 3 ?	Tạo thêm việc làm cho cư dân có thu nhập thấp.	1 2 3 ?
Các nhu cầu khác:	1 2 3 ?		
Nhu Cầu về Nhà Ở	Mức Cần Thiết ít...Nhiều ?	Mức Cần Thiết ít...Nhiều ?

QUYỀN BÌNH ĐẲNG VỀ GIA CƯ

Luat pháp tiểu bang và liên bang bảo vệ Quyền Bình Đẳng về Gia Cư. Mọi cư dân đều được quyền bình đẳng trong vấn đề nhà ở bất kể thuộc tầng lớp nào (ví dụ: chủng tộc, màu da, tổ tiên, nguồn gốc quốc gia, tôn giáo, khuyết tật (tinh thần hay thể chất), phái tính, giới tính, khuynh hướng phái tính, nhận thức giới tính, biểu lộ giới tính, chi tiết giới tính, tình trạng kết hôn, gia cảnh, nguồn thu nhập, công dân, ngôn ngữ chính hoặc tình trạng cư trú.)

6. Quý vị có bao giờ bị đối xử phân biệt về vấn đề nhà ở không? Có Không Không biết (Nếu "Không" hay "Không biết", bỏ qua đến câu số 10)
7. Hành động đối xử phân biệt đã xảy ra ở đâu?
 Chung cư Nhà chung vách Nhà riêng Khi nộp đơn các Chương trình của quận hạt/thành phố
 Nhà ở công cộng hay chính phủ trợ giúp Khu nhà Lưu động hay xe kéo Khi nộp đơn mua bảo hiểm nhà ở hay vay nợ nhà Những mặt khác (trình bày cụ thể): _____
8. Quý vị tin rằng mình bị đối xử phân biệt dựa trên cơ sở nào?
 Chủng tộc Màu da Tôn giáo Phái tính Nguồn gốc quốc gia Khuyết tật Khuynh hướng phái tính
 Nhận thức giới tính Gia cảnh (gia đình có trẻ em dưới 18 tuổi) Nguồn thu nhập (t.d.được trợ giúp nhà ở của liên bang, Sect.8) Bị trả thù vì Khiếu nại về Đối xử phân biệt trong vấn đề nhà ở Một mặt khác được trình bày ở trên hoặc điều khác (vui lòng cho biết cụ thể): _____ Không biết
9. Quý vị tin rằng ai đã đối xử phân biệt với quý vị? (Đánh dấu vào tất cả các ô thích hợp)
 Chủ nhà/Nhân viên quản lý nhà ở Nhân viên địa ốc Công ty cho vay Nhân viên quận hạt/thành phố
 Bảo hiểm nhà Hàng xóm Người khác (cho biết cụ thể): _____ Không biết

CÓ CƠ HỘI THAM GIA

10. Quý vị có được hưởng những việc sau đây ở nơi mình cư ngụ không? Vui lòng đánh dấu vào câu trả lời của quý vị.

	Rất không đồng ý	Không đồng ý	Không ý kiến	Đồng ý	Rất đồng ý
Trường học có phẩm chất cao					
Phương tiện giao thông công cộng giá phải chăng					
Phương tiện giao thông công cộng thường xuyên					
Việc làm với mức lương đủ sống					
Môi trường Sống Lành mạnh và An toàn					

CÓ MẠNG LƯỚI ĐIỆN TOÁN THÔNG RỘNG

11. Quý vị có thường bị những trở ngại thông thường/ cấp bách về mạng điện toán thông rộng không (t.d. nối mạng với tốc độ nhanh, có nhà cung cấp dịch vụ, v...v)? Có Không Không biết
 Nếu có, vấn đề đó là gì? _____
12. Quý vị có nghĩ rằng những vùng có thu nhập thấp hay trung bình có đủ mạng điện toán thông rộng không? Có Không Không biết
13. Việc vào mạng điện toán thông rộng có thể cải tiến bằng cách nào? _____

CÁC CÂU HỎI KHÁC

14. Quý vị còn có ý kiến, thắc mắc hay những vấn đề quan tâm nào khác không? _____
15. Vui lòng cho biết địa chỉ email của quý vị để được cập nhật những thông tin về tiến trình thực hiện kế hoạch này: _____

CẢM ƠN quý vị đã điền bản thăm dò này! Xin gửi lại hạn chót là ngày 15 tháng 12 cho: amond.bryant@mbakerintl.com or Armond Bryant, MBI, 3760 Kilroy Airport Way, #270, Long Beach CA 90806
 Câu hỏi? Xin gọi: Armond Bryant (562) 200-7179 hoặc là Diana Castillo, Santa Clara County, Office of Supportive Housing (408) 793-1841.

ASSURANCES - CONSTRUCTION PROGRAMS

OMB Number: 4040-0009
Expiration Date: 02/28/2022

Public reporting burden for this collection of information is estimated to average 15 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Office of Management and Budget, Paperwork Reduction Project (0348-0042), Washington, DC 20503.

PLEASE DO NOT RETURN YOUR COMPLETED FORM TO THE OFFICE OF MANAGEMENT AND BUDGET. SEND IT TO THE ADDRESS PROVIDED BY THE SPONSORING AGENCY.

NOTE: Certain of these assurances may not be applicable to your project or program. If you have questions, please contact the Awarding Agency. Further, certain Federal assistance awarding agencies may require applicants to certify to additional assurances. If such is the case, you will be notified.

As the duly authorized representative of the applicant, I certify that the applicant:

1. Has the legal authority to apply for Federal assistance, and the institutional, managerial and financial capability (including funds sufficient to pay the non-Federal share of project costs) to ensure proper planning, management and completion of project described in this application.
2. Will give the awarding agency, the Comptroller General of the United States and, if appropriate, the State, the right to examine all records, books, papers, or documents related to the assistance; and will establish a proper accounting system in accordance with generally accepted accounting standards or agency directives.
3. Will not dispose of, modify the use of, or change the terms of the real property title or other interest in the site and facilities without permission and instructions from the awarding agency. Will record the Federal awarding agency directives and will include a covenant in the title of real property acquired in whole or in part with Federal assistance funds to assure non-discrimination during the useful life of the project.
4. Will comply with the requirements of the assistance awarding agency with regard to the drafting, review and approval of construction plans and specifications.
5. Will provide and maintain competent and adequate engineering supervision at the construction site to ensure that the complete work conforms with the approved plans and specifications and will furnish progressive reports and such other information as may be required by the assistance awarding agency or State.
6. Will initiate and complete the work within the applicable time frame after receipt of approval of the awarding agency.
7. Will establish safeguards to prohibit employees from using their positions for a purpose that constitutes or presents the appearance of personal or organizational conflict of interest, or personal gain.
8. Will comply with the Intergovernmental Personnel Act of 1970 (42 U.S.C. §§4728-4763) relating to prescribed standards of merit systems for programs funded under one of the 19 statutes or regulations specified in Appendix A of OPM's Standards for a Merit System of Personnel Administration (5 C.F.R. 900, Subpart F).
9. Will comply with the Lead-Based Paint Poisoning Prevention Act (42 U.S.C. §§4801 et seq.) which prohibits the use of lead-based paint in construction or rehabilitation of residence structures.
10. Will comply with all Federal statutes relating to non-discrimination. These include but are not limited to: (a) Title VI of the Civil Rights Act of 1964 (P.L. 88-352) which prohibits discrimination on the basis of race, color or national origin; (b) Title IX of the Education Amendments of 1972, as amended (20 U.S.C. §§1681 1683, and 1685-1686), which prohibits discrimination on the basis of sex; (c) Section 504 of the Rehabilitation Act of 1973, as amended (29 U.S.C. §794), which prohibits discrimination on the basis of handicaps; (d) the Age Discrimination Act of 1975, as amended (42 U.S.C. §§6101-6107), which prohibits discrimination on the basis of age; (e) the Drug Abuse Office and Treatment Act of 1972 (P.L. 92-255), as amended relating to nondiscrimination on the basis of drug abuse; (f) the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment and Rehabilitation Act of 1970 (P.L. 91-616), as amended, relating to nondiscrimination on the basis of alcohol abuse or alcoholism; (g) §§523 and 527 of the Public Health Service Act of 1912 (42 U.S.C. §§290 dd-3 and 290 ee 3), as amended, relating to confidentiality of alcohol and drug abuse patient records; (h) Title VIII of the Civil Rights Act of 1968 (42 U.S.C. §§3601 et seq.), as amended, relating to nondiscrimination in the sale, rental or financing of housing; (i) any other nondiscrimination provisions in the specific statute(s) under which application for Federal assistance is being made; and (j) the requirements of any other nondiscrimination statute(s) which may apply to the application.

Previous Edition Usable

Authorized for Local Reproduction

Standard Form 424D (Rev. 7-97)
Prescribed by OMB Circular A-102

11. Will comply, or has already complied, with the requirements of Titles II and III of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (P.L. 91-646) which provide for fair and equitable treatment of persons displaced or whose property is acquired as a result of Federal and federally-assisted programs. These requirements apply to all interests in real property acquired for project purposes regardless of Federal participation in purchases.
12. Will comply with the provisions of the Hatch Act (5 U.S.C. §§1501-1508 and 7324-7328) which limit the political activities of employees whose principal employment activities are funded in whole or in part with Federal funds.
13. Will comply, as applicable, with the provisions of the Davis-Bacon Act (40 U.S.C. §§276a to 276a-7), the Copeland Act (40 U.S.C. §276c and 18 U.S.C. §874), and the Contract Work Hours and Safety Standards Act (40 U.S.C. §§327-333) regarding labor standards for federally-assisted construction subagreements.
14. Will comply with flood insurance purchase requirements of Section 102(a) of the Flood Disaster Protection Act of 1973 (P.L. 93-234) which requires recipients in a special flood hazard area to participate in the program and to purchase flood insurance if the total cost of insurable construction and acquisition is \$10,000 or more.
15. Will comply with environmental standards which may be prescribed pursuant to the following: (a) institution of environmental quality control measures under the National Environmental Policy Act of 1969 (P.L. 91-190) and Executive Order (EO) 11514; (b) notification of violating facilities pursuant to EO 11738; (c) protection of wetlands pursuant to EO 11990; (d) evaluation of flood hazards in floodplains in accordance with EO 11988; (e) assurance of project consistency with the approved State management program developed under the Coastal Zone Management Act of 1972 (16 U.S.C. §§1451 et seq.); (f) conformity of Federal actions to State (Clean Air) implementation Plans under Section 175(c) of the Clean Air Act of 1955, as amended (42 U.S.C. §§7401 et seq.); (g) protection of underground sources of drinking water under the Safe Drinking Water Act of 1974, as amended (P.L. 93-523); and, (h) protection of endangered species under the Endangered Species Act of 1973, as amended (P.L. 93-205).
16. Will comply with the Wild and Scenic Rivers Act of 1968 (16 U.S.C. §§1271 et seq.) related to protecting components or potential components of the national wild and scenic rivers system.
17. Will assist the awarding agency in assuring compliance with Section 106 of the National Historic Preservation Act of 1966, as amended (16 U.S.C. §470), EO 11593 (identification and protection of historic properties), and the Archaeological and Historic Preservation Act of 1974 (16 U.S.C. §§469a-1 et seq).
18. Will cause to be performed the required financial and compliance audits in accordance with the Single Audit Act Amendments of 1996 and OMB Circular No. A-133, "Audits of States, Local Governments, and Non-Profit Organizations."
19. Will comply with all applicable requirements of all other Federal laws, executive orders, regulations, and policies governing this program.
20. Will comply with the requirements of Section 106(g) of the Trafficking Victims Protection Act (TVPA) of 2000, as amended (22 U.S.C. 7104) which prohibits grant award recipients or a sub-recipient from (1) Engaging in severe forms of trafficking in persons during the period of time that the award is in effect (2) Procuring a commercial sex act during the period of time that the award is in effect or (3) Using forced labor in the performance of the award or subawards under the award.

ASSURANCES - CONSTRUCTION PROGRAMS

OMB Number: 4040-0009
Expiration Date: 02/28/2022

Public reporting burden for this collection of information is estimated to average 15 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Office of Management and Budget, Paperwork Reduction Project (0348-0042), Washington, DC 20503.

PLEASE DO NOT RETURN YOUR COMPLETED FORM TO THE OFFICE OF MANAGEMENT AND BUDGET. SEND IT TO THE ADDRESS PROVIDED BY THE SPONSORING AGENCY.

NOTE: Certain of these assurances may not be applicable to your project or program. If you have questions, please contact the Awarding Agency. Further, certain Federal assistance awarding agencies may require applicants to certify to additional assurances. If such is the case, you will be notified.

As the duly authorized representative of the applicant, I certify that the applicant:

1. Has the legal authority to apply for Federal assistance, and the institutional, managerial and financial capability (including funds sufficient to pay the non-Federal share of project costs) to ensure proper planning, management and completion of project described in this application.
2. Will give the awarding agency, the Comptroller General of the United States and, if appropriate, the State, the right to examine all records, books, papers, or documents related to the assistance; and will establish a proper accounting system in accordance with generally accepted accounting standards or agency directives.
3. Will not dispose of, modify the use of, or change the terms of the real property title or other interest in the site and facilities without permission and instructions from the awarding agency. Will record the Federal awarding agency directives and will include a covenant in the title of real property acquired in whole or in part with Federal assistance funds to assure non-discrimination during the useful life of the project.
4. Will comply with the requirements of the assistance awarding agency with regard to the drafting, review and approval of construction plans and specifications.
5. Will provide and maintain competent and adequate engineering supervision at the construction site to ensure that the complete work conforms with the approved plans and specifications and will furnish progressive reports and such other information as may be required by the assistance awarding agency or State.
6. Will initiate and complete the work within the applicable time frame after receipt of approval of the awarding agency.
7. Will establish safeguards to prohibit employees from using their positions for a purpose that constitutes or presents the appearance of personal or organizational conflict of interest, or personal gain.
8. Will comply with the Intergovernmental Personnel Act of 1970 (42 U.S.C. §§4728-4763) relating to prescribed standards of merit systems for programs funded under one of the 19 statutes or regulations specified in Appendix A of OPM's Standards for a Merit System of Personnel Administration (5 C.F.R. 900, Subpart F).
9. Will comply with the Lead-Based Paint Poisoning Prevention Act (42 U.S.C. §§4801 et seq.) which prohibits the use of lead-based paint in construction or rehabilitation of residence structures.
10. Will comply with all Federal statutes relating to non-discrimination. These include but are not limited to: (a) Title VI of the Civil Rights Act of 1964 (P.L. 88-352) which prohibits discrimination on the basis of race, color or national origin; (b) Title IX of the Education Amendments of 1972, as amended (20 U.S.C. §§1681 1683, and 1685-1686), which prohibits discrimination on the basis of sex; (c) Section 504 of the Rehabilitation Act of 1973, as amended (29 U.S.C. §794), which prohibits discrimination on the basis of handicaps; (d) the Age Discrimination Act of 1975, as amended (42 U.S.C. §§6101-6107), which prohibits discrimination on the basis of age; (e) the Drug Abuse Office and Treatment Act of 1972 (P.L. 92-255), as amended relating to nondiscrimination on the basis of drug abuse; (f) the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment and Rehabilitation Act of 1970 (P.L. 91-616), as amended, relating to nondiscrimination on the basis of alcohol abuse or alcoholism; (g) §§523 and 527 of the Public Health Service Act of 1912 (42 U.S.C. §§290 dd-3 and 290 ee 3), as amended, relating to confidentiality of alcohol and drug abuse patient records; (h) Title VIII of the Civil Rights Act of 1968 (42 U.S.C. §§3601 et seq.), as amended, relating to nondiscrimination in the sale, rental or financing of housing; (i) any other nondiscrimination provisions in the specific statute(s) under which application for Federal assistance is being made; and (j) the requirements of any other nondiscrimination statute(s) which may apply to the application.

Previous Edition Usable

Authorized for Local Reproduction

Standard Form 424D (Rev. 7-97)
Prescribed by OMB Circular A-102

11. Will comply, or has already complied, with the requirements of Titles II and III of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (P.L. 91-646) which provide for fair and equitable treatment of persons displaced or whose property is acquired as a result of Federal and federally-assisted programs. These requirements apply to all interests in real property acquired for project purposes regardless of Federal participation in purchases.
12. Will comply with the provisions of the Hatch Act (5 U.S.C. §§1501-1508 and 7324-7328) which limit the political activities of employees whose principal employment activities are funded in whole or in part with Federal funds.
13. Will comply, as applicable, with the provisions of the Davis-Bacon Act (40 U.S.C. §§276a to 276a-7), the Copeland Act (40 U.S.C. §276c and 18 U.S.C. §874), and the Contract Work Hours and Safety Standards Act (40 U.S.C. §§327-333) regarding labor standards for federally-assisted construction subagreements.
14. Will comply with flood insurance purchase requirements of Section 102(a) of the Flood Disaster Protection Act of 1973 (P.L. 93-234) which requires recipients in a special flood hazard area to participate in the program and to purchase flood insurance if the total cost of insurable construction and acquisition is \$10,000 or more.
15. Will comply with environmental standards which may be prescribed pursuant to the following: (a) institution of environmental quality control measures under the National Environmental Policy Act of 1969 (P.L. 91-190) and Executive Order (EO) 11514; (b) notification of violating facilities pursuant to EO 11738; (c) protection of wetlands pursuant to EO 11990; (d) evaluation of flood hazards in floodplains in accordance with EO 11988; (e) assurance of project consistency with the approved State management program developed under the Coastal Zone Management Act of 1972 (16 U.S.C. §§1451 et seq.); (f) conformity of Federal actions to State (Clean Air) implementation Plans under Section 176(c) of the Clean Air Act of 1955, as amended (42 U.S.C. §7401 et seq.); (g) protection of underground sources of drinking water under the Safe Drinking Water Act of 1974, as amended (P.L. 93-523); and, (h) protection of endangered species under the Endangered Species Act of 1973, as amended (P.L. 93-205).
16. Will comply with the Wild and Scenic Rivers Act of 1968 (16 U.S.C. §§1271 et seq.) related to protecting components or potential components of the national wild and scenic rivers system.
17. Will assist the awarding agency in assuring compliance with Section 106 of the National Historic Preservation Act of 1966, as amended (16 U.S.C. §470), EO 11593 (identification and protection of historic properties), and the Archaeological and Historic Preservation Act of 1974 (16 U.S.C. §§469a-1 et seq.).
18. Will cause to be performed the required financial and compliance audits in accordance with the Single Audit Act Amendments of 1996 and OMB Circular No. A-133, "Audits of States, Local Governments, and Non-Profit Organizations."
19. Will comply with all applicable requirements of all other Federal laws, executive orders, regulations, and policies governing this program.
20. Will comply with the requirements of Section 106(g) of the Trafficking Victims Protection Act (TVPA) of 2000, as amended (22 U.S.C. 7104) which prohibits grant award recipients or a sub-recipient from (1) Engaging in severe forms of trafficking in persons during the period of time that the award is in effect (2) Procuring a commercial sex act during the period of time that the award is in effect or (3) Using forced labor in the performance of the award or subawards under the award.

CERTIFICATIONS

In accordance with the applicable statutes and the regulations governing the consolidated plan regulations, the jurisdiction certifies that:

Affirmatively Further Fair Housing –The jurisdiction will affirmatively further fair housing.

Uniform Relocation Act and Anti-displacement and Relocation Plan – It will comply with the acquisition and relocation requirements of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended, (42 U.S.C. 4601-4655) and implementing regulations at 49 CFR Part 24. It has in effect and is following a residential anti-displacement and relocation assistance plan required under 24 CFR Part 42 in connection with any activity assisted with funding under the Community Development Block Grant or HOME programs.

Anti-Lobbying –To the best of the jurisdiction's knowledge and belief:

1. No Federal appropriated funds have been paid or will be paid, by or on behalf of it, to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loan, or cooperative agreement;
2. If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal contract, grant, loan, or cooperative agreement, it will complete and submit Standard Form-LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions; and
3. It will require that the language of paragraph 1 and 2 of this anti-lobbying certification be included in the award documents for all subawards at all tiers (including subcontracts, subgrants, and contracts under grants, loans, and cooperative agreements) and that all subrecipients shall certify and disclose accordingly.

Authority of Jurisdiction –The consolidated plan is authorized under State and local law (as applicable) and the jurisdiction possesses the legal authority to carry out the programs for which it is seeking funding, in accordance with applicable HUD regulations.

Consistency with plan –The housing activities to be undertaken with Community Development Block Grant, HOME, Emergency Solutions Grant, and Housing Opportunities for Persons With AIDS funds are consistent with the strategic plan in the jurisdiction's consolidated plan.

Section 3 – It will comply with section 3 of the Housing and Urban Development Act of 1968 (12 U.S.C. 1701u) and implementing regulations at 24 CFR Part 135.

Title

Specific Community Development Block Grant Certifications

The Entitlement Community certifies that:

Citizen Participation -- It is in full compliance and following a detailed citizen participation plan that satisfies the requirements of 24 CFR 91.105.

Community Development Plan -- Its consolidated plan identifies community development and housing needs and specifies both short-term and long-term community development objectives that have been developed in accordance with the primary objective of the CDBG program (i.e., the development of viable urban communities, by providing decent housing and expanding economic opportunities, primarily for persons of low and moderate income) and requirements of 24 CFR Parts 91 and 570.

Following a Plan -- It is following a current consolidated plan that has been approved by HUD.

Use of Funds -- It has complied with the following criteria:

1. Maximum Feasible Priority. With respect to activities expected to be assisted with CDBG funds, it has developed its Action Plan so as to give maximum feasible priority to activities which benefit low- and moderate-income families or aid in the prevention or elimination of slums or blight. The Action Plan may also include CDBG-assisted activities which the grantee certifies are designed to meet other community development needs having particular urgency because existing conditions pose a serious and immediate threat to the health or welfare of the community, and other financial resources are not available (see Optional CDBG Certification).

2. Overall Benefit. The aggregate use of CDBG funds, including Section 108 guaranteed loans, during program year(s) 2020 [a period specified by the grantee of one, two, or three specific consecutive program years], shall principally benefit persons of low and moderate income in a manner that ensures that at least 70 percent of the amount is expended for activities that benefit such persons during the designated period.

3. Special Assessments. It will not attempt to recover any capital costs of public improvements assisted with CDBG funds, including Section 108 loan guaranteed funds, by assessing any amount against properties owned and occupied by persons of low and moderate income, including any fee charged or assessment made as a condition of obtaining access to such public improvements.

However, if CDBG funds are used to pay the proportion of a fee or assessment that relates to the capital costs of public improvements (assisted in part with CDBG funds) financed from other revenue sources, an assessment or charge may be made against the property with respect to the public improvements financed by a source other than CDBG funds.

In addition, in the case of properties owned and occupied by moderate-income (not low-income) families, an assessment or charge may be made against the property for public improvements financed by a source other than CDBG funds if the jurisdiction certifies that it lacks CDBG funds to cover the assessment.

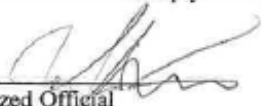

Excessive Force -- It has adopted and is enforcing:

1. A policy prohibiting the use of excessive force by law enforcement agencies within its jurisdiction against any individuals engaged in non-violent civil rights demonstrations; and
2. A policy of enforcing applicable State and local laws against physically barring entrance to or exit from a facility or location which is the subject of such non-violent civil rights demonstrations within its jurisdiction.

Compliance with Anti-discrimination laws – The grant will be conducted and administered in conformity with title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d) and the Fair Housing Act (42 U.S.C. 3601-3619) and implementing regulations.

Lead-Based Paint – Its activities concerning lead-based paint will comply with the requirements of 24 CFR Part 35, Subparts A, B, J, K and R.

Compliance with Laws – It will comply with applicable laws.

Specific HOME Certifications

The HOME participating jurisdiction certifies that:

Tenant Based Rental Assistance -- If it plans to provide tenant-based rental assistance, the tenant-based rental assistance is an essential element of its consolidated plan.

Eligible Activities and Costs -- It is using and will use HOME funds for eligible activities and costs, as described in 24 CFR §§92.205 through 92.209 and that it is not using and will not use HOME funds for prohibited activities, as described in §92.214.

Subsidy layering -- Before committing any funds to a project, it will evaluate the project in accordance with the guidelines that it adopts for this purpose and will not invest any more HOME funds in combination with other Federal assistance than is necessary to provide affordable housing;

Introduction

In 2015, the community came together to create a roadmap for ending homelessness in Santa Clara County. This plan— which was centered around a collective impact response and the proven Housing First model—set an ambitious goal to create 6,000 new housing opportunities and identified innovative strategies and programs for reducing homelessness.

Supportive Housing System Progress 2015-2019

Thanks to the collective efforts of partners throughout the community, over the past five years, we have done the following:

Helped **8,884 households** resolve their homelessness,

representing **14,132 people**

Doubled the number of supportive housing units in Santa Clara County

Doubled our temporary housing and emergency shelter capacity

Launched a new homelessness prevention system that now serves about **1,000 households annually**

Led a community-wide campaign that has successfully housed more than **1,600 veterans** and engaged nearly **800 private landlords** in the effort

Voters approved **\$950 million** to develop affordable housing through the 2016 Measure A Affordable Housing Bond and raised another **\$100 million** in private contributions to support the implementation of the community plan

Despite our progress creating a supportive housing system that assists thousands of homeless individuals and families each year, the crisis continues to grow. The systemic factors driving homelessness in our community—from the failed policies at the local, state, and national level to the extreme lack of housing options that are affordable for low-income residents—remain stronger than ever and are pushing more of our neighbors onto the streets every day.

These challenges have been compounded by the novel coronavirus (COVID-19) pandemic that arrived in our community as this plan was in development, making implementation of many of these strategies even more urgent. This public health crisis has ground our local economy to a halt, leaving many more households on the brink of homelessness due to job loss, lack of childcare, and economic uncertainty. The pandemic has also required a massive and immediate response by our crisis response system to quickly ramp up shelter capacity, increase access to hygiene services for people living outside, and protect those people experiencing homelessness who are particularly vulnerable. As a result, as this plan goes into effect, we anticipate there will be many more people experiencing or at risk of homelessness who will need immediate support, which will require our community to continue to be flexible and innovative in our responses to homelessness.

To truly end homelessness in Santa Clara County, we must summon the collective will and resources to not only respond to the current crisis and scale our successful housing strategies, but also address and eliminate the root causes of homelessness in our community.

Our Homelessness Crisis

According to the 2019 Point-in-Time count, there are 9,706 individuals experiencing homelessness on any given night in Santa Clara County.¹ Families with children, seniors, individuals with disabilities, veterans, youth and young adults are all represented in the county's diverse homeless population. More than 80% of these individuals are unsheltered—sleeping outside, in cars, or other places not meant for human habitation. We expect that these numbers will increase over the coming months as the full impact of the COVID-19 pandemic is felt.

The gap between the rich and the poor in our community, combined with the lack of housing development particularly at the lowest income levels, is fueling the homelessness crisis. According to the Public Policy Institute of California, families at the highest income levels in the Bay Area (the 90th percentile) have more than 12 times the income of families at the bottom (the 10th percentile).² Those at the bottom rung of the economic ladder have also not shared in the region's significant economic growth. Between 2000 and 2015 in Santa Clara County, workers with earnings in the 10th percentile saw their income decline by 12%.³

This income inequality has been further exacerbated by the economic slowdown caused by the COVID-19 pandemic as many low-income households living paycheck-to-paycheck struggle to make rent and pay for other basic needs.

¹ Applied Survey Research, "Santa Clara County Homeless Census & Survey Comprehensive Report 2019." 2019. <https://www.sccgov.org/sites/osh/ContinuumofCare/ReportsandPublications/Pages/HomelessnessCensusandSurvey.aspx>

² Public Policy Institute of California, "Income Inequality in California." 2020. <https://www.ppic.org/publication/income-inequality-in-california/>

³ Bay Area Equity Atlas, "Earned income growth for full-time wage and salary workers: Santa Clara County, CA, 2000–2015." <https://bayareaequityatlas.org/indicators/income-growth#/?geo=04000000000006085>

Compounding the impacts of this inequality is the fact that housing costs are higher than ever and housing that is affordable to the lowest-income families is not being produced. In fact, the National Low-Income Housing Coalition’s most recent report, *The Gap: A Shortage of Affordable Homes*, found that in 2018 there were only 34 affordable and available units for every 100 extremely low-income renter households in the San Jose metro area.⁴

Affordable & Available Rental Homes “Per 100 Renter Households” San Jose Metropolitan Area: 2018

In addition, longstanding and structural racial inequities continue to affect who becomes homeless in our community. A recent report commissioned by Destination: Home found that people of color are dramatically more likely than their white counterparts to become homeless in Santa Clara County, and that poverty alone cannot explain disparities in homelessness. For example:

While the brunt of this crisis is borne by our unhoused neighbors, we know its impacts are felt much more broadly. Our neighborhoods, first responders, businesses, and environment are also suffering the consequences of our region’s severe homelessness crisis.

Even worse, the problem continues to grow as more people are slipping into homelessness than ever before—the result of growing income inequality, gentrification and displacement, rising housing costs, an extreme housing shortage, and a lack of sufficient safety net services to adequately care for the most vulnerable in our community. In fact, for every homeless family or individual we connect to housing, between two and three more are experiencing homelessness for the very first time.

If this trend continues, in addition to the nearly 10,000 individuals currently experiencing homelessness, another 20,000 are at-risk of falling into homelessness over the next five years—far more than our supportive housing system currently has the capacity to serve.

⁴ National Low-Income Housing Coalition, “The Gap: A Shortage of Affordable Homes.” 2020. https://reports.nlihc.org/sites/default/files/gap/Gap-Report_2020.pdf

Ending Homelessness in Santa Clara County

Solving this crisis is one of the great moral challenges facing us. It will require tremendous effort, new partnerships, and even bolder strategies—and it will require the entire community to be a part of the solution.

We must take immediate actions that can improve the quality of life for the huge number of unsheltered residents in our community. We must increase shelter capacity and increase interim housing options, and we must expand services to meet their basic health and safety needs.

We need to significantly scale our housing development and programs to meet the growing need in our community. This includes building many thousands more supportive housing units, expanding our homelessness prevention strategies, and enhancing the way our supportive housing system serves those in need.

Most importantly, we will never end homelessness in our community if we do not attack the systemic root causes that continually push more of our neighbors into homelessness. As a result, we must address inequitable land use and housing policy to allow every jurisdiction to achieve their Regional Housing Needs Allocation goals for very low and extremely low-income housing production. We must ensure every resident who is able to work can access living wage employment and we must reverse decades-long structural inequities that have driven people of color and other vulnerable residents onto the streets.

As we implement the strategies in this plan, we will raise the voices of people with lived experience and share power with our unhoused and recently-housed neighbors. We will focus on policies and programs that reduce racial inequity, in an effort to reverse the disproportionately high rates of people of color who are unhoused.

None of this will be easy or cheap. In fact, just meeting the affordable housing needs of our community would require several billion dollars. But we cannot accept a future in which thousands of our neighbors are forced to live outside. Every member of our community deserves a safe and stable home—and it is our collective responsibility to make this vision a reality.

Our Plan

The 2020–2025 Community Plan to End Homelessness will serve as our roadmap for ending homelessness in Santa Clara County and is organized around three main strategies:

STRATEGY 1	STRATEGY 2	STRATEGY 3
 <p data-bbox="199 816 521 953">Address the root causes of homelessness through system and policy change</p>	 <p data-bbox="660 816 972 953">Expand homelessness prevention and housing programs to meet the need</p>	 <p data-bbox="1115 785 1404 953">Improve quality of life for unsheltered individuals and create healthy neighborhoods for all</p>

The strategies included in this plan are grounded in evidence-based practices, lessons learned over the past five years, and robust conversation and input from more than 8,000 members of our community; including people with lived experience of homelessness, subject matter experts, key stakeholders, and community members.

In addition, this plan sets aggressive targets designed to reverse the current growth in homelessness we are experiencing and bring us one step closer to our collective goal of eliminating homelessness in our community.

Our Targets

By 2025, we will:

Achieve a **30% reduction** in annual inflow of people becoming homeless*

House **20,000 people** through the supportive housing system

Expand the Homelessness Prevention System and other early interventions to serve **2,500 people per year**

Double temporary housing and shelter capacity to reduce the number of people sleeping outside

Address the **racial inequities present** among unhoused people and families and track progress toward reducing disparities

*The reduction in annual inflow target was based on annual inflow prior to the COVID-19 pandemic. This target will be reevaluated once the longer term impacts of COVID-19 are known.

The Strategies

Reaching these ambitious goals will require a collaborative community response based on proven, evidence-based strategies to end homelessness as well as innovative approaches that maximize the resources available.

The strategies are organized under three areas of focus that make up the basic framework for the plan.

STRATEGY 1

Address the Root Causes of Homelessness Through System and Policy Change

To end homelessness in our community, we must address its root causes. This plan sets a five-year goal of reducing new unhoused individuals and families in a given year by 30%. The strategies below are targeted to address the entrenched economic and societal causes of homelessness through transformational systemic and policy change. The system we live in has created social, economic, and racial disparities and it will take monumental shifts in policies and priorities to make effective change. While eliminating these disparities across our community will take more than the five years covered by this plan, we can make substantial progress towards this important goal by implementing the strategies below.

1 Ensure that people accessing safety net services have the support they need to obtain and maintain housing.

A Adopt housing screening and referral processes for individuals and families accessing safety net services.

B Expand housing programs for families involved in the child welfare system.

C Expand and diversify housing programs for foster youth to meet their long-term housing needs, so no foster youth become homeless.

D Expand housing resources available to Medi-Cal recipients accessing services in the Specialty Mental Health System.

E Advocate for the state and the federal government to increase funding and access to safety net services.

2 Ensure that people involved in the criminal justice system do not become homeless.

A Support households with incarcerated family members to prevent homelessness.

B Expand existing and develop new housing and workforce development programs to successfully reintegrate people leaving probation, parole, jails, and prisons into the community.

STRATEGY 1

Address the Root Causes of Homelessness Through System and Policy Change (Continued)

3 Create the conditions to develop enough affordable housing to meet the need in our community.

A Work with cities to change local land use and housing policy to allow for development of more affordable housing and help reverse housing disparities that have negatively impacted people of color.

B Identify underutilized land across the county to be used for dense affordable housing development.

C Prioritize development of housing for extremely low-income individuals and families making 30% of Area Median Income or less and set joint targets.

D Advocate for flexible funding that can speed up and create more affordable housing.

4 Protect residents from evictions, displacement, and housing discrimination.

A Adopt and implement new fair housing plans for the region.

B Strengthen local rent control and tenant protections.

C Provide legal assistance to ensure that individuals and families most severely impacted by the lack of affordable housing, namely people of color, have equal access to housing.

D Create a fund to preserve both naturally affordable and income-restricted affordable housing.

5 Ensure all residents who are able to work have access to living wage employment.

A Support efforts to increase the minimum wage to a living wage in Santa Clara County.

B Partner with corporations to create living wage job opportunities for people who are unhoused or at risk of homelessness.

C Provide training, internships, and mentorships to help people who are unhoused or at risk of homelessness to obtain access to living wage jobs.

D Invest in social enterprises that train and employ people who are unhoused or at risk of homelessness.

6 Expand public and private sector support for ending and preventing homelessness.

A Increase community engagement and support for affordable and supportive housing development throughout the county.

B Provide leadership opportunities for people with lived experience of homelessness to shape how we address homelessness in our community.

C Create a county-wide education campaign that increases awareness of the causes and impacts of homelessness and ongoing efforts to end homelessness.

STRATEGY 2

Expand Homelessness Prevention and Housing Programs to Meet the Need

While Strategy 1 aims to close the gaps in our social safety net and address the other systemic causes of homelessness, we know that there will be some people over the next five years who will still become unhoused due to a severe shortage of affordable and accessible housing. To end homelessness, we will need to continue to build capacity to provide a broad array of housing and services over the next five years.

1 Increase the capacity of supportive housing programs for people experiencing homelessness.

A Expand the supportive housing system to provide housing and services to help 20,000 unhoused people secure stable, permanent housing. Expansion would target the following:

- 7,000 people housed in Permanent Supportive Housing programs that provide long-term support.
- 10,000 people housed through Rapid Rehousing programs that provide short- and medium-term support.
- 3,000 people housed through Housing Problem Solving and other short-term or one-time assistance.

B Develop programs tailored to the needs of specific populations of people experiencing homelessness, including:

- Youth and young adults
- Older adults (55+) and seniors
- Families with children
- Adults (ages 25 to 54) without children

2 Provide a broad range of supports to prevent homelessness.

A Expand the Homelessness Prevention System to prevent homelessness for an additional 7,000 households who are at risk by providing targeted financial assistance and supportive services.

B Provide targeted financial resources to prevent homelessness and eviction for severely rent-burdened residents living in existing affordable units.

3 Create a state-of-the-art supportive housing system.

A Center the voices of people who have lived experience of homelessness, especially people of color, in the policy and program design decisions of the supportive housing system.

B Invest in professional development and competitive pay to attract and retain a highly qualified workforce of homeless service provider staff.

C Incentivize hiring of people who have lived experience of homelessness to reflect the client population—especially people of color and LGBTQI+ persons.

D Increase access to supportive housing programs for people of color by addressing racial bias in our system.

STRATEGY 3

Improve Quality of Life for Unsheltered Individuals and Create Healthy Neighborhoods for All

The first two strategies of the plan seek to end and prevent homelessness for as many people as possible over the next five years. However, the reality is that many people will remain unhoused due to an extreme housing crisis and increasing income inequality. To address this immediate crisis in our community and ensure healthy neighborhoods for all, we must begin by doubling our temporary housing and shelter capacity to serve 2,000 additional households each night and increase investment in health, safety and other basic services to better meet the needs of people living in unsheltered conditions and build connections to housing programs and safety net services offered throughout the county.

1 Double the number of year-round temporary housing beds and offer a variety of welcoming temporary housing options throughout the county.

- A** Build new partnerships to host emergency shelter, safe places to park and access services, and sanctioned encampments that are not swept and include hygiene and supportive services.
- B** Reduce barriers to shelter such as allowing for pets, storage of personal items, greater privacy, longer stays, and provide higher levels of safety for residents.
- C** Expand hours at new and existing shelters to remain open during the day.
- D** Ensure that all families with children under 18 years old who are unhoused have access to emergency shelter or temporary housing.
- E** Provide more public services in neighborhoods hosting emergency shelter or temporary housing programs.

2 Increase street outreach, hygiene services, and transportation options to match the needs of unsheltered residents.

- A** Increase access to basic hygiene resources, including bathrooms, showers, and laundry
- B** Increase the number of free public transit passes and other transportation options for people who are unhoused to access services.
- C** Increase the number of street outreach staff and case managers working in encampments.
- D** Provide opportunities for people who have lived experience of homelessness to provide peer-to-peer support.

3 Increase mental health and substance use services.

- A** Increase the number of mobile crisis teams with clinical staff, and expand their hours, to support individuals experiencing severe mental health and substance use crises.
- B** Increase the number of beds available for substance use treatment and provide the follow-up supportive services needed to prevent relapses.
- C** Increase access to mental health treatment for people who are unhoused and struggling with mental illness.
- D** Develop a plan to eliminate service access and treatment gaps for unsheltered people struggling with chronic and severe mental illness.

STRATEGY 3
Improve Quality of Life for Unsheltered Individuals and Create Healthy Neighborhoods for All *(Continued)*
4 Engage a cross-section of community partners to address the needs of unsheltered residents.

| <p>A Increase outreach to city and County staff and business and neighborhood associations about available resources to assist people who are unsheltered.</p> | <p>B Engage the private sector to contribute funding to support health and safety services and shelter for people who are unsheltered.</p> | <p>C Increase coordination between agencies engaging people living in encampments to ensure consistent and humane approaches to encampment resolution.</p> | <p>D Create a referral system where unsheltered residents can access information and services, such as available temporary housing and homeless services.</p> |
|---|---|---|--|

5 Ensure that community spaces are safe and welcoming for housed and unsheltered residents.

- | | |
|--|---|
| <p>A Partner with new private sector, community-based, and faith-based organizations to create safe and welcoming community spaces in every community for unsheltered people to access services during the day.</p> | <p>B Work with community organizations, cities, County agencies, and neighborhood associations to ensure that public spaces such as parks, libraries, and community centers remain clean, well-maintained, and welcoming to all.</p> |
|--|---|

Process Improvements Across Strategies 1, 2, and 3

Throughout our work, we must continue to expand coordination between systems, increase the use of data to improve programs, and increase training opportunities for all partners, including:

- Share data across safety net, criminal justice, and housing systems to better predict and target households who are experiencing homelessness or at risk of homelessness.
- Better utilize data collected in the homeless system of care and across County departments to know what is working well, what programs need improvement, and to identify inequities in the system.
- Provide demographic data, including race and ethnicity, in all reports on homelessness to highlight and address inequities.
- Create accessible dashboards that show our progress and hold our systems accountable.
- Provide trauma-informed care and racial equity/anti-racism training to all staff working with people experiencing homelessness.
- Increase access to services, including providing system navigation resources and training to all staff working with people experiencing homelessness.
- Align racial equity work in the homelessness sector with other racial equity initiatives in Santa Clara County.
- Expand partnerships with corporations, philanthropic institutions, and individual donors to secure private funding to reduce and prevent homelessness.
- Align and coordinate with other community efforts to address homelessness, such as the Homelessness Task Force.

Thank You!

The Community Plan Steering Committee would like to thank the following agencies and staff who participated in the Community Plan Work Group to gather community input and update the community plan:

- County of Santa Clara: Jackie MacLean, Hilary Barroga, Kathryn Kaminski, Hilary Armstrong
- City of San José: Sarah Zárate, Ragan Henninger
- Destination: Home: Ray Bramson, David Low
- City of Morgan Hill: Rebecca Garcia
- City of Mountain View: Wayne Chen
- LifeMoves: Bruce Ives
- Sacred Heart Community Service: Erin Stanton
- Community Solutions: Erin O'Brien

The Steering Committee and Work Group would like to thank the many people who are currently or formerly unhoused who shared their input and experiences to inform the community plan, including the following:

- Lived Experience Advisory Board
- Sacred Heart's Survivors of the Streets
- HomeFirst Sunnyvale Shelter's Client Collaborative
- Clients/residents from Hope's Corner, Bill Wilson Center, New Haven Inn, and Second Street Studios

The Steering Committee and Work Group would like to thank the following community stakeholders, agencies, and organizations for participating in the process:

- Abode Services
- Alta Vista High School
- Amigos de Guadalupe
- Anthem Blue Cross
- Bill Wilson Center
- Bitfocus
- Catholic Charities of Santa Clara County
- Charities Housing
- Cisco
- Cities Association of Santa Clara County
- City Team
- City of Cupertino
- City of Morgan Hill
- City of Mountain View
- City of Palo Alto
- City of San José
- City of Milpitas
- City of Santa Clara
- Community Services Agency
- Community Solutions
- County of Santa Clara:
 - Behavioral Health Services
 - Office of the District Attorney
 - Probation Department
 - Public Defender Office
 - Public Health Department
 - Reentry Services
 - Santa Clara Valley Medical Center
 - Social Services Agency
 - Office of Supportive Housing
 - Office of Equity and Social Justice
 - Offices of Supervisors Cindy Chavez, Dave Cortese, Susan Ellenberg, Joe Simitian, and Mike Wasserman
 - Valley Homeless Healthcare Program
- David and Lucile Packard Foundation
- Destination: Home
- Dependency Advocacy Center

- Downtown Business Association
- Downtown Streets Team
- EAH Housing
- East Side Union High School District
- Family Supportive Housing

- The Health Trust
- United Way Bay Area
- U.S. Department of Veterans Affairs
- West Valley Community Services
- YWCA of Silicon Valley

COMMUNITY PLAN TO END HOMELESSNESS IN SANTA CLARA COUNTY

2015-2020

WHAT WE WANT

A community in which all residents have access to appropriate and affordable housing and the support they need to retain it. We can end homelessness.

WE KNOW HOW.

WHO WE ARE

ABOUT THIS PLAN

This plan exists to create a community-wide roadmap to ending homelessness for the next five years. This plan will guide governmental actors, nonprofits, and other community members as they make decisions about funding, programs, priorities, and needs. This plan was created in April-August 2014 after and through a series of community summits related to specific homeless populations and homeless issues in Santa Clara County, including summits related to:

Youth | Families | Veterans | North County | South County | Environmental advocates

Discharging institutions (health care, mental health, corrections)

Nonprofit board members | Disruptive thinking about housing

An implementation body will use this plan as a guide to create an annual community action plan that will provide the “how” to this plan’s “what.” In 2014, the annual action plan has been heavily informed by the information provided by community members at the summits.

OUR VISION: No one lives outside.

It can happen to anyone: a job loss; a medical condition; missing a rent payment; falling behind and finding that you have nothing to fall back on. There are many ways someone can become homeless and only one way to really solve it. Homelessness doesn't end when we clear out an encampment or when we hand out blankets. Homelessness ends when everyone has a home.

In our community, a public-private partnership has been formed and already started removing traditional institutional barriers, creating new ways to provide accessible and affordable housing and defying convention in finding homes for many people, but there is still more to be done. It is time for our successes to be brought to scale.

Silicon Valley doesn't give up when there's a challenge. We solve it.

Over the last decade, Santa Clara County has gradually organized around a community-wide effort to address homelessness. In 2003, the City of San Jose completed a Homeless Strategy designed to eliminate chronic homelessness by focusing on prevention, rapid rehousing, wraparound services and proactive efforts. That led to Santa Clara County's 2005 Ten Year Plan to End Homelessness, and the 2008 Blue Ribbon Commission culminating in the establishment of Destination: Home as the public-private partnership vehicle to implement these strategies, resulting in a 2011 campaign geared towards ending chronic homelessness. Time and results have taught us that of the strategies laid out in 2003, access to housing is what works.

We can end homelessness. We know how. Move people into homes and align the support services they need to be successful and the cycle of homelessness stops.

Over the last two years, our coordinated effort proved that a Housing First model works in Santa Clara County. It demonstrated what national experts have known for years: it's cheaper to permanently house someone than to continually care for them while they live on the street. Lasting inter-agency partnerships have been forged and a new table of local leadership emerged to tackle our toughest barriers. With the momentum of this short term campaign, a singular question presented itself, "How many people should we leave on the streets?" The immediate and definitive answer our leaders delivered was, "None."

Ten years of progress has brought Santa Clara County to this point in time. We have **new collaborative cross sector partnerships**. We have a track record of success with **a new housing system**. We have **new tools** to engage both public and private sector funders. The public is demanding a real solution to homelessness and we are dedicated to delivering one. It's time to reimagine homes and rebuild lives. **We can end homelessness**. This is how we start.

HOW CHANGE WILL HAPPEN:

1 DISRUPT SYSTEMS

Develop disruptive strategies and innovative prototypes that transform the systems related to housing homeless people.

2 BUILD THE SOLUTION

Secure the right amount of funding needed to provide housing and services to those who are homeless and those at risk of homelessness.

3 SERVE THE PERSON

Adopt an approach that recognizes the need for client-centered strategies with different responses for different levels of need and different groups, targeting resources to the specific individual or household.

OUR TARGETS:

CHRONICALLY HOMELESS:

2,518 Will Be Housed

In the 2013 Santa Clara County Point In Time (PIT) count, there were 2518 chronically homeless people, not including veterans.

VETERANS:

718 Will Be Housed

In the 2013 PIT count, 718 veterans were homeless.

CHILDREN, YOUTH, AND FAMILIES:

>2,333 Will Be Housed

In the 2013 PIT count, 1,266 unaccompanied youth under the age of 25 were identified, of which 164 (13%) were under 18. Also, there were 1,067 homeless individuals living in 349 families with at least one child under 18.

One  represents 100 people

1 DISRUPT SYSTEMS

ACT FAST. STOP MANAGING AND START ENDING HOMELESSNESS.

WHAT WE ARE DOING	HOW WE WILL DO IT	2015	2020
<p>TRANSFORM THE WAY GOVERNMENT RESPONDS TO HOMELESSNESS</p>	Rethink how government organizes to respond to homelessness	Independent, siloed responses from each government system, each focused on one piece of the puzzle (e.g., health care, income)	Regionally coordinated resources and funding with all systems accountable for moving people into housing
	Ensure people leaving systems do not become homeless	Some homeless people leave systems (corrections, hospitals, mental health, foster care) without a next step in place	At discharge, all individuals have a plan for permanent housing and none are discharged to the streets
	Increase access to benefits for people who are homeless or at risk of homelessness	In 2013, 35% of homeless people received no government benefits	Homeless and at-risk individuals access all income and service benefits for which they are eligible
<p>INCLUDE THE PRIVATE SECTOR AND THE COMMUNITY IN THE SOLUTION</p>	Increase awareness	People in the private sector and community often see homelessness as an intractable and remote problem	Community members will understand their role in responding to homelessness and know it is solvable
	Increase and align private resources	Overall, private funding is unpredictable and working towards diverse goals	There is a coordinated funding strategy across the community, increasing funding, working towards the same goals, and relying on best practices
	Provide opportunities for the business sector to address homelessness	Businesses, often unintentionally, create barriers to ending homelessness	Businesses are partners in housing and employing people who are homeless
	Collaborate with community organizations	Some community groups target their resources to short-term responses	Informed community groups partner with other sectors to support efforts that end homelessness
	Engage with the environmental community to reduce the environmental impacts of homelessness	Unsheltered homelessness negatively impacts the environment and waterways and reduces the value of a community resource	This community has restored the environment, providing employment/housing opportunities for those formerly living in encampments

1 DISRUPT SYSTEMS

WHAT WE ARE DOING	HOW WE WILL DO IT	2015	2020
THE BEST HOMELESS SYSTEM OF CARE	Coordinate housing and services to connect each individual with the right housing solution	Homeless people may call many providers and sit on several waiting lists before they get housed and many families become homeless when it could be avoided	People who are homeless or at risk of homelessness get connected directly to the right resource for them
	Respond to system barriers and service gaps by making the best use of existing assets	There are many homeless programs and responses in this community, but no great way of knowing what works best, with lots of people still living outside	Community-wide, outcome-based decisions about the best programs and structures to meet community needs are made and implemented
	Partner across public and private sectors to improve systemic coordination	The private and public sectors operate independently, resulting in a patchwork of funding, priorities, and outcomes	Private sector and public sector funding is mutually supportive, creating a system of care that's internally consistent
	Increase provider capacity	Homeless providers want to end homelessness, but may not have the resources to do that	All homeless providers have sufficient resources to successfully implement programs that end homelessness

Managing Homelessness

Ending Homelessness

* Housing First centers on providing people experiencing homelessness with housing as quickly as possible - and then providing services needed to maintain their housing. This approach has the benefit of being consistent with what most people experiencing homelessness want and seek help to achieve.

2 BUILD THE SOLUTION

SCALE THE RESOURCES TO MEET THE NEED.

WHAT WE ARE DOING	HOW WE WILL DO IT	2015	2020
CREATE NEW HOMES AND OPPORTUNITIES FOR HOMELESS MEN, WOMEN, AND CHILDREN	Create 6,000 housing opportunities	There are approximately 6,000 people in our three target populations who do not have homes	People who are homeless have 6,000 more housing opportunities available to them
	Fund supportive services for the new housing opportunities	People who are homeless, even if they have housing, often cannot maintain it without case management, health care, and financial services	Each of the 6,000 new tenants has access to the services that will allow him or her to maintain housing

UNIQUE APPROACHES TO UNIQUE POPULATIONS

3 SERVE THE PERSON

GIVE PEOPLE WHAT THEY NEED, NOT WHAT WE HAVE.
 MORE EFFECTIVE, MORE EFFICIENT, MORE HUMANE.

WHAT WE ARE DOING	HOW WE WILL DO IT	2015	2020
DIFFERENT RESPONSES FOR DIFFERENT LEVELS OF NEED	Provide permanent supportive housing to end chronic homelessness	Many disabled people who have lived outside, sometimes for years, need housing that responds to their conditions	Chronically homeless people can access permanent supportive housing with intensive case management and wrap-around services
	Expand rapid rehousing resources to respond to episodic homelessness	Some people in our community experience repeated bouts of homelessness and are not able to stabilize with the resources available to them	Households with barriers to housing can access a temporary housing subsidy and step down services that are structured to end homelessness for that household for good
	Prevent homelessness before it happens	There are not enough resources available to help people avoid homelessness, or avoid homelessness again	Households at risk of homelessness have access to homeless prevention resources: housing stability services, emergency rental assistance, financial literacy, & landlord/tenant assistance and employment support services: child care, transportation, job training & placement

64% of 2013 survey respondents reported a unique challenge.

UNIQUE CHALLENGES

- Mental illness*
- Substance abuse
- Chronic physical illness
- Physical disability
- Developmental disability

*Mental illness includes PTSD, depression, and other mental illnesses including bipolar and schizophrenia.
 Note: Multiple response question, numbers will not total to 100%.

3 SERVE THE PERSON

WHAT WE ARE DOING	HOW WE WILL DO IT	2015	2020
UNIQUE APPROACHES FOR UNIQUE POPULATIONS	Create bridges and supports for populations who struggle to function within the homeless system of care	Certain populations have specific barriers to accessing the resources available to them to end their homelessness: <ul style="list-style-type: none"> • Veterans • Persons living with HIV/AIDS • Persons with serious mental illness • People with disabilities 	Resources support all homeless subpopulations to access housing and make best use of their specific benefits, employment, housing opportunities, and access to food and healthcare
	Structure housing and services to meet the needs of young people experiencing homelessness	Youth, children, and families are failed by several systems of care when they become homeless, and young people are underserved by a homeless system designed to meet adult needs	Systems of care work together to support housing and services that meet the needs of families, children, and youth, including robust prevention programs
	Make resources available in all parts of the County	North & South County do not have many housing options, nor adequate access to county services, and transportation is limited	Housing and services are available to people living in North & South County, in their communities

Source: Applied Survey Research. (2013). Santa Clara County Homeless Census & Survey. Watsonville, CA. For more detail or to view the comprehensive report, please visit www.appliedsurveyresearch.org.

THANK YOU!

Each summit was attended by a variety of stakeholders that donated their time to ensure that this plan includes input from the full community.

PLANNING PARTNERS INCLUDED:

Abode Services	Gilroy Compassion Center	Santa Clara County Creeks Coalition
ACT for Mental Health	Goodwill of Silicon Valley	Santa Clara Valley Medical Center
Audubon Society	Office of Assemblyman Rich Gordon	Santa Clara Valley Water District
Bill Wilson Center	Greenbelt Alliance	Office of Supervisor Joe Simitian
California Water Boards	The Health Trust	The County of Santa Clara
Office of Supervisor Dave Cortese	HomeAid Northern California	Second Harvest Food Bank
California Youth Connection	HomeFirst	Silicon Valley Children's Fund
Catholic Charities of Santa Clara County	Hospital Council of Northern California	Silicon Valley Community Foundation
City of Gilroy	Housing Authority of the County of Santa Clara	Silicon Valley Community Partnership
City of Milpitas	Housing Trust Silicon Valley	Sobrato Philanthropies
City of Morgan Hill	InnVision Shelter Network	South County Collaborative
City of San Jose	Kaiser Permanente	Stanford Hospital
City of Sunnyvale	Law Foundation of Silicon Valley	Sunnyvale Community Services
The Commonwealth Club	Purissima Hills Water District	Swords to Plowshares
Community Solutions	Restore Coyote Creek	United Way Silicon Valley
Community Technology Alliance	St. Joseph's Family Center	Valley Homeless Healthcare Program
Community Working Group	St. Mary Parish Gilroy	Veterans Administration, Palo Alto Healthcare System
The David & Lucille Packard Foundation	San Jose State University	Water and Power Law Group PC
Destination: Home	Santa Clara Adult Education	West Valley Community Services
Downtown Streets Team	Santa Clara County Office of Reentry Services	
Family Supportive Housing, Inc.		

Taking this plan forward,
THE 2014 IMPLEMENTATION GROUP INCLUDES:

Alison Brunner, Law Foundation of Silicon Valley	Kate Severin, Department of Veterans Affairs
Beth Leary, Family Supportive Housing	Katherine Harasz, Housing Authority of the County of Santa Clara
Chris Elias, Santa Clara Valley Water District	Kevin Zwick, Housing Trust Silicon Valley
Eileen Richardson, Downtown Streets Team and Community Technology Alliance	Ky Le, County of Santa Clara
Elise Cutini, Silicon Valley Children's Fund	Leslye Corsiglia, City of San Jose
Ellen Clear, The David and Lucile Packard Foundation	Louis Chicoine, Abode Services
Erin Gilbert, Charles and Helen Schwab Foundation	Michael Fallon, San Jose State Universtiy
Erin O'Brien, Community Solutions	Michael Fox, Goodwill Industries
Frederick J. Ferrer, The Health Trust	Poncho Guevara, Sacred Heart Community Services
Javier Aguirre, Santa Clara County Office of Reentry Services	Rick Williams, Sobrato Family Foundation
Jeff Ruster, City of San Jose Work2Future	Roberta Rosenthal, Department of Veterans Affairs
Jennifer Loving, Destination: Home	Sara Doorley, Valley Healthcare for the Homeless
Jenny Niklaus, HomeFirst	Shiloh Ballard, Silicon Valley Leadership Group
Julie Gantenbein, Water & Power Law Group PC	Sparky Harlan, Bill Wilson Center
Karae Lisle, InnVision Shelter Network	

Our gratitude to each of you
 for your work and dedication
 to ending homelessness together.

COMMUNITY PLAN TO
 END HOMELESSNESS
 IN SANTA CLARA COUNTY
 2015-2020

ANNUAL IMPLEMENTATION GUIDE
 FOR 2015

Considered: 01/13/2015

Community Plan to End Homelessness in Santa Clara County (2015-2020)

Annual Implementation Guide for 2015

The Annual Implementation Guide (referred to as “Guide” throughout this document) for 2015 of the Community Plan to End Homelessness (referred to as “Community Plan” throughout this document) in Santa Clara County (referred to as “County” throughout this document) was developed by the Implementation Workgroup in Fall of 2014 and was informed by summits that occurred in the Spring and Summer and a community Open House in September. In addition to the action steps for the first year, this guide includes follow up action steps that will be incorporated in future annual implementation guides. It is anticipated that the guide will be a living document that will continue to adjust during the year.

Summary of Community Guide

DISRUPT SYSTEMS

1.1 Transform the Way Government Responds to Homelessness

- A. Rethink how government organizes to respond to homelessness
- B. Ensure people leaving systems do not become homeless
- C. Increase access to benefits for people who are homeless or at risk of homelessness

1.2 Include the Private Sector and the Community in the Solution

- D. Increase awareness
- E. Increase and align private resources
- F. Provide opportunities for the business sector to address homelessness
- G. Collaborate with community organizations
- H. Engage with the environmental community to reduce the environmental impacts of homelessness

1.3 Create The Best Homeless System of Care

- I. Coordinate housing and services to connect each individual with the right housing solution
- J. Respond to system barriers and service gaps by making the best use of existing assets
- K. Partner across public and private sectors to improve systemic coordination
- L. Increase provider capacity

BUILD THE SOLUTION

2 Create New Homes and Opportunities to House Homeless Men, Women, and Children

- M. Create 6,000 Housing Opportunities
- Fund supportive services for the new housing opportunities

SERVE THE PERSON

3.1 Different Responses for Different Levels of Need

- N. Provide permanent supportive housing to end chronic homelessness
- O. Expand rapid rehousing resources to respond to episodic homelessness
- P. Prevent homelessness before it happens

3.2 Unique Approaches for Unique Populations

- Q. Create bridges and supports for populations who struggle to function within the homeless system of care
- R. Structure housing and services to meet the needs of young people experiencing homelessness
- S. Make resources available in all parts of the County

Annual Implementation Guide

#	YEAR ONE ACTIVITIES	RELATED & FUTURE WORK	POTENTIAL YEAR ONE LEADERSHIP	POTENTIAL YEAR ONE OUTCOMES
	STRATEGY 1: DISRUPT SYSTEMS			
	Government			
A	<i>Rethink How Government Organizes</i>			
A1	JURISDICTIONAL COORDINATION: Get agreement from local governments to coordinate funding for homeless services and housing and to implement a coordinated housing strategy	<ul style="list-style-type: none"> • Each jurisdiction creates housing opportunities as stated in guide • If needed, consider other organizational structures for coordinating strategy (e.g., Joint Powers Authority) 	County of Santa Clara <ul style="list-style-type: none"> • All 15 Jurisdictions • HACSC • SV Water District • Valley Transportation Authority 	<ul style="list-style-type: none"> • The Community Plan is presented to and approved by all 15 cities, County of Santa Clara, Housing Authority of County of Santa Clara and Santa Clara Valley Water District • Housing production goals and a detailed housing creation plan are created (<i>See related activity M1 below</i>)
A2	INTERAGENCY COORDINATION: Work to coordinate efforts and establish meaningful roles and responsibilities for County departments, city agencies (e.g., police, parks), and other governmental agencies in ending and preventing homelessness.	<ul style="list-style-type: none"> • Expand and enhance inter-departmental and inter-jurisdictional coordination of services • Consider the formation of an Interagency Council to support other specific goals of the strategic plan and to increase accountability 	County Executive <ul style="list-style-type: none"> • Director, SSA • Director, DBHS • Office of Supportive Housing • Director, Ambulatory Care Health Services • HACSC • Cities 	<ul style="list-style-type: none"> • Service intersections and overlap among departments and agencies is understood, and gaps are identified • Progress is made on developing community-wide performance measures related to homelessness

#	YEAR ONE ACTIVITIES	RELATED & FUTURE WORK	POTENTIAL YEAR ONE LEADERSHIP	POTENTIAL YEAR ONE OUTCOMES
A3	OFFICE OF SUPPORTIVE HOUSING: Establish the County's role in housing and homelessness by creating an Office of Supportive Housing, defining its role in creating housing opportunities, and clarifying its role in responding to homelessness	Year one work is expected to lead to identification of next steps <i>(See also other guide activities lead by Office of Supportive Housing or Collaborative Applicant)</i>	County of Santa Clara	<ul style="list-style-type: none"> • A coherent and comprehensive set of policies are developed that support the development of Extremely Low Income (ELI) and Permanent Supportive Housing (PSH) • An ongoing revenue source for ELI and special needs housing is identified
A4	COST STUDY: Complete a cost study to understand the costs of homelessness on all local government systems of care and use it to help analyze the long-term savings connected to meeting the targets of the Guide <i>(See related activity I1 below)</i>	<ul style="list-style-type: none"> • Based on the cost study's findings, evaluate how to reinvest and redistribute local resources 	Office of Supportive Housing/ Destination: Home <ul style="list-style-type: none"> • County departments • City departments (e.g. policy, fire, housing) • Jurisdictions 	<ul style="list-style-type: none"> • An analysis of the long-term savings from Guide implementation is completed (anticipated completion date of January 2015)
A5	SURPLUS LAND: Identify available government surplus land that could be used for temporary or permanent homes and begin conversations with local entities to use these properties for developments that serve homeless individuals and families	<ul style="list-style-type: none"> • Continue to work with local governments to develop housing strategies for government surplus land 	Destination: Home <ul style="list-style-type: none"> • County Departments • City departments (e.g. policy, fire, housing) • Jurisdictions 	<ul style="list-style-type: none"> • A list of all surplus lands appropriate for PSH and ELI housing is compiled • A strategy for how to obtain land that sites the maximum possible units is completed

#	YEAR ONE ACTIVITIES	RELATED & FUTURE WORK	POTENTIAL YEAR ONE LEADERSHIP	POTENTIAL YEAR ONE OUTCOMES
B	<i>No One Discharged to Homelessness</i>			
B1	<p>DISCHARGE PLANNING: Analyze and understand discharge planning procedures in:</p> <ul style="list-style-type: none"> • Jails and Prisons • Foster care, and • Hospitals (mental health and general health) <p>Work to implement streamlined and consistent discharge procedures at local hospitals</p>	<ul style="list-style-type: none"> • Improve and streamline discharge planning procedures in each system of care • From discharging locations, streamline access to life stabilization resources and immediate placement in housing through coordinated assessment 	<p>Collaborative Applicant (Office of Supportive Housing)</p> <ul style="list-style-type: none"> • County Departments • City departments (e.g. policy, fire, housing) • County • Systems of care • Hospital Council 	<ul style="list-style-type: none"> • The scope of systemic discharges to homelessness from each system of care is researched and understood, including the number of people being discharged from systems, and the resources available to help them • Confirm that all systems have policies in place regarding discharge to homelessness, and confirm that all policies and procedures are followed by staff • Improved discharge procedures and plans are in place for local hospitals, with shared available resources
C	<i>Increase Access to Benefits</i>			
C1	No planned activities in year one at this time	<ul style="list-style-type: none"> • Expand mobile integrated service teams that enable homeless persons to apply for benefits and receive a variety of services (health/behavioral health, drug and alcohol treatment, housing placement services) from one team • Consider uniform application for locally determined benefits 	<p>To be determined</p> <ul style="list-style-type: none"> • SSA 	No planned activities in year one at this time
	Private Sector/Community (1.2)			
D	<i>Increase Awareness</i>			
D1	<p>BRANDING CAMPAIGN: Conduct a branding campaign to make homelessness relatable and solvable</p>	<ul style="list-style-type: none"> • Allocate resources to support messaging adoption • Use branding as part of housing creation campaign 	<p>Destination: Home</p> <ul style="list-style-type: none"> • Universities and colleges • Community based organizations • Media 	<ul style="list-style-type: none"> • A branding campaign is launched and messaging is adopted by a wide variety of stakeholders

#	YEAR ONE ACTIVITIES	RELATED & FUTURE WORK	POTENTIAL YEAR ONE LEADERSHIP	POTENTIAL YEAR ONE OUTCOMES
E	<i>Align Private Resources</i>			
E1	PHILANTHROPIC PARTNERSHIPS: Commitment to cause across private funders to align funder goals, expectations, allocation of resources, and performance measures with ongoing Community Plan implementation	<ul style="list-style-type: none"> Partner with jurisdictions and providers to create innovative housing/services Create funding partnerships to achieve shared performance goals and encourage partnerships between philanthropy and government 	Sobrato Philanthropies <ul style="list-style-type: none"> SVCF Local and National Foundations Corporate Philanthropy Silicon Valley Leadership Group 	<ul style="list-style-type: none"> Complete evaluation about the feasibility of a funding partnership and a decision is made about the form and potential partners Partnership body begins to work together toward shared outcomes
F	<i>Opportunities for Business Sector</i>			
F1	LANDLORDS: Collaborate with rental property owners in the County, both market-rate and affordable to: <ul style="list-style-type: none"> Increase available housing options and Respond to housing barriers (e.g., credit and criminal history) (<i>See related activities I1 and M1 below.</i>) 	Year one work is expected to lead to identification of next steps	Housing Authority of County of Santa Clara <ul style="list-style-type: none"> Landlords Responsible Landlord Initiative Downtown Streets Team Community based organizations 	<ul style="list-style-type: none"> Private units for all available rental subsidies are located (<i># to be added</i>) An outline of barriers to housing (see coordinated assessment) is developed, and strategies are created to respond
G	<i>Collaborate with Community</i>			
G1	APPLICATION: Develop and launch an application to coordinate food donations in City of San Jose	<ul style="list-style-type: none"> Adopt technology solutions to connect community members and organizations that want to provide resources to agencies and people that need help 	City of San Jose <ul style="list-style-type: none"> Silicon Valley Talent Partnership Universities and Colleges (<i>Matthew Bahls</i>) 	<ul style="list-style-type: none"> A food application is launched to connect people who wish to donate food with those who need food

#	YEAR ONE ACTIVITIES	RELATED & FUTURE WORK	POTENTIAL YEAR ONE LEADERSHIP	POTENTIAL YEAR ONE OUTCOMES
H	<i>Engage Environmentalists</i>			
H1	ENVIRONMENT IMPACTS: Engage partners and develop and use a model to reduce environmental damage caused by homeless encampments throughout the County and in all its cities	Year one work is expected to lead to identification of next steps.	Santa Clara Valley Water District (<i>Chris Elias</i>) <ul style="list-style-type: none"> • Environmental advocates • Jurisdictions 	<ul style="list-style-type: none"> • Outreach efforts are expanded to train and educate homeless persons as environmental stewards • Identify resources to support stewardship • The model of clearing encampments used by San Jose is expanded to two additional sites in the County

#	YEAR ONE ACTIVITIES	RELATED & FUTURE WORK	POTENTIAL YEAR ONE LEADERSHIP	POTENTIAL YEAR ONE OUTCOMES
	<i>Best Homeless System of Care (1.3)</i>			
I	<i>Connect to Right Housing Solution</i>

Letter from the County Executive

We are pleased to share our annual State of the Supportive Housing System Report. This report highlights the advancements Santa Clara County made during 2021 toward our collective goal of ending homelessness while simultaneously facing the ongoing challenges of the COVID-19 pandemic with innovative approaches that have helped transform our ongoing work to address the needs of our unhoused neighbors. We learned that we had the capacity to do more and better, and we will continue to build on that capacity as we work toward the ambitious goals and strategies laid out in the 2020-2025 Community Plan to End Homelessness. The Community Plan provides a solid framework on which we are building our response to the current housing crisis. Through the collaborative efforts of system stakeholders, service providers, and local organizations – as well as the advocacy and support of residents – we have made tremendous strides toward scaling successful housing strategies, addressing the root causes of homelessness, expanding prevention efforts, and improving quality of life for unsheltered individuals.

This report opens with reflections on where we have been and where we are now. We recognize the various ways in which the community continues to strengthen our supportive housing system, build our homelessness prevention system, and expand housing resources and supports to better serve our unhoused neighbors. We highlight local efforts such as the 2016 Measure A Affordable Housing Bond that have made an extraordinary impact on housing availability in Santa Clara County, helping to address central causes of homelessness through policy change.

As we move toward greater equity and inclusivity, guidance from the Lived Experience Advisory Board and the Youth Action Board uplift and center the voices of people with lived experience in various capacities and community planning processes. Their leadership ensures that our system priorities and our actions as a community remain rooted in lived expertise and that we are advancing solutions that will most effectively support people who are currently unhoused or at risk of becoming unhoused. We truly appreciate and value our partnerships with these boards and look forward to continuing to collaborate to grow and improve our supportive housing system.

Through these efforts, we are working together to make ending homelessness a reality in Santa Clara County. Thank you for being a part of that vision.

Sincerely,

Jeffrey V. Smith, M.D., J.D.

Introduction

2021 was a year of tremendous challenges and opportunities for our community and our efforts to address the housing crisis in Silicon Valley. The COVID-19 pandemic continued to impact our unhoused neighbors, putting them at heightened risk. Discrimination placed barriers between people and the jobs and homes that they needed to survive. At the same time, the county made significant progress towards the goals we set in the 2020-2025 Santa Clara County Community Plan to End Homelessness (Community Plan) and innovated new strategies and system improvements in response to the emergent needs surfaced by the pandemic.

Santa Clara County Homeless Census & Survey¹

The Community Plan zeros in on the root causes of homelessness – economic injustice, racism, sexism, stigmatization of mental illness, and the astronomical costs of housing – taking a collective impact approach involving partners across many sectors. Through these partnerships, we work together to identify inequities and redesign systems that fail to meet the needs of all people.

Two key allies include the Lived Experience Advisory Board (LEAB) and Youth Action Board (YAB), comprised of people who have experienced homelessness. In a world where many decisionmakers are disconnected from the realities of homelessness, the LEAB and the YAB provide critical guidance that informs the County’s policymaking, planning processes, and funding decisions.

Guided by the Community Plan, we have invested in a continuum of long- and short-term housing solutions. We kept people housed by expanding homelessness prevention programs, including the Emergency Rental Assistance program, which distributed \$46 million to at-risk households. These efforts have contributed to a 33% decrease in the annual inflow of people becoming unhoused.

We have also focused on the community’s priority of decreasing unsheltered homelessness by leveraging state Homekey funds and other resources to develop innovative emergency interim housing. Local jurisdictions such as the City of Mountain View, the City of San José, the City of Palo Alto, and others have committed more funding than ever before to increase temporary housing opportunities.

Continual increases in the stock of permanent affordable housing also ensure that periods of homelessness are brief and non-recurring. Through the 2016 Measure A Affordable Housing Bond alone, we have added 3,662 new and renovated units of sustainable long-term housing. Without dedicated properties such as these, households with low incomes would struggle to maintain stability in an area with some of the highest housing costs in the nation.

Throughout this report, you will read about our community’s efforts in more detail, and also hear from some of our most impacted community members. Our hope is that you are left not only with a sense of all that remains to be done, but also all that is possible.

“COVID is not going anywhere – COVID does not discriminate. Over time, we’re still building relationships with our community, and we do our best to keep everyone safe.

– Tara Blair, PATH COVID Vaccine Ambassador

¹ The County did not carry out an unsheltered homeless census and survey in 2021 due to COVID-19 health and safety risks and statewide public health orders in place. The 2022 unsheltered homeless census and survey was delayed by a January COVID-19 surge and was thus conducted in February. The count shows a 3% increase in people experiencing homelessness from 2019 to 2022. The small increase reflects both the progress and challenges our community continue to face in preventing and ending homelessness. This report shows that over 7,800 people have been permanently housed since 2020. Absent that progress, the increase likely would have been much larger.

Expanding the Supportive Housing System

In 2021, the supportive housing system continued to expand thanks to the community's bold efforts to respond to the needs of our neighbors. In addition to the development of new supportive housing units, the community has been expanding available supports system-wide to tackle the biggest challenges faced by our region – to decrease the number of people becoming unhoused and improve the ability of people experiencing homelessness to obtain and maintain stable housing.

Reducing the Number of People Becoming Unhoused for the First Time

The County and partners are taking steps to ensure that fewer people become unhoused. In the past year, the County surpassed its goal of a **30% reduction in annual inflow of people becoming unhoused**. By the end of 2021, the number of households experiencing homelessness for the first time decreased by 33%, from 4,771 baseline in 2019 to 3,172 in 2021.

Homelessness Prevention System (HPS)

HPS brings together a network of 20 community partners to provide temporary financial assistance, legal support, and other services to help at-risk families and individuals maintain their housing and avoid falling into homelessness. Since its launch in 2017, HPS has prevented homelessness for thousands of our most vulnerable residents – 92% of 3,087 households served remained housed one year after exit from the program, and capacity has increased to around 1,600 households per year.

Eviction Prevention

Supportive housing case managers build collaborative relationships with landlords and provide critical support to anticipate and resolve disputes and prevent eviction. Landlord engagement and tenants' rights trainings, anti-eviction legal services, and mediation support this work. Emergency Rental Assistance (ERA) and rent relief programs provide essential interventions that help residents retain their housing even during periods of financial difficulty. Permanent Supportive Housing (PSH) programs offer Housing First no-fail support for clients even after evictions, working with clients to address causes of eviction and find better-fit housing.

Housing Problem Solving

Housing Problem Solving offers flexible and creative solutions to help individuals and families quickly resolve housing crises, encouraging safe housing options to meet each person's unique needs and avoid homelessness. In 2021, the Continuum of Care (CoC)⁴ expanded Housing Problem Solving, with flexible funding available through a network of community partners and centrally accessible through the shelter hotline.

⁴ The Continuum of Care (CoC) is a broad group of stakeholders dedicated to ending and preventing homelessness in Santa Clara County. The key CoC responsibilities are ensuring community-wide implementation of efforts to end homelessness, as well as ensuring programmatic and systemic effectiveness.

Increasing Permanent Housing Placements

A network of public agencies and nonprofit partners works collaboratively to support people experiencing homelessness to rapidly obtain stable housing and to maintain their housing through income support and connections to employment. Through these collective efforts, 1,943 households were permanently housed in 2021.

More Housing, More People Housed

In 2021, the supportive housing system added 171 units of permanent supportive housing and 188 units of interim housing to give permanent housing clients stability during their housing search. Affordable housing developed with the 2016 Measure A Affordable Housing Bond (Housing Bond) and other funds also included 387 units for rapid rehousing clients. Additionally, funding for another 662 units was approved.

Increasing Stability in Housing

Connections to employment opportunities, interim housing between placements, and other supports help Santa Clara County community members to achieve and maintain stability in housing.

Interim housing programs

Interim housing programs such as Willow Glen Studios on Pedro Street assist people enrolled in supportive housing programs who are still in the process of finding an apartment to rent or who are waiting for a new supportive housing unit to finish construction. While the County strives to house people as quickly as possible, interim housing like Pedro Street provides a safe, clean, and comfortable residence as well as access to services to improve health, stability, and quality of life during the wait for permanent housing.

Income Support for People Who Need it

A new standard assessment allows providers to immediately identify clients who will benefit from employment services and refer them to employment and job training programs to help them grow their incomes.

New Employment Opportunities

In 2020 and 2021, the County of Santa Clara and City of San José expanded employment opportunities for unhoused and formerly unhoused adults, opening doors to new roles as call center operators, vaccine outreach ambassadors, and interim housing staff. With funding from the CalWORKs program, the community created new employment opportunities, including hiring additional staff for the Here4You hotline, the call center that centralizes referrals to temporary housing programs, and other community resources. Local interim housing and service agencies LifeMoves and Abode partnered with the County to conduct recruitment.

Destination: Work

The Destination: Work initiative is a partnership between the Office of Supportive Housing, Destination: Home, and JobTrain that connects participants with living-wage employment leading to careers in high-growth industries such as health care, technology, advanced manufacturing, building, and construction. JobTrain offers resume support, career exploration, interview skills, job search assistance, and youth-targeted paid work experience, as well as training in digital and financial literacy.

Supportive Housing System Components

HOUSING DEVELOPMENT

- Increases affordable housing supply, providing a path to long-term housing stability for people who are unhoused and helps avoid future occurrences of homelessness caused by extreme housing costs

HOMELESSNESS PREVENTION

- Helps individuals and families who are about to lose their housing to remain housed where they are or move to more sustainable permanent housing

OUTREACH

- Engages with people who are unhoused on the street, in parks and other public spaces, and in vehicles
- Acts as an access point for the Coordinated Entry System and for emergency shelter
- Locates people who have been referred to housing programs by the Coordinated Entry System

COORDINATED ASSESSMENT SYSTEM

- Acts as a front door to the community's housing resources
- Matches people who are unhoused to the community's transitional housing, rapid rehousing, and permanent supportive housing programs

HOUSING PROBLEM SOLVING

- Engages people in common sense conversations to identify creative solutions, unexplored options, and resources to quickly return to housing

HERE4YOU CALL CENTER

- Provides a single point of access to emergency shelter beds and centralizes emergency shelter referrals
- Offers immediate Housing Problem Solving support
- Acts as an access point to the Coordinated Entry System

INTERIM HOUSING

- Provides temporary housing for people who are unhoused and have been enrolled in a Rapid Rehousing or Permanent Supportive Housing program while they are searching for a permanent place to live

EMERGENCY SHELTER

- Provides a safe place to sleep for people who are unhoused
- Provides meals, showers, other basic needs services, and connections to community resources
- Acts as an access point to the Coordinated Entry System

TRANSITIONAL HOUSING

- Provides temporary housing and services for people who are unhoused and seeking a more structured living environment, especially youth and veterans

RAPID REHOUSING

- Provides supportive services and temporary rental assistance to people who are unhoused
- Helps individuals and families obtain permanent housing and increase income so that they can remain housed independently

PERMANENT SUPPORTIVE HOUSING

- Helps individuals and families with disabilities maintain permanent housing through long-term rental subsidies, connections to medical and behavioral health care, and other services

Lived Experience Advisory Board Highlight

Santa Clara County's LEAB plays several integral roles in the homeless system of care by improving the supportive housing system, dispelling myths about homelessness, and helping the broader community better understand the needs of unhoused residents. The LEAB is composed of 23 currently and formerly unhoused residents with diverse life experiences that conduct program evaluations, facilitate provider training, provide meaningful input on new countywide policies, and make recommendations for grant spending, among other endeavors. The LEAB also offers leadership development opportunities for members.

As the LEAB's membership has grown and diversified, their project portfolio and impact on the homeless system of care have continued to deepen. The LEAB draws not only on their individual lived expertise, but also on a foundation of strong relationships with the unhoused community. Throughout the COVID-19 pandemic, the LEAB has collaborated with the Office of Supportive Housing and the City of San José to conduct a coordinated, extensive street outreach campaign throughout the county to deliver hot meals, hygiene supplies, and other critical provisions to improve quality of life for unsheltered individuals. LEAB members have not stopped at delivering food, however, and have leveraged this initiative to build rapport with encampment residents and connect them to community resources, identify strategies to meet their basic needs, and support them in resolving barriers to housing.

Tapping into this foundational connection to the unhoused community, the LEAB has played a critical role in improving the homeless system of care. Upon request by a community-based service provider and the City of San José, a task group of LEAB members comprehensively evaluated homeless street outreach and case management effectiveness, unmet needs, and areas for improvement. The LEAB surveyed staff and clients, performed field observations, reviewed staff orientation and training materials, and audited policies and procedures. In the culminating report, the LEAB proposed a series of actionable recommendations informed by national best practices to strengthen program efficacy, efficiency, and equity.

In addition to program evaluation, the LEAB has been a key partner in strengthening the supportive housing system by leading training on housing problem solving for call center, emergency shelter, drop-in center, and other program staff. LEAB members teach Housing-First-aligned, person-centered, and strengths-based strategies to empower program staff to have creative conversations that support unhoused residents in identifying and leveraging household strengths, support networks, and other resources in overcoming barriers to housing stability and identifying potential solutions to their housing crisis.

Youth and Young Adults Highlights

Youth Action Board

Established in July 2021, the YAB is a community of youth and young adults (between the ages of 18-26) who are currently or formerly unhoused or have lived experience of housing instability focused on creating collaborative, local solutions to homelessness. They advise the County of Santa Clara on issues that impact youth and young adults and drive forward the implementation of youth-focused housing programs and services.

The YAB has grown immensely since its launch and is taking steps to further organize as an autonomous group. The Board is building internal structures and policy to continue to be a powerful voice for youth and young adults in the community and contribute to community-wide efforts.

YAB member Jocelyn Arenas stated that personal experience plays a role in how YAB members show up and engage in the work. She stated that “the YAB is a group of people who want to make a difference in the community because of how their experiences have impacted them. For myself, I hold my heart really close to the work that I do.” The YAB has focused on not only building group identity, but also valuing and honoring the various lived experiences of members.

Karen Mestizo, YAB member and YHDP Community Coordinator shared that the YAB is focused on “taking action and defining what it means to be autonomous. This is a big step that requires more work and involvement, and people are very passionate about it.” Additionally, the YAB is building partnerships with other youth groups within the community and other YABs nationwide to share best practices in supporting youth leadership.

When asked what the most impactful part of this work is, Mestizo answered, “getting the opportunity to be involved in these decisions that shape our community. Its challenging, but that’s what helps aid growth. This work allows me to challenge myself and challenge the system in order to create something better for my community.”

Youth Homelessness Demonstration Project Funding

In October 2021, Santa Clara County was selected by U.S. Department of Housing and Urban Development (HUD) to participate in the Youth Homelessness Demonstration Program (YHDP). YHDP is a federal initiative designed to prevent and end youth homelessness guided by a youth-led community planning effort culminating in the Santa Clara County Community Plan to End Youth and Young Adult Houselessness. The YAB provided invaluable oversight and guidance to the community throughout the YHDP application and community planning process and established the guiding vision for the community plan, through which \$10.4 million in federal funding will go to expand efforts to tackle youth homelessness over the next two years.

The Santa Clara County Community Plan to End Youth and Young Adult Houselessness is the outcome of a six-month community planning process led by the YAB and YHDP Planning Group. The plan outlines the roadmap for YHDP implementation and represents the community’s commitment to honoring youth and youth adult leadership in system change efforts. It is centered around the following goals developed by community stakeholders and youth with lived experience:

- **Goal 1:** The community identifies all unaccompanied youth experiencing houselessness
- **Goal 2:** The community uses prevention and diversion strategies whenever possible, and otherwise provides immediate access to low-barrier crisis housing and services to any youth who needs and wants it. Diversion and prevention should encourage long-term stability and ensure that youth are adequately supported and uplifted out of houselessness.
- **Goal 3:** The community uses coordinated assessment processes to effectively link all youth experiencing houselessness to housing and services solutions that are tailored to their needs.
- **Goal 4:** The community acts with urgency to swiftly assist youth to move into permanent or non-time-limited housing options with appropriate services and supports.
- **Goal 5:** The community has resources, plans, and system capacity in place to prevent and quickly end future experiences of houselessness among youth.

Since the adoption of this plan, the local application and funding process for YHDP has concluded and resulted in awarded funding for five new projects serving youth and young adults.

COVID-19 Response Updates

Systems Change

Santa Clara County's supportive housing system is constantly adapting and evolving to better meet the needs of the community with the input of people with lived expertise, providers, policymakers, and lessons learned from ongoing efforts to respond to multiple crises, including the COVID-19 pandemic. One notable system change to come out of the pandemic was the creation of a centralized hotline to rapidly screen and place people in shelter according to their need. Building on the successes of the hotline during the earlier phases of the pandemic, the County launched the Here4You Call Center in Fall 2021 with the support of partners including the City of San José and the operating community-based organization, the Bill Wilson Center.

The call center builds on the shelter hotline established during the pandemic and serves as a centralized call center for any community members seeking assistance or referrals to temporary housing programs. In the past, individuals and families had to call multiple phone numbers and undergo multiple screening processes to locate services, which could be challenging under the best of circumstances and even more difficult amid a housing-related crisis. The call center provides screening, referrals, and transportation to emergency shelter programs, linkages to the Homelessness Prevention System, Housing Problem Solving services including financial assistance to resolve housing crises, and referrals to other community resources. Call center staff provide services that are low-barrier, trauma-informed, and culturally and linguistically responsive.

COVID-19 Education & Outreach Program

The COVID-19 Education & Outreach Program was a critical piece of the County's efforts to distribute information and resources regarding vaccination. The success of the program can be attributed largely to the cultural competencies and leadership of teams with lived experience -- 76% of ambassadors deployed into the community had lived experience of homelessness. Over 31,000 hours of outreach was conducted in English, Vietnamese, and Spanish beginning in November 2021 with 13,831 individuals surveyed through these efforts.

Tara Blair, a PATH COVID-19 outreach ambassador, shared that there was originally a high amount of hesitancy regarding vaccines and misinformation about their effectiveness, and building rapport with individuals in crisis was crucial to engaging in educational conversations about COVID-19 vaccines. The team reached unhoused people through in-person outreach, flyers, email and phone communications, and vaccine drives.

Staff provided resources such as food and basic needs supplies to build trust with individuals before providing education about vaccines. The diversity of the vaccine ambassador team in terms of lived experience, culture, and age coupled with their compassion for the homeless community were key to successful outreach efforts.

Regarding the impact of vaccine ambassadors, Blair said: "Our teams do a lot more than assisting folks with getting shots on their arms. It's not just COVID – people are needing and wanting services. A big portion of the community I know from my past. It makes me really grateful to serve my community."

Impact on the Ground

The Project Roomkey program is an example of the County's swift and impactful COVID-19 response, providing temporary emergency shelter to people living unsheltered during the COVID-19 pandemic and serving as a pathway to more permanent housing options.

Shannon and her elderly mother, Sarah, had been living in encampments and on the streets for more than 20 years. Prior to receiving housing and services through Project Roomkey, Shannon struggled with trauma from domestic violence, while Sarah experienced mobility issues and faced a language barrier when seeking services. Both had experienced long term post-traumatic stress disorder and feared identity theft due to past experiences.

County and Abode case management partners supported Shannon and Sarah in obtaining benefits they had not received in years, including General Assistance, CalFresh, Medi-Cal, and Social Security Disability Insurance. Shannon and Sarah eventually moved into permanent housing through a Project Homekey program.

Christine Khoo, Program Manager at the County of Santa Clara, stated the following about her work with this family: "It feels amazing to get folks housed out of such a negative, scary time with a worldwide pandemic. To know that these women now feel safe, aren't exposed to the elements, and live in a place good for their physical and mental health made it very much worth it and changed the lives of chronically homeless individuals."

**Note: names have been changed to protect client privacy.

Calabazas Community Apartments

2016 Measure A Affordable Housing Bond Progress

In November of 2016, Santa Clara County voters approved a \$950 million Affordable Housing Bond to transform affordable housing in the county. The Housing Bond is projected to fund 120 new affordable housing developments over ten years, including 4,800 new units dedicated to Extremely Low-Income and Very Low-Income households, along with the establishment of rental and ownership opportunities for Moderate Income households. The Housing Bond provides the means for the County to give our community’s most vulnerable residents a fresh start. Significant progress has been made across the county since the introduction of the Housing Bond, including, as of 2021:

35
DEVELOPMENTS

810
UNITS OPEN NOW

550
TO OPEN IN 2022

3,044
TOTAL NEW UNITS

+ **618**
RENOVATED UNITS

= **3,662**
UNITS TOTAL

7 CITIES | **\$25 MILLION** FIRST-TIME HOMEBUYER PROGRAM

Every dollar invested through the Housing Bond incentivizes an average of \$3.50 from outside investments.

Development and renovation projects funded by the Housing Bond are in the process of adding new units of affordable, low-income, and moderate-income housing across the county.

Community Plan Implementation Update

The 2020-2025 Community Plan to End Homelessness is the product of a robust community engagement process led by the Santa Clara County CoC and building on the successes of previous years. The Community Plan recognizes that rates of homelessness continue to grow in Santa Clara County, impacting too many members of our community. The systemic factors that fuel homelessness remain ever-present – the rising income gap in our community, insufficient supply of affordable housing (particularly at the lowest income levels), and longstanding structural inequities – all compounded by the COVID-19 pandemic. The Community Plan is a call for bold action by partners across the County, to address these roots of homelessness and provide services and housing for those in need.

Two years into implementation, the Community Plan continues to guide our County, cities, nonprofits, and other community partners as they make decisions about funding, programs, priorities, and needs. The Community Plan is organized around three core strategies:

STRATEGY 1	STRATEGY 2	STRATEGY 3
 <p data-bbox="203 1564 519 1701">Address the root causes of homelessness through system and policy change</p>	 <p data-bbox="657 1564 966 1701">Expand homelessness prevention and housing programs to meet the need</p>	 <p data-bbox="1112 1533 1404 1711">Improve quality of life for unsheltered individuals and create healthy neighborhoods for all</p>

The Community Plan identifies aggressive targets designed to reverse the growth in homelessness and bring us closer to the collective goal of ending homelessness in Santa Clara County.

Community Plan: Progress Toward Goals

In partnership with local Cities, the Santa Clara County Housing Authority, nonprofit service providers, and other stakeholders, the County has made tremendous strides toward achieving Community Plan goals and putting strategies into practice during the first two years of implementation.

STRATEGY 1 Address the Root Causes of Homelessness Through System and Policy Change

Through Strategy 1, we are investing in a future where homelessness is rare, and interventions are in place to ensure that those at risk of are quickly connected with services and stable housing. The County and its partners are laying the groundwork for this future through coordination with safety net services, targeted resources for prevention, policy changes to increase affordable housing stock, increasing access to employment and income, and advocacy and education. Crucial to each of these efforts is the acknowledgement of systemic racism as a root cause of homelessness and housing instability, and racial equity must be central to all solutions.

STRATEGY 2 Expand homelessness prevention and housing programs to meet the need

While Strategy 1 aims to strengthen the social safety net and address systemic causes of homelessness, Strategy 2 aims to build the community's capacity to meet urgent needs for housing and support. This effort involves significant investment in expansion of the supportive housing system, as well as programs tailored to the needs of specific populations experiencing homelessness, including youth/young adults, older adults and seniors, families with children, and adults without children. It involves expansion of a range of supports to prevent homelessness, including both financial resources and supportive services. This work relies on an efficient, effective, state-of-the-art supportive housing system that centers the voices of people with lived experience of homelessness, invests in a qualified workforce, and addresses and eliminates biases in hiring and provision of services.

STRATEGY 3 Improve quality of life for unsheltered individuals and create healthy neighborhoods for all

In addition to preventing homelessness for as many people as possible, the community must address the immediate needs of people who remain unsheltered due to the extreme housing crisis and increasing income inequality. To meet these needs, Strategy 3 focuses on greatly expanding the availability of temporary housing and shelter and the variety of temporary housing options throughout the county, increasing street outreach and services for unsheltered residents, and increasing accessibility of mental health and substance use services.

Our Targets

By 2025, we will

Achieve a **30% reduction** in annual inflow of people becoming homeless

House **20,000 people** through the supportive housing system

Expand the Homelessness Prevention System and other early interventions to serve **2,500 people per year**

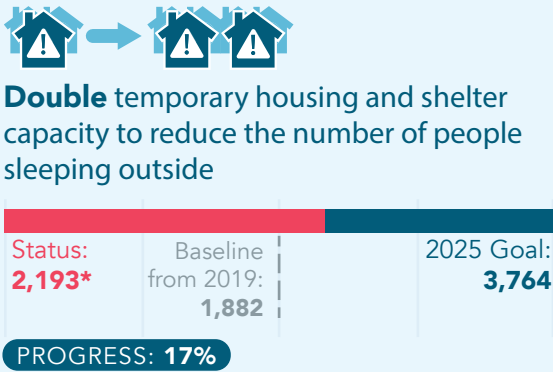

Double temporary housing and shelter capacity to reduce the number of people sleeping outside

Address the **racial inequities present** among unsheltered people and families and track progress toward reducing disparities

In addition to laying out a roadmap of strategies to prevent and end homelessness, the Community Plan set aggressive targets to achieve by 2025. Here is our progress to-date against these bold goals:

* Capacity figure reflects temporary reductions in some shelters instituted to prevent the spread of COVID-19.

City Efforts Across the County

Cities are vital partners in a cohesive county-wide effort to end homelessness. Cities were critical stakeholders in the formation of the Community Plan, including many with representation on the Community Plan steering committee. All cities of Santa Clara County were invited to endorse the Community Plan after its development in 2020 and to play a role in its implementation. So far, 11 of 15 cities in the county have adopted resolutions endorsing the Community Plan: Campbell, Cupertino, Gilroy, Los Gatos, Milpitas, Morgan Hill, Mountain View, Palo Alto, San José, Santa Clara, and Sunnyvale. These vital partners have been working toward local goals that align with the strategies outlined in the county-wide plan and have made tremendous progress through innovative programs and partnerships.

Highlight: Morgan Hill

Morgan Hill has received a capacity-building grant from Destination: Home to support the City's work related to the 2020-2025 Community Plan to End Homelessness. The three-year partnership has enabled Morgan Hill to hire a dedicated liaison on homelessness issues (with a particular focus on Strategy 3: Improving quality of life for unsheltered individuals and creating healthy neighborhoods for all) and supported the City in the development and launch of a local implementation plan with specific targets and outcomes for each of the Community Plan strategies. Morgan Hill has worked with the County Office of Supportive Housing to develop a local Housing Development Plan to identify opportunities for affordable housing, including new developments:

- The Magnolias – A 100% affordable housing project with 66 units in a variety of unit sizes reserved for low-income individuals and families, people in need of rapid rehousing, and veterans, including veterans in need of supportive services.
- Royal Oak Village – 73 affordable apartments in progress, comprised of six one-bedrooms, 37 two bedrooms, and 29 three-bedrooms, with units set aside for rapid rehousing participants, and a resident manager unit. 30 units will be set aside for extremely low-income agricultural worker households, and 24 units will accommodate individuals and families earning up to 50% of area median income.

Highlight: Mountain View

Mountain View has embarked on several efforts to reduce homelessness in line with the Community Plan. Mountain View is one year into a three-year capacity-building grant from Destination: Home to support their ability to develop deeply affordable housing and spearhead initiatives such that will help end and prevent homelessness. New developments in progress with multiple sources of funding include:

- La Avenida Apartments - 100 apartments, including 30 homes reserved for individuals experiencing homelessness with on-site support services
- Crestview Hotel - a hotel conversion creating up to 67 affordable apartments, including approximately 45 supportive housing units
- LifeMoves Mountain View – an interim housing community serving single adults and families. Built on private property, the community is funded through state Homekey funds and further supported by public and private funders. The community has 100 single and family units, a communal kitchen, playground, and meeting rooms for case management and other services.

Mountain View also prepared to pilot a groundbreaking guaranteed basic income initiative. Basic income initiatives provide unconditional, guaranteed income to help households to cover basic costs of living. Pilot initiatives test the idea that guaranteed basic income may help to raise households out of poverty by alleviating financial stress and help households to avoid extreme consequences of unplanned expenses – expenses that can mean loss of housing for low-income households. The County has its own Transition-Age Youth (TAY) Basic Income Pilot underway for former foster youth. These pilots provide useful information the effectiveness of this strategy, information that could guide decisions on how these programs could be used in the future.

The Elevate MV basic income pilot will help approximately 166 extremely low-income households bridge the gap of monthly income needed to maintain stable housing. Rising rents put our lowest-income neighbors at increased risk of homelessness. With a huge and growing gap between wages and rents, low-income families face dire housing insecurity. The program will give direct cash payments of \$500 per month for one year to 166 randomly selected eligible Mountain View residents that will elevate their basic income to provide more financial security. Program eligibility requirements include being a Mountain View resident with one or more children under the age 18 and earning at or below 30% of area mean income, which equates to an annual income of \$44,750 in 2021 for a family of three.

Highlight: Cupertino

From 2017 to 2021, the City of Cupertino has seen a significant reduction in individuals newly experiencing homelessness, indicating that fewer single adult Cupertino residents are becoming newly unhoused year over year. This decreasing trend parallels the trend in the county as a whole, which has surpassed the Community Plan goal of a 30% reduction in annual inflow of people becoming unhoused. Cupertino has developed a new affordable housing development, The Veranda (19 units for senior citizens), through the 2016 Measure A Affordable Housing Bond.

Cupertino has also set out to develop their own city-wide strategic plan in alignment with the County's Community Plan, launched in September 2021 and currently in draft stages. Planning has involved a robust community engagement process to gather input and feedback and build consensus around common goals and strategies. Input on needs and priorities were gathered from housing and service providers, representatives from health care and education, advocacy groups, the business community, housing developers, City and County staff, people with lived experience of homelessness, and the public at large. Based on this input and local data analysis, Cupertino has identified gaps in the resources available and services needed to meet the needs of people experiencing homelessness in Cupertino and strategies and goals to address those needs and support the objectives of the Community Plan.

Highlight: City of Santa Clara

The City of Santa Clara, having endorsed the Community Plan, has launched a Homelessness Task Force consisting of stakeholders with a range of perspectives and experience. This group includes eight members representing a diverse set of backgrounds, including members who have experienced housing instability and/or homelessness, representatives from each City Council district, and representatives from local agencies. The Task Force is helping to identify priorities and provide recommendations related to the development of the City Plan to End Homelessness. The task force is meeting virtually once per month for the duration of the planning process, guiding the process from stakeholder engagement and analysis to the development of recommendations and plan drafting. The resulting City Plan will be focused on city strengths within the regional effort.

Photo © John Sutton (2022)

The City of Santa Clara is also developing new affordable housing through the Housing Bond. New developments include:

- Calabazas / Corvin Apartments – 145 apartment units completed, 80 of which are Permanent Supportive Housing to help individuals and families with high service needs, and the remainder are available to households earning up to 50% of area median income, with units set aside for resident managers.
- Agrihood Senior Apartments – 165 affordable units in progress, which will consist of 70 studios, 83 one-bedrooms, 10 two-bedrooms, as well as two resident manager units. A portion of the units will be leased to qualifying senior veterans and 54 of the units will be set aside as Permanent Supportive Housing for households experiencing homelessness.
- Kifer Senior Apartments – 79 affordable apartments to be developed, of which 45 will be reserved as Permanent Supportive Housing (including resident manager units), 17 will be available to households earning up to 30% of area median income, and 17 will be available to households earning up to 50% of area median income.

Community Plan: Building Momentum

Advocacy for Housing Ready Communities

Destination: Home is leading the charge to develop a climate in which policies are in place to facilitate affordable housing development and other proven solutions to prevent and end homelessness. This community-driven movement has gained the support of thousands of community members, working together to advocate for practical solutions to the housing shortage and rising costs of housing. Their voices are being heard and are driving public policy toward greater investments in housing for Extremely Low-Income households, stronger eviction protections, and greater representation in decision-making bodies by people with lived experience of homelessness.

Improving Partnerships Across the System

The community continues to make crucial investments to develop and strengthen coordination and collaboration with partners across the supportive housing system, to address pressing housing and service needs and create a stronger safety net for our residents. Future initiatives will strengthen coordination and collaboration with health care and criminal legal system partners, streamline emergency response efforts, and address basic needs to improve overall wellness of people who are unhoused.

Leadership by People with Lived Experience

People with lived experience of homelessness play a vital role in guiding progress toward ending homelessness in Santa Clara County, and this role will continue to expand in coming years. As discussed elsewhere in this report, the LEAB and YAB advise the County on a range of issues and lead important initiatives to strengthen the homeless system of care. Expansion of these initiatives drives impact across all Community Plan goals.

Conclusion

As this report concludes, we reflect on 2021 and the ways in which our community united to address homelessness. We increased capacity, opened new housing opportunities throughout the region, and adapted our systems, building on innovations necessitated by the pandemic.

As we continue to implement the 2020-2025 Community Plan to End Homelessness, we must maintain our commitment to bold action to prevent and end homelessness in our community. Our systems must work to truly understand, include, and center people experiencing homelessness in our solutions. We must take steps to remedy past harms, address inequities, and prevent people from losing their homes in the future.

No one can solve a housing crisis alone. Only through the collaborative effort of the entire community – people with lived expertise, neighbors, housing providers, service providers, property owners and managers, grant makers, elected officials, and both private and public sector partners – will we move forward to end homelessness in Santa Clara County. It will require new and innovative strategies, partnerships, and tremendous effort, and we hope you will join us.

“

The overall goal is that no one has to go through anything close to the same experiences we have. If we don't change the system today or tomorrow but push our way closer and closer to make it better for just one person, then we're making a difference.

– Jocelyn Arenas, YAB Member.

ENDING HOMELESSNESS

2019-2020

The State of the
Supportive Housing System
in Santa Clara County

Acknowledgements

This report was compiled by Homebase, the Center for Common Concerns, on behalf of the County of Santa Clara Office of Supportive Housing.

Special thanks to Destination: Home for their review and contributions to the report, to the Supportive Housing System clients who shared their stories, and to the many community partners whose tireless work to end homelessness in our community is highlighted in this report.

Letter from the County Executive

Challenging times call for gratitude and reflection. It is in this spirit that we are pleased to release our third report on the State of the Supportive Housing System, which highlights Santa Clara County's advancements towards our goal of ending homelessness.

This report begins with the progress that the County and our many partners have made since releasing our 2015 Community Plan to End Homelessness, starting with an acknowledgement of the role that the Housing First philosophy has played in our system's growth. Through our commitment to Housing First, and our collaborations with our city, nonprofit, business, and philanthropic partners, we have built new affordable housing, created a robust homelessness prevention system, improved access to behavioral health services, moved toward greater system equity and inclusiveness, and raised the voices of people with lived experience in critical decision-making processes. These are just some of the accomplishments you will read about in these pages.

This report also shines a light on our community's heroic efforts to help prevent the spread of the Coronavirus (COVID-19) amongst our most vulnerable community members, including those experiencing homelessness. We owe a debt of gratitude to our providers and community partners for responding quickly and effectively to raise and distribute emergency funds for homelessness prevention; for delivering meals, supplies and hygiene services to encampments; for providing safe shelter to people at risk of COVID-19 complications; and for creating new interim and permanent housing developments.

We face an uncertain future, as the COVID-19 crisis has only amplified the longstanding systemic causes of homelessness that continue pushing more of our neighbors into homelessness, including our region's income inequalities and severe lack of affordable housing. For this reason, strengthening the supportive housing system is more important than ever. We are fortunate to have developed the 2020-2025 Community Plan to End Homelessness with these challenges in mind. In our first year of implementation, we rose to the occasion by permanently housing over 2,700 people and expanding the homelessness prevention system's capacity by 50%.

In the coming years, we will continue to use this Plan as a roadmap to help guide us in the monumental task of making homelessness a thing of the past. As daunting as this task may seem right now, we are hopeful that the same determination that carried us through the past six years will lead to positive change as we move forward into the future.

Sincerely,

Jeffrey V. Smith, M.D., J.D.
County Executive Officer
County of Santa Clara

Miguel Marquez, M.P.P., J.D.

Introduction

Santa Clara County is the heart of Silicon Valley, and a hub of wealth, progress, and invention. However, with these economic gains have come societal and humanitarian costs. While some residents have prospered, others have been left behind. Income disparities and sharp rises in housing costs have caused thousands of Santa Clara County residents to become homeless each year, forcing them to double up with friends and relatives or to sleep in shelters, on streets, in vehicles, and other places where people are not meant to live. Recently, we have seen that the COVID-19 pandemic has only increased these disparities, with low-income neighborhoods and people of color bearing the brunt of the crisis.

Santa Clara County Homeless Census & Survey¹

While our region’s housing affordability gap remains a major concern, the community is making progress. Every day, the County and its many partners are working hard to end homelessness and provide safe and affordable housing for our most vulnerable residents. This report shines a light on some of that work, including how the community committed to taking a “Housing First” approach to ending homelessness.

This report also provides a retrospective on the County of Santa Clara Office of Supportive Housing’s efforts to address homelessness through its implementation of the 2015-2020 Community Plan to End Homelessness, as well as an overview of the progress the supportive housing system made in 2019 and 2020. Lastly, this report will take a look into the future with highlights from the recently adopted 2020-2025 Community Plan to End Homelessness, focusing on the community’s ambitious goals, and the strategies we are using to achieve them.

2020 Housing Costs in Santa Clara County

¹ The County did not carry out an unsheltered homeless census and survey in 2021 due to COVID-19 health and safety risks and statewide public health orders to shelter in place.

³ Source: <https://www.sanjoseca.gov/home/showpublisheddocument?id=61061> (affordable rent calculated based on 30% of annual income).

Where We've Been: Celebrating Success

In 2014, the County of Santa Clara and Destination: Home brought together community stakeholders to develop a coordinated strategy to address homelessness across the county. The resulting 2015-2020 Community Plan to End Homelessness and the coordinated community effort to implement it led to many system successes, including more than 8,800 households being housed.

Additional highlights since implementation of the first community-wide plan include:

County of Santa Clara Office of Supportive Housing Created

- The Office of Supportive Housing (OSH) was created to expand the County's leadership role in the effort to end homelessness. Until 2011, the County had one position dedicated to addressing "housing and homeless concerns," located within the Mental Health Department and an Office of Affordable Housing located in the planning department.
- OSH developed through the merging of these efforts and is now responsible for operating and spearheading the now-coordinated county-wide systems that help prevent and end homelessness.
- Since its creation, OSH has grown from having 20 employees to having a staff of 121. OSH also more than doubled its resources since FY 2016, with a current operating budget of \$87.6 million.

Coordinated Assessment System Established

OSH established the Coordinated Assessment System to provide a more streamlined, centralized system for matching the community's most vulnerable households to the right housing resources.⁴

2016 Measure A Affordable Housing Bond Passed

2016 Measure A provides \$950 million in funding to create 120 new affordable housing developments over 10 years, including:

 **4,800 units of affordable housing for households with extremely low and very low incomes**

2016 Measure A also helps create rental and home ownership opportunities for households with moderate incomes.

For more information on 2016 Measure A, see page 17.

2015

2015-2020 Community Plan to End Homelessness Released

The Community Plan to End Homelessness in Santa Clara County, developed through a series of community summits in 2014, outlined a coordinated strategy to address homelessness using a "Housing First" approach.

Key goals from the Plan included creating 6,000 new affordable housing opportunities and developing systems to target client-centered solutions to homelessness.

2016

All The Way Home Campaign Launched

In 2015, San José Mayor Sam Liccardo and Santa Clara County Supervisor Dave Cortese launched the "All The Way Home" campaign seeking to end veteran homelessness across the county by providing rental assistance, supportive services, and incentives for landlords to house homeless veterans.

As of December 31, 2020, 2,000 veterans have been housed since the beginning of the campaign.

⁴ For more information, please visit <https://www.sccgov.org/sites/osh/ContinuumofCare/coordinated-assessment/Pages/home.aspx>

Homelessness Prevention System Pilot Began

Initially started as a pilot in 2017, the Homelessness Prevention System brings together a network of community partners to provide flexible financial assistance and resources for households at risk of losing their housing, including streamlined access to eviction defense legal services offered by the Silicon Valley Law Foundation.

Lived Experience Advisory Board Created

Together with Destination: Home, OSH supported the formation of the Lived Experience Advisory Board, a 17-member body comprised of currently and formerly homeless individuals with diverse life experiences.

The Board provides input on new countywide policies, makes recommendations for grant spending, and provides leadership development opportunities for members.

Cisco Announced \$50 Million Supportive Housing and Innovation Fund

In March 2018, Cisco announced that they would provide \$50 million in funding over five years to support Destination: Home's work toward ending homelessness. Funding has gone toward building supportive housing, conducting research, starting pilot programs utilizing emerging best practices, and pioneering technological solutions.

2017

2018

Destination: Work Program Launched

Destination: Work is a joint initiative by Destination: Home, the County of Santa Clara OSH, and the City of San José that provides opportunities for living-wage employment for individuals and families experiencing homelessness.

Destination: Work helps clients increase their incomes and obtain long-term career opportunities.

The initiative is designed to connect clients to programs offering job training, professional certifications, and paid work experience in high-growth industries.

LGBTQ-Focused Shelter Opened

In 2018, OSH, the Office of LGBTQ Affairs, and the City of San José came together to create the county's first temporary housing program dedicated to serving LGBTQ-identified residents, a population that is significantly overrepresented in the county's homeless population.

City of San José Awarded Nearly \$100 Million in Affordable Housing Funding

In 2019, the City of San José awarded nearly \$100 million to 11 developments to create 1,144 units of new affordable housing to low-income groups including people experiencing homelessness.

Apple Pledged \$2.5 Billion to Address California's Housing Crisis

In November 2019, Apple committed \$2.5 billion to addressing housing affordability issues in California, including \$50 million to support Destination: Home's work increasing supportive housing units and implementing homelessness prevention strategies.

Villas on the Park Completed

In October 2019, construction was completed on Villas on the Park, a brand new 83-unit Permanent Supportive Housing project in San José, funded by the City of San José, Housing Trust Silicon Valley, and 2016 Measure A. For more information on the Villas, see page 9.

2020-2025 Community Plan to End Homelessness Released

- The second Community Plan to End Homelessness in Santa Clara County was released in August 2020. The Plan is based on the input of over 8,000 community members, including people with lived experience of homelessness, service providers, and advocates.
- The plan focuses on three strategies to end homelessness: addressing root causes of homelessness through system and policy change, expanding homelessness prevention and housing programs, and improving quality of life for unsheltered populations and creating healthy neighborhoods for all. For more information on the Community Plan to End Homelessness, see page 18.

Monterey Gateway Apartments Opened

- In May 2020, Monterey Gateway Apartments opened as the first 2016 Measure A-funded project in Gilroy. The 75-unit project provides affordable housing for seniors. Half of the apartments are dedicated supportive housing units for seniors who have experienced homelessness.
- For more information on Monterey Gateway Apartments, see page 13.

2019

2020

2021

Second Street Studios Opened

In May 2019, Second Street Studios became home to **134 new tenants** who had experienced long periods of homelessness.

Second Street Studios was the first project in the county to be 100% dedicated to providing supportive housing. Its radically collaborative approach, bringing together developers, property managers, and service providers, offers a model of coordinated support for the community's most vulnerable members.

City of San José Establishes First Emergency Interim Housing Program

- In Fall 2020, the City of San José and Habitat for Humanity created four semi-permanent modular housing developments in response to the need for socially-distanced shelter during the COVID-19 pandemic.
- These developments increased the system's capacity by over 400 beds which were prioritized for medically vulnerable people and those at high risk of developing COVID-19 complications.

Supportive Housing Highlight:

Villas on the Park

Ericka recalls, quite literally, soaking it all in during her first night in her new home. After the door closed behind her and she got settled in her new studio apartment, she took a relaxing, warm bath. As she sat there in comfort, she could not help but be overcome with emotion.

“It felt so good to be in my own place. Every day I am grateful to have a home,” Ericka says. This moment of Zen was the culmination of her journey to Villas on the Park, a new permanent supportive housing development in San José. For more than two years, Ericka was homeless after escaping a toxic relationship. She slept in her car, often in a library parking lot, and showered and did laundry when mobile services were accessible.

A chance encounter with an outreach worker led to her connecting to the County of Santa Clara’s Coordinated Assessment System, which matched her with a supportive housing unit at the Villas in November 2019.

Ericka says life improved dramatically after she moved into the Villas. Beyond the comfort of having a roof over her head, Ericka says the community spirit and social services support at the Villas has been transformative for her and others. Many residents were mere strangers to one another at first, but The Villas has fostered community through classes in nutrition, cooking, gardening, general life skills, walking groups, and more. Some classes are on-site and others are offered through partnerships with non-profits and faith-based organizations.

Ericka has noticed that the community has grown even stronger during the COVID-19 pandemic. Although residents needed to socially distance themselves from one another during shelter-in-place orders, many events were moved online. Some assistance was also made contactless, such as grocery deliveries, she says. “It has triggered a lot of memories about isolation,” Ericka says about the pandemic, but she has strong praise for staff for keeping the fun community vibe going during a stressful period. “This place is just awesome. I value every single day that I’m here.”

COVID-19 in our County: Responding to the Crisis within the Crisis

Ending and preventing homelessness became more urgent than ever with the arrival of the new Coronavirus (COVID-19) in our community. People without stable housing are often unable to self-isolate or access basic sanitation services to help avoid infection. Further, these realities have exposed deep gaps in our social safety net systems, demanding that the County respond rapidly to prevent disproportionate impacts on low-income residents.

Since the first COVID-19 cases in Santa Clara County emerged in early 2020, the County and its many nonprofit and business sector partners leveraged existing relationships and mobilized a massive crisis response system to lessen these impacts. In a matter of days, providers including the Valley Homeless Healthcare Program (VHHP) and Gardner Health Services, assessed and relocated the most vulnerable people experiencing homelessness into hotels and new emergency shelters to prevent the virus' spread.

Among these new shelters were four modular, semi-permanent developments built by the City of San José and Habitat for Humanity. These developments provided the system with 400 additional units of emergency interim housing for medically fragile people in need of living space to isolate and social distance.

As of February 2021, the County and its partners had placed over 4,600 households in shelter, including people at risk of COVID-19 complications, people with positive COVID-19 tests, and those exposed to the virus. A new hotline made it possible to rapidly screen and place people in shelter according to need. The City of San José, members of the Lived Experience Advisory Board, nonprofit partners, and volunteer groups also rapidly ramped up street outreach efforts, created new networks to distribute food and supplies, offered access to free COVID-19 testing, distributed masks, and created mobile showers, hand-washing stations, and laundry facilities for unsheltered households.

Homekey: More than \$60 million in State Funding Awarded for Housing in Santa Clara County

In 2020, as part of the state's efforts to respond to COVID-19 and protect people experiencing homelessness who are at high risk for serious illness, the California Department of Housing and Community Development launched the Homekey program. Homekey provides funding to cities, counties, and other public entities to purchase and rehabilitate existing hotels, motels, and vacant apartment buildings to convert into interim or permanent housing for people at risk of or experiencing homelessness.

In total, the state awarded \$600 million in funding with more than \$60 million awarded for the following projects located in Santa Clara County:

- The City of Mountain View and LifeMoves were awarded \$11.95 million to acquire a 100 unit building to be used for emergency shelter.
- The City of San José was awarded \$14.5 million to acquire a 76 unit building to be used for permanent supportive housing.
- The County of Santa Clara and Jamboree Housing Corporation were awarded \$29.2 million to acquire a 146 unit building in Milpitas to be used for permanent supportive housing.
- The County of Santa Clara and Allied Housing were awarded \$8.9 million to acquire a 54 unit building in San Jose to be used for permanent supportive housing.

In addition to funding awarded by the state, projects may include philanthropic or local government support for additional capital expenses and for operating expenses.

The beating heart of these operations was the County's Joint Department Operations Center (JDOC), where staff from different County agencies worked closely with city delegates and nonprofit collaborators including Abode Services, LifeMoves, and HomeFirst to make sure the supportive housing system continued to function in spite of the pandemic.

One way in which the system has continued to improve during this challenging time is through establishing new permanent housing programs for people at higher risk of COVID-19 complications. The County received more than \$24 million in federal CARES Act funding, \$10 million of which is being used to create a program to rapidly rehouse this population. The state also provided more than \$60 million in funding for four projects located in the county to acquire and convert hotels and motels into permanent and interim housing through the Homekey program.

The homelessness prevention system has also expanded in response to the pandemic. With the help of Sacred Heart Community Service and over 70 different non-profit and community partners, Destination: Home has raised tens-of-millions of dollars in public and private funding to support low-income community members who are at risk of becoming homeless due to economic impacts of the pandemic. From March to December 2020, this collaborative effort had deployed approximately \$31 million in assistance to more than 14,000 households.

The lesson of COVID-19 is that, in spite of all obstacles, Santa Clara County comes together when called upon to respond to a new challenge. We innovate, build new partnerships, and break new ground. These strengths will continue to benefit our community long after the pandemic is over. It is with this sense of optimism and collaborative spirit that our community moves forward to the next challenge, which is returning to address the pre-existing crisis of homelessness in our county.

"The support we received relieved a lot of my stress and anxiety, and it made me realize that I am not alone. I am proud to be a part of a community that takes care of one another."

- Rosa, a recipient of COVID-19 financial assistance who fell behind on rent after being furloughed without pay from her position as a janitor.

Homelessness Prevention Partner Highlight:

Carry the Vision

One positive side effect of the pandemic has been the way in which new community relationships have formed. One such example is the connections that Gilroy nonprofit Carry the Vision has made with community members while distributing COVID-19 financial assistance directly to families in need. Many of the families who received assistance from Carry the Vision are Spanish-speaking and wary of receiving help from the government or nonprofit organizations.

To ensure that financial assistance was reaching households in need, Carry the Vision hired several local community liaisons to engage in outreach and encourage people to ask for help. What did this look like? Bringing food to people's doorsteps when they tested positive for COVID-19. Listening to young mothers who had just lost their jobs. Being patient and reliable when no one else was.

"A lot of people are scared and don't speak English," says Lilia Gopar, one of the community liaisons. "They are afraid that they will have to pay funds back. Knowing that we've come from similar hardships and backgrounds builds trust."

"People were choosing not to eat so that they could pay their rent," adds community liaison Rosa Arrazola. "There is so much need right now."

So far Carry the Vision has helped prevent homelessness for about 100 families during the pandemic. Now, having connected through the COVID-19 financial assistance program, many clients keep in touch with Lilia and Rosa. Some have even returned to Carry the Vision for connections to their other services, such as reentry support programs, life skills courses, and supports for parents.

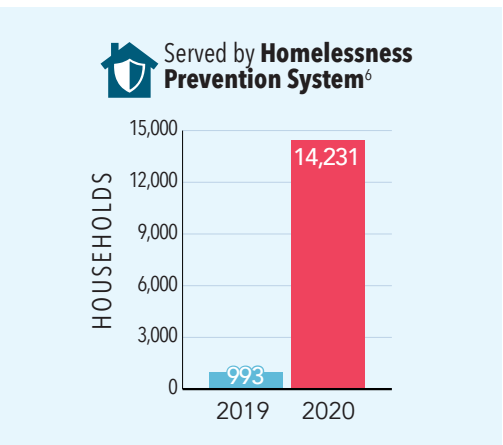

Some have also reached out for help with sensitive issues such as escaping domestic violence. In this way, COVID-19 financial assistance and the dedication of the community liaisons provided a much needed bridge to help that might not have existed otherwise.

"I expect that these relationships will last beyond the pandemic," says Rosa. "We provide a space to let people express themselves. It's important for them."

The feeling is mutual, agrees Lilia: "It's the best job I have ever had."

2020: A Year Like No Other

The supportive housing system didn't slow down in 2020, continuing to respond to the pre-existing systemic causes of homelessness as well as new needs arising from the COVID-19 pandemic.

⁵ This metric shows the total number of people assessed by the Vulnerability Index – Service Prioritization Decision Assistance Tool for the first time. This number likely decreased from 2019 to 2020 because of barriers to people being assessed during the COVID-19 pandemic.

⁶ This increase between 2019-2020 reflects the prevention system's influx of funding for people in need of COVID-19 related financial assistance.

⁷ This increase reflects the temporary increase in the emergency shelter capacity in response to the COVID-19 pandemic.

Supportive Housing Highlight:

Monterey Gateway Apartments

Steve may be a self-described “wandering soul,” but he found a place to call home at the Monterey Gateway Apartments, a 75-unit affordable housing project for seniors that opened in Gilroy in May 2020. Funded in part through 2016 Measure A, the Gateway Apartments offer onsite supportive services through the County, as well as opportunities to connect with other residents, a community computer room, and a pool.

Before settling into one of the project’s supportive housing units, Steve struggled to find his footing after being released from prison and reentering a world he didn’t recognize – a world where everyone had a computer in their phone and millionaires populated the valley he once called home with his mother and siblings.

managers at the Monterey Gateway Apartments, Steve is beginning to readjust to life on the outside. “If it wasn’t for them, I would be lost,” Steve says of his team at the Monterey Gateway. They help him navigate his new life by doing things like teaching him how to pay bills online, ensuring he gets the medical treatment he needs, and providing moral support and companionship on a day-to-day basis.

Steve’s new home has also provided much needed space and stability for him to begin to deal with the trauma of his incarceration. He says he’s “calmed down a lot” now that he doesn’t have

to worry every day about meeting his needs for shelter, food, and medical care. It also means the world to him that he can lock his own door. That may not seem like much, but to Steve that’s the difference between fear and true freedom.

After 20 years in prison, Steve was released at age 64. Barely able to walk and unable to find a place to live, Steve went to rehab and stayed in various shelters, all the while striving to “be the good guy again.”

Now, with the help and guidance of his case

“Lincoln said that the strength of the nation is within the strength of the household. If you don’t have a home, what’s your foundation? You can find peace within a busy, chaotic world if you have a home you can return to.”

- Samuel F., a veteran who experienced homelessness

Housing First Success Story: Project Welcome Home

Provide housing as a first step to helping people experiencing homelessness. Offer that housing without preconditions or barriers. House people quickly, and offer tailored, voluntary services to support them. Once you provide a safe and stable home, then recovery, treatment, and economic security can follow. This is “Housing First.” And it works.

Project Welcome Home, an innovative supportive housing program created through a partnership between the County, private funders,⁸ and nonprofit housing provider Abode Services, demonstrates that Housing First can end homelessness for even the most vulnerable county residents – those who have experienced long-term homelessness and rely heavily upon emergency medical and psychiatric services to treat chronic health conditions.

Between 2015 and 2019, independent evaluators from the University of California San Francisco (UCSF) assessed Project Welcome Home’s Housing First supportive housing program, which provides clients with long-term rental subsidies and intensive voluntary case management and clinical treatment. Project Welcome Home clients are the highest utilizers of crisis medical services with experience of long-term homelessness, as identified through data matching between the County’s medical and behavioral health records and Homeless Management Information System.

⁸ Project Welcome Home is the first permanent supportive housing program to use a Pay for Success model, directly connecting program funding to results.

86% of chronically homeless individuals housed by Project Welcome Home were **successfully housed** for an average of **2.5 years** without any gaps

Project Welcome Home’s clients

required **fewer psychiatric emergency services**

and spent **fewer days in emergency shelter**

In assessing the effectiveness of the program, researchers looked at improvements in resident health, resident's use of social services, successful housing placements, and the economic benefit to the County. The study concluded that Project Welcome Home successfully placed and retained a high proportion of individuals experiencing chronic homelessness in housing, reaffirming that Housing First works.

The UCSF study found that 86%⁹ of the chronically homeless individuals who were housed by Project Welcome Home's supportive housing program¹⁰ were successfully housed for an average of 2.5 years¹¹ without any gaps.¹² In addition, Project Welcome Home's permanent supportive housing clients required fewer psychiatric emergency services and spent fewer days in emergency shelter.¹³

Project Welcome Home's success reflects the county's broader success with Housing First. As of December 31, 2020, the supportive housing system has permanently housed nearly 10,983 households since 2015 taking a Housing First approach. In 2020 alone, 77.2% of rapid rehousing participants obtained permanent housing, and the retention rate for households in permanent supportive housing was at 96.8%.

In the coming years, our community will continue to evolve and employ proven strategies such as Housing First in order to meet the needs of people experiencing homelessness. We know that Housing First will be a central strategy for ending homelessness in Santa Clara County, and remain steadfast in our dedication to Housing First's tenets: that housing is a fundamental human right, and that everyone is "housing ready."

"Even for people who we think have the greatest challenges, the needs are simple: safe, affordable housing and appropriate services. We believe housing is foundational to recovery; if stable, safe, decent housing is provided, people can overcome the harshest of circumstances and experiences."

*– Ky Le, Deputy County Executive,
County of Santa Clara*

"Don't tell me you can't house people, and don't tell me people with mental health disabilities or substance use disabilities can't be housed. You can and you must."

– Dr. Margot Kushel, Director of the UCSF Center for Vulnerable Populations.

The supportive housing system **has permanently housed nearly 10,983** households since 2015

In 2020, **77.2%** of rapid rehousing participants **obtained permanent housing**

The **retention rate** for households in permanent supportive housing was at **96.8%**

⁹ 86% of participants who received permanent supportive housing through Project Welcome Home were housed during the study period, compared to 36% in the control group who were not enrolled with Project Welcome Home.

¹⁰ Participants who did not receive housing through Project Welcome and were instead assigned to the control group were still eligible for supportive housing provided through other County-funded programs.

¹¹ The project's target impact was for more than 80% of participants to achieve 12 months of continuous stable tenancy.

Opening Doors to Health and Home: Behavioral Health Services and Supportive Housing

Access to housing and behavioral healthcare, including mental health and substance use treatment, are inextricably linked. It is extremely difficult to treat behavioral health conditions for people without stable homes, and unhoused and newly housed individuals benefit greatly from the stabilizing support that behavioral healthcare provides.

Recognizing this link, the County of Santa Clara’s Behavioral Health Services Department (BHSD) and OSH work hand in hand to serve currently and formerly unhoused individuals holistically: OSH connects people experiencing homelessness to subsidized housing and provides support to keep them there, while BHSD’s services are there to help supportive housing residents overcome substance use and mental health issues that may have contributed to housing instability in the past.

Thanks to the recent growth of both systems and the County’s ability to leverage diverse funding streams – including federal Medi-Cal dollars, U.S. Department of Housing and Urban Development funding, California state funding, and local tax revenues – OSH and BHSD have been able to offer expanded services to their shared clients.

These programs include the newly created Homeless Engagement and Access Team (HEAT), which is funded by the Mental Health Services Act. The HEAT is staffed by outreach specialists and clinicians who can treat unsheltered, uninsured people, engaging people where they are to build trust as a bridge to housing and long-term services. The program has been immensely successful thus far.

In FY19-20 the HEAT team

Outreached to **1,595 people**

Assessed **482 unsheltered individuals**

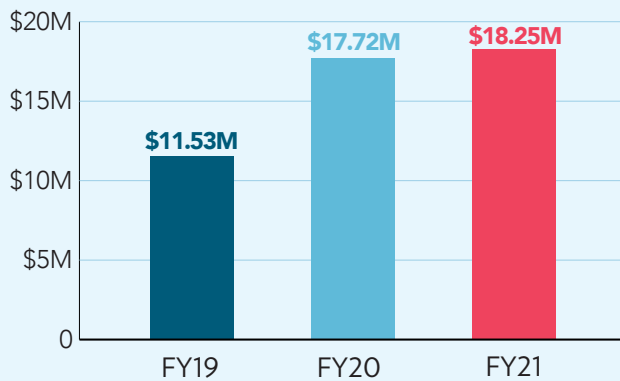

Made **117 referrals for clinical behavioral health services**

24% of people moved into permanent supportive housing

BHSD Total Funding: 2019-2021

In 2019-20, the County also expanded existing mental health services, such as the Mobile Crisis Services Team, which trains and supports police departments in effectively interacting with community members who may be in crisis and experiencing unsheltered homelessness.

These resources have also made it possible for more supportive housing residents to receive mental health treatment directly from the Supportive Housing Division of BHSD rather than having to seek assistance from outside providers who may not specialize in working with people who have experienced homelessness. An example of this is the Hope Clinic, a collaborative effort of the County and the Santa Clara Valley Medical Center - which opened in 2019 and provides tailored, comprehensive primary and behavioral health care designed to stabilize supportive housing residents. Efforts such as these have led to better coordination between housing providers and treating clinicians, resulting in seamless wraparound care for the people who need it most.¹⁴

¹⁴ In FY20, 81% of permanent supportive housing participants who were receiving mental health services received their treatment through the Supportive Housing Division of BHSD, up from 36% in 2018.

2016 Measure A Affordable Housing Bond Progress

A key driver of homelessness in Santa Clara County is the severe shortage of housing that is affordable for low-income households. Addressing this gap has been a crucial strategy in the County's efforts to prevent and end homelessness. In November 2016, voters approved a \$950 million Affordable Housing Bond to fund 4,800 units of affordable housing for households with extremely low and very low incomes. 2016 Measure A also helps create rental and home ownership opportunities for households with moderate incomes.

Since 2016 Measure A passed, local cities, affordable housing developers, service providers, and the County of Santa Clara have made significant progress towards our ten-year goals. As of December 2020:

3,032 New Apartments Funded

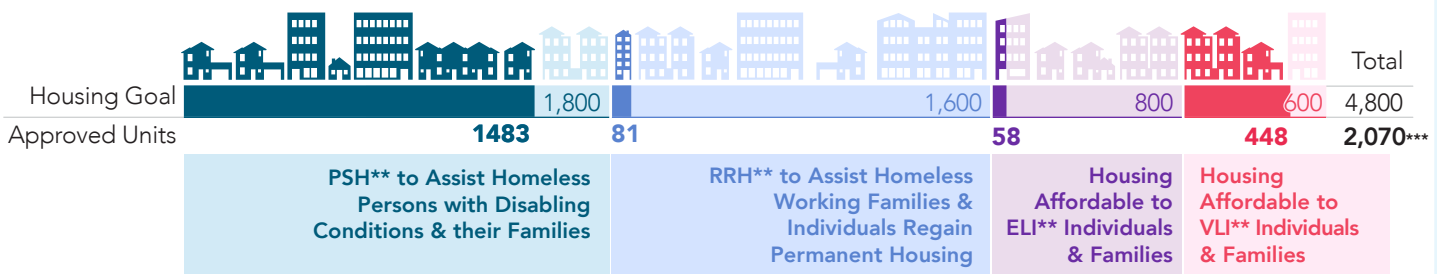

28 Housing Developments Funded

\$377,134,646 in Multi-Family Housing Developments Approved

2016 Measure A Production Goals & Progress

**PSH (Permanent Supportive Housing), RRH (Rapid Rehousing), ELI (Extremely Low Income), VLI (Very Low Income)

***440 additional units of affordable housing and apartments for building managers brings the total to 3,032 apartments approved in the last three years.

For more information about 2016 Measure A, visit:

<https://www.sccgov.org/sites/osh/HousingandCommunityDevelopment/AffordableHousingBond/Pages/home.aspx>

Where We're Going: The 2020-2025 Community Plan to End Homelessness and Progress to Date

Despite progress in creating a supportive housing system that moves thousands of homeless individuals and families into housing each year, the crisis continues to grow. The systemic factors driving homelessness are stronger than ever and are forcing more community members onto the streets and into shelters every day.

In 2019, as the 5-year period covered by the first community plan came to an end, a broad range of community partners came together to build on this progress and develop a roadmap for future work to end homelessness in 2020 and beyond. This roadmap centers on three strategies:

STRATEGY 1	STRATEGY 2	STRATEGY 3
 <p data-bbox="196 1056 521 1192">Address the root causes of homelessness through system and policy change</p>	 <p data-bbox="659 1056 971 1192">Expand homelessness prevention and housing programs to meet the need</p>	 <p data-bbox="1114 1024 1403 1192">Improve quality of life for unsheltered individuals and create healthy neighborhoods for all</p>

To truly end homelessness in Santa Clara County, collective will and resources must be summoned to not only respond to the current crisis and scale successful housing strategies, but also address and eliminate the root causes of homelessness. Of course, the COVID-19 pandemic has made implementation of these strategies all the more urgent as the number of people experiencing homelessness is expected to grow and our systems must rapidly expand to meet the need.

Alongside the implementation of strategies in this plan, the County and its partners seek to raise the voices of people with lived experience and share power and decision making with our unhoused and recently housed neighbors. Embedded in this work is a focus on policies and programs that reduce racial inequity, in an effort to reverse the disproportionately high rates of people of color who are unhoused.

In order to make this plan a success, the County and its partners also have the goal to have each jurisdiction not only endorse this plan, but to develop implementation strategies that specifically address the concerns in their communities.

Progress toward goals:

In addition to laying out a roadmap of strategies to prevent and end homelessness, the Community Plan set aggressive targets to achieve by 2025 including:

 House **20,000 people** through the supportive housing system

 Expand the Homelessness Prevention System and other early interventions to serve **2,500 people per year**

Double temporary housing and shelter capacity to reduce the number of people sleeping outside

* Temporary increase is the result of a temporary capacity increase of 1,123 for COVID-19 and a temporary decrease of 516 for social distancing.

 Achieve a **30% reduction** in annual inflow of people becoming homeless

To read the entire 2020-2025 Community Plan to End Homelessness, visit: <https://housingtoolkit.sccgov.org/take-action/santa-clara-county-community-plan-end-homelessness-2020-2025>

For a countywide map of supportive housing developments, visit: www.supportivehousing.scc.gov/map

"The County's homelessness prevention system is a magnificent program and support. It makes you better and bigger as a person. The biggest thing of all is because of this support, we didn't have to separate our family. We were able to stay together, learn and grow together."

- Monica M., a mother of five, whose family remained housed through Sacred Heart's Homelessness Prevention Program

Conclusion

In 2019-20, Santa Clara County's supportive housing system provided shelter, emergency assistance, permanent housing, and supportive services to thousands of currently and formerly homeless individuals and families. Still, with thousands of people experiencing homelessness and tens-of-thousands more on the brink due to high housing costs, a lack of living-wage jobs, and the economic fallout from the COVID-19 pandemic, there is much progress to be made to achieve the community's goal of making homelessness rare, brief, and non-recurring.

Since launching the first Community Plan to End Homelessness in 2015, the supportive housing system has continued to grow and improve its ability to serve the diverse population of people experiencing homelessness in the county. Expanding the reach and capacity of the supportive housing system in 2019-20 was no exception. While forming and implementing the 2020-25 Community Plan to End Homelessness over the past two years, the system moved over 4,000 households from homelessness to housing, bringing the community closer to its goal of ending homelessness.

Despite these accomplishments, COVID-19's full impact on our community and local economy is not yet known. While the future is uncertain for many in our community, we know that our county will continue to work together collaboratively, compassionately, and creatively to meet these challenges – including pursuing the end of homelessness.

"You don't know how important a home is until you don't have one. Actually having a place for me and my daughter to come home to makes everything we have to deal with in this crazy life a little bit easier every day. We've never had a home to come to until now, so it's affected our lives in every possible way you could imagine. It's everything and only for the better. "

- Amy G., a mother who experienced homelessness with her two-year-old daughter

EXECUTIVE SUMMARY

In Santa Clara County, the heart of Silicon Valley, thousands of residents experience homelessness each year, many living on the streets, in tents, or in vehicles. For many more households, the high cost of housing and too few living wage jobs leaves them one emergency or unexpected expense away from losing their housing. While most households that fall into homelessness are able to quickly resolve their housing crises, many others face steep barriers to regaining housing stability.

This report highlights the collaborative efforts of the County of Santa Clara Office of Supportive Housing and its numerous partners in 2018 to address the diverse causes and impacts of homelessness. From affordable housing development to preventing homelessness before it occurs to strengthening the supportive housing system to better serve those with the highest needs, these efforts demonstrate the power of partnerships to further the community's efforts to end homelessness.

Partnering to End Homelessness

To address the needs of its most vulnerable residents, Santa Clara County's supportive housing system provides shelter, supportive housing, and homelessness prevention services. However, these resources are limited and the demand for affordable housing and supportive services far exceeds the system's current capacity. Santa Clara County's Community Plan to End Homelessness, created in 2015, outlines a coordinated strategy to address homelessness that is powered by collaboration. Building partnerships across County departments, local governments, the business sector, and non-profit and philanthropic partners to leverage available resources and bring in new funding streams is fundamental to expanding the reach of the supportive housing system.

Progress Toward Goal of 6,000 New Housing Opportunities

Building Affordable Housing

Building more affordable housing is an essential component of the community's collaborative strategy to end homelessness. Responding to the deepening housing crisis, especially for the county's lowest-income residents, the County of Santa Clara has prioritized funding and development of housing for residents experiencing homelessness and extremely low-income households making less than 30 percent of Area Median Income. In response to urgent community need, the County has taken a multifaceted approach, partnering with city governments, housing developers, nonprofit and philanthropic organizations, property managers, landlords, and the Santa Clara County Housing Authority to increase the number of available affordable apartments for these priority populations and the supports necessary to help them stabilize.

Key examples of the collaboration necessary to stably house the county's most vulnerable residents include:

- **Second Street Studios** which, in 2019, became home to 134 new tenants who have experienced long periods of homelessness, many of whom have relied on the community's emergency medical and behavioral health systems to address long-term disabilities and medical needs. The project's radically collaborative approach, bringing together developers, property managers, and service providers, offers a model of coordinated support for the community's most vulnerable members.
- **The Measure A Affordable Housing Bond**, passed in 2016, provides \$950 million in funding for 4,800 units of affordable housing over 10 years. To date, the County has approved funding for 19 developments, including 13 in 2018, creating a total of 1,437 new affordable homes.

Supportive Housing System and Crisis Response System Partnerships

In Santa Clara County's supportive housing system, affordable housing is complemented by individualized medical, behavioral health, employment, and other supportive services to help clients maintain stable housing. System partners are continuously evaluating programs to improve outcomes for families and individuals experiencing homelessness. The continuum of programs and services provided to meet the needs of the community's most vulnerable residents involve many innovative partnerships designed to maximize the impact of the limited resources available and meet the high demand for homeless services.

RAPID REHOUSING

Obtained Permanent Housing

(883 of 1,297) of clients who exited rapid rehousing programs in 2018

PERMANENT SUPPORTIVE HOUSING

Permanent Housing Retention

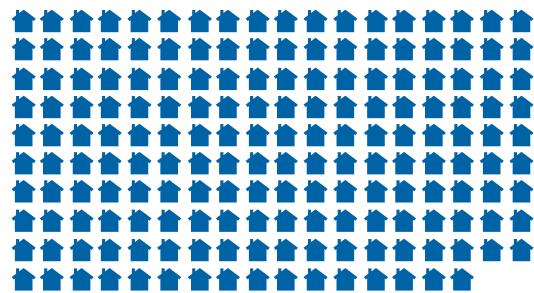

(956 of 1035) of clients served by a permanent supportive housing program in 2018

In 2018, key programs and strategies implemented by the Office of Supportive Housing and its partners include:

- Taking a Multidisciplinary Approach to Meeting the Needs of the Most Vulnerable Residents** – The Office of Supportive Housing and the County of Santa Clara Health System expanded their partnership through the Valley Homeless Healthcare Program in 2018 to include a 13-person multidisciplinary team dedicated to providing medical, behavioral health, and other supportive services to permanent supportive housing participants. To meet the unique needs of people experiencing homelessness, the team provides wrap-around services, supporting them not only through their immediate medical care and housing process, but also in maintaining long-term housing stability.
- Raising the Voices of People with Lived Experience of Homelessness** – In 2018, together with Destination: Home, the Office of Supportive Housing supported the formation of the Lived Experience Advisory Board, a 13-member body comprised of currently and formerly homeless individuals with diverse life experiences. Creating a direct line of communication with system-level decision-makers, the Board has provided input on new County policies and made recommendations for the use of new state funding, as well as provided leadership development opportunities for members.
- Expanding the Community's Capacity to Prevent Homelessness** – The Homelessness Prevention System brings together a network of community partners to provide flexible financial assistance and resources for households at risk of losing their housing. The program expanded its reach to serve more than 500 households in 2018, with plans to double capacity in 2019.
- Fostering Safe Spaces and Targeted Services for the LGBTQ Community** - To address the large disparity in LGBTQ persons experiencing homelessness in Santa Clara County, more than 70 stakeholders, as well as LGBTQ youth and young adults, came together in 2018 to develop a 20-person LGBTQ-friendly temporary housing program. The program was collaboratively designed to meet the needs of LGBTQ individuals and prompted additional system-wide changes across the supportive housing system to ensure safe and equal access to housing and services.

Through a multitude of innovative and strategic partnerships, Santa Clara County's supportive housing system provided shelter, emergency assistance, permanent housing, and supportive services to thousands of currently and formerly homeless individuals and families in 2018. Still, with more than 7,300 people experiencing homelessness and thousands more on the brink due to high housing costs and a lack of living-wage jobs, expanding the reach and capacity of the supportive housing system is critical to achieving the community's goal of making homelessness rare, brief, and non-recurring.

Combined and coordinated, these individual efforts leverage the expertise of each partner and maximize limited resources in the community, resulting in

1,783 households
moving from **homelessness**
to **housing** in 2018.

A shared vision and commitment to strategic and mutually beneficial partnerships is at the core of the progress made in 2018. The County of Santa Clara Office of Supportive Housing appreciates the many stakeholders who contributed to this growth and looks forward to opportunities to further strengthen the supportive housing system through future collaboration. Maintaining and accelerating progress towards ending homelessness in Santa Clara County will require continued commitment to the community's shared goals and ever more partnerships to better serve the County's most vulnerable residents.

INTRODUCTION

Despite a prosperous local economy and high median incomes, thousands of Santa Clara County residents experience homelessness each year. As of January 2017, more than 7,300 individuals were living on the streets, in shelters, or in transitional housing across the county. For many thousands more households on the verge of homelessness, stable and affordable housing is out of reach due to the high cost of housing and too few living wage jobs. Data shows that while most households that fall into homelessness are able to quickly resolve their housing crises, many others face steep barriers to regaining housing stability, including physical and mental health disabilities, experience of trauma, extremely low or fixed incomes, and discrimination.

To address these urgent needs, Santa Clara County's supportive housing system provides shelter, supportive housing, and homelessness prevention services in furtherance of the goal of making homelessness rare, brief, and non-recurring. However, these resources are limited and the demand for affordable housing and supportive services in Santa Clara County far exceeds the system's current capacity. Partnerships across departments, business sectors, and systems to leverage current resources and bring in new funding streams are fundamental to expanding the reach of the supportive housing system.

Recognizing that homelessness and housing are at the intersection of many vital community needs, the supportive housing system has been intentionally designed around collaboration between County systems, local cities, housing developers, philanthropic funders, community organizations, and community members.

Partners in the supportive housing system work collectively toward the goal of ending homelessness, while at the same time furthering the objectives of each agency, accomplishing more together than each partner could achieve acting on their own."

*– Ky Le,
Director, County of Santa Clara Office of Supportive Housing*

This report highlights the collaborative efforts of the County and its numerous partners in 2018 to address the diverse causes and impacts of homelessness. From affordable housing development to preventing homelessness before it occurs to strengthening the supportive housing system to better serve those with the highest needs, these efforts demonstrate the power of partnerships to further the community's efforts to end homelessness.

HOMELESSNESS IN SANTA CLARA COUNTY

Photo by Bernard Andre.

Homelessness in Santa Clara County increased from January of 2015 to January of 2017, as rental costs continued to exceed affordability for low income individuals and families.¹ A lack of affordable housing options for the community's most vulnerable residents means that thousands of households live on the brink of housing loss, and many become homeless for the first time each year. Individuals and families, adults and children, people with jobs, and those with severe disabling conditions all face challenges to finding and retaining safe and stable housing. Through a range of shelter and housing programs connected to healthcare, employment, education, legal services, and other support systems, the supportive housing system helped 1,783 people overcome daunting barriers and find new homes in 2018.

¹ Every other year in January, the County of Santa Clara Office of Supportive Housing coordinates a countywide point-in-time count of people experiencing homelessness. This biennial Homeless Census and Survey provides the best data available on the size of the county's homeless population over time, including numbers of people sleeping outside, in vehicles, or in structures not intended for human habitation (unsheltered), and in emergency shelters and transitional housing programs (sheltered). For more information about the Homeless Census and Survey, see Appendix B: Data Sources.

^{iv} Fair market rent is the amount that the Department of Housing and Urban Development (HUD) calculates would be needed to pay rent and utilities for a modest, privately owned, and safe rental unit of that size. U.S. Dept. of Housing and Urban Development, Fair Market Rent. Available at: https://www.huduser.gov/portal/datasets/fmr/fmrs/FY2018_code/2018summary.odn

^v The federal government considers a household Low-Income (LI), Very Low-Income (VLI), or Extremely Low-Income (ELI) when the household's income is at or below a certain threshold. The thresholds are 80 percent of Area Median Income (AMI) for Low-Income households, 50 percent for VLI, and 30 percent for ELI. Affordable monthly rent is estimated as 30 percent of the income threshold established by HUD for a four-person household. <https://www.scchousingauthority.org/section-8-housing-programs/waiting-lists-applicants/income-limits/>

^{vi} HUD defines first-time homelessness as families and individuals who have not had contact with any housing or service programs for people experiencing homelessness in the previous 24 months.

Who Experiences Homelessness?

While a persistent gap between soaring housing costs and stagnant incomes for low- and extremely low-income residents remains the primary driver of housing instability in Santa Clara County, no one-size-fits-all solution will end homelessness for all residents. Homelessness affects people of all ages, family compositions, and stages of life, and from each of the diverse communities within our county. From affordable housing development to health care, employment, education, and basic physical safety, progress toward ending homelessness relies on the success of all of the supportive housing system partners in pursuing their individual goals for the populations they serve.

Veterans

California has the largest population of veterans experiencing homelessness in the country. Many veterans experiencing homelessness have high barriers to housing due to service-related trauma, including Post-Traumatic Stress Disorder and substance use issues, which can result in long periods of homelessness. Ending veteran homelessness is a priority both nationally and locally, and the community has made significant progress in reducing the overall number of veterans experiencing homelessness in the past ten years.

This reduction in veteran homelessness is a powerful example of effective collaboration – in this case, between local cities, service providers, and two distinct service systems: one designed to serve qualifying veterans and the other designed to serve people experiencing homelessness. (See p.33 for more information about the All the Way Home campaign and other efforts to end veteran homelessness.)

Youth and Young Adults

A variety of circumstances and risk factors contribute to high rates of youth homelessness in Santa Clara County. Family dynamics, including arguments and violence, are often the precipitating cause of homelessness among youth between the ages of 12 and 24, and time spent in the foster care system is a leading risk factor. Overall, youth and young adults are less likely to access services or government assistance and are often more difficult to locate or identify than the adult homeless population, making youth-specific housing and services an essential component of the supportive housing system.

Santa Clara County Homeless Census & Survey Homeless Veterans

In the 2017 Homeless Census and Survey
45%
of youth and young adults reported experience in the **foster care system**

^{vii} This system inflow and outflow data includes youth 24 and under, including some youth under 18, who identified themselves as the head of a household.

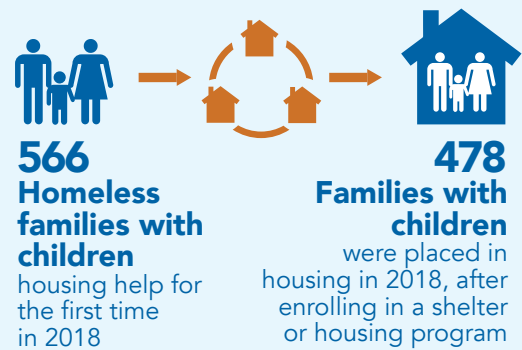

Families with Children

For low-income families, the high cost of housing in Santa Clara County is compounded by numerous other expenses, such as child care and the need for more living space. As a result, many families in Santa Clara County live with the reality that one – or even two – low-wage jobs are not sufficient to cover basic necessities. Homelessness has many negative consequences for school-aged children, including increased rates of anxiety and behavior issues, and decreased academic achievement due to absences and changing schools.^{viii} School-based programs that provide both academic and community supports for homeless children and youth are critically important for families.

Students Identified as Homeless or “Doubled Up” in Santa Clara County Public Schools^{ix}

^{viii} U.S. Interagency Council on Homelessness, “Opening Doors: Federal Strategic Plan to Prevent and End Homelessness.” 2015. https://www.usich.gov/resources/uploads/asset_library/USICH_OpeningDoors_Amendment2015_FINAL.pdf

^{ix} Each year, schools assess the number of students experiencing housing instability. While this assessment uses a more expansive definition of homelessness than that required by the U.S. Department of Housing and Urban Development for the Homeless Census and Survey – including families that are “doubled up” or living in motels or other temporary housing – the information collected by schools provides further insight into families that are homeless or at risk of homelessness. For more information about the definition of homelessness used in this report, see Appendix A: Defining Homelessness.

Aging Adults

As the “baby boomer” generation grows older, an increasing number of Santa Clara County’s older adults are aging into poverty and homelessness. Many seniors live on fixed incomes that are overwhelmed by high-cost housing and healthcare which affords little flexibility to accommodate fluctuations in the cost of housing or other basic necessities. The stress and instability of homelessness can cause premature aging and significantly reduce life expectancy. Research has demonstrated that homeless adults over the age of 50 have rates of chronic illness and geriatric conditions akin to housed adults who are 15 to 20 years older.^x

Survivors of Intimate Partner Violence

In Santa Clara County, as in many other communities, intimate partner violence and homelessness often go hand-in-hand. Experience of intimate partner violence is common among individuals and families experiencing homelessness and is often cited as a primary cause of housing loss. Especially in a high-cost housing market like Santa Clara County, limited financial resources make escaping an abusive relationship increasingly difficult.

In addition to meeting immediate safety and housing needs, survivors of intimate partner violence often require specialized support and safe spaces to cope with trauma. Agencies serving survivors of intimate partner violence in Santa Clara County play a unique and crucial role in the supportive housing system for those fleeing intimate partner violence.

^x Justice in Aging, “How to Prevent and End Homelessness Among Older Adults.” April 2016. Available at: <http://www.justiceinaging.org/wp-content/uploads/2016/04/Homelessness-Older-Adults.pdf>

^{xi} This data is from the community’s Homeless Management Information System (HMIS) and includes all adults served by street outreach, shelter, transitional housing, or permanent housing for people exiting homelessness. Victim service providers (organizations whose primary goal is to serve people fleeing intimate partner violence, sexual assault, or human trafficking) do not enter data into HMIS for safety reasons, so this data does not include adults with experience of intimate partner violence who were served by victim service providers within the supportive housing system.

PARTNERING TO END HOMELESSNESS

From the inception of Santa Clara County's supportive housing system, city, County, nonprofit, philanthropic, and other community partners have recognized that the impact of a collaborative approach will always be greater than the sum of its parts. Thoughtful and strategic partnerships enrich the individual efforts of each partner even as they further the shared goal of making homelessness rare, brief, and non-recurring for all residents.

Photo courtesy of Destination: Home.

The Community Plan to End Homelessness in Santa Clara County

The Community Plan to End Homelessness in Santa Clara County, developed through a series of community summits in 2014, outlines a coordinated strategy to address homelessness that is powered by partnership. Through the community planning process, representatives of the County, local cities, nonprofit advocacy groups, service providers, philanthropic organizations, elected officials, universities, and people with lived experience of homelessness committed to a vision of strategic, intentional partnerships that leverage individual strengths and expertise into a coordinated and effective system. The partnerships highlighted in this report are a living illustration of this vision.

As the 5-year period covered by this plan comes to an end, this year will see a renewed community planning process to develop a roadmap for future work to end homelessness in 2020 and beyond. The many partners of the supportive housing system will have an opportunity to reflect on significant progress made toward the goals and strategies they laid out for 2015-2020:

1

Disrupt Systems

The Community Plan calls for disruptive strategies and innovative programs that transform the systems related to housing people experiencing homelessness.

- Deepen partnerships between local governments, nonprofit service providers, and the business sector to improve coordination
- Use data to implement outcomes-based decisions about the most effective programs and structures to meet community needs
- Coordinate housing and services through the Coordinated Assessment System to connect each individual with the right housing solution
- Ensure that all individuals have a plan for housing upon exit from criminal justice or medical institutions and are not discharged into homelessness

2

Build the Solution

To end homelessness, it is essential to secure the full amount of funding needed to provide affordable housing and services to those who are homeless and those at risk of homelessness.

The Community Plan sets a goal of 6,000 new affordable housing opportunities dedicated to people experiencing homelessness, including new physical homes and apartments and new rental subsidies. Tenants in each of these new housing opportunities will have access to case management, health care, employment programs, and other services to ensure they are able to remain housed.

3

Serve the Person

The Community Plan recognizes the importance of client-centered strategies that target resources to each specific individual or household based on their unique and different needs. Goals under this section focus on increasing the system’s capacity to serve veterans, children and youth, families, people with disabilities who have experienced long-term homelessness, and other specific subpopulations.

Since implementation of the Community Plan began in 2015, the supportive housing system has helped 6,937 households return to safe and permanent housing.

In 2018, supportive housing system partners continued to make significant progress toward Community Plan goals. In 2018 alone, new construction and expanded funding created over 600 new affordable homes for people exiting homelessness (see **Building Affordable Communities** on page 18 for more information about progress toward 6,000 new housing opportunities). Longstanding partners deepened existing collaborations to ensure health, well-being, and housing stability for

the county’s most vulnerable residents (see **Supportive Housing Partnerships** on page 31 for more information about cross-system partnerships). As it grows to meet the community’s need, the supportive housing system will continue to focus on systemwide coordination and improved crisis response for all families experiencing homelessness (see **Crisis Response System** on page 44 for more information about system coordination and shelter programs).

Destination: Home

Serving as a convener and key partner in Santa Clara County’s supportive housing system, Destination: Home collaborates with diverse community stakeholders, including foundations, corporations, nonprofits, and local government agencies, to develop and fund strategies to prevent and end homelessness. As a public-private partnership, Destination: Home leverages philanthropic investments and implements collective impact initiatives, including developing the countywide Community Plan to End Homelessness in 2015, and supporting research and data-driven decision-making to inform strategic allocation of limited resources.

Among their many strategic initiatives, in 2018, Destination: Home supported the development of the Lived Experience Advisory Board, a platform for currently and formerly homeless individuals to have a voice in the community’s decision-making process (see pg. 16), and expanded the reach of the Homelessness Prevention System to provide flexible assistance to help families and individuals remain stably housed (see pg. 45).

Philanthropic Investments in Homelessness

Beyond government and non-profit organizations, engaging the private sector in a meaningful and ongoing way is critical to the long-term success of all efforts. Seeded with one of the largest private contributions to homelessness in history, Destination: Home launched the Supportive Housing and Innovation Fund in 2018 with a grant of \$50 million from Cisco. The new Fund enables the private sector to strategically and seamlessly support local initiatives, complement public funding, and share in a joint approach to prevent and end homelessness for the community's most vulnerable residents.

In the coming years, the Fund will help fulfill the intent of the Community Plan by launching a grantmaking strategy to attract and effectively deploy more private and philanthropic capital. The Fund will be used to facilitate stakeholder engagement, create coalitions, help partners overcome economic fluctuations, and act as a catalyst for expediting and scaling proven solutions. The goal of the Fund is to demonstrate the power of philanthropy and the critical role of the private sector in creating lasting solutions to make homelessness rare, brief and non-recurring in the community.

Santa Clara County's Lived Experience Advisory Board

Santa Clara County's Lived Experience Advisory Board, created in 2018, is a leadership development body that provides a platform for its members with lived experience of homelessness to learn about and provide meaningful input to improve Santa Clara County's supportive housing system. The Board was formed with the goals of fostering leadership and a sense of empowerment among its members, and to provide clear communication and ongoing partnership between decision makers and the people the system serves.

Recognizing the importance of including people who have experienced homelessness in planning and decision making across the system, Destination: Home and the Office of Supportive Housing spearheaded creation of the Board to establish an official avenue for feedback and input. Initial members were recruited through homeless service provider agencies and community leaders with the aim of bringing together a diverse and inclusive board that reflects the population of people experiencing homelessness across the county. The founding members have been intentional in identifying which voices are missing and recruiting new members to fill those voids, including people of color, youth, parents, and people who have overcome various barriers to housing, such as substance use and other disabilities.

The Board strives to empower people with lived experience of homelessness across Santa Clara County to improve the supportive housing system, dispel myths about homelessness, and help the broader community better understand their needs. Key to the Board's success thus far have been strong support from the Santa Clara County Continuum of Care leadership and opportunities to have direct impact and meaningful participation. Now 13 members strong, the Board is quickly becoming an integral part of the homeless system of care. The Board has provided input on priorities for investment of new state funding available to provide emergency assistance, weighed in on policies impacting formerly homeless individuals in the county's housing programs, served on review committees to determine funding priorities for local and federal funding, and charted a path for further leadership development and skill building for members.

"I see the Board as an opportunity to give back to the community. The Board has been a very empowering, very positive experience."

*– Holly Kemp,
Lived Experience Advisory Board Member*

"I joined the Lived Experience Advisory Board because I want to serve as a strong voice for the homeless and formerly homeless population in Santa Clara County, give personal input and feedback, and share my experience with the community. It's valuable for clients to be heard and, a lot of times, our voices are hushed. We should strive for the opposite."

*– Saline Chandler,
Lived Experience Advisory Board Member*

"The Lived Experience Advisory Board is important because it gives people who are not usually heard a voice. . . Going forward, I would like to see us play a bigger part in directing funding and helping the community understand why people experience homelessness."

*— Summer-Lee Bettencourt,
Lived Experience Advisory Board Member*

BUILDING AFFORDABLE COMMUNITIES

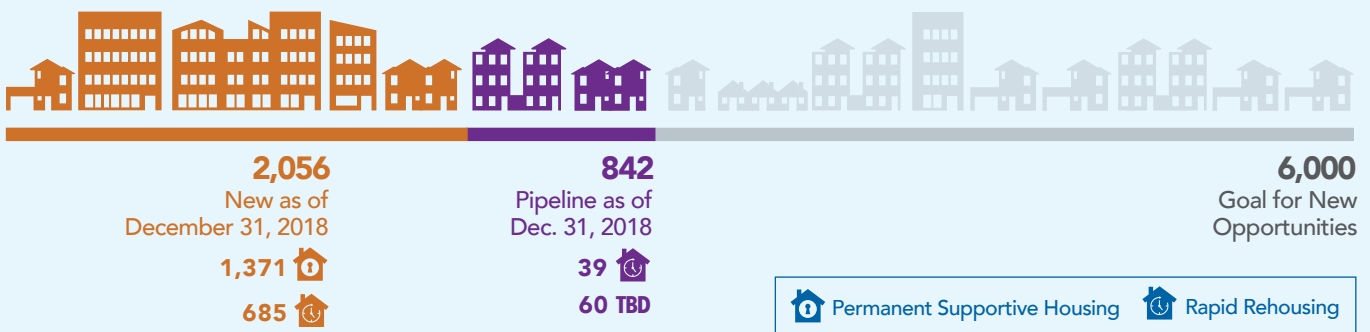

Affordable housing is an essential component of the community’s collaborative strategy to end homelessness. Rental costs continue to rise across the Bay Area, deepening a housing crisis that disproportionately impacts the region’s lowest-income residents, including individuals and families with low- and moderate-wage jobs, seniors and people with disabilities on fixed incomes, and single-income families with children. For those dedicating a significant portion of their income to housing costs, homelessness is just one medical emergency, missed paycheck, or rent increase away.

Since implementation of the Community Plan to End Homelessness began in 2015, Santa Clara County has made significant progress toward the central goal of creating 6,000 new affordable housing opportunities for individuals and families experiencing homelessness. The County of Santa Clara and several local cities have

increased investment in affordable housing development in response to urgent community need, and they have partnered with housing developers, property managers, landlords, and the Santa Clara County Housing Authority to increase the number of available affordable apartments and homes in many neighborhoods.

However, funding and housing development are only half of the picture. Partners who work day-to-day with people facing housing instability and homelessness bring valuable knowledge and experience to the development of affordable supportive housing and to the provision of services. These partners, from healthcare providers and foster youth advocates to those working in the criminal justice system, are involved early on in design, development, and service provision to ensure that new affordable housing meets the needs of all of the community’s most vulnerable residents.

Progress Toward Goal of 6,000 New Housing Opportunities

Building Together

Supportive housing partners in the medical and behavioral health systems help to design and operate housing that supports health and wellness. See page 23 “Second Street Studios” and page 35 “Valley Homeless Healthcare Program” for examples of health care partnerships.

Partners in the child welfare system and foster youth advocates seek affordable housing options that allow families to reunite and provide stability for youth transitioning out of foster care.

Partners in the criminal justice system recognize housing as a key factor in preventing recidivism and ending cycles of criminal justice involvement. See page 37 “Reentry Resource Center” for more about criminal justice system partners.

LGBTQ advocates understand the unique needs of LGBTQ communities for safe, supportive, and affirming housing. See page 49 “LGBTQ-Friendly Temporary Housing” for an example of partnership with LGBTQ advocates.

Partners serving aging adults understand the unique medical and quality-of-life needs of this population, as well as the importance of housing options that are affordable to individuals on fixed incomes. See page 25 “Agrihood Senior Apartments” for an example of supportive housing designed to meet the needs of older adults.

Veteran advocates and service providers partner with the supportive housing system to ensure that housing options exist for all veterans and their families. See page 33 “All The Way Home” for more information on a community-wide campaign to end veteran homelessness.

Advocates for survivors of intimate partner violence provide services and safe housing options within the supportive housing system for individuals and families who have experienced intimate partner violence, sexual assault, or human trafficking.

Employment partners work with supportive housing programs to connect clients with living wage employment and increase housing stability. See pg 39 “Employment Pathways Initiative” for more information about employment partners.

Santa Clara County Housing Authority

The Santa Clara County Housing Authority administers the federal Housing Choice Voucher Program and HUD-VASH rental subsidies that make housing affordable for thousands of low-income residents in Santa Clara County.^{xii} As a core affordable housing resource, the Housing Authority actively pursues partnership and collaboration as a way to maximize the impact of its federally-funded housing subsidies.

The Housing Authority partners with the County of Santa Clara Office of Supportive Housing and non-profit permanent supportive housing providers to provide long-term rental subsidies for households exiting homelessness. The Chronically Homeless Direct Referral and the Special Needs Direct Referral programs combine Housing Authority subsidies with a number of the County's permanent supportive housing programs to provide long-term rental assistance coupled with supportive services funded through other sources. The Chronically Homeless Direct Referral Program targets individuals and families who meet the federal definition of chronic homelessness, which requires 12 months of homelessness within a three-year period and a disability, while the Special Needs Direct Referral Program provides rental subsidies to a broader group of homeless individuals with severe disabling conditions.^{xiii}

“We want people to be housed, and we want them to be happy and healthy. The partnership underlying permanent supportive housing allows a broader range of people with different abilities and vulnerabilities to access this very important resource.”

*- Katherine Harasz,
Executive Director of the Santa Clara County Housing Authority*

Synergy is key to the success of the Chronically Homeless Direct Referral and Special Needs Direct Referral programs. By providing case management, health care, and other services to accompany the Housing Authority's rental subsidy, supportive housing partners help individuals with severe disabling conditions to overcome the challenges of locating an apartment, navigating life as a tenant, and maintaining health and stability. Each person who moves from the streets or an emergency shelter into an apartment through these programs fulfills the Housing Authority's commitment to provide affordable housing for the residents of Santa Clara County, while also furthering the supportive housing system goal to end homelessness for all.

Housing Choice Vouchers Committed to Homeless & Chronically Homeless Populations

^{xii} The Housing Choice Voucher Program (formerly known as Section 8) provides rental subsidies funded through the U.S. Department of Housing and Urban Development (HUD) and administered by local housing authorities. Project-based vouchers subsidize rent in specific housing units, while Housing Choice Vouchers are given to eligible households and can be used in any unit in the community. HUD-VASH vouchers combine HUD-funded rental subsidies with case management and medical care provided by the Department of Veterans Affairs.

^{xiii} See Appendix A: Defining Homelessness for information about the federal definition of chronic homelessness.

Local Investment in Supportive Housing

Housing is an urgent need for low- and extremely low-income residents experiencing homelessness in every city in Santa Clara County. Creating the necessary inventory of affordable supportive housing requires commitment from many partners, particularly local governments who are essential funders and policymakers. Each of the major cities in Santa Clara County pursues a commitment to housing development and housing affordability with strategies ranging from investment of funds for housing development and services to support within the local development approval process. Cities have partnered with developers, service providers, neighborhood groups, and the County of Santa Clara to expand supportive housing options across their communities.

www.supportivehousingcc.org/map

AFFORDABLE HOUSING PARTNERSHIP IN MORGAN HILL

Three new affordable housing developments will open in Morgan Hill in April of 2019, made possible by \$4.9 million in funding from the City of Morgan Hill, \$2.8 million from the County of Santa Clara, and 40 project-based vouchers from the Santa Clara County Housing Authority. Under construction by affordable housing developer EAH Housing, the developments will provide a total of 41 apartments for families making up to 60 percent of Area Median Income^{xiv}, including 6 apartments set aside for youth aged 18-24 with experience in the foster care system who are homeless or at risk of homelessness.

^{xiv} For 2018, a household of four making 60 percent of area median income would have income of \$75,120.

STRATEGIC FUNDING COORDINATION IN SAN JOSÉ

In August of 2018, the City of San José announced the availability of \$100 million in funding for affordable housing developments, to be awarded in 2019 through a competitive application process. The City of San José coordinated with the County of Santa Clara to design a funding application that prioritized high-quality housing for the community's most vulnerable populations, with incentives for development proposals including supportive housing for homeless individuals or families. The City of San José also partnered with nonprofit service provider, The Health Trust, to provide information to developers about best practices in supportive housing design, such as kitchen space equipped for catered community meals.

affordable housing

COMMUNITY AND INNOVATION IN SANTA CLARA

In 2018, the City of Santa Clara joined forces with the County of Santa Clara and affordable housing developer Core Affordable Housing to turn a city-owned property into a thriving community that pays homage to the city's agricultural history. The Agrihood housing development, which is planned to open in 2022, will combine 165 rental apartments for low-income seniors, 160 market-rate and moderate-income rental apartments, and 36 townhomes for purchase. Open space on the development site will be operated as an urban farm, providing a rich source of community engagement and opportunities for tenants to connect, learn, and give back.

Mixed-income housing brings seniors, families, and homeowners together to create a dynamic community life, which is further enriched by the environmental and social aspects of a working urban farm.

Second Street Studios

When it opened in May of 2019, Second Street Studios became home to 134 new tenants, marking an end to years – or, in some cases, decades – of homelessness. Thanks to support and advocacy from the City of San José during the planning process, Second Street Studios apartments are reserved for individuals who have experienced long periods of living outside and in emergency shelters, many of whom have relied on the community's emergency medical and behavioral health systems to address long-term disabilities and medical needs. This reliance had already begun to change even before completion of construction, thanks to a radically collaborative approach that offers a model of coordinated support for our community's most vulnerable members.

A Community of Support

For months prior to the Second Street Studios opening, a team of committed partners worked to build relationships with future tenants and prepare for quick transitions into their new homes, once construction was finished. Potential tenants were referred through the Coordinated Assessment System, which identifies and prioritizes the most vulnerable individuals experiencing homelessness in the community. Outreach specialists from Abode Services and the County of Santa Clara Office of Supportive Housing used their expertise to locate and engage with future tenants wherever they were living – the vast majority sleeping outside or in emergency shelters. Staff were able to connect tenants immediately with a dedicated clinical team at the Valley Homeless Healthcare Program, whose experienced and supportive staff were ready to assess tenants' medical needs and ensure that each individual received appropri-

ate care, helping to stabilize clients before moving into housing. At the same time, tenants were introduced to the case managers, provided by Abode Services, who would form the core of their ongoing support team.

In the weeks that followed, future tenants connected with the rest of the integrated service team comprising their key support system during and after their transition into Second Street Studios. This team offers tenants essential on-site mental health and medical services, and opportunities for social connection and involvement in community life through on-site gardens, inviting community spaces, and other programming.

Building Toward the Future

Second Street Studios offers an example for future collaborations between local governments, housing developers, and service providers to create affordable housing for high-needs populations. From the early days of the project, the City of San José, the County of Santa Clara, developer First Community Housing, property manager John Stewart Company, Abode Services, and the Valley Homeless Healthcare Program met regularly to ensure a shared understanding of the goals and design of the project. This commitment to open and frequent communication ensured that each partner's goals and vision were represented and helped to maintain the cohesion necessary to leverage each partner's expertise and resources. As life at Second Street Studios moves forward, the lessons these partners learned from each other and from their new tenants will strengthen supportive housing across the community.

2016 Measure A Affordable Housing Bond

Since November of 2016, when voters approved a \$950 million Affordable Housing Bond, local cities, affordable housing developers, and service providers have partnered with the County of Santa Clara on 19 new and rehabilitated affordable housing developments, creating a total of 1,437 new affordable apartments. This represents over a third of the County’s goal of 4,800 Measure A-funded apartments over 10 years. This section highlights the 13 developments approved in 2018.

2016 Measure A Production Goals & Progress

**21 of the total 1,437 units created do not fall into one of the four categories above (PSH, RRH, ELI, or VLI) and are not reflected in the graphic above which shows the Office of Supportive Housing’s progress towards goals for each of those four categories.

West San Carlos Housing, under development by Danco Communities, is an 80-unit affordable housing complex located in downtown San José just a few blocks from Diridon Transit Station. Half of the apartments will be reserved for homeless households with special needs. Experienced service providers will support housing stability and quality of life for tenants.

SUPPORTIVE HOUSING PARTNERSHIPS

Programs that provide permanent housing and supportive services are at the core of Santa Clara County's supportive housing system and are key to achieving the community's goal of making homelessness rare, brief, and non-recurring. Partnerships are essential to these programs' success and to providing individualized support for each client to achieve housing stability. This section describes some of the community's most innovative supportive housing partnerships, demonstrating extensive cross-system and cross-sector collaboration among local government, nonprofit, and business partners to better serve the county's most vulnerable residents.

TOOLS OF THE SUPPORTIVE HOUSING SYSTEM

The supportive housing system relies on three central elements to support participants as they obtain and retain stable housing: affordable housing, case management, and supportive services, including medical and behavioral health services. Performance measurement is used to evaluate and improve the effectiveness of these tools.

 **Affordable Housing** can take the form of rental subsidies, which cover part or all of a client's housing costs and may be short-term (1-3 months), medium-term (3-24 months), or long-term (over 2 years). Subsidies are used in physical housing units owned or leased by a housing program, in units that are part of the market-rate housing stock, or in affordable apartments developed and set aside for households exiting homelessness.

 **Case management** involves one or more trained staff members working closely with a client to establish client-driven goals to attain and retain stable housing and connect the client to the best resources to help reach those goals.

 **Medical and behavioral health services**, including services to address mental health and substance use challenges, are essential to helping clients address barriers to housing and stabilize once they are housed.

 **Supportive services** are a diverse array of resources that help clients obtain or maintain permanent housing, including assistance with public benefits applications, legal services, credit repair, childcare, job training and employment programs, assistance with housing location or rental applications, and help building relationships with landlords.

 **Performance measurement** uses data collected by housing and service providers to evaluate the success of the supportive housing system and to improve outcomes for clients. See Appendix C: Measuring Success for more information about the performance metrics used.

Permanent Supportive Housing

Permanent supportive housing – which provides rental subsidies, medical and behavioral healthcare, and other supportive services – is the most effective strategy for ending homelessness for persons with disabilities and extensive histories of homelessness. These programs target families and individuals with the highest barriers to finding or retaining housing and the longest time spent homeless. Often these clients are frequent users of County emergency medical, mental health services, and justice system services, increasing the need for cross-system collaboration to ensure coordination of care and effective utilization of limited resources. Coupling long-term housing support and intensive medical, mental health, and clinical services, the county’s permanent supportive housing programs provide the highest level of support available for the most vulnerable clients in the supportive housing system.

Total Unit Inventory:

(point-in-time capacity; includes both HMIS-participating units and those not tracked in HMIS)

3,271 households

Served in Permanent Supportive Housing in 2018:

(includes only households in HMIS-participating beds)

1,810 households^{xv}

Measuring Success^{xvi}

Permanent Housing Retention

(956 of 1,035) of clients housed in PSH^{xvii}

Returned to Homelessness Within Two Years

(10 of 165) of clients who exited PSH for other permanent housing in 2016

^{xv} Permanent supportive housing capacity includes 1,916 units that enter information about clients served into the Homeless Management Information System (HMIS), and 1,355 units that do not. The number of households served in 2018 is significantly lower than capacity, because this number includes only households in HMIS-participating beds.

^{xvi} The Santa Clara County supportive housing system evaluates the overall success and impact of the system using data entered by supportive housing and shelter providers into the Homeless Management Information System. These performance measures are based on the national standards for performance measurement developed by the U.S. Department of Housing and Urban Development. For more information about the performance measures in this report, see Appendix C: Measuring Success.

^{xvii} The universe for this measure (1,035 clients) includes all clients served in a permanent supportive housing program who were housed at least 12 months prior to the end of 2018. The universe is significantly lower than the total system capacity (3,271 households) because it does not include all clients served.

All The Way Home

Inspired by First Lady Michelle Obama's Mayors Challenge, in 2015, the Mayor of San José, Sam Liccardo, and County of Santa Clara Supervisor Dave Cortese launched the "All The Way Home" campaign seeking to end veteran homelessness across the county. The collective efforts of several key partners focused on strategies to incentivize landlords to rent available apartments to formerly homeless veterans and to provide supportive services and rental assistance to keep veterans stably housed. By joining together behind a united mission and message, the partners have garnered significant community support and strengthened their resolve to end veteran homelessness.

Since June 2018, veterans experiencing homelessness in Santa Clara County are being housed at a higher rate than those entering into homelessness, effectively turning the tide for this vulnerable population. Because of this success, the partners in the All The Way Home campaign agreed in 2018 to extend the campaign for two more years with the goal of leveraging the gained momentum to end veteran homelessness. Key strategies utilized by the campaign include:

Building relationships with landlords to house veterans in the community

By pooling funding and coordinating efforts to engage landlords, the campaign partners have secured hundreds of rental units for veterans experiencing homelessness. Central to this success has been flexible funding to provide financial incentives for landlords to rent available units to veterans, bonuses for continuing to rent a unit previously inhabited by a veteran to a new veteran tenant, and funding for property improvements.

Coordinating services and supports to maintain housing stability

Once veterans are housed, a consortium of service providers offers a range of targeted supports to meet veterans' unique needs, including assistance with securing employment, behavioral and mental health services, financial literacy workshops, and counseling. Each partner plays an important role in ensuring veterans in supportive housing achieve stability.

Key Partners:

The Health Trust*

CLIENT STORY

Breaking Cycles to Reach Stability

David is eager to give credit to the numerous people and agencies that supported him in stabilizing and securing the studio apartment he has enjoyed for the past eight months. Currently enrolled in a permanent supportive housing program with rental assistance provided by Abode Services and case management by Community Solutions, his journey to overcome challenges with mental health and addiction and achieve housing stability has been, in his words, “a collaborative effort.” David explains, “I guess you could say I’m a walking by-product of a lot of these agencies interwoven.”

David, whose family is from the Bay Area, grappled with addiction for years while living with his grandmother in their family home. He acknowledges that this experience enabled him to avoid the issues that plagued him and prevented him from being at, what he calls, “operational capacity.” When his grandmother passed away and the house was sold, he found himself with

no place to go, falling into a cycle of homelessness and incarceration. One initial drug-related offense resulted in years of probation violations and returns to custody: “I had no address, my residences were the county jail, the homeless shelters, and on nights when neither of those places were available . . . on the streets.”

After a series of bench warrants, detoxing, rehab, and relapse, David recalls “hitting a bottom of a spiritual nature” after a visit with his young daughter who was in the temporary custody of his mother. He reached out to Horizon South, a program of Horizon Services, Inc., which he had heard about on his road to recovery. They had an open bed and David began his journey toward stability, supported by standout caseworkers who helped him find temporary housing, a job, and ultimately, a subsidized apartment. They also helped David address his alcohol and drug use, which he views as an extension of his mental health challenges.

While the path was not always certain, David is happy with the result. He is married and looks forward to moving with his wife and two-year-old daughter “toward greener pastures.” When asked what support was most valuable to him along the way, David enumerates a long list of people and programs that helped him reach his goal including Judge Manley’s Court, Behavioral Health Services, Community Solutions, Goodwill of Silicon Valley, and LifeMoves’ Montgomery Street Inn. “I couldn’t say just one person,” he explains, “[they were] all contributing factors [and I am] very grateful.”

Valley Homeless Healthcare Program

The Santa Clara Valley Medical Center and County of Santa Clara Office of Supportive Housing's jointly-funded Valley Homeless Healthcare Program consists of various fixed-site clinics and mobile and satellite health centers dedicated to serving the county's most vulnerable residents. The program is linked to the County of Santa Clara Health System network of care and is essential in serving people who are unable to utilize primary care services in conventional settings and in connecting clients to the wider system of care.

Key Partners:

- ▶ County of Santa Clara Office of Supportive Housing
- ▶ County of Santa Clara Health System

Services range from a mobile clinic for teens, a gender clinic providing care for transgender and gender expansive people experiencing homelessness, a suboxone clinic, a medical respite program, and a "backpack medicine" team that provides outreach, physical assessments, and medical supplies to people living in encampments. In 2018, the program was expanded to include a 13-person team dedicated to providing medical, behavioral health and other supportive services to permanent supportive housing participants. To meet the unique needs of people experiencing homelessness, the team provides wrap-around services, supporting them not only through their immediate medical care and program enrollment process, but also in maintaining housing stability.

The program also implements various approaches for coordinating care among providers and providing comprehensive support to clients. Key strategies include:

Working hand-in-hand with the supportive housing providers to streamline the enrollment process

The County of Santa Clara Office of Supportive Housing client engagement team seeks out clients that have been prioritized for placement in permanent supportive housing by the County's Coordinated Assessment System and connects them to Valley Homeless Healthcare Program to evaluate their medical and housing needs and start the process of connecting them with broader supportive services. Once a client has been referred to housing, the team streamlines enrollment by setting aside time each week to help clients complete disability paperwork required for participation in permanent supportive housing programs.

Providing cross-system, client-centered care through collaborative multidisciplinary teams

Many people experiencing homelessness have multiple, inter-related health issues that impact their ability to maintain housing, requiring a multidisciplinary approach to care. The team dedicated to serving clients currently or formerly homeless clients consists of physicians, psychiatrists, psychologists, community health workers, financial counselors, and nurses who are able to work with participants to address a wide range of health and housing-related challenges.

In 2018, VHHP provided healthcare and other supportive services for **3,285 persons** experiencing homelessness through **15,130 visits**.

Of the **3,207 patients** who provided information on their living situations, **35% were unsheltered**.

"Stabilizing the health and social well-being of a homeless individual is a complex undertaking, and it is made much harder when that individual is living on the street. Our partnership with the Office of Supportive Housing has allowed for housing to be part of healthcare delivery, and our clients have made incredible improvement once housed."

- Elizabeth Echeverria,
LCSW, PSH Team Manager,
Valley Homeless Healthcare Program

Rapid Rehousing

Rapid rehousing is an evidence-based supportive housing strategy that quickly moves families and individuals who are experiencing homelessness into permanent housing and provides a time-limited rental subsidy, typically 6 to 24 months. During this time, clients have access to case management and supportive services, such as employment and training opportunities and childcare, aimed at increasing their income and addressing other barriers to housing stability. While rapid rehousing offers a promising path to housing stability for large numbers of individuals and families, the high cost of housing makes rapid rehousing program design and implementation challenging in Santa Clara County. These challenges make cross-system partnerships to support clients in obtaining and maintaining stable housing all the more important – for rapid rehousing clients, finding living-wage employment and locating an affordable apartment can make the difference between long-term housing stability and a continued risk of homelessness.

Total Unit Inventory:
(annual capacity)

1,420 households

Served in Rapid Rehousing in 2018:

1,490 households

Measuring Success^{xviii}

Obtained Permanent Housing

(883 of 1,297) of clients who exited rapid rehousing programs in 2018

Returned to Homelessness Within Two Years

(64 of 611) of clients who were in permanent housing when they exited rapid rehousing in 2016

^{xviii} The Santa Clara County supportive housing system evaluates the overall success and impact of the system using data entered by supportive housing and shelter providers into the Homeless Management Information System. These performance measures are based on the national standards for performance measurement developed by the U.S. Department of Housing and Urban Development. For more information about the performance measures in this report, see Appendix C: Measuring Success.

Reentry Resource Center

In Santa Clara County, like many other communities, criminal justice system involvement is a key risk factor for homelessness, with many of the community's highest-need residents churning through both the criminal justice and homeless systems. Formerly incarcerated individuals must overcome significant additional barriers to obtaining jobs and housing, leading many to return to homelessness or to become homeless for the first time. In 2012, the County of Santa Clara's Office of Reentry Services and a network of other County agencies and nonprofits came together to address this issue by creating the Reentry Resource Center. These efforts were supported by the Board of Supervisors and funded in part by California's Public Safety Realignment Act (known as AB 109), which transferred post-release supervision for some residents from the state to counties and provided new funding for reentry services.

Key Partners:

- ▶ County of Santa Clara Behavioral Health Services
- ▶ County of Santa Clara Office of Supportive Housing
- ▶ County of Santa Clara Office of Reentry Services
- ▶ County of Santa Clara Social Services Agency

Through partnerships with 14 community-based organizations, 12 County agencies, and 38 faith-based organizations and with locations in both San José and Gilroy, the Reentry Resource Center is a centralized hub where individuals reentering the community from incarceration can efficiently access a broad range of services to help them and their families during this transition. One of the Reentry Resource Center's key partnerships is with the County of Santa Clara's Office of Supportive Housing, which, as of 2018, had provided housing assistance—including case management, connections to employment, and rental assistance. Since opening in 2012, the Reentry Resources Center has served more than 20,000 reentry clients.

The Reentry Resource Center leverages collaboration across systems to reduce both homelessness and recidivism through the following strategies:

Co-locating partnering agencies resources to provide comprehensive support for reentry clients

Clients coming to the Reentry Resource Center can learn about available housing assistance, get linked to expungement and criminal record clearance services through the Santa Clara County Public Defender's Office, find out about Goodwill's employment placement programs, and connect with many more resources all in one location. This has resulted in better coordination among providers who serve the reentry population and more efficient access for clients.

Sharing information and goals across providers to compound successes

The diverse collective of partners at the reentry center utilize a referral tracking system that allows them to monitor client progress, develop internal reports, and communicate with one another, ensuring that services are delivered in a holistic and coordinated manner.

CLIENT STORY

Fierce Determination After Incarceration

When Hansen was preparing to return to the community he had left over a decade earlier, he knew it would not be easy. After spending eleven years incarcerated in Folsom State Prison, Hansen was worried about the number of barriers he knew stood between him and a successful reentry. With no place to live and no job prospects, Hansen was consumed with the problem that many people returning from incarcerated settings must confront: "Most people when you say you've been away for eleven years, they judge you immediately," he says. But thanks to a referral from his parole officer, Hansen connected with a case manager, part of a collaborative initiative between the Office of Reentry Services and the Office of Supportive Housing, who worked with him every step of the way.

Hansen's first stop was transitional housing with other formerly incarcerated men. Job preparation, and other basic services, such as food and clothing, helped him put the building blocks in place to move forward with his life. With the dual assistance of his parole officer and case manager, he secured employment and navigated the difficult balance between the transitional housing program's rules and curfews and his graveyard shifts. After a few months, and with his case manager's coaching, Hansen started speaking to potential landlords about his prior conviction history, and about why he was prepared to be a good tenant and put his past behind him. "I never gave up; I continued pushing," he says.

Eventually, with financial support to cover move in costs, he found a studio apartment of his own. Hansen is keenly aware of how the collaborative assistance of multiple players helped him find stability. "I wouldn't have known what to do without [my case manager] and my parole officer. I am proactive but their support was crucial." Hansen is determined not to let any more years of his life pass him by: "I lost my life and I want to reclaim it."

Employment Pathways Initiative

Short-term housing subsidies, such as those offered through rapid rehousing programs, are designed to help people get back on their feet. However, many rapid rehousing participants find it difficult to obtain living-wage jobs that will allow them to take over the rent at the end of the program and maintain long-term housing stability, due to barriers such as a lack of work history, criminal records, and behavioral health issues. To address this gap, Destination: Home, the County of Santa Clara Office of Supportive Housing, and the City of San José developed the Employment Pathways Initiative to help ensure that households receiving rapid rehousing assistance, and other supportive housing program participants, are quickly connected to employment and training opportunities that will help them remain stably housed.

The Employment Pathways Initiative staff teams up with each participant's existing housing program case manager, empowering them to support their clients in securing employment. Through partnerships with private businesses and nonprofits, the program connects participants with opportunities in high-growth industries such as healthcare, building and construction trades, advanced manufacturing, and technology, depending on the client's employment goals and experience. Key strategies of this partnership include:

Key Partners:

- ▶ Building Trades Council
- ▶ Center for Employment Training
- ▶ City of San José
- ▶ County of Santa Clara Office of Supportive Housing
- ▶ Destination: Home
- ▶ LeadersUp
- ▶ Roberts Enterprise Development Fund
- ▶ Silicon Valley Children's Fund/Teen Force
- ▶ Working Partnerships
- ▶ Work2Future

Sustainable collaboration for mutual benefit of employers and participants

This mutually beneficial collaboration means that employer partners receive pre-screened, well-supported applicants for vacant positions, while participants are able to enter into industries where there are increasing opportunities for growth and advancement – resulting in a “win-win” for both employers and participants.

Leveraging data and shared goals to increase employment and improve outcomes across the supportive housing system

The program's partners are connected to the County's Homeless Management Information System (HMIS), in order to track employment outcomes including wage increases and retention rates. This access to data allows partners to measure performance against established benchmarks and to work towards improving the system as it expands.

“The Employment Pathways Initiative is driving a culture shift, where employment becomes a priority and case managers have the tools and knowledge to help their clients increase income and connect to living-wage employment.”

*- Chad Bojorquez,
Senior Director, Destination: Home*

Of the 178 participants through 2018:

were connected with **full-time employment**

were connected with **living-wage employment**

of employment placements were **retained for at least 90 days**

of employment placements were **retained for 365 days**

Bringing Families Home

Families involved in the child welfare system with a child placed out of the home must have safe and stable housing in order to be considered for reunification by the Department of Family and Children Services, and maintaining stable housing is critical in preventing future separation. In Santa Clara County's high-cost housing market, this presents a daunting challenge for many vulnerable families. Launched in 2017, the County's Bringing Families Home program supports families with children placed out of the home and recently reunified families who may be precariously housed by assisting them to quickly regain housing stability. The goal of the program is to help more families reunify and successfully exit the child welfare system, while preventing reentry down the road.

Key Partners:

- ▶ Abode Services
- ▶ County of Santa Clara Department of Family and Children Services
- ▶ County of Santa Clara Office of Supportive Housing

Child welfare-involved families access the program through the County's Coordinated Assessment System and by referral from Family and Children Services. This flexible approach ensures that vulnerable households quickly receive the support they need no matter where they seek help – a central element of achieving reunification because households have a narrow window of time to meet these requirements. Abode Services supports families in achieving stability by providing housing navigation and rental assistance and by developing strengths-based individualized case plans focused on employment objectives and family maintenance goals. Together, the partners connect reuniting families with the support networks key to addressing the factors that led to child welfare involvement, using the following collaborative strategies:

Co-locating partnering agency services to better serve families and provide targeted interventions

Abode Services' housing navigators and case managers are co-located with Family and Children Services social workers and these partners work together to engage reuniting families in planning courses of action to foster empowerment and autonomy.

Achieving housing stability and lasting family reunification by partnering to provide individualized, wrap-around support

The Department of Family and Children Services strives to keep children safe and families strong by providing crucial services responsive to interrelated needs and tapping into other available County resources such as childcare, mental health services, parenting classes, and drug treatment.

CLIENT STORY

A Collaborative Approach Leads to A Family's Reunification

When Susan speaks about her experience into and out of homelessness, her children take center stage. A mother of five, Susan struggled with drug use and a tumultuous marriage, ultimately losing her job, home, husband, and children within the span of four months. She recalls the day she decided she had to do something different with her life: “The day I lost my kids, it was my last straw. It was my birthday.”

Susan’s resolve to show her children that she could overcome her challenges provided her with the motivation to confront her addiction and start again; the collaborative efforts of the Department of Children and Family Services and Abode Services, through the Bringing Families Home program, provided her with the tools to get started. These supports included placement in a LifeMoves emergency shelter that allowed space for Susan to reconnect with her children. Susan’s journey was not always easy – when she went in for a job interview and saw the interviewer was the same manager who had fired her previously, she almost turned around and left. She persevered, however, and was not only rehired, but propelled quickly up the ranks into a management position through her fierce determination.

Eventually, Abode Services helped Susan and her children move into a three-bedroom, two-bathroom house. Abode Services staff also provided them with other critical stabilizing support – supplying furniture, groceries, and endless encouragement – which turned the house into a welcoming home. Reunited with her kids, Susan is now in a place to truly admire their achievements and resilience. One is a passionate writer with straight-A grades looking toward college, another has earned top marks in all her latest exams, and a third is showing the kind of resolve his mother is very familiar with – confronting challenges as they arise and working to do a bit better every day.

House Sharing Program

Aimed at expanding available affordable housing options for County residents, Catholic Charities of Santa Clara County, in partnership with the Office of Supportive Housing, started a house sharing program in the county in September 2018. The new program serves a range of populations seeking affordable housing – from seniors on fixed incomes to students to formerly homeless individuals – and helps to more fully utilize housing resources by allowing homeowners or renters with available rooms to be matched with those seeking housing. Living arrangements can take a variety of forms, with some homeowners or renters renting out a spare room in their home or two or more participants sharing a rental apartment, and the program is flexible to meet the unique needs of each participant.

Key Partners:

- ▶ Catholic Charities of Santa Clara County
- ▶ County of Santa Clara Office of Supportive Housing
- ▶ Rebuilding Together Silicon Valley

Catholic Charities screens prospective roommates to ensure safety, provides matching services based on needs and preferences, and helps negotiate rent and other provisions, such as arrangements to help with household tasks or errands. After a successful match, they provide monthly follow-up with participants and are available to mediate any issues as they arise. The program has proven to be mutually beneficial for both community members with vacant rooms to rent who benefit from additional income and companionship, and housing seekers in need of an affordable home.

Partnering to provide home repairs for program participants

As an added benefit for those supplying housing through the program, Catholic Charities partners with Rebuilding Together Silicon Valley to provide minor home repairs and accommodations such as the addition of wheelchair ramps or other accessibility modifications, funded by the County.

Engaging community members to provide affordable housing options for those in need

Key to the program is community members' willingness to open their homes to others in need of affordable housing options. Catholic Charities plays the critical role of engaging homeowners and renters with spare rooms to rent to understand the housing crisis and opportunity to help, and connecting them with tenants who will be a good fit in their home.

Photo by Bernard Andre.

CRISIS RESPONSE SYSTEM

The crisis response system is designed to meet the immediate needs of people experiencing or at risk of homelessness, providing emergency assistance to avoid homelessness, emergency shelter, and support for other basic needs. While the supportive housing system strives to ensure that homelessness is rare, brief, and nonrecurring for Santa Clara County residents, the demand for safe, affordable, stable housing far exceeds the system's current capacity, necessitating short-term solutions. In 2018, the many partners involved in the crisis response system incubated and grew a variety of promising programs to provide critical support for individuals and families at risk of and experiencing homelessness. Often the first step back to stable housing, these programs work together with the community's supportive housing system to help clients achieve long-term housing stability.

Homelessness Prevention System

Recognizing the critical role that prevention plays in reducing inflow into the supportive housing and crisis response system, in 2017, the Santa Clara County Continuum of Care developed the Homelessness Prevention System to provide a range of supports to help residents at risk of losing their housing to regain stability. Through a combination of public and private resources from partners including the Packard Foundation, Sunlight Giving, Google.org, the City of San José, the City of Santa Clara, the City of Morgan Hill, and the County of Santa Clara, over \$4.2 million was initially raised to launch a pilot program with the goal of implementing a countywide homelessness prevention system and ultimately preventing all instances of homelessness. These efforts were spearheaded by the Office of Supportive Housing, Destination: Home, and the Emergency Assistance Network agencies, who provide a variety of essential services for low-income households across the county.

Owing to its diverse and adaptable funding sources, the Prevention System is able to provide support tailored to each household's needs to stabilize its housing. These services include help paying future and past-due rent or mortgage payments, security deposits, utility bills, and other expenses that place the household at risk of homelessness, such as transportation costs, medical bills, and childcare. Partner agencies also offer case management and follow up to provide additional support if participants find themselves at risk of homelessness again in the future. The program leverages the following strategies to provide comprehensive support to at-risk households:

Key Partners:

- ▶ Sacred Heart Community Service (lead agency)
- ▶ Cities of Morgan Hill, San José, and Santa Clara
- ▶ County of Santa Clara Office of Supportive Housing
- ▶ Destination: Home
- ▶ Community Services Agency of Mountain View and Los Altos
- ▶ LifeMoves
- ▶ Sunnyvale Community Services
- ▶ St. Joseph's Family Center
- ▶ Salvation Army
- ▶ West Valley Community Services
- ▶ Amigos de Guadalupe

Coordinating to provide "no wrong door" access to prevention services

Prior to the current system, households in crisis lacked a centralized means of accessing prevention services, resulting in confusion and frustration for households at risk of losing their housing. To close these gaps, the Prevention System has implemented a "no wrong door" approach in which clients can enter the system through a variety of access points, receive an assessment to determine their risk, and be referred for services to the prevention system partner that services their zip code.

Partnering to provide streamlined access to legal assistance in landlord-tenant proceedings

Through a partnership with the Silicon Valley Law Foundation, Prevention System clients can be directly referred to receive legal advice and representation for fast-paced landlord-tenant proceedings. In turn, the Law Foundation can directly refer their clients for financial and other prevention assistance, which provides attorneys with more leverage in settlement negotiations and resources to help their clients relocate to avoid eviction. Plans for expanding this program to double the number of people served are currently underway in 2019.

Out of 540 households served through 2018:^{xx}

of families and individuals remained housed while receiving homelessness prevention services

of families and individuals were stably housed for at least 12 months after they stopped receiving homelessness prevention services

^{xx} Data reflects clients served from July 1, 2017, to December 31, 2018.

Emergency Shelter

Each night, emergency shelters in Santa Clara County provide a safe place to rest for hundreds of people experiencing homelessness, a fundamental role of the supportive housing system. Emergency shelter program models vary significantly across the system, with many providing an array of on-site services through partnerships with the County and other safety net providers. From meeting basic needs, such as food, showers, and access to health care, to case management and connection to employment, emergency shelters are a critical resource hub for many people experiencing homelessness. All emergency shelters also act as access points for the Coordinated Assessment System, administering the standard assessment used to prioritize households for the community's permanent and transitional housing opportunities.

(1,040 of 4,534) of clients who exited emergency shelter in 2018

Returned to Homelessness Within Two Years

(193 of 750) of clients who exited emergency shelter for permanent housing in 2016

^{xxi} The Santa Clara County supportive housing system evaluates the overall success and impact of the system using data entered by supportive housing and shelter providers into the Homeless Management Information System. These performance measures are based on the national standards for performance measurement developed by the U.S. Department of Housing and Urban Development. For more information about the performance measures in this report, see Appendix C: Measuring Success.

Behavioral Health and Crisis Response Services

The Santa Clara County Behavioral Health Services Department supports county residents in resolving crises, overcoming mental illness, and recovering from substance use through an array of services and programs. As the supportive housing system has continued to grow, the Behavioral Health Services team within the Office of Supportive Housing has expanded to support the needs of currently and formerly homeless individuals and families. In addition to providing program management and supportive services for the County's permanent supportive housing programs, a dedicated outreach and engagement team helps to streamline the enrollment process to house clients more quickly. The team locates clients, collects required eligibility documentation, helps them secure Housing Authority vouchers, and provides a warm hand-off to the appropriate service provider for their program. In 2019, outreach services will expand to include a new multidisciplinary team, in partnership with Abode Services, which combines outreach workers and mental health professionals to engage individuals who are more challenging to reach with outreach services, connecting them with mental health services or medical services through the Valley Homeless Healthcare Program.

In the community, the Behavioral Health Services Department provides critical crisis response intervention through the Mobile Crisis Services Team, which launched in in 2018. This team trains and supports local police departments in effectively interacting with community members who may be in crisis, including people experiencing homelessness who may need assistance connecting with mental health or substance use services. When they encounter someone who may be in crisis, officers can call the team to help triage the situation, provide guidance over the phone, or send out a clinical team, if needed, to deescalate and resolve the situation. Currently, services are available through dispatchers located in both north and south county to quickly address issues as they arise. The department plans to expand access to this impactful program in 2019 to enable community members at large to receive support for friends and family in crisis.

Safe Parking

Each night, an estimated eight percent of people experiencing homelessness in Santa Clara County were sleeping in vehicles throughout the region. To address the needs of this population and growing concerns among other neighborhood residents, partners have created safe parking programs at various locations across the County, providing a creative short-term alternative to living on the streets. These programs offer safe locations to park, as well as pathways out of homelessness, connecting vehicular dwellers with social services and support to find stable housing.

Locations include Lots of Love in Mountain View, started by Reverend Brian Leong of Lord's Grace Christian Church, who formed the nonprofit organization Move Mountain View with members of his church to launch the program in 2018. Funded by the County of Santa Clara and the City of Mountain View, Lots of Love was initially started with space for four vehicles, and has since expanded to two sites with space for six vehicles. The City of Mountain View coordinates waste and sanitary services, and the Community Services Agency provides mobile showers, meals, and case management, as well as assistance accessing health care, benefits, and locating permanent housing.

In San José, the Office of Supportive Housing provides funding for a safe parking program with supportive services administered by nonprofit partner Amigos de Guadalupe. The program started with space for ten vehicles and has since expanded to three sites with space for twenty-five vehicles. Amigos de Guadalupe provides case management, housing search assistance, crisis counseling, a mobile health clinic, immigration legal services, employment search assistance, and after-school and summer programs for students. The City of San José also launched a safe parking program in 2018. Located at City-operated community centers and with supportive services provided by LifeMoves, the program will be significantly expanded in 2019.

In Morgan Hill, the Focus Safe Parking Program provides overnight parking, donated meals, and services for approximately 30 people experiencing homelessness in vehicles. Funded by the City of Morgan Hill, the site is overseen by Morgan Hill Bible Church and St. Catherine of Alexandria Church, and the Gilroy Compassion Center provides case management to help families move to permanent housing. Launched as a pilot program on July 2017, the Focus Safe Parking Program was made possible through collaboration and support by the Morgan Hill Police Department, County of Santa Clara, Morgan Hill Unified School District, and many faith-based and community organizations.

Additional advantages of this innovative approach include the following:

Connecting vehicular dwellers with services and support to regain housing

Vehicular dwellers are often harder to reach with outreach services because they are more mobile and difficult to engage within their vehicles. By providing a place to park without concerns about parking restrictions or safety, service providers are able to engage with those living in their vehicles to connect them with individualized support to regain permanent housing.

Addressing the shortage of emergency shelter and supportive housing

As the community works towards long-term, systemic solutions to end homelessness, supportive housing and services are extremely limited and prioritized for the most vulnerable. Safe parking programs offer an interim strategy, providing participants with case management to get them out of their vehicles and into permanent homes and assisting surrounding housed neighbors with any concerns.

- ▶ County of Santa Clara Office of Supportive Housing

LGBTQ-Friendly Temporary Housing

In Santa Clara County, persons identifying as lesbian, gay, bisexual, transgender or queer/questioning (LGBTQ) are significantly overrepresented in the homeless population – and their vulnerability is compounded by a lack of dedicated programs within the supportive housing system. To address this gap, more than 70 stakeholders, as well as LGBTQ youth and young adults, came together in 2018 to develop a 20-person temporary housing program for LGBTQ persons experiencing homelessness in Santa Clara County.

The collaborative effort leverages the strengths of each partner to support participants to return to stable housing in a safe and inclusive environment. The Office of LGBTQ Affairs brought the community together to give input and recommendations essential for creating a culturally-competent shelter space.

The City of San José provided critical neighborhood engagement, allowing the program to take over an underutilized city-owned building. The Office of Supportive Housing coordinates outreach to unsheltered populations, temporary housing providers, and agencies that serve the LGBTQ community, to bring in potential participants who are prioritized and referred through the County's Coordinated Assessment System. To support clients in obtaining permanent housing, the County funds targeted services provided by LifeMoves, including case management, housing navigation, and referrals to mental health and medical services. Key strategies of the program include:

Key Partners:

- ▶ City of San José
- ▶ County of Santa Clara Office of LGBTQ Affairs
- ▶ County of Santa Clara Office of Supportive Housing
- ▶ LifeMoves

LGBTQ-friendly design and operations promote safety and inclusivity

By engaging the community to understand the needs of LGBTQ persons experiencing homelessness, the partners have developed a program sensitive to their unique needs. Examples of this include: residents can self-identify their gender, a section of sleeping spaces are reserved for gender non-conforming and transgender individuals, single-stall restrooms and showers allow for privacy, and dedicated space is provided for self-administered medications.

Improving the supportive housing system's responsiveness to the needs of the LGBTQ community

Creating an LGBTQ-friendly program was just the first step in better serving people experiencing homelessness in the LGBTQ community, acting as a launching point for deeper system-wide changes. This includes implementing policies developed by the Office of Supportive Housing, in consultation with the Office of LGBTQ Affairs, across the supportive housing system to ensure safe and equal access to housing and services.

“LGBTQ-identified residents experiencing homelessness face unique challenges when working toward permanent housing. This partnership intentionally places LGBTQ people at the center, knowing that when we focus on them, we will broaden safety and access for all.”

Transitional Housing

Transitional housing programs provide time-limited housing for individuals and families experiencing homelessness and can offer a uniquely supportive environment—especially when strong partnerships are built with experienced service providers to fill critical gaps in the supportive housing system. For example, in Santa Clara County, youth who are pregnant or parenting may elect to enroll in a transitional housing program that fosters a built-in social network and parenting supports provided by agencies with deep expertise in working with youth experiencing homelessness. Other individuals or families fleeing intimate partner violence or sexual assault may seek out the security of housing with on-site services and trauma-informed programming with an agency that provides services to people fleeing abuse. Additionally, in Santa Clara County's competitive rental market, the search for housing for a client who is already enrolled in a permanent housing program can take weeks or months. When designed around shorter one- to three-month stays, transitional or interim housing programs offer stability while supporting the client during their housing search. Partners with deep experience serving these communities are able to tailor the design of transitional housing programs to best support clients in their transition to safe and stable permanent housing.

CONCLUSION

Through a multitude of innovative and strategic partnerships, Santa Clara County's supportive housing system provided shelter, emergency assistance, permanent housing, and supportive services to thousands of currently and formerly homeless individuals and families in 2018. Still, with more than 7,300 people experiencing homelessness and thousands more on the brink due to high housing costs and a lack of living-wage jobs, there is much progress to be made to achieve the community's goal of making homelessness rare, brief, and non-recurring.

Since launching the Community Plan to End Homelessness in 2015, the supportive housing system has continued to grow and improve its ability to serve the diverse population of people experiencing homelessness in Santa Clara County. Expanding the reach and capacity of the supportive housing system in 2018 was no exception. These efforts necessitated collaboration with a diverse array of partners – from affordable housing developers to build apartments, local governments to encourage development and fund projects and services in their

communities, homeless service providers to support clients to find and maintain stable housing, and essential County partners to fund and provide vital medical, behavioral health, and reentry services, among others. Combined and coordinated, these individual efforts leverage the expertise of each partner and maximize limited resources in the community. Collectively, these efforts resulted in 1,783 households moving from homelessness to housing in 2018 and an increase in affordable and homeless housing stock by 607 units.

A shared vision and commitment to strategic and mutually beneficial partnerships is at the core of the progress made in 2018. The County of Santa Clara appreciates the many stakeholders who contributed to this growth and looks forward to opportunities to further strengthen the supportive housing system through future collaboration. Maintaining and accelerating progress towards ending homelessness in Santa Clara County will require continued commitment to the community's shared goals and ever more partnerships to better serve the county's most vulnerable residents.

Appendix A: Defining Homelessness

Homelessness and housing instability take many forms, and these challenges affect individuals and families with a diversity of life experiences. To understand the scope of the community's need and to develop the right systemic responses, it is necessary to rely on clear definitions of "homelessness." This report primarily uses the following components of the definition of homelessness developed by the U.S. Department of Housing and Urban Development (HUD) for its Continuum of Care and Emergency Solutions Grants housing programs. Under this definition, a household who falls into any one of the following criteria is considered homeless:

- I. An individual or family who lacks a fixed, regular, and adequate nighttime residence, including households living outside, in cars, emergency shelters, transitional housing, and some short institutional stays;
- II. An individual or family who will imminently lose their primary nighttime residence; or
- III. An individual or family who is fleeing, or attempting to flee, domestic violence, dating violence, sexual assault, stalking, or other dangerous or life-threatening conditions that relate to violence against the individual or a family member.

This report also references the definition of homelessness used by the County Office of Education and the public school system. This definition includes a household that lacks a fixed, regular, and adequate nighttime residence, children under 18 years old waiting for foster care placement, and individuals and families who are living doubled up or in hotels.

Chronic Homelessness

HUD has defined a subset of households experiencing homelessness as "chronically homeless." These households are most likely to have intensive medical, mental health, and other service needs that cannot be met while they remain unhoused and are a priority population within supportive housing systems nationally and locally.

The definition of chronically homeless includes both a disability requirement and a length of homelessness component. Under this definition, a household who meets all of the following criteria is considered chronically homeless:

- I. A homeless individual with a disability, who lives in a place not meant for human habitation, a safe haven, or an emergency shelter;
- II. Who has been homeless and living in any of the situations described above continuously for at least 12 months or on at least four separate occasions in the last three years, as long as the combined occasions equal at least 12 months.

While a longer stay in an institution such as a jail, hospital, or drug treatment facility will not count as living in a homeless situation, institutional stays of fewer than 90 days do count as time spent homeless. If a family's head of household – generally an adult family member, but occasionally a minor who is the head of a family with no adults – is chronically homeless under this definition, then the entire family meets the definition of chronic homelessness.

^{xxxi} Code of Federal Regulations, Continuum of Care Program, Title 24, sec. 578.3. This report does not use Category 3 of HUD's homeless definition, which includes unaccompanied youth or families who are homeless under other federal definitions of homelessness.

Appendix B: Data Sources

The two most common methods for estimating the number of persons experiencing homelessness in a community are point-in-time counts and data collected by housing and services programs. This report draws on both of those methods to establish the scope and characteristics of homelessness in Santa Clara County, and each is described below.

Homeless Management Information System (HMIS)

The County of Santa Clara Office of Supportive Housing operates the community's HMIS, a countywide database used by the majority of programs providing housing or services for homeless populations within the county. Providers request consent from each person they serve to enter standard information into HMIS, including demographic information, services provided, and data about income and housing status. This results in a large set of data that includes nearly all individuals who had contact with outreach teams, emergency shelters, homeless housing programs, and other services.

Because HMIS is focused on service data, it does not include individuals who are currently homeless but are not accessing services. It also does not include persons who receive services or housing designed for survivors of domestic violence or human trafficking, as many programs providing those services are prohibited from entering information into HMIS for privacy and safety reasons. Most significantly, since the individuals in HMIS are limited to those who have received services, the total number of persons recorded as homeless in HMIS increases as the system serves more people.

To estimate the total number of persons experiencing homelessness over the course of a year using data from HMIS, communities use the number of persons who have spent at least one night in emergency shelter or transitional housing. As the size and capacity of the community's emergency shelter and transitional housing system increase, the total persons identified in HMIS as experiencing homelessness will also increase.

Homeless Census and Survey

Every two years, the County of Santa Clara and the region's fifteen cities conduct a Homeless Census and Survey. Trained volunteers tally the number of people observed living or sleeping outside at a single point in time and survey a sample of those counted. To cover the entirety of the county's extensive geographic area, the count occurs over the course of two days during the month of January, with roughly half of the county enumerated on each day. Data is also collected from emergency shelter and transitional housing programs, as households in shelter and temporary housing are considered homeless for purposes of the count.

The Homeless Census and Survey employs consistent methods from year to year, providing a useful data set for tracking changes in the homeless population. Because the count enumerates people who are currently living outside or in vehicles, including those who may not engage in services, it incorporates a population that may not be represented in HMIS data.

Notably, a point-in-time count will only provide a snapshot of homelessness on the nights selected for the count, which is not easily extrapolated to a total annual number of people who experience homelessness. This also means that the number of individuals counted each year is affected by weather conditions, the number of shelter beds open on the night of the count, natural disasters, and other temporary conditions that cause fluctuations in the visibility or size of the homeless population. It is expected that point-in-time methods will undercount individuals and families who shelter in locations that are not visible to volunteer teams, including vehicles, garages, and other structures not built to be lived in.

Appendix C: Measuring Success

To ensure that each component of Santa Clara County's supportive housing system effectively advances the goal of ending homelessness, system stakeholders have identified standard, data-based indicators of success. These indicators track the system's ability to help individuals and families permanently exit homelessness by obtaining and retaining housing.

These metrics are based on data entered by the community's housing and shelter programs into the Homeless Management Information System (HMIS), the primary community-wide database for collecting information about homeless housing and services, to evaluate the overall success and impact of the community's response to homelessness. See Appendix B: Data Sources for more information about the HMIS.

Permanent Housing Retention

How successful are the community's housing programs at helping individuals with disabilities who exit homelessness to remain in permanent housing situations for at least 12 months, while they continue to receive support from the housing program?

Program type: Permanent Supportive Housing

Universe: All individuals served by the program during the measurement period who were housed with program support at least 12 months ago.

Measure: The percentage of the universe who remained housed for at least 12 months.

Obtained Permanent Housing

How successful are the community's housing and shelter programs at helping individuals experiencing homelessness to obtain permanent housing?

Program type: Emergency Shelter, Transitional Housing, Rapid Rehousing

Universe: All individuals served by the program who exited the program (stopped receiving services) during the measurement period.

Measure: The percentage of the universe who were in a permanent housing situation when they exited the program.

Returns to Homelessness

How successful are the community's housing and shelter programs at ensuring that individuals who exit homelessness do not return to homelessness once they stop receiving services?

Program type: Emergency Shelter, Transitional Housing, Rapid Rehousing, Permanent Supportive Housing

Universe: All individuals served by the program who exited the program (stopped receiving services) two years prior to the measurement period, and were in a permanent housing situation when they exited.

Measure: The percentage of the universe who were served by another homeless housing or services program in Santa Clara County's HMIS within 2 years of the date they exited the program to a permanent housing situation.

Appendix D: Local Funding for Supportive Housing and Homeless Services

Cities are key partners in the movement to end homelessness and implement a variety of strategies, from local ordinances supporting housing affordability to funding for services and supportive housing development. The table below provides an overview of funding commitments made by cities within Santa Clara County for Fiscal Year 2017-2018.

City	Permanent Housing Capital Funding	Permanent Housing Services Funding	Transitional Housing and Emergency Shelter	Homelessness Prevention
Cupertino	\$4,172,000	N/A	N/A	\$32,488
Gilroy	N/A	\$102,500	\$20,070	\$34,465
Milpitas	\$120,000	N/A	N/A	\$38,283
Morgan Hill	\$750,000 ^{xxxiv}	N/A	N/A	N/A
Mountain View	N/A	\$125,000	N/A	N/A
Palo Alto	\$220,000	\$206,184	N/A	\$341,400
Santa Clara	\$544,333	N/A	\$139,423	\$100,000
Sunnyvale	N/A	\$338,000	\$31,000	\$10,000

^{xxxiv} This funding was committed in Fiscal Year 2018-2019.

LETTER FROM THE COUNTY

EXECUTIVE

In Santa Clara County's current housing crisis, safe and affordable housing is out of reach for many, especially those with the fewest resources, including the elderly and persons with a disabling condition. As a result, thousands of individuals and families experience homelessness in our county each year. The County, in collaboration with our city, nonprofit, business, and philanthropic partners, is dedicated to making homelessness rare, brief, and non-recurring for residents. The first of ten annual reports, this document highlights countywide efforts to prevent homelessness before it occurs, strengthen the supportive housing system to better serve those with the highest needs, and increase the community's stock of affordable housing.

As demonstrated in the following pages, our community has made significant progress toward the goals we set in 2015 when we collectively developed and committed to the Santa Clara County Community Plan to End Homelessness. Collaboration is essential to reaching our community goals; we must continue to build upon the strong partnerships that have been critical to our successes thus far.

We thank Destination: Home for its leadership in generating financial and community support for programs serving homeless individuals and families. We thank the City of San José for its commitment to funding both the development of supportive housing and services to support those most in need, highlighted by their multi-million dollar investment in Second Street Studios, the largest permanent supportive housing development in our county to date. We thank the Santa Clara County Housing Authority for its commitment of housing subsidies dedicated to supportive housing systems, such as 134 permanent subsidies for the homeless individuals moving into Second Street Studios this fall. And we thank the outreach workers, case managers, shelter staff, landlords, and hundreds of other partners who work every day toward the goal of preventing and ending homelessness in our county.

Thanks to the deep commitment of leaders from the County and its city, nonprofit, business, and philanthropic partners, our community has built far more than a continuum of services for homeless individuals — we have built a movement to end homelessness. As we look back at all that was accomplished in 2017, we are confident that our collective momentum will continue to push forward collaborative efforts to house those in our community who experience homelessness.

Sincerely,

Jeffrey V. Smith, M.D., J.D.
County Executive Officer
County of Santa Clara

Miguel Marquez, M.P.P., J.D.
Chief Operating Officer
County of Santa Clara

EXECUTIVE SUMMARY

Each night, thousands of Santa Clara County residents face homelessness. Families with children, seniors, individuals with disabilities, veterans, and youth are all represented in the county’s diverse homeless population, with nearly three-quarters going unsheltered – sleeping outside, in cars, or other places not meant for human habitation. Despite the prosperity associated with the region, a lack of affordable housing development and difficulty finding living-wage employment in Santa Clara County has resulted in many economically vulnerable households falling into homelessness, and countless more on the edge.

Data shows that for most, homelessness will be a brief and one-time occurrence, but for some it can last for years or become a repeating cycle. Often individuals who are homeless for longer periods of time make frequent use of emergency medical and psychiatric care, or get caught up in the justice system, resulting in high cost to the public. *Home Not Found*, a study of the cost of homelessness in Santa Clara County, reported that the County and service providers spend more than \$520 million per year on such services.

In 2015, the community came together to create a roadmap to guide their efforts to end homelessness. Coordinated by the County of Santa Clara Office of Supportive Housing and nonprofit partner Destination: Home, the resulting Community Plan to End Homelessness set an ambitious goal of 6,000 new housing opportunities, and identified strategies to help the community achieve this shared vision. The community efforts to date represent significant progress toward these goals.

Building Affordable Housing

Responding to the high level of need for affordable housing and the desire to efficiently utilize scarce resources, the County has prioritized funding and development of housing for residents experiencing homelessness and extremely low-income households. Creating affordable housing for these priority populations requires substantial cooperation between the County of Santa Clara, its many agencies, and a range of municipal, nonprofit, philanthropic, and community partners. Key examples of the collaboration necessary to stably house the county’s most vulnerable residents include:

- **Second Street Studios**, an innovative partnership between the County, the City of San José, and the Santa Clara County Housing Authority will result in a new service-enriched apartment community in September 2018. The development will improve the health and housing stability of 134 disabled individuals who have experienced long-periods of homelessness.
- **2016 Measure A**, the recently passed \$950 million Affordable Housing Bond, will help to fill some but not nearly all of this need, by providing funding for approximately 4,800 units of affordable housing. The County has approved funding for six developments with housing designated for households exiting homelessness, and is working to support more than 100 additional developments over the next ten years.

[†]U.S. Department of Housing and Urban Development, The 2017 Annual Homeless Assessment Report (AHAR) to Congress Part 1: Point in Time Estimates, Available at: <https://www.hudexchange.info/resources/documents/2017-AHAR-Part-1.pdf>

[‡]The universe for this measure (1,681 clients) includes all clients served in a permanent supportive housing program who were housed at least 12 months prior to the end of 2017. The universe is significantly lower than the total system capacity (2,846 households) because it does not include all clients served.

Progress Toward Goal of 6,000 New Housing Opportunities

Santa Clara County's Supportive Housing System

Affordable housing is a critical tool of the supportive housing system in Santa Clara County, but it must be complemented by individualized services to help clients maintain stable housing and rigorous data evaluation to improve outcomes for families and individuals experiencing homelessness. Santa Clara County's supportive housing system provides a continuum of programs and services to meet the needs of the community's most vulnerable residents, including:

- **Homelessness prevention programs** help individuals and families on the verge of homelessness to remain housed and avoid extended shelter or transitional housing stays.
- **Targeted outreach programs** engage with people experiencing homelessness, especially the more than 5,000 county residents living in vehicles, encampments, and other public spaces.
- **Emergency shelters** provide a temporary place to stay, access to services, and other basic needs, for up to 1,146 people across the county each night.
- **Transitional housing programs** offer time-limited housing and services for up to 610 households at a time and are well-suited for populations such as youth or survivors of domestic violence, who may benefit from increased social supports and intensive onsite services.
- **Rapid Rehousing programs**, with a capacity to serve 619 households at a time, quickly move families and individuals into housing and provide financial assistance and services to help households stabilize, increase income, and eventually take over the cost of their rent. Of clients leaving the program in 2017, 72% had obtained permanent housing.

- **Permanent supportive housing programs** couple stable, long-term housing with wrap-around supportive services, such as case management and access to physical and behavioral healthcare, for up to 2,846 households at a time. Of those housed in permanent supportive housing programs by 2017, 90% of clients remained stably housed for at least 12 months.
- **Coordinated Assessment System**, which referred 1,401 households to housing programs in 2017, matches individuals and families experiencing homelessness with the county's transitional and permanent housing resources, and ensures that the community is serving those with the highest needs.

Obtained Permanent Housing

(884 of 1,232) of clients who exited rapid rehousing programs in 2017

Permanent Housing Retention

(1,205 of 1,343) of clients housed in PSH between July 2011 and the end of 2016[†]

Innovative — and Cost Effective — Housing Programs

Though the County offers an array of programs and services, current capacity cannot meet the need of the county's significant homeless population. To efficiently utilize the limited resources available to assist individuals and families experiencing homelessness, the County seeks to target housing resources and close service gaps for its most vulnerable residents. Programs and strategies implemented by the Office of Supportive Housing and its partners include:

- **Re-envisioning the Community's Approach to Preventing Homelessness** — The Homelessness Prevention System Pilot brings together a network of community partners to provide flexible financial assistance and resources for households in crisis, targeting support to families and individuals most at risk of losing their housing and preventing them from entering the homeless system.
- **Facilitating Public Safety and Justice Housing Services** — County programs enhance public safety by helping homeless individuals overcome past criminal history and find safe and stable housing upon release, allowing them to reintegrate and contribute to the community.
- **Supporting Housing Stability to Promote Family Reunification** — The Bringing Families Home program, a collaboration between the Office of Supportive Housing and the Social Services Agency's Department of Family and Children Services, helps families involved in the child welfare system to attain housing stability and reunify.

These innovative programs, and many others that have been implemented or are in development, demonstrate the County of Santa Clara and its partners' commitment to working strategically and collaboratively to ensure that homelessness is rare, brief, and non-recurring. To achieve the collective goal of 6,000 new housing opportunities for individuals and families experiencing homelessness, the community must shift from relying on the private market to building enough affordable housing to meet the need in Santa Clara County. The Office of Supportive Housing is a leader in this movement, working across the region in a successful Collective Impact framework, as no one entity can address the issues of homelessness and poverty alone. As the many initiatives already in progress show, a community-wide effort to end homelessness requires the cooperation and collaboration of a range of stakeholders from our public/private sectors, including cities, state and county agencies, corporations, philanthropy and nonprofit partners.

HOMELESSNESS IN SANTA CLARA COUNTY

Homelessness affects thousands of Santa Clara County residents each year. Individuals and families, adults and children, people with jobs, and those with severe disabling conditions all face challenges to finding and retaining safe and stable housing. Many live without habitable shelter, on streets, in parks, in vehicles, or in sheds or abandoned buildings, while others spend their nights in the community's emergency shelters and transitional housing programs. (See Appendix A: Defining Homelessness for more information about the definitions of homelessness used in this report.)

Home Not Found, a 2015 study on the costs of homelessness in Santa Clara County, identified 46,225 residents who experienced homelessness over the course of the year in 2012 and received some form of County medical, behavioral health, or other social services, or had contact with the criminal justice system.^{i,ii} This population represents some of the county's most vulnerable residents, in no small part due to the instability, stigma, loss of resources, and physical vulnerability that accompany the experience of homelessness. The *Home Not Found*

study found that the majority of county residents with experience of homelessness between 2007 and 2012 had used the County of Santa Clara's medical and mental health services or had interacted with the criminal justice system, and many had contact with multiple County of Santa Clara departments or services.

The role of Santa Clara County's supportive housing system is to implement the most effective strategies to assist individuals experiencing homelessness in overcoming the barriers keeping them from stable housing, and to make homelessness rare, brief, and non-recurring across the county.

46,225 residents experienced
homelessness over the course
of the year in 2012

ⁱ The study identified homeless individuals based on records maintained by the County of Santa Clara Social Services Agency, the Santa Clara Valley Health and Hospital System (including Valley Medical Center and the Behavioral Health Services Department), the Santa Clara County Housing Authority, and the County of Santa Clara Criminal Justice Information Control, as well as information in the Homelessness Management Information System (HMIS), the community's central database for homeless housing and service providers. Due to variations in data collection and definitions of homelessness in the community, the study included some individuals who were couch surfing, without a permanent place to sleep, as well as individuals who meet the more strict federal definition of homelessness. See *Home Not Found: The Cost of Homelessness in Silicon Valley*, Methods Appendix pages 49-52 for more information on study methodology.

Patterns of Homelessness

The *Home Not Found* study analyzed six years of data from County homeless, health and justice system service databases, revealing patterns in duration, County service usage, and public cost.

Duration

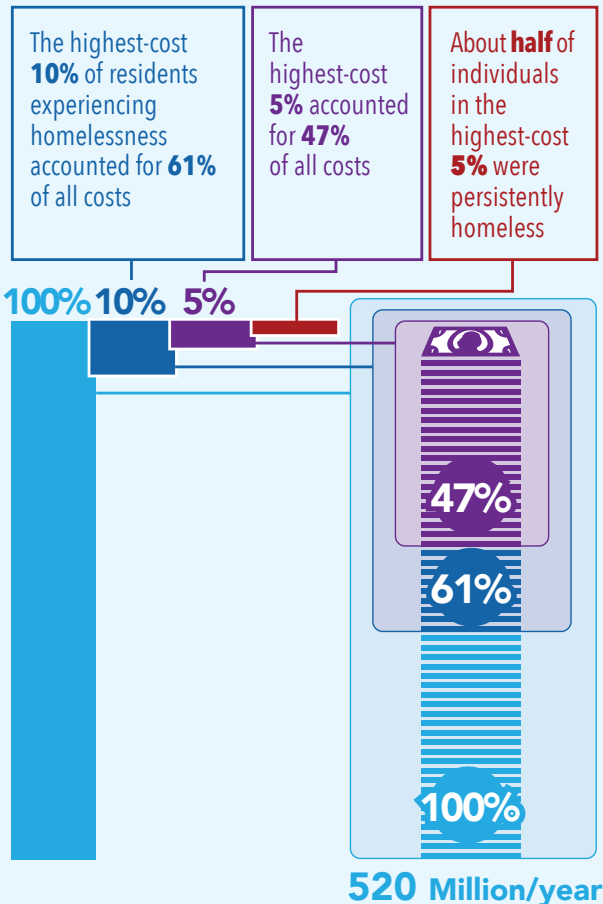

Out of the more than 100,000 people who experienced homelessness from 2007 through 2012, during those six years:

While most individuals were able to make lasting exits from homelessness after shorter episodes, some fell into longer episodes or patterns of homelessness. In an average month from 2007 to 2012:

On average, Santa Clara County service providers spent \$520 million per year providing services for residents in years when they experienced homelessness during the six years covered by this study, with much of the costs accrued by a small number of frequent users. In 2012:

Service Usage and Public Cost

Among the individuals in the *Home Not Found* study population, County service usage was common:

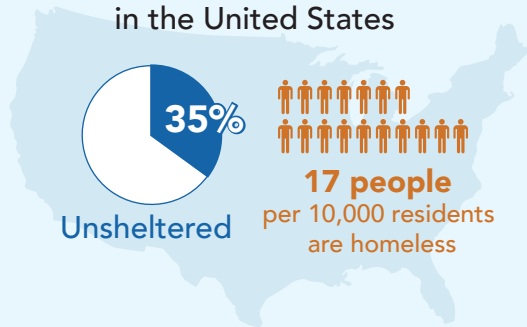

Though the type of service usage and costs varied, the study found that mental illness, substance abuse, incarceration, and persistent homelessness all had a strong impact on overall public costs.

Santa Clara County Homeless Census & Surveyⁱⁱⁱ

553,742 Homeless^{iv} in the United States

134,278 Homeless^{iv} in California

7,394 Homeless^{iv} in Santa Clara County

Homeless Population Change Over Time

Every other year in January, the County of Santa Clara Office of Supportive Housing and the local cities coordinate a countywide point-in-time count of people experiencing homelessness. This biennial Homeless Census and Survey provides the best data available on the size and characteristics of the county's homeless population over time, including numbers of people sleeping outside, in vehicles, or in structures not intended for human habitation (unsheltered), and in emergency shelters and transitional housing programs (sheltered). For more information about the Homeless Census and Survey, see Appendix B: Data Sources.

A Crisis in Context

Santa Clara County's housing and homelessness crisis is a local instance of a national epidemic, which is particularly acute in California's metropolitan areas. As of January 2017, local point-in-time counts similar to the Homeless Census and Survey reveal that the state of California is home to a quarter of the nation's homeless population. More than two-thirds of people experiencing homelessness in California are unsheltered – over twice the national rate.^{iv}

How Santa Clara County's Homeless Population Compares to Other Communities^{v,vi}

Causes of Homelessness

In Santa Clara County, as in much of California and in many high-cost urban areas around the country, homelessness and housing instability are closely tied to the region's soaring housing costs and economic stagnation for low-income residents.

The Rental Market and Lack of Income are Primary Barriers to Regaining Housing

^{vii} Respondents were asked to identify the barriers preventing them from obtaining housing. Many identified more than one barrier and all responses were recorded.

THE HOUSING GAP

In Santa Clara County, community-wide efforts have led to a number of robust and successful initiatives, but rates of homelessness remain persistently high. Although the county is among the most prosperous regions in the country, statewide economic trends and a severe housing shortage have left fewer and fewer residents able to afford the high cost of housing. Despite tremendous economic growth overall, median renter income in California declined by seven percent from 2000 to 2014. At the same time, annual median rent increased by 24 percent, overwhelming many renter households' purchasing power in the housing market.^{viii}

Though Santa Clara County sits at the epicenter of the nation's technology sector, all residents have not shared in the wealth generated by this sector. For low-income households, decades of slow-paced housing development combined with stagnant wages and swiftly rising rents have displaced many and created an exceedingly tight rental market for those who have remained.

These economic and housing market trends have been challenging for many residents and have been particularly catastrophic for those lowest-income households without a financial safety net. In response, the County of Santa Clara is focused on building a supportive housing system to serve these most vulnerable residents. Priority populations for the County include those who are most impacted by the lack of affordable housing – people experiencing homelessness, disabled individuals, and extremely low-income, elderly, and fixed-income households. For these residents, safe and affordable housing is often a critical component to alleviate physical and mental health conditions, maintain housing stability, and mitigate the effects of poverty.

^{viii} California Housing Partnership Corporation, "Confronting California's Rent and Poverty Crisis: A Call for State Reinvestment in Affordable Homes." April 2016. Available at: <https://1p08d91kd0c03rlxhmhtydpr-wpengine.netdna-ssl.com/wp-content/uploads/2016/04/State-Housing-Need-2016.pdf>

^{ix} Extremely low-income households comprise many of the county's most vulnerable renters, including low-wage service workers, and older adults and people with disabilities living on fixed incomes.

^x Fair market rent is the amount that the Department of Housing and Urban Development (HUD) calculates would be needed to pay rent and utilities for a modest, privately owned, and safe rental unit of that size. California's Median Rent Increased 24% while Median Renter Income Declined 7% from 2000 - 2014^{viii}

Source: California Housing Partnership Corporation analysis of 2000-2014 Census and American Community Survey data. Median renter income and rent from 2001-2004 and 2015-2016 are estimated trends. Median rent and median renter income are inflation adjusted to 2014 dollars.

In 2017, annual income for an extremely low-income household earning 30 percent of the Area Median Income (AMI) in Santa Clara County was:^{ix}

Annual Income for Extremely Low Income Renters

Housing costs in Santa Clara County, however, far exceed what would be affordable for extremely low-income households:

2017 Fair Market Rent^x

Average monthly rent^{xi} in San José in 2017

An affordable unit for an extremely low-income renter – in which the household pays no more than 30 percent of their income for housing costs – in Santa Clara County would be:

Affordable Rent for Extremely Low Income Renters

Not All Housing is Created Equal

Addressing the affordable housing crisis for the county’s most vulnerable residents is no small task. In Santa Clara County, the need for more affordable housing is extremely pressing for all but the highest-income households, and demand for housing for extremely low-income renters is most acute. These households face additional challenges to housing stability, as a larger proportion of their income often goes to rent, and there is a disproportionate lack of affordable housing options at their income level.

This deficiency is nothing new, however. In 2005, a San Jose State University study found that unmet need for affordable housing development for extremely low-income renters far surpassed that of households with higher incomes. The report predicted that an additional local investment of \$3.8 billion would be required to create housing for just the county’s extremely low-income households from 2005 to 2024.^{xii}

Housing Need and Funding 2005-2024

	ELI (0-30% AMI)	VLI (31-50% AMI)	LI (51-80% AMI)	MOD (81-120% AMI)	Total
Gross/Total Need	42,483	12,978	13,260	22,187	90,908
Planned Production	8,119	10,148	16,237	19,089	50,616
Unmet Need	34,364	2,830	-	3,098	40,292
Funding Gap*	\$3,780,040,000	\$198,100,000	\$0	\$154,900,000	\$4,133,040,000

*The funding gap is the additional local subsidy required over the next 20 years to develop a sufficient number of affordable units to meet the unmet need.

Source: *Housing Silicon Valley: A 20 Year Plan to End the Affordable Housing Crisis* (February 2007), SJSU prepared for Local Initiatives Support Corporation

Despite this urgent need, investment in and development of affordable housing for these most economically vulnerable households has not kept pace with the current or projected future need, even while development of housing for higher income households has exceeded demand. Through the state-mandated Regional Housing Need Allocation (RHNA) process, each region projects the total number of housing units necessary to meet the needs of people of all income levels in each county and city. Progress toward these targets is tracked annually based on permits issued.

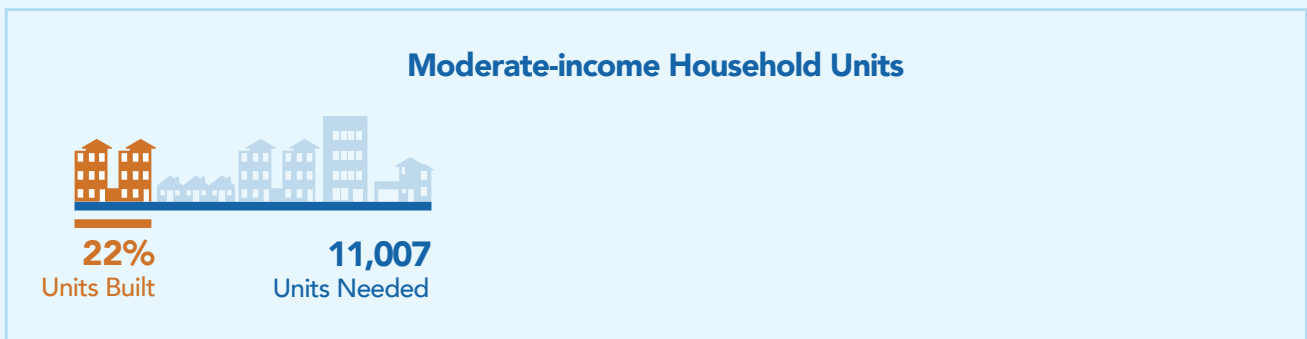

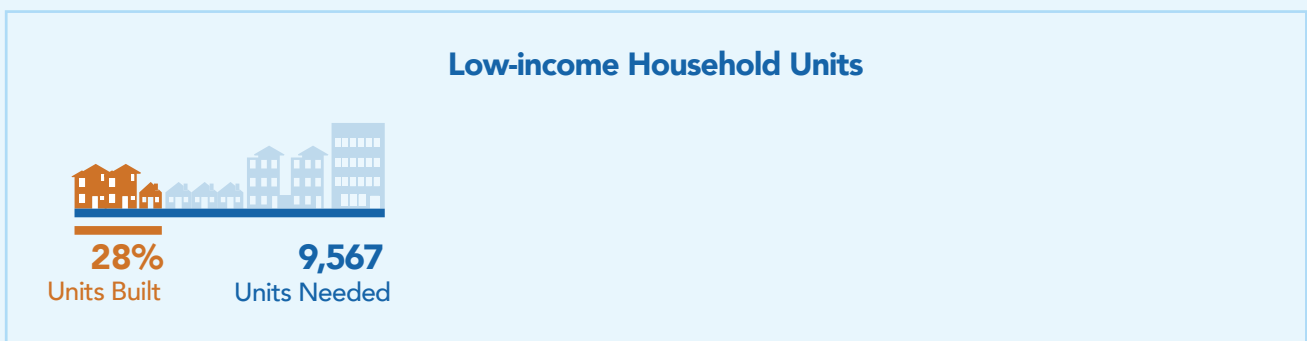

Zero cities in Santa Clara County met their RHNA target for Very Low Income housing and the county as a whole produced just 27% of the goal. In contrast, ten cities exceeded their target for housing for households earning above moderate incomes, and the county as a whole met 139 percent of the goal.

The trend of overproducing housing for higher-income households, while neglecting development for moderate-, low- and very low-income households, has continued under the county’s new RHNA projections released for 2015-2023.^{xiii}

Building Supportive – and Affordable – Housing in Santa Clara County

Currently, the county's supportive housing system relies heavily on the private market for available housing units, while the system provides rental subsidies to tenants to maintain affordability. This is not enough. An effective and sustainable supportive housing system requires many more units than are available in the private market, necessitating development of significant additional housing, and the cooperation of local, state, and federal partners.

To achieve this goal, the County of Santa Clara, city governments, and residents must make a deliberate shift in affordable housing policy, creating a movement to fund and develop the thousands of units and hundreds of development projects necessary to meet the needs of county residents of all income levels. In 2016, voters took a first and ambitious step toward this goal by passing bond Measure A, investing \$950 million in affordable housing development over the next 10 years. Most of the funding will go toward the County of Santa Clara's key priorities of building housing for extremely low-income households, including permanent housing for people experiencing homelessness.

While the 2016 Measure A Affordable Housing Bond (Housing Bond) will fund development of many new homes, the bond funds alone are not enough to fill the gap left by the dramatic decrease in state affordable housing funding since FY 2008-2009.^{xvi} Moreover, while more housing is being built, the system must also meet the basic needs of the county's homeless population, which is overwhelmingly unsheltered. Temporary housing interventions, including emergency shelters and transi-

tional housing, that seek to move people experiencing homelessness quickly into permanent housing, are a critical component of the supportive housing system. Meeting the current demand for temporary shelter and housing requires increased capacity and resources as well.

Along with its many partners in the public, private, and philanthropic sectors, the County of Santa Clara seeks to continue the momentum from the Housing Bond by further investing in housing that will support the county's most vulnerable residents achieve safe, affordable, and stable housing. Each step in the process relies on the collaboration of these stakeholders. Cities must first approve, and local communities must embrace and accept, new developments and the residents they will serve. Developers must engage the community in the development process, and service providers must work to support tenants to become an integrated part of the community.

This report seeks to highlight the many efforts the County and its partners are undertaking to support the county's most vulnerable residents and achieve the most impact with available resources. Poverty, income inequality, and affordable housing are among the biggest challenges facing residents of Santa Clara County and no single entity has the resources or authority to address these problems alone. As the many innovative and effective initiatives described in this report illustrate, community-wide solutions to ending homelessness require the cooperation and collaboration of a range of stakeholders, including cities, state and county agencies, and nonprofit partners.

^{xvi} California Housing Partnership, "Confronting California's Rent and Poverty Crisis: A Call for State Reinvestment in Affordable Homes." April 2016. Available at: <https://1p08d91kd0c03rlxhmhtydpr-wpengine.netdna-ssl.com/wp-content/uploads/2016/04/State-Housing-Need-2016.pdf>

A MOVEMENT TO END HOMELESSNESS

The County of Santa Clara and its city, nonprofit, philanthropic, and other community partners share a vision for Santa Clara County in which homelessness is rare, brief, and non-recurring for all residents. This collective mission to prevent and end homelessness drives innovation and investment across public and private sectors, and is outlined in detail in the Community Plan to End Homelessness in Santa Clara County.

The Community Plan to End Homelessness in Santa Clara County

In 2014, the County of Santa Clara Office of Supportive Housing and Destination: Home, a public-private partnership dedicated to collective impact strategies to end homelessness, convened a series of community summits to develop a coordinated strategy to address homelessness across the county. Representatives of local cities, nonprofit advocacy groups, service providers, philanthropic organizations, elected officials, universities, and people with lived experience of homelessness participated in the planning process. The resulting Community Plan to End Homelessness has been formally endorsed by Santa Clara County's Board of Supervisors, Santa Clara County Housing Authority, Santa Clara Valley Water District, the majority of the county's 15 cities, and other stakeholder organizations.

The plan provides a roadmap for the community's work to end homelessness from 2015 to 2020, establishing goals and strategies within a three-part framework:

1

Disrupt Systems

The Community Plan calls for disruptive strategies and innovative programs that transform the systems related to housing homeless people.

- Deepen partnerships between local governments, nonprofit service providers, and the business sector to improve coordination
- Use data to implement outcomes-based decisions about the most effective programs and structures to meet community needs
- Coordinate housing and services through the Coordinated Assessment System to connect each individual with the right housing solution
- Ensure that all individuals have a plan for housing upon exit from criminal justice or medical institutions and are not discharged into homelessness

Above photo: A PATH outreach worker engaging with a community member experiencing homelessness. Photo by Jeff Bomberger

2 Build the Solution

To end homelessness, it is essential to secure the full amount of funding needed to provide affordable housing and services to those who are homeless and those at risk of homelessness.

The Community Plan sets a goal of 6,000 new affordable housing opportunities dedicated to people experiencing homelessness, including new physical homes and apartments and new rental subsidies. Tenants in each of these new housing opportunities will have access to case management, health care, employment programs, and other services to ensure they are able to remain housed.

3 Serve the Person

The Community Plan recognizes the need for client-centered strategies that target resources to each specific individual or household based on their unique and different needs. Goals under this section focus on increasing the system’s capacity to serve the needs of veterans, children and youth, families, people with disabilities who have experienced long-term homelessness, and other specific subpopulations.

Since implementation of the Community Plan began in 2015, the supportive housing system has helped 5,154 people return to safe and permanent housing.

The programs and initiatives described in this report represent significant progress toward Community Plan goals. The community’s stock of affordable housing dedicated to people exiting homelessness has increased by over half (see **Closing the Housing Gap** on page 22 for more information about progress toward 6,000 new housing opportunities). Innovative partnerships with the community’s healthcare, criminal justice, child welfare, and education systems are in place to disrupt cycles of homelessness for the county’s most vulnerable residents (see **Supportive Housing Innovations** on page 29 for

more information about cross-system partnerships). As it grows to meet the community’s need, the supportive housing system will continue to focus on systemwide coordination and improved crisis response for all families experiencing homelessness (see **Crisis Response System** on page 47 for more information about system coordination and shelter programs).

SUPPORTIVE HOUSING SYSTEM MAP

Homelessness Prevention

- Helps individuals and families who are about to lose their housing to remain housed where they are or move to new permanent housing
- Acts as an access point to the Coordinated Assessment System

SEE PAGE 48

Outreach

- Engages with people experiencing homelessness on the street, in parks and other public spaces, and in vehicles
- Acts as an access point for the Coordinated Assessment System and for emergency shelter
- Locates people in the Coordinated Assessment System who have been referred to a housing program

SEE PAGE 49

Coordinated Assessment System

- Acts as a front door to the community's housing resources
- Matches people experiencing homelessness to the community's transitional housing, rapid rehousing, and permanent supportive housing programs

SEE PAGE 49

Emergency Shelter

- Provides a safe place to sleep for people experiencing homelessness
- Provides meals, showers, other basic needs, and connections to other community resources
- Acts as an access point to the Coordinated Assessment System

SEE PAGE 52

Permanent Supportive Housing

- Helps individuals and families with disabilities maintain permanent housing through long-term rental subsidies, connections to medical and behavioral health care, and other services.

SEE PAGE 30

Transitional Housing

Provides temporary housing and site-based services for people experiencing homelessness, a program model most effective for specific subpopulations, such as:

- Youth, especially Parenting Youth
- Veterans
- Homeless individuals and families enrolled in a permanent housing program and searching for apartments

SEE PAGE 54

Rapid Rehousing

- Provides supportive services and financial assistance to people experiencing homelessness
- Helps individuals and families obtain permanent housing and increase income so that they can remain housed independently.

SEE PAGE 38

Parkside Studios. Photo by Jeffrey Peters.

CLOSING THE HOUSING GAP

For most individuals and families experiencing homelessness, affordable housing is fundamental to achieving long-term housing stability. Since implementation of the Community Plan to End Homelessness began in 2015, Santa Clara County has made significant progress toward the central goal of 6,000 new affordable housing opportunities for individuals and families experiencing homelessness.

Under the Community Plan, new housing opportunities include both new housing stock and rental subsidies to assist households in exiting homelessness. This can take the form of new affordable housing development, commitments by property owners of existing housing for use by households exiting homelessness, and new funding streams to increase the community's capacity to subsidize rent payments for extremely low-income individuals and families.

Progress toward this goal is made possible by ongoing coordination of resources, expertise, and political will by city governments, County agencies, the Santa Clara County Housing Authority, community-based organizations, affordable housing developers, private funders, and other partners. Leaders have stepped up across the community with a shared commitment to building strong relationships, actively seeking out opportunities to work together toward common goals and generating a culture of collaboration that defines a growing movement to end homelessness in Santa Clara County.

Progress Toward Goal of 6,000 New Housing Opportunities

Santa Clara County Housing Authority Referral Programs

The Santa Clara County Housing Authority is a key partner in achieving the community’s goal. Since 2015, the Housing Authority has dedicated 1,225 additional rental subsidies for households exiting homelessness through its Chronically Homeless Direct Referral Program, which serves individuals and families who have been homeless for a year or more and have a disabling condition (see Appendix A: Defining Homelessness for more information about chronic homelessness).^{xvii}

In 2018, the Housing Authority and the County will launch the Special Needs Direct Referral program to serve individuals and families with medical or behavioral health needs, who may not meet the federal definition of “chronically homeless.” Permanent supportive housing programs use Housing Choice vouchers to subsidize client rent, in combination with case management and supportive services funded through other sources. The Chronically Homeless and Special Needs Direct Referral Programs will provide increased supportive housing opportunities for the county’s most vulnerable individuals and families experiencing homelessness.

^{xvii} The Housing Choice Voucher Program (formerly known as Section 8) provides rental subsidies funded through the U.S. Department of Housing and Urban Development and administered by local housing authorities. Project-based vouchers subsidize rent in specific housing units, while Housing Choice vouchers are allocated to eligible households and can be used in any unit in the community. HUD-VASH vouchers combine HUD rental assistance with case management and medical services provided by the Department of Veterans Affairs.

Rendering of Second Street Studios

Second Street Studios: A First-Rate Collaboration in Building Supportive Housing

“The design is very conducive to meeting people,” said Michael Santero, Director of Asset Management at First Community Housing. “We want the space to be an asset to the client. We’re doing everything we can to keep them housed and engaged in services.”

Drive up South First Street towards downtown San José, and you might mistake the construction for one of many condo complexes springing up across Santa Clara County. In fact, one of the region’s most innovative affordable housing developments is currently underway. Set to be completed in September 2018, Second Street Studios will provide 134 units of permanent supportive housing for some of Santa Clara County’s most vulnerable residents.

Beginning in 2016, the County of Santa Clara Office of Supportive Housing enlisted several key partners, including the City of San José, the Santa Clara County Housing Authority, housing developer First Community Housing, property manager John Stewart Company, and supportive service provider Abode Services, with the goal of pioneering a new model for building permanent supportive housing. Although the partners were not unfamiliar to each other, in past collaborations there had been an uneasy tension between local governments working to create more affordable housing, developers seeking feasible projects, and service providers who serve a high-needs population. The Second Street Studios project challenged these partners to engage and collaborate in new ways.

Strong Commitment Builds Strong Communities

Like any successful partnership, the Second Street Studios project has required significant commitment and buy-in from all involved: the City of San José committed over \$14 million in funding for the project; First Community Housing joined the partnership because it is committed to building high quality housing that meets the needs of the local community; the Santa Clara County Housing Authority will provide rental subsidies for all 134 units, allowing residents to stay as long as they have need; the County Office of Supportive Housing will provide ongoing funding for supportive services for clients; and, finally, Abode Services and the John Stewart Company have committed to locate staff on-site to provide wrap around support to ensure that residents are able to maintain their housing.

Housing First, a Client-Centered Model that Works

At the center of Second Street Studios will be its future tenants — 134 chronically homeless individuals, a vulnerable subset of the homeless population who have a disability and have been living on the streets for a year or more. (See Appendix A for more information about chronic homelessness.) Studies show that stable housing is critical to successful outcomes for chronically homeless individuals, and the Office of Supportive Housing and its Second Street Studios partners have seen first-hand how supportive housing can positively impact clients.

Embracing a Housing First philosophy, which quickly places people in housing and then provides supportive services, Second Street Studios' partners and services are focused on the stability and well-being of each client. From inception, Second Street Studios was envisioned as a safe, nurturing space for residents. The building was designed to minimize isolation while increasing opportunities for positive social interactions. There are shared community spaces, a green terrace for gardening, and a computer lab with free wireless internet. To foster a sense of community, Abode Services, with funding from the County, will offer client-centered programming and services focused on social interactions and celebrating successes. While moving in to permanent housing may be a transition for the new residents, many of whom have lived on the streets for years, the project has been a transformational process for the community and the many partners involved.

“We look at this as a team, and we’re committed to providing an environment that ensures residents are receiving key supportive services,” said Kathleen Kiyabu, Director at John Stewart Companies. “This is hard work, probably the hardest job I’ve ever done. It’s a job that needs to be done, and it’s the right thing to do.”

2016 Measure A Affordable Housing Bond

In November of 2016, Santa Clara County voters approved a \$950 million Affordable Housing Bond. The County of Santa Clara and its partners have moved quickly to utilize the bond funds, which are projected to fund 120 new affordable housing developments over ten years, including 4,800 new units dedicated to extremely low-income households and individuals, families exiting homelessness, and other underserved populations. A first round of funding has been approved for six developments, each of which includes supportive housing units dedicated to households exiting homelessness.

Villas on the Park

Location:

San José

Construction Completion Target:

December 1, 2019

Total Units:

84

PSH Units:

83

Housing Bond Funding:

\$7.2 million

Villas on the Park is a 100 percent permanent supportive housing development consisting of 84 apartments on a 0.355-acre site in downtown San José, under development by Affirmed Housing Group Inc. and People Assisting the Homeless (PATH). PATH will provide on-site supportive services such as outreach and engagement, needs assessment, case management, mental health care, substance abuse treatment, life skills education, community building, eviction prevention, green education, and transportation planning.

The Veranda

Location:

Cupertino

Construction Completion Target:

May 1, 2019

Total Units:

19

PSH Units:

6

Housing Bond Funding:

\$1 million

The Veranda is a 19-unit affordable senior housing development on a vacant 0.57-acre site, located in Cupertino and developed by Charities Housing Development Corporation of Santa Clara County. Six apartments will be reserved as permanent supportive housing units for formerly homeless or special-needs seniors. Catholic Charities will provide a service coordinator for all residents on site, offering a range of supports including referrals and assistance to access community-based services, financial literacy workshops, and organized social activities.

Gateway Senior Apartments

Location:

Gilroy

Construction Completion Target:

November 23, 2019

Total Units:

75

PSH Units:

37

Housing Bond Funding:

\$7.5 million

Gateway Senior Apartments is a 75-unit affordable senior housing complex on a 1.86-acre site, developed by Danco Communities. Half of the apartments will be reserved for special needs seniors and the remaining apartments for income-qualifying seniors. LifeSTEPS will provide a service coordinator, who will offer residents referrals and assistance to access community-based services, financial literacy workshops, and organized social activities.

Leigh Avenue Senior Apartments

Location:

San José

Construction Completion Target:

March 1, 2020

Total Units:

64

PSH Units:

63

Housing Bond Funding:

\$13.5 million

Leigh Avenue Senior Apartments is a 64-unit affordable senior housing complex, developed by First Community Housing. The development is 100 percent supportive housing, with all apartments set aside to serve homeless and special-needs seniors. Christian Church Homes Senior Housing, an organization with over 50 years of experience managing service enriched affordable senior communities, will serve as the resident services provider.

Quetzal Gardens

Location:

San José

Construction Completion Target:

February 1, 2021

Total Units:

71

PSH Units:

24

Housing Bond Funding:

\$9.83 million

Quetzal Gardens is a 71-unit affordable housing development, developed by Resources for Community Development (RCD). Twenty-four of the apartments will be set aside for chronically homeless individuals or families, and the remaining units will be allocated to residents who are considered extremely low income and low income. RCD will take the lead in providing services for the family apartments. The building's service coordinator will offer individualized services to all residents and referrals to local community services.

Crossings on Monterey

Location:

Morgan Hill

Construction Completion Target:

October 31, 2019

Total Units:

39

PSH Units:

20

Housing Bond Funding:

\$5.8 million

The Crossings on Monterey is a three-story affordable housing development consisting of 39 affordable housing units in Morgan Hill being developed by Urban Housing Communities. Approximately 20 apartments will be reserved for chronically homeless and homeless individuals and families. Resident services will be provided by Central Valley Coalition for Affordable Housing, including referrals and assistance to access community-based services.

SUPPORTIVE HOUSING INNOVATIONS

The wide range of permanent housing programs that comprise Santa Clara County’s supportive housing system form the core of the community’s strategy to make homelessness rare, brief, and non-recurring. Embracing a Housing First philosophy, the supportive housing system considers every household ready for and deserving of safe and stable housing and is committed to providing the appropriate level of support for each client to achieve that goal.

This section describes some of the community’s most innovative supportive housing initiatives, each of which pushes the boundaries of cross-system collaboration and reimagines the ways local government, nonprofit, and business partners work together to serve the county’s most vulnerable residents.

TOOLS OF THE SUPPORTIVE HOUSING SYSTEM

The supportive housing system relies on three key elements to support participants as they obtain and retain stable housing: affordable housing, case management, and supportive services. Performance measurement is used to evaluate and improve the effectiveness of these tools.

 **Affordable Housing** can take the form of rental subsidies, which cover part or all of a client’s housing costs and may be short-term (1-3 months), medium-term (3-24 months), or long-term (over 2 years) used in physical housing units owned or leased by a housing program, in units that are part of the market-rate housing stock, or in affordable apartments developed and set aside for households exiting homelessness.

 **Case management** involves one or more trained staff members working closely with a client to establish client-driven goals to attain and retain stable housing, including connecting the client to the best resources to help reach those goals.

 **Supportive services** are a diverse array of resources that help clients obtain or maintain permanent housing, including assistance with public benefits applications, medical and behavioral health care, legal services, credit repair, childcare, job training and employment programs, assistance with housing location or rental applications, and help building relationships with landlords.

 **Performance measurement** uses data collected by housing and service providers to evaluate the success of the supportive housing system and to improve outcomes for clients. See Appendix C: Measuring Success for more information about the performance metrics used.

Permanent Supportive Housing

Permanent supportive housing—which provides rental subsidies, medical and behavioral health, and other supportive services—is the most effective strategy for ending homelessness for long-term homeless and disabled individuals and their families. These programs target families and individuals with the highest barriers to finding or retaining housing and the longest time spent homeless. Often these clients are frequent users of County emergency medical, behavioral health services, and justice system services and most will need long-term or permanent support in order to remain stably housed. The County of Santa Clara Office of Supportive Housing partners with the Department of Behavioral Health to ensure that clients in permanent supportive housing have access to essential behavioral health services. The community’s Housing First philosophy prioritizes swift permanent housing placements for these most vulnerable households as a necessary first step to stability.

At the core of Santa Clara County’s permanent supportive housing system is the Care Coordination Project (CCP), a partnership of six permanent supportive housing providers, the County’s Behavioral Health Services Department, and the County’s Office of Supportive Housing. First implemented in 2011, this initiative brought the majority of the community’s permanent supportive housing programs into a collaborative partnership, which agreed to standard data collection, shared performance measures, and a centralized client referral process. As of the end of 2017, Care Coordination Project partners have begun utilizing Continuum, a custom-designed data sharing system that integrates client records from the County’s HealthLink medical services database and the Homeless Management Information System, allowing case managers to better coordinate wraparound services for each client.

With capacity to serve 1,322 households at a given time, representing 46 percent of the community’s permanent supportive housing inventory, the Care Coordination Project continues to operate as a highly coordinated core of the supportive housing system and a model for systemwide performance measurement.

Total Unit Inventory (point-in-time capacity):
2,846 households

Measuring Success^{xviii}

Permanent Housing Retention

(1,205 of 1,343) of clients housed in PSH between July 2011 and the end of 2016^{xix}

Returned to Homelessness Within Two Years

(4 of 65) of clients who exited permanent supportive housing for other permanent housing in 2015

^{xviii} The Santa Clara County supportive housing system evaluates the overall success and impact of the system using data entered by supportive housing and shelter providers into the Homeless Management Information System. These performance measures are based on the national standards for performance measurement developed by the U.S. Department of Housing and Urban Development. For more information about the performance measures in this report, see Appendix C: Measuring Success.

^{xix} The universe for this measure (1,681 clients) includes all clients served in a permanent supportive housing program who were housed at least 12 months prior to the end of 2017. The universe is significantly lower than the total system capacity (2,846 households) because it does not include all clients served.

The High Cost of Homelessness

The County of Santa Clara Office of Supportive Housing and its many partners have been working diligently to fund and develop permanent supportive housing for the many long-term homeless and disabled residents who need it. However, with limited capacity, these intensive programs must be prioritized for those most vulnerable and with the most severe barriers to housing. This approach also helps to maximize the reach of the County's many other resources often utilized by long-term homeless and disabled individuals, including costly justice system, emergency psychiatric, and medical services.

Home Not Found, a 2015 study on the public cost of homelessness in Santa Clara County, found significant overlap between individuals who have been homeless for a year or more and those who incurred the highest public costs. In particular, public costs related to homelessness

are heavily skewed toward a relatively small number of frequent users of justice system, emergency psychiatric, and medical services. While the average annual cost per person experiencing homelessness in 2012 was \$5,148, individuals with costs in the top 5 percent had average costs of over \$100,000 and accounted for 47 percent of all costs.^{xx}

To address these cost disparities and ensure available resources and services are utilized most efficiently, the County has developed several programs, described in the following pages, that strategically target key populations that, when unhoused, use a disproportionate amount of county services. These programs recognize that stable housing is a vital component of the continuum of care for individuals with complex medical and behavioral health needs and those with significant justice system involvement. In addition, with an approximate cost of \$30,000-35,000 per individual annually, permanent supportive housing for individuals with complex needs results in a significant reduction in the cost of services provided.

Valley Medical Center Permanent Supportive Housing - Whole Person Care

The Santa Clara Valley Medical Center (VMC) Supportive Housing Program, is an innovative cross-system collaboration that provides housing, case management, and high-quality health services to medically fragile individuals identified as high utilizers of County emergency health services. The program leverages California's Whole Person Care Program funding for medical care coordination and intensive case management provided by the County of Santa Clara Office of Supportive Housing and nonprofit partner Peninsula Healthcare Connections, as well as County funding to provide rental subsidies through Abode Services.^{xxi} Enrollment began in November of 2017, and will serve 70 clients at full capacity. Seeking to serve the highest utilizers of emergency medical and mental health services, clients must be homeless or at risk of homelessness, disabled, between ages 18 and 65, and eligible for Medi-Cal.

Targeting the highest utilizers with the most acute needs

Potential clients are identified by VMC, which determines the highest utilizers of County emergency medical and psychiatric services, and by the Office of Supportive Housing, who confirms that potential clients are homeless or at risk of homelessness. To locate these individuals, the County has developed a highly-specialized multidisciplinary team including a public health nurse and a doctor to conduct targeted outreach for the program.

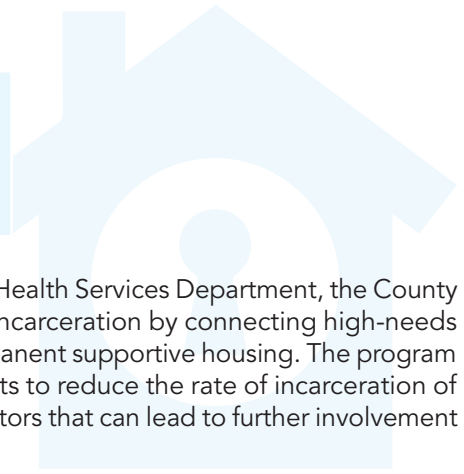

Bringing collaborative, nontraditional services to the highest utilizers

Combining intensive case management with data sharing between partners allows the program to fill in any gaps between service providers, with the goal of improving health outcomes for clients. Currently, VMC has access to the County's Homeless Management Information System (HMIS) to help caseworkers coordinate services. Soon this data sharing capacity will be improved by connecting multiple other County departments' data systems, including Mental Health and Custody Health, which provides mental health and medical services for incarcerated people.

^{xxi} In 2016, the California Department of Health Care Services awarded funding to 18 communities to implement Whole Person Care Pilots, which provide coordinated medical, behavioral health, and other social services to individuals in the Medi-Cal program who are high utilizers of local medical services. Whole Person Care Pilots require collaboration between local government, medical care providers, housing providers, and other stakeholders to coordinate services and offer integrated care.

Permanent Supportive Housing for Public Safety and Justice

Through programming coordinated by the County of Santa Clara Behavioral Health Services Department, the County seeks to interrupt the complex feedback loop between homelessness and incarceration by connecting high-needs incarcerated individuals who would otherwise exit to homelessness with permanent supportive housing. The program employs a range of medical, behavioral health, and housing-related supports to reduce the rate of incarceration of individuals with serious mental illness and to address the social and health factors that can lead to further involvement with the justice system.

Commencing in April 2017, the County of Santa Clara Office of Supportive Housing and Behavioral Health Services Department fund and coordinate the program, which serves 90 individuals with serious mental illness and a history of chronic homelessness who would otherwise exit jail to the streets or emergency shelters. To identify participants, clinicians and staff from several county departments work closely with the local courts to ascertain which individuals may be most in need of mental health and housing services. Community Solutions, a nonprofit housing and service provider, supplies case management services, working with each individual prior to release to develop a plan for connecting to medical, behavioral health, and other services in the community and to secure housing after release. By connecting seriously mentally ill individuals to permanent supportive housing prior to discharge, the program prevents homelessness for individuals with complex health needs. As of December 2017, the program had already enrolled 35 participants, and placed four in stable housing. Additional components of this innovative approach include the following:

Anticipating Risk Factors to End Cycles of Incarceration and Homelessness

By ensuring that multi-disciplinary clinicians have access to and a consistent presence within the local courts, staff are able to observe and identify risk factors that lead individuals to repeat cycles of incarceration and homelessness to better anticipate how and when to intervene.

Coordinating and Prioritizing Interventions for the Most Vulnerable

The program uses evidence-based approaches to coordinate and prioritize participants for permanent supportive housing, by gathering information on individual service utilization and length of time homeless. This ensures that housing and services are connected to individuals most at risk of exiting to homelessness and eventual return to incarceration.

Streamlining Communication to Minimize Gaps in Housing

Through enhanced communication with local courts, case managers are aware of important dates for participants, and are able to arrange a "warm hand-off" where case managers provide transportation to interim housing for newly released participants.

Kenya Rawls and Jorge Garcia Photo By Marianna Moles

CLIENT STORY After Four Years on the Streets, Permanent Supportive Housing Provides Jorge a Home

Whomever visits Jorge at his studio apartment will most likely be introduced to his new friend, a kitten named Buddy, and hear about how much he loves his bathtub. It's no wonder, since for nearly four years Jorge was homeless and alone, working three jobs, without any way to regularly clean up while living in a tent in downtown Palo Alto.

Jorge was homeless until his case manager at Abode Services let him know he would be getting a studio apartment. "I like this place. I wasn't expecting this nice place. I really like the tub," said Jorge, sitting in a rolling office chair in his apartment. He leans back and mentions the medication he's taking, suggesting that he has struggled with severe depression. Without a pause, he goes on to talk about the interview he has on Friday with a restaurant in Willow Glen. He has always made a point to stay employed, working multiple jobs in downtown Palo Alto while he was homeless.

Jorge explains the importance of remaining employed, sharing that it allowed him to save money while homeless, so he could buy a tent. Unfortunately, it was one of eight tents he obtained that year because they kept getting stolen. Going to and from work, he would sneak around so he wouldn't be spotted by anyone, often waiting hours before returning to his tent hidden among the bushes. Sometimes when he got back, he'd find everything was gone.

He is no stranger to having his belongings disappear. In fact, the first time it happened was five years ago, when he became homeless at 26 years old. He returned home to the room he was renting for \$800 a month, and he couldn't unlock the door. His landlord had changed the locks and everything he owned was inside. He says that a few days prior the landlord mentioned she was raising the rent \$200 a month, and Jorge told her he couldn't afford the rent increase. After that, Jorge struggled to find a place he could afford, and when he could no longer

stay in the basement of the hookah lounge where he was working, he found himself with nowhere to go but the streets.

Jorge is one of thousands of people who have entered the Coordinated Assessment System, taking a brief survey to assess their immediate needs and prioritize them on a list for housing referrals. Jorge received a referral to a permanent supportive housing program funded by the County and operated by Abode Services.

Now that he is settled in his new home, he recalls the only thing he wanted to do when he moved into his apartment was sleep. "I hear that from a lot of people," said Kenya Rawls, Housing Services Coordinator with Abode Services. She's working with Jorge now that he's housed. She looks at him and says, "You've come so far. I am so proud of you." Jorge smiles and scratches Buddy behind the ears.

Project Welcome Home

Project Welcome Home is a permanent supportive housing program designed to serve individuals with experience of long-term homelessness who are also among the highest utilizers of emergency medical and psychiatric services in the county. The County of Santa Clara Office of Supportive Housing refers clients to the program by using linked medical and homeless services data to identify clients with long-term homelessness and high rates of hospitalization, emergency department visits, or use of emergency psychiatric services. Clients that are able to remain stably housed through Project Welcome Home’s intensive supportive services show dramatically reduced utilization of the County’s safety-net services.

Project Welcome Home is the first permanent supportive housing program in California to operate under a Pay For Success model. It received \$6.9 million in up-front investments from private funders, including The Sobrato Foundation, The California Endowment, The Health Trust, The Reinvestment Fund, Corporation for Supportive Housing, The James Irvine Fund, Google.org, the Laura and John Arnold Foundation, and Abode Services.^{xxii} As the primary government sponsor, the County of Santa Clara repays those investments as the program demonstrates success by housing and improving the lives of the clients it serves. This innovative funding model ensures that program outcomes are closely tracked and that public funds are only expended when the program fulfills its purpose to stably house the County’s highest utilizers.

Enrollment in the program began in May of 2015, and the total capacity will increase from 112 to 145 individuals in 2018. This program’s ground-breaking approach to permanent supportive housing is evident in the following transformative strategies:

Setting the Standard in Cross-System Data Sharing

Continuum, the data platform that integrates the County’s medical and behavioral health records with Homeless Management Information System data, was initially implemented as a tool for Project Welcome Home to identify the highest utilizers of crisis medical services with experience of long-term homelessness. Lessons learned through its implementation have laid the foundation for integration and alignment of data between other County, city, and nonprofit partners.

Offering intensive wraparound supports in an evidence-based treatment model

Abode Services employs an Assertive Community Treatment model, supporting clients with an inter-disciplinary team to offer housing case management, clinical psychiatric services, and counseling services, including alcohol and substance use counseling. Rather than connect clients to essential behavioral health supports through referrals and community-based services, the Project Welcome Home team provides those supports directly in a coordinated and highly responsive manner.

48%

Reduction in Emergency Medical Services Usage

by Tenants Housed > 12 months

^{xxii} Funding from Abode Services was in the form of \$500,000 in deferred fees for services provided as the primary rental assistance administrator and Assertive Community Treatment provider.

Rapid Rehousing

Rapid rehousing is an evidence-based supportive housing strategy that quickly moves families and individuals who are experiencing homelessness into permanent housing and provides a time-limited rental subsidy and supportive services to obtain and maintain stable housing. This intervention is designed to support families and individuals experiencing episodic, rather than long-term, homelessness. Program staff help each household locate and secure an apartment, and clients typically receive 6 to 24 months of rental subsidy. During this time, clients have access to case management and supportive services, such as employment and training opportunities and childcare, aimed at increasing their income and addressing other barriers to housing stability. Rapid rehousing programs have regular client turnover, meaning that, as one household exits a program, funding can be redirected to help a new household entering the program.

While rapid rehousing offers a promising path to housing stability for large numbers of individuals and families, regional housing market and economic conditions make rapid rehousing program design and implementation challenging in Santa Clara County. For rapid rehousing clients, obtaining living-wage employment and finding an affordable apartment can make the difference between long-term housing stability and a continued risk of homelessness. Over the past six years, the County of Santa Clara has led an effort to increase rapid rehousing capacity and to improve outcomes for rapid rehousing clients through community standards for program design, training for program staff, targeted living-wage employment strategies, and County leadership in affordable housing development.

^{xxiii} The Santa Clara County supportive housing system evaluates the overall success and impact of the system using data entered by supportive housing and shelter providers into the Homeless Management Information System. These performance measures are based on the national standards for performance measurement developed by the U.S. Department of Housing and Urban Development. For more information about the performance measures in this report, see Appendix C: Measuring Success.

Rapid Rehousing (RRH) System Map

Rapid Rehousing for Public Safety and Justice

In partnership with the County of Santa Clara Office of Reentry Services, the County of Santa Clara Office of Supportive Housing offers a rapid rehousing program to address a significant risk factor for long-term homelessness in Santa Clara County by providing much needed linkages to housing and case management for persons experiencing homelessness who are reentering society after involvement with the criminal justice system. The program has provided housing search assistance, case management, and time-limited rental subsidies to incarcerated and recently released individuals for the past six years, and in 2017 the program has seen significant expansion and enhanced interagency coordination and collaboration.

Initially implemented in 2012 with capacity to serve 25 clients, the program currently leverages \$3.3 million in annual state and federal funding to serve up to 190 clients at a time. The County of Santa Clara Office of Reentry Services dedicates California Assembly Bill 109 (AB 109) funds to the program, which are supplemented by federal and state funding provided to the Office of Supportive Housing. Participants can access the program through the County's Reentry Resource Center, which acts as a coordinated service hub for formerly incarcerated residents. Multiple County departments and non-profit partners locate staff at the Reentry Resource Center to offer on-site counseling, public benefits application assistance, peer mentoring, medical care, health, housing, and other referrals, and a range of other resources in a one-stop-shop model. If a Reentry Resource Center client indicates housing is a need, the client receives an assessment of vulnerability and is prioritized for housing via the Coordinated Assessment System.

The program leverages collaboration across behavioral health, supportive housing, and criminal justice systems to reduce both homelessness and recidivism among prior serious offenders through the following strategies:

Ending Cycles of Homelessness and Criminal Justice Involvement

The program employs federal and state funding, to break the connection between homelessness and criminal justice involvement, whereby homelessness itself can lead to incarceration and criminal justice involvement can make it more difficult to obtain housing.

Employing Collaborative, One-Stop-Shop Program Design

The County of Santa Clara Offices of Reentry Services and Supportive Housing, in close collaboration with Abode Services, have designed the program to be client-centered, ensuring a clear path from housing needs assessment to connection to housing. By concentrating resources and case management services into one convenient location, the collaboration is maximized to best meet the housing needs of the Reentry participant.

Prioritizing Employment Partnerships

The program connects reentry clients with employment through partnerships with employment programs and referrals to the Destination: Work employment initiative, supporting participants to maintain housing stability and participate fully as members of the community.

Bringing Families Home

A common challenge among families involved in the child welfare system is the issue of housing instability. To be considered for family reunification, parents must be able to provide a safe and stable, though not necessarily long-term or permanent, living environment for the child. Temporary living arrangements, such as emergency shelters, transitional housing, and staying with friends and family, often cannot provide the type of stability that the child welfare system requires. This instability has been shown to cause stress within families, which can persist for at least six months following reunification, and can increase the risk factors resulting in reentry to the child welfare system.

In Santa Clara County, the Bringing Families Home program, a partnership between the Office of Supportive Housing and the Department of Family and Children Services, addresses these risk factors by providing stable housing to promote family reunification. Funded through a state legislative initiative targeted to families with connections to child welfare, the program provides rapid rehousing, including a rental subsidy and housing location services, to families at any point in the reunification process. This includes families with a child currently placed out of the home or families who have recently reunified who may be precariously housed, to assist them in achieving housing stability faster, exiting the child welfare system more quickly, and preventing re-entry.

After beginning enrollment in January 2018, the program will serve 46 families by July 2019. Families are referred to the program through the Coordinated Assessment System, which flags potentially eligible families that are currently experiencing homelessness or are at imminent risk of becoming homeless. After families are identified, the Department of Family and Children Services confirms that the family has a connection to the child welfare system, and a referral is made. Housing navigators from Abode Services work with the families to find housing, while Family and Children Services social workers continue to provide services, working in tandem to support families in their housing stability and reunification efforts. The program leverages the following innovations to aid its goal of providing stability to homeless families seeking reunification:

Enhancing Inter-Departmental Collaboration

County Office of Supportive Housing and Department of Families and Children Services staff work together to better coordinate services to families, respecting the unique roles each has to play in the success of the families' goals for reunification.

Addressing Causes of Instability with Wraparound Support

Abode Services provides wraparound support to families to address the causes of housing instability, including childcare, transportation, counseling, referral to financial and credit counseling, legal services, and developing individualized housing plans to guide families to permanent housing stability.

Delinking Housing Instability and Family Separation

By ensuring families have a safe, stable place to reunify, the Bringing Families Home program disrupts the cycle of housing instability that heightens the risk that children will experience homelessness in the future.

Rapid Rehousing for School-Age Children

According to the 2017 Homeless Census and Survey, 72 percent of families with children experiencing homelessness in Santa Clara County were residing in shelters or transitional housing programs. This is a significant decrease since 2013 when 95 percent of families experiencing homelessness in Santa Clara County were sheltered. Often, families that do not access shelters or other typical entry points for the County's supportive housing system, can be more challenging to engage, and risk falling through the cracks.

To reach these families, the Office of Supportive Housing has developed a rapid rehousing program targeting families with school-aged children who are not accessing the system through traditional access points, such as shelters or other community services. For this program, the County partners with the Bill Wilson Center and local school districts' McKinney-Vento Homeless Education liaisons to identify families experiencing homelessness. Eligible families with school-age children are referred to the program, which can serve 60 families annually, via the Coordinated Assessment System. Innovative approaches utilized by the program include:

Meeting Families Where They Are

To expand access to the program, the County is working to provide training to school liaisons and staff to administer the VI-SPDAT, a vulnerability assessment used by all homeless service providers across the county. Once the assessment is done, school staff can then connect families directly to the Coordinated Assessment System, providing a convenient and trusted access point to the community's supportive housing resources.

Forging New Partnerships to Better Serve Children and Families

To support clients in the program, the County of Santa Clara Office of Supportive Housing initiated several new partnerships, including with: local school districts; the federal Head Start program, which provides free preschool for low-income county residents and prioritizes services for homeless families; First 5 Santa Clara County, which operates and funds early childhood development programs for children up to 5 years of age; and Kids Connections, which offers access to developmental screening and early intervention services.

Creating Opportunities for Innovation

The three-year program, which started accepting referrals at the end of 2017, is funded solely by County general funds, which allows the flexibility to try new approaches, test alternative outreach strategies, and learn what works to better serve families with school-aged children in Santa Clara County.

72% of families with children experiencing homelessness in Santa Clara County were residing in shelters or transitional housing programs

Amanda & Daniel. Photo by Crystal Pretel-Ritter.

CLIENT STORY Rapid Rehousing—and Hard Work—Helps A Family Buy Their “Forever Home”

“Regardless of the situation, this roof is the most important thing in the world,” said Amanda, stretching her arms out, as she sits in her new home in Manteca, California, which she and her fiancé Daniel recently purchased. “I don’t care if we don’t have anything in this home...this roof is all that matters.”

Amanda, Daniel, and their four children, all under the age of 10, know the value of having a stable home after becoming homeless for nine months when a string of events led them to leave their home of four years in San Jose’s Willow Glenn neighborhood. They bounced between family and friends’ homes until they were accepted at Family Supportive Housing’s shelter, where they took budgeting classes and developed a plan to purchase a home within five years. They hit the

ground running, all while caring for four kids, and met their goal in just three years.

Abode Services worked with Amanda and Daniel through their rapid rehousing program to secure an apartment with a new landlord who was flexible with the family’s needs. Until they successfully took over the rent, Abode provided financial assistance to cover the deposit, a rental subsidy for the first three months, and nine months of continued support. This financial support helped create a stable environment which allowed them to continue working toward their plans to purchase their own home.

Amanda and Daniel worked with numerous other organizations, including: Employment Connection and CalWORKS, which helped

Amanda search for jobs and tweak her resume; Downtown Streets Team helped gather home essentials for their first apartment; and Catholic Charities assisted with professional attire. Within three months, Amanda secured fulltime work with an accounting firm, where she continues to work today.

In one year, they turned around their bad credit and were approved for a first-time home loan. While their new life will be built in the Central Valley, their path to housing stability began in Silicon Valley. “Life was not meant to be lived alone,” said Amanda. “Knowing the significance of our forever home is power and motivation to keep us putting one foot in front of the other every single day!”

Rapid Rehousing for Survivors of Domestic Violence, Sexual Assault, and Human Trafficking

Homelessness itself can be traumatic for individuals and families, and often those experiencing homelessness have coped with other traumatic events in their lives. National studies show that 80 percent of women with children experiencing homelessness have also experienced domestic violence, and one in five of all homeless women report that domestic violence was the immediate cause of their homelessness.^{xxiv xxv}

In many communities, service providers working with survivors operate independent of the supportive housing system; however, since 2015, the County of Santa Clara Office of Supportive Housing, YWCA of Silicon Valley, The Health Trust, and the City of San José have partnered to develop several rapid rehousing programs to support survivors of domestic violence, sexual assault, and human trafficking who are experiencing homelessness. These programs serve individuals and families coming from the streets, emergency shelters, or directly fleeing domestic violence, and bring together the expertise of domestic violence service providers with evidence-based supportive housing strategies.

The YWCA-SV works with survivors to locate safe and secure housing options, and the programs currently have the capacity to serve 77 households at a time, receiving referrals through a confidential process within the Coordinated Assessment System. The County and the City of San José provide local funding for the programs, which is combined with federal dollars. The programs utilize the following evidence-based and effective strategies:

Providing Client-Centered, Trauma-Informed Services

YWCA provides trauma-informed and client-driven services to promote healing and empowerment. Initial support is intensive and focused on collaborating with the client to create a housing retention plan and address barriers to attaining housing.

Ensuring Ongoing and Individualized Support

Once housed, clients continue to receive the wraparound support necessary to maintain housing, including regular case management meetings, counseling, childcare, connections to benefit programs, education and employment opportunities, and access to legal services.

80%
of women with
children experiencing
homelessness

Destination: Work

For many individuals and families experiencing homelessness, one or even multiple low- or minimum-wage jobs is simply not sufficient to cover housing costs and other basic necessities in Santa Clara County. Employment that provides a living wage can be the key to long-term housing stability, particularly for families receiving time-limited rental subsidies in rapid rehousing programs.

The new “Destination: Work” employment initiative, coordinated by Destination: Home and the County of Santa Clara Office of Supportive Housing, aims to provide opportunities for living-wage employment for individuals and families experiencing homelessness. Through partnerships with programs offering job training, professional certifications, and paid work experience in high-growth industries, Destination: Work supports each client to identify pathways to increasing income and long-term career opportunities.

Destination: Work forges new and more meaningful collaboration between employment and supportive housing programs that prioritize client-led problem solving and continual improvement in system design. Key strategies of this collaborative approach include the following:

Maximizing Impact by Tracking Outcomes

Destination: Work partner organizations use standard outcome measures and a shared data system to evaluate the initiative’s impact and to inform strategic decisions about how it is implemented. Key metrics include rates of job placement and retention, attainment of living wage, and transition into self-sufficiency by program participants.

Deepening Partnerships with Employment Partners

Employment partners and rapid rehousing case managers attend bimonthly meetings to discuss housing and employment opportunities, strategies, and outcomes. Meeting regularly and in person allows Destination: Work partners to operate as a cross-system service team to coordinate resources and address barriers to employment and housing for individual clients.

As of the end of 2017, Destination: Work served 44 individuals:

39 completed an employment training program

24 obtained full-time employment

CRISIS RESPONSE SYSTEM

While supportive housing programs—and building more units to increase the system’s capacity—are central to the community’s mission to end homelessness, the reality remains that individuals currently experiencing homelessness need programs and services that address their immediate needs. The supportive housing system includes a range of crisis response strategies, which help to identify and engage with at-risk or homeless households, prevent homelessness before it begins whenever possible, and provide shelter and other basic needs to individuals and families experiencing homelessness. For many households, these programs are the first step back to stable housing, and each component of this housing crisis response system works in alignment with the community’s supportive housing programs and other permanent housing resources to help clients achieve long-term housing stability.

Homelessness Prevention System Pilot

Under the leadership and coordination of Destination: Home, the Homelessness Prevention System pilot re-envisioned the community's approach to preventing homelessness. With a combined \$4.2 million dollars from public and private sources, this 27-month pilot program streamlines access to essential resources for families in crisis, targets resources to those most at risk of homelessness, and uses data to measure the collective impact of the prevention system.

The Emergency Assistance Network, a group of seven nonprofit organizations based in different areas of the county, has long been the community's primary provider of homelessness prevention services. In contrast with most existing funding sources for prevention, this pilot funding allows the Emergency Assistance Network agencies to provide more than one-time financial assistance, so that case managers can work with clients to identify and resolve immediate crises, including financial, legal, and other service needs. Financial support can be targeted to the needs of each household, ranging from one-time moving costs to multiple months of back-rent or rental assistance. Case managers continue to check in with each household after assistance has been provided to identify ongoing challenges and ensure long-term housing stability. This flexibility allows the agencies to provide the assistance needed to keep families and individuals from entering the homeless system. Since the program started, the average cost of financial assistance provided was \$2,913 per household, significantly less costly to the County than an extended shelter or transitional housing stay.

The agencies participating in the Homelessness Prevention System pilot use a standard assessment tool to target resources to households with the highest risk of homelessness. The use of a single intake assessment allows the system to better identify which households are most likely to experience homelessness, and to prevent it. As a coordinated system with standardized data collection requirements, the Homelessness Prevention System pilot will provide a rich source of information about the nature of housing crises in Santa Clara County and which tools are most effective at permanently stabilizing housing for at-risk families.

The seven agencies began serving families at risk of homelessness under the Homelessness Prevention System pilot in July 2017. In the first six months of the pilot, 30 households received prevention services.

87 percent of families and individuals served (26 of 30) remained housed while receiving homelessness prevention services

90 percent of families and individuals served (9 of 10) were stably housed when they stopped receiving homelessness prevention services

Outreach

During the 2017 Homeless Census and Survey, 5,448 people were unsheltered in Santa Clara County. Street outreach teams provide essential resources, information, and service connections for this population and are often the only contact some have with the broader system of care. For individuals experiencing homelessness who are unsheltered, contacts with outreach teams are an essential first step to connecting with housing resources. Outreach by multiple service providers covers the entire geographic area of Santa Clara County,

A member of PATH's outreach team in San Jose. Photo by Jeff Bomberger.

including targeted outreach to veterans, youth, LGBTQ+ populations, and households living in encampments. In addition, the Santa Clara Valley Health and Hospital System's Valley Homeless Healthcare Program brings healthcare services directly to people living outside.

Coordinated Assessment System

The Coordinated Assessment System, administered by the County of Santa Clara Office of Supportive Housing, is a streamlined system for matching the community's most vulnerable households to the appropriate housing resources. In Santa Clara County, Coordinated Assessment operates with a "no wrong door" access model, so that a household presenting at any access point across the county will receive the same brief assessment, the Vulnerability Index – Service Prioritization Decision Assistance Tool (VI-SPDAT), to determine their relative vulnerability and priority for the community's supportive housing. Access points for Coordinated Assessment include street outreach teams, emergency shelters, County benefits offices, drop-in and community centers, the County's Reentry Resource Center, community medical clinics, and many other community resources.

Once an individual or family has been assessed, they are placed on a single community queue in the County's Homelessness Management Information System.

Coordinated Assessment staff use this database to identify the most vulnerable individuals and families for referral to supportive housing, as vacancies become available. Because the Coordinated Assessment System is informed of all vacancies in participating housing programs, it is able to connect assessed households to a countywide inventory of supportive housing, prioritizing people with the most need first.

Based on VI-SPDAT score, each household is prioritized for either permanent supportive housing, rapid rehousing, or referral to other resources such as emergency shelters, legal aid, government benefits, or employment programs.^{xxviii} When a vacancy occurs in a participating housing program, the Coordinated Assessment System refers the household with the highest assessed vulnerability who is prioritized for that program type. Once a household is contacted and accepts the offered vacancy, the supportive housing program begins working with their new client to find housing.

^{xxviii} Beginning in 2018, some households will be prioritized for transitional housing vacancies.

Client Engagement Team

The goal of Coordinated Assessment is to connect the community's most vulnerable individuals and families to case management and other housing-focused services as quickly as possible. In 2017, housing providers and the County of Santa Clara Office of Supportive Housing identified one of the primary challenges in the housing process was locating clients to offer them referrals to programs.

To reach and house clients more swiftly, the Office of Supportive Housing committed its Client Engagement Team, an outreach team with expertise in locating and building relationships with individuals experiencing homelessness, to take on this role. Under this novel approach, the Client Engagement Team mobilizes immediately to make contact with households as they are referred through Coordinated Assessment, to explain the available housing opportunity and help put them in contact with the supportive housing program. To further streamline the Coordinated Assessment System, the County's Client Engagement Team ensures that households meet all eligibility criteria before they attempt to enroll in a housing program.

By centralizing the process of client location and verifying eligibility for the majority of individuals and families referred through Coordinated Assessment, the Client Engagement Team increases the efficiency of supportive housing referrals throughout the county and connects hard-to-reach individuals with scarce housing resources.

CLIENT STORY

Street Outreach Saved Rambo's Life

Rambo — a nickname Mike earned for wearing camo and a bandana around his head while he was homeless on and off for over 30 years — is relieved to be housed. “I wanted to be a normal, responsible person. I was counting the weeks to get housed,” he said recently.

Prior to being housed last year, Rambo could be found sleeping underneath a tarp in Saint James Park in downtown San José, wearing all five of his coats so they would not be stolen. For most of his life, Rambo has battled addictions and mental illness, suffered from severe hearing impairment since he was a baby, and often felt that people would give up on him. With assistance from the Office of Supportive Housing and its partners, he got sober in February of 2017 and moved into his current apartment in July of that year with help from a rental subsidy funded by the County. On his first night in his new home, he enjoyed a three-hour long bath, and cooking “meals that really fill me up, like soup,” he said, has become one of his favorite pastimes.

Finding the normalcy Rambo had long desired is the result of a collaborative effort, one that exemplifies the individualized approach clients need to stay successfully housed. Years of consistent street outreach also played a key role in getting Rambo off the streets and into permanent housing. Aiko, the case manager at PATH who reached out to Rambo in October of 2015 can attest to that. To more easily communicate with him, she wrote down her questions and was diligent about making sure he kept important appointments by texting him, rather than calling. Many other organizations have worked with Rambo to help him navigate the judicial system, find counseling services, obtain a reliable phone, and get hearing aids through Medi-Cal.

His current case manager at The Health Trust reports that the supportive services Rambo receives are essential to him successfully staying housed. Rambo said, “I may be 62 and a half, but I want to be able to enjoy the rest of my life. I feel good, like a normal human being. Got back on my own two feet. I'm happy.”

Emergency Shelter

Emergency shelters play an essential role in the supportive housing system. Of 7,394 people experiencing homelessness on the night of the January 2017 Homeless Census and Survey, 1,140 spent the night protected from the elements in a bed provided by a shelter program.

Santa Clara County's emergency shelters follow diverse program models, but most provide more than just a place to sleep. When available, on-site services such as showers, laundry, and meals support the health and well-being of shelter guests. Some emergency shelters are able to offer case management services, connecting guests to healthcare, benefits advocacy, employment programs, or other supportive services in the community. All emergency shelters act as access points for the Coordinated Assessment System, administering the standard assessment used to prioritize households for the community's permanent and transitional housing opportunities. For families and individuals experiencing homelessness, emergency shelter is often the first step in a path to stable housing.

Emergency Shelter Unit Inventory (point-in-time capacity):

^{xxix} The Santa Clara County supportive housing system evaluates the overall success and impact of the system using data entered by supportive housing and shelter providers into the Homeless Management Information System. These performance measures are based on the national standards for performance measurement developed by the U.S. Department of Housing and Urban Development. For more information about the performance measures in this report, see Appendix C: Measuring Success.

Expansion of the Cold Weather Shelter Program

During the winter months, the County of Santa Clara opens additional emergency shelters in the community to provide increased capacity and allow more of the county's unsheltered population to come indoors during cold and inclement weather. In 2017, the County took steps to significantly expand the Cold Weather Shelter Program. Historically operating from the first Monday after Thanksgiving through the end of March, the Cold Weather Shelter Program now runs from mid-October through mid-April, offering shelter during some of the county's wettest and coldest months. Bed capacity also increased during 2017, with increased funding allowing the North County Winter Shelter in Sunnyvale to welcome 15 additional individuals each night. The County Office of Supportive Housing partnered with the City of Mountain View, Hope's Corner, and the Trinity United Methodist Church to open a new Cold Weather Shelter location in Mountain View. The Trinity United Methodist Church Winter Shelter will provide warm beds for up to 50 individuals each night during cold weather months and is the city's first emergency shelter program for residents experiencing homelessness.

HomeFirst operates four Cold Weather Shelter Program locations, including the Gilroy Winter Shelter at the National Guard Armory; the North County Winter Shelter in Sunnyvale; the Boccardo Reception Center in San Jose; and the Trinity United Methodist Church Winter Shelter in Mountain View. St. Joseph's Family Center operates the Ochoa Winter Family Shelter in Gilroy.

LGBTQ-Focused Emergency Shelter

Twenty-nine percent of individuals interviewed during the 2017 Homeless Census and Survey self-identified as LGBTQ, mirroring a national trend of overrepresentation of LGBTQ individuals in the homeless population. In 2017, the County of Santa Clara Office of Supportive Housing and Office of LGBTQ Affairs began conducting outreach and gathering information to support the design of an emergency shelter program focused on LGBTQ-identified residents experiencing homelessness. In January of 2018, the County of Santa Clara Board of Supervisors directed the Office of Supportive Housing to begin work to open the county's first LGBTQ-focused emergency shelter. The new shelter is expected to open in 2018.

Transitional Housing

Transitional housing programs provide time-limited housing for individuals and families experiencing homelessness and can fill specific gaps in a comprehensive supportive housing system. For some experiencing homelessness, longer-term transitional housing (up to 24 months) can offer a uniquely supportive environment. For example, youth who are pregnant or parenting may elect to enroll in a transitional housing program that provides a built-in social network and parenting supports, while individuals or families fleeing domestic violence or sexual assault may seek out the security of housing with on-site services and trauma-informed programming. Typically, transitional housing clients receive housing assistance in an apartment owned or leased by the program, and, when assistance ends, the individual or family moves out of the program's housing. During their stay in the program, clients have access to services designed to address barriers to housing, including counseling, financial management training, job and housing search assistance, and connections to medical and behavioral health care.

In Santa Clara County's competitive rental market, a housing search for a client who is already enrolled in a permanent housing program can take weeks or months. When designed around shorter one- to three-month stays, transitional or interim housing programs offer stability while supporting the client in an active search for permanent housing. Regardless of program design, a primary goal of transitional housing is to support clients in their transition into safe and stable permanent housing.

Integrating Transitional Housing into Coordinated Assessment

In 2017, the County of Santa Clara Office of Supportive Housing worked closely with transitional housing providers for youth and veterans to integrate these housing resources into the Coordinated Assessment System. Through a collaborative process including the

Department of Veterans Affairs, LifeMoves, HomeFirst, the Homeless Veterans Emergency Housing Facility, and Bill Wilson Center, the Office of Supportive Housing adopted policies for transitional housing referrals from Coordinated Assessment to be implemented in 2018.

^{xxx} The Santa Clara County supportive housing system evaluates the overall success and impact of the system using data entered by supportive housing and shelter providers into the Homeless Management Information System. These performance measures are based on the national standards for performance measurement developed by the U.S. Department of Housing and Urban Development. For more information about the performance measures in this report, see Appendix C: Measuring Success.

CONCLUSION

In Santa Clara County, a booming economy and high median income contrast starkly with one of the nation's largest populations of people experiencing homelessness. In 2017, nearly 7,400 individuals were living on the streets, in shelters or transitional housing across the county. For many more low-income households, Santa Clara County's high cost of housing and lack of living wage employment opportunities put stable and affordable housing out of reach.

The Santa Clara County supportive housing system provides shelter, supportive housing, and homelessness prevention services in furtherance of the goal of making homelessness rare, brief, and non-recurring. However, the need for affordable housing and services in Santa Clara County far exceeds current capacity.

In 2015, major stakeholders of the county's supportive housing system established the Santa Clara County Community Plan to End Homelessness, a roadmap to increasing resources and ending homelessness through innovative strategies. Since implementation began in

2015, the County of Santa Clara has made substantial progress, working toward the goal of 6,000 new affordable housing opportunities for individuals and families experiencing homelessness.

The number of people housed each year has increased since 2015. The efforts of the County and its partners have been particularly successful at addressing chronic homelessness and veteran homelessness, two areas in which they have focused resources in recent years. The increased funding and support for Permanent Supportive Housing for people experiencing chronic homelessness lead to an 18 percent reduction in this population from 2011 to 2017. The focus on ending veterans homelessness has resulted in housing 990 veterans since November 2015.

Though the road to ending homelessness presents numerous challenges, the County of Santa Clara and its many partners are committed to ensuring safe and affordable housing for every household experiencing or at risk of homelessness.

Appendix A: Defining Homelessness

Homelessness and housing instability take many forms, and these challenges affect individuals and families with a diversity of life experiences. To understand the scope of the community's need and to develop the right systemic responses, it is necessary to rely on clear definitions of "homelessness." This report primarily uses the following components of the definition of homelessness developed by the U.S. Department of Housing and Urban Development (HUD) for its Continuum of Care and Emergency Solutions Grants housing programs.^{xxxii} Under this definition, a household who falls into any one of the following criteria is considered homeless:

- I. An individual or family who lack a fixed, regular, and adequate nighttime residence, including households living outside, in cars, emergency shelters, transitional housing, and some short institutional stays;
- II. An individual or family who will imminently lose their primary nighttime residence; or
- III. An individual or family who is fleeing, or attempting to flee, domestic violence, dating violence, sexual assault, stalking, or other dangerous or life-threatening conditions that relate to violence against the individual or a family member.

This report also references the definition of homelessness used by the County Office of Education and the public school system. This definition includes a household that lacks a fixed, regular, and adequate nighttime residence, children under 18 waiting for foster care placement, and individuals and families who are living "doubled up" or in hotels.^{xxxiii}

Chronic Homelessness

HUD has defined a subset of households experiencing homelessness as "chronically homeless." These households are most likely to have intensive medical, mental health, and other service needs that cannot be met while they remain unhoused and are a priority population within supportive housing systems nationally and locally.

The definition of chronically homeless includes both a disability requirement and a length of homelessness component. Under this definition, a household who meets all of the following criteria is considered chronically homeless:

- I. A homeless individual with a disability, who lives in a place not meant for human habitation, a safe haven, or an emergency shelter;
- II. Who has been homeless and living in any of the situations described above continuously for at least 12 months or on at least four separate occasions in the last three years, as long as the combined occasions equal at least 12 months.

While a longer stay in an institution such as a jail, hospital, or drug treatment facility will not count as living in a homeless situation, institutional stays of fewer than 90 days do count as time spent homeless. If a family's head of household, generally an adult family member, but occasionally a minor who is the head of a family with no adults, is chronically homeless under this definition, then the entire family meets the definition of chronic homelessness.^{xxxiii}

^{xxxii} Code of Federal Regulations, Continuum of Care Program, Title 24, sec. 578.3. This report does not use Category 3 of HUD's homeless definition, which includes unaccompanied youth or families who are homeless under other federal definitions of homelessness.

^{xxxiii} U.S. Department of Education: Education for Homeless Children and Youth Program Non-Regulatory Guidance, March 2017. Accessed on 10/2/17: <https://www2.ed.gov/policy/elsec/leg/essa/160240ehcyguidance072716updated0317.pdf>

Appendix B: Data Sources

The two most common methods for estimating the number of persons experiencing homelessness in a community are point-in-time counts and data collected by housing and services programs. This report draws on both of those methods to establish the scope and characteristics of homelessness in Santa Clara County, and each is described below.

Homeless Management Information System (HMIS)

The County of Santa Clara Office of Supportive Housing operates the community's HMIS, a countywide database used by the majority of programs providing housing or services for homeless populations within the county. Providers request consent from each person they serve to enter standard information into HMIS, including demographic information, services provided, and data about income and housing status. This results in a large set of data that includes nearly all individuals who had contact with outreach teams, emergency shelters, homeless housing programs, and other services.

Because HMIS is focused on service data, it does not include individuals who are currently homeless but are not accessing services. It also does not include persons who receive services or housing designed for survivors of domestic violence or human trafficking, as many programs providing those services are prohibited from entering information into HMIS for privacy and safety reasons. Most significantly, since the individuals in HMIS are limited to those who have received services, the total number of persons recorded as homeless in HMIS increases as the system serves more people.

To estimate the total number of persons experiencing homelessness over the course of a year using data from HMIS, communities use the number of persons who have spent at least one night in emergency shelter or transitional housing. As the size and capacity of the community's emergency shelter and transitional housing system increase, the total persons identified in HMIS as experiencing homelessness will also increase.

Homeless Census and Survey

Every two years, the County of Santa Clara and the region's fifteen cities conduct a Homeless Census and Survey. Trained volunteers tally the number of people observed living or sleeping outside at a single point in time and survey a sample of those counted. To cover the entirety of the county's extensive geographic area, the count occurs over the course of two days during the month of January, with roughly half of the county enumerated on each day. Data is also collected from emergency shelter and transitional housing programs, as households in shelter and temporary housing are considered homeless for purposes of the count.

The Homeless Census and Survey employs consistent methods from year to year, providing a useful data set for tracking changes in the homeless population. Because the count enumerates people who are currently living outside or in vehicles, including those who may not engage in services, it incorporates a population that may not be represented in HMIS data.

Notably, a point-in-time count will only provide a snapshot of homelessness on the nights selected for the count, which is not easily extrapolated to a total annual number of people who experience homelessness. This also means that the number of individuals counted each year is affected by weather conditions, the number of shelter beds open on the night of the count, natural disasters, and other temporary conditions that cause fluctuations in the visibility or size of the homeless population. It is expected that point-in-time methods will undercount individuals and families who shelter in locations that are not visible to volunteer teams, including vehicles, garages, and other structures not built to be lived in.

Appendix C: Measuring Success

To ensure that each component of Santa Clara County's supportive housing system effectively advances the goal of ending homelessness, system stakeholders have identified standard, data-based indicators of success. These indicators track the system's ability to help individuals and families permanently exit homelessness by obtaining and retaining housing.

These metrics are based on data entered by the community's housing and shelter programs into the Homeless Management Information System (HMIS), the primary community-wide database for collecting information about homeless housing and services, to evaluate the overall success and impact of the community's response to homelessness. See Appendix B: Data Sources for more information about the HMIS.

Permanent Housing Retention

How successful are the community's housing programs at helping individuals with disabilities who exit homelessness to remain in the permanent housing situations that they have obtained for at least 12 months, while they continue to receive support from the housing program?

Program type: Permanent Supportive Housing

Universe: All individuals served by the program during the measurement period who were housed with program support at least 12 months ago.

Measure: The percentage of the universe who remained housed for at least 12 months.

Obtained Permanent Housing

How successful are the community's housing and shelter programs at helping individuals experiencing homelessness to obtain permanent housing?

Program type: Emergency Shelter, Transitional Housing, Rapid Rehousing

Universe: All individuals served by the program who exited the program (stopped receiving services) during the measurement period.

Measure: The percentage of the universe who were in a permanent housing situation when they exited the program.

Returns to Homelessness

How successful are the community's housing and shelter programs at ensuring that individuals who exit homelessness do not return to homelessness once they stop receiving services?

Program type: Emergency Shelter, Transitional Housing, Rapid Rehousing, Permanent Supportive Housing

Universe: All individuals served by the program who exited the program (stopped receiving services) two years prior to the measurement period, and were in a permanent housing situation when they exited.

Measure: The percentage of the universe who were served by another homeless housing or services program in Santa Clara County's HMIS within 2 years of the date they exited the program to a permanent housing situation.

Appendix D: Santa Clara County Regional Housing Need Allotment

The Regional Housing Need Allocation (RHNA) is a state-mandated process Bay Area counties use to identify and project the total number of housing units necessary to meet the needs of people of all income levels in each county.

No Place Like Home Program
Technical Background Report: Santa Clara County Plan Addressing Homelessness

Summary

This summary report describes how the County's existing Continuum of Care Plan – referred to locally as the Community Plan to End Homelessness (**Attachment A**) and the 2015 Implementation Report (**Attachment B**) are consistent with the requirements outlined in Section 201 of the No Place Like Home (NPLH) program.

Plan Development

In 2014, the County of Santa Clara Office of Supportive Housing and Destination: Home, a public-private partnership dedicated to collective impact strategies to end homelessness, convened a series of community summits to develop a coordinated strategy to address homelessness across the county. Representatives of local cities, nonprofit advocacy groups, service providers, philanthropic organizations, elected officials, universities, and people with lived experience of homelessness participated in the planning process. The resulting Community Plan to End Homelessness has been formally endorsed by Santa Clara County's Board of Supervisors, Santa Clara County Housing Authority, Santa Clara Valley Water District, the majority of the county's 15 cities, and other stakeholder organizations. Over 200 individuals participated in the planning process (**Attachment C – Summary of Community Planning Process**). The Community Plan was developed to enhance the community's work towards ending and preventing homelessness among all homeless persons and families.

The Community Plan is intended to build upon and supersede previous plans including the County's 2005 Ten-Year Plan to End Chronic Homelessness, *Keys to Housing*, and the city of San Jose's 2003 *Homeless Strategy*. The Community Plan will be complimented with annual "Implementation Guides," which will have specific actions, goals and milestones.

Housing special needs populations is a County service and therefore the County must take an active role in developing, financing and supportive various types of affordable housing for the populations that we serve. The Community Plan's scope includes all homeless populations and builds upon partnerships with the cities, government agencies, housing and service providers, businesses, and other stakeholders.

The Community Plan is aligned with the goals of the Silicon Valley Health and Hospital System's Strategic Road Map; stable housing is a foundation for health, prosperity and safety. Homeless individuals have significant health needs. According to the 2013 Homeless Census and Survey, two-thirds of homeless individuals reported one or multiple disabling conditions, including chronic physical illness, physical or mental disabilities, chronic substance abuse and severe mental health conditions. Increasing stable housing opportunities for homeless persons could: 1) decrease redundancies, delays and cost of care; 2) decrease the burden of illness and injury; and, 3) increase the number of healthy life years.

Plan Elements

The plan provides a roadmap for the community's work to end homelessness from 2015 to 2020, establishing goals and strategies within a three-part framework:

1. Disrupt Systems. The Community Plan calls for disruptive strategies and innovative programs that transform the systems related to housing homeless people.
 - Deepen partnerships between local governments, nonprofit service providers, and the business sector to improve coordination
 - Use data to implement outcomes-based decisions about the most effective programs and structures to meet community needs
 - Coordinate housing and services through the Coordinated Assessment System to connect each individual with the right housing solution
 - Ensure that all individuals have a plan for housing upon exit from criminal justice or medical institutions and are not discharged into homelessness.
2. Build the Solution. To end homelessness, it is essential to secure the full amount of funding needed to provide affordable housing and services to those who are homeless and those at risk of homelessness. The Community Plan sets a goal of 6,000 new affordable housing opportunities dedicated to people experiencing homelessness, including new physical homes and apartments and new rental subsidies. Tenants in each of these new housing opportunities will have access to case management, health care, employment programs, and other services to ensure they are able to remain housed.
3. Serve the Person. The Community Plan recognizes the need for client-centered strategies that target resources to each specific individual or household based on their unique and different needs. Goals under this section focus on increasing the system's capacity to serve the needs of veterans, children and youth, families, people with disabilities who have experienced long-term homelessness, and other specific subpopulations. Since implementation of the Community Plan began in 2015, the supportive housing system has helped 5,154 people return to safe and permanent housing.

Homelessness in Santa Clara County

Homelessness affects thousands of Santa Clara County residents each year. Individuals and families, adults and children, people with jobs, and those with severe disabling conditions all face challenges to finding and retaining safe and stable housing. Many live without habitable shelter, on streets, in parks, in vehicles, or in sheds or abandoned buildings, while others spend their nights in the community's emergency shelters and transitional housing programs. The County draws upon homelessness data from a few different sources including the Point-in-Time (PIT) Counts, the Continuum of Care's Homeless Management Information System, and Coordinated Entry Assessments. **See attachment D State of the Supportive Housing System for information on the County's homeless population.**

In 2014 the County commissioned a Home Not Found, a study on the costs of homelessness in Santa Clara County. The study identified 46,225 residents who experienced homelessness over the course of the year in 2012 and received some form of County medical, behavioral health, or other social services, or had contact with the criminal justice system. This population represents some of the county's most vulnerable residents, in no small part due to the instability, stigma, loss of resources, and physical vulnerability that accompany the experience of homelessness.

The *Home Not Found* study found that the majority of county residents with experience of homelessness between 2007 and 2012 had used the County of Santa Clara's medical and mental health services or had interacted with the criminal justice system, and many had contact with multiple County of Santa Clara departments or services. The role of Santa Clara County's supportive housing system is to implement the most effective strategies to assist individuals experiencing homelessness in overcoming the barriers keeping them from stable housing, and to make homelessness rare, brief, and non-recurring across the county.

Service and Outreach Challenges

People who are homeless with mental illness face a unique and complex set of barriers to services. Some examples can include confusion about the system, negative interactions with programs, trauma and safety concerns and they may experience program barriers. The Office of Supportive Housing works with the Lived Experience Advisory Board – a leadership development body consisting of members with current or past experience of homelessness. Members use this platform to learn and evaluate the system of care and to make recommendations for improvement.

Available Resources

County and Community Resources Addressing Homelessness

Santa Clara County's supportive housing system provides a continuum of programs and services to meet the needs of the community's most vulnerable residents, including:

- Homelessness prevention programs help individuals and families on the verge of homelessness to remain housed and avoid extended shelter or transitional housing stays.
- Targeted Outreach programs engage with people experiencing homelessness, especially the more than 5,000 county residents living in vehicles, encampments, and other public spaces.
- Emergency Shelters provide a temporary place to stay, access to services, and other basic needs, for up to 1,146 people across the county each night.
- Transitional housing programs offer time-limited housing and services for up to 610 households at a time and are well-suited for populations such as youth or survivors of domestic violence, who may benefit from increased social supports and intensive onsite services.
- Rapid Rehousing Programs with a capacity to serve 619 households at a time, quickly move families and individuals into housing and provide financial assistance and services to help households stabilize, increase income, and eventually take over the cost of their rent. Of clients leaving the program in 2017, 72% had obtained permanent housing.
- Permanent Supportive Housing Programs couple stable, long-term housing with wrap-around supportive services, such as case management and access to physical and behavioral healthcare, for up to 2,846 households at a time. Of those housed in permanent supportive housing programs by 2017, 90% of clients remained stably housed for at least 12 months.

Collectively these services are offered by community based organizations including housing and service providers and the County as the safety net provider. One of the County's main partners in implementing

the Plan to End Homelessness is Destination: Home, a public-private partnership dedicated to collective impact strategies to end homelessness.

County Efforts to Prevent Criminalization of Homelessness

Permanent Supportive Housing for Public Safety and Justice

County programs enhance public safety by helping homeless individuals overcome past criminal history and find safe and stable housing upon release, allowing them to reintegrate and contribute to the community. Through programming coordinated by the County of Santa Clara Behavioral Health Services Department, the County seeks to interrupt the complex feedback loop between homelessness and incarceration by connecting high-needs incarcerated individuals who would otherwise exit to homelessness with permanent supportive housing. The program employs a range of medical, behavioral health, and housing-related supports to reduce the rate of incarceration of individuals with serious mental illness and to address the social and health factors that can lead to further involvement with the justice system.

Commencing in April 2017, the County of Santa Clara Office of Supportive Housing and Behavioral Health Services Department fund and coordinate the program, which serves 90 individuals with serious mental illness and a history of chronic homelessness who would otherwise exit jail to the streets or emergency shelters. To identify participants, clinicians and staff from several county departments work closely with the local courts to ascertain which individuals may be most in need of mental health and housing services. Community Solutions, a nonprofit housing and service provider, supplies case management services, working with each individual prior to release to develop a plan for connecting to medical, behavioral health, and other services in the community and to secure housing after release.

By connecting seriously mentally ill individuals to permanent supportive housing prior to discharge, the program prevents homelessness for individuals with complex health needs. As of December 2017, the program had already enrolled 35 participants, and placed four in stable housing. Additional components of this innovative approach include the following:

1. **Anticipating Risk Factors to End Cycle of Incarceration and Homelessness.** By ensuring that multi-disciplinary clinicians have access to and a consistent presence within the local courts, staff are able to observe and identify risk factors that lead individuals to repeat cycles of incarceration and homelessness to better anticipate how and when to intervene.
2. **Coordinating and Prioritizing Interventions for the Most Vulnerable.** The program uses evidence-based approaches to coordinate and prioritize participants for permanent supportive housing, by gathering information on individual service utilization and length of time homeless. This ensures that housing and services are connected to individuals most at risk of exiting to homelessness and eventual return to incarceration.
3. **Streamlining Communication to Minimize Gaps in Housing.** Through enhanced communication with local courts, case managers are aware of important dates for participants, and are able to arrange a “warm hand-off” where case managers provide transportation to interim housing for newly released participants.

Rapid Rehousing for Public Safety and Justice

In partnership with the County of Santa Clara Office of Reentry Services, the County of Santa Clara Office of Supportive Housing offers a rapid rehousing program to address a significant risk factor for long-term homelessness in Santa Clara County by providing much needed linkages to housing and case management for persons experiencing homelessness who are reentering society after involvement with the criminal justice system. The program has provided housing search assistance, case management, and time-limited rental subsidies to incarcerated and recently released individuals for the past six years, and in 2017 the program has seen significant expansion and enhanced interagency coordination and collaboration.

Initially implemented in 2012 with capacity to serve 25 clients, the program currently leverages \$3.3 million in annual state and federal funding to serve up to 190 clients at a time. The County of Santa Clara Office of Reentry Services dedicates California Assembly Bill 109 (AB 109) funds to the program, which are supplemented by federal and state funding provided to the Office of Supportive Housing. Participants can access the program through the County's Reentry Resource Center, which acts as a coordinated service hub for formerly incarcerated residents. Multiple County departments and non-profit partners locate staff at the Reentry Resource Center to offer on-site counseling, public benefits application assistance, peer mentoring, medical care, health, housing, and other referrals, and a range of other resources in a one-stop-shop model. If a Reentry Resource Center client indicates housing is a need, the client receives an assessment of vulnerability and is prioritized for housing via the Coordinated Assessment System.

The program leverages collaboration across behavioral health, supportive housing, and criminal justice systems to reduce both homelessness and recidivism among prior serious offenders through the following strategies:

1. Ending Cycles of Homelessness and Criminal Justice Involvement. The program employs federal and state funding, to break the connection between homelessness and criminal justice involvement, whereby homelessness itself can lead to incarceration and criminal justice involvement can make it more difficult to obtain housing.
2. Employing Collaborative, One-Stop-Shop Program Design. The County of Santa Clara Offices of Reentry Services and Supportive Housing, in close collaboration with Abode Services, have designed the program to be client-centered, ensuring a clear path from housing needs assessment to connection to housing. By concentrating resources and case management services into one convenient location, the collaboration is maximized to best meet the housing needs of the Reentry participant.
3. Prioritizing Employment Partnerships. The program connects reentry clients with employment through partnerships with employment programs and referrals to the Destination: Work employment initiative, supporting participants to maintain housing stability and participate fully as members of the community.

Coordinated Entry System

The Coordinated Assessment System, administered by the County of Santa Clara Office of Supportive Housing, is a streamlined system for matching the community's most vulnerable households to the appropriate housing resources. In Santa Clara County, Coordinated Assessment operates with a "no

wrong door” access model, so that a household presenting at any access point across the county will receive the same brief assessment, the Vulnerability Index – Service Prioritization Decision Assistance Tool (VI-SPDAT), to determine their relative vulnerability and priority for the community’s supportive housing. Access points for Coordinated Assessment include street outreach teams, emergency shelters, County benefits offices, drop-in and community centers, the County’s Reentry Resource Center, community medical clinics, and many other community resources.

Once an individual or family has been assessed, they are placed on a single community queue in the County’s Homelessness Management Information System.

Coordinated Assessment staff use this database to identify the most vulnerable individuals and families for referral to supportive housing, as vacancies become available. Because the Coordinated Assessment System is informed of all vacancies in participating housing programs, it is able to connect assessed households to a countywide inventory of supportive housing, prioritizing people with the most need first. Based on VI-SPDAT score, each household is prioritized for either permanent supportive housing, rapid rehousing, or referral to other resources such as emergency shelters, legal aid, government benefits, or employment programs.¹ When a vacancy occurs in a participating housing program, the Coordinated Assessment System refers the household with the highest assessed vulnerability who is prioritized for that program type. Once a household is contacted and accepts the offered vacancy, the supportive housing program begins working with their new client to find housing.

NPLH Units

For NPLH, the County will prioritize households in the target population by referring individuals with the highest need on the community queue when an NPLH unit becomes available. Staff will then verify the referred individual/household is an adult or older adult with a serious mental illness or seriously emotionally disturbed children or adolescents. If the individual meets eligibility requirements for NPLH, they will be enrolled in the program. Additionally, the CoC is in the process of improving the CES by integrating a newly developed empirical tool for Permanent Supportive Housing (PSH) triage. This predictive model of public spending on homeless individuals in the county will be utilized with the VI-SPDAT to assist in identifying individuals in the most need, including those at risk of chronic homelessness. The County expects to implement the Triage Tool in the CES by July 1, 2019. The current CES is used to identify the most vulnerable homeless households. Additionally, to identify and assess the needs of persons at risk of chronic homelessness, the County will expand the CES to persons exiting institutionalized settings, such as jail or prison, hospitals, institutes of mental disease, nursing facilities, or long-term residential substance use disorder treatment, who were homeless prior to admission. The County currently utilizes the Justice Discharge VI-SPDAT to assess the needs of individuals exiting jail or prison. The County will work with other institutional partners to conduct the assessment with individuals prior to exiting, so individuals at-risk of chronic homelessness can be referred to housing opportunities when available, utilizing the CES.

Client Engagement Team

The goal of Coordinated Assessment is to connect the community’s most vulnerable individuals and families to case management and other housing-focused services as quickly as possible. In 2017, housing providers and the County of Santa Clara Office of Supportive Housing identified one of the primary

¹ Beginning in 2018, some households will be prioritized for transitional housing vacancies.

challenges in the housing process was locating clients to offer them referrals to programs. To reach and house clients more swiftly, the Office of Supportive Housing committed its Client Engagement Team, an outreach team with expertise in locating and building relationships with individuals experiencing homelessness, to take on this role. Under this novel approach, the Client Engagement Team mobilizes immediately to make contact with households as they are referred through Coordinated Assessment, to explain the available housing opportunity and help put them in contact with the supportive housing program. To further streamline the Coordinated Assessment System, the County's Client Engagement Team ensures that households meet all eligibility criteria before they attempt to enroll in a housing program. By centralizing the process of client location and verifying eligibility for the majority of individuals and families referred through Coordinated Assessment, the Client Engagement Team increases the efficiency of supportive housing referrals throughout the county and connects hard-to-reach individuals with scarce housing resources.

1 INTRODUCTION

The requirement to Affirmatively Further Fair Housing (AFFH) is derived from The Fair Housing Act of 1968, which prohibited discrimination concerning the sale, rental, and financing of housing based on race, color, religion, national origin, or sex—and was later amended to include familial status and disability.¹ The 2015 U.S. Department of Housing and Urban Development (HUD) Rule to Affirmatively Further Fair Housing and California Assembly Bill 686 (2018) mandate that each jurisdiction takes meaningful action to address significant disparities in housing needs and access to opportunity.²³ AB 686 requires that jurisdictions incorporate AFFH into their Housing Elements, which includes inclusive community participation, an assessment of fair housing, a site inventory reflective of AFFH, and the development of goals, policies, and programs to meaningfully address local fair housing issues. ABAG and UC Merced have prepared this report to assist Bay Area jurisdictions with the Assessment of Fair Housing section of the Housing Element.

Assessment of Fair Housing Components

The Assessment of Fair Housing includes five components, which are discussed in detail on pages 22-43 of [HCD's AFFH Guidance Memo](#):

- A: Summary of fair housing enforcement and outreach capacity
- B: Integration and segregation patterns, and trends related to people with protected characteristics
- C: Racially or ethnically concentrated areas of poverty
- D: Disparities in access to opportunity
- E: Disproportionate housing needs, including displacement risk

1.1 Purpose of this Report

This report describes racial and income segregation in Bay Area jurisdictions. Local jurisdiction staff can use the information in this report to help fulfill a portion of the second component of the Assessment of Fair Housing, which requires analysis of integration and segregation patterns and trends related to people with protected characteristics and lower incomes. Jurisdictions will still need to perform a similar analysis for familial status and populations with disability.

This report provides segregation measures for both the local jurisdiction and the region using several indices. For segregation between neighborhoods within a city (intra-city segregation), this report includes isolation indices, dissimilarity indices, and Theil's-H index. The isolation index measures

¹ <https://www.justice.gov/crt/fair-housing-act-2>

² HCD AFFH Guidance Memo

³ The 2015 HUD rule was reversed in 2020 and partially reinstated in 2021.

segregation for a single group, while the dissimilarity index measures segregation between two groups. The Theil's H-Index can be used to measure segregation between all racial or income groups across the city at once. HCD's AFFH guidelines require local jurisdictions to include isolation indices and dissimilarity indices in the Housing Element. Theil's H index is provided in addition to these required measures. For segregation between cities within the Bay Area (inter-city segregation), this report includes dissimilarity indices at the regional level as required by HCD's AFFH guidelines. HCD's AFFH guidelines also require jurisdictions to compare conditions at the local level to the rest of the region; and this report presents the difference in the racial and income composition of a jurisdiction relative to the region as a whole to satisfy the comparison requirement.

1.2 Defining Segregation

Segregation is the separation of different demographic groups into different geographic locations or communities, meaning that groups are unevenly distributed across geographic space. This report examines two spatial forms of segregation: neighborhood level segregation *within* a local jurisdiction and city level segregation *between* jurisdictions in the Bay Area.

Neighborhood level segregation (*within* a jurisdiction, or *intra-city*): Segregation of race and income groups can occur from neighborhood to neighborhood *within* a city. For example, if a local jurisdiction has a population that is 20% Latinx, but some neighborhoods are 80% Latinx while others have nearly no Latinx residents, that jurisdiction would have segregated neighborhoods.

City level segregation (*between* jurisdictions in a region, or *inter-city*): Race and income divides also occur *between* jurisdictions in a region. A region could be very diverse with equal numbers of white, Asian, Black, and Latinx residents, but the region could also be highly segregated with each city comprised solely of one racial group.

There are many factors that have contributed to the generation and maintenance of segregation. Historically, racial segregation stemmed from explicit discrimination against people of color, such as restrictive covenants, redlining, and discrimination in mortgage lending. This history includes many overtly discriminatory policies made by federal, state, and local governments (Rothstein 2017). Segregation patterns are also affected by policies that appear race-neutral, such as land use decisions and the regulation of housing development.

Segregation has resulted in vastly unequal access to public goods such as quality schools, neighborhood services and amenities, parks and playgrounds, clean air and water, and public safety (Trounstein 2015). This generational lack of access for many communities, particularly people of color and lower income residents, has often resulted in poor life outcomes, including lower educational attainment, higher morbidity rates, and higher mortality rates (Chetty and Hendren 2018, Ananat 2011, Burch 2014, Cutler and Glaeser 1997, Sampson 2012, Sharkey 2013).

1.3 Segregation Patterns in the Bay Area

Across the San Francisco Bay Area, white residents and above moderate-income residents are significantly more segregated from other racial and income groups (see Appendix 2). The highest levels of racial segregation occur between the Black and white populations. The analysis completed for this report indicates that the amount of racial segregation both *within* Bay Area cities and *across* jurisdictions in the region has decreased since the year 2000. This finding is consistent with recent research from the Othering and Belonging Institute at UC Berkeley, which concluded that “[a]lthough 7

of the 9 Bay Area counties were more segregated in 2020 than they were in either 1980 or 1990, racial residential segregation in the region appears to have peaked around the year 2000 and has generally declined since.”⁴ However, compared to cities in other parts of California, Bay Area jurisdictions have more neighborhood level segregation between residents from different racial groups. Additionally, there is also more racial segregation *between* Bay Area cities compared to other regions in the state.

1.4 Segregation and Land Use

It is difficult to address segregation patterns without an analysis of both historical and existing land use policies that impact segregation patterns. Land use regulations influence what kind of housing is built in a city or neighborhood (Lens and Monkkonen 2016, Pendall 2000). These land use regulations in turn impact demographics: they can be used to affect the number of houses in a community, the number of people who live in the community, the wealth of the people who live in the community, and where within the community they reside (Trounstine 2018). Given disparities in wealth by race and ethnicity, the ability to afford housing in different neighborhoods, as influenced by land use regulations, is highly differentiated across racial and ethnic groups (Bayer, McMillan, and Reuben 2004).⁵ ABAG/MTC plans to issue a separate report detailing the existing land use policies that influence segregation patterns in the Bay Area.

⁴ For more information, see <https://belonging.berkeley.edu/most-segregated-cities-bay-area-2020>.

⁵ Using a household-weighted median of Bay Area county median household incomes, regional values were \$61,050 for Black residents, \$122,174 for Asian/Pacific Islander residents, \$121,794 for white residents, and \$76,306 for Latinx residents. For the source data, see U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B19013B, Table B19013D, B19013H, and B19013I.

Definition of Terms - Geographies

Neighborhood: In this report, “neighborhoods” are approximated by tracts.⁶ Tracts are statistical geographic units defined by the U.S. Census Bureau for the purposes of disseminating data. In the Bay Area, tracts contain on average 4,500 residents. Nearly all Bay Area jurisdictions contain at least two census tracts, with larger jurisdictions containing dozens of tracts.

Jurisdiction: Jurisdiction is used to refer to the 109 cities, towns, and unincorporated county areas that are members of ABAG. Though not all ABAG jurisdictions are cities, this report also uses the term “city” interchangeably with “jurisdiction” in some places.

Region: The region is the nine-county San Francisco Bay Area, which is comprised of Alameda County, Contra Costa County, Marin County, Napa County, San Francisco County, San Mateo County, Santa Clara County, Solano County, and Sonoma County.

⁶ Throughout this report, neighborhood level segregation measures are calculated using census tract data. However, the racial dot maps in Figure 1 and Figure 5 use data from census blocks, while the income group dot maps in Figure 8 and Figure 12 use data from census block groups. These maps use data derived from a smaller geographic scale to better show spatial differences in where different groups live. Census block groups are subdivisions of census tracts, and census blocks are subdivisions of block groups. In the Bay Area, block groups contain on average 1,500 people, while census blocks contain on average 95 people.

2 RACIAL SEGREGATION IN UNINCORPORATED SANTA CLARA COUNTY

Definition of Terms - Racial/Ethnic Groups

The U.S. Census Bureau classifies racial groups (e.g. white or Black/African American) separately from Hispanic/Latino ethnicity.⁷ This report combines U.S. Census Bureau definitions for race and ethnicity into the following racial groups:

White: Non-Hispanic white

Latinx: Hispanic or Latino of any race⁸

Black: Non-Hispanic Black/African American

Asian/Pacific Islander: Non-Hispanic Asian or Non-Hispanic Pacific Islander

People of Color: All who are not non-Hispanic white (including people who identify as “some other race” or “two or more races”)⁹

2.1 Neighborhood Level Racial Segregation (*within* Unincorporated Santa Clara County)

Racial dot maps are useful for visualizing how multiple racial groups are distributed within a specific geography. The racial dot map of Unincorporated Santa Clara County in Figure 1 below offers a visual representation of the spatial distribution of racial groups within the jurisdiction. Generally, when the distribution of dots does not suggest patterns or clustering, segregation measures tend to be lower. Conversely, when clusters of certain groups are apparent on a racial dot map, segregation measures may be higher.

⁷ More information about the Census Bureau’s definitions of racial groups is available here:

<https://www.census.gov/topics/population/race/about.html>.

⁸ The term Hispanic has historically been used to describe people from numerous Central American, South American, and Caribbean countries. In recent years, the term Latino or Latinx has become preferred. This report generally uses Latinx to refer to this racial/ethnic group.

⁹ Given the uncertainty in the data for population size estimates for racial and ethnic groups not included in the Latinx, Black, or Asian/Pacific Islander categories, this report only analyzes these racial groups in the aggregate People of Color category.

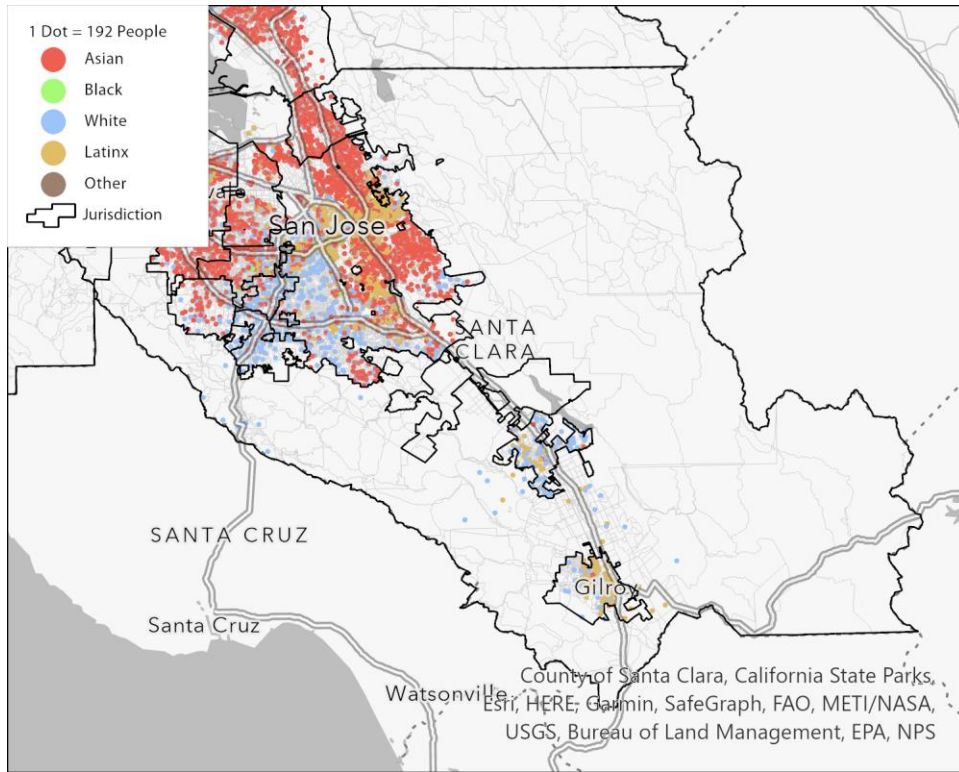

Figure 1: Racial Dot Map of Unincorporated Santa Clara County (2020)

Universe: Population. Source: U.S. Census Bureau, 2020 Census State Redistricting Data (Public Law 94-171) Summary File, 2020 Census of Population and Housing, Table P002.

Note: The plot shows the racial distribution at the census block level for Unincorporated Santa Clara County and vicinity. Dots in each census block are randomly placed and should not be construed as actual placement of people.

There are many ways to quantitatively measure segregation. Each measure captures a different aspect of the ways in which groups are divided within a community. One way to measure segregation is by using an **isolation index**:

- The isolation index compares each neighborhood’s composition to the jurisdiction’s demographics as a whole.
- This index ranges from 0 to 1. Higher values indicate that a particular group is more isolated from other groups.
- Isolation indices indicate the potential for contact between different groups. The index can be interpreted as the experience of the average member of that group. For example, if the isolation index is .65 for Latinx residents in a city, then the average Latinx resident in that city lives in a neighborhood that is 65% Latinx.

Within Unincorporated Santa Clara County the most isolated racial group is white residents. Unincorporated Santa Clara County’s isolation index of 0.502 for white residents means that the average white resident lives in a neighborhood that is 50.2% white. Other racial groups are less isolated, meaning they may be more likely to encounter other racial groups in their neighborhoods. The isolation index values for all racial groups in Unincorporated Santa Clara County for the years 2000, 2010, and 2020 can be found in Table 1 below. Among all racial groups in this jurisdiction, the white

population’s isolation index has changed the most over time, becoming less segregated from other racial groups between 2000 and 2020.

The “Bay Area Average” column in this table provides the average isolation index value across Bay Area jurisdictions for different racial groups in 2020.¹⁰ The data in this column can be used as a comparison to provide context for the levels of segregation experienced by racial groups in this jurisdiction. For example, Table 1 indicates the average isolation index value for white residents across all Bay Area jurisdictions is 0.491, meaning that in the average Bay Area jurisdiction a white resident lives in a neighborhood that is 49.1% white.

Table 1: Racial Isolation Index Values for Segregation within Unincorporated Santa Clara County

Race	Unincorporated Santa Clara County			Bay Area Average
	2000	2010	2020	2020
Asian/Pacific Islander	0.211	0.236	0.223	0.245
Black/African American	0.039	0.034	0.041	0.053
Latinx	0.448	0.495	0.457	0.251
White	0.587	0.521	0.502	0.491

Universe: Population.

Source: IPUMS National Historical Geographic Information System (NHGIS). U.S. Census Bureau, 2020 Census State Redistricting Data (Public Law 94-171) Summary File, 2020 Census of Population and Housing, Table P002. Data from 2010 is from U.S. Census Bureau, Census 2010, Table P4. Data for 2000 is standardized to 2010 census tract geographies and is from U.S. Census Bureau, Census 2000, Table P004.

Figure 2 below shows how racial isolation index values in Unincorporated Santa Clara County compare to values in other Bay Area jurisdictions. In this chart, each dot represents a Bay Area jurisdiction. For each racial group, the spread of dots represents the range of isolation index values among Bay Area jurisdictions. Additionally, the black line within each racial group notes the isolation index value for that group in Unincorporated Santa Clara County, and each dashed red line represents the Bay Area average for the isolation index for that group. Local staff can use this chart to contextualize how segregation levels for racial groups in their jurisdiction compare to other jurisdictions in the region.

¹⁰ This average only includes the 104 jurisdictions that have more than one census tract, which is true for all comparisons of Bay Area jurisdictions’ segregation measures in this report. The segregation measures in this report are calculated by comparing the demographics of a jurisdiction’s census tracts to the jurisdiction’s demographics, and such calculations cannot be made for the five jurisdictions with only one census tract (Brisbane, Calistoga, Portola Valley, Rio Vista, and Yountville).

Figure 2: Racial Isolation Index Values for Unincorporated Santa Clara County Compared to Other Bay Area Jurisdictions (2020)

Universe: Bay Area Jurisdictions.

Source: IPUMS National Historical Geographic Information System (NHGIS). U.S. Census Bureau, 2020 Census State Redistricting Data (Public Law 94-171) Summary File, 2020 Census of Population and Housing, Table P002.

Another way to measure segregation is by using a **dissimilarity index**:

- This index measures how evenly any two groups are distributed across neighborhoods relative to their representation in a city overall. The dissimilarity index at the jurisdiction level can be interpreted as the share of one group that would have to move neighborhoods to create perfect integration for these two groups.
- The dissimilarity index ranges from 0 to 1. Higher values indicate that groups are more unevenly distributed (e.g. they tend to live in different neighborhoods).

Dissimilarity Index Guidance for Cities with Small Racial Group Populations

The analysis conducted for this report suggests that dissimilarity index values are unreliable for a population group if that group represents approximately less than 5% of the jurisdiction's total population.

HCD's AFFH guidance requires the Housing Element to include the dissimilarity index values for racial groups, but also offers flexibility in emphasizing the importance of various measures. ABAG/MTC recommends that when cities have population groups that are less than 5% of the jurisdiction's population (see Table 4), jurisdiction staff use the isolation index or Thiel's H-Index to gain a more accurate understanding of their jurisdiction's neighborhood-level segregation patterns (*intra-city segregation*).

If a jurisdiction has a very small population of a racial group, this indicates that segregation between the jurisdiction and the region (*inter-city segregation*) is likely to be an important feature of the jurisdiction's segregation patterns.

In Unincorporated Santa Clara County, the Black/African American group is 2.1 percent of the population - so staff should be aware of this small population size when evaluating dissimilarity index values involving this group.

Table 2 below provides the dissimilarity index values indicating the level of segregation in Unincorporated Santa Clara County between white residents and residents who are Black, Latinx, or Asian/Pacific Islander. The table also provides the dissimilarity index between white residents and all residents of color in the jurisdiction, and all dissimilarity index values are shown across three time periods (2000, 2010, and 2020).

In Unincorporated Santa Clara County the highest segregation is between Latinx and white residents (see Table 2). Unincorporated Santa Clara County's Latinx /white dissimilarity index of 0.460 means that 46.0% of Latinx (or white) residents would need to move to a different neighborhood to create perfect integration between Latinx residents and white residents.

The "Bay Area Average" column in this table provides the average dissimilarity index values for these racial group pairings across Bay Area jurisdictions in 2020. The data in this column can be used as a comparison to provide context for the levels of segregation between communities of color are from white residents in this jurisdiction.

For example, Table 2 indicates that the average Latinx/white dissimilarity index for a Bay Area jurisdiction is 0.207, so on average 20.7% of Latinx (or white residents) in a Bay Area jurisdiction would need to move to a different neighborhood within the jurisdiction to create perfect integration between Latinx and white residents in that jurisdiction.

Table 2: Racial Dissimilarity Index Values for Segregation within Unincorporated Santa Clara County

Race	Unincorporated Santa Clara County			Bay Area Average
	2000	2010	2020	2020
Asian/Pacific Islander vs. White	0.384	0.372	0.280	0.185
Black/African American vs. White	0.405*	0.416*	0.433*	0.244
Latinx vs. White	0.471	0.464	0.460	0.207
People of Color vs. White	0.359	0.355	0.273	0.168

Universe: Population.

Source: IPUMS National Historical Geographic Information System (NHGIS). U.S. Census Bureau, 2020 Census State Redistricting Data (Public Law 94-171) Summary File, 2020 Census of Population and Housing, Table P002. Data from 2010 is from U.S. Census Bureau, Census 2010, Table P4. Data for 2000 is standardized to 2010 census tract geographies and is from U.S. Census Bureau, Census 2000, Table P004.

Note: If a number is marked with an asterisk (*), it indicates that the index is based on a racial group making up less than 5 percent of the jurisdiction population, leading to unreliable numbers.

Figure 3 below shows how dissimilarity index values in Unincorporated Santa Clara County compare to values in other Bay Area jurisdictions. In this chart, each dot represents a Bay Area jurisdiction. For each racial group pairing, the spread of dots represents the range of dissimilarity index values among Bay Area jurisdictions. Additionally, the black line within each racial group pairing notes the dissimilarity index value in Unincorporated Santa Clara County, and each dashed red line represents the Bay Area average for the dissimilarity index for that pairing. Similar to Figure 2, local staff can use this chart to contextualize how segregation levels between white residents and communities of color in their jurisdiction compare to the rest of the region. However, staff should be mindful of whether a racial group in their jurisdiction has a small population (approximately less than 5% of the jurisdiction’s population), as the dissimilarity index value is less reliable for small populations.

Figure 3: Racial Dissimilarity Index Values for Unincorporated Santa Clara County Compared to Other Bay Area Jurisdictions (2020)

Universe: Bay Area Jurisdictions.

Source: IPUMS National Historical Geographic Information System (NHGIS). U.S. Census Bureau, 2020 Census State Redistricting Data (Public Law 94-171) Summary File, 2020 Census of Population and Housing, Table P002.

Note: The analysis conducted for this report suggests that dissimilarity index values are unreliable for a population group if that group represents approximately less than 5% of the jurisdiction’s total population. ABAG/MTC recommends that when cities have population groups that are less than 5% of the jurisdiction’s population (see Table 4), jurisdiction staff could focus on the isolation index or Thiel’s H-Index to gain a more accurate understanding of neighborhood-level racial segregation in their jurisdiction.

The **Theil’s H Index** can be used to measure segregation between all groups within a jurisdiction:

- This index measures how diverse each neighborhood is compared to the diversity of the whole city. Neighborhoods are weighted by their size, so that larger neighborhoods play a more significant role in determining the total measure of segregation.
- The index ranges from 0 to 1. A Theil’s H Index value of 0 would mean all neighborhoods within a city have the same demographics as the whole city. A value of 1 would mean each group lives exclusively in their own, separate neighborhood.
- For jurisdictions with a high degree of diversity (multiple racial groups comprise more than 10% of the population), Theil’s H offers the clearest summary of overall segregation.

The Theil’s H Index values for neighborhood racial segregation in Unincorporated Santa Clara County for the years 2000, 2010, and 2020 can be found in Table 3 below. The “Bay Area Average” column in the table provides the average Theil’s H Index across Bay Area jurisdictions in 2020. Between 2010 and 2020, the Theil’s H Index for racial segregation in Unincorporated Santa Clara County declined, suggesting that there is now less neighborhood level racial segregation within the jurisdiction. In 2020, the Theil’s H Index for racial segregation in Unincorporated Santa Clara County was higher than the

average value for Bay Area jurisdictions, indicating that neighborhood level racial segregation in Unincorporated Santa Clara County is more than in the average Bay Area city.

Table 3: Theil’s H Index Values for Racial Segregation within Unincorporated Santa Clara County

Index	Unincorporated Santa Clara County			Bay Area Average
	2000	2010	2020	2020
Theil's H Multi-racial	0.139	0.145	0.121	0.042

Universe: Population.

Source: IPUMS National Historical Geographic Information System (NHGIS). U.S. Census Bureau, 2020 Census State Redistricting Data (Public Law 94-171) Summary File, 2020 Census of Population and Housing, Table P002. Data from 2010 is from U.S. Census Bureau, Census 2010, Table P4. Data for 2000 is standardized to 2010 census tract geographies and is from U.S. Census Bureau, Census 2000, Table P004.

Figure 4 below shows how Theil’s H index values for racial segregation in Unincorporated Santa Clara County compare to values in other Bay Area jurisdictions in 2020. In this chart, each dot represents a Bay Area jurisdiction. Additionally, the black line notes the Theil’s H index value for neighborhood racial segregation in Unincorporated Santa Clara County, and the dashed red line represents the average Theil’s H index value across Bay Area jurisdictions. Local staff can use this chart to compare how neighborhood racial segregation levels in their jurisdiction compare to other jurisdictions in the region.

Figure 4: Theil’s H Index Values for Racial Segregation in Unincorporated Santa Clara County Compared to Other Bay Area Jurisdictions (2020)

Universe: Bay Area Jurisdictions.

2.2 Regional Racial Segregation (*between* Unincorporated Santa Clara County and other jurisdictions)

At the regional level, segregation is measured between *cities* instead of between *neighborhoods*. Racial dot maps are not only useful for examining neighborhood racial segregation within a jurisdiction, but these maps can also be used to explore the racial demographic differences between different jurisdictions in the region. Figure 5 below presents a racial dot map showing the spatial distribution of racial groups in Unincorporated Santa Clara County as well as in nearby Bay Area cities.

Figure 5: Racial Dot Map of Unincorporated Santa Clara County and Surrounding Areas (2020)

Universe: Population.

Source: U.S. Census Bureau, 2020 Census State Redistricting Data (Public Law 94-171) Summary File, 2020 Census of Population and Housing, Table P002.

Note: The plot shows the racial distribution at the census block level for Unincorporated Santa Clara County and vicinity. Dots in each census block are randomly placed and should not be construed as actual placement of people.

To understand how each city contributes to the total segregation of the Bay Area, one can look at the difference in the racial composition of a jurisdiction compared to the racial composition of the region as a whole. The racial demographics in Unincorporated Santa Clara County for the years 2000, 2010, and 2020 can be found in Table 4 below. The table also provides the racial composition of the nine-county Bay Area. As of 2020, Unincorporated Santa Clara County has a higher share of white residents

than the Bay Area as a whole, a higher share of Latinx residents, a lower share of Black residents, and a lower share of Asian/Pacific Islander residents.

Table 4: Population by Racial Group, Unincorporated Santa Clara County and the Region

Race	Unincorporated Santa Clara County			Bay Area
	2000	2010	2020	2020
Asian/Pacific Islander	10.9%	13.9%	17.9%	28.2%
Black/African American	2.0%	1.8%	2.1%	5.6%
Latinx	28.4%	33.4%	30.4%	24.4%
Other or Multiple Races	3.6%	3.8%	6.1%	5.9%
White	55.1%	47.2%	43.5%	35.8%

Universe: Population.

Source: IPUMS National Historical Geographic Information System (NHGIS). U.S. Census Bureau, 2020 Census State Redistricting Data (Public Law 94-171) Summary File, 2020 Census of Population and Housing, Table P002. Data from 2010 is from U.S. Census Bureau, Census 2010, Table P4. Data for 2000 is standardized to 2010 census tract geographies and is from U.S. Census Bureau, Census 2000, Table P004.

Figure 6 below compares the racial demographics in Unincorporated Santa Clara County to those of all 109 Bay Area jurisdictions.¹¹ In this chart, each dot represents a Bay Area jurisdiction. For each racial group, the spread of dots represents the range of that group’s representation among Bay Area jurisdictions. Additionally, the black line within each racial group notes the percentage of the population of Unincorporated Santa Clara County represented by that group and how that percentage ranks among all 109 jurisdictions. Local staff can use this chart to compare the representation of different racial groups in their jurisdiction to those groups’ representation in other jurisdictions in the region, which can indicate the extent of segregation between this jurisdiction and the region.

¹¹ While comparisons of segregation measures are made only using the 104 jurisdictions with more than one census tract, this comparison of jurisdiction level demographic data can be made using all 109 jurisdictions.

Figure 6: Racial Demographics of Unincorporated Santa Clara County Compared to All Bay Area Jurisdictions (2020)

Universe: Bay Area Jurisdictions.

Source U.S. Census Bureau, 2020 Census State Redistricting Data (Public Law 94-171) Summary File, 2020 Census of Population and Housing, Table P002.

The map in Figure 7 below also illustrates regional racial segregation between Unincorporated Santa Clara County and other jurisdictions. This map demonstrates how the percentage of people of color in Unincorporated Santa Clara County and surrounding jurisdictions compares to the Bay Area as a whole:

- Jurisdictions shaded orange have a share of people of color that is less than the Bay Area as a whole, and the degree of difference is greater than five percentage points.
- Jurisdictions shaded white have a share of people of color comparable to the regional percentage of people of color (within five percentage points).
- Jurisdictions shaded grey have a share of people of color that is more than five percentage points greater than the regional percentage of people of color.

Figure 7: Comparing the Share of People of Color in Unincorporated Santa Clara County and Vicinity to the Bay Area (2020)

Universe: Population.

Source: U.S. Census Bureau, 2020 Census State Redistricting Data (Public Law 94-171) Summary File, 2020 Census of Population and Housing, Table P002.

Note: People of color refer to persons not identifying as non-Hispanic white. The nine-county Bay Area is the reference region for this map.

Segregation between jurisdictions in the region can also be analyzed by calculating regional values for the segregation indices discussed previously. Table 5 presents dissimilarity index, isolation index, and Theil’s H index values for racial segregation for the entire nine-county Bay Area in 2010 and 2020. In the previous section of this report focused on neighborhood level racial segregation, these indices were calculated by comparing the racial demographics of the census tracts within a jurisdiction to the demographics of the jurisdiction as a whole. In Table 5, these measures are calculated by comparing the racial demographics of local jurisdictions to the region’s racial makeup. For example, looking at the 2020 data, Table 5 shows the white isolation index value for the region is 0.429, meaning that on average white Bay Area residents live in a jurisdiction that is 42.9% white in 2020. An example of regional dissimilarity index values in Table 5 is the Black/white dissimilarity index value of 0.459, which means that across the region 45.9% of Black (or white) residents would need to move to a different jurisdiction to evenly distribute Black and white residents across Bay Area jurisdictions. The dissimilarity index values in Table 5 reflect recommendations made in HCD’s AFFH guidance for calculating dissimilarity at the region level.¹² The regional value for the Theil’s H index measures how

¹² For more information on HCD’s recommendations regarding data considerations for analyzing integration and segregation patterns, see page 31 of the AFFH Guidance Memo.

diverse each Bay Area jurisdiction is compared to the racial diversity of the whole region. A Theil's H Index value of 0 would mean all *jurisdictions* within the Bay Area have the same racial demographics as the entire region, while a value of 1 would mean each racial group lives exclusively in their own separate jurisdiction. The regional Theil's H index value for racial segregation decreased slightly between 2010 and 2020, meaning that racial groups in the Bay Area are now slightly less separated by the borders between jurisdictions.

Table 5: Regional Racial Segregation Measures

Index	Group	2010	2020
Isolation Index Regional Level	Asian/Pacific Islander	0.317	0.378
	Black/African American	0.144	0.118
	Latinx	0.283	0.291
	White	0.496	0.429
	People of Color	0.629	0.682
Dissimilarity Index Regional Level	Asian/Pacific Islander vs. White	0.384	0.369
	Black/African American vs. White	0.475	0.459
	Latinx vs. White	0.301	0.297
	People of Color vs. White	0.296	0.293
Theil's H Multi-racial	All Racial Groups	0.103	0.097

Universe: Population.

U.S. Census Bureau, 2020 Census State Redistricting Data (Public Law 94-171) Summary File, 2020 Census of Population and Housing, Table P002. Data from 2010 is from U.S. Census Bureau, 2010 Census of Population and Housing, Table P4.

3 INCOME SEGREGATION IN UNINCORPORATED SANTA CLARA COUNTY

Definition of Terms - Income Groups

When analyzing segregation by income, this report uses income group designations consistent with the Regional Housing Needs Allocation and the Housing Element:

Very low-income: individuals earning less than 50% of Area Median Income (AMI)

Low-income: individuals earning 50%-80% of AMI

Moderate-income: individuals earning 80%-120% of AMI

Above moderate-income: individuals earning 120% or more of AMI

Additionally, this report uses the term "lower-income" to refer to all people who earn less than 80% of AMI, which includes both low-income and very low-income individuals.

The income groups described above are based on U.S. Department of Housing and Urban Development (HUD) calculations for AMI. HUD calculates the AMI for different metropolitan areas, and the nine county Bay Area includes the following metropolitan areas: Napa Metro Area (Napa County), Oakland-Fremont Metro Area (Alameda and Contra Costa Counties), San Francisco Metro Area (Marin, San Francisco, and San Mateo Counties), San Jose-Sunnyvale-Santa Clara Metro Area (Santa Clara County), Santa Rosa Metro Area (Sonoma County), and Vallejo-Fairfield Metro Area (Solano County).

The income categories used in this report are based on the AMI for the HUD metro area where this jurisdiction is located.

3.1 Neighborhood Level Income Segregation (*within* Unincorporated Santa Clara County)

Income segregation can be measured using similar indices as racial segregation. Income dot maps, similar to the racial dot maps shown in Figures 1 and 5, are useful for visualizing segregation between multiple income groups at the same time. The income dot map of Unincorporated Santa Clara County in Figure 8 below offers a visual representation of the spatial distribution of income groups within the jurisdiction. As with the racial dot maps, when the dots show lack of a pattern or clustering, income segregation measures tend to be lower, and conversely, when clusters are apparent, the segregation measures may be higher as well.

Figure 8: Income Dot Map of Unincorporated Santa Clara County (2015)

Universe: Population.

Source: U.S. Department of Housing and Urban Development, American Community Survey 5-Year 2011-2015 Low- and Moderate-Income Summary Data.

Note: The plot shows the income group distribution at the census block group level for Unincorporated Santa Clara County and vicinity. Dots in each block group are randomly placed and should not be construed as actual placement of individuals.

The isolation index values for all income groups in Unincorporated Santa Clara County for the years 2010 and 2015 can be found in Table 6 below.¹³ Above Moderate-income residents are the most isolated income group in Unincorporated Santa Clara County. Unincorporated Santa Clara County’s isolation index of 0.484 for these residents means that the average Above Moderate-income resident in Unincorporated Santa Clara County lives in a neighborhood that is 48.4% Above Moderate-income. Among all income groups, the Very Low-income population’s isolation index has changed the most over time, becoming more segregated from other income groups between 2010 and 2015.

Similar to the tables presented earlier for neighborhood racial segregation, the “Bay Area Average” column in Table 6 provides the average isolation index value across Bay Area jurisdictions for different income groups in 2015. The data in this column can be used as a comparison to provide context for the levels of segregation experienced by income groups in this jurisdiction. For example, Table 6 indicates the average isolation index value for very low-income residents across Bay Area jurisdictions is 0.269,

¹³ This report presents data for income segregation for the years 2010 and 2015, which is different than the time periods used for racial segregation. This deviation stems from the [data source recommended for income segregation calculations](#) in HCD’s AFFH Guidelines. This data source most recently updated with data from the 2011-2015 American Community Survey 5-year estimates. For more information on HCD’s recommendations for calculating income segregation, see [page 32 of HCD’s AFFH Guidelines](#).

meaning that in the average Bay Area jurisdiction a very low-income resident lives in a neighborhood that is 26.9% very low-income.

Table 6: Income Group Isolation Index Values for Segregation within Unincorporated Santa Clara County

Income Group	Unincorporated Santa Clara County		Bay Area Average
	2010	2015	2015
Very Low-Income (<50% AMI)	0.378	0.434	0.269
Low-Income (50%-80% AMI)	0.146	0.157	0.145
Moderate-Income (80%-120% AMI)	0.201	0.183	0.183
Above Moderate-Income (>120% AMI)	0.524	0.484	0.507

Universe: Population.

Source: Data for 2015 is from U.S. Department of Housing and Urban Development, American Community Survey 5-Year 2011-2015 Low- and Moderate-Income Summary Data. Data for 2010 is from U.S. Department of Housing and Urban Development, American Community Survey 5-Year 2006-2010 Low- and Moderate-Income Summary Data.

Figure 9 below shows how income group isolation index values in Unincorporated Santa Clara County compare to values in other Bay Area jurisdictions. In this chart, each dot represents a Bay Area jurisdiction. For each income group, the spread of dots represents the range of isolation index values among Bay Area jurisdictions. Additionally, the black line within each income group notes the isolation index value for that group in Unincorporated Santa Clara County, and each dashed red line represents the Bay Area average for the isolation index for that group. Local staff can use this chart to contextualize how segregation levels for income groups in their jurisdiction compare to the rest of the region.

Figure 9: Income Group Isolation Index Values for Unincorporated Santa Clara County Compared to Other Bay Area Jurisdictions (2015)

Universe: Bay Area Jurisdictions.

Source: U.S. Department of Housing and Urban Development, American Community Survey 5-Year 2011-2015 Low- and Moderate-Income Summary Data.

Table 7 below provides the dissimilarity index values indicating the level of segregation in Unincorporated Santa Clara County between residents who are lower-income (earning less than 80% of AMI) and those who are not lower-income (earning above 80% of AMI). This data aligns with the requirements described in HCD’s AFFH Guidance Memo for identifying dissimilarity for lower-income households.¹⁴ Segregation in Unincorporated Santa Clara County between lower-income residents and residents who are not lower-income increased between 2010 and 2015. Additionally, Table 7 shows dissimilarity index values for the level of segregation in Albany between residents who are very low-income (earning less than 50% of AMI) and those who are above moderate-income (earning above 120% of AMI). This supplementary data point provides additional nuance to an analysis of income segregation, as this index value indicates the extent to which a jurisdiction’s lowest and highest income residents live in separate neighborhoods.

Similar to other tables in this report, the “Bay Area Average” column shows the average dissimilarity index values for these income group pairings across Bay Area jurisdictions in 2015. For example, Table 7 indicates that the average dissimilarity index between lower-income residents and other residents in a Bay Area jurisdiction is 0.198, so on average 19.8% of lower-income residents in a Bay Area jurisdiction would need to move to a different neighborhood within the jurisdiction to create perfect income group integration in that jurisdiction.

¹⁴ For more information, see page 32 of HCD’s AFFH Guidance Memo.

In 2015, the income segregation in Unincorporated Santa Clara County between lower-income residents and other residents was higher than the average value for Bay Area jurisdictions (See Table 7). This means that the lower-income residents are more segregated from other residents within Unincorporated Santa Clara County compared to other Jurisdictions in the region.

Table 7: Income Group Dissimilarity Index Values for Segregation within Unincorporated Santa Clara County

Income Group	Unincorporated Santa Clara County		Bay Area Average
	2010	2015	2015
Below 80% AMI vs. Above 80% AMI	0.312	0.375	0.198
Below 50% AMI vs. Above 120% AMI	0.426	0.484	0.253

Universe: Population.

Source: Data for 2015 is from U.S. Department of Housing and Urban Development, American Community Survey 5-Year 2011-2015 Low- and Moderate-Income Summary Data. Data for 2010 is from U.S. Department of Housing and Urban Development, American Community Survey 5-Year 2006-2010 Low- and Moderate-Income Summary Data.

Figure 10 below shows how dissimilarity index values for income segregation in Unincorporated Santa Clara County compare to values in other Bay Area jurisdictions. In this chart, each dot represents a Bay Area jurisdiction. For each income group pairing, the spread of dots represents the range of dissimilarity index values among Bay Area jurisdictions. Additionally, the black line within each income group pairing notes the dissimilarity index value in Unincorporated Santa Clara County, and each dashed red line represents the Bay Area average for the dissimilarity index for that pairing. Local staff can use this chart to contextualize how segregation levels between lower-income residents and wealthier residents in their jurisdiction compared to the rest of the region.

Figure 10: Income Group Dissimilarity Index Values for Unincorporated Santa Clara County Compared to Other Bay Area Jurisdictions (2015)

Universe: Bay Area Jurisdictions.

Source: U.S. Department of Housing and Urban Development, American Community Survey 5-Year 2011-2015 Low- and Moderate-Income Summary Data.

The Theil’s H Index values for neighborhood income group segregation in Unincorporated Santa Clara County for the years 2010 and 2015 can be found in Table 8 below. The “Bay Area Average” column in this table provides the average Theil’s H Index value across Bay Area jurisdictions for different income groups in 2015. By 2015, the Theil’s H Index value for income segregation in Unincorporated Santa Clara County was about the same amount as it had been in 2010. In 2015, the Theil’s H Index value for income group segregation in Unincorporated Santa Clara County was higher than the average value for Bay Area jurisdictions, indicating there is more neighborhood level income segregation in Unincorporated Santa Clara County than in the average Bay Area city.

Table 8: Theil’s H Index Values for Income Segregation within Unincorporated Santa Clara County

Index	Unincorporated Santa Clara County		Bay Area Average
	2010	2015	2015
Theil's H Multi-income	0.098	0.102	0.043

Universe: Population.

Source: Data for 2015 is from U.S. Department of Housing and Urban Development, American Community Survey 5-Year 2011-2015 Low- and Moderate-Income Summary Data. Data for 2010 is from U.S. Department of Housing and Urban Development, American Community Survey 5-Year 2006-2010 Low- and Moderate-Income Summary Data.

Figure 11 below shows how Theil's H index values for income group segregation in Unincorporated Santa Clara County compare to values in other Bay Area jurisdictions in 2015. In this chart, each dot represents a Bay Area jurisdiction. Additionally, the black line notes the Theil's H index value for income group segregation in Unincorporated Santa Clara County, and the dashed red line represents the average Theil's H index value across Bay Area jurisdictions. Local staff can use this chart to compare how neighborhood income group segregation levels in their jurisdiction compare to other jurisdictions in the region.

Figure 11: Income Group Theil's H Index Values for Unincorporated Santa Clara County Compared to Other Bay Area Jurisdictions (2015)

3.2 Regional Income Segregation (*between* Unincorporated Santa Clara County and other jurisdictions)

At the regional level, segregation is measured between jurisdictions instead of between neighborhoods. Income dot maps are not only useful for examining neighborhood income segregation within a jurisdiction, but these maps can also be used to explore income demographic differences between jurisdictions in the region. Figure 12 below presents an income dot map showing the spatial distribution of income groups in Unincorporated Santa Clara County as well as in nearby Bay Area jurisdictions.

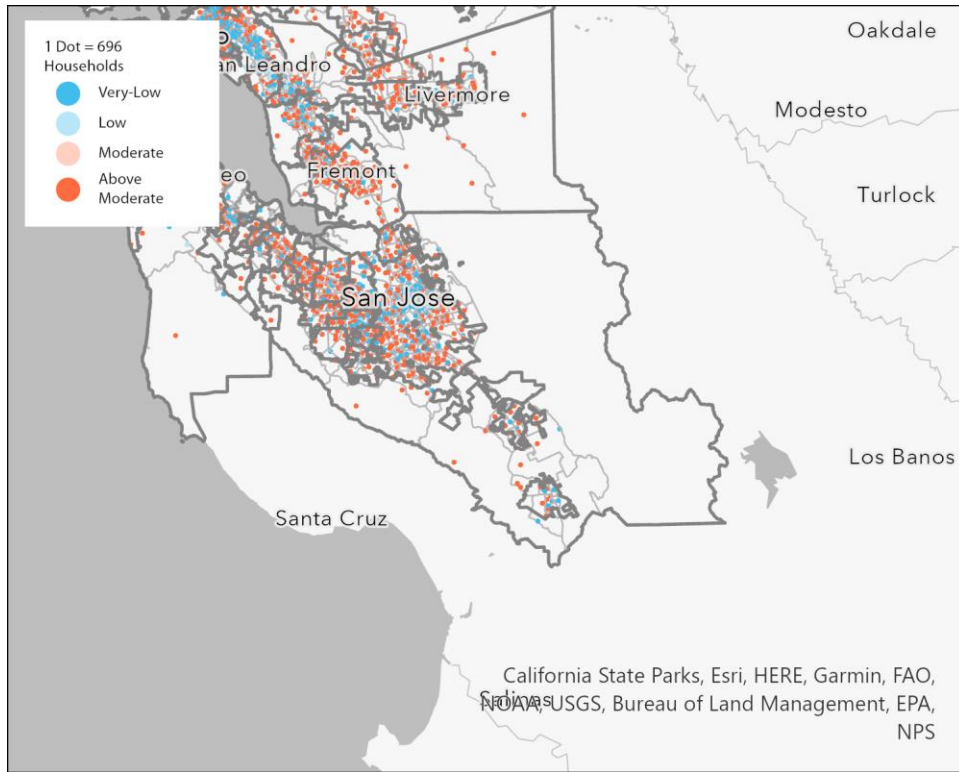

Figure 12: Income Dot Map of Unincorporated Santa Clara County and Surrounding Areas (2015)

Universe: Population.

Source: U.S. Department of Housing and Urban Development, American Community Survey 5-Year 2011-2015 Low- and Moderate-Income Summary Data.

Note: The plot shows the income group distribution at the census block group level for Unincorporated Santa Clara County and vicinity. Dots in each block group are randomly placed and should not be construed as actual placement of individuals.

When looking at income segregation between jurisdictions in the Bay Area, one can examine how Unincorporated Santa Clara County differs from the region. The income demographics in Unincorporated Santa Clara County for the years 2010 and 2015 can be found in Table 9 below. The table also provides the income composition of the nine-county Bay Area in 2015. As of that year, Unincorporated Santa Clara County had a similar share of very low-income residents than the Bay Area as a whole, a lower share of low-income residents, a lower share of moderate-income residents, and a higher share of above moderate-income residents.

Table 9: Population by Income Group, Unincorporated Santa Clara County and the Region

Income Group	Unincorporated Santa Clara County		Bay Area
	2010	2015	2015
Very Low-Income (<50% AMI)	22.72%	28.57%	28.7%
Low-Income (50%-80% AMI)	10.94%	11.97%	14.3%
Moderate-Income (80%-120% AMI)	15.94%	16.02%	17.6%
Above Moderate-Income (>120% AMI)	50.41%	43.43%	39.4%

Universe: Population.

Source: Data for 2015 is from Housing U.S. Department of and Urban Development, American Community Survey 5-Year 2011-2015 Low- and Moderate-Income Summary Data. Data for 2010 is from U.S. Department of Housing and Urban Development, American Community Survey 5-Year 2006-2010 Low- and Moderate-Income Summary Data.

Figure 13 below compares the income demographics in Unincorporated Santa Clara County to other Bay Area jurisdictions.¹⁵ Like the chart in Figure 3, each dot represents a Bay Area jurisdiction. For each income group, the spread of dots represents the range of that group’s representation among Bay Area jurisdictions. The smallest range is among jurisdictions’ moderate-income populations, while Bay Area jurisdictions vary the most in the share of their population that is above moderate-income. Additionally, the black lines within each income group note the percentage of Unincorporated Santa Clara County population represented by that group and how that percentage ranks among other jurisdictions. Local staff can use this chart to compare the representation of different income groups in their jurisdiction to those groups’ representation in other jurisdictions in the region, which can indicate the extent of segregation between this jurisdiction and the region.

¹⁵ While comparisons of segregation measures are made only using the 104 jurisdictions with more than one census tract, this comparison of jurisdiction level demographic data can be made using all 109 jurisdictions.

Figure 13: Income Demographics of Unincorporated Santa Clara County Compared to Other Bay Area Jurisdictions (2015)

Universe: Bay Area Jurisdictions.

Source: U.S. Department of Housing and Urban Development, American Community Survey 5-Year 2011-2015 Low- and Moderate-Income Summary Data.

Income segregation between jurisdictions in the region can also be analyzed by calculating regional values for the segregation indices discussed previously. Similar to the regional racial segregation measures shown in Table 5, Table 10 presents dissimilarity index, isolation index, and Theil's H index values for income segregation for the entire nine-county Bay Area in 2010 and 2015. In the previous section of this report focused on neighborhood level income segregation, segregation indices were calculated by comparing the income demographics of the census tracts within a jurisdiction to the demographics of the jurisdiction as a whole. In Table 10, these measures are calculated by comparing the income demographics of local jurisdictions to the region's income group makeup. For example, looking at 2015 data, Table 10 shows the regional isolation index value for very low-income residents is 0.315 for 2015, meaning that on average very low-income Bay Area residents live in a jurisdiction that is 31.5% very low-income. The regional dissimilarity index for lower-income residents and other residents is 0.194 in 2015, which means that across the region 19.4% of lower-income residents would need to move to a different jurisdiction to create perfect income group integration in the Bay Area as a whole. The regional value for the Theil's H index measures how diverse each Bay Area jurisdiction is compared to the income group diversity of the whole region. A Theil's H Index value of 0 would mean all jurisdictions within the Bay Area have the same income demographics as the entire region, while a value of 1 would mean each income group lives exclusively in their own separate jurisdiction. The regional Theil's H index value for income segregation decreased slightly between 2010 and 2015,

meaning that income groups in the Bay Area are now slightly less separated by the borders between jurisdictions.

Table 10: Regional Income Segregation Measures

Index	Group	2010	2015
Isolation Index Regional Level	Very Low-Income (<50% AMI)	0.277	0.315
	Low-Income (50%-80% AMI)	0.157	0.154
	Moderate-Income (80%-120% AMI)	0.185	0.180
	Above Moderate-Income (>120% AMI)	0.467	0.435
Dissimilarity Index Regional Level	Below 80% AMI vs. Above 80% AMI	0.186	0.194
	Below 50% AMI vs. Above 120% AMI	0.238	0.248
Theil's H Multi-income	All Income Groups	0.034	0.032

Universe: Population.

Source: Data for 2015 is from U.S. Department of Housing and Urban Development, American Community Survey 5-Year 2011-2015 Low- and Moderate-Income Summary Data. Data for 2010 is from U.S. Department of Housing and Urban Development, American Community Survey 5-Year 2006-2010 Low- and Moderate-Income Summary Data.

4 APPENDIX 1: SUMMARY OF FINDINGS

4.1 Segregation in Unincorporated Santa Clara County

- The isolation index measures the segregation of a single group, and the dissimilarity index measures segregation between two different groups. The Theil's H-Index can be used to measure segregation between all racial or income groups across the city at once.
- As of 2020, white residents are the most segregated compared to other racial groups in Unincorporated Santa Clara County, as measured by the isolation index. White residents live in neighborhoods where they are less likely to come into contact with other racial groups.
- Among all racial groups, the white population's isolation index value has changed the most over time, becoming less segregated from other racial groups between 2000 and 2020.
- According to the dissimilarity index, within Unincorporated Santa Clara County the highest level of racial segregation is between Latinx and white residents.¹⁶
- According to the Theil's H-Index, neighborhood racial segregation in Unincorporated Santa Clara County declined between 2010 and 2020. Neighborhood income segregation stayed about the same between 2010 and 2015.
- Above Moderate-income residents are the most segregated compared to other income groups in Unincorporated Santa Clara County. Above Moderate-income residents live in neighborhoods where they are less likely to encounter residents of other income groups.
- Among all income groups, the Very Low-income population's segregation measure has changed the most over time, becoming more segregated from other income groups between 2010 and 2015.
- According to the dissimilarity index, segregation between lower-income residents and residents who are not lower-income has increased between 2010 and 2015. In 2015, the income segregation in Unincorporated Santa Clara County between lower-income residents and other residents was higher than the average value for Bay Area jurisdictions.

4.2 Segregation Between Unincorporated Santa Clara County and Other jurisdictions in the Bay Area Region

- Unincorporated Santa Clara County has a higher share of white residents than other jurisdictions in the Bay Area as a whole, a higher share of Latinx residents, a lower share of Black residents, and a lower share of Asian/Pacific Islander residents.

¹⁶ The analysis conducted for this report suggests that dissimilarity index values are unreliable for a population group if that group represents approximately less than 5% of the jurisdiction's total population. ABAG/MTC recommends that when cities have population groups that are less than 5% of the jurisdiction's population (see Table 15 in Appendix 2), jurisdiction staff could focus on the isolation index or Thiel's H-Index to gain a more accurate understanding of neighborhood-level racial segregation in their jurisdiction.

- Regarding income groups, Unincorporated Santa Clara County has a similar share of very low-income residents than other jurisdictions in the Bay Area as a whole, a lower share of low-income residents, a lower share of moderate-income residents, and a higher share of above moderate-income residents.

5 APPENDIX 2: SEGREGATION DATA

Appendix 2 combines tabular data presented throughout this report into a more condensed format. This data compilation is intended to enable local jurisdiction staff and their consultants to easily reference this data and re-use the data in the Housing Element or other relevant documents/analyses.

Table 11 in this appendix combines data from Table 1, Table 2, and Table 3 in the body of the report. Table 12 in this appendix combines data from Table 6, Table 7, and Table 8 in the body of the report. Table 13 represents a duplication of Table 5 in the body of the report; Table 14 represents a duplication of Table 10 in the body of the report; Table 15 in this appendix represents a duplication of Table 4 in the body of the report, while Table 16 represents a duplication of Table 9 in the body of the report.

Table 11: Neighborhood Racial Segregation Levels in Unincorporated Santa Clara County

Index	Race	Unincorporated Santa Clara County			Bay Area Average
		2000	2010	2020	2020
Isolation	Asian/Pacific Islander	0.211	0.236	0.223	0.245
	Black/African American	0.039	0.034	0.041	0.053
	Latinx	0.448	0.495	0.457	0.251
	White	0.587	0.521	0.502	0.491
Dissimilarity	Asian/Pacific Islander vs. White	0.384	0.372	0.280	0.185
	Black/African American vs. White	0.405*	0.416*	0.433*	0.244
	Latinx vs. White	0.471	0.464	0.460	0.207
	People of Color vs. White	0.359	0.355	0.273	0.168
Theil's H Multi-racial	All	0.139	0.145	0.121	0.042

Universe: Population.

Appendix J: Public Comment Summary Table

Public Comment Summary Table			
#	Comment Group	Details	Response
1	Fair Housing	<p>A comment letter was received from the Law Foundation of Silicon Valley and the Public Interest Law Project, advocating for increased analysis, new and stronger programs, and more specific timelines in the Housing Element, specifically centering the needs of tenants, unhoused or at-risk residents, and historically marginalized communities. The included recommendations can be summarized as:</p> <ul style="list-style-type: none"> • Strengthen assessment of fair housing; • Improve affordable housing availability by analyzing and removing constraints; • Identify adequate sites to accommodate the Regional Housing Needs Allocation; • Strengthen programs; and • Strengthen special needs housing analysis and goals. 	<p>The commenters provide detailed feedback and recommendations, and County staff continue to carefully review and consider the policy and program recommendations advocated for in this letter. Moreover, the County has engaged two consulting firms to bolster the assessment of fair housing and to provide support in evaluating how the County might further support fair housing in the region.</p>
2	Tiny Homes / Vista Ave.	<p>25 emails and several phone calls were received on the topic of tiny homes or otherwise housing the unhoused, particularly regarding one property on Vista Ave. in San José (APN 599-39-047). Concerns revolved around potential impacts to the neighborhood from housing the unhoused. Some comments voiced concerns more generally around any additional housing development and potential impacts to their neighborhood character, property values, and quality of life.</p>	<p>The County Housing Element does not include any proposal to develop tiny homes. The origin of this misunderstanding is not clear, but it seems specific to residents in one neighborhood. The County is working to clarify the role and function of the Housing Element and is conducting additional outreach to this specific neighborhood to alleviate such concerns and rectify any misunderstanding.</p>
3	Constraints Analysis	<p>One email was received regarding the Constraints Analysis of the Housing Element, positing that County development standards place an undue constraint on new housing development in rural areas. The comments specifically address road standards, site improvements, and electrification requirements for new single-family homes in rural areas, as well as the review process for such development. The commenter also acknowledges Santa Clara Valley Habitat Plan mitigation fees as a potential hindrance to rural development.</p>	<p>Additional information and context have been added to the Constraints Analysis, where appropriate. The commenter discusses certain constraints outside the realm of analysis for the Housing Element.</p>

County of Santa Clara – Draft Sixth Cycle (2023-2031) Housing Element Update
Public Comment Summary Table

4	Inclusion of Rural Properties	Two comment letters were received from property owners/groups advocating for the inclusion of their properties in the rural unincorporated parts of South County; one suggests that the inclusion of their property could advance fair housing goals by promoting development in rural areas.	Several challenges and concerns have resulted in County staff determining that the development of higher-density housing in the rural unincorporated areas is prohibitively difficult and unlikely to occur during the 2023-2031 planning period. Significantly, this is due to rural unincorporated properties lacking the ability to access municipal services like water and sewer. Furthermore, such development would be in conflict with numerous State goals and local policies.
5	Exclusion of Rural Properties	Two comment letters were received, one from the Santa Clara Valley Open Space Authority and one from Green Foothills, supportive of the exclusion of rural properties from the site inventory, due to potential negative effects from sprawl development and the loss of natural and working lands.	Comments acknowledged; no revisions necessary.
6	Stanford	Two comment letters were received specific to development on the campus of Stanford University, one from the City of Palo Alto and one from the University. The City's letter consists of several specific requests regarding the preparation of the Draft EIR. The University's letter consists of several clarifying questions and requests for additional information.	County Staff has responded to the commenters and made clarifications in sections of the Housing Element pertaining to Stanford. The City's comments are directed at the Draft EIR and County Staff is considering these comments under the CEQA process.
7	Assistance	Two emails and several phone calls seeking assistance with accessing information and/or additional time to review and comment on the draft Housing Element.	Comments acknowledged; no revisions necessary.
8	Burbank	Three emails were received regarding potential development in the Burbank area, expressing concerns about the neighborhood character, historic interest, and visual impact of multifamily housing development.	Comments acknowledged; no revisions necessary.
9	Pleasant Hills	Three emails were received regarding the Pleasant Hills site (APNs: 649-23-001 and 649-24-013). One commenter expresses a concern with potential parking and vehicle traffic impacts. Another commenter expresses concern that the development of this site could result in accelerated poverty and economic segregation and that the site is only suitable for low-density without increased public transportation options. Another commenter advocates for the inclusion of publicly accessible open space in the development plans for this site.	Comments acknowledged; no revisions necessary.

County of Santa Clara – Draft Sixth Cycle (2023-2031) Housing Element Update
Public Comment Summary Table

10	Cambrian Park	One comment letter was received representing three property owners concerned with the potential development of a specific parcel in the Cambrian Park area (APN 419-12-044), adjacent to their properties. Concerns revolved around compromised privacy and property values resulting from a taller structure being developed. Another email was received regarding this area and concerns about increased traffic.	Comments acknowledged; no revisions necessary.
11	Alum Rock / East Foothills	One email was received about the properties listed in the site inventory within the Alum Rock / East Foothills area, expressing concerns that these sites are not suited to high-density housing, for very low-income households, or for further development of any kind.	Comments acknowledged; no revisions necessary.
12	Eminent Domain	Two emails were received by property owners concerned about the seizure of their property, by eminent domain, for the production of new housing.	Comments acknowledged; no revisions necessary. The County Housing Element does not propose or consider seizure by eminent domain. Furthermore, these property owners received a notice due to their proximity to a parcel in the site inventory and their property itself is not included in the site inventory.
13	Comment Form Submissions	<p>Comments have been continuously received via the online webpage form that accompanies the ability for individuals to sign up for future updates on the County Housing Element. During the 30-day comment period for the draft Housing Element, six comments were received on the draft:</p> <ul style="list-style-type: none"> • Two state interest in receiving general information and further updates; • One is a duplicate of a letter received by email; • One comments that traffic is already bad and inquires as to what traffic-relieving measures will accompany plans for new housing; • One is supportive of excluding rural properties from the site inventory, comments on the need for housing in urban areas near amenities, and advocates for Stanford to provide affordable housing for all of its employees on or adjacent to its campus; • One asks how many County-owned assets could be used for affordable housing or shelter/emergency facilities with services and advocates for such use. 	Comments acknowledged; no revisions necessary.

Appendix K: Status of Programs from 2015 Housing Element Update

Purpose of Review

State law (California Government Code Section 65588(a)) requires each jurisdiction to review its housing element as frequently as is appropriate and evaluate:

- The appropriateness of the housing goals, objectives, and policies in contributing to the attainment of the state housing goal.
- The effectiveness of the housing element in attainment of the community's housing goals and objectives.
- The progress in implementation of the housing element.

According to the State Department of Housing and Community Development (HCD), the review is a three-step process:

- Review the results of the previous element's goals, objectives, and programs. The results should be quantified where possible but may be qualitative where necessary.
- Compare what was projected or planned in the previous element to what was actually achieved. Determine where the previous housing element met, exceeded, or fell short of what was anticipated.
- Based on the above analysis, describe how the goals, objectives, policies, and programs in the updated element are being changed or adjusted to incorporate what has been learned from results of the previous element.

Jurisdictions are also required to provide an evaluation of the cumulative effectiveness of goals, policies, and related actions in meeting the housing needs of special needs populations. These evaluations follow below, starting with the housing needs of special needs populations.

Review of Housing Element Implementation Programs

The County evaluated the effectiveness of each 5th Cycle Housing Element Program to determine whether the program was completed, required modification and/or should continue, or if it was no longer appropriate.

Effectiveness in Meeting the Housing Needs of Special Needs Populations

During the 2015-2023 Housing Element planning period, the County was successful in implementing multiple housing element programs to address housing for the County's most vulnerable populations. The landscape of housing production also changed significantly during this period, and the County was steadfast in its response to pivot and work closely throughout the county to leverage streamlining opportunities to accelerate the production of housing. In addition, approval of the 2016 "Measure A" Affordable Housing Bond by the voters in November 2016 provided much-needed local resources that positioned the County to significantly address the housing needs of the community's poorest and most vulnerable residents, which includes special needs populations.

The County's efforts to provide housing for a variety of special needs populations including seniors, veterans, transitioned aged youth, survivors of domestic violence, agricultural workers, individuals with an intellectual and developmental disability, homeless and chronically homeless individuals with a serious mental illness. The County's work can be summarized in three categories of work:

Housing Element Update 2023-2031

Status of Programs from 2015 Housing Element Update

- Permanent Housing: Since 2015, the County has helped support the funding of 66 affordable housing developments for a variety of special needs populations, as summarized below. The County has been successful in achieving these outcomes through the implementation of the 5th Cycle Housing Element housing programs.
 - 6,231 units of permanent supportive housing and affordable housing serving a variety of special needs populations including but not limited to seniors, transition aged youth, survivors, veterans, agricultural workers, and individuals with an intellectual or development disability.
 - Implemented the allocation of 1,031 Emergency Housing Vouchers in partnership with the Santa Clara County Housing Authority to permanently house special needs populations.
- Homelessness Prevention: In 2017, the County in partnership with other public agencies, private funders, and non-profit services providers launched a Pilot Homelessness Prevention System Pilot (HPS Pilot) with Destination Home serving as the Administrative Lead. Since 2017, the HPS Pilot has served 14,005 individuals from 5,041 households at imminent risk of homelessness. 97% of families remained stably housed while receiving prevention services.
- Temporary Shelter: Since 2015, the County and its partners have significantly increased the number of new emergency shelters/interim housing sites across the County. Specifically, the County took extraordinary measures to increase operational funding for existing and new emergency shelters and transitional housing programs. These measures ensured that all major shelter and transitional housing beds/units in Santa Clara County were available for use.
 - In partnership with HCD, the County provided housing to seasonal agricultural workers through a long-term ground lease by the County for the Arturo Ochoa Migrant Center.
 - In March 2020, the Governor issued Executive Order N-32-20 urging a focused approach to bring unsheltered Californians indoors by increasing shelter and housing inventory. The order suspended certain regulations if specific State funding was used to increase housing capacity during the State of Emergency. During this time the County implemented an Isolation and Quarantine Support Program to slow the spread of COVID-19 by offering isolation and quarantine support to COVID-19 positive persons and persons who have been in close contact with COVID-19 positive persons. From June 17, 2020, through May 19, 2022, the IQ Program placed 4,014 households in hotels to safely isolate or quarantine and provided support to 8,649 households to isolate and quarantine in their own homes. In addition, through the IQ Program provided nearly \$19M in financial assistance to 10,505 households.

Appropriateness of 5th Cycle Program for Inclusion in 6th Cycle Housing Element Update

Many of the 5th Cycle Housing Element's programs were effective and remain relevant today. However, the housing landscape has shifted such that several programs were consolidated to better reflect the current operating structure of the County as a leader in the production of affordable and supportive housing throughout the county.

Table 1: Housing Element Program Accomplishments 2015-2022

Name of Program in 2015 Housing Element Update	Objective 2015-2022	Progress/Status
4.06.02 San Andreas Regional Center (SARC)	Continue to provide assistance to all eligible people in Santa Clara County.	<p>Program Implementation: This program met its objectives. On June 15, 2020, the County’s and SARC’s collaboration culminated in a Memorandum of Understanding that facilitates referral of County clients to SARC for assessment for services and referral of SARC clients who are at-risk and homeless to the County for homelessness prevention services and supportive housing.</p> <p>Continued Appropriateness: Modified This program has been updated and is included in the 2023 – 2031 Housing Element Update under Program Number 1.20: San Andreas Regional Center.</p>
4.03.01 Urban County Housing Rehabilitation Program	Two single-family rehabilitation loan projects and four single-family rehabilitation grant projects per year.	<p>Program Implementation, 2015-2021: The program was discontinued from 2015 to 2016 and relaunched in 2017. Between 2017 and 2021 the program disbursed a total of \$644,754 to help 14 households with low-interest deferred loans to address code enforcement issues on their property.</p> <p>In 2017-18, the Program expended \$495,941 and assisted three low-income homeowners.</p> <p>In 2018-19, the Program expended \$91,776 for rehabilitation loans and grants to seven low-income homeowners.</p> <p>In 2019-20, the Program expended \$4,980 for a rehabilitation loan to one low-income homeowner.</p> <p>In 2020-2021, the Program expended \$52,057 for rehabilitation grants to three low-income homeowners.</p> <p>Continued Appropriateness: Removed The program ended in FY 2021 and will not continue into the new planning period. Unfortunately, the program was not successful. In most cases the amount of work</p>

Housing Element Update 2023-2031
 Status of Programs from 2015 Housing Element Update

Name of Program in 2015 Housing Element Update	Objective 2015-2022	Progress/Status
		<p>needed to completely resolve a code enforcement case was higher than the amount households are eligible for. Separately, the amount of staff time needed to coordinate between the homeowner and the contractor made this program infeasible. The County will continue to fund Rebuilding Together Silicon Valley with CDBG funding to provide minor emergency home repairs to Urban County residents (2023-2031 Program Number 1.35: Minor Home Repair and Maintenance Program).</p>
<p>4.03.02 Low Income Housing Tax Credit Program</p>	<p>Rehabilitate 500 additional low-income housing tax credit housing projects.</p>	<p>Program Implementation: Although this is not a housing program, this program was included in the 2015-2022 Housing Element. The program was intended to secure LIHTC funds to rehabilitate existing affordable housing units.</p> <p>Continued Appropriateness: Removed Because the County does not control these funds and this is not a housing program, this program is not included in the 2023-2031 Housing Element. Low Income Housing Tax Credits continue to be a source for subsidizing the construction and rehabilitation of affordable housing developments. Applications for these types of projects are considered under the County's Supportive Housing Development N</p>
<p>4.03.04 Rebuilding Together Silicon Valley (RTSV)</p>	<p>Complete repairs on 22 homes per year.</p>	<p>Program Implementation, 2015-2022: Through CDBG funds, the RTSV program assisted low-income homeowners with completing deferred maintenance or emergency repairs to their homes during the following periods:</p> <p>In 2015-16, RTSV assisted 54 low-income homeowners. In 2016-17, RTSV assisted 60 low-income homeowners.</p> <p>In 2017-18, RTSV assisted 68 low-income homeowners. In 2018-19, RTSV assisted 57 low-income homeowners.</p>

Housing Element Update 2023-2031
 Status of Programs from 2015 Housing Element Update

Name of Program in 2015 Housing Element Update	Objective 2015-2022	Progress/Status
		<p>In 2019-2020, RTSV assisted 47 low-income homeowners. In 2021-21, RTSV assisted 59 low-income homeowners.</p> <p>Continued Appropriateness. Continued. This program has been updated and is included in the 2023 – 2031 Housing Element under Program Number 1.35: Minor Home Repair and Maintenance Program.</p>
4.03.05 Housing Conditions Survey	Conduct one survey per Planning Period.	<p>Program Implementation, 2015-2022: This program was not completed during the reporting year.</p> <p>Continued Appropriateness: The program is absorbed in the current housing element cycle under Program Number 2.06: Conduct Farmworker Housing Needs Assessment and Program Number 2.28: Tracking Housing Conditions.</p>
4.03.06 CDBG Capital Improvements / Public Benefits	Two projects per year for each of the six participating jurisdictions.	<p>Program Implementation, 2015-2022: In 2015-16, the third phase of improvements at Galvan Park in Morgan Hill were completed. This work included replacement of aging and unsafe children’s playground structure and the construction of curb cuts and ramps leading into the park. Community Development Block Grant funding, which may be used for capital improvement and public benefits projects, was used to fund this project.</p> <p>In 2016-17, the following projects were completed with these funds: Campbell’s Accessibility Ramps Project, Los Altos’ Parking Plaza Drive Approach Improvement Project, and Saratoga’s Senior Center Improvement Project.</p> <p>In 2017-18, three capital improvement projects were completed with these funds: Los Altos Pedestrian Walkway Improvement Project, the Saratoga Senior Center Improvement Project, and the final phase of Morgan Hill’s Galvan Park Improvements Project.</p>

Housing Element Update 2023-2031
 Status of Programs from 2015 Housing Element Update

Name of Program in 2015 Housing Element Update	Objective 2015-2022	Progress/Status
		<p>In 2019-2020, no new projects were completed.</p> <p>In 2020-21, a sidewalk improvement project along El Monte Road in the City of Los Altos was completed using CDBG/public benefits funds. This project included the installation of sidewalks, curb ramps and the removal of access barriers.</p> <p>Continued Appropriateness: Removed</p> <p>Because this is not a housing program and offers capital improvement grants to cities that form the Urban County as part of the County’s implementation of Community Development Block Grant funds, it is not included in the 2023 – 2031 Housing Element. The County will continue to provide access to this funding for public benefits projects but outcomes will not be reported as part of the Housing Element Annual Reports.</p>
<p>4.04.01 Mortgage Credit Certificate (MCC) Program</p>	<p>Issue approximately 130 MCCs annually.</p>	<p>Program Implementation, 2015-2021:</p> <p>Between 2016 and 2021, the County issued 92 MCCs total:</p> <p>In 2016, the County issued 24 MCCs. In 2017, the County issued 28 MCCs. In 2018, the County issued 13 MCCs. In 2019, the County issued 10 MCCs. In 2020, the County issued 9 MCCs. In 2021, the County issued 8 MCCs.</p> <p>The County works with a variety of lenders to administer the MCC Program. The County routinely recruits new lenders while maintaining its existing partnerships. These lenders include banks, credit unions, and private institutions, all with different specialties and loan options. The County works closely with these approved lenders to actively increase awareness about, and promote use of, the program for qualified applicants.</p> <p>Continued Appropriateness. Continued</p> <p>This program has been updated and is included in the 2023 – 2031 Housing Element Update</p>

Housing Element Update 2023-2031
 Status of Programs from 2015 Housing Element Update

		under Program No. 1.05: Mortgage Credit Certificate (MCC) Program.
4.04.03 Section 8 Housing Choice Voucher (HCV) Program	Maintain full lease-up.	<p>Program Implementation, 2015-2021: As of 2021, the SCCHA had 16,775 authorized HCVs (not including its Project Based Vouchers). Turnover vouchers are given to low-income individuals and families from the HCV waiting list.</p> <p>In December 2020, SCCHA launched an online, permanently-open interest list for Section 8 (including site-based lists for PBV and Mod Rehab properties). Households can sign up and update their application at any time. Applicants are selected via a random drawing when vouchers become available.</p> <p>Currently, there are over 34,000 active applicants on the interest list. SCCHA has drawn all remaining applicants from its prior HCV waiting list and will draw from the new interest list as vouchers become available. Additionally, SCCHA has 2,020 HUD-issued special purpose vouchers that are allocated to assist certain special needs populations, including the non-elderly disabled, homeless veterans, the homeless disabled and separated families awaiting reunification.</p> <p>In 2021, SCCHA received 1,033 Emergency Housing Vouchers (EHV) made available through the American Rescue Plan Act (ARPA) to assist individuals and families who are homeless, at-risk of homelessness, fleeing or attempting to flee domestic violence, dating violence, sexual assault, stalking, or human trafficking, or were recently homeless or have a high risk of housing instability.</p> <p>In terms of maintaining full lease-up:</p> <p>In 2015, SCCHA maintained 86.25% lease-up of its authorized vouchers.</p>

		<p>In 2016, SCCHA maintained 86.11% lease-up of its authorized vouchers.</p> <p>In 2017, SCCHA maintained 86.39% lease-up of its authorized vouchers.</p> <p>In 2018, SCCHA maintained 86.19% lease-up of its authorized vouchers.</p> <p>In 2019, SCCHA maintained 88.64% lease-up of its authorized vouchers.</p> <p>In 2020, SCCHA maintained 89.91% lease-up of its authorized vouchers.</p> <p>In 2021, SCCHA maintained 88.22% lease-up of its authorized vouchers.</p> <p>Continued Appropriateness: Consolidated This program has been updated and is included in the 2023 – 2031 Housing Element Update under Program No. 1.16: Collaborate with the Santa Clara County Housing Authority.</p>
<p>4.04.05 Project Based (Section 8) Voucher Program (PBV)</p>	<p>Convert 565 tenant-based vouchers into project-based vouchers.</p>	<p>Program Implementation, 2015-2021: During 2015-2021, SCCHA “project-based” 1,367 of its vouchers (breakdown below). SCCHA currently has 2,803 Project Based Vouchers. These commitments provide affordable housing for low-income elderly, persons with disabilities, and homeless and families with children. PBV units are located in cities (Campbell, Cupertino, Gilroy, Los Gatos, Milpitas, Morgan Hill, Mountain View, Palo Alto, San Jose, Santa Clara, and Sunnyvale) throughout Santa Clara County.</p> <p>Project-based Voucher Breakdown for 1,367 vouchers:</p> <p>In 2015, 4 PBV contracts for 26 units.</p> <p>In 2016, 4 PBV contracts for 75 units.</p> <p>In 2017, 2 PBV contracts for 131 units.</p>

Housing Element Update 2023-2031
 Status of Programs from 2015 Housing Element Update

Name of Program in 2015 Housing Element Update	Objective 2015-2022	Progress/Status
		<p>In 2018, 8 PBV contracts for 196 units.</p> <p>In 2019, 10 PBV contracts for 284 units.</p> <p>In 2020, 8 PBV contracts for 367 units.</p> <p>In 2021, 6 PBV contracts for 288 units.</p> <p>Continued Appropriateness: Consolidated This program has been updated and is included in the 2023 – 2031 Housing Element Update under Program No. 1.16: Collaborate with the Santa Clara County Housing Authority.</p>
4.04.06 Conventional Public Housing	Transition remaining 20 public housing units to non-public housing, 100% project-based units.	<p>Program Implementation, 2015-2021: SCCCHA has disposed of or transitioned most of its Public Housing, with only 4 units remaining.</p> <p>Continued Appropriateness: Deleted This program has concluded and is not included in the 2023 – 2031 Housing Element Update. The County will continue to coordinate with the Santa Clara County Housing Authority under Program No. 1.16: Collaborate with the Santa Clara County Housing Authority.</p>
4.04.07 Section 8 Homeownership Program	Continue to provide mortgage assistance to those families already enrolled in the program.	<p>Program Implementation, 2015-2021: The number of families receiving homeownership assistance through this program declined as homeowners reached the end of their assistance term limit or the end of their mortgage term.</p> <p>Homeownership program participation was as follows: 2015, 8 participants 2016, 8 participants 2017, 7 participants 2018, 6 participants 2019, 5 participants 2020, 5 participants 2021, 4 participants</p> <p>Continued Appropriateness: Deleted This program is not enrolling new participants and is not included in the 2023 – 2031 Housing Element Update.</p>

Housing Element Update 2023-2031
 Status of Programs from 2015 Housing Element Update

Name of Program in 2015 Housing Element Update	Objective 2015-2022	Progress/Status
04.04.08 Family Self-Sufficiency Program (FSS)	Develop and build a new, enhanced self-sufficiency program: Focus Forward.	<p>Program Implementation: In 2015, the Program enrolled 63 new families, graduated 33 and distributed \$270,280.51 in escrow funds to graduates.</p> <p>In 2016, the Program enrolled 61 new families, graduated 22 and distributed \$156,427.34 in escrow funds to graduates.</p> <p>In 2017, the Program enrolled 63 new families, graduated 14 and distributed \$145,696.28 in escrow funds to graduates.</p> <p>In 2018, the Program enrolled 96 new families, graduated 10 and distributed \$135,556.92 in escrow funds to graduates.</p> <p>In 2019, the Program enrolled 87 new families, graduated 14 and distributed \$220,227.75 in escrow funds to graduates.</p> <p>In 2020, the Program enrolled 83 new families, graduated 28 and distributed \$548,470.59 in escrow funds to graduates.</p> <p>In 2021, the Program enrolled 108 new families, graduated 36 and distributed \$597,759.22 in escrow funds to graduates.</p> <p>Continued Appropriateness: Deleted This program has concluded and is <u>not</u> included in the 2023 – 2031 Housing Element Update. The County will continue to coordinate with the Santa Clara County Housing Authority under Program No. 1.16: Collaborate with the Santa Clara County Housing Authority.</p>
04.04.09 Moving To Work Program (MTW)	Continue to serve the maximum number of families based on the funding received.	<p>Program Implementation: Through 2021, the MTW Program served over 19,000 low-income families with/through rental assistance vouchers (including its Housing Choice and Project Based Voucher Programs) and SCCHA directly- or indirectly-owned affordable housing properties.</p>

Housing Element Update 2023-2031
 Status of Programs from 2015 Housing Element Update

Name of Program in 2015 Housing Element Update	Objective 2015-2022	Progress/Status
		<p>SCCHA has 50 unique initiatives through the MTW Program, allowing for statutory deviations such as: revising the way rent is calculated under the Section 8 Program, encouraging housing stability with the use of project-based vouchers, reducing the frequency of HUD-required reexaminations, and expediting the lease up process by consolidating or eliminating forms and processes.</p> <p>Continued Appropriateness: Deleted</p> <p>This program was completed and is not included in the 2023 – 2031 Housing Element Update. The County will continue to coordinate with the Santa Clara County Housing Authority under Program No. 1.16: Collaborate with the Santa Clara County Housing Authority.</p>
4.04.10 County Office of Affordable Housing (OAH)	Continue to assist in the development of new affordable housing units.	<p>Continued Appropriateness: Deleted</p> <p>This is not a housing program and is not included in the 2023-2031 Housing Element Update. In 2015 the County merged the Office of Affordable Housing and the Office of Homeless Concerns to form the Office of Supportive Housing. Since 2015, the Office of Supportive Housing has played an integral role in assisting in the development of new affordable housing units throughout the County.</p>
04.04.11 SCC 40K Down payment Assistance Program	Issue 6 loans annually.	<p>Program Implementation:</p> <p>This program was offered from Fiscal Year 2006 through 2014. The County did not operate this program during the 2015 – 2022 Housing Element planning period. Since this program was primarily funded with HOME funding allocated to the County through the U.S. Department of Housing and Urban Development there was a cap placed on the maximum funding that could be provided to eligible homeowners. Given the local market conditions and expensive real estate market, using this source of funds to run this program was not effective.</p> <p>Continued Appropriateness: Deleted</p>

		<p>This program has concluded and is not included in the 2023 – 2031 Housing Element Update. The County provides assistance to First Time Homebuyers through Program No. 1.04: Empower Homebuyers SCC</p>
<p>4.04.12 Low and Moderate Income Housing Fund</p>	<p>To transfer both the current balance and any outstanding amounts to the County’s Affordable Housing Fund, or a similar fund.</p>	<p>Program Implementation: Funding was successfully consolidated and moved into the Affordable Housing Fund.</p> <p>Continued Appropriateness: Deleted This program has concluded and is not included in the 2023 – 2031 Housing Element Update.</p>
<p>4.04.15 SCC Mental Health Department Evans Lane Wellness and Recovery Center</p>	<p>Serve individual adults who suffer from a mental illness, substance use, and co-occurring disorders who are involved in the criminal justice system. The program includes Residential and Outpatient services. These two distinct programs are featured on one campus. The Residential Program provides housing, support, and care to the justice involved population. The Residential Program supports the participants by providing evening and weekend groups and activities.</p>	<p>Program Implementation: The program served 434 clients between FY21 and FY22.</p> <p>Continued Appropriateness: Continued This ongoing program has been updated and is included in the 2023-2031 Housing Element Update under Program Number 3.02 SCC Mental Health Department Evans Lane Wellness and Recovery Center SCC Mental Health.</p>
<p>4.05.01 Community Development Block Grant Program (CDBG)</p>	<p>Pursue objectives per the County of Santa Clara Consolidated Plan 2010-2015.</p>	<p>Program Implementation: The County met its objectives of pursuing 2010-2015 Consolidated Plan objectives. Including subsequent Consolidated Plan periods, between 2015 – 2022 the County supported development and preservation of 458 units of affordable and supportive housing; development of 4 capital improvement projects to enhance neighborhoods; assistance to 671 low-income homeowners with maintenance and emergency repairs; assistance to 20,893 low-income persons with shelter, housing, legal services, counseling, and other supportive services; and assistance to 502 community members with fair housing issues.</p>

Housing Element Update 2023-2031
 Status of Programs from 2015 Housing Element Update

Name of Program in 2015 Housing Element Update	Objective 2015-2022	Progress/Status
		<p>Continued Appropriateness: Modified and Consolidated</p> <p>This program has been updated and is included in the 2023 – 2031 Housing Element Update under Program Number 1.01: Supportive Housing Development Fund Notice of Funding Availability (SHDF NOFA).</p>
4.05.02 Affordable Housing Fund (AHF)	Continue efforts to lobby for future funding.	<p>Program Implementation:</p> <p>The County met its objective. During the planning period, on November 8, 2016, the people of the County of Santa Clara approved the 2016 Measure A Affordable Housing Bond, a proposition authorizing the County to issue up to \$950 million in general obligation bonds to acquire or improve real property for the purpose of providing affordable housing for vulnerable populations throughout the County.</p> <p>Continued Appropriateness: Consolidated</p> <p>This program has been updated and is included in the 2023 – 2031 Housing Element Update under Program Number 1.01: Supportive Housing Development Fund Notice of Funding Availability (SHDF NOFA).</p>
4.05.03 Stanford Affordable Housing Fund	Release a Notice of Funding Availability in 2014.	<p>Program Implementation</p> <p>The County met this program’s objective. On September 6, 2019, The Office of Supportive Housing issued a formal Notice of Funding Availability (NOFA) to support the availability of funding for the development of new, permanent affordable housing for the community’s most vulnerable populations. The NOFA highlighted the various funding available including the funds in the Stanford Affordable Housing Fund. During the reporting period of 2015-2022, the SAHF funded the use of \$14.5M to preserve a 116 mobile home park in the City of Palo Alto and \$6M towards an educator workforce development site in Palo Alto that will include 110 units.</p> <p>Continued Appropriateness: Consolidated</p> <p>This program has been updated and is included in the 2023 – 2031 Housing Element Update under Program Number 1.01: Supportive</p>

Housing Element Update 2023-2031

Name of Program in 2015 Housing Element Update	Objective 2015-2022	Progress/Status
		Housing Development Fund Notice of Funding Availability (SHDF NOFA).
4.05.04 Home Investment Partnership Act (HOME)	Pursue objectives per the County of Santa Clara Consolidated Plan 2010-2015..	<p>Progress in Implementation: The County met its objectives of pursuing 2010-2015 Consolidated Plan objectives. From 2015 to 2021, the County utilized HOME funds to assist in the development of the following housing projects:</p> <p>One housing development project, Parkside Studios in Sunnyvale, created 59 units of affordable housing. Eighteen (18) of the units have been set aside for chronically homeless individuals or families who are in need of permanent supportive housing.</p> <p>One housing development project, Onizuka Crossing in Sunnyvale, created 58 units of affordable housing. Twenty-three of the units are set aside for chronically homeless individuals or families who need permanent supportive housing. Onizuka Crossing also set aside six units for homeless or chronically homeless veterans.</p> <p>Two new housing developments, Morgan Hill Family Apartments and Edwina Benner Plaza, completed construction. These developments added 106 affordable housing units with 28 units set aside as permanent supportive housing and two manager units.</p> <p>Two existing multi-family affordable housing developments, Redwoods and Wheeler Manor, consisting of 132 units of affordable housing and two unrestricted manager units, were renovated. In addition, these projects included the construction of seven new units.</p> <p>One new housing development, The Veranda, added 18 affordable housing units with 6 units set aside as permanent supportive housing (PSH) and one manager unit.</p> <p>Continued Appropriateness: Consolidated</p>

Housing Element Update 2023-2031
 Status of Programs from 2015 Housing Element Update

Name of Program in 2015 Housing Element Update	Objective 2015-2022	Progress/Status
		<p>This program has been updated and is included in the 2023 – 2031 Housing Element Update under Program Number 1.01: Supportive Housing Development Fund Notice of Funding Availability (SHDF NOFA).</p>
<p>4.05.05 Housing Trust Silicon Valley (HTSV)</p>	<p>Make loans to create and preserve affordable rental housing, housing for the homeless and persons with special needs; provide loans for first-time homebuyers; and provide homeless assistance grant programs and foreclosure prevention help.</p>	<p>Program Implementation: HTSV met its objectives. As of the end of 2022, HTSV had assisted 45,297 individuals through its various programs:</p> <p>2,584 homes have been purchased with the assistance of the First-time Homebuyer Programs.</p> <p>15,149 units of affordable housing have been created through HTSV’s Multi-Family Loan Program.</p> <p>7,572 individuals were assisted through HTSV’s homelessness prevention and assistance grants.</p> <p>1,518 homeowners received assistance with foreclosure-related issues through the Foreclosure HelpSCC program, which operated between 2012 and 2015.</p> <p>Continued Appropriateness: Modified</p> <p>This program has been updated and is included in the 2023 – 2031 Housing Element Update under Program Number 1.09: Housing Trust Silicon Valley.</p>
<p>4.05.06 Housing Authority of the County of Santa Clara (SCCHA)</p>	<p>Develop additional units of affordable housing.</p>	<p>Program Implementation: This program exceeded its objective. In 2016, SCCHA rehabbed Poco Way Apartments, which consists of 130 family units.</p> <p>In 2017, SCCHA purchased a mobile home park in Palo Alto, and is working on replacing homes at the park and other renovations that allow for both preservation of the mobile home park and redevelopment of the site to include multi-family housing development. / .</p>

		<p>Understanding that facilities referral of County clients to SARC for assessment for services and referral of SARC clients who are at-risk and homeless to the County for homelessness prevention services and supportive housing.</p> <p>Continued Appropriateness: Modified This program has been updated and is included in the 2023 – 2031 Housing Element Update under Program Number 1.20: San Andreas Regional Center.</p>
4.06.03 Mental Health Advocacy Project (MHAP)	Continue to provide legal and advocacy services to over 4,000 clients per year.	<p>Program Implementation: Every year during the 2015-2018 period, MHAP met its annual objectives:</p> <p>Responded to twelve (12) requests for short-term assistance on housing problems,</p> <p>Provided consultations, investigations, and/or representation to eight (8) clients,</p> <p>Presented five (5) educational workshops in the Urban County to landlords, tenants and other community members about housing rights.</p> <p>In 2018, the MHAP program was discontinued. A new program, the Law Foundation of Silicon Valley – Housing Department, replaced it. Between 2019-2021, the Law Foundation of Silicon Valley – Housing Department met or exceeded the objectives.</p> <p>Continued Appropriateness: Completed Though the County is not currently funding this program, and therefore has not included it in the 2023-2031 Housing Element Update. The County will continue to explore opportunities to partner with the Law Foundation of Silicon Valley and serve community members.</p>
4.06.04 Fair Housing Audit and Education Program	Continue to audit, design effective outreach materials , and hold trainings for housing providers found non-compliant during audits.	<p>Program Implementation: The program met or exceeded its goals. This program continued to operate as a County-funded program through 2018. Project Sentinel continues to operate this program. Despite COVID-19 conditions that prevented in-person</p>

Housing Element Update 2023-2031
 Status of Programs from 2015 Housing Element Update

Name of Program in 2015 Housing Element Update	Objective 2015-2022	Progress/Status
		<p>outreach and education over the last two years, this program met or exceeded the case goals for the 7 years between 2015 and 2022.</p> <p>The program’s overall effectiveness was high, as demonstrated by the following results:</p> <p>For Fiscal Year 2015-2016, Project Sentinel was contracted to open 15 complaint or audit investigations in that year and exceeded that goal at 16.</p> <p>For Fiscal Years 2016-17 and 2017-18, Project Sentinel was contracted to open 28 complaint or audit investigations in each year and met that goal at 28 for both years.</p> <p>For Fiscal Years 2018-2019 and 2019-20, Project Sentinel was contracted to open 5 complaint or audit investigations in each year and exceeded that goal at 9 for Fiscal Year 2018-19 and 10 for Fiscal Year 2019-20.</p> <p>For Fiscal Years 2020-2021 and 2021-2022, Project Sentinel was contracted to open 6 complaint or audit investigations in each year and exceeded that goal at 11 for Fiscal Year 2020-2021 and 13 for Fiscal Year 2021-2022.</p> <p>Continued Appropriateness: Modified</p> <p>This program has been updated and is included in the 2023 – 2031 Housing Element Update under Program No. 1.15: Fair Housing Audit & Education Program.</p>
4.06.05 Fair Housing Law Project (FHLP)	Serve approximately 100 individuals annually.	<p>Program Implementation:</p> <p>Every year during the 2015-2018 period FHLP met its outcomes by serving approximately 100 individuals annually.</p> <p>Between 2019-2021, these objectives were met or exceeded by the Law Foundation of Silicon Valley – Housing Department program, which replaced FHLP in 2018.</p> <p>Continued Appropriateness: Completed</p>

Housing Element Update 2023-2031
 Status of Programs from 2015 Housing Element Update

Name of Program in 2015 Housing Element Update	Objective 2015-2022	Progress/Status
		<p>Though the County is not currently funding this program, and therefore has not included it in the 2023-2031 Housing Element Update, the County will continue to explore opportunities to partner with the Law Foundation of Silicon Valley and serve community members.</p>
<p>4.06.06 Dispute Resolution Program</p>	<p>Implement a sliding fee for service, implement a web-based case management system, expand outreach to high risk and vulnerable populations.</p>	<p>Program Implementation: These services include mediation, conciliation, and coaching services to any and all Landlords and Tenants within Santa Clara County.</p> <p>Office of Mediation and Ombuds Services (OMOS) continued to provide services free to County residents. OMOS has updated its website and partnered with the City of San Jose Housing Authority to also reach more vulnerable populations. Mediation services are provided by OMOS via Zoom or in person.</p> <p>Continued Appropriateness: Modified</p> <p>The program has been updated and is included in the 2023-2031 Housing Element Update under Program Number 4.01: Dispute Resolution Program</p>
<p>4.06.07 Project Sentinel</p>	<p>Annual Objectives are:</p> <ul style="list-style-type: none"> • Provide information and referral to at least 850 callers from the Urban County; • Investigate a minimum of 42 fair housing violation allegations and/or audits for mostly low income households, including 12 consultations; • Conduct outreach to 20 social service providers on how to identify a fair housing issue and make an effective referral; • Distribute at least 1100 pieces of multi-lingual literature for public access; • Hold 4 tester trainings to increase and to maintain our pool of testers; 	<p>Program Implementation: Many of the goals listed under Program 4.06.07 were in fact goals for the entire Santa Clara County Fair Housing Consortium which, as described above, met its goals during the Fifth Cycle. Project Sentinel met its goals related to its participation in the Santa Clara County Fair Housing Consortium and/or under County contracts related to fair housing work. In particular, Project Sentinel provided low-income residents with counseling regarding their housing rights and obligations, resolved landlord-tenant disputes, and provided mortgage counseling and foreclosure prevention services.</p> <p>In Fiscal Year 2015, this program provided 104 primarily low-income community members (tenants, property managers, and owners) with these services. In Fiscal Year 2016, this program served 114 primarily low-income</p>

	<ul style="list-style-type: none"> • Continue to actively participate in the South County Collaborative; • Provide staff support to the Santa Clara County-Wide Fair Housing Task Force; and • Continue to administer the Fair Housing Retrofit Fund. 	<p>community members. In Fiscal Year 2017, this program served 118 community members. In Fiscal Year 2018, this program served 124 community members. In Fiscal Year 2019, this program served 86 community members. In Fiscal Year 2020, this program served 86 community members. In Fiscal Year 2021, this program served 103 community members. In Fiscal Year 2022, this program served 105 community members. Through December of Fiscal Year 2022, this program served 52 community members.</p> <p>Continued Appropriateness: Modified</p> <p>This program has been updated and is included in the 2023 – 2031 Housing Element Update under Program No. 1.19: Tenant/Landlord Dispute Mediation Services.</p>
4.07.01 Housing Action Coalition (HAC)	Continue to facilitate and advocate for development and community acceptance of affordable housing.	<p>Program Implementation:</p> <p>The County has taken a lead role in the development of affordable housing. County staff meet with City staff on a quarterly basis. Continue to facilitate and advocate for affordable housing.</p> <p>Continued Appropriateness: Consolidated</p> <p>This program has been updated and is included in the 2023 – 2031 Housing Element Update under Program Number 1.10: Santa Clara County CDBG and Housing Coordinators Convenings.</p>
4.07.05 Seniors' Agenda	Be a participant in the Seniors' Agenda process.	<p>Program Implementation:</p> <p>County Planning Office to participate in Seniors Agenda process, and continue to improve availability of Affordable Housing for seniors. Department of Aging and Adult Services (DAAS) is implementing a program to achieve "Age Friendly Cities/County" certification. More information is available in the DAAS 2015 Annual Report.</p> <p>Continued Appropriateness: Deleted</p>

Housing Element Update 2023-2031
 Status of Programs from 2015 Housing Element Update

Name of Program in 2015 Housing Element Update	Objective 2015-2022	Progress/Status
4.08.01 Santa Clara County Homeless Census and Survey	Conduct 2015 and subsequent biennial homeless census/surveys.	<p>The County Planning Office no longer participates in the Seniors Agenda process which is now a part of the DAAS workplan.</p> <p>Program Implementation: The 2015, 2017, and 2019 Homeless Census and Surveys were conducted. The 2021 Homeless Census and Survey was delayed until 2022 because of risks and challenges due to COVID-19. The 2022 Homeless Census and Surveys was conducted in February of 2022.</p> <p>Figures of persons experiencing homelessness in Santa Clara County from the Census and Surveys were:</p> <p>2015: 6,556 persons 2017: 7,394 persons 2019: 9,706 persons 2022: 10,028 persons</p> <p>Continued Appropriateness: Deleted This is not a housing program and therefore is not included in the 2023 – 2032 Housing Element Update. This is an administrative function that the County leads as the Collaborate Applicant for the Santa Clara County Continuum of Care.</p>
4.08.02 Destination: Home	Continues to serve as the convening organization for homelessness strategies.	<p>Program Implementation: Destination: Home continues to serve as the convening organization for the collective impact approach to ending homelessness in Santa Clara County, leveraging funds and resources to support partners in achieving the collective goals using national best practice strategies. Together, these collective impact partners have helped connect more than 20,000 individuals to permanent housing since 2015. Since 2018, Destination: Home has invested more than \$121 million to reduce and prevent homelessness in Santa Clara County.</p> <p>Continued Appropriateness: Modified This program has been updated and is included in the 2023 – 2031 Housing Element Update</p>

Housing Element Update 2023-2031
 Status of Programs from 2015 Housing Element Update

Name of Program in 2015 Housing Element Update	Objective 2015-2022	Progress/Status
		under Program No. 1.28: the Community Plan to End Homelessness.
4.08.03 Keys to Housing	By 2015, the number of units of permanent housing available to chronically unhoused people will increase by 2,500.	<p>Program Implementation: This objective was not met at the end of the 10 years, which led to a more coordinated and robust effort to create the Community Plan to End Homelessness.</p> <p>Continued Appropriateness: Completed Keys to Housing was a 10-year plan that ended in 2015. This program has concluded and is not included in the 2023 – 2031 Housing Element Update. Work to end homelessness continues under Program No. 1.28: The Community Plan to End Homelessness.</p>
4.08.04 Shelter Plus Care (S+C)	Continue to provide rental assistance subsidies for permanent housing to a minimum of 174 homeless individuals and their families annually.	<p>Program Implementation: This program exceeded its objective. The following households/individuals were housed with subsidies in programs receiving Continuum of Care (formerly Shelter Plus Care) funding between calendar years 2015 and 2022:</p> <ul style="list-style-type: none"> • In 2015, 217 households (395 individuals) were housed. • In 2016, 217 households (392 individuals) were housed. • In 2017, 245 households (422 individuals) were housed. • In 2018, 181 households (273 individuals) were housed. • In 2019, 146 households (226 individuals) were housed. • In 2020, 158 households (261 individuals) were housed. • In 2021, 187 households (306 individuals) were housed. • In 2022, 201 households (315 individuals) were housed.

Housing Element Update 2023-2031
 Status of Programs from 2015 Housing Element Update

Name of Program in 2015 Housing Element Update	Objective 2015-2022	Progress/Status
		<p>Continued Appropriateness: Completed This program has concluded and is not included in the 2023 – 2031 Housing Element Update.</p>
<p>4.08.05 Santa Clara County Collaborative on Affordable Housing and Homelessness (Collaborative)</p>	<p>Operate under new governance structure as a Continuum of Care, and continue to submit proposals for McKinney-Vento Act funding annually.</p>	<p>Program Implementation: This program objective was met. The Collaborative operates under a new Continuum of Care (CoC) governance structure, which incorporated CoC planning processes required by HUD and for McKinney-Vento Act funding applications. The Collaborative, now known as the Santa Clara County Continuum of Care (SCC CoC), also met its objective of submitting annual proposals for McKinney-Vento Act funding. The County now serves as the collaborative applicant for the SCC CoC and has successfully transitioned to an updated governance structure.</p> <p>Continued Appropriateness: Completed This program has been completed and is not included in the 2023-2031 Housing Element Update.</p>
<p>4.08.06 McKinney-Vento Act Homeless Program</p>	<p>Apply for McKinney-Vento funds every year through the annual Continuum of Care NOFA process.</p>	<p>Program Implementation: During the 2015 through 2021 Continuum of Care (CoC) Program Funding Competitions, HUD made awards to 232 of the CoC’s projects , including 19 new projects, totaling approximately \$180.6 million.</p> <p>In CY2021, HUD also awarded the CoC a Youth Homelessness Demonstration Program. The CoC received approximately \$10.5 million to develop and implement a coordinated community approach to preventing and ending youth homelessness.</p> <p>Continued Appropriateness: Modified</p>

Housing Element Update 2023-2031
 Status of Programs from 2015 Housing Element Update

Name of Program in 2015 Housing Element Update	Objective 2015-2022	Progress/Status
		<p>This program has been updated and is included in the 2023 – 2031 Housing Element Update under Program Number 1.24: Community Plan to End Homelessness.</p>
<p>4.08.07 Community Technology Alliance (CTA)</p>	<ul style="list-style-type: none"> • Integrate a client-facing resource portal into Homeless Management Information System (HMIS); • Decrease chronic homelessness through enhanced case management and inter-agency referrals through the HMIS SCC system; • Implement a coordinated assessment and intake system to strategically refer clients into the appropriate level of care (temporary financial assistance, emergency shelter, transitional housing, permanent supportive housing, etc.); and • Use HMIS SCC to track progress made on County performance standards and efforts to end and prevent homelessness. 	<p>Program Implementation: The County met its objectives through the partnership with CTA. This program ended because the County, through the Office of Supportive Housing, became the HMIS Lead. This transition provided the necessary leadership through a government entity, which allowed for a seamless understanding of processes for policy making within the Continuum of Care and in local jurisdictions.</p> <p>Continued Appropriateness: Completed This program concluded, is now an administrative function, and is not included in the 2023-2031 Housing Element Update.</p>
<p>4.08.09 Arturo Ochoa Migrant Center</p>	<p>Preservation of 100 units of seasonal farmworker housing.</p>	<p>Program Implementation, 2015-2021: The 100 units were preserved and used every growing season of the program outcome period. The facility was also used as an emergency shelter by homeless individuals and families during the winter season. However, during the program outcome period, the facility stopped providing emergency shelter. HUD Program funds for that purpose were redirected to St. Joseph’s Church in Gilroy.</p> <p>Continued Appropriateness: Completed This program included funding that is no longer available and as such this program has been completed and is not included in the 2023 – 2031 Housing Element Update. However, the</p>

Name of Program in 2015 Housing Element Update	Objective 2015-2022	Progress/Status
		County, as the property owner, continues to make the property available through a lease agreement to continue to operate seasonally as housing for migrant workers.
4.08.10 Office of Housing and Homeless Support Services	<p>Continue to co-produce bi-annual Homeless Census and Survey.</p> <p>Achieve development of 60 unit Park Side Studios project.</p> <p>Achieve development of 60 units Armory Family Housing project.</p>	<p>Program Implementation: The County and its partners successfully completed construction of Park Side Studios and Onisuka Crossing, the 60 unit Armory Family Housing project, during the planning period. The County also continues to produce the bi-annual Homeless Census and Survey as the Collaborative Applicant for the Santa Clara County Continuum of Care.</p> <p>Continued Appropriateness: Deleted This is not a housing program and is therefore not included in the 2023 – 2032 Housing Element Update. This is an administrative function that the County leads as the Collaborate Applicant for the Santa Clara County Continuum of Care. Progress towards housing development is captured under Program 1.01: Supportive Housing Development Fund Notice of Funding Availability (SHDF NOFA).</p>
4.08.13 Finally Home	Continue program	<p>Program Implementation: This was a continued program from the prior Housing Element and there were no notable outcomes.</p> <p>Continued Appropriateness: Completed The Finally Home program was discontinued. This program is not included in the 2023-2031 Housing Element.</p>
4.08.14 County Homeless Facilities	Continue to work towards ending homelessness by increasing permanent supportive housing opportunities in the County.	<p>Program Implementation: The County met this program objective. Since 2015, the County has added 2,770 units of supportive housing in the County.</p> <p>Continued Appropriateness: Modified This program has been updated and is included in the 2023-2031 Housing Element Update under Program No. 1.28: Community Plan to End Homeless.</p>

Housing Element Update 2023-2031
 Status of Programs from 2015 Housing Element Update

Name of Program in 2015 Housing Element Update	Objective 2015-2022	Progress/Status
4.08.15 Comply with SB2 requirements regarding By-Right Emergency Shelters	Track the emergency shelter capacity created.	<p>Program Implementation: Allowance of small-scale emergency shelters in certain zoning districts. In the 2015-2022 Housing Element cycle, the Planning Department did not receive emergency shelter applications.</p> <p>Continued Appropriateness: Monitoring continues. However, the Department has not received an emergency shelter application. Additionally Program 2.25 will be implemented to ensure emergency shelter regulations are in compliance with state law.</p>
4.08.16 Housing 1000	Identify and house 1,000 chronically homeless individuals by 2015.	<p>Program Implementation: Through this campaign, 850 chronically homeless individuals were connected to housing. Housing 1000 served as validation of the Housing First approach and the collective impact model embodied by Destination: Home. Following the success of the campaign, the Santa Clara County Continuum of Care formally adopted the Housing First approach and created the Care Coordination Project to link clients to care services that best meet their need.</p> <p>Continued Appropriateness: Completed The Housing 1000 program ended. This program is not included in the 2023-2031 Housing Element.</p>
4.09.03 Agricultural Employee Housing open to all agricultural workers.	Within three years (by June 2017), bring options to Board that would amend sections 2.20.020 and 4.10.040 of the County's Zoning Ordinance.	<p>Program Implementation Zoning Ordinance amendments reducing the permit requirements for long-term agricultural employee housing were adopted by the Board on October 20, 2020.</p> <p>Continued Appropriateness: Completed This program was completed in the 2020 Reporting Period.</p>
4.09.04 Detached Secondary Dwellings on All Lots	Bring options to Board that would eliminate the requirement that Secondary Dwellings on small lots be attached to the main residence	<p>Program Implementation The County will explore the possibility of The Board adopted new ADU regulations on March 10, 2020.</p>

Housing Element Update 2023-2031
 Status of Programs from 2015 Housing Element Update

Name of Program in 2015 Housing Element Update	Objective 2015-2022	Progress/Status
		<p>Continued Appropriateness: Completed The program was implemented in the 2020 Reporting Period.</p>
4.09.05 Increase Maximum Size of Secondary Dwellings on Small and Medium-Sized Lots	Bring options to Board that would allow the maximum size of secondary dwellings on small urban lots to increase from 640 square feet to 800 square feet, on small rural lots from 640 square feet to 800 square feet, and on medium size rural lots (2.5-20 acres) from 1,000 to 1,200 square feet	<p>Program Implementation The County will explore the possibility of. The Board adopted new ADU regulations on March 10, 2020.</p> <p>Continued Appropriateness: Completed The program was implemented in the 2020 Reporting Period. The program is complete when the Board of Supervisors (BOS) adopted the amendment to the County Zoning Ordinance on accessory dwelling units (ADUs) in March 2020. Therefore, the program is not included in the 2023-2031 Housing Element cycle.</p>
4.09.06 Secondary Dwelling Owner Occupancy Requirements	Bring options to Board to eliminate the requirement that on rural lots with secondary dwellings and between 2.5 and 20 acres in size, an owner occupy one of the two dwellings. Currently, rural lots with secondary dwellings and over 20 acres in size are already exempt from this requirement.	<p>Program Implementation The Board adopted new ADU regulations on March 10, 2020.</p> <p>Continued Appropriateness: Completed The program was implemented in the 2020 Reporting Period. S The program is complete when the Board of Supervisors (BOS) adopted the amendment to the County Zoning Ordinance on accessory dwelling units (ADUs) in March 2020. Therefore, the program is not included in the 2023-2031 Housing Element cycle.</p>
4.09.07 Reduce Permit Requirements for Agricultural Worker Housing	Bring options to Board to reduce the permit requirements for long term (permanent) agricultural worker housing, including consideration of allowing such housing to be permitted by right.	<p>Program Implementation</p> <p>Continued Appropriateness: Completed This program was completed and allowed the County to provide agricultural housing with a Special Permit. Therefore, the program is not included in the 2023-2031 Housing Element cycle.</p>
4.09.10 Stanford General Use Permit (GUP)	Develop 107 apartment-style units.	<p>Program Implementation: In 2019, 2,532 units were issued within the Stanford campus.</p> <p>Continued Appropriateness: Completed</p>

X.5 Contributing Factors Appendix

X.6 Supplemental Fair Housing Analysis – Census Designated Places

X.1 Executive Summary

Affirmatively Furthering Fair Housing

“Affirmatively furthering fair housing” means taking meaningful actions, in addition to combating discrimination, that overcome patterns of segregation and foster inclusive communities free from barriers that restrict access to opportunity based on protected characteristics. Specifically, affirmatively furthering fair housing means taking meaningful actions that, taken together, address significant disparities in housing needs and in access to opportunity, replacing segregated living patterns with truly integrated and balanced living patterns, transforming racially and ethnically concentrated areas of poverty into areas of opportunity, and fostering and maintaining compliance with civil rights and fair housing laws. The duty to affirmatively further fair housing extends to all of a public agency’s activities and programs relating to housing and community development. (Gov. Code, § 8899.50, subd. (a)(1).)”

Source: California Department of Housing and Community Development Guidance, 2021, page 14.

This Assessment of Fair Housing (AFH) is a component of the County of Santa Clara (the County) Housing Element Update for the planning period of 2023-2031. The AFH is intended to provide a holistic look – informed by data, maps, community input, and policy analysis – into the trends and factors affecting access to housing and opportunity on the basis of protected characteristics under federal and state fair housing laws. The federal Fair Housing Act prohibits discrimination on the basis of race, color, national origin, religion, sex, familial status, and disability status. The California Fair Employment and Housing Act adds several additional protected characteristics including, but not limited to, sexual orientation, gender identity, military and veteran status, and source of income. The AFH includes goals and priorities that are intended to foster more integrated communities, reduce disparities in housing (such as higher rates of housing cost burden), and increase access to opportunity by addressing the root causes of inequality. The County’s Housing Element must include an AFH component as a result of A.B. 686, a law passed by the California Legislature in 2018 to incorporate a duty to affirmatively further fair housing (AFFH) into state law. Recipients of federal housing and community development funds have had an AFFH obligation since 1968.

The AFH also outlines fair housing priorities and goals to overcome fair housing issues. In addition, the AFH lays out meaningful strategies that can be implemented to achieve progress towards the County of Santa Clara’s obligation to affirmatively further fair housing. The Lawyers’ Committee for Civil Rights Under Law (Lawyers’ Committee) and Root Policy prepared this AFH, in consultation with the County of Santa Clara (County), and with input from a wide range of stakeholders through a community participation process detailed in section X.2.

To provide a foundation for the conclusions and recommendations presented in this AFH, the Lawyers' Committee and Root Policy reviewed and analyzed:

- Data from the U.S. Census Bureau and other sources about the demographic, housing, economic, and educational landscape of the county, entitlement cities, nearby communities, and the broader region;
- Various County planning documents and ordinances, including the 2020-2025 Santa Clara County Community Plan to End Homelessness and the Santa Clara Valley Agricultural Plan;
- Data reflecting housing discrimination complaints; and
- The input of a broad range of stakeholders that deal with the realities of the housing market and the lives of members of protected classes in Santa Clara County.

The AFH draws from these sources and others to conduct an analysis of fair housing issues such as patterns of integration and segregation of members of protected classes, racially or ethnically concentrated areas of poverty regionally, disparities in access to opportunity for protected classes, and disproportionate housing needs. The analysis also examines publicly supported housing in the County as well as fair housing issues for persons with disabilities. Private and public fair housing enforcement, outreach capacity, and resources are evaluated as well. The AFH identifies contributing factors to fair housing issues and suggests steps that the County can take to overcome these barriers. This AFH envisions that the County and other partners will collaborate to lead these suggested steps. These partnerships may exist between County offices and departments; the County, cities, and the Santa Clara County Housing Authority (SCCHA); or the County and non-governmental partners, like Destination: Home.

Where data specifically for the unincorporated areas of the county (Unincorporated County) were available, the analysis of local conditions in this AFH focuses on those areas. For some important fair housing issues, there is limited data available specific only to the Unincorporated County, and, in those instances, the data in this AFH reflects what is referred to as the Urban County. The Urban County does not include all urbanized areas of the county but rather consists of the Unincorporated County as well as the incorporated areas of Campbell, Los Altos, Los Altos Hills, Los Gatos, Monte Sereno, Morgan Hill, and Saratoga. The Urban County is a significant geography for planning purposes because it consists of the areas in which the County is principally responsible for the administration of Community Development Block Grant (CDBG) funds from the U.S. Department of Housing and Urban Development (HUD).

Overview of Santa Clara County

Santa Clara County is located in the Bay Area of Northern California and is home to Silicon Valley and is part of the San José-Sunnyvale-Santa Clara, CA Metropolitan Statistical Area (Region). The Region consists of Santa Clara and San Benito Counties in their entirety. Where this Assessment refers to the Region, it is referring to that geographic area and not to the broader San Francisco Bay Area. It has a population of nearly two million people and is highly diverse, with no majority racial/ethnic group. Asian American and Pacific Islanders are the most prevalent (35%), followed by white (33%), Latinx (26%), and Black (2%) residents. However, these trends vary throughout the county jurisdictions. While Asian and Pacific Islander populations predominantly reside in the Urban County, Cupertino, San José, Santa Clara (City), Sunnyvale, and the Region, Latinx people predominantly reside in Gilroy, and white residents predominantly reside in Mountain View and Palo Alto. Across the entitlement jurisdictions, San José displays the highest levels of segregation, with Asian American and Pacific Islanders and Latinx residents more likely to live in the segregated eastern part of the city. High levels of jobs-housing imbalance – the disconnect between where job growth is occurring and where housing is being produced – plays a major role in these patterns with Latinx and Vietnamese residents having limited access to jobs-rich areas in comparison to white, Chinese, and Indian residents. Racially/Ethnically Concentrated Areas of Poverty (R/ECAPs) in the county and the Region are predominantly located in eastern San José, aligning with existing and historical segregative patterns.

There is a significant immigrant population in Santa Clara County, with top national origins of Mexico (7%), India (6%), China (6%), Vietnam (5%) and the Philippines (3%). These population shares are closely mirrored at the level of the Region. However, in which entitlement jurisdictions these immigrant groups choose to settle varies. Cupertino has significant immigrant populations from India and China but lower populations from Mexico and Vietnam than much of the rest of the county. Meanwhile, Mexican immigrants are strongly represented in Gilroy (17%), Mountain View (6%), and San José (10%). Indian immigrants are highly represented in Cupertino (17%), Mountain View (7%), Santa Clara City (13%), and Sunnyvale (15%). Vietnamese immigrants are most strongly represented in San José (8%), and Chinese immigrants have a strong presence in Cupertino (16%), Mountain View (8%), Palo Alto (10%), San José (5%), Santa Clara City (6%), and Sunnyvale (9%). While immigrant populations are not a perfect analogue for communities with Limited English Proficiency, countywide, Spanish, Chinese, and Vietnamese are the most prevalent languages.

Across nearly every jurisdiction, Black and Latinx residents face the highest rate of housing problems, and Latinx families are overcrowded at a rate of 12%. This is three times the rate of the next highest share, Asian American or Pacific Islanders, at 4%. Additionally, throughout the County, there are clear disparities in access to opportunity across several categories – including environmental health, labor market, and school proficiency – which all seem to be higher in the western part of the County (including Cupertino, Los Altos, Los Altos Hills, Los Gatos, Monte Sereno, and Saratoga), and lower in San José.

There is very little traditional public housing in Santa Clara County, with an alternative reliance on Project-Based Section 8 and Low-Income Housing Tax Credit (LIHTC) units, as well as Housing Choice Vouchers. Many of the entitlement jurisdictions utilize inclusionary zoning programs, Accessory Dwelling Unit (ADU) programs, and/or mobile home rent stabilization ordinances to supplement their affordable housing stock.

There is relatively little concentration of persons with disabilities in the County, as well as a lower relative share than in other, comparable housing markets. For example, the share of residents who have disabilities who live in Project-Based Section 8 units roughly aligns with the County's population share of residents with disabilities. However, Housing Choice Voucher holders have disabilities at twice the rate, suggesting that persons with disabilities do not face disproportionate burdens to accessing the limited supply of vouchers in the county. While there are very few publicly supported housing developments reserved for people with disabilities, a significant share is reserved for seniors, who are more likely to have disabilities. Additionally, newer and larger developments are subject to increased accessibility construction standards, making them a more viable option for affordable housing residents with disabilities.

Fair housing enforcement in Santa Clara County includes private fair housing organizations, which contract with various jurisdictions to provide housing mediation and arbitration, while also pursuing private fair housing enforcement actions and providing outreach to Santa Clara County residents.

History of Segregation in Santa Clara County

On June 23, 2020, The County of Santa Clara adopted a resolution declaring racism a public health crisis that needed to be addressed with social justice policy at the local, state, and federal levels.¹ The public health crisis impacts County residents. Today, Black, Indigenous, and Latinx families in Santa Clara are disproportionately cost-burdened, denied mortgage applications, and subject to eviction compared to white residents.² Housing discrimination in the area is a contemporary issue—as evident in one apartment complex's 2015 blanket discrimination against Mexican prospective tenants on the basis of national origin.³ Further, Santa Clara County, like much of America, is segregated. Neighborhoods in the county rank among the top-ten most segregated white, Asian, and Latino neighborhoods respectively.⁴ Santa Clara County and the majority of Bay Area counties, is *more* segregated than it was in 1970.⁵ Combating segregation in Santa Clara

County requires understanding the historical arc that has led to it—one characterized by conjoined public and private efforts to exclude non-white people from the region.

The tradition of displacement, dispossession, and exclusion of property on racial grounds in the San Francisco Bay is an old one. Prior to colonization, dozens of diverse Native groups lived in the area, but under Spanish, Mexican, and United States rule, the population of indigenous peoples in the area had been decimated.⁶ In the mid-nineteenth century, the United States government forced 119 California tribes into a treaty that provided for nineteen reservations.⁷ The Senate then provided only five, comprising less than one-sixteenth of the land detailed in the treaty terms.⁸ The federal government also neglected to perform its promises of defensive and legal protection to the indigenous groups and their property rights—subjecting them to rampant acts of private violence and legal displacement.⁹

The interplay between private and public action in the displacement of Native peoples continued to be reflected in the treatment of Asian immigrants and Black Americans in the region. The federal government passed the Chinese Exclusion Act of 1882 while the California legislature passed the Alien Land Laws, denying Asian immigrants the opportunity to obtain citizenship and the ability to purchase or even engage in contract cropping of agricultural land respectively.¹⁰ While the Alien Land Laws were still in effect, the federal government forcibly interred all people of Japanese descent during World War II, forcing many to sell property for far below fair price in private sales.¹¹ Private violence also included arsonists burning down San José’s Chinatown and other neighborhoods as well as violent riots.¹²

Even after the Supreme Court ruled that racially explicit zoning was illegal in 1917, officials from the County continued to play a key role in perpetuating segregation.¹³ In 1955, when the Quaker racial justice group American Friends Service Committee noticed that developers in the county were refusing to sell and rent to Black families, despite having numerous unsold units affordable to Black workers at the Ford plant, it endeavored to build an integrated subdivision in an unincorporated area of the county.¹⁴ When news broke that the subdivision would be integrated, however, the County Board of Supervisors quickly worked to rezone the site—redesignating its use from residential to industrial—in order to prevent the creation of mixed-race communities.¹⁵ Two incorporated Santa Clara County towns where backup development sites were located reacted similarly, refusing

to grant approvals or ballooning minimum lot sizes to make sales to working-class people impossible.¹⁶

Around the same time, Ford had announced that it was moving production to Milpitas, forcing workers to search for new housing in the area.¹⁷ Santa Clara County neighborhoods were largely racially restricted at the time, allowing white workers to readily find housing while Black workers struggled.¹⁸ A proposed development near Milpitas was originally intended to be nondiscriminatory, but to exclude Black workers moving to the area the sanitary district for Milpitas increased the rate it would charge the development for sewer access to ten times what it previously advised the developer.¹⁹ The sanitary district that made this decision was chaired at the time by a member of the County Board of Supervisors—the same governing body that blocked the American Friends Service Committee development.²⁰

The County government also partook in a national effort of “urban renewal,” which displaced thousands of people of color. The national effort involved local agencies designating neighborhoods as “blighted” in order to seize properties from homeowners and renters alike for demolition.²¹ The County government directed interstate and expressway development through East San José, an area with a particularly concentrated Spanish-speaking population, leading to the bulldozing of those neighborhoods.²² Though required by law to replace the demolished homes, the County government only built one for every ten homes lost in the project.²³

As with the region’s early history of racial exclusion—private actors worked in tandem with government efforts to preserve racial segregation. In the early 20th century, a white salesman founded a private community in unincorporated Santa Clara County on segregationist and white supremacist ideals called Holy City.²⁴ Once plastered with racist signs, the town has remained vacant since 1940s when its founder was charged with sedition for his support of the Nazi regime.²⁵ Still, it is a reminder of the myriad of ways segregationists in 20th century Santa Clara County sought to preserve white supremacy through exclusion.

The key form that segregation was preserved in the County by private actors was not through unincorporated towns like Holy City, however, but instead through racial steering. Racial steering involves real estate agents deliberately dissuading Black buyers from

²⁵ *Id.*

purchasing property in all-white neighborhoods.²⁶ At the same time, such agents would direct white homebuyers into white neighborhoods and assure them that they could continue to agree with neighbors to keep people of color out—even after the Supreme Court made racially restrictive covenants illegal.²⁷ In this way, real estate agents operated to keep Black populations out of the predominantly white towns in Santa Clara County and direct them towards areas like East Palo Alto in unincorporated San Mateo, often misrepresenting the quality of housing.²⁸ In the 1960s, realtors and advocates noted the particular strength and breadth of racial steering practices in Santa Clara County.²⁹

The middle of the 20th century can be characterized by public efforts to resist integration in Santa Clara County. Both the County government itself and the incorporated towns of Santa Clara worked in tandem to ensure that nondiscriminatory development was an impossibility.³⁰ Meanwhile, residents and realtors in the County supported the segregationist system through private practices. The effects of this approach reverberate today—as less than three percent of the remaining county residents are Black or African American identifying.³¹ Although Santa Clara County is diverse—with large Asian and Latinx populations—the survival of segregated neighborhoods and substandard housing conditions for non-white populations serves as a continued reminder of the importance of affirmatively furthering fair housing in the 21st century.

Contributing Factors to Fair Housing Issues

This Assessment includes a discussion and analysis of the following contributing factors to fair housing issues:

1. Access to financial services
2. Access for persons with disabilities to proficient schools
3. Access to publicly supported housing for persons with disabilities
4. Access to transportation for persons with disabilities
5. Admissions and occupancy policies and procedures, including preferences in publicly supported housing
6. Availability of affordable units in a range of sizes
7. Availability, type, frequency, and reliability of public transportation
8. Community opposition
9. Deteriorated and abandoned properties
10. Displacement of and/or lack of housing support for victims of domestic violence, dating violence, sexual assault, and stalking

11. Displacement of residents due to economic pressures
12. Impediments to mobility
13. Inaccessible public or private infrastructure
14. Inaccessible government facilities or services
15. Lack of access to opportunity due to high housing costs
16. Lack of affordable, accessible housing in a range of unit sizes
17. Lack of affordable in-home or community-based supportive services
18. Lack of affordable, integrated housing for individuals who need supportive services
19. Lack of assistance for housing accessibility modifications
20. Lack of assistance for transitioning from institutional settings to integrated housing
21. Lack of community revitalization strategies
22. Lack of local private fair housing outreach and enforcement
23. Lack of local public fair housing enforcement
24. Lack of local or regional cooperation
25. Lack of meaningful language access for individuals with limited English proficiency
26. Lack of private investment in specific neighborhoods
27. Lack of public investment in specific neighborhoods, including services or amenities
28. Lack of resources for fair housing agencies and organizations
29. Lack of state or local fair housing laws
30. Land use and zoning laws
31. Lending discrimination
32. Location of accessible housing
33. Location of employers
34. Location of environmental health hazards
35. Location of proficient schools and school assignment policies
36. Location and type of affordable housing
37. Loss of affordable housing
38. Occupancy codes and restrictions
39. Private discrimination
40. Quality of affordable housing information programs

41. Regulatory barriers to providing housing and supportive services for persons with disabilities
42. Siting selection policies, practices, and decisions for publicly supported housing, including discretionary aspects of Qualified Allocation Plans and other programs
43. Source of income discrimination
44. State or local laws, policies, or practices that discourage individuals with disabilities from living in apartments, family homes, supportive housing and other integrated settings
45. Unresolved violations of fair housing or civil rights law

Proposed Goals and Actions

To address the contributing factors described above, this Assessment proposes the following goals and actions for the County. Section X.4 of this Assessment includes a narrative description of each goal and action as well as a series of tables that link each of the below items to contributing factors and other relevant details.

- I. Promote residential racial and ethnic integration and reduce displacement³² by increasing the supply of affordable housing in high opportunity areas, areas with ongoing displacement, and areas where residents are at risk of displacement.
 - a. Advocate for flexible public funding that can expedite and increase affordable housing development.
 - b. Expand private sector support for affordable housing.
 - c. Accelerate affordable housing development by leveraging County resources, including geographic information mapping tools and others, to identify, prioritize, and develop publicly-owned sites that are suitable for development, with an emphasis on parcels in high opportunity areas.
 - d. Support and provide technical assistance to Santa Clara County cities to help expand inclusionary housing and commercial linkage fee policies for development of affordable housing.
 - e. Facilitate the production of farmworker housing by building upon the actions outlined in the 2018 Santa Clara Valley Agricultural Plan, including through grant funding opportunities.
 - f. Collaborate with cities to apply for and secure funding to implement plans to increase rental and ownership housing that is affordable for low-income households and assist persons who are experiencing homelessness.
 - g. Help community-based organizations form or increase their activities as Community Development Corporations, with the primary goal of increasing affordable housing.

³² Throughout this document, references to displacement refer to both direct displacement – evictions, foreclosures, and the demolition of housing – and indirect displacement – residents moving away in the face of increased housing costs, inadequate housing, or other factors.

- II. Reduce zoning and land use barriers to affordable housing development.
 - a. Provide support to cities considering zoning changes in high opportunity areas to foster the development of affordable housing.
- III. Protect tenants from displacement by increasing tenant protection and housing preservation strategies and access to resources before and during eviction proceedings.
 - a. Explore expanding funding for tenants in landlord-tenant proceedings.
 - b. Support education for tenants, landlords, and other housing providers regarding tenants' rights laws.
 - c. Facilitate discussion of tenant protection strategies among cities.
 - d. Track and collaborate to preserve affordable housing developments with expiring subsidy contracts countywide.
 - e. Collaborate with Santa Clara County Superior Court and other partners to facilitate access to resources for vulnerable tenants engaged in eviction proceedings.
- IV. Increase access to opportunity for residents of historically disinvested low-income communities.
 - a. Increase the number of free public transit passes and other transportation options for people who are unhoused to access services.
 - b. Study increasing access to services in South County including the cities of Morgan Hill, Gilroy, San Martin, and parts of the unincorporated county.
- V. Promote racial equity in homeless services and permanent housing supportive services.
 - a. Provide demographic data, including race and ethnicity, in all reports on homelessness to highlight and address inequities.
 - b. Provide trauma-informed care and racial equity/anti-racism training, as well as training on providing services that are accessible to persons with limited English proficiency and to persons with disabilities, to all staff working with people experiencing homelessness.
 - c. Align racial equity work in the homelessness sector with other racial equity initiatives in Santa Clara County.
- VI. Continue support for fair housing enforcement, education, and outreach.

The proposed goals and strategies also further the strategies in the 2020-2025 Santa Clara County Community Plan to End Homelessness, a roadmap for ending homelessness in the county. The tables in section X.4 detail ties between this plan and each of the above items.

X.2. Community Participation Process

There were two community participation processes to ensure that the fair housing analysis reflects conditions in the community and that the goals and strategies are targeted and feasible. The participation of a wide range of stakeholders was of critical importance. The first process was for the AFH and the second was for the Housing Element. A broad array of outreach was conducted during these community engagement processes, which included print and social media engagement, community meetings, focus groups, surveys, and the establishment of a countywide Santa Clara AFH Advisory Committee.

In preparing this AFH, the Lawyers' Committee held numerous in-person stakeholder meetings with hundreds of stakeholders, including tenants, landlords, homeowners, public housing residents, fair housing organizations, civil rights and advocacy organizations, legal services providers, social services providers, housing developers, local housing and planning staff, and industry groups to hear directly about fair housing issues affecting residents of Santa Clara County. Multiple meetings were co-hosted by the SCCHA and advertised directly to voucher holders and residents of project-based voucher developments.

All community meetings had translation services available, if requested. Multiple meetings had Spanish translators and another had Vietnamese translators. Flyers promoting meetings were in Spanish in areas with high concentrations of Spanish-speaking residents. In addition, all meetings were held in locations accessible to people with mobility issues. The Executive Summary of the AFH will be translated into Spanish, Chinese, Tagalog, and Vietnamese.

Geographically specific community meetings were held across Santa Clara County, including the Urban County, South County, Central County, and the cities of San José and Santa Clara. In addition, several focus groups were conducted to focus on specific fair housing issues and issues encountered by specific communities and populations. They included formerly incarcerated individuals, homeless individuals and families, nonprofit affordable housing developers, domestic violence survivors, seniors, persons with HIV/AIDS, the Vietnamese community, geographically-oriented focus groups, the Latinx community, the Filipino community, and students and educators.

In December of 2019, the Santa Clara AFH Advisory Committee, comprised of thirteen members and representing several community and stakeholder groups, was established to provide ongoing input during the AFH process. The input of the AFH Advisory Committee helped shape goals and recommendations in the AFH.

Housing / CDBG Coordinators' Meeting	August 12, 2020, January 13, 2021, September 22, 2021, and February 23, 2022

As detailed in the first chapter of the Housing Element, the County undertook a comprehensive community participation and outreach strategy. The County compiled a list of stakeholders representing service providers, housing advocates, affordable housing developers, government agencies, county departments, environmental advocates, and others. The County also included stakeholders involved in the Applicant Roundtable (representing the County's most frequent development applicants), stakeholders suggested by the County Office of Supportive Housing, and elected and/or appointed officials and their representatives. Stakeholders were invited to a series of workshops to provide feedback to the project team at key milestones. Formal invitations were issued to stakeholders prior to each workshop to encourage participation. Attendees were asked to act as ambassadors for the project, sharing community meeting opportunities through their networks. Approximately 52 organizations were represented at the stakeholder workshops.

Three community workshops were hosted over the course of the engagement program, to invite members of the community to provide input in Phase 1 (Q2, 2022) and Phase 2 (Q3, 2022). Community workshops were advertised through stakeholder partners, the County's social media channels (Facebook, Nextdoor, Instagram, and Twitter), and the County website. Interpretation services were made available at all community workshops in Spanish, Vietnamese, Cantonese, and Mandarin. Email invitations were issued to those who registered for updates on the project website. A total of 97 participants attended community workshops over the course of the engagement program.

All workshop materials were also made available on the project website for public review. All summaries were translated into Spanish, Simplified Chinese, and Vietnamese, with some translated into Tagalog.

Primary Findings

This section summarizes the primary findings from the AFH for the Unincorporated County, including: demographic summary, segregation and integration, access to opportunity, disparate housing needs, public housing analysis, fair housing enforcement and outreach capacity, and contributing factors to fair housing.

Demographic Summary

- **Unincorporated County is slightly less racially and ethnically diverse than the county overall and the region.** Almost half (46%) of residents are White non-Hispanic and 31% Hispanic or Latinx, both of which declined between 2010 and 2019. This compares to the regional shares of 32% White non-Hispanic and 27% Hispanic or Latinx. The share of Asian or Pacific Islander residents has grown significantly, from 11% in 2000 to 15% in 2019, yet is still significantly lower than the region overall (36%).
- In 2015, income segregation in Unincorporated County was higher than the average value for Bay Area jurisdictions. **Income segregation has increased significantly while racial segregation has declined over the last decade.**
- White residents are the most segregated group in the county with higher levels of segregation between White and Hispanic residents. Over the last decade, neighborhoods in the unincorporated county have become less racially segregated though this could be related to the increase in gentrification and housing costs.
- Racial and ethnic minorities have higher rates of poverty compared to White and Asian residents. Poverty is particularly high for Black or African American residents and American Indian or Alaska Native residents.
- Eight percent of residents in Unincorporated County have a disability. The most common disability types are ambulatory difficulties, cognitive difficulties, and independent living difficulties. Disabled residents have not had their accessibility needs met as many residents require greater access to accessible housing units. In fact, it is estimated that:
 - 76,000 county residents need units accessible to persons with ambulatory difficulties,
 - 44,000 need units accessible to persons with hearing difficulties, and
 - Over 27,000 residents need units accessible to persons with vision difficulties.

Disproportionate Housing Needs

- **Most racial and ethnic minority populations are disproportionately impacted by low household incomes, poverty, housing problems, and overcrowding**, compared to non-Hispanic White and Asian residents in Unincorporated County:
 - Housing cost burden disproportionately impacts Black or African American residents, Hispanic residents, and American Indian or Alaska Native residents.
 - Black and Latinx residents are more likely to live in substandard living conditions and report having housing problems, defined by HUD as any of the following: incomplete kitchen or plumbing, overcrowding, or cost-burdened, with 50% to 60% of those populations experiencing housing problems, compared to 25% to 40% of White households.
 - Overcrowding is significantly higher for non-White households: the number of overcrowded non-White households is at least three times higher than the number of White residents experiencing overcrowding.
 - Census tracts with overcrowding overlap with segregation by race and have a high proportion of low-income, single mother families, indicating that households could be doubling up in order to avoid displacement. Overcrowding is most prominent in San José and one census tract in Campbell.
- In the Urban County, Asian and Pacific Islander residents are overrepresented in Project-based Section 8 units, multifamily units, and are more likely to have a housing voucher. Black or African American and Hispanic residents are overrepresented in LIHTC units. There has been little analysis done on racial disparities in voucher utilization and or if vouchers are underutilized due to racial discrimination. However, voucher holders often struggle to find or access housing as many landlords do not accept vouchers as a source of income. This means that Asian and Pacific Islander residents likely face greater barriers entering housing that meets their needs.
- Housing needs also differ geographically:
 - **Low-income communities in San José overlap with historical redlining practices**, specifically the Home Owner’s Loan Corporation’s (HOLC) neighborhood ranking system. Concentrated areas of low income were given grades C (declining) or D (hazardous), resulting in public and private disinvestment and limited homeownership opportunities.
 - Patterns in Gilroy are particularly important, given the city’s large population of working class residents and rural communities. In fact,

according to research from the University of California, Berkeley, two of the most segregated neighborhoods in the Bay Area region are located in Gilroy.³³

- Low-income census tracts in San José are concentrated in areas with older housing with over 80% of total units built before 1960 indicating that residents of Santa Clara County have limited housing options and are more likely to face barriers accessing newer housing that meets their needs. Residents living in poverty are also more likely to live in these areas.
- A slight majority of residents in Santa Clara County are homeowners (56%). Married family households are more likely to own their home with almost three in four owning their home. This compares to 45% of female householders who own their home, most of whom are living in the inner-city of San José. White and Asian households have homeownership rates more than double the homeownership rates of Latinx and Black households.
- Between 2013 and 2022, fair housing inquiries were highest in Palo Alto, Sunnyvale, and Saratoga. During this time, there were very few fair housing causes in Santa Clara County and unincorporated areas.

Access to Opportunity

- **Santa Clara County’s student population is far more diverse than the county’s overall population.** Hispanic students comprise the greatest share (39%) followed by Asian and non-Hispanic White students. **More than a quarter are socioeconomically disadvantaged and one in five are English learners.**
- **Low-income families, students with special needs, and most racial and ethnic groups face barriers accessing positive education outcomes,** compared to White and Asian students:
 - Hispanic and low-income families had the lowest early care and education attendance rates among children under six years. Families also reported higher levels of concern in meeting their children’s education and health needs.
 - Hispanic or Latino students and students with disabilities have the lowest access to proficient schools in the urban county. Disabled students are suspended three times the rate of other students.

³³ Stephen Menendian, Samir Gambhir, and Othering & Belonging Institute, “Racial Segregation in the San Francisco Bay Area, Part 1,” *UC Berkeley* (University of California, Berkeley, October 30, 2018), <https://belonging.berkeley.edu/racial-segregation-san-francisco-bay-area-part-1>.

- Black or African American students, disabled students, and socioeconomically disadvantaged students were least likely to meet English and Math testing standards.
- **The suspension rate for disabled students is three times greater than that for non-disabled students.** High suspension rates for students with disabilities are most prominent in the Gilroy Unified and Morgan Hill Unified school districts. **Suspension rates are also high in San José, which has a higher concentration of children with disabilities.**
- Santa Clara County is comparatively limited in the public transportation and transit options available for residents and workers. This has caused **significant barriers for all residents with low transportation indexes for all residents regardless of race/ethnicity and economic status:**
 - Access to transportation is also low given schedule delays, wait times, and long commutes. For example, workers commuting to work by the 68 bus from Gilroy to San José would endure a commute of at least 1 hour and 51 minutes (round trip).
- Lower-income census tracts in San José, Watsonville, Gilroy, and Salinas have comparatively less healthy conditions as indicated by the Healthy Places Index of 23 social determinants of health indicators. Additionally, San José and Gilroy are designated as food deserts by the USDA indicating that the majority of the population in these areas live at least one mile from a supermarket.
- **Children under the age of six are at higher risk of lead exposure in Santa Clara County, with at least 2,000 children showing elevated levels of lead in their blood.** Lead exposure is a particular concern for children near the Reid-Hillview Airport, which has historically used leaded aviation gasoline.³⁴
- Santa Clara County has an extreme jobs-housing imbalance, as indicated by the Labor Market and Jobs Proximity Indices that disproportionately impacts Latinx and Vietnamese residents.

X.3: Fair Housing Analysis

This section summarizes the primary AFH findings for the Unincorporated County, including the following parts:

Part A: Demographic Summary

Part B: General Issues (Segregation/Integration, R/ECAPs, Disparities in Access to Opportunities and Disproportionate Housing Needs)

Part C: Public Supported Housing Analysis

Part D: Disability and Access

Part E: Fair Housing Enforcement, Outreach Capacity and Resources

This section provides a comparative analysis of fair housing in the Unincorporated County to that of the Region as delineated by HUD, which includes Santa Clara County and San Benito County.

Regional maps and data distinguish between the two regions.

Part A: Demographic Summary

The Demographic Summary provides an overview of data concerning race and ethnicity, sex, familial status, disability status, limited English proficiency, national origin, and age. The data included reflects the composition of the Santa Clara County-San Benito County Region and the unincorporated areas of Santa Clara County (Unincorporated County).

Primary findings.

- **Unincorporated County is slightly less racially and ethnically diverse than the county overall and the Region.** Almost half (46%) of residents are White non-Hispanic and 31% Hispanic or Latinx, both of which declined between 2010 and 2019. This compares to the regional shares of 32% White non-Hispanic and 27% Hispanic or Latinx. The share of Asian or Pacific Islander residents has grown significantly from 11% in 2000 to 15% in 2019, yet is still significantly lower than the region overall (36%).
- In 2015, income segregation in Unincorporated County was higher than the average value for the Region. **Income segregation has increased significantly while racial segregation has declined over the last decade.**
- White residents are the most segregated group in the county with higher levels of segregation between White and Hispanic residents. Over the last decade, neighborhoods in the Unincorporated County have become less racially segregated though this could be related to the increase in gentrification and housing costs.

- Racial and ethnic minorities have higher rates of poverty compared to White and Asian residents. Poverty is particularly high for Black or African American residents and American Indian or Alaska Native residents.
- Eight percent of residents in Unincorporated County have a disability. The most common disability types are ambulatory difficulties, cognitive difficulties, and independent living difficulties. Disabled residents have not had their accessibility needs met as many residents require greater access to accessible housing units. In fact, it is estimated that:
 - 76,000 county residents need units accessible to persons with ambulatory difficulties,
 - 44,000 need units accessible to persons with hearing difficulties, and
 - Over 27,000 residents need units accessible to persons with vision difficulties.

Race and ethnicity. A slight majority of the population of Santa Clara County is white, and Hispanic residents are the second largest segment of the County’s population, accounting for nearly one-third of residents. Asian and Pacific Islander residents are the third largest group. In comparison to the County, the population of the region is less heavily white and Hispanic and more heavily Asian and Pacific Islander. Both the County and the region have low populations of Black and Native American residents.

Over time, there has been a slight increase in Asian populations and a slight decrease in the non-Latinx white population in the County. The Latinx and Black populations have remained consistent. In the region, there has been a more significant increase in the Asian population as well as a more significant decrease in the non-Latinx white population, with the Latinx and Black populations remaining consistent.

Table A.1: Population by Race, 2000-2019, Unincorporated County

Race or Ethnicity	2000	%	2010	%	2019	%

National Origin. Within the County, the most common country of origin is Mexico. The remaining most common countries of origin are, in order: Vietnam, India, Philippines, Iran, and Korea. In the region, Mexico is also the most common country, followed by India, Vietnam, China, the Philippines, and Korea. In general, a smaller proportion of residents of the County were born outside of the United States than of residents of the broader region.

Table A.3: Population by National Origin, 2019, Unincorporated County

Place of Birth for Foreign-Born Population	Total	%
Mexico	6,008	7%
China	3,235	4%
Vietnam	1,703	2%
India	882	1%

Limited English Proficiency. The most commonly spoken language for those in the County with Limited English Proficiency (LEP) is Spanish. The remaining most common languages for those with Limited English Proficiency are, in order: Chinese, Vietnamese, Other Indo-European Languages, and Other Asia and Pacific Islander Languages. In the region, Spanish is also the most commonly spoken language, followed by Vietnamese, Chinese, Tagalog, and Korean. A slightly smaller proportion of the population of the County has limited English proficiency than in the broader region.

Table A.5: Limited English Proficiency 5+ Years of Age or Older, Unincorporated County

Language or Language Group	Speak at Home and Speak English Less Than Very Well, Total	Speak at Home and Speak English Less Than Very Well, %
Spanish	6,293	8%
Chinese (incl. Mandarin, Cantonese)	1,358	2%
Vietnamese	1,210	2%
Other Indo-European Languages	496	1%
Other Asian and Pacific Islander Languages	265	0.3%
Tagalog	194	0.2%
Korean	188	0.2%

Table A.6: Limited English Proficiency 5+ Years of Age or Older, Region

Language or Language Group	Speak at Home and Speak English Less Than Very Well, Total	Speak at Home and Speak English Less Than Very Well, %
Spanish	147,705	8.48%
Vietnamese	69,212	3.98%
Chinese	61,687	3.54%
Tagalog	19,949	1.15%
Korean	12,494	0.72%

Japanese	6,069	0.35%
China	5,253	0.30%
Russian	4,197	0.24%

Disability. The most common type of disability experienced by residents of the County is ambulatory difficulty, followed by independent living difficulty, followed by cognitive

difficulty. The remaining most common disabilities are, in order of prevalence: hearing difficulty, self-care difficulty, and vision difficulty. The most common type of disability experienced by residents of the County is independent living difficulty, followed closely by ambulatory difficulty. The remaining most common disabilities are, in order of prevalence: cognitive difficulty, hearing difficulty, self-care difficulty, and vision difficulty. There is an equal proportion of residents with a disability in the County and region.

Table A.7: Disability by Type, 2019, Unincorporated County

Disability	%
With an Ambulatory Difficulty	3.9%
With a Cognitive Disability	3.3%
With an Independent Living Difficulty	3.3%
With a Hearing Difficulty	2.6%

Disability	%
With an Ambulatory Difficulty	4.4%
With a Cognitive Disability	3.3%
With an Independent Living Difficulty	4.5%
With a Hearing Difficulty	2.3%
With a Self-Care Difficulty	2.1%
With a Vision Difficulty	1.4%

Table A.9: Population by Disability Status, 2019

Jurisdiction	With a Disability, Total	With a Disability, %
Unincorporated County	6,923	8%
Region	159,633	8%

Source for tables A.7-A.9: 2019 ACS Data

Age. The majority, or 70%, of residents in the County fall within the 15-64 age group. For residents under 14, and 65 or older, 15% fall into each category. The region has a similar proportion of populations by age. There has been a slight increase in the population of elderly residents over time, along with a slight decrease in the number of youth.

Table A.10: Population by Age, 2000-2019, Unincorporated County

Age	2000 Total	2000 %	2010 Total	2010 %	2019 Total	2019 %

Part B: General Issues

Part B includes the following sections:

- i. Segregation/Integration of the population by protected classes including race and ethnicity, national origin, disability status, familial status, and income and poverty status.
- ii. Analysis of racially and ethnically concentrated areas of poverty and affluence.
- iii. Disparities in access to opportunity.
- iv. Disproportionate housing needs.

Primary findings:

Disproportionate Housing Needs

- **Most racial and ethnic minority populations are disproportionately impacted by low household incomes, poverty, housing problems, and overcrowding, compared to non-Hispanic White and Asian residents in Unincorporated County:**
 - Housing cost burden disproportionately impacts Black or African American residents, Hispanic residents, and American Indian or Alaska Native residents.
 - Black and Latinx residents are more likely to live in substandard living conditions and report having housing problems defined by HUD as any of the following: incomplete kitchen or plumbing, overcrowding, or cost-burdened, with 50% to 60% of those populations experiencing housing problems, compared to 25% to 40% of White households.
 - Overcrowding is significantly higher for non-White households: the number of overcrowded non-White households is at least three times higher than the number of White residents experiencing overcrowding.
 - Census tracts with overcrowding overlap with segregation by race and have a high proportion of low-income, single mother families indicating that households could be doubling up in order to avoid displacement. Overcrowding is most prominent in San José and one census tract in Campbell.
- In the Urban County, Asian and Pacific Islander residents are overrepresented in Project-based Section 8 units, multifamily units, and are more likely to have a housing voucher. Black or African American and Hispanic residents are overrepresented in LIHTC units. There has been little analysis done on racial disparities in voucher utilization and or if vouchers are underutilized due to racial discrimination. However, voucher holders often struggle to find or access housing as many landlords do not accept vouchers as a source of income. This means that Asian and Pacific Islander residents likely face greater barriers entering housing that meets their needs.
- Housing needs also differ geographically:
 - **Low-income communities in San José overlap with historical redlining practices**, specifically the HOLC's neighborhood ranking system. Concentrated areas of low income were given grades C (declining) or D

(hazardous), resulting in public and private disinvestment and limited homeownership opportunities.

- Patterns in Gilroy are particularly important given the city's large population of working class residents and rural communities. In fact, according to research from the University of California, Berkeley, two of the most segregated neighborhoods in the Bay Area are located in Gilroy.²
- Low income census tracts in San José are concentrated in areas with older housing with over 80% of total units built before 1960 indicating that residents of Santa Clara County have limited housing options and are more likely to face barriers accessing newer housing that meets their needs. Residents living in poverty are also more likely to live in these areas.
- A slight majority of residents in Santa Clara County are homeowners (56%). Married family households are more likely to own their home with almost three in four owning their home. This compares to 45% of female householders who own their home, most of whom are living in the inner-city of San José. White and Asian households have homeownership rates more than double the homeownership rates of Latinx and Black households.

Access to Opportunity

- **Santa Clara County's student population is far more diverse than the county's overall population.** Hispanic students comprise the greatest share (39%) followed by Asian and non-Hispanic White students. **More than a quarter are socioeconomically disadvantaged and one in five are English learners.**
- **Low-income families, students with special needs, and most racial and ethnic groups face barriers accessing positive education outcomes** compared to White and Asian students.
 - Hispanic and low-income families had the lowest early care and education attendance rates among children under six years. Families also reported higher levels of concern in meeting their children's education and health needs.
 - Hispanic or Latino students and students with disabilities have the lowest access to proficient schools in the urban county. Disabled students are suspended three times the rate of other students.
 - Black or African American students, disabled students, and socioeconomically disadvantaged students were least likely to meet English and Math testing standards.
- **The suspension rate for disabled students is three times greater than that for non-disabled students.** High suspension rates for students with disabilities are most prominent in the Gilroy Unified and Morgan Hill Unified school districts. **Suspension rates are also high in San José which has a higher concentration of children with disabilities.**

² Stephen Menendian, Samir Gambhir, and Othering & Belonging Institute, "Racial Segregation in the San Francisco Bay Area, Part 1," *UC Berkeley* (University of California, Berkeley, October 30, 2018), <https://belonging.berkeley.edu/racial-segregation-san-francisco-bay-area-part-1>.

- Santa Clara County is comparatively limited in the public transportation and transit options available for residents and workers. This has caused **significant barriers for all residents with low transportation indexes for all residents regardless of race/ethnicity and economic status.**
 - Access to transportation is also low given schedule delays, wait times, and long commutes. For example, workers commuting to work by the 68 bus from Gilroy to San José would endure a commute of at least 1 hour and 51 minutes (round trip).
- Lower income census tracts in San José, Watsonville, Gilroy, and Salinas have comparatively less healthy conditions as indicated by the Healthy Places Index of 23 social determinants of health indicators. Additionally, San José and Gilroy are designated as food deserts by the USDA indicating that the majority of the population in these areas live at least one mile from a supermarket.
- **Children under the age of six are at higher risk of lead exposure in Santa Clara County, with at least 2,000 children showing elevated levels of lead in their blood.** Lead exposure is a particular concern for children near the Reid-Hillview Airport which has historically used leaded aviation gasoline.
- Santa Clara County has an extreme jobs-housing imbalance, as indicated by the Labor Market and Jobs Proximity Indices that disproportionately impacts Latinx and Vietnamese residents.

i. Segregation/Integration. This section discusses integration and segregation of the population by protected classes including race and ethnicity, national origin, disability status, familial status, and income and poverty status.

Integration and Segregation

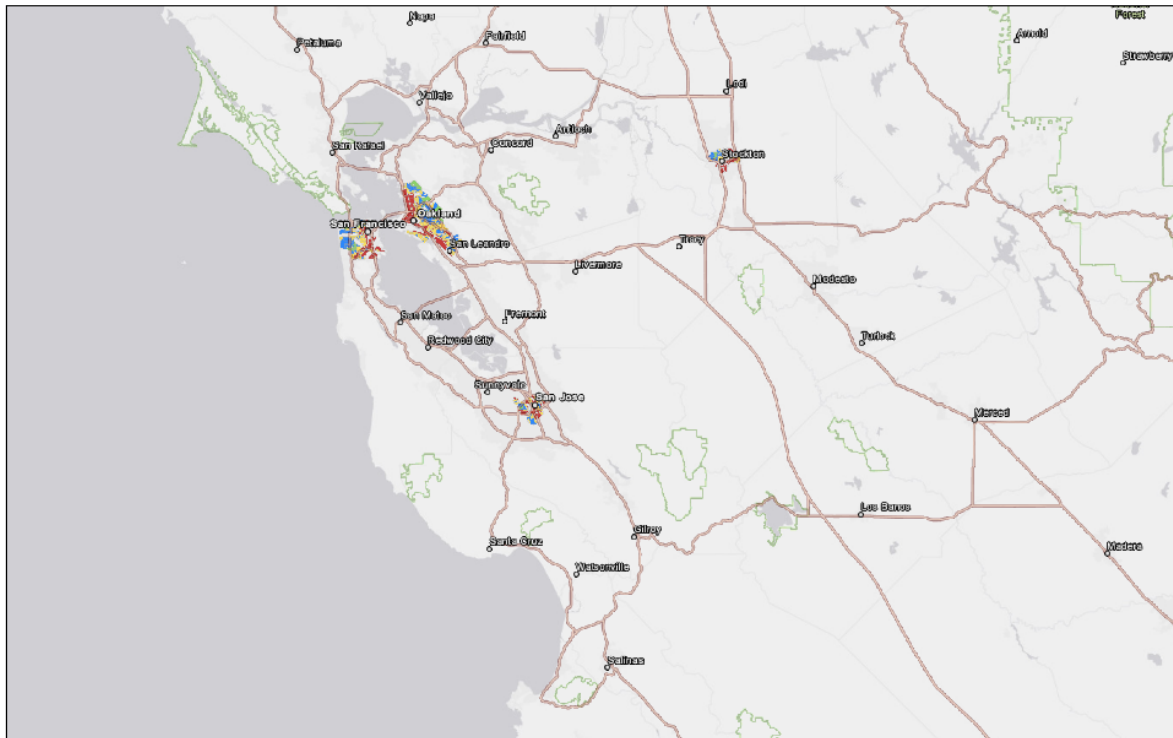

“**Integration** generally means a condition in which there is not a high concentration of persons of a particular race, color, religion, sex, familial status, national origin, or having a disability or a particular type of disability when compared to a broader geographic area.

Segregation generally means a condition in which there is a high concentration of persons of a particular race, color, religion, sex, familial status, national origin, or having a disability or a type of disability in a particular geographic area when compared to a broader geographic area.”

Source: California Department of Housing and Community Development Guidance, 2021, page 31.

The analysis includes a review of data, maps, local knowledge, and community input regarding segregation and integration on the basis of race, national origin, ancestry, familial status, disability, income and poverty, and religion in the region and the County. Segregation and integration patterns for residents with disabilities are presented in this section; a more in-depth analysis can be found in the Part D: Disability and Access section of this assessment.

Dissimilarity and isolation indices. A common metric used to determine levels of residential segregation between groups is the Dissimilarity Index. The Dissimilarity Index shows the degree to which two groups are evenly distributed across a geographic area and measures the percentage of a certain group’s population that would need to move to a different census tract³ to be evenly distributed within a city, county, or metropolitan area in relation to another group. The higher the Dissimilarity Index, the more uneven the population of different groups is in relation to each other. For example, if a Latinx/white dissimilarity index is 65, then 65 percent of Latinx residents would need to move for Latinx residents and whites to be evenly distributed across the city. The higher the Dissimilarity Index, the more segregated an area is. A Dissimilarity Index of less than 40 is considered a low level while an Index of 40 to 55 is considered a moderate level and values over 55 are considered a high level of segregation. The point of the Dissimilarity Index is not that the value should be 0, reflecting no racial or ethnic demographic differences between neighborhoods. Rather, what these data show is that, when the index is particularly high,

³ Census tracts are geographic areas within counties, designated by the Census Bureau, that typically have populations of approximately 5,000. Their boundaries often, but do not always, follow neighborhood boundaries.

it is likely that there are structural forces that are preventing people of particular races or ethnicities from making empowered choices about where they want to live (see table B.1)

Social scientists also use the Isolation and Exposure Indices to measure segregation. The Isolation Index measures what percentage of the census tract in which a person of a certain racial identity lives is comprised of other persons of that same racial/ethnic group. Values for the Isolation Index range from 0 to 100. The Exposure Index is a group's exposure to all racial groups. Values for the Exposure Index also range from 0 to 100. A larger value means that the average group member lives in a census tract with a higher percentage of people from another group. These indices, when taken together, capture the neighborhood demographics experienced, on average, by members of a particular racial or ethnic group within a city or metropolitan area.

The Association of Bay Area Governments (ABAG) and the Urban Policy Lab at the University of California, Merced, conducted an analysis of segregation patterns for jurisdictions and communities in the Bay Area. The analysis was completed to highlight the way in which local governments and land use policies impact and perpetuate segregation patterns.

Table B.2 reflects moderate levels of segregation for Black and Latinx residents and low levels of segregation for Asian or Pacific Islander residents. The contrast between the low levels of segregation for Asian or Pacific Islander residents reflected above, and moderate levels of segregation at the regional level, likely stem from the omission of cities with large Asian or Pacific Islander populations from the data. The cities of Milpitas, San José, Santa Clara, and Sunnyvale are all either majority or plurality Asian or Pacific Islander.

Table B.1: Dissimilarity Index

	Value	Level of Segregation
Dissimilarity Index Value (0-100)	0-40	Low Segregation
	41-54	Moderate Segregation
	55-100	High Segregation

Source: HUD AFFH Tool Table 3 – Racial/Ethnic Dissimilarly Trends

Table B.2: Dissimilarity Index Values by Race/Ethnicity for Unincorporated County

Racial/Ethnic Dissimilarity Index	2000 Trend	2010 Trend	2020 Trend
Non-White/White	35.9	35.5	27.3
Black/White	40.5	41.6	43.3
Latinx/White	47.1	46.4	46.0
Asian or Pacific Islander/White	38.4	37.2	28.0

Source: HUD AFFH Tool Table 3 – Racial/Ethnic Dissimilarly Trends

In the region, Dissimilarity Index data shows low levels of segregation for Black residents in relation to white residents and moderate levels of segregation for Latinx residents and moderate to low segregation for Asian or Pacific Islander residents.

Table B.3: Dissimilarity Index Values by Race/Ethnicity, Region

Racial/Ethnic Dissimilarity Index	2000 Trend	2010 Trend	2020 Trend
Non-White/White	40.52	39.53	-
Black/White	39.80	38.59	35.3
Latinx/White	50.72	47.62	45.4
Asian or Pacific Islander/White	41.97	43.07	39.8 ⁴

Source: HUD AFFH Tool Table 3 – Racial/Ethnic Dissimilarly Trends

These data reflect relatively similar levels of segregation for White, Latinx, and Asian⁵ residents of the region with each group likely to reside in census tracts where their respective racial or ethnic group is the largest group but does not make up a majority of the population. Black residents are likely to live in census tracts that closely mirror the demographics of the region as a whole. White, Latinx, and Asian residents all experience similar levels of isolation and relatively similar levels of exposure to other groups. White isolation has decreased over time, while Latinx isolation has increased slightly and Asian isolation has increased significantly. Those trends are largely a factor of relative rates of population growth among those groups rather than increasing levels of segregation. On a superficial level, Isolation Index data would seem to show that integration for Black residents has increased because, on average, they are living in less heavily Black neighborhoods. However, the Exposure Index shows that the neighborhoods in which Black residents live have become much less heavily white. Thus, it is difficult to support the conclusion that Black residents have significantly increased access to neighborhoods from which they had been excluded. Instead, neighborhoods where Black residents live, like most neighborhoods in Santa Clara County, have become much more heavily Asian and slightly more heavily Latinx over time.

Table B.4: Isolation Index Values, Unincorporated County

Isolation Index	2000	2010	2020
White	58.7	52.1	50.2
Black	3.9	3.4	4.1
Latinx	44.8	49.5	45.7
Asian	21.1	23.6	22.3

Table B.5: Isolation Index Values, Region

Isolation Index	2000	2010	2020
White	56.2	47.6	39.1
Black	4.2	4	3.8

⁴ 2020 Dissimilarity Index data is available for white residents in relation to Asian residents but not in relation to Asian or Pacific Islander residents collectively.

⁵ Isolation and Exposure Index data does not aggregate Asian and Pacific Islander populations into a combined category, unlike HUD-provided Dissimilarity Index data.

Latinx	41.7	43.4	41.1
Asian	37.6	45.4	51.1

<https://s4.ad.brown.edu/projects/diversity/segregation2020/msa.aspx?metroid=41940>

Segregation Trends. Understanding trends in segregation and their causes is critical to selecting strategies for reducing segregation. The data above shows increases in segregation for some groups, but it is important to understand that, if a group goes from comprising a very small percentage of the population to a much larger one, it is virtually inevitable that Dissimilarity and Isolation Indices will increase and Exposure will decrease. Similarly, the displacement of members of group out of an area entirely, such as Black residents of Santa Clara County, can create the illusion of greater integration of that group.

Santa Clara County. In the County, Dissimilarity Index values reflect virtually unchanged levels of segregation for all racial and ethnic groups since 1990.

Region. Since 1990, the Dissimilarity Index for Asian or Pacific Islander residents in relation to white residents has increased, suggesting greater segregation, while indices for Black and Latinx residents are largely unchanged. A likely explanation for the juxtaposition between increased segregation of Asian or Pacific Islander residents and unchanged segregation of Latinx residents, despite increasing both groups' growth, is that Latinx residents were much more segregated in 1990. Improved enforcement of the Fair Housing Act likely helped reduce what was a greater barrier for Latinx residents not too long ago. Exposure Index data reflects that all groups' exposure to both Latinx and Asian or Pacific Islander residents has increased since 1990. Maps B.3 show trends since 1990 for Santa Clara County and the region.

Map B.3: Race/Ethnicity in 1990, Santa Clara County and Region

Map B.4: Race/Ethnicity in 2000, Santa Clara County and Region

Map B.5: Race/Ethnicity in 2010, Santa Clara County and Region

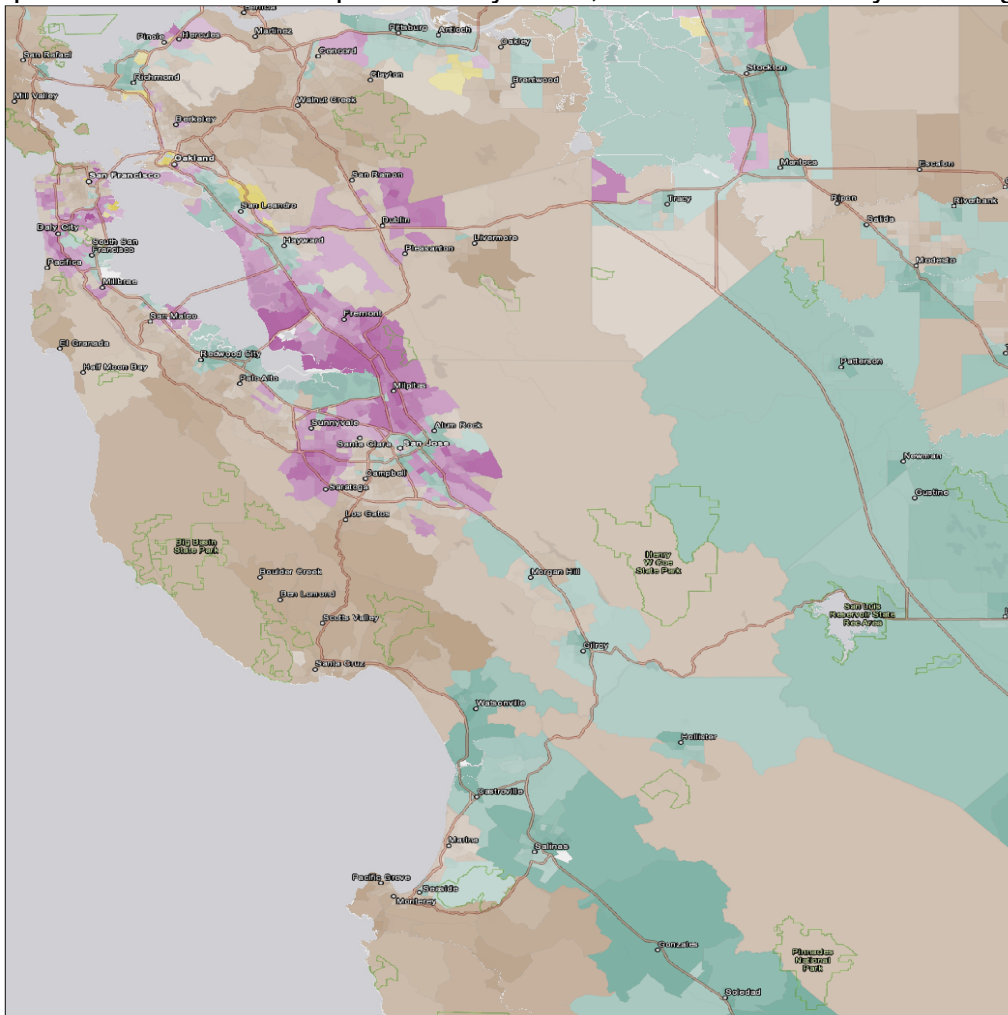

In the county, three trends since 1990 are noteworthy. First, in affluent West Valley communities like Saratoga, Los Gatos, and Los Altos, the population has become more heavily Asian or Pacific Islander, and these communities all have high combined white and Asian or Pacific Islander populations. These areas have continued to have higher concentrations of white residents than other parts of the county or region, but those concentrations have still declined in tandem with the increasing Asian or Pacific Islander population. Latinx population has not significantly increased in these communities. Second, the percentage of the population that is Latinx in Morgan Hill has increased. Lastly, the same is true in the northeastern portions of the city of Campbell, near the San José border.

Regionally, the most evident trends since 1990 include significant reductions in white population in Milpitas, Cupertino, Santa Clara, Sunnyvale, and areas through San José, paired with significant increases in Asian population throughout those areas. When a broader view of the region is adopted, there have also been significant reductions in Black population in historical centers like East Palo Alto, East and West Oakland, the Western Addition in San Francisco, and Richmond, along with increases in Black population in eastern Contra Costa County and Vallejo.

Map B.6 shows that Unincorporated County currently has a higher white population and lower Latinx/Hispanic and Asian populations compared to the region.

Map B.6: Predominant Populations by Race, Santa Clara County and Region

7/28/2023, 6:06:57 PM

- White alone, not Hispanic or Latino
- Hispanic or Latino
- Black or African American alone, not Hispanic or Latino

Esri, HERE, Garmin, © OpenStreetMap contributors, and the GIS user community, Esri, HERE, Garmin, USGS, EPA, NPS

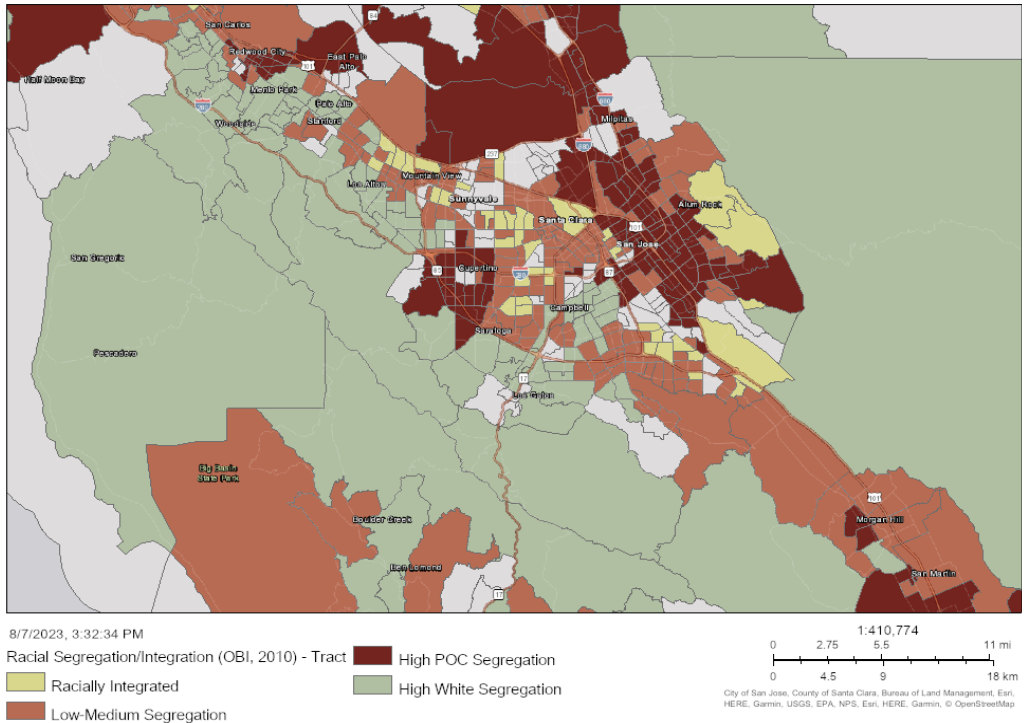

Maps B.5 and B.6 show racial segregation and integration patterns in Santa Clara County in 2010 and 2020. Very few communities in Santa Clara County were racially integrated in 2010. Cities with racially integrated communities included Mountain View, Sunnyvale, Santa Clara City, and areas between Saratoga and Campbell.

San José and Cupertino had much higher levels of racial segregation than the county overall, nearly all census tracts in both cities show high levels of racial segregation between minority groups and other residents. Patterns in San José are likely influenced by the city's larger population of low-income residents. Conversely, Cupertino's median household income is among the highest in the county, suggesting segregation patterns are being influenced by the city's racial and ethnic composition. High white segregation was most prominent in Palo Alto, Los Altos, Los Gatos, and Saratoga and Campbell (in part).

These patterns are consistent with the Bay Area shown in maps B.6 and B.7: traditionally lower income areas show high levels of POC segregation in 2010. Segregation among non-White residents is most prominent in Daly City, South San Francisco, Millbrae, Oakland, San Leandro, Redwood City, and San Francisco (in part). Berkeley also appears to be highly segregated though this is likely the result of the city's large student population which is often more diverse and of lower income.

Santa Clara County has higher levels of white segregation than the region as a whole. Within Santa Clara County, the most integrated areas are within the city of Campbell, particularly its northern portions. Additionally, in much of Morgan Hill and San Martin, Latinx and white residents are integrated, but, as in South County generally, the Asian or Pacific Islander population is small. Affluent communities like Saratoga, Los Gatos, Los Altos, and Los Altos Hills have disproportionately small Latinx populations. There is also some segregation of Latinx and Asian or Pacific Islander residents in unincorporated areas within or adjacent to the east side of San José, like Alum Rock.

Map B.11 above reflects more substantial patterns of segregation in the region. Areas of white population concentration consist primarily of portions of South and West San José, smaller cities in the West Valley, and portions of Mountain View and Palo Alto, along with some rural portions of San Benito County. There are no areas of Black population concentration within the more narrowly defined region. Areas of Hispanic population concentration consist of parts of Downtown, East, and South San José, part of Morgan Hill, most of Gilroy and Hollister, and small portions of Santa Clara and Sunnyvale. Areas of Asian population concentration include parts of East, North, and West San José, virtually all of Cupertino, most of Sunnyvale, and parts of Santa Clara.

Broadening the scope of analysis, there are areas of Black population concentration in East and West Oakland, the Bayview-Hunter’s Point neighborhood of San Francisco, Richmond, and small parts of Dublin, Pittsburg, and Vallejo. Additional areas of white population concentration include much of central Contra Costa County, the Oakland Hills, Berkeley, much of northern and western San Francisco, most of Marin County, and parts of San Mateo County such as Belmont, Menlo Park, San Carlos, and Woodside. Additional areas of Hispanic population concentration include much of Hayward, parts of East Oakland, the Mission District in San Francisco, much of Richmond and adjoining San Pablo in western Contra Costa County, much of Bay Point and Pittsburg in eastern Contra Costa County, and East Palo Alto in San Mateo County. Additional areas of Asian population concentration include Fremont, Union City, and southern San Leandro;

Downtown Oakland; Hercules; Daly City and Foster City; and much of southeastern and western San Francisco, along with the more centrally located Chinatown area.

Segregation by National Origin & Limited English Proficiency. In addition to patterns of segregation and integration by race, this Assessment looks at similar patterns by national origin, limited English proficiency (LEP) status, and ancestry. Those patterns at the County and region are described below.

Map B.12: National Origin, Santa Clara County

Santa Clara County. In the County, there are relative concentrations of individuals of Mexican national origin in Morgan Hill as well as in unincorporated areas adjacent to the east side of San José. There is also one unincorporated census tract adjacent to the east side of San José in which there is a concentration of individuals of Indian national origin. There are relative concentrations of persons of Indian and Chinese national origin in Saratoga and Los Gatos, although those concentrations are lower than in nearby cities like Cupertino. There is one census tract in Los Altos Hills that has a slight concentration of people of Indian national origin, but Los Altos and Los Altos Hills generally do not have concentrations of foreign-born residents.

Region. Within the region, individuals of Mexican national origin are relatively concentrated in the east side of San José, Morgan Hill, Gilroy, and Hollister, the latter of which is located in San Benito County which borders Santa Clara County to the south. People of Vietnamese national origin are concentrated on the east side of San José and in Milpitas. People of Indian national origin are concentrated in Cupertino, Sunnyvale, Santa Clara, and in north San José. People of Filipino national origin are comparatively

integrated throughout the central and northern portions of Santa Clara County with the exception of Downtown San José. Here, the Filipino population is relatively small. People of Chinese national origin are concentrated in Cupertino and in Milpitas.

Map B.13: National Origin, Region

Santa Clara County. In the County, Spanish speaking LEP residents are concentrated in Morgan Hill, unincorporated areas adjacent to the east side of San José, and, to a lesser extent, in the portions of Campbell closest to the city of San José. LEP population in Saratoga, Los Gatos, Los Altos, and Los Altos Hills is more likely to consist of Chinese speaking individuals. Vietnamese speaking LEP residents are concentrated in the unincorporated areas adjacent to the east side of San José. Persian speaking LEP residents are not concentrated in any particular area.

Map B.14: Limited English Proficiency, Santa Clara County

Source:

San José-Sunnyvale-Santa Clara, CA Region. In the region, Spanish speaking LEP residents are relatively concentrated in the east side of San José, Morgan Hill, Gilroy, and Hollister. Vietnamese speaking LEP residents are relatively concentrated on the east side of San José and Milpitas. Chinese speaking LEP residents are relatively concentrated in Cupertino, the west side of San José, and southern Sunnyvale. Tagalog speaking LEP residents are relatively concentrated on the east side of San José but are less heavily concentrated than LEP residents who primarily speak Spanish, Vietnamese, and Chinese. Korean speaking LEP residents are somewhat concentrated in Cupertino and the west side of San José, but they are also less heavily concentrated than most other LEP groups shown on the map above.

HUD-Provided Data Version: AFFHT0006

Segregation by household income and poverty. Income segregation (and income inequality) is rapidly increasing across Santa Clara County and the Region. These patterns have been exacerbated by rising housing costs, stagnant wages, and community disinvestment that have caused barriers to accessing community assets and equitable opportunities.

Map B.15 shows low to moderate income populations in Santa Clara County and regional communities in 2015. In the County, low to moderate income households were more likely to living in Mountain View, San José, Santa Clara, and Campbell. Cupertino and Saratoga each had one census tract where 50% to 75% of the total population had low to moderate incomes.

Regional concentrations are located in San Carlos, Redwood City, East Palo Alto, and Stanford. Income segregation patterns in East Palo Alto are likely the result of rampant gentrification occurring across the city. Gentrification has been exacerbated by large tech

companies (e.g., Facebook, Apple) moving into traditionally lower income communities. As more high-income workers re-locate to East Palo Alto, housing prices will continue to rise and displacement will become more common. Conversely, income segregation in Stanford has likely been influenced by the Stanford's large student population; most of which do not hold full-time jobs.

Map B.16: Low to Moderate Income Population by Block Group, Santa Clara County, 2015

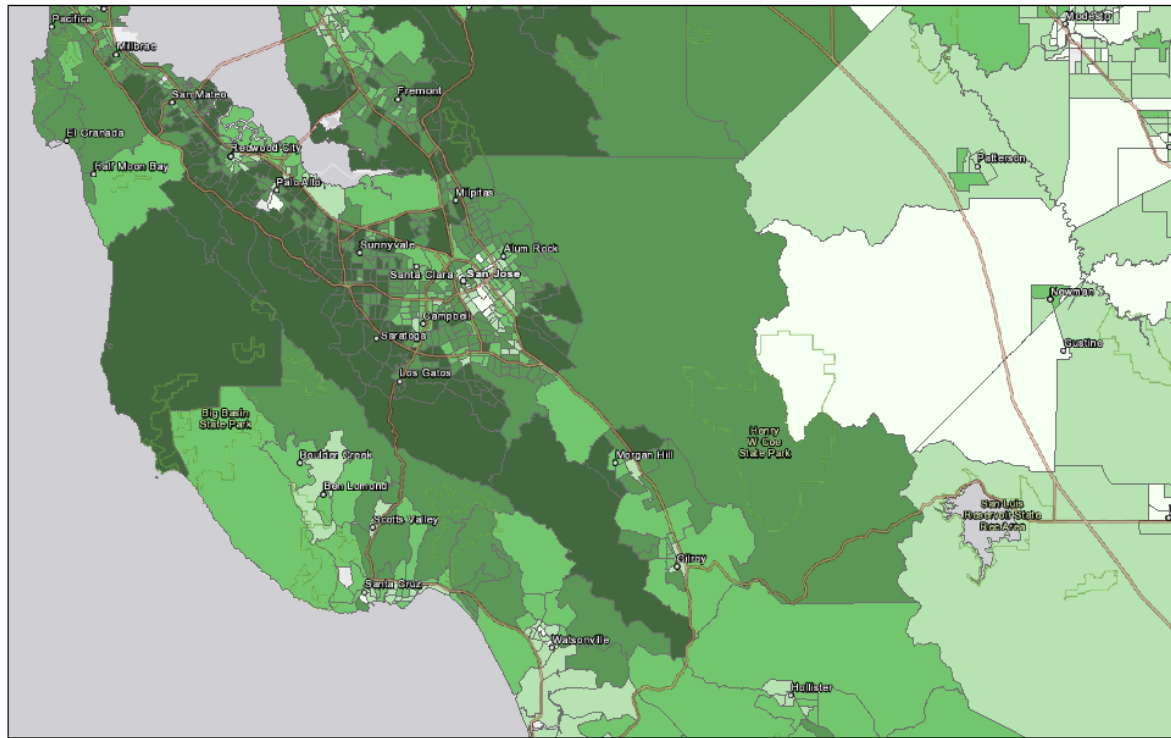

Source: California Department of Housing and Community Development AFFH Data Viewer.

Maps B.17 and B.18 show more recent income segregation patterns in Santa Clara County and the Region. Households in Santa Clara County tend to have higher incomes, especially in Sunnyvale, Saratoga, Cupertino, Los Gatos and Milpitas. Very few census tracts in the county have households with incomes below \$55,000 though concentrations do exist in San José and Palo Alto.

It is important to note that communities in San José with lower median incomes were also given low grades by the HOLC's neighborhood ranking system (see Map 1). Neighborhoods in these census tracts were assigned grades between C (declining) and D (hazardous). These findings suggest that historically segregated communities are still experiencing the harmful consequences of discriminatory housing practices.

Map B.17: Median Income by Census Tract, Santa Clara County, 2021

8/4/2023, 9:22:15 AM

Source: California Department of Housing and Community Development AFFH Data Viewer.

Regional concentrations of lower income households are evident in South San Francisco, Redwood City, Oakland, San Leandro, Watsonville, Stockton, and one census tract in Santa Cruz.

Map B.18: Median Income by Census Tract, Region, 2021

Source: California Department of Housing and Community Development AFFH Data Viewer.

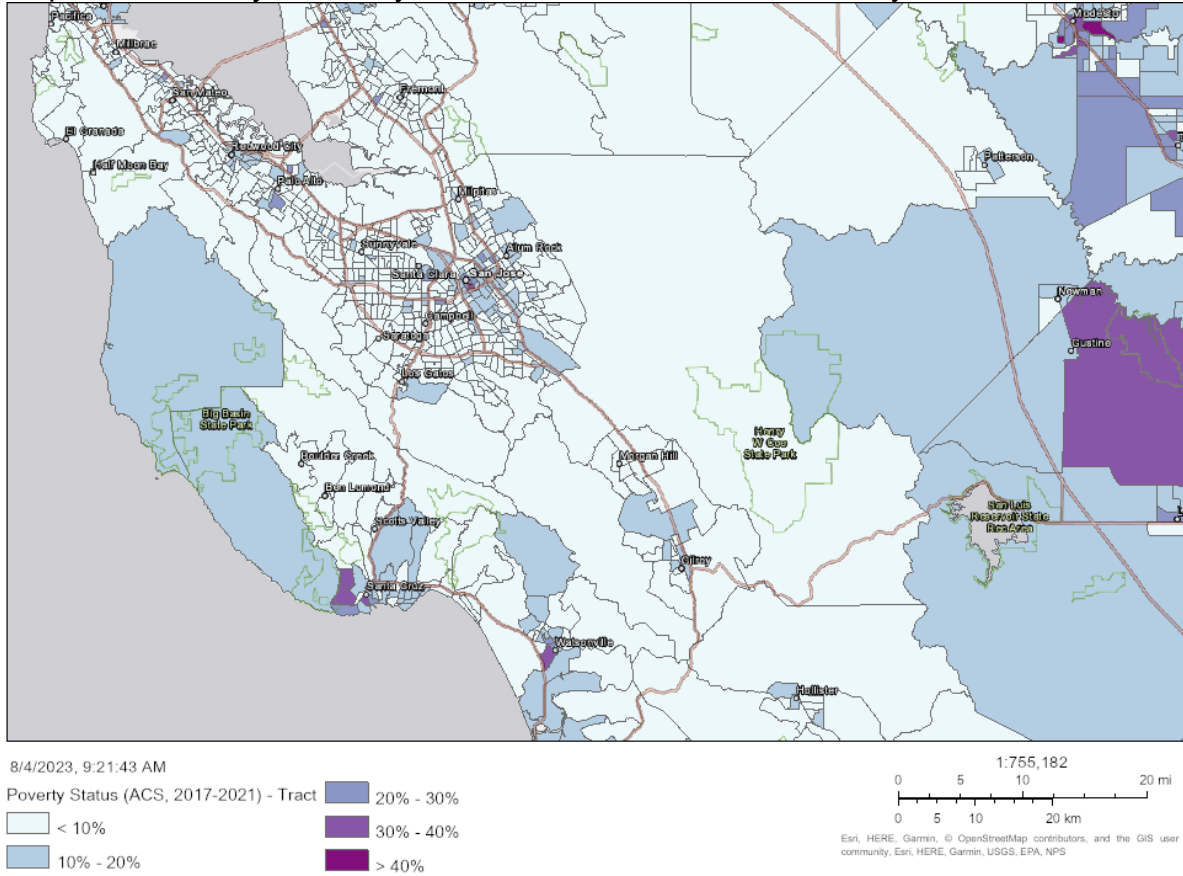

In the region, the highest income households are concentrated in the West Valley portion of northwestern Santa Clara County while the lowest income households are most likely to live in Downtown and East San José and the eastern portion of the city of Gilroy. San Benito County, which comprises the portion of the region not accounted for by Santa Clara County, is relatively lower income than Santa Clara County. Lower income portions of the region tend to be more heavily Hispanic and, in some cases, Vietnamese than higher income areas, which are more heavily white, Asian Indian, and Chinese.

In 2021, Santa Clara County had an overall poverty rate of seven percent. Poverty rates were highest for American Indian/Alaska Native residents (16%), Black/African American residents (11%), and residents with less than a high school education (14%). However, according to a study from the California Budget and Policy Center, **Santa Clara County's poverty rates increase to 18% when factoring in housing costs, meaning almost one in five residents live in poverty.** These findings suggest that despite the county's overall affluence, residents are experiencing significant income inequality. Income inequalities experienced by many residents are likely the result of Silicon Valley; dramatic

wage gaps, high housing prices, and shifts in the regional economy—all of which have shrunk the middle class and increased poverty levels.⁶

Maps B.19 and B.20 illustrate the number of residents living in poverty in Santa Clara County and the Region. There are very few concentrations of poverty in the County and the region overall. Concentrations of poverty are located in communities around San Francisco, Oakland, San Leandro, Redwood City, Santa Cruz, Watsonville, and a few census tracts in San José.

Map B.20: Poverty Status by Census Tract, Region, 2021

Source: California Department of Housing and Community Development AFFH Data Viewer.

Segregation by Family Status. Under the Fair Housing Act (FHA) and California State Law, familial status is protected against housing discrimination by all housing providers. Familial status covers families with children under 18 years, pregnant persons, persons in the process of securing legal custody of a minor child (including adoptive/foster parents), and permissions with written permission from the parent or legal guardian.⁷

In line with both federal and state law, Unincorporated County has implemented a range of programs to support families and prevent discrimination. For the upcoming planning period, Santa Clara County will work with its partners to adopt meaningful policies and programs that will facilitate housing choice and ensure housing stability for families and other household types. This section provides an in-depth analysis of household composition in Santa Clara County including segregation patterns and other unique needs.

Households with children are particularly vulnerable to displacement and long-term housing stability. This is especially true for lower income households living in high income

⁷ https://www.hud.gov/program_offices/fair_housing_equal_opp/discrimination_against_families_children.

areas with limited affordable housing. Affordability challenges are often exacerbated for these households with the added cost of living (e.g., childcare, recreation/activities, education).

Table B.6 shows household type by tenure for Santa Clara County in 2021. As shown below, married couple households are significantly more likely to own their home than other households: almost three in four households (67%) own their home compared to only 33% of renters. Expectedly, over half of nonfamily households (60%) in the county are renters.

Table B.6: Household Type by Tenure, Santa Clara County, 2021

Household Type	Renter Households	Owner Households
Total Households	43.90%	56.10%
Married Family	32.80%	67.20%
Male Householder, no spouse present	51.90%	48.10%
Female Householder, no spouse present	55.10%	44.90%
Nonfamily	60.20%	39.80%

Source: 2021 5-year ACS.

Maps B.21 and B.22 show the percentage of children living in married family households in Santa Clara County and the Region. The majority of children in Santa Clara County and unincorporated areas live in married family households, especially in Saratoga, Los Gatos, and Milpitas; all of which have several census tracts where more than 80% of children are living in married couple households. These patterns are similar to the Region overall which show the majority of children living in married family households.

San José has the smallest share of children in married couple households in Santa Clara County. Several census tracts in the city show only 20% to 40% of children living in these households. Importantly, these census tracts overlap with income segregation patterns in the city: **In San José, census tracts with smaller shares of children in married households have a large number of households with incomes below \$55,000.** This is supported by local data which shows married couple households as having higher household incomes than single households and residents living alone. These trends are likely attributed to married households having more than one earner per household.

Map B.22: Percent of Children in Married Couple Households by Census Tract, Region, 2021

Maps B.23 and B.24 show the percentage of children living in households with a female householder (no spouse present) in Santa Clara County and the Region. In line with the findings presented above, a small share of children live in a single head household in the county and region.

However, there are notable concentrations of these households in the county, specifically in San José and Gilroy. San José has one census tract where up to 60% of children live with female householders while Gilroy (in its entirety) show up to 60% of children living with female householders. Patterns in Gilroy are particularly important given the city’s large population of working class residents and rural communities. In fact, according to research from the University of California, Berkeley, two of the most segregated neighborhoods in the region are located in Gilroy.⁸ Regional concentrations in the Bay Area are located in San Francisco, Oakland, and Redwood City—all of which are of traditionally lower incomes.

⁸ Stephen Menendian, Samir Gambhir, and Othing & Belonging Institute, “Racial Segregation in the San Francisco Bay Area, Part 1,” *UC Berkeley* (University of California, Berkeley, October 30, 2018), <https://belonging.berkeley.edu/racial-segregation-san-francisco-bay-area-part-1>.

Maps B.25 and B.26 show the percentage of residents living with a spouse in Santa Clara County and the Region in 2021. Residents living with their spouse are more likely to be

living in Campbell, Los Gatos, Saratoga, and Sunnyvale. Of jurisdictions in the county, Sunnyvale has the largest share of residents living with a spouse at over 80%. Overall, these patterns are consistent with regional trends: households are concentrated in Oakland and Livermore.

Given the above findings, it is unsurprising that very few residents live alone in Santa Clara County and most of the Region. Densely populated areas in the region have larger shares of residents living alone, specifically San Francisco, City of San Mateo, and Santa Cruz.

Concentrations in the county include communities in Palo Alto, Saratoga, Campbell, Santa Clara, and San José. These findings are shown in Maps B.30 and B.31.

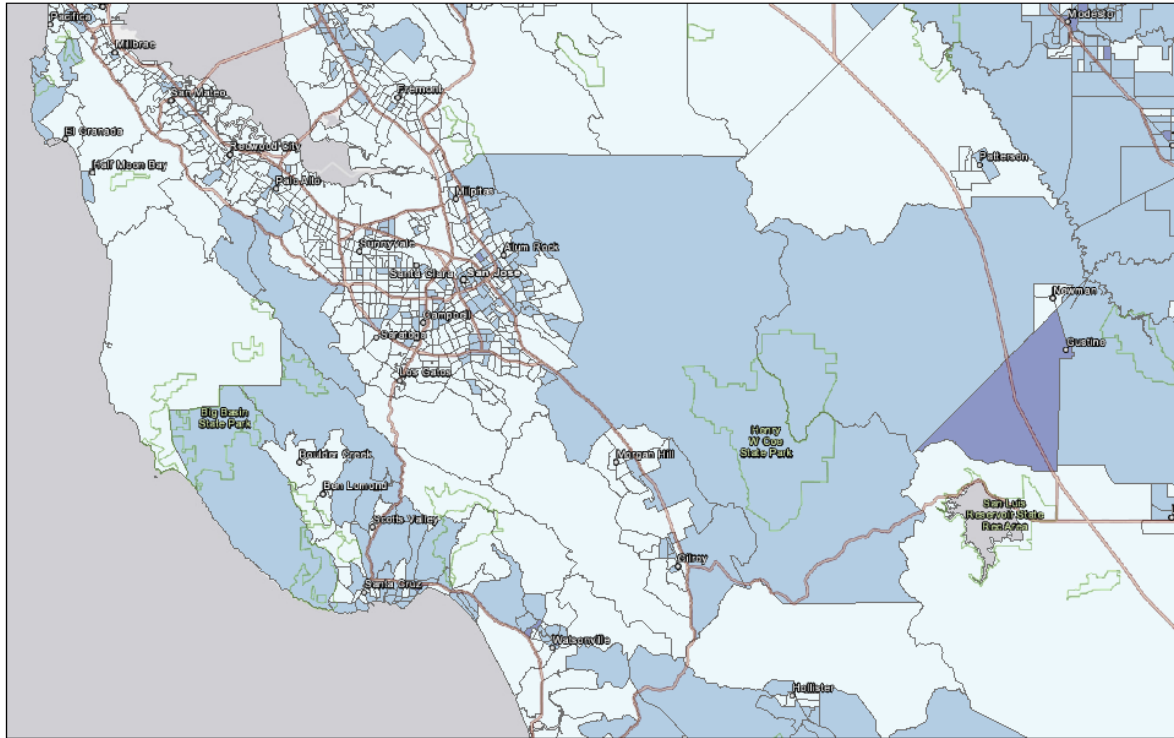

Map B.28: Percent of Population Living Alone by Census Tract, Region, 2021

Source: California Department of Housing and Community Development AFFH Data Viewer.

Segregation by Disability Status. According to 2021 5-year ACS data, only eight percent (8%) of Santa Clara County have a disability. Maps B.29 and B.30 show the percentage of residents with a disability in Santa Clara County and the Region. Overall, there are no significant concentrations of disabled residents in the county though one census tract in San José has a larger population of residents with a disability at between 20% and 30% of the total population. These patterns are similar to the Region, excluding communities in San Francisco, Oakland, and Walnut Creek.

Segregation by Renter and Owner-Occupied Housing Types. There are no areas with high concentrations of renters in the Unincorporated County. In the region, renter households are concentrated in the city of San José; in a corridor along El Camino Real spanning the cities of Mountain View, Palo Alto, Santa Clara, and Sunnyvale; in the unincorporated area encompassing the campus of Stanford University and its immediate surroundings; in Gilroy; and in Hollister. These areas include most of the segregated, predominantly Latinx areas in the region, with the exception of some predominantly Latinx areas in the furthest east portions of the east side of San José. They also include some comparatively integrated areas, particularly Mountain View, Santa Clara, and Sunnyvale. By contrast, areas with high concentrations of owner-occupied homes include Cupertino, Los Altos, Los Altos Hills, Los Gatos, Monte Sereno, Saratoga, south San José, the hills to the east of San José, and rural areas in South County and in neighboring San Benito County. These areas include areas with relatively low Latinx populations, as well as low Vietnamese populations, though south San José is relatively integrated in comparison to other predominantly owner-occupied communities.

Map B.31: Percent of Households in Renter-Occupied Housing Units, Santa Clara County and Region

Contributing Factors of Segregation. Consider the listed factors and any other factors affecting the jurisdiction and region. Identify factors that significantly create, contribute to, perpetuate, or increase the severity of segregation.

Please see section X.5, Contributing Factors Appendix, for further discussion of the following Contributing Factors to Segregation. Please see section X.4 for more details on the proposed goals and actions to address these contributing factors.

- Community opposition
- Displacement of residents due to economic pressures
- Lack of community revitalization strategies
- Lack of private investment in specific neighborhoods

- Lack of public investment in specific, neighborhoods, including services and amenities
- Lack of local or regional cooperation
- Land use and zoning laws
- Lending discrimination
- Location and type of affordable housing
- Loss of affordable housing
- Occupancy codes and restrictions
- Private discrimination
- Source of income discrimination

ii: Racially or Ethnically Concentrated Areas of Poverty and Racially Concentrated Areas of Affluence

Racially Concentrated Area of Poverty or an Ethnically Concentrated Area of Poverty (R/ECAP) and Racially Concentrated Areas of Affluence (RCAAs) represent opposing ends of the segregation spectrum from racially or ethnically segregated areas with high poverty rates to affluent predominantly White neighborhoods. Historically, HUD has paid particular attention to R/ECAPs as a focus of policy and obligations to AFFH. Recent research out of the University of Minnesota Humphrey School of Public Affairs argues for the inclusion of RCAAs to acknowledge current and past policies that created and perpetuate these areas of high opportunity and exclusion.⁹

It is important to note that R/ECAPs and RCAAs are not areas of focus because of racial and ethnic concentrations alone. This study recognizes that racial and ethnic clusters can be a part of fair housing choice if they occur in a non-discriminatory market. Rather, R/ECAPs are meant to identify areas where residents may have historically faced discrimination and continue to be challenged by limited economic opportunity, and conversely, RCAAs are meant to identify areas of particular advantage and exclusion.

R/ECAPs

HCD and HUD's definition of a Racially/Ethnically Concentrated Area of Poverty:

- A census tract that has a non-White population of 50 percent or more (majority-minority) or, for non-urban areas, 20 percent, AND a poverty rate of 40 percent or more; OR
- A census tract that has a non-white population of 50 percent or more (majority-minority) AND the poverty rate is three times the average tract poverty rate for the County, whichever is lower.

Source: California Department of Housing and Community Development Guidance, 2021.

R/ECAPs are geographic areas with significant concentrations of poverty and minority populations. HUD has developed a census-tract based definition of R/ECAPs. In terms of racial or ethnic concentration, R/ECAPs are areas with a non-white population of 50 percent or more. With regards to poverty, R/ECAPs are census tracts in which 40 percent or more of individuals are living at or below the poverty limit or that have a poverty rate three times the average poverty rate for the metropolitan area, whichever threshold is lower. Racially Concentrated Areas of Affluence (RCAAs) are areas with concentrations of white residents and higher income residents. The California Department of Housing and Community Development (HCD) defines RCAAs as having a non-Hispanic white population concentration of at least 1.25 times that of the council of governments region

⁹ Goetz, E. G., Damiano, A., & Williams, R. A. (2019). Racially Concentrated Areas of Affluence: A Preliminary Investigation. *Cityscape: A Journal of Policy Development and Research*, 21(1), 99–124

in which a municipality is located and a median household income of at least 1.5 times that of the relevant council of governments region.

Where one lives has a substantial effect on mental and physical health, education, crime levels, and economic opportunity. Urban areas that are more residentially segregated by race and income tend to have lower levels of upward economic mobility than other areas. Research has found that racial inequality is thus amplified by residential segregation. Concentrated poverty is also associated with higher crime rates and worse health outcomes. However, these areas may also offer some opportunities as well. Individuals may actively choose to settle in neighborhoods containing R/ECAPs due to proximity to job centers. Ethnic enclaves in particular may help immigrants build a sense of community and adapt to life in the U.S. The businesses, social networks, and institutions in ethnic enclaves may help immigrants preserve their cultural identities while providing a variety of services that allow them to establish themselves in their new homes. Overall, identifying R/ECAPs facilitates understanding of entrenched patterns of segregation and poverty. RCAAs may be home to concentrated advantage across a range of opportunity indicators, and many RCAAs developed as they did, in part, as a result of historic housing segregation and explicitly discriminatory practices.

R/ECAP and RCAA tracts in Santa Clara County and the B Region. When identifying and analyzing R/ECAPS in Santa Clara County and the Region, it is crucial that the local conditions of these areas be considered to inform fair housing goals, policies, and programs. Importantly, patterns of racial segregation significantly impact concentrated areas of poverty for marginalized groups. As discussed in previous sections, segregation patterns and poverty concentrations are the result of discriminatory housing practices and zoning and land use policies (among others). As written in UC Berkeley’s Racial Segregation in the San Francisco Bay Area Report, “City planners zoned areas adjacent to neighborhoods with apartment buildings and multifamily units (which were predominantly low income and Black) for industrial and commercial use, concentrating poverty and exposing these communities to dangerous environmental hazards.”¹⁰

Research has documented the negative impacts of concentrated poverty on economic and social opportunities and outcomes.¹¹ These impacts have been entrenched in racially concentrated areas of poverty and reinforce socioeconomic disparities along racial lines.¹² The intersection of segregation and poverty across the Region is clear and can be demonstrated by children’s income as well as the decreased likelihood of moving to a low poverty neighborhood in adulthood.¹³

¹⁰ Othering & Belonging Institute, “Racial Segregation in the San Francisco Bay Area,” *UC Berkeley* (University of California, Berkeley, February 6, 2019), <https://belonging.berkeley.edu/segregationinthebay>.

Williams, and University of Minnesota, “Racially Concentrated Areas of Affluence: A Preliminary Investigation,” *Cityscape: A Journal of Policy Development and Research* 21, no. 1 (2019), <https://www.huduser.gov/portal/periodicals/cityscpe/vol21num1/ch4.pdf>.

¹² *Ibid.*

¹³ Othering & Belonging Institute, “Racial Segregation in the San Francisco Bay Area.”

The California Department of Housing and Community Development (HCD) created an alternative metric for Racially Concentrated Areas of Affluence (RCAA) to better reflect California’s relative diversity and regional conditions. According to HCD, RCAAs are areas with census tracts with a Location Quotient (LQ) of more than 1.25 and a median income 1.5 times higher than the COG AMI (or 1.5 times the state AMI, whichever is lower).¹⁴

Map B.32: High Segregation and Poverty, Santa Clara County and Region

Source: California Department of Housing and Community Development AFFH Data Viewer.

There is one area of high segregation and poverty in Santa Clara County and the region, located in in San José. Other areas outside of the region where there is high segregation and poverty include Lodi, Stockton, Modesto, and Turlock.

¹⁴ <https://abag.ca.gov/technical-assistance/racially-concentrated-areas-affluence>.

There is currently only one R/ECAP that is either partially or entirely in Unincorporated Santa Clara County. This R/ECAP is located in south-central San José and includes the County Fairgrounds, an unincorporated enclave with no residential development, along with the adjoining residential areas that are within city limits. Of note is a former R/ECAP on Stanford University's campus. Stanford campus's former R/ECAP included a significant population in the Unincorporated County. However, the reasons for its race/ethnicity and socioeconomic demographics are very different from the vast majority of R/ECAPs and are not truly reflective of the composition of a more traditional R/ECAP. More specifically, Stanford has a comparatively larger student population than surrounding communities. Full-time students tend to have lower incomes and are more diverse than total residents in Santa Clara County and unincorporated areas.

Map B.33: Racially Concentrated Areas of Affluence by Census Tract, Santa Clara County, 2021

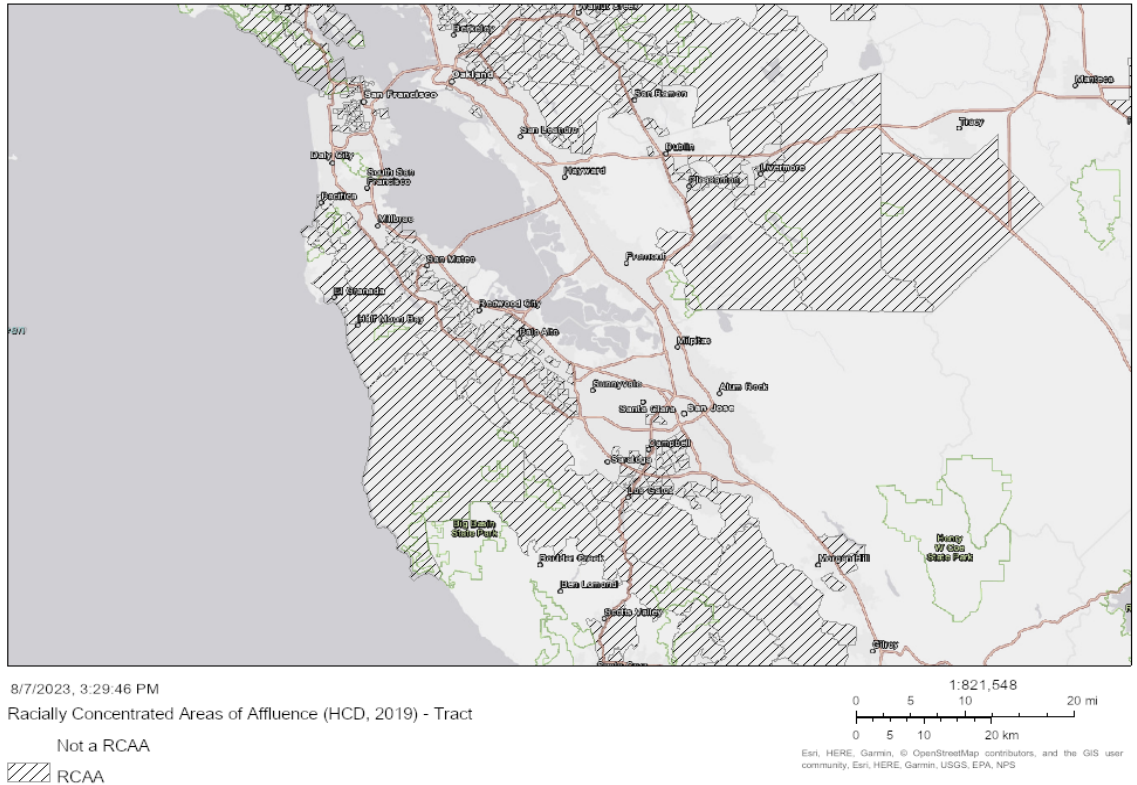

Source: California Department of Housing and Community Development AFFH Data Viewer.

Most of Unincorporated County is not located in Racially Concentrated Areas of Affluence. The areas of the county located in RCAAs include the western parts of Santa Clara County, Morgan Hill, Campbell, and Los Gatos. These areas have relatively higher household incomes, relatively higher concentrations of white residents, and relatively lower concentrations of Hispanic residents.

At the same time, rather than being places where development patterns were established by historical patterns of segregation, these areas are ones in which relatively recent, single-family homes predominate. The relative lack of multifamily housing in these areas likely plays some role in their race and socioeconomic status demographics but not to the same extent as the age of the housing. It is also important to note that, although these areas meet the definition of RCAAs, they actually have much lower household incomes than the most affluent parts of the region, some of which are not RCAAs. This is because a number of the highest income census tracts in the region, located in Cupertino and Saratoga, in particular, have relatively low white population concentrations and majority Asian and Pacific Islander populations.

In the Region, RCAAs are concentrated in the West Valley as well as in parts of South San José. There is also one RCAA in Ridgemark, an unincorporated place just south of Hollister in San Benito County.

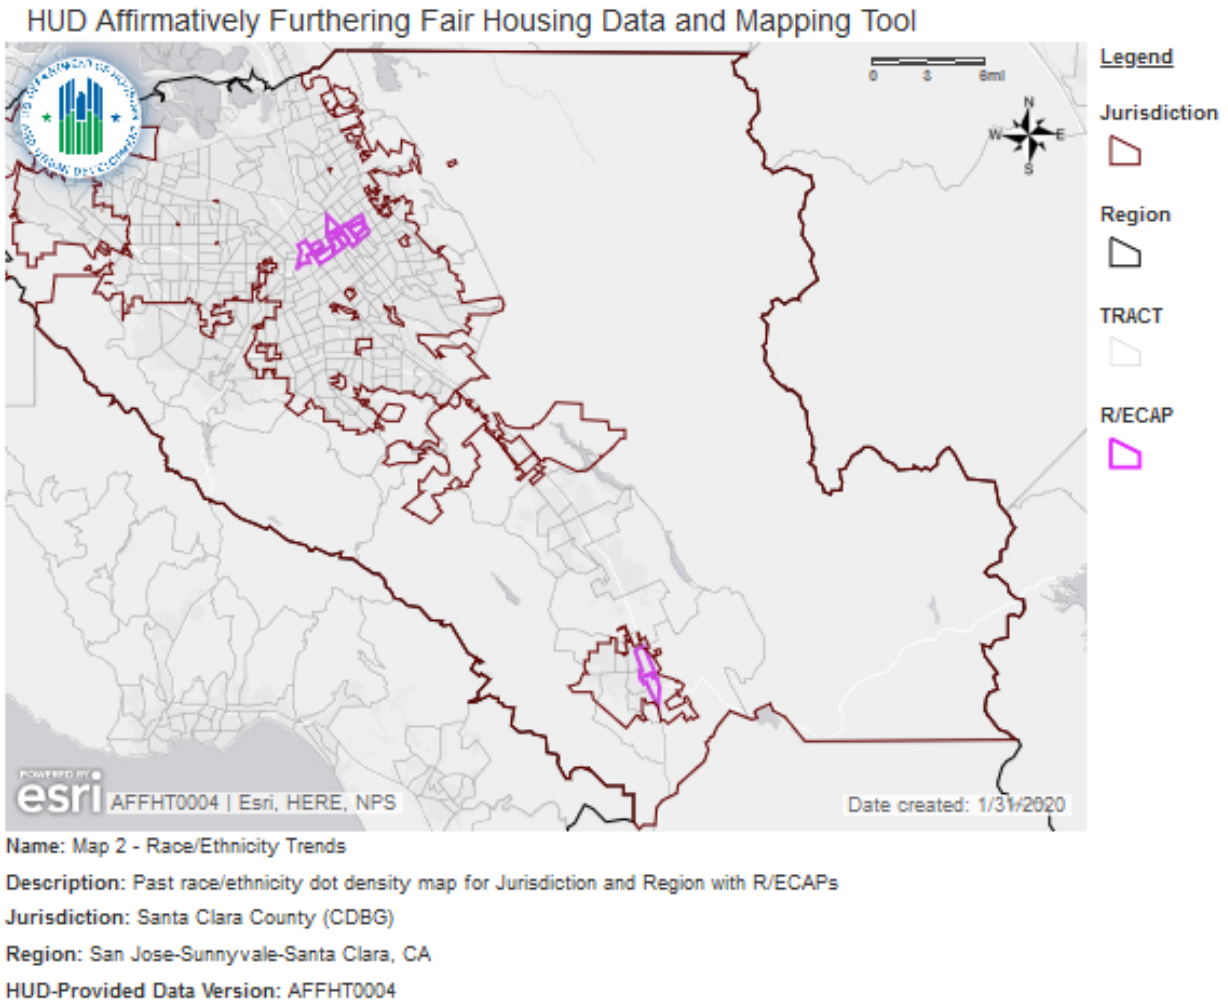

Map B.34: Racially Concentrated Areas of Affluence by Census Tract, Region, 2019

Source: California Department of Housing and Community Development AFFH Data Viewer.

R/ECAP Trends in Santa Clara County and Region 1990-2020. In 1990, there were no R/ECAPs in Unincorporated Santa Clara County. There were two R/ECAPs in the center of Gilroy, as well as 12 in San José, each of which are directly adjacent. These R/ECAPs reflect the high levels of segregation in eastern San José and central Gilroy present in 1990.

Map B.35: R/ECAPs in 1990, Santa Clara County

In 2000, there was one new R/ECAP in the northwestern corner of the Unincorporated County, but it was an anomaly. Located on the Stanford University campus, it likely had a diverse student body who earned little or no income. The two adjacent R/ECAPs in Gilroy remained, but the number of R/ECAPs in San José decreased. Only five R/ECAPs remained in San José, four of which were adjacent to one another with the fifth close by. While the San José R/ECAPs in 1990 stretched horizontally across the city, in 2000, they were located in the same general area but stretched vertically. A notable difference between 1990 and 2000 was an increase in overall diversity, resulting in a reduction of racial segregation. This increase in diversity, at least in part, explained the decrease in the number of R/ECAPs in 2000.

Map B.36: R/ECAPs in 2000, Santa Clara County

Name: Map 2 - Race/Ethnicity Trends

Description: Past race/ethnicity dot density map for Jurisdiction and Region with R/ECAPs

Jurisdiction: Santa Clara County (CDBG)

Region: San Jose-Sunnyvale-Santa Clara, CA

HUD-Provided Data Version: AFFHT0004

In 2010, the R/ECAPs map changed again. Nearly all the R/ECAPs from 2000 carried over, with new ones being located just to the east of the existing ones. Additionally, there were a couple located farther west, including one R/ECAP that was partially in the unincorporated Parkmoor neighborhood of San José, and one located farther south. The diversity of the County also continued to grow in this period, which might explain the shifting of some of the R/ECAPs away from the eastern-central part of San José. Gilroy's two R/ECAPs in Gilroy were eliminated.

It is hard to fully explain the R/ECAP patterns observed, especially because this analysis utilizes a more generous definition for present-day R/ECAPs to capture the realities of the high cost of living in the area. However, even using the updated definition, R/ECAPs in San José have remained consistent, even while shifting slightly to adjacent census tracts over times. Notably, fewer R/ECAPs existed in 2000 than in 1990 or 2010. The increase in R/ECAPs from 2000 to 2010, and the shift toward the eastern side of San José, which has been historically segregated, might suggest a tendency toward resegregation. On the other hand, the elimination of the R/ECAPs in Gilroy, which has remained a majority-

minority city, might suggest an increase in the financial health of its residents, rather than a desegregation or a decrease in diversity.

In 2020, the R/ECAPs map changed again, and both Stanford and Parkmoor/Buena Vista were removed from the R/ECAP map. There are today 11 R/ECAPs identified in East and South San José and two R/ECAPs identified in central Gilroy. Of these, only one R/ECAP, located in the North Monterey area of San José, contains any unincorporated lands, the Santa Clara County Fairgrounds.

Map B.37: R/ECAPs in 2010, Santa Clara County
HUD Affirmatively Furthering Fair Housing Data and Mapping Tool

Name: Map 2 - Race/Ethnicity Trends

Description: Past race/ethnicity dot density map for Jurisdiction and Region with R/ECAPs

Jurisdiction: Santa Clara County (CDBG)

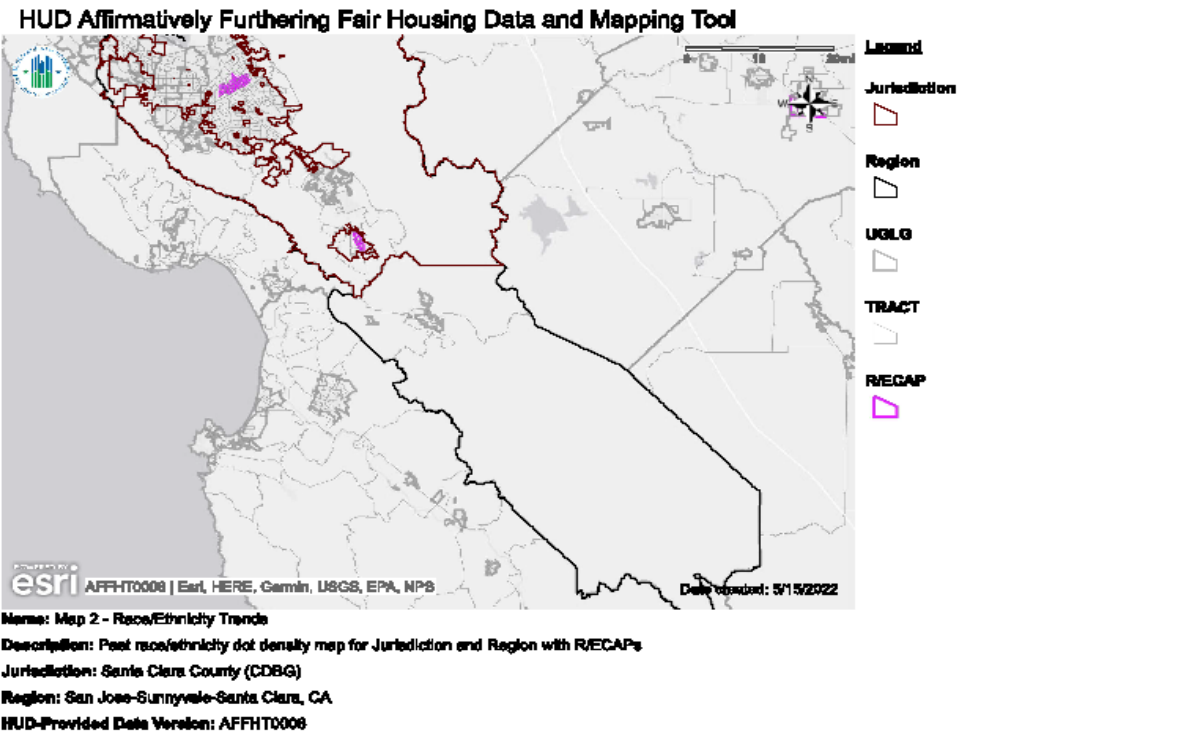

Region: San Jose-Sunnyvale-Santa Clara, CA

HUD-Provided Data Version: AFFHT0004

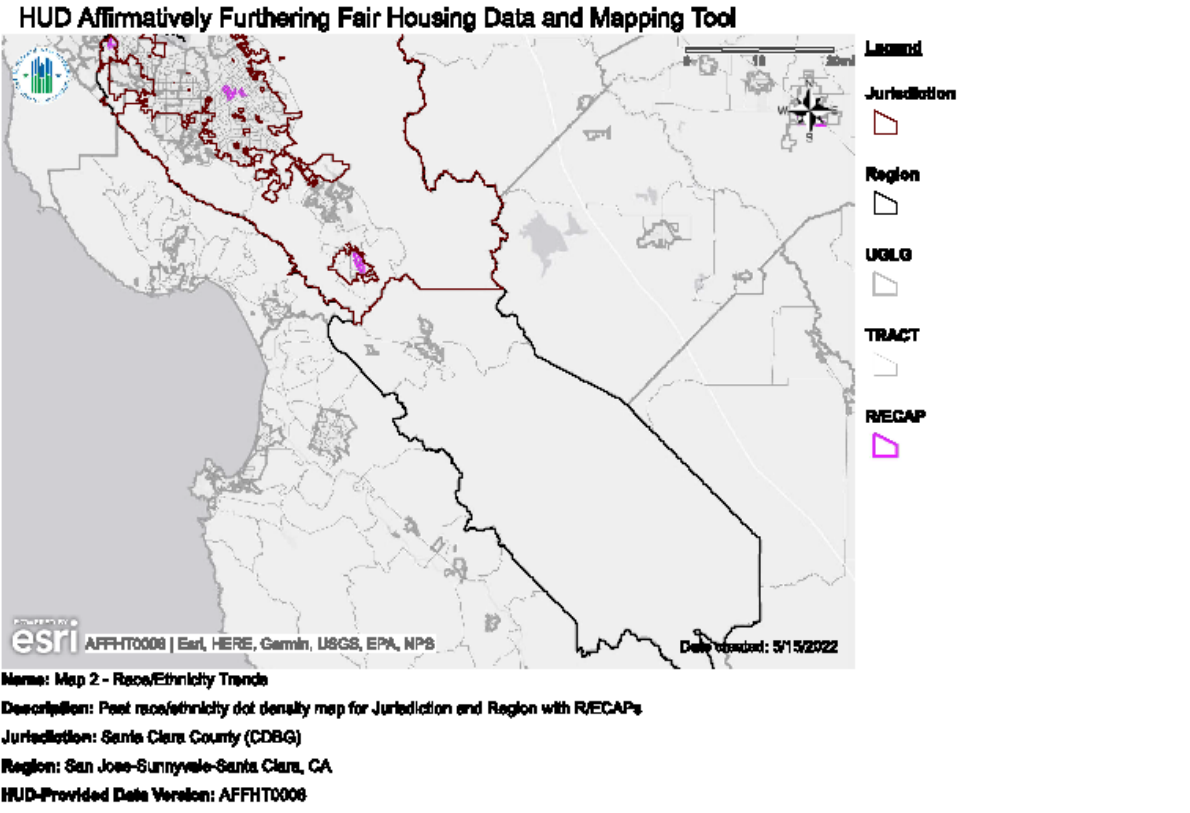

The San José-Sunnyvale-Santa Clara Region has seen significant change since 1990. In the cluster of R/ECAPs in San José, Hispanic residents have become a greater concentration of the population as white residents have moved outwards. In contrast, the two census tracts designated as R/ECAPs in Gilroy in 2000 were no longer designated as R/ECAPs in 2010, despite having a greater concentration of Hispanic residents than earlier. These two census tracts have been re-designated as R/ECAPs, however, as of the latest data. In the northwest corner of the region, Stanford University has been designated as a R/ECAP since 2000, but this change likely comes from the fact that the

university's student population has included a smaller proportion of white residents over time.

Contributing Factors of R/ECAPs.

Please see section X.5, *Contributing Factors Appendix*, for further discussion of the following Contributing Factors to R/ECAPs. Please see section X.4 for more details on the proposed goals and actions to address these contributing factors.

- Community opposition
- Deteriorated and abandoned properties
- Displacement of residents due to economic pressures
- Lack of community revitalization strategies
- Lack of local or regional cooperation
- Lack of private investments in specific neighborhoods
- Lack of public investments in specific neighborhoods, including services or amenities
- Land use and zoning laws
- Location and type of affordable housing
- Loss of affordable housing
- Occupancy codes and restrictions
- Private discrimination
- Source of income discrimination

iii: Disparities in Access to Opportunity

This section discusses disparities in access to opportunity among protected classes including access to quality education, employment, transportation, and environment.

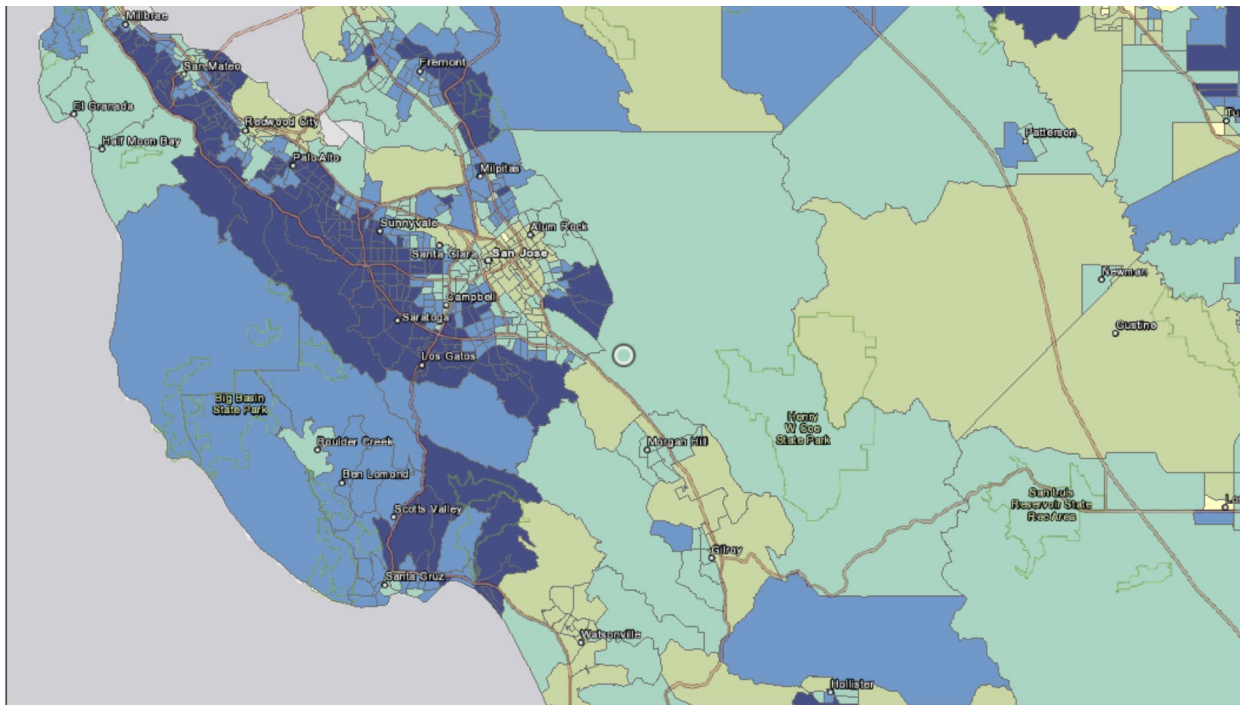

Access to Opportunity

“**Access to opportunity** is a concept to approximate place-based characteristics linked to critical life outcomes. Access to opportunity oftentimes means both improving the quality of life for residents of low-income communities, as well as supporting mobility and access to ‘high resource’ neighborhoods. This encompasses education, employment, economic development, safe and decent housing, low rates of violent crime, transportation, and other opportunities, including recreation, food, and healthy environment (air, water, safe neighborhood, safety from environmental hazards, social services, and cultural institutions).”

Source: California Department of Housing and Community Development Guidance, 2021, page 34.

The California Tax Credit Allocation Committee (TCAC) in collaboration with HCD developed a series of opportunity maps that help to identify areas of the community with good or poor access to opportunity for residents. These maps were developed to align funding allocations with the goal of improving outcomes for low-income residents—particularly children.

Overall, most areas of the County generally have high access to opportunity and limited exposure to adverse community factors, but it is not uniform. The higher resourced areas are generally the western and central areas of the county. The County's eastern areas are lower resourced and of lower income which is likely the result of discriminatory housing practices that led to public and private community disinvestment. Limited transportation options have also played a role by restricting access to local jobs and community assets.

Many of these trends are replicated regionally. With some notable exceptions, such as jobs-rich Cupertino, areas with greater transit and job access tend to be those with worse environmental health. Additionally, areas with less transit and job access tend to be those with greater access to proficient schools and low poverty neighborhoods. This mirrors patterns of segregation and R/ECAPs in the Region. R/ECAPs, which tend to be disproportionately Hispanic, generally have higher access to transportation and higher job proximity (which does not necessarily mean that neighborhood residents are able to secure those jobs) and less access to proficient schools, environmentally healthy neighborhoods, and low poverty neighborhoods.

This section provides an overview of patterns in disparities in access to opportunity based on where people live in Santa Clara County and the broader region, including the Region. This section reviews data concerning access to education, transportation, employment, and environmental health. The measures of access to opportunity compare census tracts in the area covered by this Assessment to all census tracts across the State of California, in most cases, or to all census tracts nationwide, for some. Therefore, it is important to keep in mind that data showing high access to public transportation, for example, relies on a comparison of the Unincorporated County and other parts of Santa Clara County to places like Redding or Bakersfield that have extremely limited transportation infrastructure in addition to places that are more genuinely comparable. Equally, environmental health data relies on a comparison of the area to rural areas with little vehicle traffic and little or no industrial activity. Access to opportunity can have a complex relationship with patterns of segregation, both reflecting existing segregation and reinforcing those patterns.

For example, in light of the correlation between race, ethnicity, and socioeconomic status, communities in Santa Clara County with high white, Chinese, and Indian populations often have stronger tax bases than communities with larger Latinx and Vietnamese populations. Since property taxes, though limited by Proposition 13, are a key component of funding for public services like education, parks, and recreation, the location of amenities like high-performing schools can follow these patterns of segregation. The patterns themselves can reinforce segregation when households with more economic mobility, who may be disproportionately white, Chinese, or Indian, prioritize moving to areas that already have strong public schools.

Disparities in Access to Opportunity – Education. This section explores education as an opportunity factor to identify educational disparities among residents in Santa Clara

County and the Unincorporated County. Educational opportunities are analyzed through the education level of residents, student demographics, academic performance and outcomes, and school readiness. An analysis of English learners, students in special education, and access to postsecondary education are also included.

Residents of Santa Clara County have high levels of education. According to 2021 5-year American Community Survey (ACS) data, 28% of residents have a bachelor's degree and 27% have a graduate or professional degree. Residents with a college education (or higher) tend to have higher incomes, particularly residents with graduate degrees. In 2021, the median earnings for these residents was almost \$138,000 compared to less than \$40,000 for residents that did not graduate high school. This is particularly important given the county's high housing prices and limited affordable inventory as residents in this group are likely struggling to avoid being cost burdened and/or displaced.

Local schools. Santa Clara County is served by 12 school districts and 32 Local Education Agencies (LEAs) including: the Santa Clara County Office of Education, elementary school districts, high school districts, and unified school districts. For the 2021-2022 academic school year, Santa Clara County had a total of 408 schools with a total enrollment of 241,326 students in elementary to high school.¹⁵ The Office of Education for Santa Clara County provides a range of services to students, school districts, and for professional development.¹⁶ These services include:

- Alternative education (court and community schools),
- Childcare resources and referrals,
- Early learning,
- Foster and homeless youth services,
- Migrant education,
- Opportunity Youth Academy,
- Special education,
- Environmental education programs,
- Inclusion services,
- Civic engagement,
- LGBTQ+ support,
- Behavioral interventions and supports,
- School climate, leadership, and instructional services,
- Universal design for learning, and
- Youth health and wellness.

In the 2021-2022 academic year, there were a total of 10,545 full-time teachers and 1,542 full and part-time employees. Teachers in the county have a median salary of \$98,326, most of which will likely struggle to stay in the community with the county's limited affordable housing inventory. However, Santa Clara County and the Office of Education have worked diligently to expand housing opportunities for teachers and educators through advocacy efforts and several educator programs, including HUD's Good Neighbor Next Door; Teacher Next Door; Educator Mortgage; Homes for Heros;

Homebuyer Empowerment Loan Program (HELP); Empower Homebuyers Santa Clara County; NeighborhoodLIFT; Housing Industry Pilot Program; and other local teacher assistance programs.

Figure B.1 provides an overview of the county’s student population by race and ethnicity as well as special needs groups. Primary findings illustrated below include:

- **Santa Clara County has a diverse student population** compared to overall residents: 39% of students identify as Hispanic or Latino and 31% as Asian. Non-Hispanic White students account for only 17% of total students.
- **In the 2021-2022 academic year, 36% of students were socioeconomically disadvantaged.** The large number of disadvantaged students is likely related to the county’s non-White student population which are more likely to face affordability challenges and housing barriers.

Figure B.1:

County Office of
Education.

According to student data from the Office of Education, there were 4,480 English learners in Santa Clara County’s school districts during the 2021-22 academic year (grades K-12). Students learning English are more likely to speak Spanish, Vietnamese, Mandarin, Amharic, and other non-English languages. Less than one percent of students account for all other languages.

In the 2018-2019 academic year, Santa Clara County had a total of 29,292 students enrolled in special education programs. Of these students, the most common disability

type are learning disabilities (37%) followed by speech impairments, autism, and other health impairments. Intellectual and emotional disabilities account for less than 10% of students enrolled in special education. These findings are illustrated in Figure B.2 below.

These findings will inform Unincorporated Santa Clara County's policies and programs to meaningfully address education disparities among students and families.

School readiness. In partnership with Applied Survey Research (ASR), the Santa Clara County Office of Education and FIRST 5 Santa Clara conducted a countywide Kindergarten Parent Survey to assess children's kindergarten readiness skills and identify education disparities for children through demographic factors, child health and wellbeing, formal early care and education attendance, bedtime, child resilience, single parenthood, and housing stability.¹⁷ The survey was administered online between September and October 2020 and received a total of 342 responses from kindergarten and transitional kindergarten partners/caregivers.

Key findings from the survey as well as racial/ethnic and socioeconomic disparities are highlighted below.

- **Lower income households and non-White families reported higher levels of concern for meeting their children's basic needs**, specifically educational and health needs.
- Parents from lower income and non-White families expressed higher levels of concern about managing their child's behavior and reported lower levels of child resilience (e.g., regulating emotions, adapting to change).

¹⁷ <https://www.sccoe.org/Documents/Santa-Clara-School-Readiness-Parent-Survey-Report-2020.pdf>.

- **Low-income families are more likely to use parenting services such as parent education.** This is particularly important for Santa Clara County given the challenges low income households face and suggests that the county and unincorporated areas will need to invest in parent education services to ensure they are easily accessible and affordable to families.
- White children had the highest rate of well-child and dental visits while **lower income and Hispanic/Latino families had the lowest health screening and early care and education (ECE) attendance rates.**
- Since 2018, families have had reduced access to early intervention services and reduced access to childcare: **44% of children with special needs did not receive the professional help they needed during the COVID-19 pandemic and 87% of families reported losing childcare.**

With these findings, the Office of Education and FIRST 5 Santa Clara developed a set of approaches for the community to pursue to address education challenges across the county in areas including: basic needs support, parenting support, health care and early intervention, early care and education, support for providers, and targeted investments to promote equity. Recommendations are summarized below.

- Advocate for income and job loss supports and reduce barriers for families accessing basic needs supports and services;
- Address barriers to the delivery of parent education programs and resources that help parents engage in nurturing and supportive parenting practices;
- Increase the availability of mental health treatment and trauma-informed services for children and their parents/caregivers.
- Reduce barriers to access to health care and early intervention services for children;
- Invest in the stabilization of childcare and promote wraparound early care and education programs that build cognitive skills and address children’s social and emotional needs.
- Target investments and supports for families with the greatest need, including those living in lower income communities and communities of color.

Unincorporated County will use these findings to inform policies and practices that will expand education opportunities and provide greater support to low-income families and families with unique needs.

Barriers in Access to Higher Performing Schools in Santa Clara County and Regionally. For many low-income families, housing and education are inextricably linked. When families are relegated to segregated, low-opportunity areas, chances are they are farther away from high-performing schools with resources to help their children succeed. This section provides an overlapping analysis of where different racial/ethnic groups live and how that impacts their ability to access proficient schools throughout Santa Clara County and the Region.

The analysis in this section is based on a combination of data sources. The tables represent the HUD School Proficiency index which compares the fourth-grade test scores

of elementary schools to the neighborhoods they live in or near to block-group level census data to determine which neighborhoods have access to proficient schools. Values range from 0 to 100, where a higher score represents higher quality school systems. This data is then broken down by race and ethnicity. In addition to HUD, the California Department of Education provides detailed data on both school districts and individual schools via their Dashboard tool. This analysis will look at portions of this data as it relates to protected classes in the participating jurisdictions, including overall ratings of schools, graduation rates, and school discipline rates.

Table B.7: School Proficiency Index, by Race/Ethnicity, Santa Clara Urban County

Total Population	School Proficiency Index
White, Non-Latinx	77.49
Black, Non-Latinx	68.99
Latinx	51.88
Asian or Pacific Islander, Non-Latinx	82.53
Native American, Non-Latinx	62.46

Source: HUD AFFH data.

In the County, Asian or Pacific Islander residents have the most access to proficient schools with a score of 82.53, followed closely (roughly five points) by white students. Latinx residents have the least access to proficient schools, with a school proficiency index of just 51.88. Native American and Black residents are somewhere between, with scores of 62.46 and 68.99, respectively.

Regardless of race or ethnicity, School Proficiency Indices are higher in the Urban County than they are in the broader region. This trend is consistent with the fact that most of the cities that are part of the Urban County consist wholly or predominantly of high resource communities. Disparities between groups in the region are also similar to those found in the County with Black, Latinx, and Native American residents – and Latinx residents, in particular – having relatively lower access to proficient schools and White and Asian or Pacific Islander residents having greater access. Unlike in the County, white residents have greater access to proficient schools than Asian or Pacific Islander residents. This difference is likely attributable to the large population of Vietnamese ancestry in parts of the region that are outside of the Urban County and that do not have high performing schools, like the east side of San José. Looking at the population below the federal poverty line reduces School Proficiency Index values across racial and ethnic groups but does not change patterns of disparity between groups.

Table B.8: School Proficiency Index, by Race/Ethnicity, Region

Total Population	School Proficiency Index
White, Non-Latinx	70.27
Black, Non-Latinx	57.64
Latinx	48.93
Asian or Pacific Islander, Non-Latinx	67.19

Native American, Non-Latinx	56.83
Population Below Federal Poverty Line	
White, Non-Latinx	63.94
Black, Non-Latinx	53.41
Latinx	44.53
Asian or Pacific Islander, Non-Latinx	58.14
Native American, Non-Latinx	52.47

Source: HUD School Proficiency Index

Academic performance. Test scores for students in Santa Clara County were relatively low during the 2021-2022 academic year. According to the California Assessment of Student Performance and Progress, 47% of students met or exceeded the standard for English Language Arts (ELA) and 34% met or exceeded the standard for Math.

Figures B.9 and B.10 show ELA test results and math test results for students of all grades in Santa Clara County by achievement level and socioeconomic characteristics, respectively. Key findings presented the figures below include:

- **Students in Santa Clara County were more likely to meet standards for ELA than Math:** over a quarter of students met ELA testing standards compared to only 17% who met Math standards.
- **Black or African American students, disabled students, and economically disadvantaged students were significantly less likely than other groups to meet both ELA and Math standards.** These patterns are also prominent among American Indian/Alaska Native students and Hispanic or Latino students.
- **The education level of parents has a clear impact on academic performance and testing standards.** For ELA and Math testing, students with parents who have higher levels of educational attainment were far more likely to exceed testing standards than other students. These findings make evident the importance of expanding access to post-secondary education among adults and families.

Postsecondary education. Access to postsecondary education plays a critical role in life trajectories, quality of life, and economic development. With higher levels of education, residents are more likely to be engaged in the community, contribute to the local economy, and live stable lives.

College-going rates are an important indicator for equitable access to postsecondary education opportunities. California’s Department of Education provides college-going rate (CGR) reports for public high school students across the state. Of students who completed high school in Santa Clara County, 78% enrolled in college within 12 months of graduation. Santa Clara County’s CGR is significantly higher than that of the state: California public high schools have an average CGR rate at only 62%.

Importantly, the number of high school graduates enrolled in college varies by race and ethnicity, special needs, and by school district. As shown in Figure B.11:

- Los Gatos-Saratoga Union High School District had the highest college-going rate with 88% of students enrolled in college. Fremont Union and Palo Alto Unified districts also had high rates at 86%.

- **Hispanic or Latino students are far less likely to attend college after high school graduation than other racial and ethnic groups.** Other racial disparities include:
 - Hispanic/Latino students in Santa Clara Unified are significantly less likely to enroll in college: only five percent of students enrolled in college after high school graduation.
 - In all school districts, over 85% of Asian students attended college. College-going rates are highest in Fremont Union High, Los Gatos-Saratoga Union High, and Milpitas Unified.
 - College-going rates for Black or African American students are particularly low in Gilroy Unified and higher in Fremont Union High (93%) and Mountain View-Los Altos Union High (91%).
- Palo Alto Unified had the highest college-going rate for Filipino students: all Filipino students in the district enrolled in college after graduating high school in 2020-21.
- On average, **55% of students with disabilities in the County attended college after high school graduation.** Disabled students attending schools in East Side Union High and Gilroy Unified have lower college-going rates than other districts. Los Gatos-Saratoga High School has notably higher rates at 79% (similar to socioeconomically disadvantaged students).
- Socioeconomically disadvantaged students have comparatively higher college-going rates than other special needs groups, particularly in Los Gatos-Saratoga Union High, Palo Alto Unified, and Milpitas Unified districts.

Table B.11: Public High School Graduates Enrolled in College by School District, Santa Clara County, 2020-2021

	Campbell Union High	East Side Union High	Fremont Union High	Gilroy Unified	San Jose Unified	Milpitas Unified	Morgan Hill Unified	Palo Alto Unified	Santa Clara Unified	Los Gatos- Saratoga Union	Mountain View Los Altos Union High	Santa Clara County Office of Education

Socioeconomically Disadvantaged	64%	68%	74%	64%	62%	74%	70%	77%	61%	79%	71%	61%

Note: Data represent public high school students who enrolled in college within 12 months of graduation.

Source: California Department of Education.

As shown in the above figures, the Los Gatos-Saratoga High School District has higher college-going rates for special needs groups than other districts, specifically socioeconomically disadvantaged students, and students with disabilities. This could be related to the district being located in a high resource area, which often have greater access to quality schools than areas of lower incomes/opportunity.

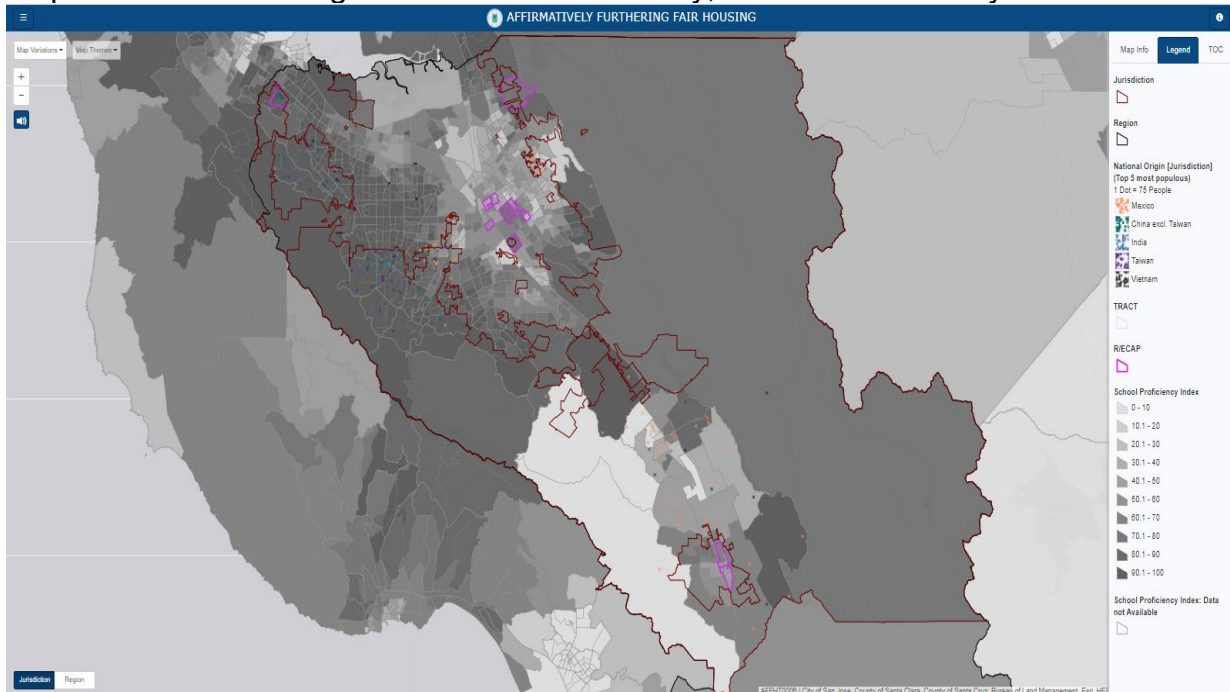

Residential Housing Patterns and Disparities in Access to Schools in Santa Clara County and Regionally. The following analysis is based on maps from the HUD AFFH Data and Mapping Tool, which overlays dot density representations of different racial and ethnic groups with shading that represents scores on the School Proficiency Index. This allows us to compare the geographic locations of racial and ethnic concentrations as well as the concentrations higher access to proficient schools. Areas of the darkest shading represent higher scores on the school proficiency index, areas of the lightest shading represent lower scores on the School Proficiency Index.

Map B.42: Race/Ethnicity and School Proficiency, Santa Clara Urban County

Countywide, white residents are clustered in the northwest portion of the county. This area of the county has dark shading, corresponding to higher access to proficient schools. Towards the center of the county are concentrations of other racial groups, including Asian and Latinx residents. This area has slightly lighter shading, indicating less access to proficient schools. However, when comparing parts of the Urban County to each other, areas with higher Asian or Pacific Islander populations, like Saratoga, have greater access to proficient schools than places with less access, like Morgan Hill and San Martin.

Map B.43: National Origin and School Proficiency, Santa Clara County

Source : HUD AFFH Data and Mapping Tool.

In the County, people of Indian, Chinese, and Taiwanese national origin are most likely to live in the West Valley in areas with highly proficient schools. People of Mexican national origin are most likely to live in unincorporated areas adjacent to the east side of San José as well as in Morgan Hill and San Martin, areas with relatively lower access to proficient schools than in the West Valley. People of Vietnamese national origin are also most likely to live in unincorporated areas adjacent to the east side of San José.

Disparities in Access to Opportunity – Employment. Access to employment at a decent wage is a hallmark of broader access to opportunity. The neighborhood or city in which a person lives can affect one’s access to employment. This can happen both through proximity of residential areas to places with high concentrations (or low concentrations) of jobs and through barriers to residents of particular neighborhoods accessing jobs, even when they are close by. HUD’s Jobs Proximity and Labor Market Indices measure how close residents live to concentrations of jobs and the extent to which residents are employed, respectively. The higher an index value (or closer to 1) reflects closer proximity to jobs, for the Jobs Proximity Index, and a higher percentage of residents who are employed, for the Labor Market Index. The jobs-housing imbalance in Santa Clara County is particularly extreme and isolates Latinx and Vietnamese residents from jobs-rich places.

Disparity in Access to Jobs and Labor Markets in Santa Clara County and Regionally. In the County, white and Asian or Pacific Islander residents have the highest levels of labor market engagement, Black residents have somewhat lower levels of labor market engagement, and Latinx and Native American residents have the lowest levels of

labor market engagement. All racial and ethnic groups have broadly similar levels of proximity to jobs.

Table B.12: Labor Market and Jobs Proximity Indices, Santa Clara Urban County

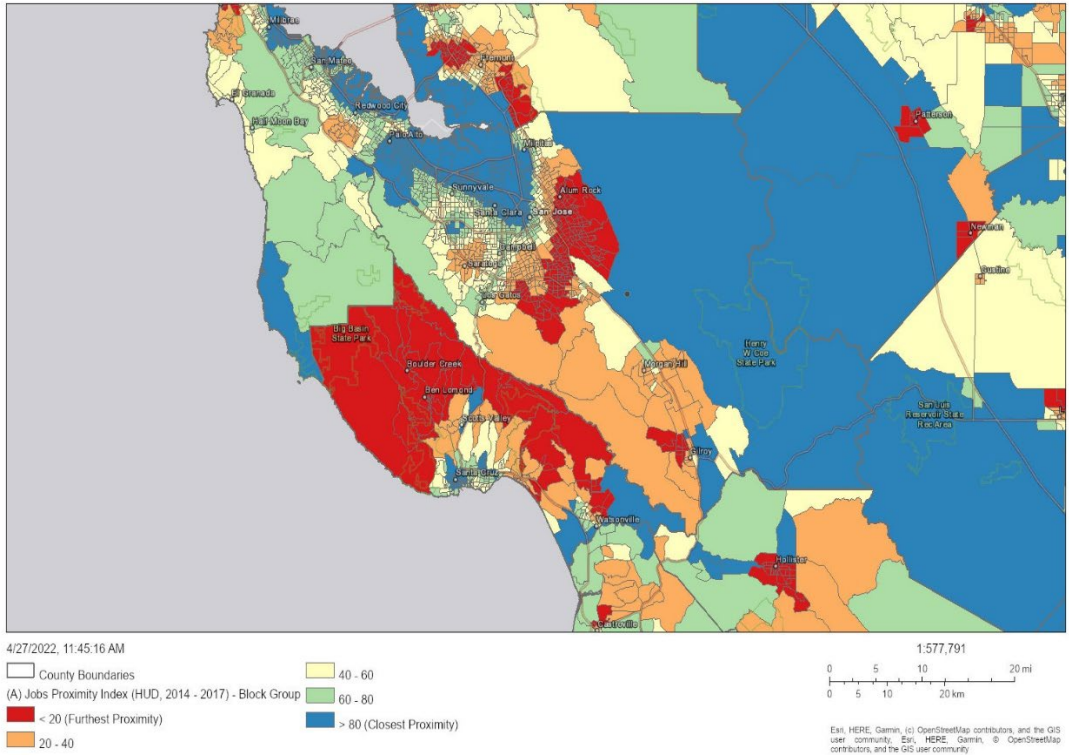

Total Population	Labor Market Index	Jobs Proximity Index
White, Non-Latinx	81.19	57.34
Black, Non-Latinx	72.37	59.75
Latinx	60.56	59.12
Asian or Pacific Islander, Non-Latinx	82.54	53.84
Native American, Non-Latinx	62.46	57.50

Impact of Housing Patterns on Access to Jobs for Protected Classes in Santa Clara County and Regionally. In Santa Clara County, job proximity is highest in northern portions of the West Valley and is lowest in South County. Labor market engagement is highest in the West Valley, comparatively moderate in Campbell, and lowest in South County. In general, areas that are more heavily white have higher labor market engagement and proximity to jobs, and areas that are more heavily Latinx have lower labor market engagement and proximity to jobs.

In the region, jobs proximity is highest in communities that have relatively low Latinx populations and relatively high combined white and Asian or Pacific Islander populations. Areas with high jobs proximity are concentrated in the north and west sides of San José, in Cupertino, in Palo Alto, and in the parts of Mountain View, Santa Clara, and Sunnyvale that are between U.S. Route 101 and the San Francisco Bay. The parts of the latter three cities are actually more heavily Latinx than their encompassing cities but are less heavily Latinx than other parts of the region, such as the east side of San José, Morgan Hill, and Gilroy. Labor market engagement is highest in the West.

Map B.44: Job Proximity, Santa Clara County

Jobs Proximity Index

Disparities in Access to Opportunity – Transportation. The AARP Livability Index scores communities and neighborhoods based on transportation metrics and policies related to convenience, safety, and a range of transportation options. Scores consider indicators such as: the frequency of transit service, ADA-accessible stations, traffic and congestion, transportation costs, and crash rates. In 2022, Santa Clara County received a transportation score of 51 out of 100. Findings for Santa Clara County are summarized below.¹⁸

- There are seven buses and trains per hour for residents using local transit services;
- 84% of transit stations in the county are in compliance with accessibility requirements under the Americans with Disabilities Act (ADA);
- Every year, there is 62 hours of congestion per person in the county; and
- Transportation costs for households are around \$14,943 per year.

Having high quality transit areas and stops is critical to expanding access to transportation for all residents in the community. Maps B.48 and B.49 show the location of high-quality transit areas in Santa Clara County and the Bay Area. Communities within a half mile from high quality transit areas are concentrated in San Francisco, San Mateo City, Redwood City, and Oakland—the large number of quality transit areas in these cities is likely related to their population size and densely built housing units.

¹⁸ <https://livabilityindex.aarp.org/search/Santa%20Clara%20County,%20California,%20United%20States>.

For Santa Clara County, high quality transit areas are concentrated in Palo Alto, Milpitas, Fremont, Santa Clara, Campbell, and Saratoga. Los Gatos has very few high quality transit areas for residents.

Transportation Cost and Equitable Access in Santa Clara County and Regionally.

The Low Transportation Cost Index and Transit Trips Index are used to measure access to transportation within a location. The Low Transportation Cost Index measures access to low-cost transportation services, and the Transit Trips Index measures how often residents take transit trips. The index scores range from 0-100. A higher score correlates to greater transportation access.

Data reflecting relatively high access to public transit in the County may be somewhat misleading due to the range of different types of communities, including rural areas, which the indices consider in drawing comparisons. Stakeholders repeatedly emphasized the limitations of existing public transportation, and a review of services maps and schedules reveals significant gaps.

The Transportation subsection of Disparities in Access to Opportunity analyzes access to public transportation and transportation cost, disaggregated by race/ethnicity. There are two opportunity indices that measure access to transportation: the Transit Index and the Low Transportation Cost Index. The Transit Index is a HUD calculation that estimates transit trips for a family of three, with a single parent, with an income of 50% of the median

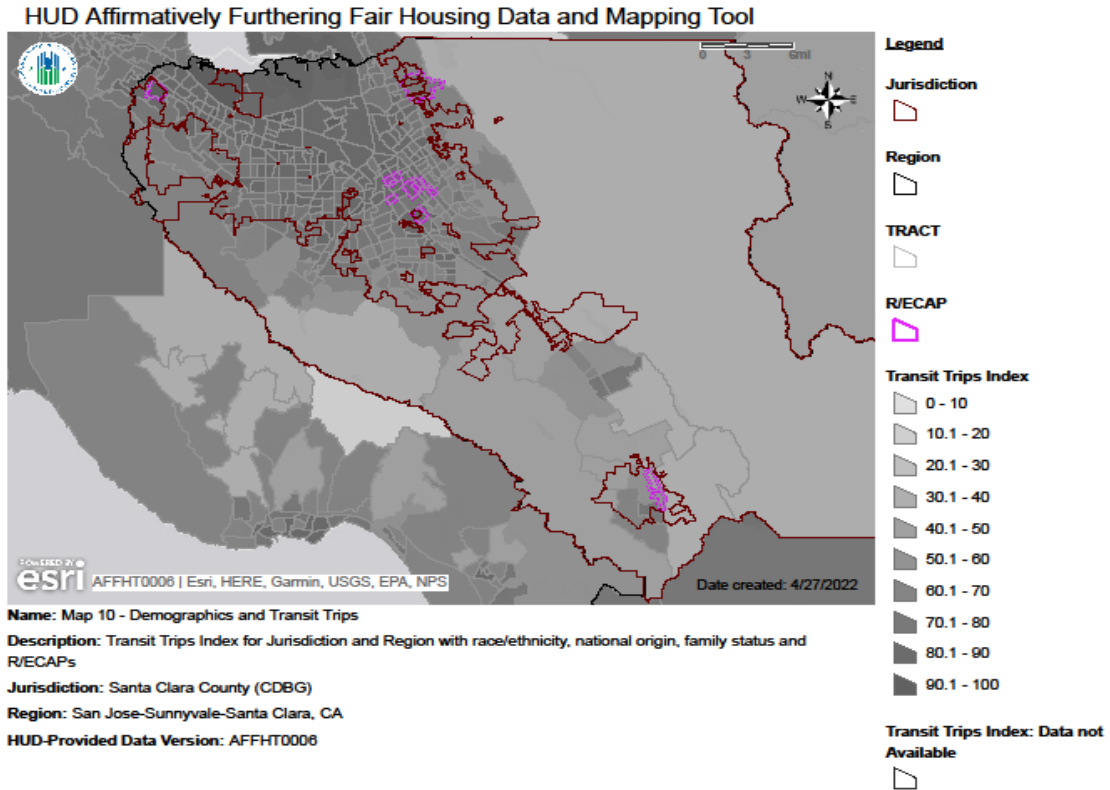

income for renters in the region. The higher the number, the more likely residents in that neighborhood utilize public transit. The Low Transportation Cost Index is a HUD calculation that estimates transportation costs for a family of three, with a single parent, with an income at 50% of the median income for renters in the region. The higher the number, the better (i.e., the lower the cost of transportation in the neighborhood). There are not significant differences across racial/ethnic groups in the County in the Transit Index and the Low Transportation Cost Index.

Table B.13: Transportation Indices, Santa Clara Urban County

Race or Ethnicity	Transit Index	Low Transportation Cost Index
White, Non-Latinx	59.30	82.15
Black, Non-Latinx	63.36	87.12
Latinx	59.20	82.89
Asian or Pacific Islander, Non-Latinx	61.22	82.48
Native American, Non-Latinx	58.38	83.70

Transportation Equity and Housing. In much of the County, Transit Index scores are low. As you near the most populous parts of northern Santa Clara County, scores increase dramatically. The County is fairly diverse, although affluent white and Asian American or Pacific Islander residents tend to be concentrated in the western, more suburban part of the County. Families with children are also concentrated in that area. Additionally, in terms of national origin, foreign-born residents from countries like Canada are much more likely to live in the outer cities of Saratoga, Los Gatos, and Monte Sereno, while foreign-born residents from Mexico are more likely to be concentrated in unincorporated areas on the east side of San José as well as in Morgan Hill.

Map B.49: Transit Trips, Santa Clara County

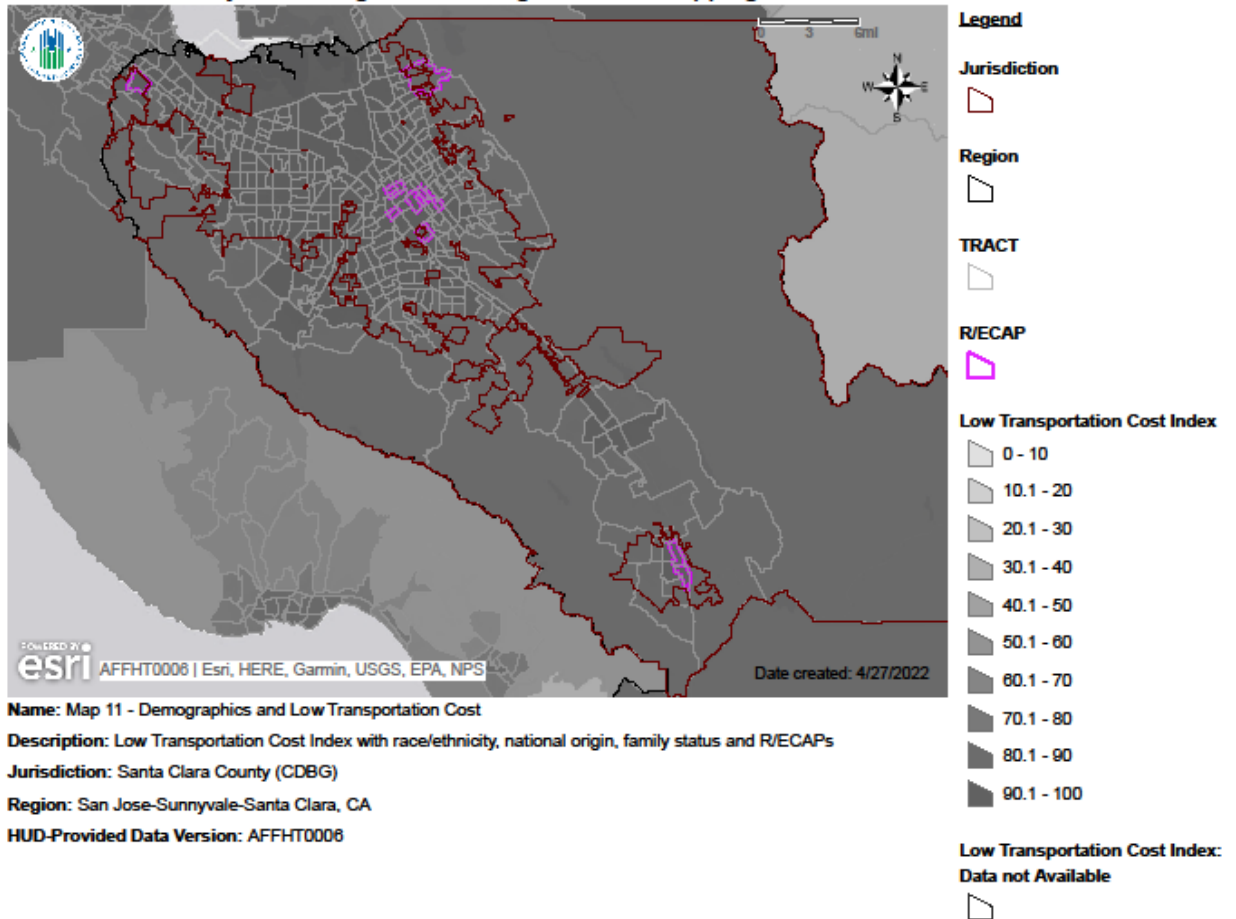

The regional map indicates that communities in the northern part of San Benito County have better access to public transportation than the southern remainder of that county (with much less population density), which has middling results. Families with children and immigrants tend to cluster in these areas with strong public transportation use. Within the region, Santa Clara County generally affords greater access to transportation than San Benito County.

Map B.50: Transit Trips, Region

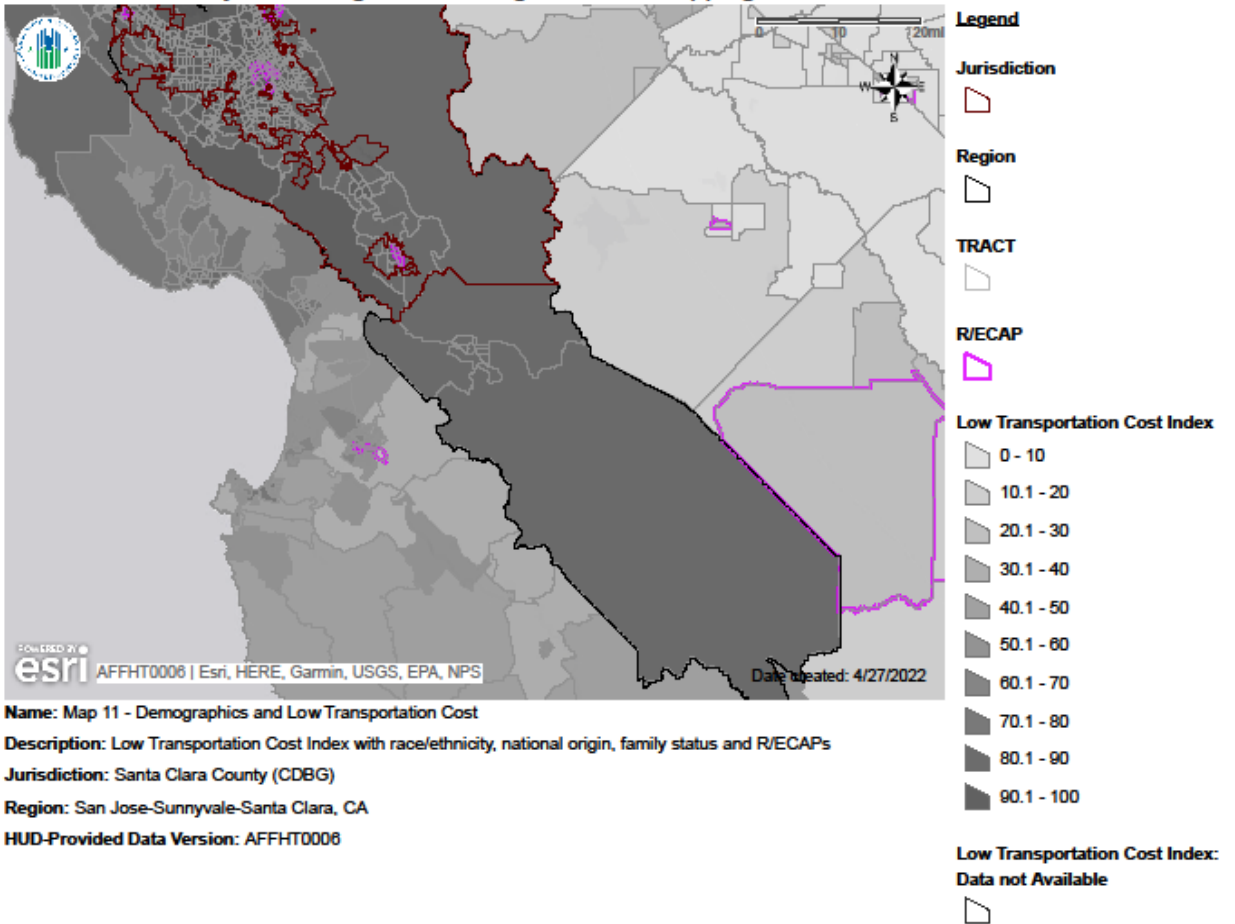

Map B.51: Low Transportation Cost, Santa Clara County
HUD Affirmatively Furthering Fair Housing Data and Mapping Tool

Much of the County has very high Low Transportation Cost Index scores, meaning that estimated transportation costs are very low. The general trend shows an increase in this index score as you move toward the suburbs in either direction, away from central San José.

Map B.52: Low Transportation Cost, Region

HUD Affirmatively Furthering Fair Housing Data and Mapping Tool

Like the other jurisdictions in this analysis, areas that have high public transportation use in the Transit Trips Index map seem to have lower Low Transportation Cost Index scores. In other words, data from the indices suggests that low-income people who live in areas where low-income people frequently use public transit have higher transportation costs than low-income people who live in areas where low-income people do not frequently use transit. This may be a result of high transit fares, low costs of car commuting in areas without transit (possibly as a result of free or relatively low-cost parking in those areas). It is possible that gas price increases that post-date the data reflected in these indices would cancel out the apparent increased affordability of transportation in places without transit. Another possible explanation for this circumstance is that public transit in relatively transit-rich parts of Santa Clara County still is not as robust as in San Francisco or Oakland, thus requiring many low-income households to both incur expenses on transit fares and to absorb the costs of car ownership.

Transportation and employment. Access to transportation is crucial to ensuring all residents have equal access to economic development and employment opportunities. Limited access to transportation options that are affordable and accessible can present a range of employment and economic development barriers, especially when households are forced to purchase (or lease) a vehicle they cannot otherwise afford because public transportation costs are too high and/or transit stations are located in inconvenient areas.

Table B.14 presents commuting patterns in Santa Clara County by protected class and other socioeconomic characteristics. As illustrated below, workers in Santa Clara County are more likely to drive alone to work than carpool (9%) or use public transportation (3%). Commuting patterns vary by household income: households with incomes below \$25,000 and households with incomes above \$75,000 were more likely to travel to work by public transit than households in middle income groups. For low-income households, only 18% commute to work by car which is likely related to the high cost of owning (or leasing) a car as well as high gas prices. Importantly, however, only 24% use public transportation. Lower usage of public transportation could indicate geographic disparities in accessing transportation options and/or high public transportation costs (see Maps D.12 and D.13 below).

Table B.14: Commute Patterns by Protected Class, Santa Clara County, 2021

Protected Class / Characteristic	Drove Alone	Carpooled	Public Transportation
Workers 16 years and over	653,861 or 67%	91,433 or 9%	33,409 or 3%
Male	57%	51%	59%
Female	43%	50%	41%
Non-Hispanic White	31%	19%	26%
Black or African American	3%	2%	4%
Asian	38%	42%	42%
Hispanic or Latino	25%	33%	24%
Native	52%	43%	48%
Foreign born	48%	57%	53%
Income < \$25,000	18%	26%	24%
Income \$25,000 - \$50,000	21%	24%	15%
Income \$50,000 - \$75,000	15%	14%	12%
Income > \$75,000	47%	36%	50%
Workers in poverty	5%	8%	10%

Note: Some percentages may not equal 100%, other modes of transportation were excluded from these ACS data.

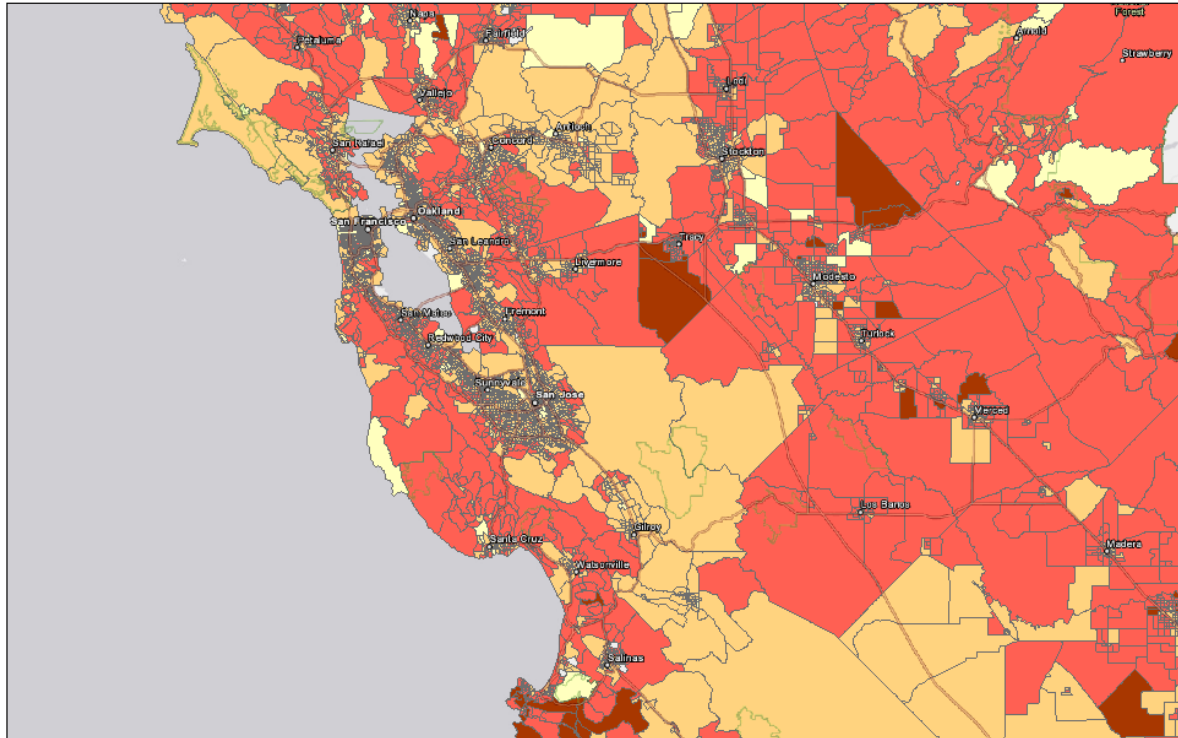

Source: 2021 5-year ACS.

Maps B.53 and B.54 show the housing and transportation index for Santa Clara County and the Bay Area in 2022. The transportation index shows the percentage of household income being spent on housing and transportation costs and serves as an additional indicator for cost burdened households and displacement risk.

As shown below, households located in Los Gatos, Saratoga, Sunnyvale, Campbell, and Morgan Hill are spending between 50% and 75% of their income on their housing and transportation. Despite being a lower income community, households in San José are spending less on their housing and transportation costs though this could be related to the city’s comparatively lower housing prices and wide variety of transportation options.

These findings differ from the region overall. Households across the Region are spending between 50% and 75% of their income on housing and transportation, particularly in San

Given the large number of residents who drive to work alone via car, truck, or van, it is essential that workers in Santa Clara County have equal access to jobs by car ride. Similar to the above analysis, Maps B.57 and B.58 show the number of jobs within a 45-minute drive for Santa Clara County and the Region in 2018. 57

Programs, Policies, or Funding Mechanisms Impacting Transportation Access.

There are several public transportation options connecting Santa Clara County and beyond, although each has its drawbacks. Caltrain, a commuter rail service, runs through Santa Clara County and up to San Francisco, where it connects with BART (San Francisco’s light rail system). County residents may connect directly to BART through stations in Milpitas and north San José. Additional BART stations are planned in the County. Within Santa Clara County, the Valley Transportation Authority (VTA) provides light rail and bus service. The Altamont Corridor Express (ACE) Commuter Services connects San José and the surrounding area to points north and east of Santa Clara County by commuter rail.

Public transportation in the County has significant gaps that render existing systems, including Valley Transportation Authority and Caltrain, less usable to low-income residents, who are disproportionately members of protected classes. Bus service can be quite limited in many areas in the county, especially outside of the population center of San José. Where service does exist, 30-minute gaps between buses and wait times are common. The problems of traffic and congestion compounds this problem, though commuting times have shortened during the pandemic with remote work. Prior to the

pandemic, travel between South County and San José was nearly two hours without accounting for unexpected traffic. While Caltrain is faster than bus travel, it can be too unaffordable for low-income individuals, especially if it is a regular commuting need. VTA's light rail system is limited, as it does not travel past Mountain View, does not connect to Cupertino, and does not connect to South County.

Santa Clara County has taken steps to become more bike-friendly. Multiple cities have developed bicycle plans. Los Gatos, a town that is part of the Urban County, is an example, having updated its Bicycle and Pedestrian Master Plan in late 2020.

Overall, while there are systems of public transportation in place which address some of these needs, there are still affordability gaps, wait times, traffic, and distance/expansion concerns that should be addressed as the County works toward equity in access to opportunity and transportation.

Disparities in Access to Opportunity – Access to Environmentally Healthy Neighborhoods. Past and present discriminatory housing policies and practices—including long-term disinvestment—have resulted in neighborhoods with concentrated poverty, limited access to opportunity, and unsafe environmental conditions (among others). This section provides a comprehensive analysis of equitable access to environmentally healthy neighborhoods by protected class groups and other socioeconomic characteristics. As defined by HCD, environmentally healthy neighborhoods encompasses several factors: healthy food options, clean air and water, safe neighborhoods, safety from environmental hazards, and access to social services and cultural institutions.

Santa Clara County received an environmental opportunity score of 47 out of 100. Environmental scores are measured by metrics and policies related to air and water quality, energy efficiency, and hazard mitigation plans. According to the Livability Index:¹⁹

- Zero percent (0%) of residents were exposed to drinking water violations;
- There are 11 unhealthy air quality days per year;
- More than a quarter (29%) of residents are exposed to near-roadway pollution but levels of local industrial pollution are low; and
- Santa Clara County has several multi-hazard plans approved by FEMA and local plans to prepare for an aging population.

In January 2017, the Office of Environmental Health Hazard Assessment (OEHHA) released Version 3.0 of the California Communities Health Screening Tool, known as the CalEnviroScreen. The CalEnviroScreen is a screening tool that evaluates the burden of pollution from multiple sources in communities while accounting for vulnerability to the adverse effects of pollution. Census tracts are ranked based on potential exposures to pollutants, adverse environmental conditions, socioeconomic factors, and the prevalence of health conditions. Lower scores suggest more positive environmental factors; higher scores indicate communities with more negative environmental factors.

¹⁹ <https://livabilityindex.aarp.org/search/Santa%20Clara%20County,%20California,%20United%20States>.

Maps B.62 and B.63 illustrate the CalEnviroScreen score for Santa Clara County and the Region. Findings presented in the maps are summarized below.

- Most areas in Santa Clara County have more positive environmental factors with scores between 0 and 20 and up to 40.
- San José, Watsonville, and Gilroy are outliers, all of which have more negative environmental factors and overlap with low income communities:
 - **San José:** three census tracts in the inner portion of the city have the worst environmental factors with scores above 80.
 - **Watsonville:** three census tracts have the most negative factors; other tracts have scores between 60 and 80.
 - **Gilroy:** one census tract with the worst environmental factors; all others range between 40 and 80.
- Similar to the county, more negative environmental factors are located in lower income communities across the Region including San Francisco, South San Francisco, Oakland, San Leandro
- Nearly all of Los Banos has more negative factors similar to communities near Stockton, Modesto, and Vallejo.

In line with Senate Bill 535 (SB 535), the screening tool also considers census tracts with disadvantaged communities. In 2012, SB 535 was passed to establish requirements for minimum funding levels to “Disadvantaged Communities” (DACs). The legislation also gave CalEPA the responsibility for identifying these communities based on geographic, socioeconomic, public health, and environmental hazard criteria.²⁰

Maps B.61 and B.62 show where disadvantaged communities are located across Santa Clara County and the Region. In Santa Clara County, there are very few identified DACs which are largely concentrated in San José and communities in Sunnyvale and Santa Clara. Disadvantaged communities in San José have the lowest household incomes in the county. Disadvantaged communities in the region overall are concentrated in Oakland, San Leandro, and parts of San Francisco.

Equitable Access to Environmentally Healthy Neighborhoods in Santa Clara County and Regionally. The Environmental Health Index values in this section consider respiratory and neurological health risks in relation to the rest of the country. A lower index score indicates lower access to environmentally healthy neighborhoods.

Table B.15: Environmental Health Index, Santa Clara Urban County

Total Population	Environmental Health Index
White, Non-Latinx	48.24
Black, Non-Latinx	37.87
Latinx	42.54
Asian or Pacific Islander, Non-Latinx	49.50
Native American, Non-Latinx	44.90

In the county, Black, Latinx, and Native American residents face slightly less access to environmentally healthy neighborhoods than do white or Asian residents. However, the disparity is most significant for Black residents.

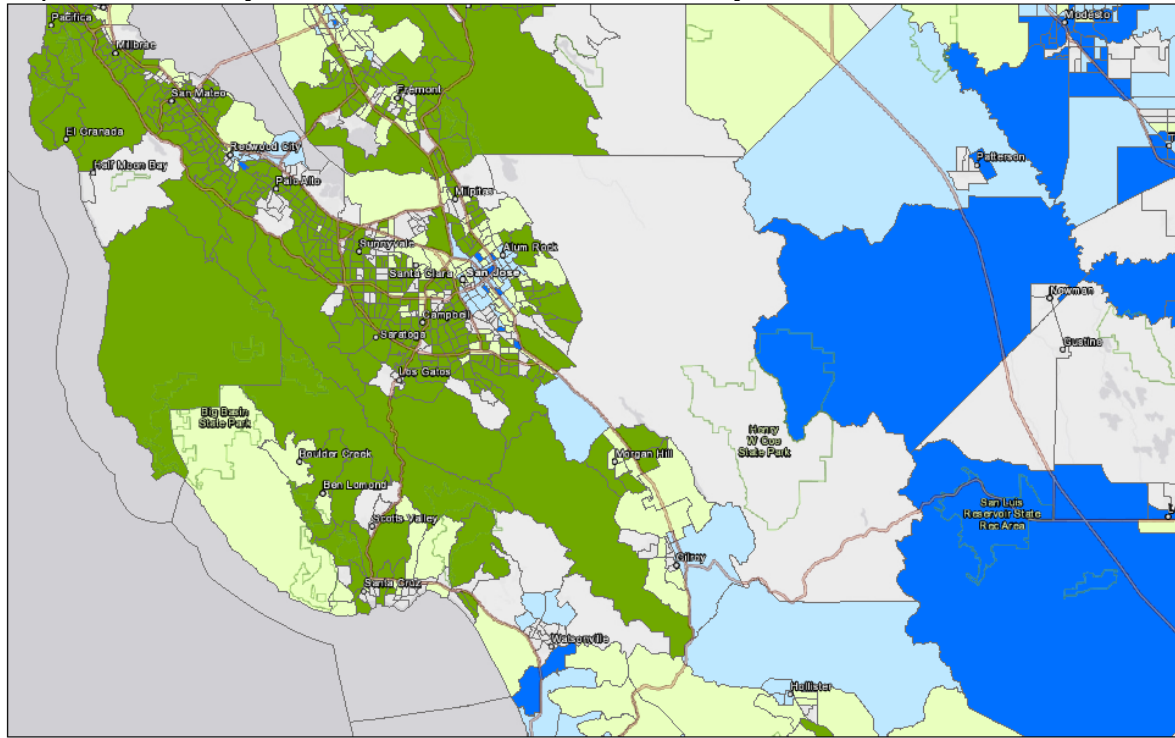

As part of the Public Health Alliance of Southern California project, the Healthy Places Index (HPI)—a policy platform to advance health equity through open and accessible data—maps data on the social conditions that drive health including education and job opportunities, clean air and water, and other indicators positively associated with life expectancy at birth.²¹ The HPI organizes 23 social determinants of health in nearly 8,000 California census tracts (approximating neighborhoods) into eight domains or policy action areas: economic, education, social, housing, transportation, neighborhood built-environment, air and drinking water quality, and health care access. Scores are ranked from the least- to most-healthy community conditions—in other words, lower scores represent less health conditions; higher scores represent more health community conditions.

The HPI for Santa Clara County and the Region are presented in Maps D.22 and D.23 below. Primary findings from the HPI county and regional analysis are summarized below.

- The majority of Santa Clara County and unincorporated communities have healthy community conditions with the exception of census tracts in San José. There are a few census tracts in the city with the lowest index score while others were scored between 25 and 50. Watsonville, Gilroy, and Salinas also have comparatively lower healthy conditions.
- Tracts with the least healthy community conditions overlap with concentrations of low-income households. This suggests that not all economic segments of the community have equitable access to environmentally healthy neighborhoods.
- These trends are similar to the Region overall: places with low HPIs overlap with concentrations of low-income households. This is most prominent in communities around San Francisco, Oakland, San Leandro, and Redwood City.

In 2022, the AARP Public Policy Institute released its Livability Index for neighborhoods and communities in the United States, including Santa Clara County. The Livability Index uses over 50 national and state data sources and is based on 61 indicators to determine how a community supports its members in seven critical categories: housing, neighborhood, transportation, environment, health, engagement, and opportunity. Higher scores suggest equitable living environments; lower scores indicate more negative living environments. Santa Clara County scored 81 out of 100 for AARP’s health category. Health scores are measured by metrics and policies that promote health behaviors. In Santa Clara County:

- 99% of households in the county had access to exercise opportunities;
- There were 2.2 grocery stores and farmer’s markets and 2.7 parks within a half mile of communities;
- No areas in Santa Clara County experience health care professional shortages; and
- Only 10% of adults smoke regularly.

Lead exposure in children. There is no safe level of lead exposure in children. Research has demonstrated the effect lead exposure has on children’s educational attainment, cognitive function, and behavioral and emotional regulation at concentrations below the

current reference level (5µg/dL). However, California’s Blood Lead Levels (BLL) testing and reporting program show elevated levels of BLL among young children in a number of zip codes across the County of Santa Clara. In fact, at least 2,000 children under the age of six in Santa Clara County have elevated BLL.²² According to the Office of Education for Santa Clara County, communities surrounding the Reid-Hillview Airport (which uses leaded aviation gasoline) is of particular concentration due to the number of children, childcare providers, and schools in close proximity to the airport.²³ In other words, children living in communities with increased risk of lead exposure are more likely to experience attention and executive function challenges, poor academic performance, and emotional problems (among others).

Housing Patterns and Equitable Access to Healthy Neighborhoods. The Unincorporated County, which is less intensively developed than the County’s larger cities, tends to have higher Environmental Health Index values than the broader County and region.

Food deserts are one measure of environmental health in a region. Map B.69 shows food deserts in green. Food deserts in Santa Clara County are primarily located in San José and Gilroy. Food deserts are defined as low-income census tracts where a significant portion of the population resides more than one mile from a supermarket.

Map B.66: Food Deserts, Santa Clara County

Source: <https://www.ers.usda.gov/data-products/food-access-research-atlas/go-to-the-atlas/>

High and Low Access areas across indicators. Job proximity and transit access are greatest in the northern part of Santa Clara County though access is lower in the West Valley than it is in the cities of Santa Clara, Sunnyvale, Mountain View, and Palo Alto. Access to proficient school and low poverty neighborhoods is highest in the West Valley as well as in the parts of larger North County cities that are further south and west of U.S. Route 101. South County generally has higher access to environmentally healthy neighborhoods.

Contributing Factors of Disparities in Access to Opportunity

Please see section X.5, Contributing Factors Appendix, for further discussion of the following Contributing Factors to Disparities in Access to Opportunity. Please see section X.4 for more details on the proposed goals and actions to address these contributing factors.

- Access to financial services
- Availability, type, frequency, and reliability of public transportation
- Impediments to mobility
- Lack of access to opportunity due to high housing costs
- Lack of private investments in specific neighborhoods
- Lack of public investments in specific neighborhoods, including services or amenities
- Lack of local or regional cooperation
- Land use and zoning laws
- Lending discrimination
- Location and type of affordable housing
- Location of employers
- Location of environmental health hazards
- Location of proficient schools and school assignment policies
- Loss of affordable housing
- Occupancy codes and restrictions
- Private discrimination
- Source of income discrimination

iv: Disproportionate Housing Needs

This section discusses disproportionate housing needs for protected classes including cost burden and severe cost burden, overcrowding, substandard housing conditions, homelessness, displacement, and other considerations.

Disproportionate Housing Needs

“**Disproportionate housing needs** generally refers to a condition in which there are significant disparities in the proportion of members of a protected class experiencing a category of housing need when compared to the proportion of members of any other relevant groups, or the total population experiencing that category of housing need in the applicable geographic area. For purposes of this definition, categories of housing need are based on such factors as cost burden and severe cost burden, overcrowding, homelessness, and substandard housing conditions.”

Source: California Department of Housing and Community Development Guidance, 2021, page 39.

Housing stock: Age and Condition. The age of housing units is an important indicator in determining the condition of housing in Santa Clara County and its unincorporated areas. Older housing stocks tend to place residents at greater risk of living in housing with lead-based paint and/or without accessibility improvements (e.g., grab bars in the shower, stepless entry). Lead based paint is a significant risk for residents in units built before 1978 when it was banned for residential use. The condition of housing units also plays a role in quality of life, outcomes, and stable housing environments. Maps E.1 and E.2 show the percentage of total housing units built before 1960 for Santa Clara County and the Region. Primary findings illustrated in the maps are summarized below.

- Housing units in Santa Clara County are older with notable concentrations of units built before 1960 in San José, Alum Rock, Campbell, and a few census tracts in Los Gatos; all of which show 80% of units or more built during this time.
- Compared to the region overall, the county’s housing stock is younger. Areas with the largest number of old housing units in the Region are San Francisco, Oakland, San Leandro, City of San Mateo, and Redwood City. San Francisco likely has a larger supply of older units given the city’s large population and densely built housing.

In Santa Clara County, lower income households are more likely to live in older housing units. As shown in Map B.69, low-income census tracts in San José (less than \$55,000) are concentrated in areas with older housing: in these areas, over 80% of total units were built before 1960. This is a significant finding as it suggests that residents of Santa Clara County have limited housing options and are more likely to face barriers accessing newer housing that meets their needs. Residents living in poverty are also more likely to live in these areas (Map E.4).

Map B.69: Median Income by Census Tract, Santa Clara County, 2021

Source: California Department of Housing and Community Development AFFH Data Viewer.

Map B.70: Poverty Status by Census Tract, Santa Clara County, 2021

Source: California Department of Housing and Community Development AFFH Data Viewer.

These patterns are similar for disabled residents in the county: census tracts with larger supplies of units built before 1960 have higher concentrations of disabled residents at 10% to 20% of the total population (Map IV-5). San José has one census tract where 20% to 30% of the population has a disability and up to 40% of units were built before this time.

These findings are particularly important because older housing units are less likely to have accessibility improvements which limits housing choice for disabled persons in the county. According to research from the AARP Public Policy Institute, **48% of units in the county have zero step entrances but there are no local inclusionary design laws to make housing accessible to disabled residents.** As such, Santa Clara County will target existing and new resources to these areas to ensure residents have equal access to housing and opportunity. Please refer to Chapter 4 of the County Housing Element for details on the related programs being implemented during the 2023-2031 planning period.

Source: California Department of Housing and Community Development AFFH Data Viewer.

Mobile and manufactured homes are especially at risk of being in poor condition. To effectively address these housing units, Unincorporated County identified the location of mobile home parks and communities using HCD’s AFFH Data Viewer (version 2.0). Having identified these areas, the county and unincorporated jurisdictions will be able to allocate existing and new resources to meet the housing needs of residents living in mobile/manufactured homes.

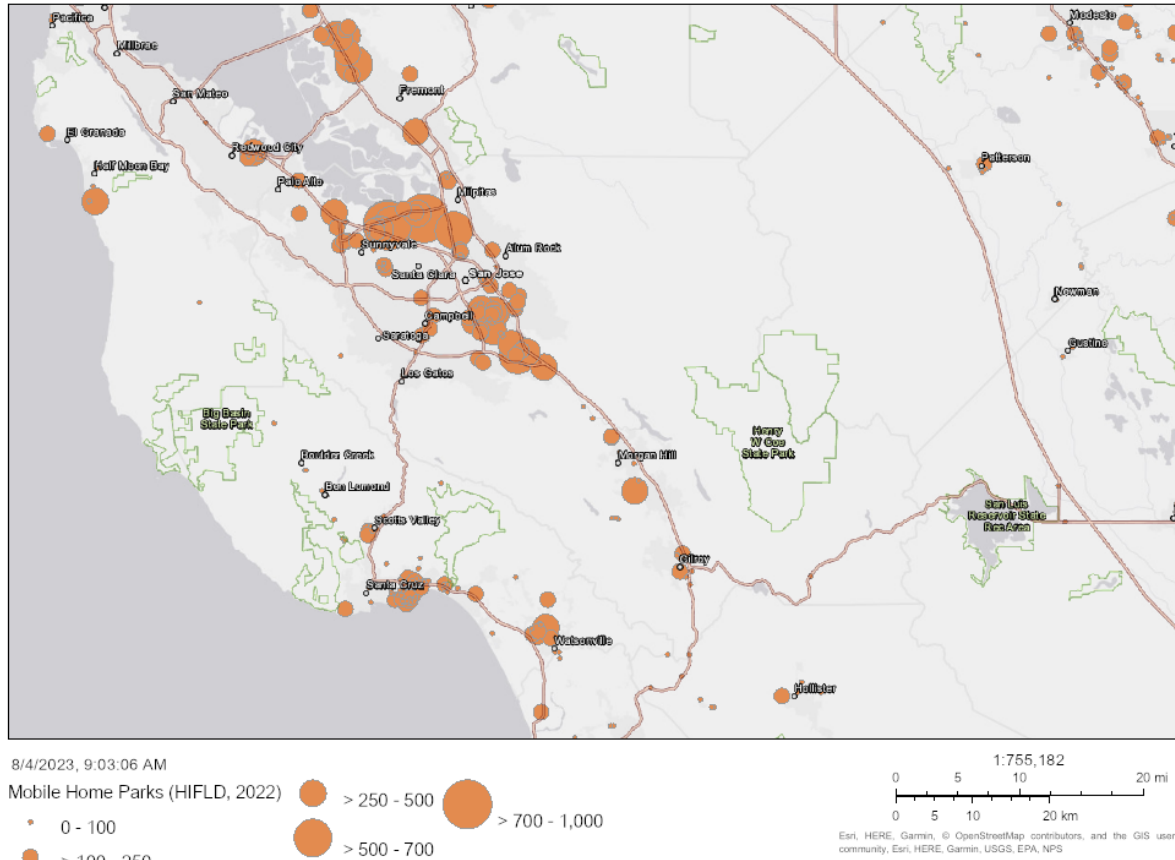

Primary findings illustrated in Map B.75 (below) include:

- Mobile home parks are concentrated near Sunnyvale, San José, and along the city boundaries of Campbell and Saratoga. Between 700 to 1,000 mobile home communities are located in Sunnyvale’s census tracts and up to 700 parks are located in San José.
- For the region overall, mobile home parks are concentrated in Santa Cruz, Watsonville, Half Moon Bay, Palo Alto, Redwood City, and communities near Fremont.

Given these concentrations, Santa Clara County and unincorporated areas will target funding and other resources to these areas to meet the repair and maintenance needs of residents. This is especially important for the county and region as mobile/manufactured

homes are often affordable alternatives for lower income households to transition to homeownership.

Map B.72: Mobile Home Parks, Santa Clara County and Region, 2022

Source: California Department of Housing and Community Development AFFH Data Viewer.

Across Santa Clara County, residents face high rates of housing problems, severe housing problems, and severe cost burden. The four HUD-designated housing problems are “1) housing unit lacks complete kitchen facilities; 2) housing unit lacks complete plumbing facilities; 3) household is overcrowded; and 4) household is cost burdened”²⁴. Households are considered to have a housing problem if they experience at least one of the above. This analysis also considers what HUD designates as severe housing problems, which are a lack of kitchen or plumbing, more than one person per room, or cost burden greater than 50%. The two latter factors, overcrowding and cost burden, are particularly high in Santa Clara County, and they are slightly higher than rates for the region. Black and Latinx residents are particularly affected by these problems.

Substandard housing. Substandard housing conditions present significant housing barriers for residents across Santa Clara County and the Region. Maps B.76 and B.77 illustrate the percentage of units lacking complete kitchen facilities in the county and

²⁴ https://www.huduser.gov/portal/datasets/cp/CHAS/bg_chas.html

Region for 2021. As shown below, Unincorporated County has a small supply of units without complete kitchen facilities though there are notable concentrations located in Sunnyvale, San José, and Los Gatos.

These patterns are consistent with the Region which has an overall lower share of substandard units. Areas with the largest share include San Francisco, Fremont, Redwood City, and Santa Cruz.

Maps B.75 and B.76 show the percentage of units lacking complete plumbing facilities in Santa Clara County and the region. The unincorporated county has a very small number of units lacking plumbing: only two census tracts show five to ten percent of units as lacking plumbing, all other tracts have less than five percent of units lacking plumbing. This is consistent with the region overall. Santa Cruz is an outlier with more than 20% of units without plumbing, which could be related to the large number of mobile home parks located in the area (see Map B.72 above).

Region. Residents in the region experience extreme housing needs. Significant racial discrepancies exist in housing problems, severe housing problems, and cost burden across the region. Overall, Black or Latinx residents are more likely to have housing problems, with 49.86% and 58.84% of those populations experiencing them. These rates for white and Asian and Pacific Islander residents, at 26.67% and 36.40%, respectively, are lower. Slightly over a third of all residents in the region experience any of the four housing problems. Households with over five people or non-family households are likely to experience higher rates of housing problems.

The percentages of residents facing severe housing problems is slightly lower, though this number is still very high for Latinx residents at 39.25%. Just under one-fifth of residents in the region experience at least one severe housing problem. Fewer residents across all racial/ethnic groups, household types and sizes experience severe housing cost burden. While households with housing problems are present in San Benito County, there is a clear concentration of households with housing problems in San José, Mountain View, and Palo Alto.

The Santa Clara Urban County has clear disparities in households experiencing housing problems, which closely follow patterns already clear in the regional analysis. While 46.12% of households as a whole experience at least one housing problem, 62.60% of Black households and 64.06% of Latinx households experience at least one housing problem. Lower percentages of households experience severe housing problems than regular housing problems, and this is consistent across both the Urban County and the region.

Table B.15: Demographics of Households Reporting HUD Defined Housing Problems, Santa Clara Urban County & Region

Totals	17,455	8,127

Both renters and homeowners in Unincorporated County are likely to be cost burdened. However, renters are significantly more likely to have lower incomes, and it is no surprise that low-income households are far more likely to spend more than fifty percent of their income towards their housing costs.

Table B.20: Percentage of Overcrowded Households by Race or Ethnicity, Region

Race/Ethnicity	% Overcrowded
White, Non-Latinx	1.81%
Black	6.14%
Native American	11.59%
Asian American/Pacific Islander	9.15%
Latinx	19.65%

Source: 2013-2017 American Community Survey

Overcrowding is a significant issue in many communities within the region. Overcrowding, which typically exceeds 2.0%, is low for white households compared to other races and ethnicities. In the region, all other ethnicities and races had at least three times as many households experiencing overcrowding when compared to white households. Latin households in the region had the highest rate of overcrowding at 19.65%.

Map B.77: Overpayment by Renters in Santa Clara County

Within the unincorporated county, overpayment – sometimes referred to as cost burden – appears to be more prevalent in the unincorporated urban islands surrounded by and/or adjacent to San Jose. In particular, Alum Rock, which is predominantly Hispanic or Latino, appears to have a high rate of overpayment. The unincorporated county’s rural areas, which are disproportionately non-Hispanic white, have relatively low rates of overpayment. Rates of overpayment in Stanford, which is plurality non-Hispanic white but has a significant Asian and Pacific Islander minority, and San Martin, which is predominantly Hispanic or Latino, are more moderate. Regionally, overpayment most pronounced in south and east San Jose as well as in Gilroy. These areas tend to be

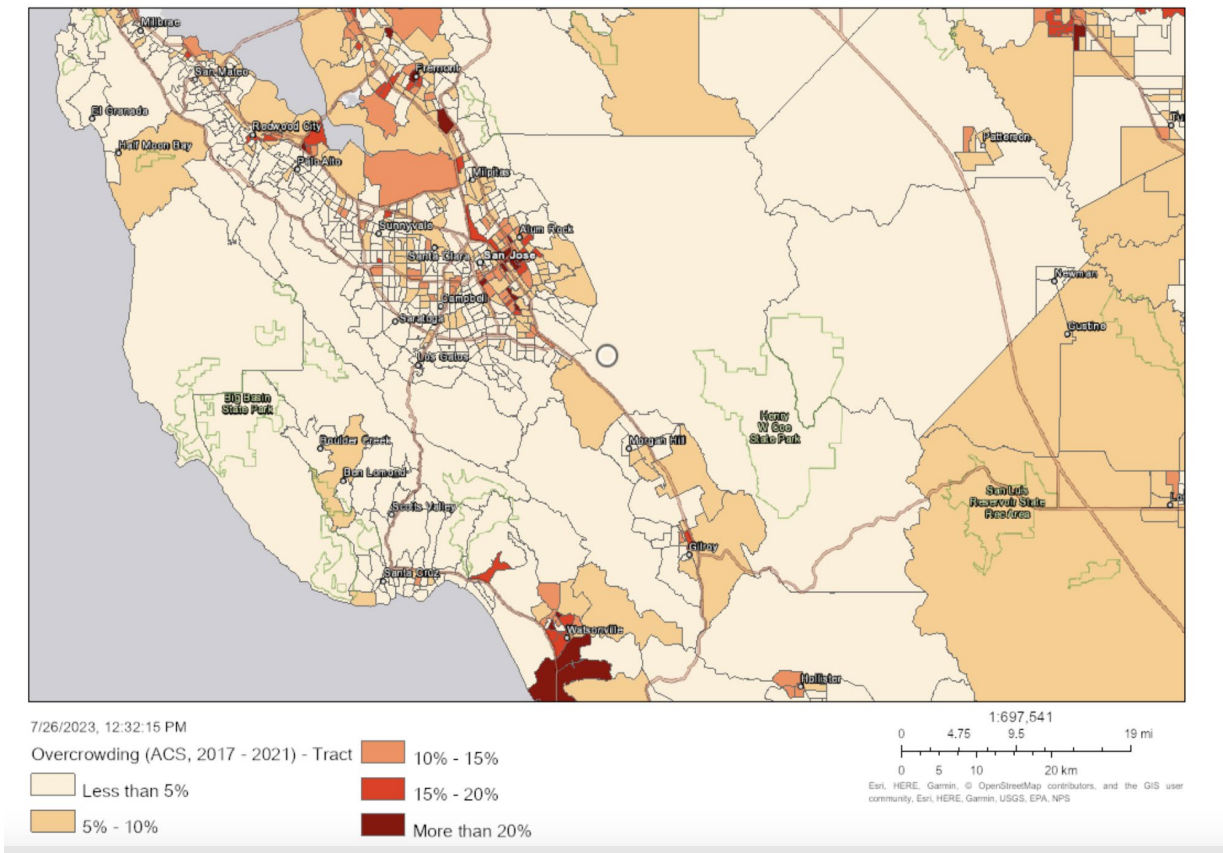

disproportionately Hispanic or Latino, with some heavily Vietnamese-American areas included, as well.

Map B.78: Overpayment by Owners in Santa Clara County

Patterns of overcrowding in the unincorporated county and the broader region largely mirror patterns of overpayment with the caveat that overcrowding is subject to fewer extremes than overpayment. The same disproportionately Hispanic or Latino areas have more overcrowding, but the degree to which that is true is less extreme than with respect to overpayment.

Map B.79: Overcrowding by Census Tract, Santa Clara County, 2021

Source: California Department of Housing and Community Development AFFH Data Viewer.

Map B.80: Overcrowding by Census Tract, Region, 2021

Source: California Department of Housing and Community Development AFFH Data Viewer.

Overcrowding. Maps B.79 and B.80 show the number of overcrowded households in Santa Clara County and the Region. Overcrowded households in Santa Clara County are concentrated in San José and Alum Rock: overcrowded households in these areas account for more than 20% of all households. Sunnyvale has two census tracts with comparatively higher rates of overcrowding at up to 20%. These patterns are consistent with the region overall. Jurisdictions with the largest share of overcrowded households include Oakland, San Leandro, Fremont, Redwood City, Watsonville, and Salinas.

Census tracts with higher rates of overcrowding in San José overlap with segregation patterns in the city: tracts with higher shares of overcrowded households also have higher populations of single mothers and low-income households. These findings suggest that female householders are not only of lower income but have had to double up with family/friends to avoid being cost burdened and or being displaced.

Map B.81: Children in Female Householder Households No Spouse by Census Tract, Santa Clara County, 20213

Relatedly, maps B.82 and B.83 show the number of severely overcrowded households in the county and region. As shown below, jurisdictions with concentrations of overcrowded households also have larger shares of severely overcrowded households. These patterns are most prominent in San José. However, it is important to note that Campbell has one census tract where 15% to 20% of households are severely overcrowded but no tracts have a large number of overcrowded households. These trends are similar to that of the region with concentrations located in San Francisco, Oakland, San Rafael, and Watsonville.

Santa Clara County/Region. Housing problems are mostly concentrated in a few areas of the cities in the county. These include significant areas in the North Whisman neighborhood of Mountain View and in Downtown San José, East San José, and Japantown. Overall, Latinx or Asian residents primarily reside or make up most of the areas that experience more housing problems.

Renter and owner-occupied housing by race/ethnicity in the jurisdiction and Region. Tenure in table B.21 refers to the arrangements under which the household occupies housing (i.e., either owned or rented). Across the region, white and Asian residents are primarily owners, whereas Black, Latinx and Pacific Islander residents are primarily renters. Similar patterns exist across most jurisdictions.

Table B.21: Housing Tenure by Race/Ethnicity, Santa Clara County and Region, 2013-2017 American Community Survey

Race/Ethnicity	Tenure	Santa Clara County, California	Region
White, Non-Latinx	Total:	265,262	273,703
	Owner	171,774	177,994
	Renter	93,488	95,709
Black	Total:	16,756	16,918
	Owner	5,383	5,477

	Owner	574	31
	Renter	1,347	26

Displacement Risk. High levels of displacement of low-income residents, who are disproportionately likely to be Black, Vietnamese, or Latinx or have disabilities, is occurring at a countywide level and in specific cities throughout Santa Clara County. Rising housing costs that have outpaced income growth among low-income workers have contributed to this trend. Although displacement has been significant, it has not taken the form of decreases in the absolute number of residents of a particular racial or ethnic group. Instead, there has been a relative decline in Latinx and Black population, with each group comprising a smaller proportion of an increasingly populous area. This relative decline does not necessarily mean that displacement has occurred, but there is substantial evidence that it has. Specifically, nearly all stakeholders consulted in the community engagement process discussed the problem of rampant displacement; newcomers of the same racial and ethnic groups moving to the area are likely partially offsetting what might otherwise appear to be group population decline; and the birth of children is likely doing so, as well. The tables below show, since 2010, for Santa Clara County and the seven participating jurisdictions, change in the percentage and absolute number of residents who are Latinx, Black, or Vietnamese.

Table B.22: Latinx Population in Santa Clara County and Selected Cities, 1990 to Present

Geography	1990	%	2010	%	2017	%
Santa Clara County	307,113	20.50%	479,210	26.90%	498,253	26.10%
Cupertino	1,937	4.80%	2,113	3.60%	2,347	3.90%
Gilroy	14,762	46.90%	28,214	57.80%	32,820	60.60%
Mountain View	10,645	15.80%	16,071	21.70%	14,586	18.20%
Palo Alto	2,906	5.20%	3,974	6.20%	4,865	7.30%
San José	204,012	26.10%	313,636	33.20%	330,827	32.30%
Santa Clara	13,589	14.50%	22,589	19.40%	21,371	17.10%
Sunnyvale	15,030	12.80%	26,517	18.90%	25,174	16.60%

The data shows that at the countywide level, as well as in four of the five cities with the highest concentrations of Latinx residents, the percentage of Latinx residents has fallen in recent years. Moreover, in Mountain View, Santa Clara, and Sunnyvale, the absolute number of Latinx residents has decreased. Gilroy, along with cities outside of Santa Clara County, including some as far away as the Central Valley, is a somewhat frequent destination of households who can no longer afford to live in the central and northern portions of Santa Clara County. In part because of their longer history of high housing prices, Cupertino and Palo Alto had fewer low-income Latinx residents who were vulnerable to displacement than did other cities. Latinx residents in those two cities also tend to have higher incomes than Latinx residents of other cities in the county. According to the 2013-2017 ACS, the median household income for Latinx households in Cupertino (\$94,167) is 36.3% higher than countywide (\$69,052). In Palo Alto, the median household income for Latinx households is 14.3% higher than countywide.

As additional context, it is important to view decreases, whether relative or absolute, in the Latinx population of communities within Santa Clara County in the context of national and statewide trends toward increasing Latinx population. Between the 2010 Census and

the 2013-2017 ACS, the Latinx population of California grew from 14,103,719 (37.6%) to 15,105,860 (38.8%). Rapidly increasing housing costs in places like Santa Clara County mean that that growth is occurring in places, like the Central Valley, that are comparatively isolated from well-paying jobs, healthy environmental conditions, and access to opportunity more broadly. Between 1990 and 2010, in contrast to the overall trend, Latinx population concentration actually decreased in Cupertino.

Table B.23: Change in Black Population in Santa Clara County and Selected Cities, 1990 to Present

Geography	1990	%	2010	%	2017	%
Santa Clara County	52,884	3.50%	42,331	2.40%	45,479	2.40%
Cupertino	399	1.00%	322	0.60%	295	0.50%
Gilroy	227	0.70%	709	1.50%	799	1.50%
Mountain View	3,246	4.80%	1,468	2.00%	1,319	1.60%
Palo Alto	1,612	2.90%	1,131	1.80%	808	1.20%
San José	34,858	4.50%	27,508	2.90%	29,147	2.80%
Santa Clara	2,187	2.30%	2,929	2.50%	4,242	3.40%
Sunnyvale	3,655	3.10%	2,533	1.80%	2,403	1.60%

The Black population in Santa Clara County has historically been much lower than in other parts of the Bay Area. That is partially the product of a legacy of intentional discrimination in the housing market. Although there have been some areas, particularly in the east side of San José, that have had relative concentrations of Black residents, these neighborhoods (approximately 10-12% Black as of the 1990 Census) did not have the degree of concentration present in Richmond’s Iron Triangle, West Oakland, or San Francisco’s Western Addition. Accordingly, the scale of displacement has been different from displacement of Santa Clara County’s historically larger Latinx population than it has been for Black households. Nonetheless, between 2010 and the 2013-2017 ACS, most of the participating cities saw decreases in Black population concentration, and four cities in the north of the county had decreases in the absolute number of Black residents. Displacement of Black residents was more pronounced between 1990 and 2010 with the largest decreases in Mountain View, Palo Alto, San José, and Sunnyvale.

Table B.24: Change in Vietnamese Population in Santa Clara County and Selected Cities, 1990 to Present

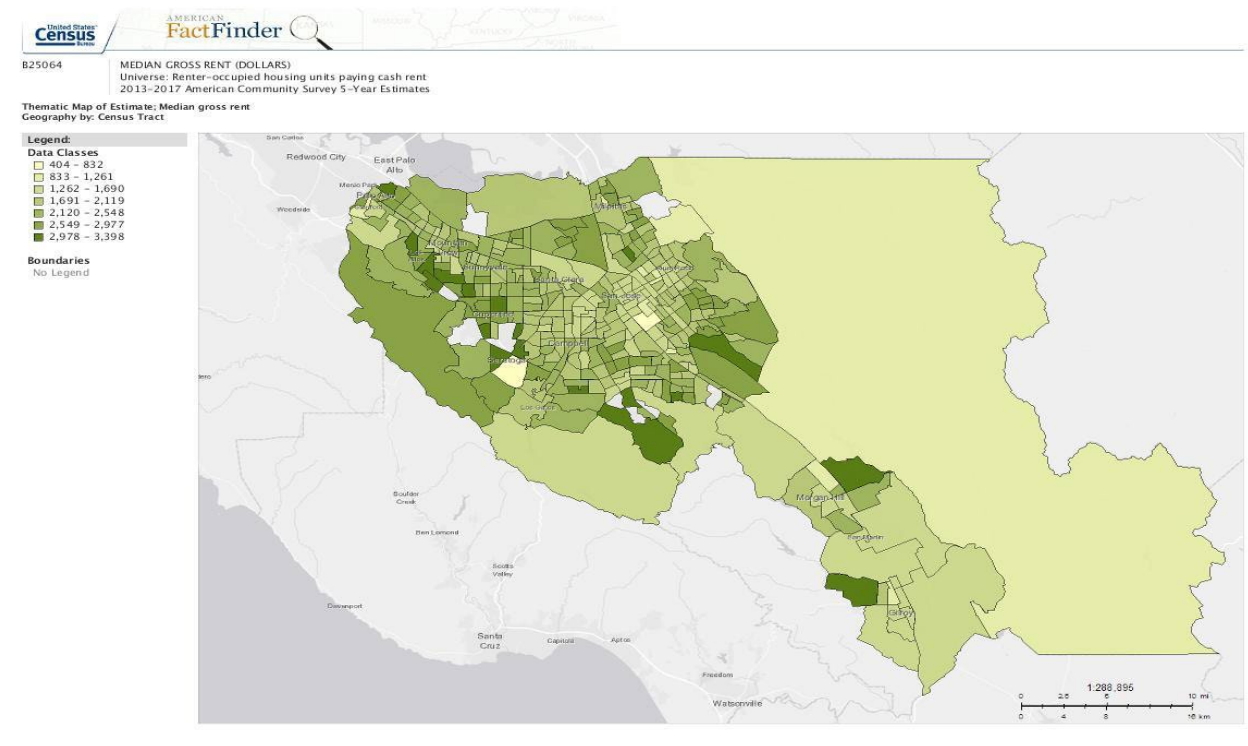

Geography	1990	%	2010	%	2017	%
Santa Clara County	54,739	3.70%	125,695	7.10%	134,546	7.00%
Cupertino	352	0.90%	745	1.30%	626	1.00%
Gilroy	61	0.20%	464	1.00%	293	0.50%
Mountain View	943	1.40%	694	0.90%	748	0.90%
Palo Alto	41	0.10%	401	0.60%	752	1.10%
San José	41,107	5.30%	100,486	10.60%	108,110	10.60%
Santa Clara	3,481	3.70%	4,498	3.90%	4,332	3.50%
Sunnyvale	2,716	2.30%	3,030	2.10%	2,626	1.70%

Data reflecting the Vietnamese population in Santa Clara County, which has the lowest income levels and therefore highest displacement risk among the four largest Asian ancestry groups in the county (Chinese, Indian, and Filipino in addition to Vietnamese), is more ambiguous but does point towards the likelihood of some hyper-localized displacement as well as the future risk of more widespread displacement. The proportion and absolute number of Vietnamese residents fell in four participating jurisdictions (Cupertino, Gilroy, Santa Clara, and Sunnyvale). These figures both increased in one jurisdiction (Palo Alto) and the number increased while the percentage was flat in two more (Mountain View and San José). This occurred while the Asian population more generally was increasing significantly with population gains concentrated in other groups. Between the 2010 Census and the 2013-2017 ACS, the Indian population of Santa Clara County grew from 6.6% to 8.8%, and the Chinese population grew from 8.6% to 9.6%.

Displacement of Vietnamese residents is most likely to be occurring in areas immediately to the north, east, and south of downtown San José. The farther a neighborhood in East San José is from downtown, the lower the displacement risk is at this point in time. Between 1990 and 2010, Vietnamese population increased countywide due largely to a significant increase in San José and more modest increases in other cities. Vietnamese population in Mountain View actually decreased during that period. The relationship of displacement to economic pressures in Santa Clara County and the participating cities is straightforward. There has been tremendous job growth in the county, including a large proportion of high-paying jobs in the technology sector. Housing production, whether for market-rate housing or affordable housing, has not kept pace, causing high-wage workers to bid up the cost of scarce housing. According to an analysis of 2017 ACS data by Silicon Valley@Home, only three jurisdictions in Santa Clara County – the affluent bedroom communities of Los Altos Hills, Monte Sereno, and Saratoga – have more housing units than they do jobs. Several jurisdictions – including Mountain View, Palo Alto, and Santa Clara – have more than twice as many jobs as they do housing units. At the same time, housing unit production has not been concentrated in the areas where housing-jobs imbalance has been most extreme. More development is occurring in San José, which has a more modest imbalance. Although the regional effects of housing production in San José on affordability may be positive, the localized effects in low-income communities of color have included dramatically increased housing costs.

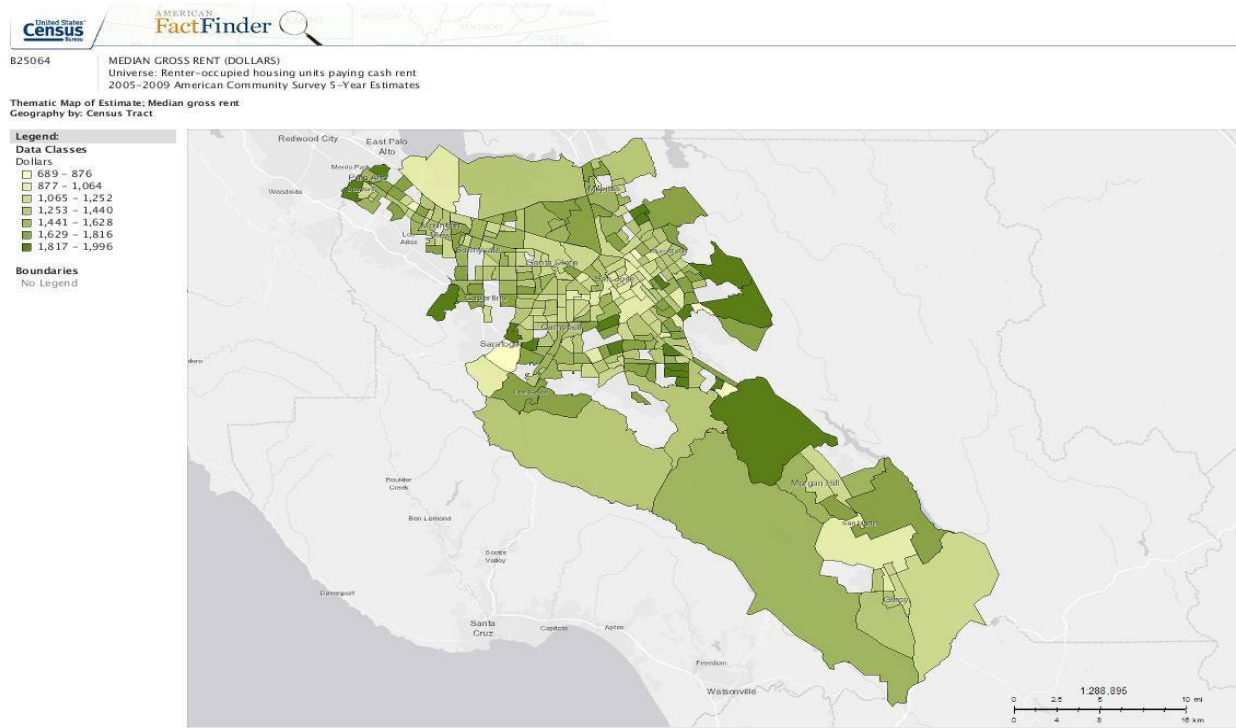

The two maps that follow illustrate the phenomenon of increased housing costs in downtown San José and East San José, in particular. The first map reflects 2013-2017 ACS data for median gross rents by census tract while the second shows 2005-2009 ACS data. In the first map, most census tracts in downtown San José and the east side of San José are in the third shaded band, reflecting median gross rents of \$1,262 to \$1,690.²⁵ In the second map, more census tracts fall in the second band, reflecting median gross rents of \$877 to \$1,065. This is a significant leap in an eight-year period that has no corollary with the income levels of east residents of these neighborhoods.

Map B.84: Median Gross Rent by Census Tract, Santa Clara County, 2013-2017 American Community Survey

²⁵ Note that these are lower than current market rents due to the time lag between the 2013-2017 ACS and the effect of rent control on rents paid by long-time tenants.

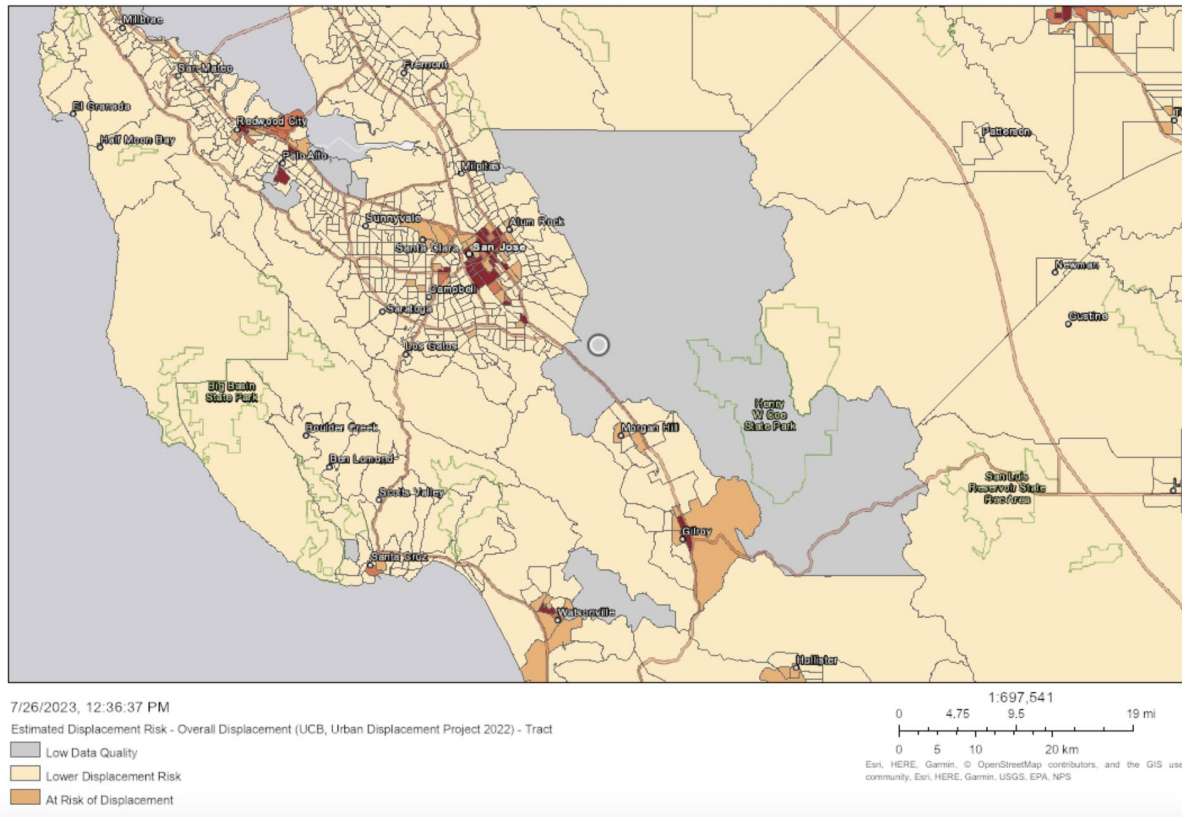

**Map B.85: Median Gross Rent by Census Tract, Santa Clara County, 2005-2009
American Community Survey**

The maps below are from the Urban Displacement Project, which is based at the University of California Berkeley. At a countywide scale, the map reflects displacement risk in urbanized census tracts. Census tracts that are low-income and therefore susceptible to displacement are filled in shades of purple while moderate to high income census tracts, in which there are comparatively few low-income households that could be displaced, are filled in shades of orange. Among low-income census tracts, the darker the shading is, the higher the risk of displacement. Among moderate- to high-income census tracts, with one exception, the darker the shading is, the less access low-income households have. The exceptions are the yellow-orange shading of census tracts where “advanced gentrification” is occurring. Unlike the other moderate- to high-income tracts, these are tracts that were formerly low-income but where displacement has been so severe that the socioeconomic composition of the neighborhood has flipped. In census tracts that are characterized by advanced gentrification, that are “at risk of exclusion,” or that are undergoing “ongoing exclusion,” displacement risk is still a valid concern despite the relatively low concentration of low-income households. If older publicly supported housing in those areas have expiring subsidies, or if rent-controlled units are taken off the rental market through Ellis Act conversions, rare pockets of affordability in high income areas can disappear, further segregating those areas.

Map B.86: Displacement Risk by Census Tract, Santa Clara County, 2021

AFFH - 2.0

At a countywide level, the maps above broadly mirror patterns of segregation discussed previously in this Assessment. That is because there is a strong correlation between race, ethnicity, and ancestry – particularly Latinx ethnicity and Vietnamese ancestry – and low-income status in Santa Clara County and across its cities. Therefore, jurisdictions like Cupertino, Los Altos, Los Altos Hills, Los Gatos, Monte Sereno, and Saratoga that have low Latinx and Vietnamese populations are characterized by moderate- to high-income levels and varying levels of exclusion. Campbell is subject to very different patterns, with a mix of areas of ongoing exclusion, ongoing gentrification and/or displacement, and low-income population without current displacement underway.

Palo Alto, likely due to its student population, has a mix of low-income and moderate- to high-income areas, but its low-income tracts have not lost low-income households. Many, though not all, full-time students are not as price sensitive as other households due to family support with living expenses or student loans and other university assistance. Outside of South County, Santa Clara County’s other cities –Mountain View, San José, Santa Clara, and Sunnyvale – all reflect more complex patterns. In the three cities to the west and northwest of San José (Mountain View, Santa Clara, and Sunnyvale), the southern portions of those cities are more likely to be moderate- to high-income and marked by patterns of exclusion. The central and northern portions of these cities are more likely to be characterized by advanced gentrification, ongoing gentrification and/or displacement, or risk of gentrification and/or displacement.

These patterns are fairly consistent in Mountain View and Sunnyvale, while patterns in Santa Clara are less regular with areas at risk of exclusion in the northern portion of that city and gentrification and low-income concentration most pronounced in the central portion of the city. Additionally, parts of southern Santa Clara are relatively low-income though these areas have generally lower displacement risk than neighborhoods to their north.

Given the complexity of patterns of displacement risk in the city of San José, a more granular, zoomed-in view, reflected in the map above, is necessary. Areas with advanced gentrification, ongoing gentrification and/or displacement, and risk of gentrification or displacement are concentrated in downtown San José and in the parts of the east side immediately to the east of downtown, as well as immediately to the north and west of downtown. Areas of exclusion tend to be located in newly built-up parts of north San José, parts of west San José, and the western and far southern portions of south San José. Southeastern San José tends to have relatively low-income levels but less immediate risk of displacement. It is clear that targeted strategies to mitigate displacement should focus on downtown San José and the areas most closely adjacent to it. This is at odds with at least one recent policy choice by the City of San José, exempting downtown residential developments from inclusionary requirements. Inclusionary housing, alongside other, complementary strategies, is a proven anti-displacement strategy and is especially necessary in neighborhoods where new, market-rate construction is most likely to cause displacement.

In South County, Morgan Hill has patterns of advanced gentrification, ongoing gentrification and/or displacement, and risk of gentrification and/or displacement on its predominantly Latinx west side and risk of exclusion or stable but moderate- or high-income population on its more heavily white and Asian or Pacific Islander east side. In Gilroy, the heavily Latinx central and eastern portions of the city are either at risk of gentrification and/or displacement or have ongoing gentrification and/or displacement. The more heavily white western and northwestern portions of the city feature advanced gentrification, low-income population without displacement, or moderate- to high-income population without displacement. These areas may be coded as low-income because of the use regional income levels as a benchmark. In the local context of Gilroy with more modest wages in its local job market, however, these areas are moderate to high income places.

Maps B.87 and B.88 show the displacement risk for households with incomes at or below 50% Area Median income (AMI) for Santa Clara County and the Region. As shown below, households with incomes at or below 50% AMI are most at risk for displacement in San José and parts of Campbell and Saratoga. County patterns are similar to that of the Bay Area. Households are most at risk of displacement in Oakland, San Leandro, Redwood City, and parts of San Francisco.

Extremely low-income households. Extremely low income (ELI) households (below 30% AMI) face significant housing barriers and have limited opportunity especially in areas with high housing prices such as Santa Clara County. According to HUD Income Limits, the income limit for a two-person ELI household in the county was \$39,800 in 2021—meaning households with incomes at or below \$39,800 were of extremely low income.²⁶

Santa Clara County has very few households with incomes at or below this limit. However, the county does have a large number of low-income households under 80% AMI—in 2021, the HUD Income Limit for a two-person household was \$94,200. Table B.25 shows the number of low-income households (less than \$94,200) by protected class and socioeconomic characteristics for 2021.

²⁶ <https://covid19.sccgov.org/sites/g/files/exjcpb766/files/Documents/santa-clara-county-2021-area-median-income-ami-chart.pdf>.

Table B.25: Median Household Income by Protected Class, Santa Clara County, 2021

Low Income Households by Characteristic	Median Household Income
Total Households	\$140,258
Santa Clara County < 80% AMI	\$94,200
Black or African American	\$85,669
American Indian or Alaska Native	\$83,151
Hispanic or Latino	\$91,199
Native Hawaiian or Pacific Islander	\$87,420
Other Race	\$84,854
Householder < 25 years	\$70,210
Householder 65+ years	\$78,813
Female Householder With Children	\$57,274
Female Householder Living Alone	\$53,409
Male Householder With Children	\$83,917
Male Householder Living Alone	\$86,689
Nonfamily Household	\$88,090

Source: 2021 1-year ACS and HUD Income Limits.

Households with these incomes are more likely to experience housing cost burden and experience severe affordability challenges, limiting their ability to transition to homeownership. This suggests that income inequality has had a negative impact on housing opportunity for extremely low-income households.

Despite having a small share of extremely low-income households, there are concentrations of extremely low-income communities in Santa Clara County. These households are more likely to live in San José, areas near Alum Rock, and communities in Palo Alto (Maps B.91 and B.92).

Homelessness. In 2017, Santa Clara County launched a survey to understand the housing and service needs of the county’s homeless population. Around 56% of respondents reported being homeless for over a year, a significant increase from 2015. **When asked which obstacles they have faced to secure housing, the top four answers were: 1) no job or income; 2) no money for moving costs; 3) bad credit; and 4) lack of available housing.**²⁷

In January 2019, the Santa Clara County Continuum of Care conducted its biannual Homelessness Point in Time Count (PIT).²⁸ The PIT found that the number of homeless individuals increased by more than 2,000 from 2017, with 9,706 people counted. A significant number of people who are homeless were counted in census tracts that are R/ECAPs.

²⁷ <https://www.newgeography.com/content/005501-the-demographics-poverty-santa-clara-county>.

²⁸ <https://www.sccgov.org/sites/osh/ContinuumofCare/ReportsandPublications/Pages/HomelessnessCensusandSurvey.aspx>

In the weeks following the PIT, 1,335 people who were homeless were asked to complete a survey.²⁹ More than 80% of the people who completed the survey resided in Santa Clara County prior to becoming homeless, and 30% of who took the survey reported that losing their job was the primary event that led to becoming homeless. Other primary events or conditions that led to homelessness include alcohol and drug use (22%), divorce/separation/breakup (15%), eviction (14%), argument with family/friend (13%), and incarceration (11%). Self-reported health conditions that may affect the stability of housing or employment for those experiencing homelessness included psychiatric/emotional conditions (42%), alcohol and drug use (35%), post-traumatic stress disorder (PTSD) (33%), chronic health problems (24%), physical disability (24%), traumatic brain injury (10%), and HIV/AIDS (2%). Nearly half of those who took the survey had a disability.

People experiencing homelessness in Santa Clara County are disproportionately male (62%). Latinx, Black, and Native American residents make up a disproportionate share of the homeless population when compared to their populations in Santa Clara County. When asked about obstacles to permanent housing, 66% reported that they could not afford rent, 56% had no job/income, 40% could not find available housing, and 35% had no money for moving costs. Nearly 90% of those who took the survey indicated that they would accept affordable permanent housing if it became available soon.

Maps B.93 and B.94 show the number of people counted during the 2021 PIT count for Santa Clara County and the region overall. Primary findings from the comparative analysis are summarized below.

- The majority of cities in Santa Clara County have a homeless population of up to 5,000 people. The western portion of the county has a smaller homeless population of up to 1,000 people. These jurisdictions are located near Boulder Creek, Scotts Valley, Santa Cruz, and Watsonville.
- Communities with higher homeless populations are concentrated in areas with high median incomes and housing prices, specifically Saratoga, Los Gatos, Campbell, Sunnyvale, and San José.
- For the region overall, homelessness is largely concentrated in San Francisco, Oakland, San Leandro, Fremont, and Livermore. Excluding San Francisco, these communities are of traditionally lower income with high costs of living.

By 2022, Santa Clara County’s population of homeless persons grew by over 300 people reaching a total of 10,028 individuals experiencing homelessness. According to preliminary 2023 PIT results, homelessness decreased by around one percent for the county overall and by 4.7% in the city limits of San José.³⁰ Data also show a four percent decrease in the number of unsheltered individuals and an eight percent increase in sheltered individuals. Other findings released by the county include:

- Across Santa Clara County, **there was a 27% drop in the number of veterans experiencing homelessness.** The dramatic drop in homeless veterans is likely the result of the county’s community campaign to end veteran homelessness: the campaign was launched in 2015 and has been an ongoing focus for the county’s homelessness response.
- **There was a 36% increase in the number of homeless families** despite having launched the Heading Home campaign in 2021 to end family homelessness. It is important to note that the dramatic increase in homelessness for families is likely affected by undercounts in previous years. With a communication campaign and

³⁰ <https://news.sccgov.org/news-release/county-santa-clara-and-city-san-José-release-preliminary-results-2023-point-time>.

new resources, the county has been able to reach more families experiencing homelessness.

- Since 2020, **the Homelessness Prevention System has helped more than 24,000 people remain stably housed while receiving services.** Only three percent of households became homeless after receiving assistance.

The dramatic change in homelessness is the result of the County’s collaborative efforts to create affordable housing, provide services to help residents stay housed, and offer resources to prevent households from falling into homelessness. These efforts are summarized from a county press release in 2023 and highlighted below.³¹

- Santa Clara County launched an ongoing, community-wide campaign to end homelessness among veterans. Campaign strategies have been incorporated in the countywide homelessness response.
- Since 2020, the supportive housing system has helped over 9,600 people move from homelessness to stable housing.
- Temporary and shelter interim capacity has increased by 15% since the 2022 PIT count. Shelter capacity has expanded through new partnerships, the County Challenge Grant, and Project Homekey; all of which supported the development of new service-enriched housing programs across Santa Clara County and unincorporated jurisdictions.

The 2020 - 2025 Santa Clara County Community Plan to End Homelessness (Community Plan)³² has been instrumental in reducing poverty rates. The Community Plan serves as the communitywide roadmap for ending homelessness. It recognizes that longstanding and structural racial inequities affect who becomes homeless in our community. The Community Plan focuses on policies and programs that reduce racial inequity in an effort to reverse the disproportionately high rates of people of color who are unhoused.

The Community Plan is organized around the following three main strategies:

Strategy 1: Address the root causes of homelessness through system and policy change.
Strategy 2: Expand homelessness prevention and housing programs to meet the need.
Strategy 3: Improve quality of life for unsheltered individuals and create healthy neighborhoods for all.

The Community Plan’s three main strategies are furthered through an array of additional strategies. It also includes process improvements that will apply across all three main strategies that, for example, will:

- Better utilize data collected in the homeless system of care and across County departments to know what is working well, what programs need improvement, and to identify inequities in the system.
- Provide trauma-informed care and racial equity / anti-racism training to all staff

³¹ <https://news.sccgov.org/news-release/county-santa-clara-and-city-san-José-release-preliminary-results-2023-point-time>.

³² https://housingtoolkit.sccgov.org/sites/g/files/exjcpb501/files/CommunityPlan_2020.pdf

working with people experiencing homelessness.

- Align racial equity work in the homelessness sector with other racial equity initiatives in Santa Clara County.

The Community Plan set aggressive targets to achieve by 2025. The July 2021 Progress Report³³ provided the following update:

- 4,886 of 20,000 people have been housed through the supportive housing system
- 2,140 of 2,500 people have been served through the Homeless Prevention System
- 2,336 of 3,764 of additional temporary housing and shelter capacity
- Nearly 30% reduction in annual inflow of people becoming homeless

In October 2021, the County in partnership with the City of San José, SCCHA, Cisco, and several other Continuum of Care partners launched Heading Home, a community-wide campaign to end family homelessness by 2025. The goal of this campaign is to achieve functional zero, which means that the number of housing placements for families is greater than the number of families entering homelessness. This campaign has four key strategies:

- Emergency Housing Vouchers – The vast majority of SCCHA’s 1,000 emergency housing vouchers, which will provide rental support for homeless households for up to ten years will be targeted towards homeless families.
- Rapid Rehousing – These programs, which provide time-limited rental subsidies with case management and supportive services, will be expanded with the goal of serving 200 more families per year.
- Homelessness Prevention Strategies – Expand homelessness prevention services to serve 2,500 households by 2025 and new investments in Housing Problem-Solving programs, which quickly house families who recently became homeless and are sleeping on the street or in a place not fit for human habitation.
- Affordable and Supportive Housing Development – New affordable housing developments in the County’s housing development pipeline include about 1,000 new family apartments in five years. Potential to leverage \$1 billion in Project Homekey funding for family apartments also exists.

The Heading Home campaign is a key element of the Community Plan and plays an important role in the target to house 20,000 through the supportive housing system.

While these efforts have seen positive results, it is critical that Santa Clara County and its unincorporated areas deepen efforts to prevent and end homelessness especially as the number of people entering homelessness continues to exceed those who can obtain and enter stable housing (per month).³⁴ According to HUD’s Housing Inventory Count (HIC) for 2021, jurisdictions in Santa Clara County have between 1,000 and 2,500 beds for

³³ <https://destinationhomesv.org/documents/2021/08/community-plan-to-end-homelessness-july-2021-progress-report.pdf/>

³⁴ Ibid.

residents experiencing or at risk of experiencing homelessness (Map E.29).

Having identified these needs, Santa Clara County and unincorporated jurisdictions will implement meaningful policies and programs to expand the county's supply of supportive housing units (e.g., emergency shelters, transitional housing, permanent supportive housing). Please refer to Chapter 4 of the County Housing Element for details on the related programs being implemented during the 2023-2031 planning period.

Disaster-driven displacement. Displacement can occur for a range of reasons. Given the dire consequences of climate change, it is critical that Unincorporated County be prepared to prevent and reduce environmental hazards (e.g., floods, fires) and provide the necessary resources for households displaced by natural disasters.

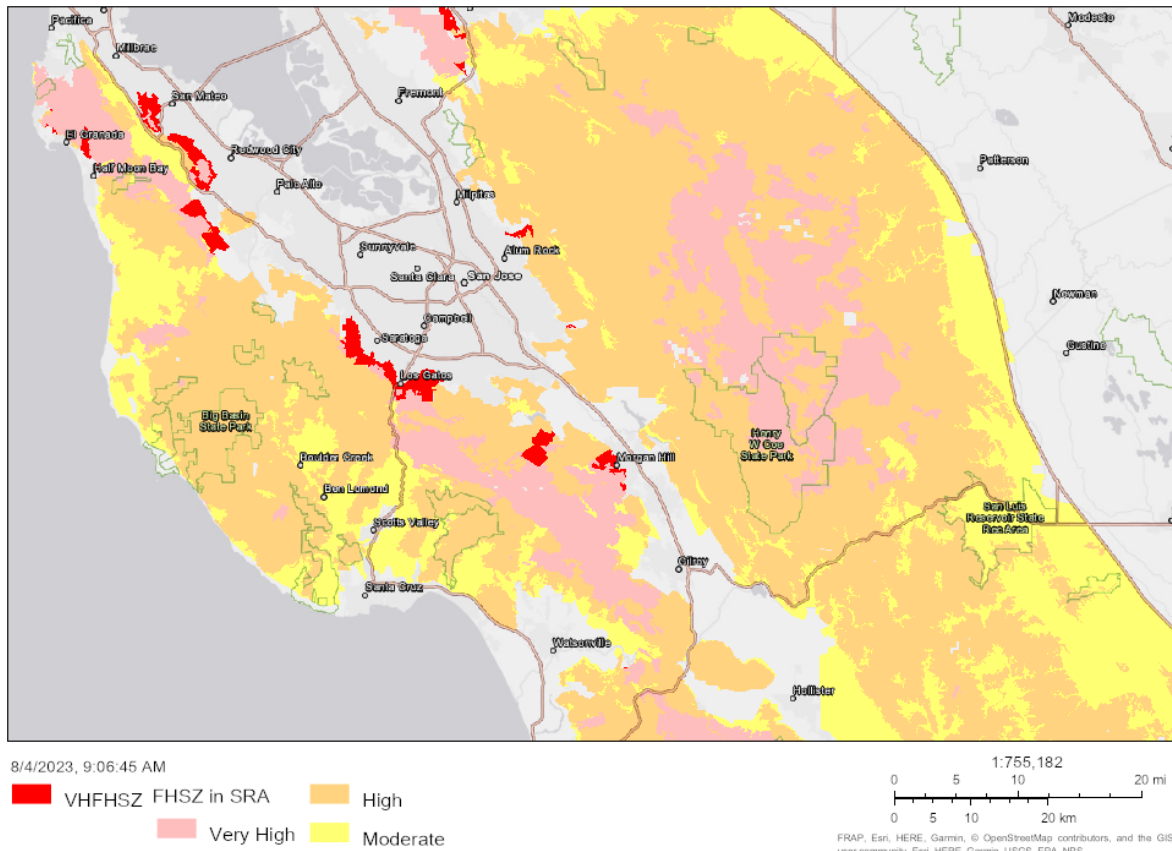

As required by California law, the State Fire Marshal is mandated to classify lands within State Responsibility Areas into Fire Hazard Severity Zones (FHSZ) to better prepare for

wildfires and other climate disasters.³⁵ FHSZs fall into three classifications: moderate, high, and very high.³⁶

Maps B.99 and B.100 show FHSZs for Santa Clara County and the Region. Very high-risk areas are concentrated in communities surrounding Saratoga, Los Gatos, and Morgan Hill. Data are not available for San José.

In the Bay Area, areas at very high risk are located near Oakland, San Leandro, City of San Mateo, and Redwood City. This is particularly important for the region overall as these jurisdictions have larger populations of low-income residents. With low incomes and rising housing prices, displaced households will face significant barriers re-entering the housing market without assistance from the county and local jurisdictions.

As part of the National Flood Insurance Program’s floodplain management plan, the Federal Emergency Management Agency (FEMA) provides Flood Insurance Rate maps to identify Special Flood Hazard Areas which require all residents in these areas to purchase flood insurance. These findings are valuable in identifying communities with households that may need assistance meeting their housing payments with the added cost of flood insurance.

Maps B.98 and B.99 illustrate Special Flood Hazard Areas as identified by FEMA in 2022 for Santa Clara County and the Region. Areas with a one percent annual chance flood hazard are located along the coast in Millbrae, City of San Mateo, Redwood City, and Palo Alto. For the county, residents in Gilroy, Watsonville, and Salinas are most at risk of flooding and are required to purchase flood insurance.

Housing for Farmworkers. The Santa Clara Agricultural Plan³⁷ determined that there is a scarcity of agricultural worker housing in the region, specifically for seasonal labor. Agricultural worker housing is needed in locations throughout the Unincorporated County so farmers have a ready and nearby supply of reliable labor at key times in the crop cycle. In addition, farm workers and their families need an array of social support services, including schools, medical services, shopping, etc. that are largely located in the urban areas. Farmworkers tend to have the lowest incomes among all workers, so there is a great need for housing affordable for households earning 50 percent or less of the median income.

To facilitate the construction of more farmworker housing for seasonal and year-round farmworkers, Santa Clara County is pursuing revisions to the County zoning ordinance designed to streamline the development process and lower the cost of permitting. Additionally, the County is identifying opportunities, including siting and funding options, for farmworker housing projects. The County is reviewing farmworker housing models

³⁷ https://stgenpln.blob.core.windows.net/document/SCV_ActionPlan.pdf

and identifying densities that could be supported in urban and urban edge areas as well as in the unincorporated rural communities.

Contributing Factors of Disproportionate Housing Needs

Please see section X.5, Contributing Factors Appendix, for further discussion of the following Contributing Factors to Disproportionate Housing Needs. Please see section X.4 for more details on the proposed goals and actions to address these contributing factors.

- Availability of affordable units in a range of sizes
- Displacement of residents due to economic pressures
- Displacement of and/or lack of housing support for victims of domestic violence, dating violence, sexual assault, and stalking
- Lack of access to opportunity due to high housing costs
- Lack of private investments in specific neighborhoods
- Lack of public investments in specific neighborhoods, including services or amenities
- Land use and zoning laws
- Lending discrimination
- Loss of affordable housing
- Source of income discrimination

Section C: Publicly Supported Housing Analysis

Primary findings.

- In the urban county, Asian and Pacific Islander residents are overrepresented in Project-based Section 8 units, multifamily units, and are more likely to have a housing voucher. Conversely, Black or African American and Hispanic residents are overrepresented in LIHTC units. According to the Santa Clara County Housing Authority, disproportionate representation is related to age and family composition. Voucher programs serve more seniors than families, which is a trend among housing authorities nationwide. Asians are more likely to make up more senior households while Black and Hispanic residents are more likely to make up family households. Discrimination against families by property owners may also be at play.
- The majority of LIHTC developments are located in predominantly Latinx census tracts.

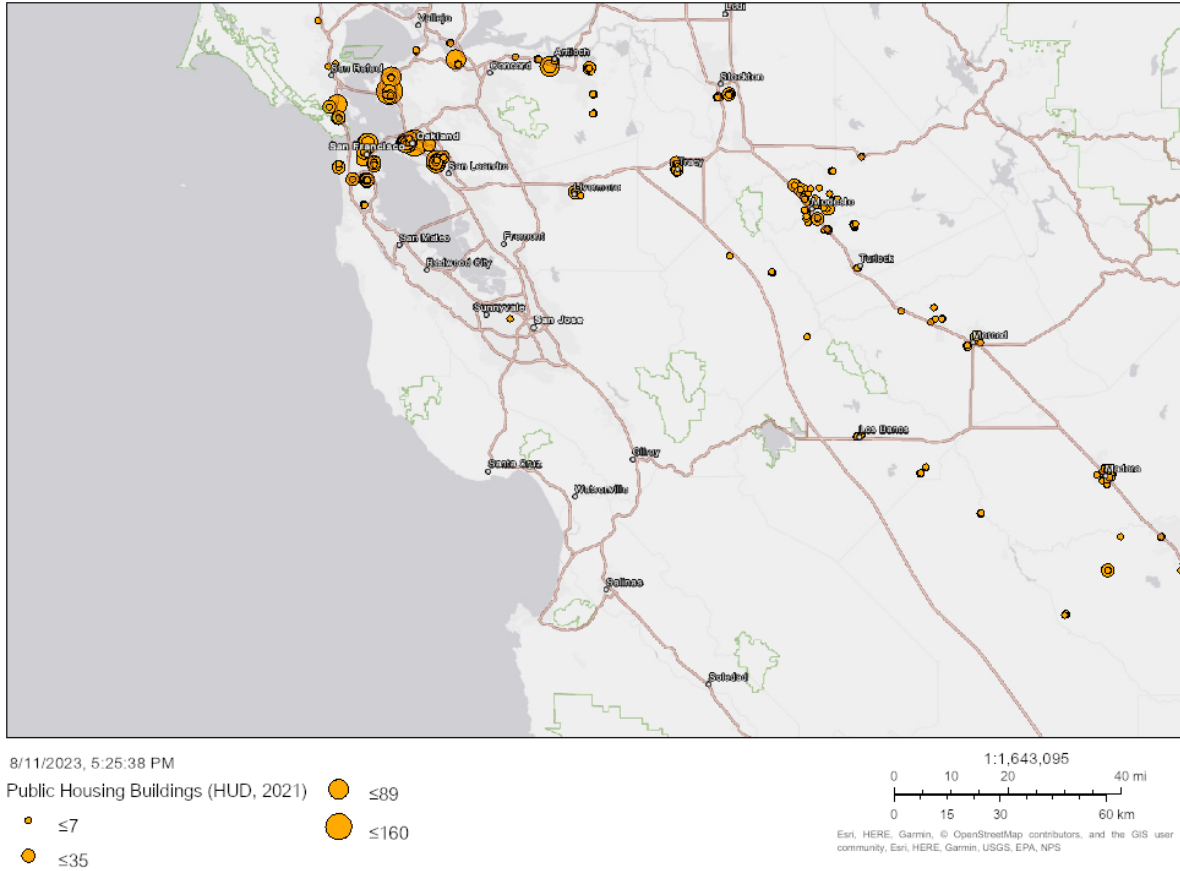

Maps C.1 and C.2 show the location of public housing buildings in Santa Clara County and the Region in 2021. Unincorporated Santa Clara County has very few public housing buildings available to lower income households. The Region has a much larger supply of public housing, most of which is located in San Francisco, Oakland, San Leandro, and San Rafael.

Source: HUD AFFH Table 6 - Publicly Supported Households by Race/Ethnicity

Santa Clara County. White and Asian Americans or Pacific Islanders are the predominant groups in Project-Based Section 8 developments. For Other Multifamily units, Asian American or Pacific Islander residents comprise a plurality of residents. Housing Choice Voucher households are the program category most evenly distributed across racial and ethnic groups. Latinx residents make up a majority in the Urban County. For LIHTC developments, the dominant group in the County, Latinx residents are a plurality. It is important to note that the LIHTC demographic data from the California Tax Credit Allocation Committee (CTCAC) reflects that population of white, Black, and Asian American or Pacific Islander residents, inclusive of Latinx individuals of those races. It is likely that many of the LIHTC residents identified as white in the CTCAC data, in particular, are Latinx.

Region. Asian American or Pacific Islanders make up the plurality of Project-Based Section 8, Other Multifamily, and Housing Choice Voucher residents. Housing Choice Voucher residents are the most evenly distributed across racial and ethnic groups, with

Latinx residents a close second to Asian American or Pacific Islanders, at 32%. LIHTC data is not available on the regional level.

Demographics by Public Housing Type.

Santa Clara County. In the County, there is a higher proportion of both white and Asian American or Pacific Islander residents in Project-Based Section 8 units than there is in the general population. Correspondingly, there is a lower percentage of Latinx residents represented, while Black residents are roughly equal. When broken down by income eligibility, the problem persists, with larger shares white and Asian American or Pacific Islander residents in Project-Based Section 8 units than in the income-eligible population, and far less Latinx residents. Among HCV holders, on the other hand, Black and Latinx residents are overrepresented as compared to the general population. When broken down by income eligibility, the trend shifts slightly, with Black and Latinx households markedly overrepresented, but with Asian American or Pacific Islanders overrepresented as well.

In terms of general population, Black and Latinx residents are overrepresented in LIHTC units, Asian Americans are slightly underrepresented, and white residents even more so. When broken down by income eligibility, Asian Americans are proportionately represented, White residents are similarly underrepresented, and Latinx and Black residents are even more highly overrepresented.

Region. In the region, Project-Based Section 8 units have an overrepresentation of Asian American or Pacific Islanders, a proportionate share of Black residents, and underrepresentation of white and Latinx residents. In the income-eligible population, White and Latinx residents stay roughly the same, while Black residents become underrepresented and Asian American or Pacific Islanders become even more overrepresented. For Other Multifamily units, the trend remains largely the same for white, Black, and Asian American or Pacific Islanders compared to the general population, but Latinx households have representation that approaches proportionality. Compared to the income-eligible population, white, Black, and Latinx households are underrepresented, while Asian American or Pacific Islanders are overrepresented. In the HCV program, Latinx households and Asian American or Pacific Islanders are roughly proportional, while white residents are severely underrepresented and Black residents are notably overrepresented. For the income-eligible population, the Latinx share is roughly proportional, while white residents continue to be underrepresented and Black residents continue to be overrepresented; Asian Americans or Pacific Islanders are also overrepresented in the income-eligible population. Full LIHTC data is not available at the regional level, and so this analysis is excluded.

Publicly Supported Housing Location and Occupancy.

Geographic patterns of public housing in relation to segregated areas and R/ECAPs.

Santa Clara County. Publicly supported housing in the Urban County is concentrated in Campbell, Saratoga, Los Gatos, and Morgan Hill, with a very large amount located in Morgan Hill. There is a notable lack of voucher use in Saratoga or Los Gatos, with some in Campbell, and a much stronger presence in Morgan Hill. Voucher users in the Urban County are mostly Asian American and Latinx households.

Region. In the larger region, the population is clearly concentrated in Santa Clara County and so is the publicly supported housing. The only area of note outside of the County is Hollister, which has a concentration of LIHTC and Project-Based Section 8 developments, a substantial Latinx population, and high voucher use.

Geographic patterns of public housing for families with children, elderly and/or persons with a disability versus segregated areas of R/ECAPs. At least 30 publicly supported housing developments and 55 LIHTC developments are reserved for seniors. Senior housing is fairly evenly distributed across the entitlement jurisdictions.

There are only three publicly supported housing developments reserved for people with disabilities, and five LIHTC developments for people with special needs. The developments do tend to cluster together, with two located in adjacent census tracts in Palo Alto, two in adjacent census tracts in Sunnyvale, two in adjacent census tracts in Santa Clara/San José, and two in nearly adjacent census tracts in eastern San José.

Publicly supported housing (including LIHTC units) geared toward families are the most numerous. It follows a similar siting pattern to those reserved for seniors. Those located on the eastern side of San José, in particular, are located in more diverse areas. Of particular note is the strong concentration of affordable family housing in Morgan Hill. As part of the Urban County, as it forms a gateway between Gilroy and the rest of the entitlement jurisdictions farther north.

Demographic composition of public housing programs in R/ECAPs.

Table C.3: Publicly Supported Housing Demographics by R/ECAP and Non R/ECAP Tracts, Santa Urban Clara County

	Total # units occupied	% White	% Black	% Latinx	% Asian or Pacific Islander	% Families with children	% Elderly	% with a disability
Project-Based Section 8								
R/ECAP tracts	N/A	N/A	0.00%	N/A	N/A	N/A	N/A	N/A
Non R/ECAP tracts	588	50.85%	2.56%	9.39%	36.01%	3.31%	86.42%	14.24%
HCV Program								
R/ECAP tracts	1	N/A	N/A	N/A	N/A	N/A	N/A	N/A
Non R/ECAP tracts	997	26.63%	9.60%	38.18%	25.18%	23.24%	47.79%	34.62%

There are relatively few R/ECAPs in Santa Clara County and none in Mountain View, and they are located in only two areas: Gilroy and San José.

In San José, there are Project-Based Section 8 and LIHTC units located within its 7 R/ECAP tracts. The Project-Based Section 8 units within R/ECAPs have dramatically different demographics compared to those outside R/ECAPs, with a 15-point increase in Asian American or Pacific Islanders, compared to a seven-point drop for Latinx households and a nearly 20-point drop for white residents. The percentage of Black residents in R/ECAPs is almost half of what it is outside. LIHTC units, on the other hand, have much more similar demographics within and outside R/ECAPs. The percentage of Black residents, while far above the countywide average, is roughly the same both within and outside R/ECAPs. Asian American or Pacific Islanders in R/ECAPs trail those in non-R/ECAPs by about seven points, while white and Latinx residents both have higher percentages outside R/ECAPs than within them (by about eight points each). For HCV holders, Asian American or Pacific Islanders make up a supermajority within R/ECAP tracts. (It should be noted that the HCV R/ECAP and non-R/ECAP data was provided by HUD and reflects HUD's less expansive definition of R/ECAPs. It is not possible to calculate HCV data for the more robust definition of R/ECAPs employed by this analysis.)

Demographic Composition Differences in RAD converted and LIHTC Developments.

Santa Clara Urban County

The clear trend for Project-Based Section 8 developments in the Urban County is for white residents to make up the majority or plurality, followed in most cases by Asian American or Pacific Islander residents. At Villa Vasona Apartments and Corinthian House, for example, white residents make up a supermajority. However, at San Tomas Gardens Apartments, Asian American or Pacific Islanders are the majority, and at Fellowship Plaza they are the plurality. One outlier from this trend is Sycamore Glen, where the near-supermajority of residents are Latinx. Only one of these developments includes households with children, and it is the singular development that is majority-Asian American or Pacific Islander. The County's LIHTC units tend to be either predominantly white or predominantly Latinx. Therefore, DeVries Place stands out for its senior population, which is 86.71% Asian American.

Other Types of Public Housing.

Santa Clara County. The County of Santa Clara has established inclusionary zoning with the unincorporated County and Stanford Community Plan Area (the 4,000 acres run by Stanford, located within Santa Clara County).¹ The ordinance requires that 16% of residential units in a residential development be reserved for affordable housing. Within that 16%, 15% are for extremely low or very low-income households, 45% are for low-income households, and 40% are for moderate-income households. Additionally, 16% of For Sale Residential Development units in a given development shall be made affordable as inclusionary zoning units available for purchase at 120% AMI or less, or the

¹ Santa Clara County Muni Code Section B37-2.

inclusionary units may be “banked as provided” and developed as rental inclusionary units.²

In November 2016, Santa Clara County voters approved the 2016 “Measure A” Affordable Housing Bond (Housing Bond), designating \$950 million in general obligation bonds to be used to construct 4,800 new units of affordable housing throughout the county. As of September 2023, 4,481 new units and 689 renovated units are at different stages of the development process.³

Region. San Benito County has also adopted Inclusionary Zoning, requiring residential developments to provide 15% or more “on-site” units, provide 20% or more “off-site” units, or, in certain circumstances, pay an in-lieu fee (e.g., impact or linkage fees).⁴

Differences in demographic composition of Public Housing Types and the areas in which they are located.

Santa Clara Urban County. In the County, four Project-Based Section 8 developments are majority-white, and they are each located in a plurality-white or majority-white census tract. Of the remaining developments, one is plurality-White and located in a majority-white census tract, one is plurality-Asian and located in a plurality-white census tract, one is majority-Asian and located in a majority-white census tract, and one is majority-Latinx and located in a majority-Latinx census tract. One development does not have available demographic information. None of these census tracts have high poverty rates.

The vast majority of LIHTC developments are located in predominantly Latinx census tracts. Most of the Large Family developments mirror that demographic trend. Meanwhile, five of the seven LIHTC developments reserved for seniors are majority-white, while the majority of the census tracts where these developments are located have mainly Latinx or Asian populations.

Disparities in Access to Opportunity. Throughout the County, there are clear disparities in access to opportunity across several categories – including environmental health, labor market, and school proficiency – which all seem to be higher in the western part of the county and lower in San José. The labor market is similarly good in the western part of the county, but also makes a strong showing in the Morgan Hill and Gilroy area. Similarly, the job market is excellent in the northern part of the county and along Monterey Road down toward Morgan Hill and Gilroy. Transit Trips and Low Transportation are consistently good throughout the county.

To ensure individuals enter and maintain housing, Santa Clara County must increase its supply of subsidized housing. Maps C.3 and C.4 show the location of subsidized housing units in the county and the Region. As shown below, Santa Clara County has a healthy supply of subsidized units, most of which are concentrated in San Jose, Sunnyvale, Campbell, and Saratoga and Los Gatos (in part).

Compared to the county, the Bay Area has a much larger supply of subsidized units and is distributed more evenly. For the Bay Area, subsidized units are concentrated in San Francisco and communities near the City of San Mateo, Redwood City, Oakland, San Leandro, and Fremont. Communities near Livermore also have a large supply of subsidized units.

In addition to subsidized units, Unincorporated Santa Clara County and the Region will need to increase the availability of Housing Choice Vouchers (HCVs) for extremely low to moderate income households. Vouchers are particularly important for these households as they facilitate housing choice for households that would otherwise struggle to participate in the housing market/find housing that meets their needs.

Maps C.5 and C.6 show voucher holders by census tract in Santa Clara County and the Region. In the county, residents with vouchers are more likely to be living in San Jose, Milpitas, Santa Clara, Campbell, Gilroy, and Cupertino (in part). These findings are unsurprising as these areas have larger shares of lower income communities and/or comparatively higher housing prices.

Please see section X.5, Contributing Factors Appendix, for further discussion of the following Contributing Factors to Publicly Supported Housing Location and Occupancy. Please see section X.4 for more details on the proposed goals and actions to address these contributing factors.

- Admissions and occupancy policies and procedures, including preferences in publicly supported housing
- Community opposition
- Displacement of residents due to economic pressures
- Displacement of and/or lack of housing support for victims of domestic violence, dating violence, sexual assault, and stalking
- Impediments to mobility
- Lack of access to opportunity due to high housing costs
- Lack of meaningful language access for individuals with limited English proficiency
- Lack of local or regional cooperation
- Lack of private investment in specific neighborhoods

- Lack of public investment in specific neighborhoods, including services and amenities
- Land use and zoning laws
- Loss of affordable housing
- Occupancy codes and restrictions
- Quality of affordable housing information programs
- Siting selection policies, practices, and decisions for publicly supported housing, including discretionary aspects of Qualified Allocation Plans and other programs
- Source of income discrimination

Part D: Disability and Access Analysis

In 1988, Congress extended the Fair Housing Act's protections against housing discrimination to people with disabilities. In addition to protection against intentional discrimination and unjustified policies that have disproportionate effects, the Fair Housing Act includes three provisions that are unique to persons with disabilities. First, the Fair Housing Act prohibits the denial of requests for reasonable accommodations for persons with disabilities if said accommodations are necessary to afford an individual equal opportunity to use and enjoy a dwelling. Reasonable accommodations are departures from facially neutral policies and are generally available, so long as granting the accommodation request would not place an undue burden on the party providing the accommodation or result in a direct threat to the health or safety of others. Permitting an individual with an anxiety disorder to have a dog in their rental unit as an emotional support animal despite a broad "no pets" policy is an example of a reasonable accommodation. Second, the Act also prohibits the denial of reasonable modification requests. Modifications involve physical alterations to a unit, such as the construction of a ramp or the widening of a door frame and must be paid for by the person requesting the accommodation unless the unit receives federal financial assistance and is subject to Section 504 of the Rehabilitation Act. Lastly, the design and construction provision of the Fair Housing Act requires most multi-family housing constructed since 1991 to have certain accessibility features. This section of the Assessment looks at the housing barriers faced by persons with disabilities, including those that result in the segregation of persons with disabilities in institutions and other congregate settings.

Primary findings.

- Eight percent of residents in Unincorporated County have a disability. The most common disability types are ambulatory difficulties, cognitive difficulties, and independent living difficulties. Disabled residents have not had their accessibility needs met as many residents require greater access to accessible housing units. In fact, it is estimated that:
 - 76,000 county residents need units accessible to persons with ambulatory difficulties,
 - 44,000 need units accessible to persons with hearing difficulties, and
 - Over 27,000 residents need units accessible to persons with vision difficulties.
- **The suspension rate for disabled students is three times greater than that for non-disabled students.** High suspension rates for students with disabilities are most prominent in the Gilroy Unified and Morgan Hill Unified school districts. **Suspension rates are also high in San Jose which has a higher concentration of children with disabilities.**

Population Profile.

With a Self-Care Difficulty	2.1%
With a Vision Difficulty	1.4%

Source: HUD AFFH Table 13 - Disability by Type

Geographic Concentration and Pattern of People with Disabilities. There is generally relatively little concentration of persons with disabilities in Santa Clara County and the cities of Cupertino, Gilroy, Mountain View, Palo Alto, San José, Santa Clara, and Sunnyvale. As the map above illustrates, the census tracts with the highest concentrations of persons with disabilities in the county range from 13.1% to 16.2%. At a regional level, there is limited relative concentration of persons with disabilities in rural areas in the eastern portion of the county as well as in rural areas between south San José and Morgan Hill. There are also pockets of concentration in downtown San José; scattered portions of the east side of San José and south side of San José; a portion of Santa Clara; and, to a lesser extent, portions of Campbell.

With the exception of the portions of San José and Santa Clara referenced above, areas of relative concentration of persons with disabilities are located in the eastern part of the Unincorporated County. Portions of the Unincorporated County that have relative concentrations of persons with disabilities do not appear to overlap significantly with patterns of racial segregation and do not include R/ECAPs; however, there does appear to be some relationship between income and disability levels in those areas. The wealthiest parts of the County, such as the West Valley cities, Morgan Hill, and rural areas in the western half of the county, do not have significant concentrations of persons with disabilities.

Patterns of concentration of persons with disabilities by type of disability and by age vary significantly across the region. Oftentimes, the issue of type of disability and disability status by age are closely related as certain types of disabilities are more highly correlated with elderly status than others. Additionally, one type of disability – independent living disabilities – only applies to individuals who are 18 years of age or older, because there is no expectation that children are able to live independently, regardless of their disability status.

Santa Clara County. In the County, there are slightly higher concentrations of persons with hearing disabilities in Los Gatos, Monte Sereno, parts of Campbell, and an unincorporated semi-rural census tract to the west of West Valley cities that includes a significant amount of public land. Stanford, Los Altos Hills, and Saratoga have lower concentrations of persons with hearing disabilities. Persons with vision disabilities are slightly concentrated in Los Gatos and Monte Sereno, though patterns are less pronounced than with respect to the distribution of persons with hearing disabilities. Persons with cognitive disabilities are relatively concentrated in the rural eastern portion of the Urban County, near Stanford, and in Campbell as mentioned above. Los Altos, Saratoga, and the northern portion of Morgan Hill have relatively low concentrations of persons with cognitive disabilities. Persons with ambulatory disabilities are somewhat concentrated in San Martin, parts of Campbell, and the area between south San José and Morgan Hill. As described above with respect to the region, persons with self-care

disabilities are somewhat concentrated in the area between south San José and Morgan Hill, in the rural far eastern portion of Santa Clara County, and in parts of Campbell. As discussed above, persons with independent living disabilities are concentrated in the area between south San José and Morgan Hill as well as in Campbell.

As discussed above, in the County, there are concentrations of children with disabilities in Campbell and in a rural area to the southwest of Gilroy. Adults with disabilities, ages 18 through 64, are concentrated in the rural, eastern portion of the County. Elderly persons with disabilities are somewhat concentrated in Campbell.

Region. In the Region, persons with hearing disabilities generally are not highly concentrated in particular areas. Limited exceptions to this pattern, or lack thereof, include areas with concentrations of age-restricted housing, such as The Villages, an area between South San José and Morgan Hill, which has higher concentrations of persons with hearing disabilities than areas with relatively young populations, like north San José and the campus of Stanford University, which have lower concentrations of persons with hearing disabilities. People with vision disabilities are somewhat concentrated in the city of San José, though not within particular neighborhoods or sections of San José, and in the southern portion of the county. Persons with cognitive disabilities are relatively concentrated in the sparsely populated far eastern portion of Santa Clara County in a census tract that contains significant public land as well as in Campbell, Stanford, parts of south San José, and parts of the east side of San José. Persons with ambulatory disabilities are somewhat concentrated in parts of south San José and the east side of San José, The Villages, the area between south San José and Morgan Hill, and the northern portion of Palo Alto. Persons with self-care disabilities are relatively concentrated in parts of south San José and the east side of San José, in the area between south San José and Morgan Hill, in the rural far eastern portion of Santa Clara County, in parts of Campbell, and in parts of Cupertino. Persons with independent living disabilities are more highly concentrated in downtown San José, parts of south San José and the east side of San José, the area between south San José and Morgan Hill, and Campbell.

Regionally, there are concentrations of children with disabilities in Downtown San José as well as parts of Campbell, Mountain View, Santa Clara, and a rural area to the southwest of Gilroy. Adults with disabilities, ages 18-64, are concentrated in downtown San José, parts of south San José and the east side of San José, parts of Santa Clara, and rural areas in the eastern portion of Santa Clara County. Elderly persons with disabilities are somewhat concentrated in San José, particularly downtown and on the east side, in Campbell, and in the eastern portion of Gilroy.

Housing Accessibility. HUD's implementation of Section 504 of the Rehabilitation Act of 1973 (24 CFR Part 8) requires that federally financed housing developments have five percent (5%) of total units be accessible to individuals with mobility disabilities and an additional two percent (2%) of total units be accessible to individuals with sensory disabilities. It requires that each property, including site and common areas, meet the Federal Uniform Accessibility Standards (UFAS) or HUD's Alternative Accessibility Standard.

Within Santa Clara County, not including the city of Milpitas, there are four traditional public housing units and 5,125 Project-Based Section 8 units that are subject to Section 504 of the Rehabilitation Act. Additionally, there are 1,821 units in Project-Based Voucher-assisted developments. Many of these developments are former public housing. These three types of units are all subject to the accessibility requirements of section 504. Persons with disabilities represent 9.81% of residents of Project-Based Section 8 units. Data regarding what proportion of residents of Project-Based Voucher units are persons with disabilities is not available, though residents of those units are included in data reflecting the proportion of Housing Choice Voucher recipients with disabilities. Nearly 32%, or 31.74%, of voucher holders in the region (including a small number of voucher holders in San Benito County) are persons with disabilities. At this time, the number of actually accessible units in public housing or among Project-Based Section 8 units and Project-Based Voucher-assisted units is unknown. It is common for developments to exceed the Section 504 minimum requirements, but there may also be older, inaccessible housing that has neither been retrofitted nor complies with current law.

The HOME Investment Partnerships Program is a grant of federal funds for housing. Housing developed with these funds is subject to Section 504. HUD's HOME Program Performance Snapshots contain counts of the number of Section 504 accessible HOME-assisted units for each grantee. The Santa Clara County HOME Consortium, which includes Cupertino, Gilroy, Milpitas, and Palo Alto in addition to the Urban County, has 188 Section 504 compliant units. Mountain View has 54 such units, San José has 30 units, the City of Santa Clara has 176 units, and Sunnyvale has 60 units.

Low Income Housing Tax Credit (LIHTC) Units. According to data from the California Tax Credit Allocation Committee, there are 21,465 low-income units in LIHTC-financed developments in Santa Clara County.

The question of whether Section 504 or Title II of the Americans with Disabilities Act applies to LIHTC developments has not been resolved by the courts. Title II of the ADA prohibits discrimination on the basis of disability in all service, programs, and activities provided to the public by non-federal governmental entities except transportation services. The 2010 ADA Standards (ADAS) differ from Section 504 in some respects, but, essentially, they contain the same types of requirements. These include the requirement of 5% of total units be accessible to individuals with mobility disabilities and 2% accessible to individuals with sensory (hearing/vision) disabilities.

In 2015, the California Tax Credit Allocation Committee (CTCAC) issued guidance stating that the accessibility requirements of the California Building Code (CBC) for public housing (Chapter 11B) apply to LIHTC developments. Chapter 11B is the California equivalent of the 2010 ADA Standards. Section 1.9.1.2.1. of the CBC states that the accessibility requirements apply to "any building, structure, facility, complex ...used by the general public." CTCAC has expanded the requirement so that 10% of total units in a LIHTC development must be accessible to people with mobility disabilities and that 4% be accessible to people with sensory disabilities.

Also, effective 2015, CTCAC required that 50% of total units in a new construction project and 25% of all units in a rehabilitation project located on an accessible path must be mobility accessible units in accordance with CBC Chapter 11B. CTCAC also provides incentives for developers to include additional accessible units through its Qualified Allocation Plan.

Fair Housing Amendments Act Units. The Fair Housing Amendments Act of 1988 (FHAA) covers all multifamily buildings of four or more units that were first occupied on or after March 13, 1991 – not just affordable housing developments. The FHAA added protections for people with disabilities and prescribed certain basic accessibility standards, such as one building entrance must be accessible, there must be an accessible route throughout the development, and public rooms and common rooms must be accessible to people with disabilities. Although these accessibility requirements are not as intensive as those of Section 504, they were a first step in opening many apartment developments to people with disabilities, regardless of income level. The FHAA was also very helpful for middle-income and upper-income people with disabilities who also need accessible housing. In Santa Clara County, according to the 2015-2019 American Community Survey 5-Year Estimates, there are 43,007 units in structures with five or more units built from 2000 to the present. There are an additional 51,976 such units built from 1980 through 1999. If it is assumed that 45% of these units were built from 1991 through 1999, then there would be an additional 23,389 units in developments subject to design and construction standards.

It is important to note that FHAA units are not the same as accessible units under Section 504 or ADA Title II. Therefore, utilizing FHAA units as a proxy for the number of accessible housing units available or required under Section 504 or ADA Title II does not produce an accurate count. Although they are not fully accessible, these units are an important source of housing for people with disabilities who do not need a mobility or hearing/vision unit.

Data that breaks down affordable, accessible units by number of bedrooms is not available for private housing. Of the 1,821 units in Project-Based Voucher-assisted developments, a large majority (79.4%) are 0-1 bedroom units. Over half (57.6%) of Project-Based Section 8 units are 0-1 bedroom units, while 55.7% of LIHTC units are 0-1 bedroom units. Outside of San José, very few Project-Based Section 8 units with two or more bedrooms are available. The lack of larger publicly supported housing units makes it more difficult for families with children that include persons with disabilities and persons with disabilities who need the services of live-in aides to find accessible housing that meets their needs. The Heading Home collaboration also has components, including approximately 1,000 emergency housing vouchers predominantly targeted towards homeless families, that should help meet the needs of families that include persons with disabilities for which one-bedroom units may not be sufficient.

Because San Benito County comprises such a small proportion of the region's population, the overall regional picture is not significantly different. However, the situation in San Benito County is in some respects worse than in Santa Clara County. A higher proportion

of that county’s population (9.5% as compared to 7.9%) has disabilities than in Santa Clara County. Additionally, a higher proportion of that county’s housing stock is comprised of detached single-family homes (77.6% as compared to 52.9%), which are not subject to any accessibility requirements. San Benito County also has relatively limited publicly supported housing stock. With that said, private, market-rate housing in San Benito County is much more affordable than in Santa Clara County. Thus, unsubsidized apartments there may be a more viable option for low-income persons with disabilities.

Overall, it is clear that the supply of affordable, accessible units in both the County, each of the cities, and the Region is insufficient to meet the need. Over 76,000 County residents have some level of need for units accessible to persons with ambulatory disabilities, over 44,000 have hearing disabilities, and over 27,000 have vision disabilities.⁵ By the most generous, over-inclusive measures, there may be about 60,000 units that have been produced subject to the FHA’s design and construction standards and less than 5,000 units are accessible pursuant to Section 504’s requirements. There is, without question, some overlap between these two categories, some of these units are likely non-compliant, and some accessible units are occupied by individuals who do not have disabilities.

Geographic Location of Accessible Housing Units and Alignment with R/ECAPs and Areas of Segregation. Across Santa Clara County and the Region, areas with affordable, accessible housing tend to be concentrated in San José, which is more heavily Latinx and Vietnamese than other parts of central and northern Santa Clara County and includes most of the county’s R/ECAPs. In the northwestern portion of the county, there is also clear concentration across cities in areas to the north or east, most on the side of U.S. Route 101 closer to the San Francisco Bay and between El Camino Real and the San Francisco Bay. These areas do not include any R/ECAPs but, nonetheless, are more heavily Latinx than the southern or western portions of cities like Mountain View, Sunnyvale, and Santa Clara. West Valley cities that are part of the Urban County have comparatively less affordable, accessible housing because these areas have relatively limited multifamily housing, in general.

Table D.4: Disability by Publicly Supported Housing Program Category, Santa Clara Urban County

Jurisdiction	People with a Disability	
	#	%
Public Housing	n/a	n/a
Project-Based Section 8	86	14.24%
Other Multifamily	n/a	n/a
HCV Program	369	34.58%
Region		
Public Housing	n/a	n/a
Project-Based Section 8	512	9.81%
Other Multifamily	97	30.41%
HCV Program	4,980	31.74%

⁵ Note that because individuals can have multiple disabilities some of these are the same people and should not be double or even triple counted.

In the county and in the region, persons with disabilities make up a significant share of residents of Other Multifamily Housing and of Housing Choice Voucher holders. They make up a smaller share of residents of Project-Based Section 8 housing. With respect to the former two categories, it appears that persons with disabilities comprise a larger share of residents than they do of the income-eligible population. It is important to note that Other Multifamily Housing is a composite category that includes some programs, like Section 811, that are expressly limited to persons with disabilities as well as less targeted programs. In a particular city, a high concentration of persons with disabilities residing in Other Multifamily Housing may simply mean that a high share of Other Multifamily Housing is Section 811 housing. For Project-Based Section 8, even though a slightly higher proportion of residents are persons with disabilities than the concentration of persons with disabilities in the general public, that share is likely not commensurate with the share of the low-income population that has disabilities.

Integration of People with Disabilities Living in Institutions and Other Segregated Settings. Up until a wave of policy reforms and court decisions in the 1960s and 1970s, states, including California, primarily housed persons with intellectual and developmental disabilities and individuals with psychiatric disabilities in large publicly-run institutions. In California, institutions for persons with intellectual and developmental disabilities are called developmental centers, and institutions for persons with psychiatric disabilities are called state hospitals. Within these institutions, persons with disabilities have had few opportunities for meaningful interaction with individuals without disabilities, limited access to education and employment, and a lack of autonomy. The transition away from housing persons with disabilities in institutional settings and toward providing housing and services in home and community-based settings accelerated with the passage of the Americans with Disabilities Act in 1991 and the U.S. Supreme Court's landmark decision in *Olmstead v. L.C.* in 1999. In *Olmstead*, the Supreme Court held that, under the regulations of the U.S. Department of Justice (DOJ) implementing Title II of the Americans with Disabilities Act (ADA), if a state or local government provides supportive services to persons with disabilities, it must do so in the most integrated setting appropriate to the needs of a person with a disability and consistent with their informed choice. This obligation is not absolute and is subject to the ADA defense that providing services in a more integrated setting would constitute a fundamental alteration of the state or local government's programs.

The transition from widespread institutionalization to community integration has not always been linear, and concepts of what comprises a home and community-based setting have evolved over time. Although it is clear that developmental centers and state hospitals are segregated settings and that an individual's own house or apartment in a development where the vast majority of residents are individuals without disabilities is an integrated setting significant ambiguities remain. Nursing homes and intermediate care facilities are clearly segregated though not to the same degree as state institutions. Group homes fall somewhere between truly integrated supported housing and such segregated settings, and the degree of integration present in group homes often corresponds to their size.

Below, this assessment includes detailed information about the degree to which persons with intellectual and developmental disabilities and individuals with psychiatric disabilities reside in integrated or segregated settings. The selection of these two areas of focus does not mean that persons with other types of disabilities are never subject to segregation. Although the State of California did not operate analogous institutions on the same scale for persons with ambulatory or sensory disabilities, for example, many people with disabilities of varying types face segregation in nursing homes. Data concerning persons with various disabilities residing in nursing homes is not as available as data relating specifically to persons with intellectual and developmental disabilities and persons with psychiatric disabilities. Because city-level agencies play a limited role in meeting the need for home and community-based services, the analysis that follows is largely the same across Santa Clara County and the cities of Cupertino, Gilroy, Mountain View, Palo Alto, San José, Santa Clara, and Sunnyvale.

Table D.5: Intellectual and Developmental Disabilities
 Performance of San Andreas Regional Center, December 2020

Performance Reports	Fewer consumers live in developmental centers	More children live with families	More adults live in home settings	Fewer children live in large facilities (more than 6 people)	Fewer adults live in large facilities (more than 6 people)
State Average	0.07%	99.51%	81.71%	0.04%	1.92%
San Andreas Regional Center	0.04%	99.16%	80.55%	0.00%	1.54%

In California, a system of regional centers is responsible for coordinating the delivery of supportive services primarily to individuals with intellectual and developmental disabilities. The regional centers serve individuals with intellectual disabilities, individuals with autism spectrum disorder, individuals with epilepsy, and cerebral palsy. These disabilities may be co-occurring. Although there is some variation from regional center to regional center, individuals with intellectual disabilities and individuals with autism spectrum disorder predominate among consumers. All data regarding the regional centers is drawn from their annual performance reports.

In the region, there is one regional center – the San Andreas Regional Center – that serves all of Santa Clara County and San Benito County, as well as Monterey and Santa Cruz Counties just to the south and southwest of the region. Unfortunately, the Regional Center of the East Bay does not disaggregate its publicly reported data by county to allow a Santa Clara County-specific or city-specific analysis. Nonetheless, since Santa Clara County is significantly larger than the other three counties combined, most of what is reflected in data from the San Andreas Regional Center reflects conditions in Santa Clara County.

On an annual basis, these regional centers report to the California Department of Developmental Services on their performance in relation to benchmarks for achieving community integration of persons with intellectual and developmental disabilities. As reflected in the table above, the San Andreas Regional Center simultaneously has lower rates of persons with developmental disabilities living in institutional settings but also lower rates of persons with developmental disabilities living in home or family-based settings than statewide. In some cases, disparities between the San Andreas Regional Center and the state are very small and may not support an inference that structural factors are playing a particularly acute role in perpetuating the segregation of persons with intellectual and developmental disabilities in the region.

At the end of 2018, the California Department of Developmental Services closed the Sonoma Developmental Center, which was the last remaining large, state-run institution for persons with developmental disabilities in the Region. Porterville Developmental Center, located in the Central Valley, is the closest such institution that remains. The facility is scheduled to close by the end of 2021. As of November 2019, there were between 1 and 10 individuals from the area served by the San Andreas Regional Center residing in developmental centers like the Porterville Developmental Center.

The San Andreas Regional Center reports the number of individuals served by type of setting by race or ethnicity. The categories included are Home, Residential, ILS/SLS, Institutions, Med/Rehab/Psych, and Other. The category of Home includes the home of a parent or guardian, a foster home for children, and a family home for adults. The category of Residential includes community care facilities and intermediate care facilities (ICFs) and continuous nursing. The category of ILS/SLS solely includes independent living and supported living. The Institutions category includes developmental centers, state hospitals, and correctional institutions. The category of Med/Rehab/Psych includes skilled nursing facilities, psychiatric treatment facilities, rehabilitation centers, sub-acute care, and community treatment facilities. The Other category includes individuals who are homeless as well as individuals who do not fall into any category (and one individual living outside of California). In general, Home and ILS/SLS settings are the most integrated, and Institutions and Med/Rehab/Psych are the most segregated. Residential settings fall somewhere in between with community care facilities being more integrated than ICFs within the category. Clearly, homelessness is not consistent with meaningful community integration. The table below reflects the percentage of individuals with intellectual or developmental disabilities served in each type of setting.

Table D.6: Type of Setting by Race or Ethnicity, San Andreas Regional Center, 2020-2021

Type of Setting	Total Served	% Non-Latinx White	% Black	% Asian or Pacific Islander	% Latinx	% Other or Multi-Racial
Home	17,027	19.9%	1.5%	22.0%	43.1%	13.4%
Residential	1,803	58.5%	3.9%	11.7%	19.2%	6.2%
ILS/SLS	1,240	61.0%	4.5%	7.0%	21.0%	6.1%
Institutions	30	36.7%	13.3%	10%	26.7%	13.3%
Med/Rehab/Psych	81	44.4%	2.5%	18.5%	29.6%	3.7%
Other	67	44.8%	10.4%	4.5%	26.9%	11.9%

In the service area of the San Andreas Regional Center, Asian or Pacific Islander residents appear to be underrepresented in the population receiving services for intellectual and developmental disabilities. With respect to individual types of settings, Latinx residents are most likely to reside in home-based settings while white residents have the greatest access to independent living and supported living environments. Black residents are overrepresented in Institutions and Other, which includes homelessness. This data suggests that, for Black individuals with intellectual and developmental disabilities, the effects of mass incarceration on their prospects for integration may be compounded by both race and disability status. The high representation of Latinx residents in home-based settings and their low concentration in independent living and supported living settings may suggest a need for planning around helping adult with developmental disabilities who are living with their parents gain access to and transition to independent living when their parents are no longer able to serve as care providers.

Overall, this data shows that, within the County and the Region, persons with intellectual and developmental disabilities are typically at least slightly less likely to be segregated in institutional settings than statewide. The data shows that a significant minority of adults with intellectual and developmental disabilities, in particular, reside in comparatively segregated, congregate settings. It is highly likely that not all persons with intellectual and developmental disabilities who would like to live in integrated settings in the County, the cities of Cupertino, Gilroy, Mountain View, Palo Alto, San José, Santa Clara, and Sunnyvale, and the Region have the opportunity to do so.

Serious Mental Illness. Napa State Hospital is the primary large institution for individuals with serious mental illness serving Santa Clara County residents. As of November 2016, the facility had 1,267 patients, slightly over its official capacity of 1,255. The hospital’s website breaks down the patient population among four categories of admittees. Forty-seven percent (47%) were committed by virtue of being found not guilty of a crime by reason of insanity; 30% were committed because they had been found incompetent to stand trial; 17% were civilly committed; and 6% were classified as mentally disordered offenders. Thus, a significant majority of individuals with serious mental illness institutionalized at Napa State Hospital were there because of contact with the criminal justice system.

The Department of State Hospitals does not disaggregate publicly available data about patients by county of origin nor does it disaggregate detailed demographic data about patients by hospital. Nonetheless, some system-wide information is useful. Across California, those institutionalized in state hospitals are disproportionately male (87%), Black (25%), and have low levels of educational attainment (79% lack a high school diploma). This data is consistent with the fact that the criminal justice system is the primary gateway into the state hospital system. Four-point-three percent (4.3%) of all residents of state hospitals and participants in jail-based mental health treatment statewide are from Santa Clara County. The most common diagnosis for patients is schizophrenia (40%) followed by schizoaffective disorder (24%). Interventions, like those offered through the Santa Clara County Behavioral Health Services' Criminal Justice Services program that target non-punitive services to children and transition-age youth, in overpoliced, disproportionately Latinx and Black communities could advance efforts to reduce the institutionalization of persons with serious mental illness in state hospitals, jails, and prisons.

Santa Clara County Behavioral Health Services Department is responsible for coordinating the provision of supportive services for persons with serious mental illness in Santa Clara County and the cities of Cupertino, Gilroy, Mountain View, Palo Alto, San José, Santa Clara, and Sunnyvale. Though the agency provides or coordinates the provision of needed services and housing in integrated settings, it also assists three institutions for mental disease, two of which are located in San José and one of which is located outside of the county in Santa Cruz. Institutions for mental diseases are more segregated settings than alternatives such as supportive housing.

Options for Accessing Affordable Housing and Support Services. The primary source of affordable housing available to persons with disabilities in Santa Clara County and its cities consists of supportive housing units built with the assistance of Housing Bond funds and a \$40 million investment from the Board of Supervisors to provide a preference for people with an intellectual or developmental disability. The Board has set a goal of building at least 4,800 affordable and supportive housing units through the use of \$800M of the \$950M Housing Bond. Of these 600 units are meant to be for ELI households with special needs. Over time, the County has updated its notice of funding availability to better align with community integration goals by setting a target of 25% supportive housing in funded developments.

Additionally, the SCCHA has multiple waiting list preferences that have the effect of increasing access to affordable housing for persons with disabilities. These include its Chronically Homeless Direct Referral Program, Special Needs Population Direct Referral Program, Veterans Affairs Supportive Housing Program, and Mainstream Voucher Program. These programs likely contribute to the higher levels of access that persons with disabilities have to the Housing Choice Voucher program in Santa Clara County and its cities than they do to other publicly supported housing programs.

Disparities in Access to Opportunity.

Government services and facilities. This Assessment did not reveal specific evidence of inaccessible government facilities in Santa Clara County, including the facilities of the County government, the cities participating in the Urban County, and the Cities of Cupertino, Gilroy, Mountain View, Palo Alto, San José, Santa Clara, and Sunnyvale. The County has a coordinator of programs for people who are disabled to accommodate those requiring an auxiliary aid or service for effective communication, or a modification of policies or procedures to participate in a program, service or activity. The coordinator also handles complaints that a program, service or activity is not accessible to persons with disabilities. The County does not charge individuals with disabilities to cover the cost of providing auxiliary aids and services or reasonable policy modifications.

To ascertain the extent of inaccessible government facilities, this Assessment included research into litigation against local governments brought under the Americans with Disabilities Act and conversations with disability advocates who might be aware of inaccessible facilities. One issue this Assessment did uncover, however, is that, when various local governments utilize external stakeholders' or partners' venues or meeting spaces, those locations are not always accessible. Advocates noted particular examples of this in the City of San José's public outreach efforts. Local governments should carefully weigh accessibility concerns alongside their interest in increasing community engagement by meeting residents where they are. Ensuring that there are concurrent engagement opportunities that are accessible to persons with disabilities may not be sufficient as that could create the perception that there is a "separate but equal" process for persons with disabilities. This Assessment did not reveal evidence of inaccessible government services.

The COVID-19 pandemic has changed how people interact with local government agencies. Many physical office locations have been closed or have operated at reduced hours, and virtual public meetings have become common. For persons with disabilities who have historically faced access barriers to attendance at in-person public hearings or to going to appointments at government offices, virtual options have been extremely helpful. On the other hand, for persons with disabilities with limited access to technology (due to the documented income disparities between persons with disabilities and people who do not have disabilities) or who are better able to communicate face-to-face, the pandemic has presented challenges. Local governments that preserve virtual options, while restoring in-person options, are positioned to accommodate a diversity of residents, including the disability-related needs of residents.

Public infrastructure (e.g., sidewalks, pedestrian crossings, pedestrian signals). In general, this Assessment did not reveal evidence of inaccessible public infrastructure though there remain places without curb cuts, pedestrian crossings, and pedestrian signals and where cities install such accessibility features through a demand-response model. Community members in Gilroy raised concerns about a relative lack of sidewalks and poorly maintained sidewalks in the heavily Latinx eastern portion of the city. Such

deficits have accessibility implications even in the absence of a specific violation of the Americans with Disabilities Act.

Transportation. The Valley Transportation Authority (VTA) and Caltrain are the primary public transportation providers across Santa Clara County. Although these providers have been the subject of Americans with Disabilities Act litigation, there have not been recent findings of systemic accessibility problems. In fact, in a 2016 decision in *Lee v. Santa Clara Valley Transportation Authority*, the U.S. District Court for the Northern District of California granted summary judgment to the VTA in a case in which a passenger using a wheelchair was injured due to bus driver error in the deployment of a wheelchair ramp due to undisputed evidence that, including in the plaintiff's experience, VTA buses are equipped with working ramps and operators deploy them correctly. The VTA appears to have robust accessibility policies in place.⁶

Proficient schools and educational programs. Children with disabilities face barriers in their attempts to access proficient schools throughout much of Santa Clara County. As discussed in the Disparities in Access to Opportunity section of this Assessment, school proficiency is generally higher in the West Valley, including in Urban County cities like Los Altos, Los Gatos, and Saratoga as well as in Cupertino. Additionally in the cities of Mountain View, Santa Clara, and Sunnyvale, school proficiency is generally higher in the southern portions of those cities, the areas in closer proximity to West Valley cities. These areas that have the most proficient schools also have, as discussed above, relatively lower concentrations of persons with disabilities, in general, and children with disabilities, in particular. Thus, children with disabilities, who are concentrated in the city of San José and the northern portions of cities to the northwest of San José, have somewhat lower access to proficient schools due to geographic patterns of inequity in education.

In addition to the patterns discussed above, disparities in school discipline can impede access to education for students with disabilities. According to data from the California Department of Education, the suspension rate for students with disabilities in Santa Clara County was 6.2% for the 2018-2019 school year, a figure close to that of the statewide percentage of 6.4%. For students who do not have disabilities, the rate was 2.0%, more significantly below the statewide rate of 3.0%. The Department of Education's DataQuest tool does not allow for a district-specific analysis of these disparity rates, but it does show overall district suspension rates. Suspension rates are notably higher in South County, including in the Gilroy Unified (4.8%) and Morgan Hill Unified (5.1%) school districts, than in the remainder of the county. Suspension rates in San José (2.7%), which has the highest concentration of children with disabilities, are slightly higher than countywide. In general, the districts with the most proficient schools and the lowest concentrations of children with disabilities have the lowest suspension rates.

Jobs. Persons with disabilities in Santa Clara County face severely constrained access to employment. The data in the table below is not available through the American Community Survey for the cities of Cupertino, Gilroy, Mountain View, and Palo Alto, but the stark consistency of data showing extremely low rates of employment and labor force

⁶ <https://www.vta.org/go/accessibility>

participation for persons with disabilities in the region, Santa Clara County, and the larger cities of San José, Santa Clara, and Sunnyvale suggest that it is likely that persons with disabilities in the county’s smaller cities experience similar constraints on access to employment. It should be noted that the table below includes elderly individuals in the population assessed. That may make this data seem more dramatic than it truly is, but low levels of access to employment are an omnipresent fact nonetheless.

Table D.7: Civilian Noninstitutionalized Population with Disabilities Aged 16 and Over, Employment and Disability

Jurisdiction	% in Labor Force	% Employed
San José	24.7%	21.5%
Santa Clara	23.9%	20.8%
Sunnyvale	24.9%	22.9%
Santa Clara County	24.4%	21.4%
San José-Sunnyvale, Santa Clara, CA Region	24.5%	21.5%

Source : 2013-2017 ACS 5-year Estimates

The table below corroborates this trend, showing low levels of employment for persons with developmental disabilities who receive services through the San Andreas Regional Center. The San Andreas Regional Center appears to slightly lag statewide averages with respect to the percentage of individuals with earned income but part of that gap may result from a lower proportion of individuals working in segregated settings like sheltered workshops.

Table D.8: 2016 Employment Metrics for Adults with Intellectual and Developmental Disabilities, San Andreas Regional Center

Regional Center	Percentage of Adults Earning Below Minimum Wage	Percentage of Consumers with Earned Income	Percentage of Adults with a Paid Job in a Community-Based Setting	Percentage of Adults with Integrated Employment As a Goal in Their Individual Program Plan	Percentage of Adults Current Unemployed But Wanting a Job in the Community
State Average	57%	14.2%	13%	27%	45%
San Andreas Regional Center	54%	11.3%	13%	23%	45%

Source: San Andreas Regional Center 2016 Performance Report.

Government services and facilities. Local government websites generally include readily identifiable accessibility pages that provide key information regarding website accessibility and the process for requests related to that subject. The websites typically do not have easily identifiable resources regarding how to submit a reasonable accommodation more broadly.

Public infrastructure (e.g., sidewalks, pedestrian crossings, pedestrian signals). The City of San José has a readily identifiable online tool on its website for requesting accessibility improvements such as curb cuts. The City appears to be an outlier in this respect. Other cities should improve the accessibility of their infrastructure by incorporating such features into their websites.

Transportation. The VTA has a clear, dedicated page that describes its reasonable accommodations process. The VTA's policy appears to be consistent with legal requirements and best practices.

Proficient schools and educational programs. School district websites generally do not have information about how to request a reasonable accommodation or the districts' policies regarding the evaluation of requests. School districts typically do have information about special education services and the process for identification of students as students with disabilities needing such services. This still leaves a gap with respect to students who simultaneously have disabilities, such as mobility impairments, but may not require ongoing special education services. School districts should add content describing their reasonable accommodation policies to their websites.

Jobs. It is generally very difficult to find information online regarding employers' reasonable accommodation policies and practices.

Disproportionate Housing Needs. Due to significant disparities in income for persons with disabilities and the high cost of housing in Santa Clara County, it is extremely difficult for persons with disabilities to access homeownership. Additionally, service providers and advocates working with persons with disabilities have reported that some mortgage lenders do not appropriately count income from disability benefits as income for purposes of evaluating loan applications.

In Santa Clara County, households including persons with disabilities encounter housing problems at slightly higher rates than do households that do not include persons with disabilities. Overall, 40.3% of households experience one or more housing problems. Households including persons with disabilities experience housing problems at a rate of 48.8%. It is likely that this relatively modest disparity obscures deeper problems as many elderly persons with disabilities may own their own homes, which may be paid off in some cases. Younger persons with disabilities who are more likely to rent and who are less likely to have had substantial income from employment at any point in their lives likely experience much more extensive housing problems. Disproportionate housing needs appear to persist across types of disabilities.

Please see section X.5, Contributing Factors Appendix, for further discussion of the following Contributing Factors to Disability and Access. Please see section X.4 for more details on the proposed goals and actions to address these contributing factors.

- Access for persons with disabilities to proficient schools
- Access to publicly supported housing for persons with disabilities
- Access to transportation for persons with disabilities
- Inaccessible public or private infrastructure
- Lack of access to opportunity due to high housing costs
- Lack of affordable, accessible housing in range of unit sizes
- Lack of affordable in-home or community-based supportive services;
- Lack of affordable, integrated housing for individuals who need supportive services
- Lack of assistance for transitioning from institutional settings to integrated housing;
- Lack of local or regional cooperation
- Land use and zoning laws
- Lending discrimination
- Location of accessible housing
- Loss of Affordable Housing
- Occupancy codes and restrictions
- Regulatory barriers to providing housing and supportive services for persons with disabilities
- Source of income discrimination
- State or local laws, policies, or practices that discourage or prohibit individuals with
- Disabilities from living in apartments, family homes, supportive housing, shared housing and other integrated settings

Part E: Fair Housing Enforcement, Outreach Capacity and Resources

Affirmatively Furthering Fair Housing

“**Affirmatively furthering fair housing**” means taking meaningful actions, in addition to combating discrimination, that overcome patterns of segregation and foster inclusive communities free from barriers that restrict access to opportunity based on protected characteristics. Specifically, affirmatively furthering fair housing means taking meaningful actions that, taken together, address significant disparities in housing needs and in access to opportunity, replacing segregated living patterns with truly integrated and balanced living patterns, transforming racially and ethnically concentrated areas of poverty into areas of opportunity, and fostering and maintaining compliance with civil rights and fair housing laws. The duty to affirmatively further fair housing extends to all of a public agency’s activities and programs relating to housing and community development. (Gov. Code, § 8899.50, subd. (a)(1).)”

Source: California Department of Housing and Community Development Guidance, 2021, page 14.

Primary findings.

- Between 2013 and 2022, fair housing inquiries were highest in Palo Alto, Sunnyvale, and Saratoga. During this time, there were very few fair housing causes in Santa Clara County and unincorporated areas.

List and summarize any of the following that have not been resolved:

- A charge or letter of finding from HUD concerning a violation of a civil rights-related law;
- A cause determination from a substantially equivalent state or local fair housing agency concerning a violation of a state or local fair housing law;
- Any voluntary compliance agreements, conciliation agreements, or settlement agreements entered into with HUD or the Department of Justice;
- A letter of findings issued by or lawsuit filed or joined by the Department of Justice alleging a pattern or practice or systemic violation of a fair housing or civil rights law;
- A claim under the False Claims Act related to fair housing, nondiscrimination, or civil rights generally, including an alleged failure to affirmatively further fair housing;
- Pending administrative complaints or lawsuits against the locality alleging fair housing violations or discrimination.

Cole v. County of Santa Clara

This lawsuit regarding discrimination against individuals with mobility disabilities incarcerated in Santa Clara County’s Main Jail North, Main Jail South, and Elmwood Correctional Facility was resolved via a consent decree in 2016. The County adopted the

Maps E.3 and E.4 show FHEO inquiries by city in Santa Clara County and the Region. Fair housing inquiries are less common for the county: between 2013 and 2022, Palo Alto, Sunnyvale, and Saratoga were the only cities with residents inquiring about housing discrimination. Conversely, FHEO inquiries are much more prominent across the Region than fair housing cases.

State and Local Fair Housing Law Protection Characteristics

California Laws. The State Department of Fair Employment and Housing (DFEH) enforces California laws that provide protection and monetary relief to victims of unlawful housing practices. The Fair Employment and Housing Act (FEHA) (Government Code Section 12955 et seq.) prohibits discrimination and harassment in housing practices, including:

- Advertising
- Application and selection process
- Unlawful evictions
- Terms and conditions of tenancy
- Privileges of occupancy
- Mortgage loans and insurance
- Public and private land use practices
- Unlawful restrictive covenants

The following categories are protected by FEHA:

- Race or color
- Ancestry or national origin
- Sex, including Gender, Gender Identity, and Gender Expression
- Marital status
- Source of income
- Sexual orientation
- Familial status (households with children under 18 years of age)
- Religion
- Mental/physical disability
- Medical condition
- Age
- Genetic information
- Military or veteran status

In addition, FEHA contains similar reasonable accommodations, reasonable modifications, and accessibility provisions as the Federal Fair Housing Amendments Act. FEHA explicitly provides that violations can be proven through evidence of the unjustified disparate impact of challenged actions and inactions and establishes the burden-shifting framework that courts and DFEH must use in evaluating disparate impact claims.

In 2018, the California Legislature passed A.B. 686, which incorporated a duty to affirmatively further fair housing into state law. A.B. 686 requires municipalities in California to incorporate an Assessment of Fair Housing component into their Housing Elements. The law also imposes a substantive obligation to affirmatively further fair housing on a broader range of public entities – including public housing authorities. The law defines what it means to affirmatively further fair housing consistently with HUD’s 2015 Affirmatively Furthering Fair Housing rule.

The Unruh Civil Rights Act provides protection from discrimination by all business establishments in California, including housing and accommodations, because of age, ancestry, color, disability, national origin, race, religion, sex, and sexual orientation. While the Unruh Civil Rights Act specifically lists “sex, race, color, religion, ancestry, national origin, disability, and medical condition” as protected classes, the California Supreme Court has held that protections under the Unruh Act are not necessarily restricted to these characteristics. In practice, this has meant that the law protects against arbitrary discrimination, including discrimination on the basis of personal appearance.

Furthermore, the Ralph Civil Rights Act (California Civil Code Section 51.7) forbids acts of violence or threats of violence because of a person’s race, color, religion, ancestry, national origin, age, disability, sex, sexual orientation, political affiliation, or position in a labor dispute. Hate violence can include verbal or written threats; physical assault or attempted assault; and graffiti, vandalism, or property damage.

The Bane Civil Rights Act (California Civil Code Section 52.1) provides another layer of protection for fair housing choice by protecting all people in California from interference by force or threat of force with an individual’s constitutional or statutory rights, including a right to equal access to housing. The Bane Act also includes criminal penalties for hate crimes; however, convictions under the Act may not be imposed for speech alone unless that speech itself threatened violence.

Finally, California Civil Code Section 1940.3 prohibits landlords from questioning potential residents about their immigration or citizenship status. In addition, this law forbids local jurisdictions from passing laws that direct landlords to make inquiries about a person’s citizenship or immigration status.

In addition to these acts, Government Code Sections 11135, 65008, and 65580-65589.8 prohibit discrimination in programs funded by the State and in any land use decisions. Specifically, changes to Sections 65580-65589.8 require local jurisdictions to address the provision of housing options for special needs groups, including:

- Housing for persons with disabilities (SB 520)
- Housing for homeless persons, including emergency shelters, transitional housing, and supportive housing (SB 2)
- Housing for extremely low-income households, including single-room occupancy units (AB 2634)
- Housing for persons with developmental disabilities (SB 812)

Although the FEHA purports to protect against source of income discrimination, the provision has been largely toothless. In October of 2019, the governor of California signed into law SB 329, prohibiting discrimination in housing based on source of income statewide.

Compliance with fair housing law. Some examples of Santa Clara County’s compliance with federal and state fair housing laws include:

- **Fair Housing Act**, prohibiting housing discrimination on the basis of protected classes: race and ethnicity, national origin, religion, disability, familial status, and sex (including gender identity and sexual orientation).
- **Fair Employment and Housing Act**, protecting individuals from housing and employment discrimination and harassment on the basis of protected characteristics.⁷
- **Housing Opportunities Act (SB 329)**, adding tenant-based housing assistance to California’s existing protections against discrimination based on source of income.
- **California Code of Regulations §12176**, establishing the refusal to grant reasonable accommodations in rules, policies, practices, and services as a discriminatory housing practice.
- **Assembly Bill 1482 (AB 1482)**, limiting rent increases and just cause eviction requirements for tenants, including those using rental assistance.
- **Senate Bill 9 (SB 9)**, allowing single family home parcels to remodel or redevelop with a duplex and up to two Accessory Dwelling Units (ADUs).

Local housing policies. Santa Clara County has made meaningful progress in furthering fair housing through several policies and programs. Please refer to Chapter 4 of the County Housing Element for details on the related programs being implemented during the 2023-2031 planning period.

Local housing programs. Santa Clara County voters approved Measure A in November 2016. Measure A established the \$950 million affordable housing bond to provide the County with an opportunity to partner with cities, residents, and the affordable and supportive housing community to address the housing needs of the county’s most vulnerable residents. The Housing Bond will further the County’s progress in achieving its housing priorities, including:⁸

- Increasing the scope and breadth of supportive housing for special needs populations, including homeless and chronically homeless persons;
- Increasing the supply of housing that is affordable to extremely low-income households; and
- Improving coordination and collaboration among the County, cities, other governmental agencies, and the affordable housing community.

The County of Santa Clara and its partners have moved to effectively utilize bond funds which are projected to fund 120 new affordable housing developments over the next ten years, including 4,800 new units dedicated to extremely low-income households, families exiting homelessness, and other underserved populations. **The County is on track to meet its housing goal: since 2016, the County of Santa Clara has approved 4,262 new affordable units for special needs** groups including permanent supportive housing

⁷ California law protects the following characteristics from housing discrimination: race (including hair texture and style); color; ancestry; religion; sex and gender; sexual orientation; sexual harassment; gender identity and expression; national origin; source of income; marital status; familial status; disability; medical condition; veteran status; genetic information; primary language; immigration status; age; and citizenship.

⁸ <https://osh.sccgov.org/housing-community-development/2016-measure-affordable-housing-bond>.

(PSH) units, rapid re-housing units, and affordable units for extremely low to very low-income households.⁹

Santa Clara County established a new development process to give the community the opportunity to partner with the county to develop affordable housing: in 2019, the county's Office of Supportive Housing issued a request for Qualifications to create a pool of prequalified affordable housing developers to respond to solicitations to develop affordable housing on County-owned land. The Developer Qualified Pool (DQP) consists of 16 experienced developers that are aligned with the county's goals of increasing affordable housing for vulnerable residents. Developers were selected to develop the following sites with affordable housing:¹⁰

- Grant Avenue, Palo Alto. With Mercy Housing and Abode Communities, Santa Clara County is developing 110 affordable rental workforce apartments for teachers, school employees, and their families.
- Mitchell Park, Palo Alto. With Eden Housing, the Office of Supportive Housing is developing 50 affordable rental apartments including 25 apartments for individuals with intellectual and or developmental disabilities and their families.
- The Hub, San Jose. With Allied Housing, the county is developing affordable rental apartments (81 housing units) for transition aged youth and a youth-led community center dedicated to supporting current and former foster youth.
- Distel Circle, Los Altos. With EAH Housing, the county is working to develop affordable rental apartments for a total of 90 housing units.
- East Santa Clara, San Jose. Working with Eden Housing and The Core Companies, the county plans to develop new affordable housing in accordance with the East Santa Clara Master Plan.

The County of Santa Clara has incorporated a source of income ordinance into its Ordinance Code.¹¹

Local and regional fair housing agencies and organizations. During the pandemic, some of the following organizations have expanded their services to include COVID-19 specific services, including counseling and advice to tenants who face small claims actions for back rent that remains unpaid.

Affordable Housing Network of Santa Clara County

The Affordable Housing Network of Santa Clara County is a nonprofit organization dedicated to preserving and expanding the supply of affordable housing through education, empowerment, coordination, and support. Its activities include educating and organizing the general public and public officials about the need for affordable housing, and empowering low-income people to advocate for their housing needs.

Amigos de Guadalupe

⁹ [Santa Clara County, 2016 Affordable Housing Bond Progress.](#)

¹⁰ [https://osh.sccgov.org/housing-community-development/county-led-projects.](https://osh.sccgov.org/housing-community-development/county-led-projects)

¹¹ County of Santa Clara Ordinance Code Section B37-2(e).

Amigos de Guadalupe is a nonprofit organization focused specifically on serving the Mayfair community in San José. Their housing resources include housing coaching sessions, one-time security deposit assistance, temporary “Winter Faith Collaborative” shelter, and case management.

Asian Law Alliance

The Asian law Alliance provides services at a free or low-cost basis to low-income people, and offers services in Mandarin, Cantonese, Spanish, Vietnamese, Tagalog, Korean, and other languages as needed. In the housing realm, their mission is to ensure access to decent housing, and prevent and combat against illegal and discriminatory housing practices.

Bay Area Legal Aid

Bay Area Legal Aid (Bay Legal) represents low and very low-income residents within their seven-county service area, which includes Santa Clara County. Their housing practice provides legal assistance regarding public, subsidized (including Section 8 and other HUD subsidized projects) and private housing, fair housing and housing discrimination, housing conditions, rent control, eviction defense, lock-outs and utility shut-offs, residential hotels, and training advocates and community organizations. It’s important to note that Legal Aid is restricted from representing undocumented clients.

Community Legal Services in East Palo Alto (CLESPA)

CLESPA is a nonprofit that offers free legal services to low-income residents in housing, immigration, workers’ rights, consumer protection, and records clearance. CLESPA serves residents in Mountain View.

County Disaster Service Workers (County DSWs)

County DSWs assist tenants and landlords provide help to tenants and landlords impacted by the pandemic. They provide assistance with emergency rental assistance applications to the State’s Housing is Key program. They also connect parties to other resources to help stabilize tenants’ housing and mediation and legal services to help resolve disputes and preserve tenancies.

Department of Fair Employment and Housing (DFEH)

DFEH is a state agency dedicated to enforcing California’s civil rights laws. Its mission targets unlawful discrimination in employment, housing and public accommodations, hate violence, and human trafficking. Victims of discrimination can submit complaints directly to the department.

Eviction Help Centers, Cities of Mountain View and San José

Eviction Help Centers in Mountain View and San José provide help to tenants and landlords impacted by the pandemic. They provide assistance with emergency rental assistance applications to the State’s Housing is Key program. They also connect parties to other resources to help stabilize tenants’ housing and mediation and legal services to help resolve disputes and preserve tenancies.

Law Foundation of Silicon Valley

The Law Foundation of Silicon Valley provides free legal advice and representation to low-income individuals in Santa Clara County. In their housing practice, they assist with defending eviction lawsuits, housing discrimination issues such as reasonable accommodation requests for individuals with disabilities, enforcing the San José Tenant Protection Ordinance, legal outreach and support for renter organizing/campaigns, help with SCCHA hearings, Section 8 and other low-income housing issues like terminations and eligibility determinations, legal advice and information to tenants regarding notices, and advice and information about foreclosure prevention.

Project Sentinel

Project Sentinel is a nonprofit organization focused on assisting in housing discrimination matters, dispute resolution, and housing counseling. Project Sentinel’s housing practice assists individuals with housing problems such as discrimination, mortgage foreclosure and delinquency, rental issues including repairs, deposits, privacy, dispute resolution, home buyer education, post purchase education, and reverse mortgages. Additionally, their Fair Housing Center provides education and counseling to community members, housing providers, and tenants about fair housing laws, and investigate complaints and advocate for those who have experienced housing discrimination.

Senior Adults Legal Assistance

Senior Adults Legal Assistance (SALA) is a nonprofit elder law office, providing free legal services to residents of Santa Clara County who are age 60 and older. SALA provides legal services across multiple, non-housing contexts, and in the housing context SALA provides legal assistance in landlord-tenant matters, subsidized/senior housing matters, and mobile home residency matters.

Silicon Valley Renters Rights Coalition + Latinos United for a New America (LUNA)

These two groups have been working together to advocate for renters’ rights and to move leadership to pass a Just Cause policy that will protect renters from unjust rent hikes.

Please see section X.5, Contributing Factors Appendix, for further discussion of the following Contributing Factors to Fair Housing Enforcement, Outreach and Resources. Please see section X.4 for more details on the proposed goals and actions to address these contributing factors.

- Lack of local private fair housing outreach and enforcement
- Lack of local public fair housing enforcement
- Lack of resources for fair housing agencies and organizations
- Lack of state or local fair housing laws
- Unresolved violations of fair housing or civil rights law

X.4 Fair Housing Goals and Priorities

The following goals and strategies are proposed to address the contributing factors identified in this Assessment. These goals and strategies also further strategies in the Community Plan. Community Plan strategies that are furthered by an AFH strategy is identified in the table that follows.

Goal 1: Promote Residential Racial and Ethnic Integration and Reduce Displacement by Increasing the Supply of Affordable Housing in High Opportunity Areas, Areas with Ongoing Displacement, and Areas Where Residents Are at Risk of Displacement.

Santa Clara County’s high and rapidly rising housing costs, along with the unequal distribution of affordable housing across its communities, is the primary driver of most fair housing issues for members of protected classes in the area. Latinx residents, Vietnamese residents, and persons with disabilities experience these problems most acutely. To increase both the supply and the geographic diversity of affordable housing, multiple complementary strategies are necessary.

a. Advocate for flexible public funding that can expedite and increase affordable housing development.

Existing funding sources – federal, state, and local – are not sufficient to meet the total need for affordable housing in Santa Clara County and its cities. The problem of inadequate funding is especially challenging for development in high opportunity areas, areas with ongoing displacement, and areas that are at risk of displacement. In all of these types of areas, land acquisition costs may be high. In high opportunity areas, land use approval processes that are lengthier in practice may drive up pre-development costs while, in areas with ongoing or imminent displacement, environmental remediation costs may be an issue. The passage of the “Measure A” Housing Bond was a critical step, but more funding is necessary to address these challenges. Sources of funding that are permanent and/or flexible provide opportunities for temporary and permanent housing for persons who are unhoused and possible incentives to local jurisdictions to prioritize housing for extremely low-income households. These funding sources would help speed up and create more affordable housing, which is envisioned by the Community Plan. Advocacy for permanent and flexible funding through the State and the Bay Area Housing Finance Authority should be pursued. The County should collaborate on the implementation of this strategy with County Intergovernmental Relations, cities, the SCCHA, and other partners.

b. Expand private sector support for affordable housing.

The Community Plan states that Santa Clara County will “[e]xpand public and private sector support for ending and preventing homelessness.” One of the proposed actions in the Community Plan pertaining to that goal calls for the County to “[i]ncrease community engagement and support for affordable and supportive housing development throughout the county.” Santa Clara County is home to major corporations that have played a part in

the current housing affordability crisis and that have the potential to play a role in remediating the crisis. Commercial linkage fees are a regulatory mechanism for ensuring that the private sector funds affordable housing, but there is a role for philanthropic contributions from major employers to play, as well. The County and Destination: Home, which has already been leading on this work, should engage with the business community to increase and coordinate philanthropic support for affordable housing development. Possible support should not be limited to financial donations and may also include land donations, particularly in high opportunity areas, areas with ongoing displacement, and areas at risk of displacement. Destination: Home, in tandem with Facebook and the Local Initiatives Support Corporation, created a Community Housing Fund (CHF) seeded with \$150 million that will provide low-interest loans to affordable housing developers in Santa Clara, San Francisco, San Mateo, Alameda, and Contra Costa Counties. The CHF could be a model for future private sector support for affordable housing. To date, the CHF has closed 11 acquisition and pre-development loans, totaling \$85M to seed the creation of 1,374 new units of deeply affordable housing. In addition, grants of \$50M from both Apple and Cisco over the past three years have seeded Destination: Home's Supportive Housing and Innovation Fund, supporting over 2,000 more affordable units, while also providing flexible capital for non-profit developers to investigate new opportunities and increase their overall capacity and build their extremely low income and supportive housing pipelines.

- c. Accelerate affordable housing development by leveraging County resources, including geographic information mapping tools, and others to identify, prioritize, and develop publicly-owned sites that are suitable for development with an emphasis on parcels in high opportunity areas.**

The high cost of land is a major barrier to affordable housing development and to meaningful fair housing choice in Santa Clara County. Development of publicly-owned sites reduces the costs of and barriers to affordable housing development. The Santa Clara County Department of Planning and Development (Planning and Development) received a grant pursuant to California S.B. 2 that provides funding for geographic information system (GIS) mapping to identify and prioritize publicly-owned sites for affordable housing development. A collaboration between the County OSH, Planning and Development, and Facilities and Fleet Department will use this tool to identify publicly-owned sites for affordable housing, including in high opportunity areas, and collaborate with other partners to identify and leverage funding opportunities to accelerate affordable housing development on these sites.

- d. Support and provide technical assistance to Santa Clara County cities to help expand inclusionary housing and commercial linkage fee policies for development of affordable housing.**

Most cities in Santa Clara County have inclusionary housing ordinances. Most of these ordinances require a set-aside of 15%, but, beyond that, they vary widely regarding the income levels that they target, whether they allow off-site or in-lieu fee options, and the minimum number of units in a development to trigger coverage by the ordinance. The

County should support cities that are working to adopt inclusionary housing ordinances or amend existing ordinances that result in the creation of meaningful quantities of affordable housing for low-income families, promote racial and economic integration, and ensure long-term affordability.

With respect to commercial linkage fees, fewer cities currently have such policies than inclusionary housing policies, and the California Mitigation Fee Act limits the amount of fees in a manner that is specific to each jurisdiction. As a result, the three most important steps that jurisdictions can take are: first, to adopt commercial linkage fees where they do not exist; second, to ensure that the fees are set at a high enough proportion of the allowable fee to generate meaningful funding while not deterring development activity; and, third, to ensure that a significant portion of fee revenue is dedicated to affordable housing. Ensuring that jurisdictions are not setting fees much lower than they could reduces the risk of jurisdictions being pitted against each other in their efforts to attract commercial development.

Additionally, in 2020 the County of Santa Clara adopted an inclusionary housing ordinance that applies to developments of three or more units in all of unincorporated county including lands within the Stanford University Community Plan Area (where an existing inclusionary housing ordinance already applies). The ordinance requires that 16% of units be affordable or that developers pay an in-lieu fee. In for-sale developments, set-aside units are affordable to moderate-income households while, in rental developments, there is a mix of low-, very low-, and extremely low-income units. As it implements the ordinance, the County should proactively engage with developers to encourage the development of on-site units as opposed to payment of the in-lieu fee.

e. Facilitate the production of farmworker housing by building upon the actions outlined in the 2018 Santa Clara Valley Agricultural Plan, including through grant funding opportunities.

Farmworkers in Santa Clara County are disproportionately Latinx, but parts of the county with rural, agricultural land use tend to be disproportionately white. Facilitating the production of housing for very low-income farmworkers closer to where they work would reduce commute times, increase access to opportunity, and reduce segregation. The 2018 Santa Clara Valley Agricultural Plan included two proposed actions to advance the strategy of facilitating the production of farmworker housing. First, that plan proposed revising the Santa Clara County zoning ordinance “to streamline the establishment of farmworker housing within the” agricultural reserve area. Second, the plan proposed identifying “opportunities, including siting and funding options, for farmworker housing projects,” as well as developing “farmworker housing models” and identifying “densities that could be supported in urban and urban edge areas as well as in unincorporated rural communities.” The Joe Serna, Jr. Farmworker Housing Grant Program is one funding option that, if awarded, would enable the County to invest and develop new construction, rehabilitation, and acquisition of housing units for farmworkers.

Streamlined planning approval processes for agricultural employee housing in the unincorporated county were adopted in 2020. The approved Zoning Ordinance amendments include provisions for a variety of forms of agricultural employee housing, namely Small-Scale Permanent, Large-Scale Permanent, Seasonal, and Temporary Agricultural Residences. All four forms of agricultural employee housing are now subject to a streamlined planning approval process and available to property owners in all four rural base districts in the unincorporated county. However, during the development and implementation of this effort, the County identified opportunities for further streamlining of the regulatory requirements and permitting process for agricultural employee housing, particularly those aspects outside of the planning-specific review of development applications. On August 29, 2023, the Board of Supervisors directed County staff to prepare a workplan to put in place the steps to ensure there is agricultural employee housing to meet the needs of Santa Clara County. As the County takes steps to facilitate the production of agricultural worker housing, County staff will provide updates of this work in its annual housing element report to HCD.

f. Collaborate with cities to apply for and secure funding to implement plans to increase rental and ownership housing that is affordable for low-income households and assist persons who are experiencing homelessness.

Notices of Funding Availability (NOFAs) published by the State of California provide competitive and non-competitive opportunities for jurisdictions to obtain funding. This funding enables jurisdictions to develop a broad range of housing types and implement their plans to increase housing for low-income households and assist persons who are experiencing homelessness. Two such funding opportunities available to public entities are Homekey and Permanent Local Housing Allocation programs. Evaluating and applying for NOFAs, and administering grant funding, can burden jurisdictions with limited staff. Collaborating with cities on NOFAs, and taking on grant administration tasks where possible, will aid jurisdictions throughout the County to secure more funding to implement their plans and relieve them of related administrative tasks. This collaboration also has the potential to foster residential racial integration through the development of housing for low-income households throughout the County.

g. Help community-based organizations form or increase their activities as Community Development Corporations, with the primary goal of increasing affordable housing.

Santa Clara County has experienced significant economic growth over the past two decades. However, many residents continue to live in Racially or Ethnically Concentrated Areas of Poverty and other economically-disadvantaged neighborhoods within Santa Clara County. The high cost of housing has made individuals and families in these neighborhoods and communities especially vulnerable to displacement. Community organizations with a long-standing presence in these areas could take a more active role in affordable housing production and related development. In light of this, and subsequent

to the Board of Supervisors' approval in October 2021,¹ the County created and implemented a Community Development Corporations grant program. Round 1 funding grants totaling \$750,000 were awarded in spring 2022 to community organizations to accelerate community-drive affordable housing development in underserved communities.² If additional rounds of grant funding are made available, these funds may support organizations that are in earlier stages of undertaking affordable housing development.

¹County of Santa Clara, Board of Supervisors, January 11, 2022 meeting, agenda item 15, Consider recommendations relating the Community Development Corporation Grant Program, http://sccgov.iqm2.com/Citizens/Detail_LegiFile.aspx?Frame=&MeetingID=13790&MediaPosition=&ID=108880&CssClass=.

[Years 1-3]	County of Santa Clara Office of Supportive Housing	1(3)(D) – Advocate for flexible funding that can speed up and create more affordable housing.

Goal 2: Reduce Zoning and Land Use Barriers to Affordable Housing Development.

In several communities in Santa Clara County, the prevalence of single-family residential zoning is a barrier to building other types of housing, including apartments, townhouses, and manufactured homes. Without the ability to build these types of housing, it is often impossible to build housing that serves low-income individuals with protected characteristics. At the same time, approaches to increasing density that do not recognize contextual differences between historically exclusionary communities and ones with a history of disinvestment and redlining can destabilize low-income communities of color and contribute to displacement. Changes in state law are likely to reduce the impact of single-family residential zoning but, alone, are not sufficient to allow for large-scale affordable housing development.

a. Provide support to cities considering zoning changes in high opportunity areas to foster the development of affordable housing.

There is relatively little undeveloped land in the unincorporated areas of Santa Clara County that would be feasible for new multi-family development at urban or suburban scale, but the County can play an important role in encouraging cities within the county to undertake inclusive zoning and land use reforms. Multiple cities in the county that are located in the West Valley area have high access to certain amenities and public services, such as highly proficient public schools, but low Latinx populations. The County, through the OSH, Planning and Development, and Facilities and Fleet Department, should collaborate with cities in the county as they consider and undertake re-zoning and land use reforms, especially for County-owned parcels. This collaboration may include recommending increased high-density zoning near transit lines through affordable housing overlay districts, identifying sites for targeted rezoning as part of the Housing Element process, and eliminating regulations that increase costs without corresponding public benefit, like excessive parking requirements.

Goal 2: Reduce Zoning and Land Use Barriers to Affordable Housing Development.

<i>Goal</i>	<i>Priority</i>	<i>Strategy</i>	<i>Geographic Scope</i>	<i>Fair Housing Issues</i>	<i>Contributing Factors</i>	<i>Metrics, Milestones, Timeframe for Achievement</i>	<i>Lead Program Participant</i>	<i>Further Comm Plan to End Homelessness Goal/Strategy</i>
2.a	High	Provide support to cities considering zoning changes in high opportunity areas to foster the development of affordable housing.	Countywide	Segregation/Integration, R/ECAPs Disparities in Access to Opportunity, Disproportionate Housing Needs	Availability of affordable units in a range of sizes; Lack of access to opportunity due to high housing costs; Lack of affordable, accessible housing in a range of unit sizes; Lack of affordable, integrated housing for individuals who need supportive services; Lack of local or regional cooperation; Land use and zoning laws; Location of accessible housing; Location and type of affordable housing;	Total land area proposed for rezoning to allow multifamily housing in Urban County cities; Number of cities receiving technical assistance; Outreach to Urban County cities, provision of technical assistance, introduction of proposed rezoning and/or zoning text amendment proposals, and passage of proposals. [Years 1-5]	County of Santa Clara Office of Supportive Housing, Facilities and Fleet Department, and Department of Planning and Development; Cities	1(3)(A) - Work with cities to change local land use and housing policy to allow for development of more affordable housing and help reverse housing disparities that have negatively impacted people of color.

Goal 3: Protect Tenants from Displacement by Increasing Tenant Protection and Housing Preservation Strategies and Access to Resources Before and During Eviction Proceedings.

Evictions and significant rent increases in low-income communities of color contribute to the displacement of protected class members, in general, and Latinx and Vietnamese residents and persons with disabilities, in particular. Tenant protections provided through the Tenant Protection Act of 2019 (A.B. 1482) were instituted to help reduce excessive rent increases and evictions by creating a rent ceiling and requiring that landlords state the (good) reasons before evicting tenants. Local rent control measures, authorized under the Costa-Hawkins Rental Housing Act, can help by expanding tenant protections in jurisdictions. As important as these protections are, tenants must be aware of and have advocates to help them enforce their rights. Tenant protections and awareness of these protections have been paramount during the pandemic, with an estimated 43,000 households at risk of eviction.

a. Explore expanding funding for tenants in landlord-tenant proceedings.

Tenant protections are more effective in preventing displacement when tenants have access to legal services. The County and other jurisdictions in Santa Clara County should explore collaborating to expand funding for tenant representation and the capacity of legal services organizations to meet the full need in landlord-tenant proceedings. An important first step in advancing this strategy would be to assess the current levels of legal services provided to vulnerable tenants and how jurisdictions may better coordinate their programs to avoid duplication of services to meet community needs. This strategy will require upfront study, but this investment may improve existing programs and help avoid unnecessary evictions and reduce displacement, and a variety of social costs and strain on other public services. The potential for mass evictions, displacement, and homelessness caused by the COVID-19 pandemic, and immediate efforts to supplement existing legal services and other assistance to prevent these outcomes, has elevated the need to explore existing program improvements and expanded funding for these legal services beyond the pandemic. A future source to explore funding strategies may include the Bay Area Housing Finance Authority.

b. Support education for tenants, landlords, and other housing providers regarding tenants' rights laws.

In addition to the enforcement of tenants' rights, education for tenants, landlords, and housing providers is also essential. If tenants are unaware of their rights and of how to enforce them, aspirational laws are unlikely to have their intended effect. Ensuring that landlords and housing providers understand their obligations can reduce the cost of funding enforcement by reducing noncompliance, which is grounded in a lack of understanding of the law. Often, trade associations of housing providers offer educational resources about updates in the law to their members, and this training can be incredibly valuable. At the same time, there is also value in ensuring that housing providers and advocates for tenants are communicating with each other to ensure that, to the extent

possible, they have a shared understanding of what the law requires. Jurisdictions should build upon existing support for efforts by legal services and other community-based organizations to engage with tenants and housing providers to provide education and training regarding legal requirements like those of A.B. 1482, tenant protections enacted during the pandemic, and prohibition on discrimination against Housing Choice Voucher holders, like the County's Source of Income Ordinance.

c. Facilitate discussion of tenant protection strategies among cities.

Cities may consider a range of strategies – including but not limited to rent control, just cause eviction protections, and landlord-tenant mediation requirements – to prevent the displacement of low-income tenants, who are disproportionately Latinx. These policies may be less applicable in unincorporated Santa Clara County because of the lack of rental housing in these areas, generally, and applicability of rent control measures permitted by the Costa-Hawkins Act. Nonetheless, as the convener of the Housing/CDBG Coordinators Group, which includes staff from all cities in Santa Clara County, the County can play a critical role in facilitating the sharing of model policies, best practices for implementation, and other peer learning regarding tenant protections.

d. Track and collaborate to preserve affordable housing developments with expiring subsidy contracts countywide.

Owners of affordable housing developments located in higher opportunity areas or in areas that are experiencing rapid gentrification often have the greatest incentive not to renew subsidy contracts. This is because rents in these areas may exceed payment standards for affordable housing developments, which are based on the regional fair market rent. At the same time, it is generally more cost-effective to preserve existing affordable housing than it is to build new affordable housing, particularly in areas with high land costs. Accordingly, working in tandem with cities and SCCHA, Santa Clara County should track the expiration dates of affordable housing subsidy contracts with an emphasis on developments that are located in higher opportunity or rapidly gentrifying areas. When developments with expiring subsidies are identified, the County should collaborate with these partners to engage in early outreach to and work with owners to encourage preservation of these units.

e. Collaborate with Santa Clara County Superior Court and other partners to facilitate access to resources for vulnerable tenants engaged in eviction proceedings.

Prior to the pandemic, residential unlawful detainer (eviction lawsuit) cases alleging non-payment of rent and lease violations typically exceeded 200 per month in Santa Clara County. Unlawful detainer cases substantially declined during the pandemic as a result of state and local government actions that barred evictions to prevent further public health crises. However, cases are on the rise as expiration of these state law protections near. A robust network of partners through the County's Homelessness Prevention System has long aided vulnerable tenants in eviction proceedings with rental, legal, and other

resources to help them remain in place or transition to other housing opportunities. Tenants facing eviction typically reach out to request these services outside of an eviction proceeding. Pairing these resources with alternative dispute resolution services through a Court-administered program will help partners to this collaboration reach additional vulnerable tenants and work to keep them housed.

Goal 3: Protect Tenants from Displacement by Increasing Tenant Protection and Housing Preservation Strategies and Access to Resources Before and During Eviction Proceedings.

Goal	Priority	Strategy	Geographic Scope	Fair Housing Issues	Contributing Factors	Metrics, Milestones, Timeframe for Achievement	Lead Program Participant	Further Comm Plan to End Homelessness Goal/Strategy
3.a	High	Explore expanding funding for tenants in landlord-tenant proceedings.	Countywide	Segregation/Integration; Disproportionate Housing Needs; Disparities in Access to Opportunity	Displacement of residents due to economic pressures	Documented consideration and analysis of potential funding strategies and sources; Increased funding made available. [Years 1-5]	County of Santa Clara Office of Supportive Housing	1(4)(C) - Provide legal assistance to ensure that individuals and families most severely impacted by the lack of affordable housing, namely people of color, have equal access to housing.
3.b	High	Support education for tenants, landlords, and other housing providers regarding tenants' rights laws.	Countywide	Segregation/Integration; Disproportionate Housing Needs; Disparities in Access to Opportunity	Displacement of residents due to economic pressures	Documented consideration and analysis of potential funding strategies and sources; Increased funding made available. [Years 1-5]	County of Santa Clara Office of Supportive Housing	1(4) - Protect residents from evictions, displacement, and housing discrimination.
3.c	Medium	Facilitate discussion of tenant protection strategies among cities.	Countywide	Segregation/Integration; Disproportionate Housing Needs; Disparities in Access to Opportunity	Displacement of residents due to economic pressures; Loss of affordable housing; Private discrimination	Inclusion of issues related to tenant protections on CDBG/Housing Coordinators Group agendas. [Years 1-5]	County of Santa Clara Office of Supportive Housing	1(4)(B) - Strengthen local rent control and tenant protections.
3.d	Medium	Track and collaborate to preserve affordable housing developments with expiring subsidy contracts countywide.	Countywide	Segregation/Integration; Disproportionate Housing Needs; Disparities in Access to Opportunity	Displacement of residents due to economic pressures; Loss of affordable housing	Deeper understanding of partners' roles and resources to preserve housing; Documented tracking of expiring subsidies in the Annual Action Plan; Documented outreach to development owners; Subsidy contracts renewed. [Years 3-5]	County of Santa Clara Office of Supportive Housing; Cities; Santa Clara County Housing Authority	1(4) Protect residents from evictions, displacement, and housing discrimination.

**Assessment of Fair Housing
County of Santa Clara Housing Element Update (2023-2031)**

<i>Goal</i>	<i>Priority</i>	<i>Strategy</i>	<i>Geographic Scope</i>	<i>Fair Housing Issues</i>	<i>Contributing Factors</i>	<i>Metrics, Milestones, Timeframe for Achievement</i>	<i>Lead Program Participant</i>	<i>Further Comm Plan to End Homelessness Goal/Strategy</i>
3.e	High	Collaborate with Santa Clara County Superior Court and other partners to facilitate access to resources for vulnerable tenants engaged in eviction proceedings.	Local	Segregation/Integration; Disproportionate Housing Needs; Disparities in Access to Opportunity	Displacement of residents due to economic pressures; Private discrimination	Development of diversion workshops to prevent eviction in unlawful detainer proceedings; Implementation of eviction diversion workshops. [Years 1-5]	County of Santa Clara Office of Supportive Housing	1(4) - Protect residents from evictions, displacement, and housing discrimination.

Goal 4: Increase Access to Opportunity for Residents of Historically Disinvested Low-Income Communities of Color.

In Santa Clara County, some areas of concentrated Latinx and Vietnamese populations have disproportionately low access to healthful environmental conditions and proficient schools. In particular, these areas include much of the city of San José, particularly its east side; the northern or northeastern portions of the cities of Mountain View, Santa Clara, and Sunnyvale; and South County, like the city of Gilroy. Although members of protected classes generally do not have less access to public transportation services than do others, they may have less access relative to their transit needs. This, in turn, can exacerbate disparities in employment and increase housing cost burden. The OSH has led in coordinating jurisdictions' participation in this Assessment to better understand the needs in and identify opportunities to collaborate with cities, SCCHA, and other partners to improve access. The strategies in support of this goal relate to attempts to directly increase access to opportunity by bringing services and amenities to people where they currently live, and they complement other Countywide efforts. Strategies identified in support of the first and second goals in this Assessment – which focus on increasing affordable housing in higher opportunity areas – are also crucial components of a holistic approach to reducing disparities in access to opportunity.

a. Increase the number of free public transit passes and other transportation options for people who are unhoused to access services.

Transportation barriers for members of protected classes increase with rising displacement and policies and practices that push people who are unhoused, or at-risk for becoming unhoused, out of more central areas. Data shows that Black residents, in particular, are significantly overrepresented among the unhoused population. Providing a greater number of free public transit passes would both directly reduce racial disparities and could serve as a replicable model for subsequent expansions of free services to a greater number of people.

b. Study increasing access to services in South County.

Across a range of types of supportive and legal services, South County, particularly its rural portions outside of Gilroy and Morgan Hill, has less access than the northern portions of Santa Clara County. These gaps often mean that low-income people with limited transportation budgets must travel to San José or even more distant places to access help. Recognizing these limits, County and community partners have mobilized during the pandemic to bring more services to South County. Various County departments led by the OSH and Office of Immigrant Relations should build on this work and identify service gaps and increase physical and mobile outreach in these areas. The County should also study increasing funding for non-profit service providers to open satellite offices in the area if they do not already have such a presence. It may make more sense for satellite offices to be located in Gilroy and Morgan Hill, but it should be a clear part of the mission of those offices to serve outlying rural areas.

Goal 4: Increase Access to Opportunity for Residents of Historically Disinvested Low-Income Communities of Color.

<i>Goal</i>	<i>Priority</i>	<i>Strategy</i>	<i>Geographic Scope</i>	<i>Fair Housing Issues</i>	<i>Contributing Factors</i>	<i>Metrics, Milestones, Timeframe for Achievement</i>	<i>Lead Program Participant</i>	<i>Further Comm Plan to End Homelessness Goal/Strategy</i>
4.a	Medium	Increase the number of free public transit passes and other transportation options for people who are unhoused to access services.	Local and South County	Disparities in Access to Opportunity	Access to transportation for persons with disabilities; Availability, type, frequency, and reliability of public transportation; Lack of access to opportunity due to high housing costs	Number of public transit passes issued. [Years 1-5]	County of Santa Clara Office of Supportive Housing and Office of Immigrant Relations; South County Cities	3(2)(B) - Increase the number of free public transit passes and other transportation options for people who are unhoused to access services.
4.b	Medium	Study increasing access to services in South County.	Local and South County	Disparities in Access to Opportunity	Lack of public investments in specific neighborhoods, including services or amenities	Documented consideration of service gaps in South County; Possible creation of satellite offices. [Years 3-5]	County of Santa Clara Office of Supportive Housing and Office of Immigrant Relations; South County Cities	1(4) - Protect residents from evictions, displacement, and housing discrimination.

Goal 5: Promote Racial Equity in Homeless Services and Permanent Supportive Housing Systems.

Destination: Home and Supporting Partnerships for Anti-Racist Communities' January 2020 "Race and Homelessness in Santa Clara County"³ report reveals deep disparities in the experience of homelessness by race. Quantitative and qualitative findings in this report demonstrate that significant racial disproportionality exists within the homeless population in Santa Clara County, especially for Black/African American, Native American, and Latinx individuals and families. Point-in-time County data reveals deep disparities in the experience of homelessness by race and disability, and feedback from community stakeholders and individuals with lived experience of homelessness confirms this phenomenon. Only by taking concerted action, informed by data, can the County work to reduce these disparities while advancing the long-term goal of ending homelessness.

a. Provide demographic data, including race and ethnicity, in all reports on homelessness to highlight and address inequities.

Data collection and transparency around racial disparities in homelessness are crucial first steps to addressing the root causes of those disparities as well as disparities in access to the services and publicly-supported housing that exist. Presenting such data affords community stakeholders and individuals with lived experiences more context for formulating their own recommended policy changes or interventions.

b. Provide trauma-informed care and racial equity/anti-racism training, as well as training on providing services that are accessible to persons with limited English proficiency and to persons with disabilities, to all staff working with people experiencing homelessness.

The experience of trying to access services and housing can be re-traumatizing for people who are unhoused and who have had adverse experiences with government and nonprofit service-providers in the past. Some of those traumas may relate to experiences with both individual and institutional racism and ableism. Additionally, some community stakeholders reported that homeless services and permanent supportive housing are difficult to access for persons with disabilities and individuals with limited English proficiency. Ensuring that frontline service providers have the requisite training to adapt their methods to build trust may increase equitable service utilization over time. The County's partnership with the Santa Clara County Continuum of Care, a broad group of stakeholders dedicated to ending and preventing homelessness, and, more specifically, the Lived Experience Advisory Board, a leadership development body consisting of members with current or past experiences of homelessness, will be essential in developing and implementing these training recommendations.

³ <https://destinationhomesv.org/wp-content/uploads/2021/01/Race-Homelessness-DH.pdf>

c. Align racial equity work in the homelessness sector with other racial equity initiatives in Santa Clara County.

The County's work to advance racial equity in the homelessness sector will often rely, in part, on relationships with external stakeholders who are key partners in efforts to advance racial equity in other sectors. As nonprofit organizations with limited capacity, these groups will benefit from the County being efficient in its attempts to leverage their expertise and relationships. Additionally, some investments or policy interventions are more effective when coordinated, such as, for example, ensuring that the education sector's support for homeless youth is complementary to rather than duplicative of that of the homelessness sector.

Goal 5: Promote Racial Equity in Homeless Services and Permanent Supportive Housing Systems.

<i>Goal</i>	<i>Priority</i>	<i>Strategy</i>	<i>Geographic Scope</i>	<i>Fair Housing Issues</i>	<i>Contributing Factors</i>	<i>Metrics, Milestones, Timeframe for Achievement</i>	<i>Lead Program Participant</i>	<i>Furthers Comm Plan to End Homelessness Goal/Strategy</i>
5.a	High	Provide demographic data, including race and ethnicity, in all reports on homelessness to highlight and address inequities.	Local	Disproportionate Housing Needs	Admissions and occupancy policies and procedures, including preferences in publicly supported housing; Quality of affordable housing information programs	Publication of reports; Adoption of new strategies for overcoming racial disparities in homelessness. [Years 1-5]	County of Santa Clara Office of Supportive Housing; Santa Clara County Continuum of Care	Process Improvement Across Strategies
5.b	Medium	Provide trauma-informed care and racial equity/anti-racism training, as well as training on providing services that are accessible to persons with limited English proficiency and to persons with disabilities, to all staff working with people experiencing homelessness.	Local	Disproportionate Housing Needs	Inaccessible government facilities or services	Number and frequency of staff trainings and number of staff trained. [Years 1-5]	County of Santa Clara Office of Supportive Housing; Santa Clara County Continuum of Care; Destination: Home Lived Experience Advisory Board	Process Improvement Across Strategies
5.c	Medium	Align racial equity work in the homelessness sector with other racial equity initiatives in Santa Clara County.	Local	Disproportionate Housing Needs	Lack of local or regional cooperation	Documented examples of joint projects between different departments or agencies. [Years 1-5]	County of Santa Clara Office of Supportive Housing; Santa Clara County Continuum of Care; Destination: Home	Process Improvement Across Strategies

Goal 6: Continue Support for Fair Housing Enforcement, Education, and Outreach.

Nonprofit fair housing organizations and legal services providers play a critical role in fair housing enforcement, education, and outreach, and the County’s support is essential to ensuring that they are able to meet the needs of victims of discrimination. By helping these organizations support their operations, jurisdictions can ensure that groups can address critical emerging issues, like those that have stemmed from the passage of A.B. 1482. If additional resources are identified, increasing the level of support for fair housing enforcement, education, and outreach could help nonprofit partners adopt more proactive strategies that more effectively reduce housing discrimination over the long term.

Goal 6: Continue Support for Fair Housing Enforcement, Education, and Outreach.

<i>Goal</i>	<i>Priority</i>	<i>Strategy</i>	<i>Geographic Scope</i>	<i>Fair Housing Issues</i>	<i>Contributing Factors</i>	<i>Metrics, Milestones, Timeframe for Achievement</i>	<i>Lead Program Participant</i>	<i>Further Comm Plan to End Homelessness Goal/Strategy</i>
6.a	High	Continue support for fair housing enforcement, education, and outreach.	Countywide	Segregation/Integration; Disproportionate Housing Needs; Disparities in Access to Opportunity	Displacement of residents due to economic pressures; Lending discrimination; Private discrimination; Source of income discrimination	Amount of funding allocated annually. [Years 1-5]	County of Santa Clara Office of Supportive Housing	1(4) - Protect residents from evictions, displacement, and housing discrimination.

X.5 Contributing Factors Appendix

The contributing factors that have been identified as having the highest priority, and that have therefore shaped the primary goals and actions of this assessment, are as follows:

Contributing Factors	Priority Level	Associated County Goals
6. Availability of affordable units in a range of sizes	High	1.a, 1.b, 1.c, 1.g, 2.a
11. Displacement of residents due to economic pressures	High	1.g, 3.a, 3.b, 3.c, 3.d, 3.e, 6.a
15. Lack of access to opportunity due to high housing costs	High	1.a, 1.b, 1.c, 1.d, 1.e, 1.f, 2.a, 4.a
30. Land use and zoning laws	High	1.c, 1.d, 1.e, 2.a
36. Location and type of affordable housing	High	1.a, 1.b, 1.c, 1.d, 1.e, 1.f, 2.a
37. Loss of affordable housing	High	1.a, 1.b, 1.g, 3.c, 3.d
4. Access to transportation for persons with disabilities	Medium	4.a
5. Admissions and occupancy policies and procedures, including preferences in publicly supported housing	Medium	5.a
7. Availability, type, frequency, and reliability of public transportation	Medium	4.a
14. Inaccessible government facilities or services	Medium	5.b
16. Lack of affordable, accessible housing in a range of unit sizes	Medium	2.a
18. Lack of affordable, integrated housing for individuals who need supportive services	Medium	2.a
24. Lack of local or regional cooperation	Medium	1.d, 2.a, 5.c
27. Lack of public investment in specific neighborhoods, including services or amenities	Medium	4.b
31. Lending discrimination	Medium	6.a
32. Location of accessible housing	Medium	2.a
33. Location of employers	Medium	1.d, 1.e
39. Private discrimination	Medium	3.c, 3.e, 6.a
40. Quality of affordable housing information programs	Medium	5.a
43. Source of income discrimination	Medium	6.a

Each of these contributing factors is associated with the County’s AFH goals and priorities, which are detailed in the preceding section of this assessment (X.4).

County residents in both incorporated and unincorporated areas face significant issues related to segregation, disparities in access to opportunity, disproportionate housing needs, and R/ECAPS, which are the predominate fair housing issue areas in need of alleviation and associated with the County’s priority contributing factors.

Although the relevance and impact of contributing factors are similar throughout Santa Clara County, there are some nuances between the incorporated areas and the Unincorporated County, and between Census Designated Places within the Unincorporated County. For example, there are lower instances of overcrowding in the rural parts of the Unincorporated County because of the lower overall density, lack of services, and greater distances to employment opportunities.

What follows is a list of all contributing factors analyzed, with distinctions between geographic regions of the county where relevant.

Analysis of Contributing Factors

1. Access to Financial Services

This analysis of access to financial services is measured by physical access to bank branch locations. The Federal Deposit Insurance Corporation (FDIC) provides information on the location of banks by physical addresses, cities and towns, counties, and states. This information illustrates disparities in access between municipalities that might have differing levels of diversity, but that does not demonstrate access to physical bank branch locations in areas specifically by neighborhoods, which would be the best indicator of access to financial services impacting disparities in access to opportunity. Lack of access to physical bank branches encourages exposure to predatory consumer lenders instead, impacting economic mobility and transportation. Below, the table outlines bank branch access for the eight largest cities in Santa Clara County, as well as the County as a whole:

Table 45: FDIC-Regulated Bank Branches by Municipality in 2020¹

Municipality	Population ²	% Minority Population	FDIC-Regulated Full-Service Brick and Mortar Branches	FDIC-Regulated Non-Brick and Mortar Branches
San José	1,030,119	74.0%	137	15
Sunnyvale	153,185	68.8%	24	3
Santa Clara (City)	129,488	66.2%	22	1
Mountain View	83,377	55.4%	15	2
Milpitas	80,430	89.1%	19	3
Palo Alto	66,666	44.8%	24	5

¹ All FDIC-related data derived from: *Download Data*, FEDERAL DEPOSIT INSURANCE CORPORATION, https://www7.fdic.gov/idasp/advSearch_warp_download_all.asp?intTab=1 (last visited Jan. 30, 2020).

² All population and minority population data derived from: *QuickFacts*, UNITED STATES CENSUS BUREAU, <https://www.census.gov/quickfacts/fact/table/US/PST045219> (last visited Jan. 30, 2020).

Cupertino	60,170	75.0%	23	4
Gilroy	58,756	71.2%	9	2
County Total³	1,937,570	69.0%	328	34

This data demonstrates that there are a significant number of full-service financial institutions and other financial institutions throughout the most populated areas of the County. This is particularly true for the County’s largest city, San José, which also has a large minority population. Overall, there is no identifiable link between minority representation in a given city and lack of access to financial services. Of course, the existence of financial institutions – both full service and not – is not preclusive of other forms of predatory financial practice and/or lending discrimination.

This also compares favorably with the rest of the Region (San Benito County). San Benito has only eight total FDIC-regulated branches of any kind.⁴ Even considering the population disparities between San Benito and the far larger Santa Clara County, this difference demonstrates that there is more access to financial services in Santa Clara County than San Benito County. Moreover, Santa Clara County’s access is more evenly spread throughout the county, as seven of San Benito’s eight branches are located in one city (Hollister).⁵

2. Access for persons with disabilities to proficient schools

As discussed in the Disability and Access section of this Assessment, the portions of Santa Clara County that have the highest concentrations of children with disabilities are not closely aligned with areas with the highest proficiency schools. This is true both at a regional and cross-jurisdictional level. Children with disabilities are concentrated in San José, Campbell, parts of Mountain View and Santa Clara, and in a rural area to the southwest of Gilroy. The highest performing schools are in the West Valley – and within particular cities, especially in Mountain View, San José, Santa Clara, and Sunnyvale. Students are not easily able to transfer between school districts without changing residences, and access to high-quality programs that may not be available in their home district generally is not grounds for inter-district transfer. Disparities in school discipline also decrease access to proficient schools and to any education whatsoever. Across Santa Clara County, the suspension rate for students with disabilities is over three times the rate for students who do not have disabilities. This is a higher rate of disparity than the statewide rate. High suspension rates for students with disabilities are most prominent in the Gilroy Unified and Morgan Hill Unified school districts.

3. Access to publicly supported housing for persons with disabilities

Data from HUD show that, across jurisdictions, persons with disabilities are underrepresented in Project-Based Section 8 developments in relation to their proportion

³ Note that the columns do not sum to the “County Total” as this total includes locations not in the eight cities examined in the table.

⁴ *Download Data*, *supra* note 1.

⁵ *Id.*

of the income-eligible populations. Because local governments in the area do not play a direct role in the administration of Project-Based Section 8 developments, for which HUD directly enters into contracts with property owners, support for fair housing organizations to engage in testing of these developments may be the most effective way of addressing this underrepresentation. This testing could help ascertain whether persons with disabilities face barriers in signing up for wait-lists.

Although the data does not reflect similar disparities for other types of publicly supported housing, low-income persons with disabilities may also have limited access to LIHTC units due to the way rents are set in those developments. In LIHTC developments, affordability is generally targeted at households making 50% to 60% of the Area Median Income. For Fiscal Year 2021, 50% of the Area Median Income for a one-person household is \$58,000. That income is vastly beyond the means of most persons with disabilities in the area. According to the 2015-2019 American Community Survey, median earnings for persons with disabilities 16 years of age or older in Santa Clara County are only \$31,150. Though household income is higher, LIHTC units are still likely to be out of reach for many households that include persons with disabilities.

Advocates also reported a lack of understanding of the requirement to grant reasonable accommodations among management companies operating LIHTC developments. With respect to the Housing Choice Voucher program, data from HUD do not distinguish between portable tenant-based vouchers and Project-Based Vouchers that the SCCHA has invested in certain developments. The SCCHA has programs that result in persons with disabilities comprising a significant share of the population served; however, these programs, which often focus on chronically homeless individuals, may not adequately assist persons with certain types of disabilities who do not access the service providers that refer individuals to supportive housing providers. In addition to income targeting that may leave out many persons with disabilities and the significant underrepresentation of persons with disabilities in Project-Based Section 8 housing, the most significant barrier to access to publicly supported housing for persons with disabilities is the overall shortage of such housing. That issue is discussed in more detail in connection with two other contributing factors: lack of affordable, accessible housing in a range of unit sizes, and lack of affordable, integrated housing for individuals who need supportive services.

4. Access to transportation for persons with disabilities

This contributing factor is particularly severe in Gilroy and the remainder of South County, which is part of the Santa Clara Unincorporated County. To be clear, access to transportation for persons with disabilities is not a contributing factor because of systemic problems with the policies and practices of the Valley Transportation Authority (VTA) or Caltrain. Instead, the barrier, which is closely tied to broader issues with transportation in the area, is an overall lack of public transportation, particularly outside of San José. Advocates and stakeholders reported that the VTA's bus network is spread too thin and has too few buses and/or wait times between buses to meet people's needs efficiently and effectively. In turn, those problems reduce ridership, resulting in decreased fare revenue and a justification for cutting service further. Due to their disproportionately low

incomes and the decreased likelihood of their being able to use private vehicles for transportation, persons with disabilities bear the brunt of deficiencies in the system. Lack of transportation is connected to health and employment outcomes as low-income persons with disabilities often need public transportation to get to medical appointments or to workplaces. As agencies like the San Andreas Regional Center work to increase supported employment, lack of transportation is a barrier to persons with disabilities being able to access those employment opportunities.

In South County, the problem of lack of transportation is even more pronounced due to more limited service and the inherent barrier of longer travel times to San José and other parts of northern Santa Clara County. The lack of light rail in South County puts persons with disabilities who need to travel north in a difficult position due to the high cost of riding Caltrain and the possibility that buses will be delayed by traffic. Even without delays, an end-to-end trip on the 68 Bus from Gilroy to San José pre-pandemic has a scheduled duration of one hour and 51 minutes at peak morning rush hour. This end-to-end trip is still quite long at non-peak times, lasting at least one hour and 30 minutes. Arriving in San José often is not the end of the story – veterans with disabilities, as an example, would then need to transfer to bus service to Palo Alto to reach the VA Hospital. On that end, light rail service terminates in Mountain View, so an individual's options consist of the expensive Caltrain or buses, which are vulnerable to traffic delays.

5. Admissions and occupancy policies and procedures, including preferences in publicly-supported housing

Admissions and occupancy policies and procedures, including preferences in publicly-supported housing, is a low priority contributing factor. SCCHA lists only one local preference for its Housing Choice Voucher (HCV) Program: income eligible families displaced as a result of a federally-declared disaster. Additionally, SCCHA states in its HCV Administrative Plan that it will issue an available 59 Mainstream vouchers to eligible people on the Section 8 Waiting List who have a disabled (elderly or non-elderly) head of household, spouse, and/or co-head. SCCHA receives direct applicant referrals from partnering agencies for the following programs: Chronically Homeless Direct Referral Program, Special Needs Population Direct Referral Program, and Veterans Affairs Supportive Housing Program. Those who are referred from these programs are able to bypass the Section 8 or Project-Based Voucher waiting lists. Finally, SCCHA may draw from the waiting list and/or receive direct referrals from the Community Queue for the Mainstream Voucher Program.

SCCHA also applies criminal background screening policies, which are fairly consistent with fair housing best practices. SCCHA applies a reasonable lookback period of just three years. However, their policy also states that they *may* terminate assistance “if a household member has engaged in criminal activity (by preponderance of evidence) regardless of whether the member has been arrested or convicted.” Still, in determining whether to deny or terminate assistance, the Housing Authority considers a multitude of factors, including the seriousness of the case, the effect of termination on other household

members, the participation or culpability of other household members, the time elapsed, recent history, likelihood of favorable conduct in the future, etc.

6. Availability of affordable units in a range of sizes

A lack of affordable units in a range of sizes can cause overcrowding, as families are forced to share smaller units. Overcrowding is already an issue in Santa Clara County, especially among Latinx households. The 2013-2017 American Community Survey shows that Latinx households experience overcrowding at a rate of 12.44%. This is three times the rate of the next-highest group, which is Asian American or Pacific Islander households (3.67%). Considering that Latinx residents are often the largest or second-largest ethnic group within the various entitlement jurisdictions in this analysis, the problem of overcrowding is even more acute. This issue is compounded by the lack of three or more bedroom units available within the county. In the county, Santa Clara (City), Cupertino, Mountain View, Palo Alto, and Sunnyvale, the vast majority of Project-Based Section 8 units are 0-1 bedrooms. In San José, Palo Alto, and Sunnyvale, a majority of their Other Multifamily units are also 0-1 bedrooms. Gilroy is by far the most balanced, with San José also having fairly balanced Project-Based Section 8 developments with bedrooms for larger families. The upshot is that households typically need to use the HCV program if they have large families. SCCHA's HCV waiting list (and all other waiting lists) is currently closed. A breakdown of units per bedroom size is not available for publicly-supported housing in San Benito County, making up the rest of the region. However, according to 2013-2017 ACS estimates, Latinx residents face similar levels of overcrowding in San Benito County, suggesting that this is a problem throughout the Region.

7. Availability, type, frequency, and reliability of public transportation

The public transportation system in Santa Clara County has significant gaps that render existing systems, including those of the Valley Transportation Authority and Caltrain less usable to low-income individuals who are disproportionately members of protected classes. Specifically, bus service is extremely limited in many parts of the county, particularly outside of San José, with some major arterial streets lacking any service. Even where service exists, 30-minute headways or wait times between buses are common. Transportation between South County and San José can be extremely time-consuming with trip times of nearly two hours, not accounting for unexpected traffic, between Gilroy and San José. Faster forms of transportation, such as Caltrain, are often too expensive for daily use by members of protected classes, and the Valley Transportation Authority's light rail system is limited in scope, not traveling past Mountain View to Palo Alto, not connecting to Cupertino, and not connecting to South County.

In the unincorporated areas of Santa Clara County, the areas lacking high quality transportation include Loyola, Lexington Hills, and East Foothills. The lack of transportation in these affluent areas has a greater burden on those in the workforce trying to access these areas more than the residents.

8. Community Opposition

White residents represent a narrow plurality of the residents of the County,⁶ which is comprised mostly of Democrats.⁷ However, despite the demographic diversity and surface-level liberal political leanings of Santa Clara County, both news reports and resident interviews demonstrate that community opposition remains a barrier to fair housing in the County.

While some funding and projects for affordable housing have been approved in Santa Clara County,⁸ many such initiatives have been met by organized community opposition. For example, a planned residential development on the site of a former mall in Cupertino that would provide thousands of new units of housing was stymied by a lawsuit filed by a “Friends of Better Cupertino” to stop construction.⁹ Though the plaintiffs did not prevail, continuing opposition may make affordable housing in the city “financially infeasible.”¹⁰

Moreover, Cupertino is far from the only locality to oppose affordable housing efforts. In San José, a developer-backed proposal that weakened the Ellis Act that now requires reinstalling fewer rent controlled units in a new building after the previous one was demolished has led to worries that low-income renters will be pushed out.¹¹ And in Palo Alto, a plan to provide teachers with affordable housing was met with massive community resistance.¹² This follows a prior history of opposition to affordable housing in the city, including the resounding rejection of a 60-unit affordable housing complex in a 2013 voter referendum.¹³

On September 15, 2022, the California Renters Legal Advocacy & Education Fund (CaRLA) filed against Santa Clara County, alleging that the County violated the Housing Crisis Act of 2019 when it downzoned a residential neighborhood immediately adjacent

to Stanford University.¹⁴ The Upper San Juan neighborhood, an affluent residential area featuring large single-family homes on large lots, is located in unincorporated Santa Clara County.

9. Deteriorated and Abandoned Properties

For the most part, the high demand for housing in Santa Clara County¹⁵ ensures that housing is turned over and rehabilitated frequently. This demand has created gentrification that, in turn, has led to a rapid increase in high-end, luxury buildings replacing deteriorated older housing – creating cost difficulties for existing neighborhood residents but ensuring that housing stock is rarely on the market long enough to become deteriorated or abandoned.¹⁶ County programs also specifically work to target any deterioration and/or abandonment.¹⁷ That said, the more rural areas of the County – for instance, unincorporated tracts of Santa Clara County – are more likely to contain deteriorated properties given increased population movement towards cities and suburbs within the County.¹⁸

These conditions appear roughly comparable with the larger Region. On the one hand, San Benito County housing stock, in the aggregate, has been more recently built than that of Santa Clara County.¹⁹ However, there are indications that San Benito County has struggled more than Santa Clara County to maintain existing housing²⁰ – indicating that while Santa Clara County’s housing may be relatively older, there have also been more resources devoted to keeping said housing in non-deteriorating condition.²¹ At the least, there is no indication that Santa Clara County has a problem with deterioration or abandoned housing in excess of what exists in the broader Region.

²¹ *See* COUNTY OF SANTA CLARA, *supra* note 1, at 150 (noting no similar complaints, and detailing efforts – including raising the numbers of code inspectors and implementing an improved enforcement-tracking system – to further strengthen monitoring of deteriorating housing).

10. Displacement of and/or lack of housing support for victims of domestic violence, dating violence, sexual assault, and stalking

California state law protects victims of domestic violence, sexual assault, stalking, human trafficking, or abused elder or dependent adult who terminates their lease early.²² The tenant must provide written notice to the landlord, along with a copy of a temporary restraining order, emergency protective order, or protective order that protects the household member from further domestic violence, sexual assault, stalking, human trafficking, or abuse of an elder or dependent adult. Alternatively, proof may be shown by submitting a copy of a written report by a peace officer stating that the victim has filed an official report, or documentation from a qualified third party acting in their professional capacity to indicate the resident is seeking assistance for physical or mental injuries or abuse stemming from the abuse at issue. Notice to terminate the tenancy must be given within 180 days of the issuance date of the qualifying order or within 180 days of the date that any qualifying written report is made.

As part of the community engagement process, a domestic violence survivors focus group was assembled. California state law provides strong protections for survivors of domestic violence and related abuses. Additionally, the focus group described policy and housing market barriers that they had faced. One of the main concerns expressed by the focus group was that if someone chooses to leave their abusive partner, the tight housing market and high prices in the area could pose their own challenges, even if direct discrimination based on their status as domestic violence survivor, for example, would not play a direct role. Additionally, the focus group expressed concerns that the VISPDAT (Vulnerability Index – Service Prioritization Decision Assistance Tool) might be flawed.

11. Displacement of residents due to economic pressures

There are high levels of displacement of low-income residents, who are disproportionately likely to be Black or Latinx, at a countywide level and in specific cities throughout Santa Clara County. Rising housing costs that have outpaced income growth among low-income workers have contributed to this trend. Although displacement has been significant, it has not taken the form of decreases in the absolute number of residents of a particular racial or ethnic group. Instead, there has been a relative decline in Latinx and Black population, with each group comprising a smaller proportion of an increasingly populous area. This relative decline does not necessarily mean that displacement has occurred, but there is substantial evidence that it has. Specifically, nearly all stakeholders consulted in the community engagement process discussed the problem of rampant displacement; newcomers of the same racial and ethnic groups moving to the area are likely partially offsetting what might otherwise appear to be group population decline; and the birth of children is likely doing so, as well. The tables below show, for Santa Clara County and the seven participating cities, change in the percentage and absolute number of residents who are Latinx, Black, or Vietnamese since 2010.

²²https://leginfo.legislature.ca.gov/faces/codes_displaySection.xhtml?lawCode=CIV§ionNum=1946.7

Table 46: Change in Latinx Population 2010 to Present, Santa Clara County and Selected Cities, 2013-2017 American Community Survey 5-Year Estimates

Geography	2010 Census, Total Population, Latinx	2010 Census, % of Population, Latinx	2013-2017 ACS, Total Population, Latinx	2013-2017 ACS, % of Population, Latinx
Santa Clara County	479,210	26.9%	498,253	26.1%
Cupertino	2,113	3.6%	2,347	3.9%
Gilroy	28,214	57.8%	32,820	60.6%
Mountain View	16,071	21.7%	14,586	18.2%
Palo Alto	3,974	6.2%	4,865	7.3%
San José	313,636	33.2%	330,827	32.3%
Santa Clara	22,589	19.4%	21,371	17.1%
Sunnyvale	26,517	18.9%	25,174	16.6%

The data shows that at the countywide level, as well as in four of the five cities with the highest concentrations of Latinx residents, the percentage of Latinx residents has fallen in recent years. Moreover, in Mountain View, Santa Clara, and Sunnyvale, the absolute number of Latinx residents has decreased. Gilroy, along with cities outside of Santa Clara County, including some as far away as the Central Valley, is a somewhat frequent destination of households that can no longer afford to live in the central and northern portions of Santa Clara County. In part because of their longer history of high housing prices, Cupertino and Palo Alto had fewer low-income Latinx residents who were vulnerable to displacement than did other cities. Latinx residents in those two cities also tend to have higher incomes than Latinx residents of other cities in the county. According to the 2013-2017 ACS, the median household income for Latinx households in Cupertino (\$94,167) is 36.3% higher than countywide (\$69,052). In Palo Alto, the median household income for Latinx households is 14.3% higher than countywide.

As additional context, it is important to view decreases, whether relative or absolute, in the Latinx population of communities within Santa Clara County in the context of national and statewide trends toward increasing Latinx population. Between the 2010 Census and the 2013-2017 ACS, the Latinx population of California grew from 14,103,719 (37.6%) to 15,105,860 (38.8%). Rapidly increasing housing costs in places like Santa Clara County mean that that growth is occurring in places, like the Central Valley, that are comparatively isolated from well-paying jobs, healthy environmental conditions, and access to opportunity more broadly.

Table 47: Change in Black Population 2010 to Present, Santa Clara County and Selected Cities, 2013-2017 American Community Survey 5-Year Estimates

Geography	2010 Census, Total Population,	2010 Census, % of Population,	2013-2017 ACS, Total Population,	2013-2017 ACS, % of Population,
-----------	--------------------------------	-------------------------------	----------------------------------	---------------------------------

	Black Alone, Not Latinx	Black Alone, Not Latinx	Black Alone, Not Latinx	Black Alone, Not Latinx
Santa Clara County	42,331	2.4%	45,479	2.4%
Cupertino	322	0.6%	295	0.5%
Gilroy	709	1.5%	799	1.5%
Mountain View	1,468	2.0%	1,319	1.6%
Palo Alto	1,131	1.8%	808	1.2%
San José	27,508	2.9%	29,147	2.8%
Santa Clara	2,929	2.5%	4,242	3.4%
Sunnyvale	2,533	1.8%	2,403	1.6%

The Black population in Santa Clara County has historically been much lower than in other parts of the Bay Area. That, in itself, is partially the product of a legacy of intentional discrimination in the housing market. Although there have been some areas, particularly in east San José, that have had relative concentrations of Black residents, these neighborhoods (approximately 10-12% Black as of the 1990 Census) did not have the degree of concentration present in Richmond’s Iron Triangle, West Oakland, or San Francisco’s Western Addition. Accordingly, the scale of displacement has been different from displacement of Santa Clara County’s historically larger Latinx population. Nonetheless, between 2010 and the 2013-2017 ACS, most of the participating cities saw decreases in Black population concentration, and four cities in the north of the county had decreases in the absolute number of Black residents.

Table 48: Change in Vietnamese Population 2010 to Present, Santa Clara County and Selected Cities, 2013-2017 American Community Survey 5-Year Estimates

Geography	2010 Census, Total Population, Vietnamese	2010 Census, % of Population, Vietnamese	2013-2017 ACS, Total Population, Vietnamese	2013-2017 ACS, % of Population, Vietnamese
Santa Clara County	125,695	7.1%	134,546	7.0%
Cupertino	745	1.3%	626	1.0%
Gilroy	464	1.0%	293	0.5%
Mountain View	694	0.9%	748	0.9%
Palo Alto	401	0.6%	752	1.1%
San José	100,486	10.6%	108,110	10.6%
Santa Clara	4,498	3.9%	4,332	3.5%
Sunnyvale	3,030	2.1%	2,626	1.7%

Data reflecting the Vietnamese population in Santa Clara County, which has the lowest income levels and therefore highest displacement risk among the four largest Asian ancestry groups in the county (Chinese, Indian, and Filipino in addition to Vietnamese), is more ambiguous but does point towards the likelihood of some hyper-localized displacement as well as the future risk of more widespread displacement. The proportion and absolute number of Vietnamese residents fell in four participating cities (Cupertino, Gilroy, Santa Clara, and Sunnyvale) while both increased in one (Palo Alto) and the

number increased while the percentage was flat in two more (Mountain View and San José). This occurred while Asian population more generally was increasing significantly with population gains concentrated in other groups. Between the 2010 Census and the 2013-2017 ACS, the Indian population of Santa Clara County grew from 6.6% to 8.8%, and the Chinese population grew from 8.6% to 9.6%. The areas where localized displacement of Vietnamese residents is most likely to be occurring are areas immediately to the north, east, and south of downtown San José. The farther a neighborhood in east San José is from downtown, the lower the displacement risk is at this point in time.

The relationship of displacement to economic pressures in Santa Clara County and the participating cities is straightforward. There has been tremendous job growth in the county, including a large proportion of high-paying jobs in the technology sector. Housing production, whether for market-rate housing or affordable housing, has not kept pace, causing high-wage workers to bid up the cost of scarce housing. According to an analysis of 2017 ACS data by Silicon Valley @Home, only three municipalities in Santa Clara County – the affluent bedroom communities of Los Altos Hills, Monte Sereno, and Saratoga – have more housing units than they do jobs. Several cities – including Milpitas, Mountain View, Palo Alto, and Santa Clara – have more than twice as many jobs as they do housing units. At the same time, housing unit production has not been concentrated in the areas where housing-jobs imbalance has been most extreme with more development occurring in San José, which has a more modest imbalance. Although the regional effects of this production on affordability may be positive, the localized effects in low-income communities of color have dramatically increased housing costs.

The two maps that follow illustrate the phenomenon of increased housing costs in downtown San José and east San José, in particular. The first map reflects 2013-2017 ACS data for median gross rents by census tract while the second shows 2005-2009 ACS data. In the first map, most census tracts in downtown San José and east San José are in the third shaded band, reflecting median gross rents of \$1,262 to \$1,690.²³ In the second map, more census tracts fall in the second band, reflecting median gross rents of \$877 to \$1,065. This shows a significant increase in rents over an eight-year period that has no corollary with the income levels of residents of these neighborhoods.

²³ Note that these are lower than current market rents due to the time lag between the 2013-2017 ACS and the effect of rent control on rents paid by long-time tenants.

County's, the ease of porting into Santa Clara County, as opposed to porting into San Benito, is the more important question.

13. Inaccessible public or private infrastructure

A number of jurisdictions in the County have an Americans with Disabilities Act (ADA) Transition Plan for Public Right of Way, which evaluate existing public facilities and right-of-way areas for compliance with the ADA. Facilities under evaluation include parks, sports fields, emergency services buildings and cultural destinations. The right-of-way elements under examination include sidewalks, curb ramps, crosswalks, traffic signals and intersections, pedestrian bridges, and trails. Additionally, access to the jurisdictions' websites is also evaluated to make sure that they are user-friendly.

14. Inaccessible government facilities or services

This Assessment did not reveal current information about inaccessible government facilities or services. Santa Clara County has a policy to make all reasonable modifications to policies and programs to ensure that people with disabilities have an equal opportunity to enjoy all of its programs, services and activities. The County has a coordinator of programs for people who have disabilities to accommodate those requiring an auxiliary aid or service for effective communication, or a modification of policies or procedures to participate in a program, service or activity. The coordinator also handles complaints that a program, service or activity is not accessible to persons with disabilities. The County does not charge individuals with disabilities to cover the cost of providing auxiliary aids and services or reasonable policy modifications.

15. Lack of access to opportunity due to high housing costs

The median home value within Santa Clara County is \$1.49 million as of September, 2023, according to Zillow. Home values have decreased by 5.7% over the past year.²⁴ Housing costs are severely burdensome across the state of California, but particularly so in Santa Clara County. To afford housing, workers may need to buy homes that are far away from their workplaces, impacting access to both employment and transportation. Median home purchase costs in the County are double the state average. The median income in the County does closely track that trend, compared to the statewide median income. Asian American or Pacific Islander and white residents far out-earn their Latinx and Black neighbors, making home purchase much more feasible for those racial/ethnic groups. The gap between median rental costs in the County versus statewide is much smaller than the home purchase gap. Since Latinx and Black residents are much more likely to have lower incomes in Santa Clara County, they are more likely to be renters, and the high overall rental costs in the state further constrain their options.

The most significant housing challenge in the unincorporated county is cost burden. In the unincorporated county, concentrations of renters are located near San Jose municipal

²⁴ <https://www.zillow.com/home-values/13713/santa-clara-ca/>

boundaries, within the Stanford CDP, within the San Martin CDP, and, to a lesser extent, stretching from Cambrian Park to Burbank.

San Benito County, which makes up the balance of the Region, has much lower costs to own and rent housing, with a correspondingly middling median income for its residents. The extent to which San Benito County contributes to a lack of access to opportunity due to high housing cost in the Region is not a serious concern.

16. Lack of affordable, accessible housing in a range of unit sizes

As noted throughout this Assessment, high and rising housing costs are a major problem across the area. As a result, there is extremely limited unsubsidized housing that is affordable to low-income households, disproportionately including persons with disabilities, and the need for publicly supported housing is extremely high. Santa Clara County has taken steps to address this through the passage of the Housing Bond, and multiple cities have actively helped with its implementation. A lack of zoned lands for multifamily housing remains a major problem in some others. The problem is particularly prevalent in Cupertino, Palo Alto, and other affluent cities in the West Valley. When the County has facilitated affordable housing development through its Supportive Housing Development Fund, developments have contained accessibility features and have included significant set-asides of units for permanent supportive housing. A large majority of these units, however, have been SRO, studio, and one-bedroom units. For low-income persons with disabilities who need the services of a live-in aide or reside in family households, these unit sizes may make it difficult for these residents to secure this affordable and accessible housing opportunities.

17. Lack of affordable in-home or community-based supportive services

Because the infrastructure for the provision of supportive services is generally administered at the county or regional level, the main system gaps apply to all jurisdictions involved in this Assessment. Due to the absence of any waiting list for Home and Community-Based Services for persons with developmental disabilities, this issue primarily affects people with psychiatric disabilities. A robust array of services, including the most intensive models of community-based services like Assertive Community Treatment, are available. Nonetheless, many people have trouble accessing needed services, and service providers are not always able to reach vulnerable populations through street outreach. Although BHSD funds three outpatient services providers in South County, there is still a lower density of services in that area than in the northern part of the county. Individuals with serious mental illness living in rural parts of South County, such as in farmworker housing, face particular barriers to accessing in-home or community-based supportive services. Additionally, across types of disabilities, undocumented adults face barriers due to federal restrictions of Medicaid assistance for undocumented people. The California Legislature has approved state funding for Medi-Cal services for undocumented people until they reach the age of 26, a critical investment that exceeds that of any other state, but there remains a funding gap for services for most undocumented adults.

18. Lack of affordable, integrated housing for individuals who need supportive services

As discussed at length throughout this Assessment, there is a large overall shortage of affordable housing that is particularly severe in the Cupertino, Palo Alto, and other affluent cities in the West Valley that are part of the Unincorporated County. Without more overall affordable housing, it is impossible to provide more affordable, integrated housing for individuals who need supportive services. For example, if there is a policy of setting aside a certain percentage of affordable units for supportive, the number of units that policy yields will be much higher if total affordable housing development is greater. Additionally, if there is a policy giving persons with disabilities preference for Housing Choice Vouchers, that policy will only go so far if there are not enough units (frequently LIHTC units) in which to use those vouchers.

19. Lack of assistance for housing accessibility modifications

Jurisdictions in Santa Clara County generally provide funding for accessibility modifications through sub-grants of federal funds to Rebuilding Together or Habitat for Humanity. These programs have a demonstrated track record of success, but they are also over-subscribed. There are more persons with disabilities needing accessibility modifications (and other low-income people needing home repair and rehabilitation) than there is funding available. Additionally, these programs generally target low-income homeowners, which means that there is a gap relating to accessibility modifications for low-income renters in structures that are not covered by Section 504's (which could require the housing provider to pay for the cost of modifications). For low-income persons with disabilities residing in single-family rentals, rent-controlled apartments, and other housing that is not publicly-supported, their landlords do not have a legal obligation to pay for modifications. These tenants are unlikely to have the resources to be able to pay for modifications themselves. Both expanding the amount of money available for accessibility modifications through existing programs and allowing for the use of funds in rental housing under certain circumstances would increase the integration of persons with disabilities by enabling them to live in community-based settings rather than having to move to institutional settings like nursing homes.

20. Lack of assistance for transitioning from institutional settings to integrated housing

The Silicon Valley Independent Living Center provides robust services to individuals transitioning from institutional settings to integrated housing. Strengthening their existing programs would help foster increased community integration for persons with disabilities. Although homelessness is not technically an institutional setting, stakeholders, including individuals with lived experience of homelessness, expressed a need for more services to help formerly homeless individuals, a population that disproportionately includes persons with disabilities, adjust to life in permanent supportive housing. Ideas for such services, which must be voluntary, included classes on grocery shopping, cooking,

housekeeping, and managing interpersonal relationships with fellow residents and staff in addition to services more directly tied to individuals' specific disabilities and health conditions.

21. Lack of community revitalization strategies

The County and its jurisdictions dedicate significant time and funds to community revitalization. This includes working with developers to improve communities in need, but also more unilateral efforts. The County set aside \$14.5 million in funding to preserve Buena Vista Mobile Home Park, a community of 400 low- and very-low-income residents. County partners are studying redevelopment strategies for this community and preserve it as affordable housing for its hundreds of residents while upgrading infrastructure and improving housing conditions.²⁵ The County is also considering efforts to transform county fairgrounds to a public space with several entertainment features.²⁶ The state dissolved redevelopment agencies in 2011 following reports of waste and underperformance, leading jurisdictions to have to take on costs incurred by these agencies.

22. Lack of local private fair housing outreach and enforcement

The fair housing organizations operating in Santa Clara County include Bay Area Legal Aid, Project Sentinel, Law Foundation of Silicon Valley, Senior Adults Legal Assistance, Asian Law Alliance, and Community Legal Services in East Palo Alto. These groups provide legal advice and representation on housing matters to low-income individuals, with additional exceptions restricting clientele (e.g., restricted to seniors, etc.) based on the organizations' missions. There may be a gap in this network of organizations when it comes to people with disabilities experiencing housing issues. Participants in community engagement sessions have reported widespread issues regarding reasonable accommodations for people with disabilities. For people with disabilities who are not income-eligible, it can be difficult to gain representation or legal advice regarding their reasonable accommodation – because although these cases may be fee generating, they are not especially complex. Therefore, people who are not income-eligible may have difficulty finding representation to pursue this issue. Elsewhere in the Region, some local private fair housing outreach and enforcement is provided by organizations such as California Rural Legal Assistance, which has an office in Hollister serving San Benito County and Santa Cruz County. Overall, it seems that there are less reported housing complaints arising out of San Benito County, due in part to its much smaller population. Nevertheless, it seems clear that there are far fewer organizations and resources to provide fair housing enforcement in San Benito.

²⁵ <https://www.sfgate.com/news/bayarea/article/County-To-Continue-Revitalization-Of-Buena-Vista-14545996.php>

²⁶ <https://www.mercurynews.com/2019/10/08/newest-ideas-for-revitalizing-county-fairgrounds-gets-supervisors-support/>

23. Lack of local public fair housing outreach and enforcement

The statewide agency enforcing fair housing laws is the California Department of Fair Employment and Housing (DFEH). Residents may submit complaints to the agency, which they will investigate and determine whether or not the complainant has a right to sue. Community engagement has indicated that advocates prefer to file complaints with HUD over DFEH, because the intake process can be lengthy. DFEH tends to have a high volume of cases, with advocates reporting intake interviews sometimes taking place up to four months after filing a complaint. There has also been inconsistent reporting among various investigations. DFEH tends to achieve better results if there is more evidence provided upfront, and/or if the site of the complaint is near their offices. The Region is made up of Santa Clara County and San Benito County. According to DFEH's 2018 Annual Report, there were 10 complaints received from San Benito County, compared to over 600 from Santa Clara County, which discrepancy is largely accounted for by the disparate populations of the two counties. So, while the problems may be similar, the effect is likely lessened in San Benito County due to their lower population level and far fewer reported civil rights violations.

24. Lack of local or regional cooperation

The County serves as a hub for facilitating coordination around fair housing and affordable housing among its cities. The Cities Association of Santa Clara County (CASCC) is an association of the fifteen cities in the county that works collectively to discuss and find solutions on affordable housing issues at a regional level. Additionally, the Santa Clara Valley Transportation Authority (VTA) provides bus, light rail, and paratransit services throughout the county. However, we note that the regional public transportation system falls far short of connecting residents to job centers and is often not a viable option for residents of communities of color seeking higher wage jobs in the technology centers of Cupertino, Mountain View, Palo Alto, Santa Clara, and Sunnyvale.

The one area where lack of local or regional cooperation plays a more pronounced role is with respect to access to proficient schools. There are eight different school districts within Santa Clara County, and the consolidation of those districts would make it easier for students living in areas with lower performing schools, disproportionately Latinx areas in particular, to attend higher performing schools.

25. Lack of meaningful language access for individuals with limited English proficiency

Using HUD's four factor analysis, SCCHA has identified Spanish and Vietnamese as the primary languages that rise to the required threshold for interpretation and translation services. Vital Vietnamese language client documents must be translated. The current number of participants who speak Spanish as their primary language does not trigger written translation of vital documents; nevertheless, SCCHA management requested that all vital client documents continue to be translated into Spanish based on a four-factor

analysis completed in 2005. Additional languages identified that did not rise to the level of required written translation were Mandarin, Russian, Farsi, and Korean. Even so, LEP individuals who speak these languages are entitled to telephone or in-person interpretation services for all vital written agency documents and interactions with staff. According to community engagement sessions with the Asian Law Alliance, the two key languages in Santa Clara County are indeed Spanish and Vietnamese. However, advocates also expressed that Mandarin may be a necessary addition to SCCHA's LEP plan.

26. Lack of Private Investment in Specific Neighborhoods

Santa Clara County receives a high level of private investments overall in its neighborhoods, but levels of investment are inconsistent across the County. Many major tech companies in the County dedicate significant funding to investing in and improving opportunities for housing for their employees, but this has not always translated into the development of more affordable housing. That may be starting to change through major new initiatives, and proposed priority 1.b in this Assessment is responsive to the need for greater private investments in affordable housing Santa Clara County and the Region.

28. Lack of resources for fair housing agencies and organizations

Santa Clara County has a wealth of private fair housing enforcement organizations, many of which are at least partly funded by entitlement cities and the County. Multiple fair housing organizations in the County receive or have received Fair Housing Initiative Program (FHIP) funds from HUD, and also benefit from Community Development Block Grant funds. Participants in the community engagement process have reported that it can be difficult to hire and/or retain staff due to the high cost of living in the area. Across the various fair housing organizations in the County, each has a particular focus. Participants from community engagement reported that the Law Foundation of Silicon Valley focuses on evictions, Bay Area Legal Aid focuses on subsidized housing, Asian Law Alliance does some fair housing work but focuses mostly on San José administrative hearings, and SALA is only able to take on a small caseload. The Region has far more fair housing agencies and organizations in Santa Clara County than in San Benito County. The lower population of San Benito should, in theory, correspond to a decrease in relative need, but the lack of resources, translating into a lack of organizations, seems clear in San Benito County as well. Overall, it seems clear that the diverse group of fair housing organizations work hard to fill the various fair housing outreach and enforcement needs, but that lack of resources is still a pressing issue in the County and the Region.

29. Lack of State or Local Fair Housing Laws

Lack of state or local fair housing laws is a low priority contributing factor. California recently passed statewide source of income protections, in addition to existing source of income protection in San José. California also has a robust set of statewide antidiscrimination laws, including the Unruh Civil Rights Act, Ralph Civil Rights Act, Bane Civil Rights Act, the Fair Employment and Housing Act, California Civil Code Section

1940.3, and Government Code Sections 11135, 65008, and 65580-65589.8. Whether complaints regarding these laws can be fully and timely pursued, however, is a different matter. Advocates have commented approvingly on recent changes to unlawful detainer laws, which increased the time period from five calendar days to five business days. Advocates also reported that they would like to see more enforcement of Apartment Rent Mediation in San José, expressing a worry that sometimes landlords do not comply with the result. The City of San José's Housing Department gets copies of eviction notices in San José, and it may move forward with reporting and/or analysis of those results. Given the comprehensive nature of statewide fair housing laws, which apply equally throughout the region, there are no meaningful differences to comment upon between the entitlement jurisdictions.

30. Land use and zoning laws

Land use and zoning laws play a significant role in a variety of fair housing issues. Specifically, overly restrictive zoning that suppresses the production of affordable housing, in particular, and housing more generally leads to disproportionately high rates of housing cost burden and overcrowding among some racial and ethnic groups as well as persons with disabilities. Additionally, when communities that are predominantly white and disproportionately higher income levels have restrictive zoning in comparison to other parts of their respective cities or regions, that can exacerbate patterns of residential racial segregation. Conversely, when low-income communities of color are not adequately buffered from heavy polluting industrial land uses by zoning and land use controls, that can contribute to racial disparities in health outcomes. Below, there is an analysis of the fair housing ramifications of land use and zoning laws in the Unincorporated County and the Region.

Unincorporated County

Most of the Unincorporated County's zoning is agricultural or conservation. The exceptions include the Urban Islands surrounded by the City of San Jose, the Stanford Area Specific Plan, and San Martin. Generally, the n Islands and Stanford allow for a mix of housing, including multifamily housing. More details can be found in Chapter 1.

Region

This Assessment does not include as granular of an analysis of the zoning and land use policies of the municipalities that comprise the incorporated parts of the county, including Campbell, Los Altos, Los Altos Hills, Los Gatos, Monte Sereno, Morgan Hill, and Saratoga. Several of these communities, however, have among the most restrictive zoning and land use policies in Santa Clara County as well as the most heavily white populations, the lowest Latinx and Vietnamese populations, and the highest access to certain types of opportunity including proficient schools. Specifically, consistent with their zoning, Los Altos Hills and Monte Sereno have virtually no multifamily housing. Los Altos and Saratoga have some multifamily housing but much less than in most communities in the Unincorporated County. Campbell, Los Gatos, and Morgan Hill, by contrast, have

comparatively inclusive zoning. It is also notable that, in many of these communities, proportionally more land zoned for single-family housing has large lot requirements than in other cities in the county. For example, the absolute minimum lot size in R-1 districts in Saratoga is 10,000 square feet (just one under ¼ acre), and many parcels require much larger lots of as large as approximately one-acre. Thus, the smallest minimum lot size for single-family homes in Saratoga is nearly twice as large as the predominant form of single-family zoning in San José. S.B. 9, which the California Legislature passed in 2021, which legalized duplexes and lot splits that – in tandem with the legalization of duplexes – enable fourplexes on most single-family-zoned parcels. It is too early to tell how much development this will lead to in the Unincorporated County and what the price point of that development will be.

31. Lending discrimination

The data below show that white and Asian applicants are far more likely to be successful in getting a loan approved, and less likely to be given a subprime loan, than Black or Latinx applicants across each category of loan in Santa Clara County. The differential rates vary across category and across racial/ethnic group, but for the most part, the difference between the highest and lowest percentage in each category fits into the commonly accepted 4/5ths disparate impact test.²⁷ Under that test, if the selection rate for a group is less than 4/5 (or 80%) that of another group, that is suggestive of a disparate impact. Therefore, this should be treated as a significant disparate impact across the racial/ethnic groups.

Table 49: Percentage of Loan Applications Resulting in Originated Loans by Race or Ethnicity and Loan Purpose in Santa Clara County, 2014-2017 Home Mortgage Disclosure Act Data

Race or Ethnicity	Home Purchase	Refinancing	Home Improvement
White, Not Latinx	70.34%	62.50%	66.63%
Black, Not Latinx	61.65%	49.98%	55.43%
Asian, Not Latinx	70.27%	64.88%	62.11%
Latinx	57.84%	50.51%	52.68%

Across home purchase, refinancing, and home improvement, the percentage of originated loans for white and Asian residents tend to cluster on the high end of the spectrum, with the percentage of originated loans for Black and Latinx clustered at the bottom. The largest gap between the highest and lowest percentages of originated loans in a category is about 14. Using the 4/5ths test, the difference between Asian and Black refinancing loans, for instance, clearly falls below the 4/5ths ratio, as does the differential between Latinx and white home improvement loans. The gap between white and Latinx home purchase loans falls barely within the 4/5ths ratio.

Table 50: Percentage of Loan Applications Denied by Race or Ethnicity and Loan Purpose in Santa Clara County 2014-2017 Home Mortgage Disclosure Act Data

²⁷ 29 C.F.R. § 1607.4(D).

Race or Ethnicity	Home Purchase	Refinancing	Home Improvement
White, Not Latinx	7.70%	14.26%	14.63%
Black, Not Latinx	12.30%	21.61%	26.09%
Asian, Not Latinx	9.33%	12.96%	18.05%
Latinx	14.04%	21.11%	26.23%

When it comes to denials of loan applications, Latinx residents have the highest rate of denial in both home purchase and home improvement, while Black applicants have the highest rate of denial for refinancing. However, the Black and Latinx rates for these three categories are very similar, differing by about two percentage points. Meanwhile, White and Asian applicants outpace Black and Latinx applicants in every category. The differing rates are more striking for denials than for approvals, with Latinx applicants being denied for home purchase loans at twice the rate of white applicants. While not as extreme, the differences in refinancing and home improvement also fall below the 4/5ths ratio.

Table 51: Percentage of Originated Loans That Were High-Cost by Race or Ethnicity in Santa Clara County, 2014-2017 Home Mortgage Disclosure Act Data

Race or Ethnicity	Number of Loans Originated	Percentage High-Cost
White, Not Latinx	62431	1.80%
Black, Not Latinx	1689	3.37%
Asian, Not Latinx	73926	1.23%
Latinx	14275	4.79%

The statistics for subprime loans may not seem like cause for concern, since each percentage is so low. However, the low percentages are due to the extremely costly market in Santa Clara County. The differences between racial/ethnic groups is striking, even at these levels. The Latinx/Latino subprime rate, 4.79%, is nearly four times the rate of Asian subprime loans, 1.23.

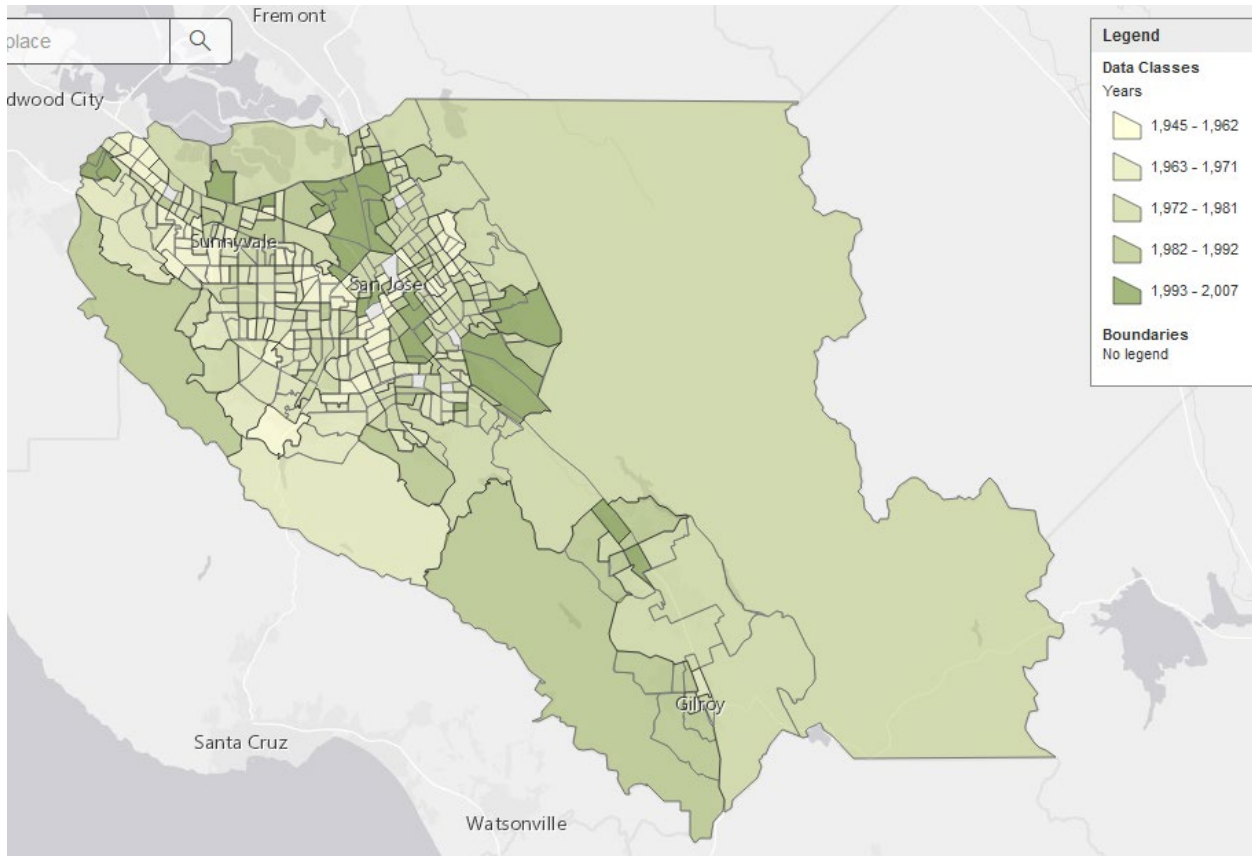

32. Location of Accessible Housing

Although it is not possible to precisely map the location of accessible housing in the Unincorporated County, it tends to exist where there are concentrations of new, multifamily housing and where there are concentrations of publicly supported housing. The American Community Survey does not facilitate the disaggregation of housing units by the number of units in a structure and the year a structure is built together, but it does allow a look at those two data points separately. These data points are contained in the maps that follow and are described in the section that follows.

New construction seems to be concentrated in the northernmost part of San José, with a bit in central San José and some more to the southeast. There is also new construction concentrated in Morgan Hill, and on Stanford’s campus. Developments with 20 units to 49 units (multifamily, but on the smaller side) tend to be located on the western side of the county, which is more heavily white and Asian American or Pacific Islander.

Developments with 50 units or more align with the northernmost area of San José that has seen recent construction and are also sprinkled along the central thoroughfare of El Camino Real, although to a lesser extent. As the publicly supported housing map shows, there is a concentration of Project-Based Section 8 housing in the western part of the county, with LIHTCs more prevalent in the eastern, segregated part of San José. A large majority of Project-Based Section 8 units are 0-1 bedrooms, which may pose a problem for tenants with disabilities who need a live-in aide or who reside with family members. This may have the effect of segregating people with disabilities. In San Benito County, which makes up the balance of the region, the vast majority of housing units are single family houses. People who need accessibility modifications and cannot access multifamily units constructed to meet the FHA's accessibility requirements will need to utilize accessibility modification funding or some other resource to meet their needs.

Map 48: Median Year Structure Built, Santa Clara County

Map 48: Units in Structure (20-49), Santa Clara County

Map 49: Units in Structure (50+), Santa Clara County

Map 50: Publicly Supported Housing, Santa Clara County

33. Location of Employers

The major cities in Santa Clara County boast employers providing tens of thousands of jobs to residents of the county.²⁸ However, these major employers also provide jobs to tens of thousands out-of-county residents,²⁹ indicating that the expensive housing in Santa Clara County³⁰ has forced at least some people who would otherwise prefer to reside close to work to live elsewhere.

The relatively high commute times for Santa Clara County residents backs up this anecdotal finding. On average, Santa Clara County commuters spend more time in traffic than most United States citizens,³¹ as they are subject to increasing congestion affecting the entire Bay Area³² and sometimes imperfect public transportation options.³³ These lengthening commutes add evidence that many people live further than they would like from their employment, a feature that can impose significant burdens, particularly on lower-income employees.

Even so, this factor is no more a problem in Santa Clara County than it is in the broader Region. Average commutes in San Benito County are significantly longer than those for Santa Clara County residents,³⁴ and the number of “super-commuters” has risen over the past decade in San Benito County just as it has in Santa Clara County.³⁵ San Benito County, which is far less populous, does not have the same breadth of employers offering jobs as does Santa Clara County.³⁶ Therefore, whatever stress created by location of employers for Santa Clara County relative to fair housing is primarily a Region-wide issue, rather than a county-specific one.

³⁵ Baldassari, *supra* note 5 (the number of “super-commuters” rose 58% in San Benito county from 2009-2017).

³⁶ *Largest Silicon Valley Employers*, *supra* note 1.

The COVID-19 pandemic has made the location of employers less relevant for many Santa Clara County residents but not for all. In particular, the location of employers can still pose issues for workers who are unable to telecommute, including many in the retail and service sectors. These categories of jobs tend to be lower paying, and protected class members are relatively more likely to work in them. It is also unclear whether, and on what timeline, workers who have telecommuted during the pandemic may return to in-person work.

34. Location of Environmental Health Hazards

Santa Clara County has a total of twenty-three active superfund sites, more than any other county in the United States.³⁷ Recently, these sites have come under scrutiny after EPA groundwater testing revealed that toxic chemicals were present.³⁸ These sites are largely the byproduct of Santa Clara County's role as the home of "Silicon Valley," which – particularly in the 1980s – drove manufacturing of chemicals needed to make the technological products companies in the region are famous for.³⁹ According to the HUD Data and Mapping Tool, the environmental health of Santa Clara County varies widely. In particular, tracts in and around San José (the largest city in the Santa Clara County) receive scores as low as 4 in the Environmental Health Index, revealing significant problems in environmental health close to the county's largest population center.⁴⁰ There are, however, some tracts with scores in the 80s and 90s – but these are the exception, not the norm.⁴¹ The Santa Clara Department of Public Health does offer information and resources concerning environmental impacts broadly and operates clean water and site mitigation programs to help residents avoid the effects of water contamination.⁴²

Santa Clara County's environmental health status compares poorly with San Benito County. San Benito County's lowest-scoring tract on the Environmental Health Index receives a 41, and all of the other tracts range between the high 60s-high 80s.⁴³ Likely, this is a result of San Benito County's relative lack of chemical manufacturing and superfunds (only one superfund site exists in San Benito County – the New Idria Mercury Mine.⁴⁴

35. Location of proficient schools and school assignment policies

In the northern part of Santa Clara County there is a high degree of fragmentation among school districts, inter-district transfers for purposes of accessing higher quality programs are difficult to achieve, and patterns in school proficiency consistently show that Latinx and Vietnamese residents have less access to high performing schools.

36. Location and type of affordable housing

As is documented in the Publicly Supported Housing section of this Assessment, publicly supported housing is concentrated in parts of the county that have disproportionate concentrations of Latinx residents (in the case of the east side of San José, Vietnamese residents). These areas include San José (except for west San José and parts of far south San José), Morgan Hill, and parts of Mountain View, Santa Clara, and Sunnyvale. By contrast, areas that have small Latinx and Vietnamese populations – whether they are majority white or have a high combined population of white residents, Chinese residents, and Indian residents – have relatively little affordable housing. This is particularly true in the city of Cupertino, the West Valley cities that are part of the county, and the parts of the cities of Mountain View, Santa Clara, and Sunnyvale that are furthest from the San Francisco Bay. Thus, the relative lack of affordable housing in the West Valley contributes to segregation by denying disproportionately Latinx and Vietnamese households access to neighborhoods where there are few current Latinx or Vietnamese residents. This is exacerbated by the heavy focus on affordable housing for seniors in Cupertino and Santa Clara. Because the low-income senior population is more heavily white than the broader low-income population, siting this housing in areas that are more heavily white than the broader region is less likely to foster integration. Additionally, the county's broader focus on permanent supportive housing has led to a comparative underinvestment in affordable housing for extremely low-income families with children, which are more likely to be Latinx or Vietnamese.

37. Loss of affordable housing

Gilroy and San José have mobile home park rent control, which is a significant source of affordable housing for low-income residents. Los Gatos, San José, and Mountain View have existing rent control ordinances, and the state of California recently passed a cap on rent increases through SB 1482. Statewide rent control will not preempt any existing, more protective ordinances; however, it will only be in effect for ten years. On the other side, lower-priced apartments that might represent another significant source of unsubsidized affordable housing remain vulnerable to Ellis Act evictions and conversions. San José, in particular, has modified its Ellis Act, allowing for a reduction in the number of rent-controlled apartments that must be brought back when a rent-controlled development is demolished, and giving developers more generous waiver requirements. The National Housing Preservation Database shows that there are 39 properties in the county with "inactive" subsidies, with a total of 1,567 total units. Additionally, several developments with active subsidies are scheduled to expire within the next decade. On the regional level, San Benito County has just two small developments with inactive

subsidies, versus fourteen with active subsidies. The statewide rent cap and the Ellis Act cut in opposite directions, and have a similar effect on San Benito County, albeit on a smaller scale.

38. Occupancy Codes and Restrictions

The state of California has not adopted the Universal Building Code. Instead, they have enacted the California Building Code, which also incorporates the International Building Code. The California Building Code has a rather broad definition of family, in that it does not only limit a family to “an individual or two or more persons who are related by blood or marriage,” but expands the definition to any persons who “otherwise live together in a dwelling unit.”⁴⁵ This definition is not restrictive in a way that would negatively affect access to housing.

Santa Clara County also defines family broadly, as “one or more persons . . . living as a single . . . household,” explicitly excluding only those “operating a hotel, club, fraternity or sorority house.”⁴⁶ Moreover, the code explicitly deems “necessary domestic help” as included within the definition of family.⁴⁷ In examining the five largest cities in Santa Clara County, all five have definitions of family that, while often using language distinct from one another, retain the expansive, non-restrictive view adopted by both California and Santa Clara County.⁴⁸ Accordingly, occupancy codes and restrictions are not a major factor in reducing access to fair housing in Santa Clara County.

The Santa Clara County approach to occupancy codes is matched by San Benito County. Specifically, San Benito County’s definition of “family” is nearly identical to Santa Clara County’s defining family as “[o]ne or more persons occupying a premises and living as a single, non-profit, housekeeping unit” and explicitly including “servants” (rather the Santa Clara County’s formulation of “domestic help”) within the definition of family.⁴⁹ Therefore, there are no major disparities region-wide on this issue.

39. Private Discrimination

According to the California Department of Fair Employment and Housing (DFEH) Annual Report, there were 662 complaints in Santa Clara County in 2020.⁵⁰ Broken down by category, there were 236 employment complaints, 33 housing complaints, 1 under the

⁴⁵ CAL., BUILDING CODE § 202.

⁴⁶ SANTA CLARA COUNTY, CAL., CODE § 1.30.030.

⁴⁷ *Id.*

⁴⁸ See SAN JOSÉ, CAL., CODE § 20.200.370 (defining family as “one or more persons occupying a premises and living as a single housekeeping unit”); SUNNYVALE, CAL., CODE § 19.12.070 (including in the definition of family a “group of two or more persons who need not be related, living together in a single [dwelling] unit”); CITY OF SANTA CLARA, CAL., CODE § 18.06.010 (defining family as “an individual or group of persons living together as a single housekeeping unit in a dwelling unit”); MOUNTAIN VIEW, CAL., CODE § 29.54 (using the same definition as San José); MILPITAS, CAL., CODE § XI-10-2.03 (including in the definition of family “unrelated persons who function together as a single household unit”).

⁴⁹ SAN BENITO COUNTY, CAL., CODE § 25.03.002.

⁵⁰ <https://www.dfeh.ca.gov/wp-content/uploads/sites/32/2018/08/DFEH-AnnualReport-2017.pdf>

Ralph Civil Rights Act, and 10 under the Unruh Civil Rights Act. Of the complaints investigated, 375 received a right to sue letter, which allows the person who filed a complaint to file a civil court case allegation discrimination.

Project Sentinel, which receives housing complaints locally, reported during the community engagement process that from 2016 through September 2019, they have received 598 complaints. Of those, 332 were based on disability, 121 on familial status, 71 on national origin, 33 on race, 40 on sex (including harassment, domestic violence, and lease break/eviction), 4 on source of income, 1 on gender identify, 3 on sexual orientation, 3 on marital status, 3 were “arbitrary” under the Unruh Civil Rights Act, 1 was based on immigration status, and 2 were “other.” Project Sentinel also reported changes in discrimination regarding immigration status – with a marked increase in this type of discrimination following the 2016 election. Project Sentinel reported more fear amongst immigrant communities in bringing housing complaints. In the past, immigrant communities were more likely to fear landlord retaliation or loss of housing, but more recently landlords have threatened to call U.S. Immigration and Enforcement, even when residents are not undocumented.⁵¹

With regard to disability-based complaints, Project Sentinel reports that most are related to requests for reasonable accommodations (e.g., service or companion animals, economic accommodations, tenancy extensions, caregivers, etc.). However, some involve evictions and/or harassment. In Project Sentinel’s last Private Enforcement Initiative (PEI), they conducted family status testing based on UC Berkeley opportunity mapping. After 43 tests, roughly half resulted in a complaint or a landlord education letter. Occupancy limits and state preferences for single professionals often appear in discriminatory housing advertisements. The high level of familial status discrimination was echoed through stakeholder meetings where stakeholders noted that familial status discrimination is often cloaked by pretexts.

Stakeholders also identified high levels of discrimination against people with disabilities, who often have income provided solely by social security and cannot access affordable housing. Stakeholders reported discrimination by landlords against people with psychiatric disabilities, particularly against children. Stakeholders also identified the challenge experienced by non-elderly disabled people who cannot work but who are not eligible for senior housing.

Finally, stakeholders highlighted private discrimination in accessory dwelling units (ADUs). If homeowners receive funding to develop ADUs, these units are governed by rules that restrict monthly rental rates. However, individual homeowners who rent ADUs make the decision to whom to rent their ADUs. Stakeholders expressed concern about increased risk of discrimination, especially by those who are unfamiliar with fair housing laws. To combat this, the Housing Trust Silicon Valley provides fair housing training for homeowners who receive assistance in developing their ADU through their organization.

⁵¹ See AB 291.

The rest of the Region is made up of San Benito County. Private discrimination is not a pressing issue in San Benito County, evidenced by the low numbers of complaints DFEH attributes to the county (i.e., 6 employment, 1 housing, 6 right-to-sue, 13 total).

40. Quality of affordable housing information programs

There are no general-eligibility mobility counseling programs for Housing Choice Voucher holders in the county. There are a couple of discrete programs, which serve very small populations. The Welfare to Work Program receives financial support from the County Social Services Agency to fund housing search staff and assist with housing counseling exclusively for Welfare to Work clients. Silicon Valley Independent Living Center provides housing counseling and placement to developmentally disabled adults. However, because of the recent passage of statewide source of income protections and the fact that the SCCHA is a County-wide agency, the need for mobility counseling is less pressing than in a highly fragmented, proportionally smaller part of a metropolitan area. Moving to a high opportunity area elsewhere in Santa Clara County can be accomplished with relative ease, especially considering that the payment standards in Santa Clara County are higher than the Fair Market Rents. There is a relatively large number of units that fit within these payment standards, and, on this basis, there is little need to port vouchers into another housing authority's territory. Regionally speaking, San Benito County is far less populous and there is less demand to port vouchers into that county. Although there are no mobility-specific housing counseling programs, San Benito County's Housing Element does call for the solicitation of organizations to provide bilingual rental housing counseling services, including tenant/landlord referral and mediation services.⁵²

41. Regulatory barriers to providing housing and supportive services for persons with disabilities

Regulatory barriers to providing housing and supportive services for persons with disabilities are not a significant contributing factor to fair housing issues for persons with disabilities in the Santa Clara Unincorporated County and the cities of Cupertino, Gilroy, Mountain View, Palo Alto, San José, Santa Clara, and Sunnyvale. The amount of affordable housing available (and its cost), the extent of outreach and capacity among service providers, and the scope of service provision are the biggest drivers of the segregation of persons with disabilities. To the extent that barriers are regulatory in nature, they overlap significantly with the zoning and land use barriers to the construction of affordable housing generally. This Assessment discusses those in detail in the analysis of the Land Use and Zoning Laws contributing factor.

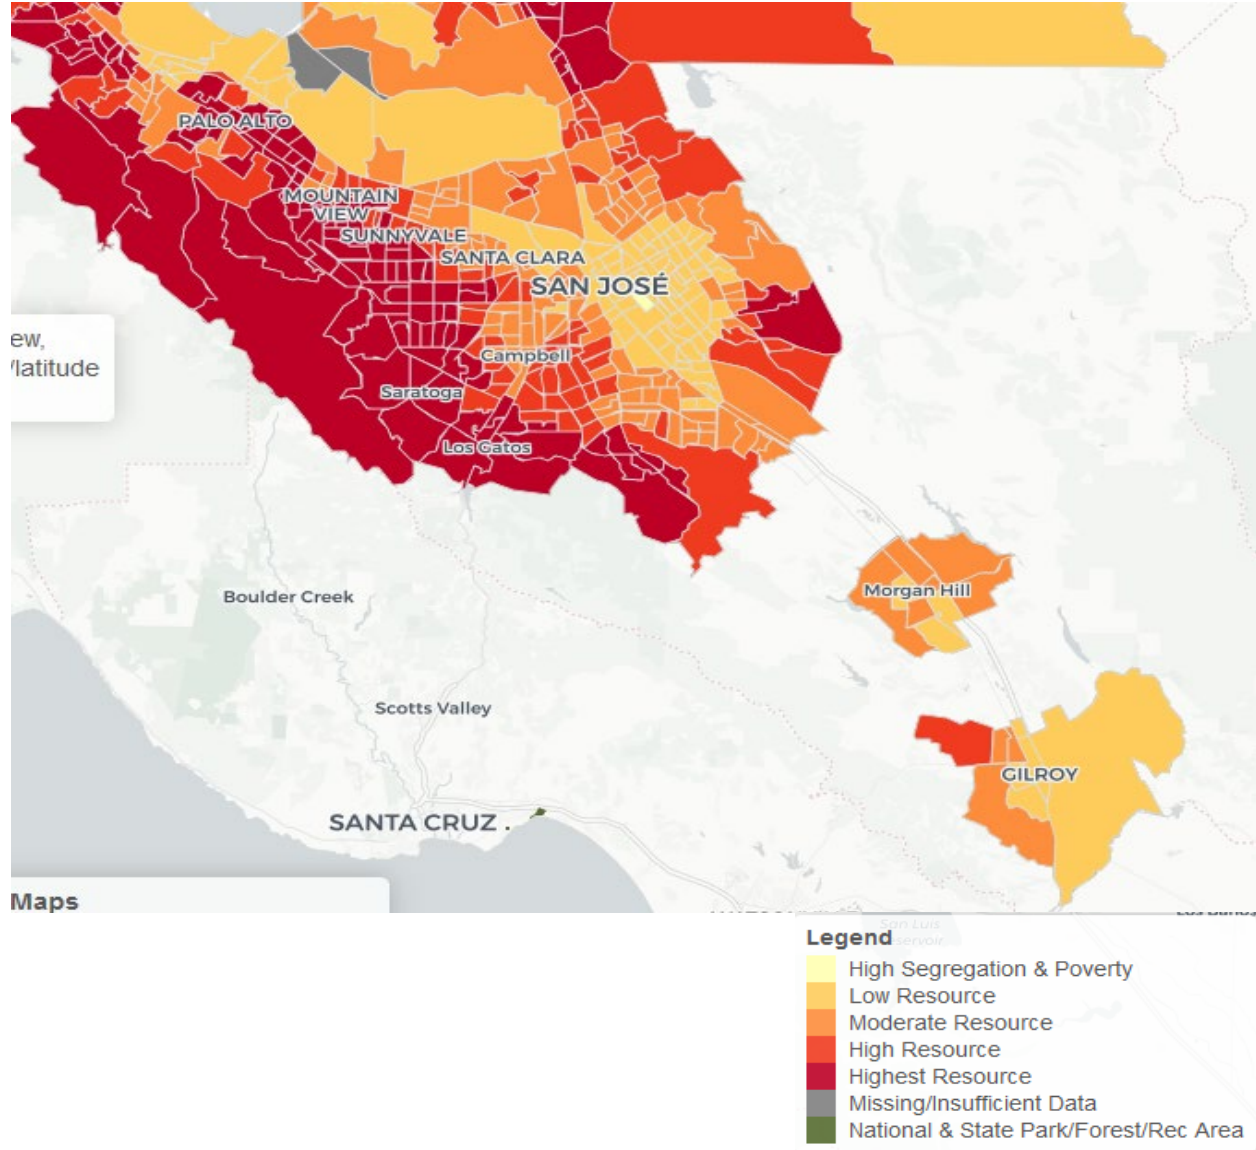

⁵² http://www.cosb.us/wp-content/uploads/2014-2023_Sec5_San_Benito_County_Housing_Element_2016-04-12_BoS_adopted.pdf

42. Siting selection policies, practices, and decisions for publicly supported housing, including discretionary aspects of Qualified Allocation Plans and other programs

The main policy-driven factor related to the siting of publicly supported housing throughout the state is the heavy focus on transit-oriented development. Overall, some of the highest resource areas of the county tend to have less transit access than other parts of the county. When real affordability is built into transit-oriented development, these investments may have a positive effect on stable integration in areas undergoing gentrification by arresting the process of displacement.

The California Tax Credit Allocation Committee's Qualified Allocation Plan (QAP) heavily incentivizes family-occupancy Low Income Housing Tax Credit (LIHTC) development in what it terms "High Resource" or "Highest Resource" areas. As the map below illustrates, these areas are generally high opportunity areas that are disproportionately white. LIHTC development in these areas would contribute to greater residential racial integration. In light of the significant incentives for LIHTC development in High Resource and Highest Resource areas, the QAP does not currently contribute to segregation. At the same time, it is important to note that the California Tax Credit Allocation Committee adopted the incentives against the backdrop of a long history of allocating credits to developments that perpetuated segregation. The QAP includes set-aside pools for the South and West Bay Region (San Mateo and Santa Clara Counties) of 6%, which is roughly equal to its share in the population of the state.

Map 51: CTCAC Opportunity Map 2019

43. Source of income discrimination

In 2017, the Santa Clara County Board of Supervisors passed an ordinance prohibiting source of income discrimination in the unincorporated parts of the county.⁵³ Effective September 27, 2019, San José outlawed source of income discrimination. Santa Clara County had also previously adopted a similar ordinance with respect to its unincorporated areas. In October of 2019 the governor signed into law SB 329, which prohibits discrimination in housing based on source of income. Since San José’s source of income ordinance was only enacted in fall of 2019, and the statewide law took effect shortly after, it is too soon to determine whether widespread compliance will be achieved. If noncompliance remains a problem, landlord education programs may become

⁵³ Santa Clara County Ordinance Sec. B37-2.

necessary. The community engagement process yielded comments on this issue, but many of the comments expressed hope that new law(s) enacted in 2019 would be effective.

44. State or local laws, policies or practices that discourage individuals with disabilities from living in apartments, family homes, supportive housing and other integrated settings

State or local laws, policies, or practices that discourage individuals with disabilities from living in apartments, family homes, supportive housing, and other integrated settings are not a significant contributing factor to fair housing issues in Santa Clara County and the cities of Cupertino, Gilroy, Mountain View, Palo Alto, San José, Santa Clara, and Sunnyvale. A severe shortage of available, integrated affordable housing is the primary driver of the segregation of persons with disabilities, rather than laws, policies, or practices that discourage persons with disabilities from living in integrated housing.

45. Unresolved Violations of Fair Housing or Civil Rights Law

As has been previously discussed in the Fair Housing Enforcement section, there have been very few recent/ongoing actions against any of the entitlement jurisdictions in this analysis, and these actions have been civil rights (though not specifically housing) focused. There have been multiple Voluntary Conciliation Agreements and Consent Decrees concerning fair housing actions occurring in Santa Clara County, but these have been effectuated against private landlords and other business entities, rather than jurisdictions. These successful settlements have been most often brought by Project Sentinel in its capacity as a private fair housing enforcement organization. In the Region, San Benito County experiences far fewer fair housing and civil rights violations than does Santa Clara County. This conclusion is based on complaint reporting from DFEH. Nevertheless, there has been a recent controversy in San Benito County regarding Hollister School District funding, which implicates civil rights issues. It is alleged that developer fees were withheld from the school district, meaning that the schools faced a funding shortage and were therefore more constrained in their ability to provide a quality education for their students. The lawsuit was settled confidentially in 2018.⁵⁴

⁵⁴ <https://benitolink.com/county-and-hollister-school-district-agree-to-confidential-settlement-details-still-sketchy/>

X.6: Supplemental Fair Housing Analysis – Census Designated Places

This section supplements the primary AFH analysis and findings with a detailed analysis of Santa Clara County’s unincorporated areas through the statistical lens of Census Designated Places in Santa Clara County. A Census Designated Place, or CDP, is a statistical geography representing closely settled, unincorporated communities that are locally recognized and identified by name. Areas of the Unincorporated County outside of the CDPs are either too sparsely populated or too small in area to yield statistically significant data for purposes of the assessment of fair housing.

By focusing on Santa Clara County’s CDPs, this section identifies and analyzes local level patterns and trends specific to the Unincorporated County. This CDP-level analysis enables comparison of distinct areas and communities within the Unincorporated County to one another and to the broader AFH analysis and findings in section X.3

This section utilizes the same general data and framework that is analyzed at a countywide level in section X.3 but focuses on identifiable unincorporated communities through the CDPs.

Geographic Level of Analysis

This section focuses on the Unincorporated County’s nine CDPs. Those include the following, shown in the map below:

- **Stanford**—Stanford University campus and the residential area north of campus. Primarily comprised of three Census tracts.
- **Loyola**—Small residential area, mostly made up of two Census tracts.
- **Lexington Hills**—Residential area comprising one Census tract, with the balance in open space or very low-density development. Similar characteristics to unincorporated areas near Saratoga, Los Gatos, Monte Sereno, and other communities within and abutting the Santa Cruz Mountains.
- **Cambrian Park**—Suburban residential area; mostly comprised of two Census tracts.
- **Fruitdale and Burbank**—two CDPs close to one another in Suburban areas of San José and with similar characteristics; largely representative of the surrounding incorporated areas of San José; includes portions of five Census tracts.
- **Alum Rock**—Residential area of San José; mostly comprised of three Census tracts.
- **East Foothills**—Adjacent to Alum Rock and also a residential area of San José; abutting open space; mostly comprised of one Census tract.
- **San Martin**—South County small residential area in between Morgan Hill and Gilroy. Abuts state parks on west and east. Mostly comprised of two Census tracts.

Santa Clara County Census Designated Places (CDPs)

For mapping purposes, data for the CDP areas are shown through the AFFH Data Viewer mapping tool. Supplemental maps highlight conditions within the CDPs and areas immediately surrounding those CDPs. Maps are presented for data variables when there is notable variation in data and conditions.

Demographic Summary

Primary findings.

- Overall, the Unincorporated County is slightly less racially and ethnically diverse than Santa Clara County overall. In the Unincorporated County, 46% of residents report their race and ethnicity as White, non-Hispanic; 31% Hispanic/Latinx; 16% Asian or Pacific Islander; 2% Black or African American; and 5% report other or multiple races. This has changed little since 2010. Between 2000 and 2010, in contrast, the Unincorporated County became more racially diverse, primarily due to the growth of Asian or Pacific Islander residents and residents of other or multiple races.
- Racial and ethnic diversity vary across CDPs, with the most diverse including Fruitdale and Burbank, Alum Rock, and the East Foothills. The least racially and

ethnically diverse areas include one tract in the Stanford CDP, Loyola, and Lexington Hills. San Martin is equally split between White, non-Hispanic, and Hispanic and Latinx residents.

- Racial and ethnic segregation varies within the Unincorporated County. Among CDPs, Loyola and Lexington Hills have high levels of white segregation, as does much of the Stanford CDP surrounding the university. Cambrian Park, Fruitdale, and Burbank all show low to moderate levels of segregation. Alum Rock—a historic cultural enclave for Hispanic and Latinx residents—is characterized as having high segregation for people of color, while nearby East Foothills is integrated. Like Alum Rock, San Martin exhibits high segregation for people of color.
- Although poverty overall is very low in Santa Clara County, racial and ethnic minorities have higher rates of poverty compared to white and Asian residents. Poverty is particularly high for Black or African American residents and American Indian or Alaska Native residents.
- There are very few concentrations of poverty in Santa Clara County; where they exist, concentrations of poverty are located in a few Census tracts within San José. By CDP, no poverty concentrations exist outside of Stanford. However, the neighborhoods adjacent to Fruitdale and Burbank have moderate rates of poverty and Alum Rock has low poverty (10% to 20%), albeit higher than the very low rates in other unincorporated areas.
- Eight percent of residents in Unincorporated County have a disability. The most common disability types are ambulatory difficulties, cognitive difficulties, and independent living difficulties. By CDP, parts of Burbank, Alum Rock, East Foothills, and San Martin have shares of residents with disabilities that exceed the countywide share (10% to 20%).
- Residents with disabilities are unlikely to have many of their accessibility needs met as many residents require greater access to accessible housing units, which are few in number.

Race and ethnicity. The most common racial and ethnic group in the Unincorporated County is White non-Hispanic, and Hispanic residents are the second largest segment of the population, accounting for nearly one-third of residents. Asian and Pacific Islander residents are the third largest group. The population of the region is less heavily white and Hispanic and more heavily Asian and Pacific Islander in comparison to the Unincorporated County. Both the Unincorporated County and the region have low populations of Black and Native American residents.

Since 2000, there has been a slight increase in Asian populations and a decrease in the non-Latinx white population in the Unincorporated County. Latinx and Black residents dropped slightly in numbers.

Population by Race and Ethnicity, 2000-2019, Unincorporated County

Race or Ethnicity	2000	%	2010	%	2019	%
White, Non-Hispanic	55,274	57%	42,417	47%	38,599	46%
Hispanic or Latinx	28,444	29%	30,085	33%	26,054	31%
Asian or Pacific Islander	11,099	11%	12,475	14%	13,232	16%
Black or African American	2,021	2%	1,586	2%	1,583	2%
American Indian/Alaska Native	445	0%	348	0%	142	0%
Other Race/Multiple Races	225	0%	3,049	3%	4,089	5%

Source: 2019 American Community Survey (ACS) Data

The racial and ethnic breakdown by CDP and the Census tracts that make up the largest shares of the CDPs, for 2010 and 2020, are shown in the following table.

- Racial and ethnic diversity vary across CDPs, with the most diverse including Fruitdale and Burbank, Alum Rock, and the East Foothills. In all but one Census tract in Fruitdale, Burbank, and Alum Rock, Hispanic or Latinx residents make up the ethnic majority. These tracts have changed slightly over time with a growth in Asian or Pacific Islander residents.
- CDPs and Census tracts where White, non-Hispanic residents are the majority include one tract in the Stanford CDP, Loyola and Lexington Hills.
- San Martin is about equally split between White, Non-Hispanic White and Hispanic or Latinx residents, with a small Asian population.
- Racial and ethnic shifts have been modest since 2010. The largest shifts, indicated by light grey shading in the table below, have included declines in the White, Non-Hispanic share of residents and growth in Asian or Pacific Islander residents.

i. Segregation/Integration.

Integration and Segregation

“**Integration** generally means a condition in which there is not a high concentration of persons of a particular race, color, religion, sex, familial status, national origin, or having a disability or a particular type of disability when compared to a broader geographic area.

Segregation generally means a condition in which there is a high concentration of persons of a particular race, color, religion, sex, familial status, national origin, or having a disability or a type of disability in a particular geographic area when compared to a broader geographic area.”

Segregation and integration trends vary among geographic areas of Santa Clara County.

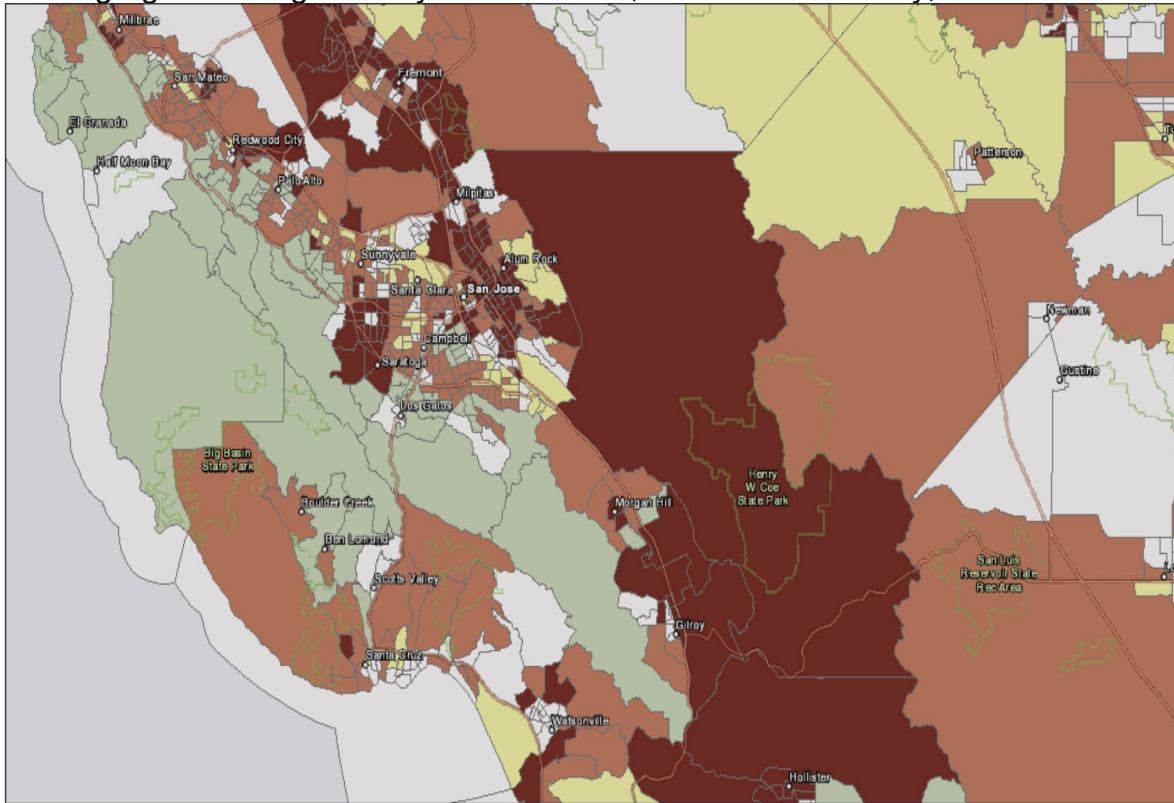

Asian and white segregation

- Areas of Asian population concentration include parts of East, North, and West San José, virtually all of Cupertino, most of Sunnyvale, and parts of Santa Clara. In the affluent West Valley communities like Saratoga, Los Gatos, and Los Altos, the population has become more heavily Asian or Pacific Islander, and these communities all have high combined white and Asian or Pacific Islander populations.
- Areas of white population concentration consist primarily of portions of South and West San José, smaller cities in the West Valley—including the CDPs of Loyola and Lexington Hills—and portions of Mountain View and Palo Alto.

Latinx segregation

- Areas of concentration consist of parts of Downtown, East, and South San José, part of Morgan Hill, most of Gilroy, and Sunnyvale.
- Within the CDPs, Latinx segregation is highest in Alum Rock and San Martin. Alum Rock is a historically Latinx area of San José, comprised of many neighborhoods, some of which are located within city boundaries.
- The incorporated and unincorporated neighborhoods in the affluent foothills—including Loyola and Lexington Hills—have disproportionately small Latinx populations.

Racial Segregation/Integration by Census Tract, Santa Clara County, 2020

Segregation by National Origin & Limited English Proficiency (LEP).

- Segregation trends by national origin and LEP in the Unincorporated County are largely aligned with ethnic segregation. There are relative concentrations of individuals of Mexican national origin in Morgan Hill and San Martin, as well as in unincorporated areas adjacent to the east side of San José including Alum Rock.
- Vietnamese speaking LEP residents are concentrated in areas of the Unincorporated County adjacent to the east side of San José and Milpitas. Chinese speaking LEP residents are relatively concentrated in Cupertino, the west side of San José, and southern Sunnyvale. Tagalog speaking LEP residents are relatively concentrated on the east side of San José but are less heavily concentrated than LEP residents who primarily speak Spanish, Vietnamese, and Chinese. Korean speaking LEP residents are somewhat concentrated in Cupertino and the west side of San José, but they are also less heavily concentrated than most other LEP groups. Persian speaking LEP residents are not concentrated in any particular area.

Segregation by poverty. In 2021, Santa Clara County had an overall poverty rate of seven percent. Poverty rates were highest for American Indian/Alaska Native residents (16%), Black/African American residents (11%), and residents with less than a high school education (14%).

There are very few concentrations of poverty in Santa Clara County; concentrations of poverty are located in a few Census tracts within San José. By CDP, no poverty concentrations exist outside of Stanford. However, the neighborhoods adjacent to Fruitdale and Burbank have moderate rates of poverty and Alum Rock has low poverty (10% to 20%), albeit higher than the very low rates in other unincorporated areas.

Segregation by household income. As noted in the countywide analysis, income segregation is rapidly increasing across the county, due to rising housing costs, stagnant wages, and community disinvestment.

In the County overall, low to moderate income households were more likely to be living in Mountain View, San José, Santa Clara, and Campbell. Cupertino and Saratoga each had one census tract where 50% to 75% of the total population had low to moderate incomes.

The Household Income by Census Tract table below shows the results of an in-depth analysis of income, including poverty-level households, in the unincorporated area. As demonstrated by the above poverty maps, only one high-poverty Census tract exists in the unincorporated area, which is located in the Stanford University area and, as such, represents students. Poverty rates are less than 20% in the vast majority of County neighborhoods—meaning that the majority of the County offers high opportunity environments.

The areas with the lowest median household incomes—excluding the Stanford tracts—are found in Fruitdale/Burbank and Alum Rock. Median incomes in these areas range between \$80,000 and \$107,000—which are still relatively high.

No areas have Census tracts where the share of households with incomes of \$25,000 and lower is more than 30%. Excluding Stanford, the Census tract with the largest share of <\$25,000 households is in Fruitdale/Burbank and is only 16%. And no Census tracts

other than Stanford contain more than 1% of the entire County’s households with incomes <\$25,000.

For households with incomes of \$50,000 and less, the largest shares are in the two Stanford tracts (Tract 5130 and Tract 5116.08), where 49% and 59% of households, respectively, have less than \$50,000 in income. The next largest share is 40%, and moderate-income populations are less concentrated among the Census tracts in the unincorporated areas than in many of the incorporated cities in the County.

Santa Clara County			51536	8%		104992	16%		650352

According to HUD’s AFFH mapping tool, there is only one R/ECAP that is either partially or entirely within the unincorporated areas of Santa Clara County. It is located in south-central San José and includes the County Fairgrounds, which is an unincorporated enclave with no residential development, along with the adjoining residential areas that are within city limits. The R/ECAPs located in incorporated areas are concentrated in Central San José and Gilroy.

Segregation by family status. A small share of children live with a single head of household in the Unincorporated County and region. However, there are notable concentrations of these households specifically in San José and Gilroy.

In the CDPs, however, only Alum Rock shows any variation in female headed households with children. The southeast portion of the CDP has the highest share (although still relatively low at between 20% and 40%) of any area within a CDP.

Female Heads of Households with Children, Alum Rock CDP, 2020

Segregation by disability status. According to 2021 5-year ACS data, only eight percent (8%) of Santa Clara County residents have a disability. Overall, there are no significant concentrations of residents with disabilities, though one Census tract in incorporated San José has a larger population of residents with a disability at between 20% and 30% of the total population.

By CDP, parts of Burbank, Alum Rock, East Foothills, and San Martin have shares of residents with disabilities that exceed the countywide share, but none are high enough to suggest a concentration.

Segregation by tenure. There are no areas with disproportionately high concentrations of renters in the Unincorporated County. Renters are most likely to live in the city of San José; in a corridor along El Camino Real spanning the cities of Mountain View, Palo Alto, Santa Clara, and Sunnyvale; in the unincorporated area encompassing the campus of Stanford University and its immediate surroundings; and in Gilroy. These areas include most of the segregated, predominantly Latinx areas in the region, as well as integrated areas (Mountain View, Santa Clara, and Sunnyvale).

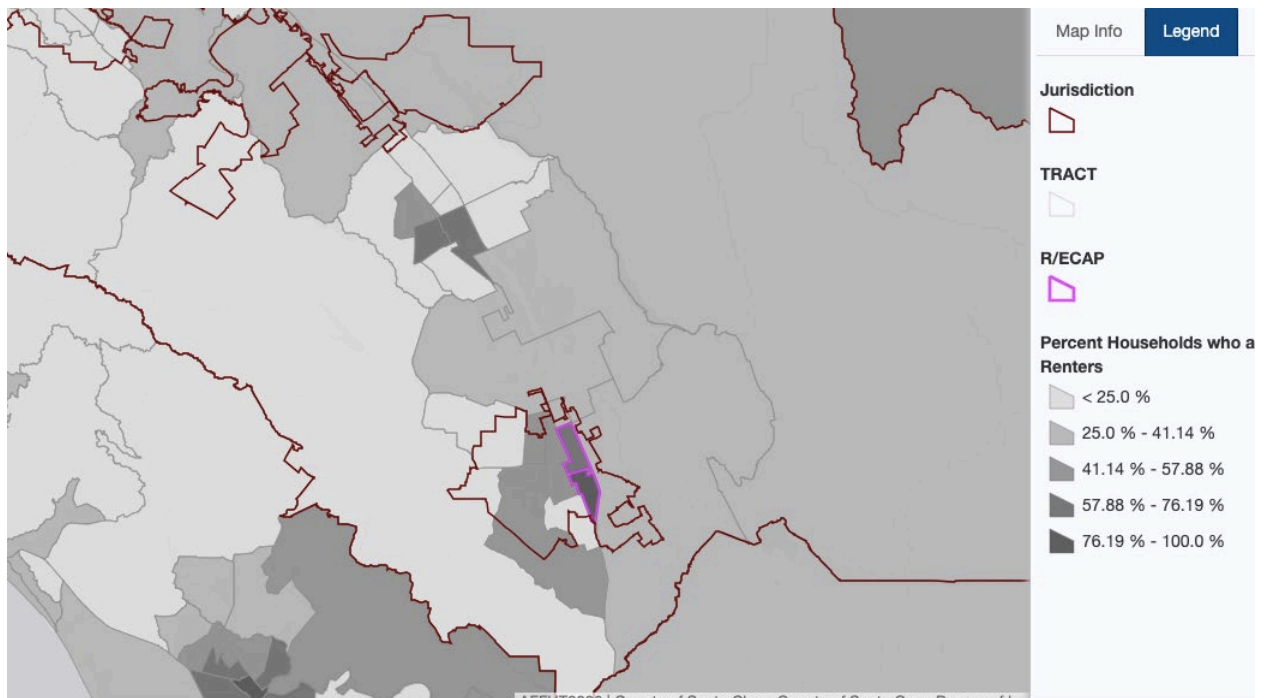

By contrast, areas with high concentrations of owner-occupied homes include Cupertino, Los Altos, Los Altos Hills, Los Gatos, Monte Sereno, Saratoga, south San José, the hills to the east of San José, and rural areas in South County. These areas include areas with relatively low Latinx populations, as well as low Vietnamese populations, though south San José is relatively integrated in comparison to other predominantly owner-occupied communities.

As shown by the maps below, concentrations of renters in the Unincorporated County are located near San José municipal boundaries, within the Stanford CDP, within the San Martin CDP, and, to a lesser extent, in areas near Cambrian Park and Burbank.

Percent of Households who are Renters—North and Central Santa Clara County

Percent of Households who are Renters—Southeast Santa Clara County

ii: Racially or Ethnically Concentrated Areas of Poverty and Racially Concentrated Areas of Affluence

R/ECAPs are geographic areas with significant concentrations of poverty and minority populations. In terms of racial or ethnic concentration, R/ECAPs are areas with a non-white population of 50 percent or more. With regards to poverty, R/ECAPs are Census tracts in which 40 percent or more of individuals are living at or below the poverty limit or that have a poverty rate three times the average poverty rate for the metropolitan area, whichever threshold is lower.

Racially Concentrated Areas of Affluence (RCAAs) are areas with concentrations of white residents and higher income residents. The California Department of Housing and Community Development (HCD) defines RCAAs as having a non-Hispanic white population concentration of at least 1.25 times that of the council of governments region in which a municipality is located and a median household income of at least 1.5 times that of the relevant council of governments region.¹

Both R/ECAPs and RCAAs result from historical development patterns, which are impacted by both private investment and government intervention. Historically, Santa Clara County was a low-population area up until World War 2. Until that point, much of the county was in active agricultural use, with row crops and orchards found throughout the valley.

The original inhabitants of Santa Clara County included the Ohlone (Costanoan) people, who resided in the Coastal Range and valleys from San Francisco and Richmond in the north, to San Luis Obispo in the south, and the Northern Valley Yakuts, who resided in the San Joaquin Valley and surrounding mountains from Sacramento in the north to Bakersfield in the south. These native people were organized into smaller tribes and tribal bands, and estimates place the native population of the South Bay at around 10,000 people prior to the arrival of Europeans, living in settlements supporting 200 to 500 people each.

Spanish colonization of California began in 1769, and locally included Mission Santa Clara de Asís, founded in 1777 on the banks of the Guadalupe River. After several relocations, it is today part of the Santa Clara University campus in the City of Santa Clara. The Pueblo of San José was founded in the same year. Nearby Mission San José was established in 1797 in modern day Fremont (currently in Alameda County). In addition to missionaries, the Spanish and then Mexican governments also established ranchos, large land grants to soldiers and others loyal to the government throughout Alta California. By 1846, the Spanish and Mexican governments had issued over 300 land grants throughout Alta California. Three of these Spanish-era land grants were in the areas of present-day Gilroy and Morgan Hill (Las Animas, San Ysidro, and Los Tularcitos). 36 additional land grants were made by the Mexican government in present day Santa Clara County. These grants ranged from 1,000 to 50,000 acres, and the lands primarily used for growing crops and ranching.

¹ <https://abag.ca.gov/technical-assistance/racially-concentrated-areas-affluence>.

The modern-day State of California was ceded to the United States following the Mexican-American War in 1848, and was admitted as the 31st State in 1850. Santa Clara was one of the original 27 counties created in 1850. San José was one of 8 cities officially incorporated in 1850 in the lead up to statehood (along with San Francisco, Sacramento, Benicia, San Diego, Los Angeles, Santa Barbara, and Stockton) and was the first capital of the state (having become the capital of the California Territory in 1849). A portion of the County was ceded in 1853 to create Alameda County (along with a portion of Contra Costa County).

The California gold rush (1848-1855) had little impact on Santa Clara County beyond the New Almaden mercury mine, and agriculture remained the primary focus of the county until World War 2. The war brought investment to military bases and defense manufacturing, as well as fueling the technology economy sparked by the establishment of Stanford University in 1885. The war also saw the internment of the county's sizable Japanese population. Following the war, the county experienced a population boom. This was fueled by the growing technology economy and federal funding to build new housing. From 1940 to 1970, the county's population grew from 174,949 to 1,064,714 residents. 7 of the 15 cities in the County were incorporated in the 1950's, and other cities embarked on aggressive annexation programs which ended with a joint development agreement between the County and cities to focus urban style development in areas which already have services, and follow orderly expansion in accordance with the policies and the local area formation commission (LAFCO) regulations.

Development during this time was not equitable. Throughout the county, many communities and property owners adopted deed restrictions limiting who could own homes in more expensive areas, usually precluding any non-Whites. In the 1930s, federal agencies adopted a practice of redlining, which designated which neighbors were high or low risk for mortgages. Areas with Black, Hispanic, or Asian populations, such as San José's Japantown, were deemed to be the highest risk areas. Federally funded public housing was segregated, and other programs such as the Veterans Administration home loans were usually reserved only for White applicants. These discriminatory practices were outlawed in 1968 with the passing of the federal Fair Housing Act.

According to HUD's AFFH mapping tool, there is currently only one R/ECAP that is either partially or entirely in the Unincorporated County. This R/ECAP is in South San José and is primarily incorporated (City of San José), however, includes the only unincorporated County property known as the County Fairgrounds property. The County Fairgrounds is an unincorporated enclave with no residential development. The adjoining residential areas are entirely within city limits of the City of San José's jurisdiction. Additional information on the County Fairgrounds and this R/ECAP can be found in Chapter 2 of the County Housing Element, specifically Section 2.03a – Segregation Analysis.

Additional R/ECAPs within Santa Clara County are located within incorporated areas and are concentrated in East and South San José and Gilroy.

Most of the relatively populated portions of the Unincorporated County isare not located in Racially Concentrated Areas of Affluence. The areas within the county that are located in RCAAs include the western parts of Santa Clara County, Morgan Hill, Campbell, and Los Gatos. These areas have relatively higher household incomes, relatively higher concentrations of white residents, and relatively lower concentrations of Hispanic residents. Unincorporated areas that are RCAAs are generally located just to the west of RCAAs that are in incorporated cities, though unincorporated RCAAs stretch farther south along Santa Clara County's border with Santa Cruz County. The total population of these areas is – and has long been – very low in relation to the population of RCAAs in incorporated areas.

Only two census-designated places – Lexington Hills and Loyola – are located within RCAAs. Lexington Hills is located high in the Santa Cruz Mountains. The area was originally home to native people, members of the Ohlone tribal groups, and became an important transit route from Santa Cruz to San José in the 18th and 19th centuries. Small settlements developed around wagon and later train stops, or around logging operations and sawmills. By the 1920s, small groups seeking remote areas to avoid scrutiny built out villages such as Holy City, and wealthy property owners from San Francisco and the Bay Area built small vacation cabins in what are now the Lexington Hills communities. The nature of the community shifted due to man-made events such as the construction of Highway 17, bypassing some communities, and the creation of the Lexington Reservoir, flooding two communities. Population growth and rising costs of housing in the valley areas of the County have pushed more residents to seek homes in the Lexington Hills area, in addition to those seeking a more remote and rustic lifestyle.

Lexington Hills is located in an area that has very high fire risk and is in close proximity to the San Andreas Fault. This area was the epicenter of the 1989 Loma Prieta Earthquake, and the site of the 1985 Lexington Fire, which covered over 13,000 acres and destroyed 42 homes. The area is also adjacent to several major fires, including the 1961 Austrian Gulch Fire, the 2002 Croy Fire, 2008 Summit Fire, the 2016 Loma Fire, and the 2020 SCZ Lightning Complex Fire. The area also lacks public transportation, sewer service, and, in many cases, piped water. These considerations, which also influence property insurance rates, make the development of housing types that are more affordable to low- and moderate-income households infeasible by necessitating large lot sizes. Similarly, the same factors ensure that the cost of subsidizing less economical housing types – such as detached single-family homes on large lots – to the point that they would be affordable is excessive and largely financially infeasible. Although it may be possible to build two-to-four-unit structures in environmentally sensitive areas like Lexington Hills, doing so would still require large lots in order to install onsite wastewater treatment systems. Doing so would also result in moving more low- and moderate-income people into areas with high risks of devastating wildfires, earthquakes, and landslides caused by geologic and rain events.

Unincorporated RCAs in Santa Clara County that do not contain census-designated places generally have the same obstacles to creating more inclusive communities as does Lexington Hills and often to an even greater degree.

Loyola, particularly the portions of it east of I-280, is not subject to as significant environmental constraints as Lexington Hills. Notwithstanding, lot sizes within the community tend to be quite large, consistent with the R1E zoning that is prevalent in the area. This area was originally a large undeveloped parcel purchased by Santa Clara University with the intention of creating a new campus, however a lack of funding led the university to sell the land to a private developer. Residential development of the area was part of a plan that included the construction of the Los Altos Golf & Country Club in the 1920s, although some homes are considerably newer. Other than the country club of the golf course, the entire district is zoned as single-family residential.

In this instance, the building of detached single-family homes on large lots preceded the adoption of zoning that mandated that form of development as the County did not adopt its first zoning ordinance until 1937. The initial development of Loyola as an affluent and all-white community was driven principally by speculative private sector investment, enforced by deed restrictions, rather than County policy, but County policy later reinforced those choices. In 1994, the County adopted a zoning overlay district for the Loyola area at the request of residents, with the justification of aligning the district with standards found in the neighboring city of Los Altos. These restrictions added a maximum floor area ratio (FAR) of 35% in most cases, with an absolute floor area cap on larger lots, to the existing larger minimum lot sizes. As tech companies expanded in the west valley area and San Francisco Peninsula, Loyola's draw as a wealthy bedroom community has grown, and with it there has been a demographic shift. In 2010, 2,222 of the 3,261 residents identified as White alone (68%), while 757 identified as Asian alone (23%). In 2020, 2,001 of the 3,491 residents (57%) identified as White alone, while 1,109 (32%) identified as Asian alone.

Today, while a 35% floor area ratio restriction exists to more closely align with the development restrictions of surrounding cities, the applicable County zoning is not the only barrier to building more racially and socioeconomically inclusive housing in Loyola. The area lacks job centers and services, as well as public transportation to neighboring areas with those resources. Additionally, land costs and the lack of vacant or underutilized parcels are limitations. The County will have to be opportunistic and provide a comprehensive approach to overcome those hurdles. One possible option, beyond the acquisition of expensive parcels with single-family homes that may be at the end of their useful life in the future, would entail partnering with religious congregations, like the Antiochian Orthodox Church of the Redeemer, that own land within Loyola. Lastly, if the country club site ever became available for redevelopment, that could transform the community in a manner that could possibly further the purposes of the Fair Housing Act. At the present time, there is no indication of large opportunity sites that may come on the market in the near future to create the opportunity to plan for greater residential affordable development.

Current R/ECAPs, Santa Clara County

iii: Disparities in Access to Opportunity

Primary findings.

- The student population is far more diverse than the overall population in Santa Clara County. Hispanic students comprise the greatest share (39%) followed by Asian and non-Hispanic white students. More than a quarter are socioeconomically disadvantaged and one in five are English learners.
- Low-income families, students with special needs, and most racial and ethnic groups face barriers accessing positive education outcomes compared to white and Asian students.
 - Hispanic and low-income families had the lowest early care and education attendance rates among children under six years.
 - Black or African American students, disabled students, and socioeconomically disadvantaged students were least likely to meet English and Math testing standards.
- The suspension rate for disabled students is three times greater than that for non-disabled students. High suspension rates for students with disabilities are most prominent in the Gilroy Unified and Morgan Hill Unified school districts.
- Job proximity is highest in portions of the West Valley and is lowest in South County. Labor market engagement—which is influenced by proximity to job centers—is highest in the West Valley, comparatively moderate in Campbell, and lowest in South County.
- The Unincorporated County is comparatively limited in the public transportation and transit options available for residents and workers. This is true for both affluent areas and low to moderate income areas in the South County. High income households are less affected, however, because they have higher rates of vehicle ownership. Workers commuting to work by the 68 bus from Gilroy to San José would endure a commute of at least 1 hour and 51 minutes (round trip).
- Lower income Census tracts in San José and Gilroy have comparatively less healthy conditions as indicated by the Healthy Places Index of 23 social determinants of health indicators. Additionally, San José and Gilroy are designated as food deserts by the USDA indicating that the majority of the population in these areas live at least one mile from a supermarket.
- Santa Clara County has an extreme jobs-housing imbalance, as indicated by the Labor Market and Jobs Proximity Indices that disproportionately impacts Latinx and Vietnamese residents.

Access to Opportunity

“**Access to opportunity** is a concept to approximate place-based characteristics linked to critical life outcomes. Access to opportunity oftentimes means both improving the quality of life for residents of low-income communities, as well as supporting mobility and access to ‘high resource’ neighborhoods. This encompasses education, employment, economic development, safe and decent housing, low rates of violent crime, transportation, and other opportunities, including recreation, food, and healthy environment (air, water, safe neighborhood, safety from environmental hazards, social services, and cultural institutions).”

Source: California Department of Housing and Community Development Guidance, 2021, page 34.

Disparities in Access to Opportunity – Education. Residents of Santa Clara County have high levels of education. According to 2021 5-year American Community Survey (ACS) data, 28% of residents have a bachelor’s degree and 27% have a graduate or professional degree.

Santa Clara County is served by 12 school districts and 32 Local Education Agencies (LEAs). For the 2021-2022 academic school year, Santa Clara County had a total of 408 schools with a total enrollment of 241,326 students in elementary to high school.²

According to student data from the Office of Education, there were 4,480 English learners in Santa Clara County’s school districts during the 2021-22 academic year (grades K-12). Students learning English are more likely to speak Spanish, Vietnamese, Mandarin, Amharic, and other non-English languages. Less than one percent of students account for all other languages.

In the 2018-2019 academic year, Santa Clara County had a total of 29,292 students enrolled in special education programs. Of these students, the most common disability types are learning disabilities (37%) followed by speech impairments, autism, and other health impairments. Intellectual and emotional disabilities account for less than 10% of students enrolled in special education.

HUD’s quality educational access index suggests that Asian or Pacific Islander and white children have the best access to proficient schools; Latinx residents have the lowest access.

Residents of Indian, Chinese, and Taiwanese national origin are most likely to live in the West Valley in areas with highly proficient schools. People of Mexican national origin are most likely to live in unincorporated areas adjacent to the east side of San José as

² https://www.sccoe.org/aboutsccoe/Documents/IMPACT_Brochure_2023.pdf.

well as in Morgan Hill and San Martin, areas with relatively lower access to proficient schools.

Postsecondary education. Of students who completed high school in Santa Clara County, 78% enrolled in college within 12 months of graduation (called the College Going Rate or CGR). Santa Clara County's CGR is significantly higher than that of the state: California public high schools have an average CGR rate at only 62%.

The number of high school graduates enrolled in college varies by race and ethnicity, special needs, and by school district.

- Los Gatos-Saratoga Union High School District had the highest college-going rate with 88% of students enrolled in college. Fremont Union and Palo Alto Unified districts also had high rates at 86%.
- Hispanic or Latino students are far less likely to attend college after high school graduation than other racial and ethnic groups. Other racial disparities include:
 - Hispanic/Latino students in Santa Clara Unified are significantly less likely to enroll in college: only five percent of students enrolled in college after high school graduation.
 - In all school districts, over 85% of Asian students attended college. College-going rates are highest in Fremont Union High, Los Gatos-Saratoga Union High, and Milpitas Unified.
 - College-going rates for Black or African American students are particularly low in Gilroy Unified and higher in Fremont Union High (93%) and Mountain View-Los Altos Union High (91%).
 - Palo Alto Unified had the highest college-going rate for Filipino students: all Filipino students in the district enrolled in college after graduating high school in 2020-21.
 - On average, 55% of students with disabilities in Santa Clara County attended college after high school graduation. Students with disabilities attending schools in East Side Union High and Gilroy Unified have lower college-going rates than other districts. Los Gatos-Saratoga High School has notably higher rates at 79% (similar to socioeconomically disadvantaged students).
 - Socioeconomically disadvantaged students have comparatively higher college-going rates than other special needs groups, particularly in Los Gatos-Saratoga Union High, Palo Alto Unified, and Milpitas Unified districts.

Source: California Department of Education.

Disparities in Access to Opportunity – Employment. In the Unincorporated County, white and Asian or Pacific Islander residents have the highest levels of labor market engagement; Black residents have somewhat lower levels of labor market engagement; and Latinx and Native American residents have the lowest levels of labor market engagement. All racial and ethnic groups have broadly similar levels of proximity to jobs.

Geographically, job proximity is highest in portions of the West Valley and is lowest in South County. Labor market engagement is highest in the West Valley, comparatively moderate in Campbell, and lowest in South County. In general, areas that are more heavily white have higher labor market engagement and proximity to jobs, and areas that are more heavily Latinx have lower labor market engagement and proximity to jobs.

Areas with high jobs proximity are concentrated in the north and west sides of San José, in Cupertino, in Palo Alto, and in the parts of Mountain View, Santa Clara, and Sunnyvale that are between U.S. Route 101 and the San Francisco Bay. These parts of the latter three cities are actually more heavily Latinx than their encompassing cities but are less heavily Latinx than other parts of the region, such as the east side of San José, Morgan Hill, and Gilroy.

Disparities in Access to Opportunity – Transportation. For the Unincorporated County, high quality transit areas are located in:

- The Stanford area,
- The southeastern portion of Cambrian Park,
- Fruitdale and Burbank,
- Alum Rock, and
- San Martin.

And are lacking in:

- Loyola,
- Lexington Hills, and
- East Foothills (although the area is adjacent to high quality transit areas).

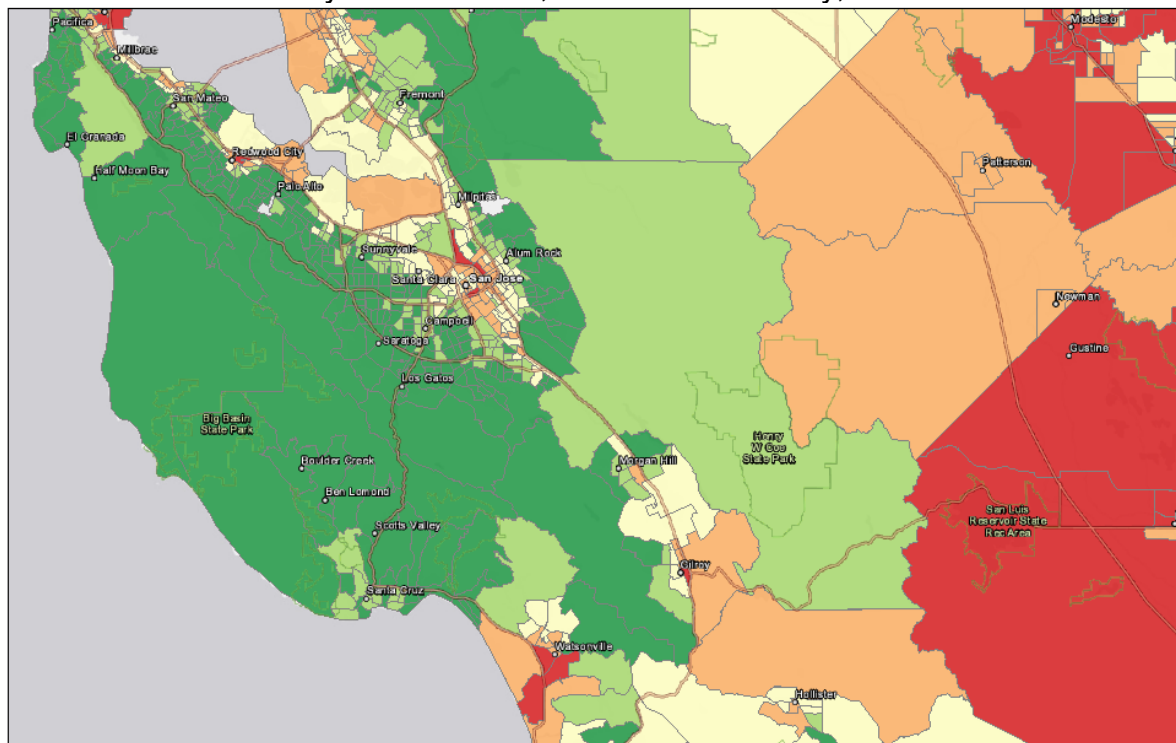

The areas where high quality transit is lacking are all affluent areas. Lack of high-quality transit in these areas affects workforce trying to access those areas more than residents trying to access work opportunities elsewhere.

Disparities in Access to Opportunity – Access to Environmentally Healthy Neighborhoods. According to access to opportunity indices, in the Unincorporated County, Black, Latinx, and Native American residents face slightly less access to environmentally healthy neighborhoods than do white or Asian residents. However, the disparity is most significant for Black residents, who comprise a very small part of the county's residents.

The following maps show the CalEnviroScreen score for Santa Clara County and the CDPs. The maps show that:

- Most areas in Santa Clara County have more positive environmental factors with scores between 0 and 20 and up to 40.
 - Burbank, areas near Fruitdale, parts of Alum Rock, and San Martin have moderately high risk factors.
 - San José and Gilroy are outliers and are characterized by more negative environmental factors and overlap with low income communities.
- **San José:** three Census tracts in the inner portion of the city have the worst environmental factors with scores above 80.
- **Gilroy:** one Census tract with the worst environmental factors; all others range between 40 and 80.

As part of the Public Health Alliance of Southern California project, the Healthy Places Index (HPI)—a policy platform to advance health equity through open and accessible data—maps data on the social conditions that drive health including education and job opportunities, clean air and water, and other indicators positively associated with life expectancy at birth.³ The HPI for Santa Clara County shows that:

- The majority of Santa Clara County and the CDPs have healthy community conditions with the exception of Census tracts in San José. There are a few Census tracts in the city with the lowest index score while others were scored between 25 and 50. Gilroy, however, has comparatively lower healthy conditions.
- Tracts with the least healthy community conditions overlap with concentrations of low-income households.

iv: Special Needs Populations

Primary findings.

- Certain groups have special housing needs. This includes low-income families, large households, female-headed households, seniors, people with disabilities, people experiencing homelessness, farmworkers, and non-English speakers. This section explores the needs beyond cost of housing for these populations.
- Large households (with five or more people) that rent are susceptible to overcrowding. While a majority of 0-, 1-, and 2-bedroom residential units in the Unincorporated County are available for rent, only 14.5% of residential units with three or more bedrooms are available for rent.
- Single-parent households are susceptible to housing insecurity, particularly female-headed households, due to pervasive gender inequality resulting in lower wages for women in the workforce.
- Seniors face challenges including fixed incomes, disabilities, chronic health conditions, and/or reduced mobility.
- People with disabilities, whether they are living with physical, cognitive, or sensory impairments, are more likely to live on fixed-incomes and to need specialized care. They are impacted by both the cost of housing and the design of housing. People with disabilities may be more reliant on public transit, family members, or care givers for transportation.
- People experiencing homelessness face pressures from vast income disparities and extreme housing costs. Additionally, people of color are more likely to experience poverty and financial instability as a result of federal and local housing policies that have historically excluded them. Many people experiencing homelessness are also dealing with severe issues such as mental illness, substance abuse, or domestic violence.
- Farmworkers are vital to the agricultural community, however, generally receive wages that are considerably lower than other jobs. They may also have temporary housing needs if they relocate from one area to another with the changing seasons.
- Non-English Speakers face challenges when engaging in the housing market, including a lack of understanding of their rights when it comes to housing law, including evictions.

Households with Special Needs

“Housing Element Law inherently promote(s) more inclusive communities, such as by addressing the disproportionate housing needs of lower income households, and households with special needs (e.g., persons with disabilities, elderly, large households, single-parent households, farmworkers, and people experiencing homelessness). For example, Housing Element Law requires local governments to make diligent efforts to include all segments of the community in public participation. Housing Element Law requires specific analysis of persons and households with special needs and commensurate development of policies and programs.”

Source: California Department of Housing and Community Development Guidance, 2021, pages 9 and 10.

Large Households

Large households often have different housing needs than smaller households. If a city’s rental housing stock does not include larger apartments, large households who rent could end up living in overcrowded conditions. In the Unincorporated County, for large households with 5 or more persons, most units (74.2%) are owner occupied. In 2017, 18.0% of large households were very low-income, earning less than 50% of the area median income (AMI).

Unincorporated County Household Size by Tenure

Universe: Occupied housing units

Source: U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25009

Existing Resources and Gaps in Resources

The unit sizes available in a community affect the household sizes that can access that community. Large families are generally served by housing units with 3 or more bedrooms, of which there are 17,218 units in the Unincorporated County. Among these large units with 3 or more bedrooms, 14.5% are renter-occupied and 85.5% are owner occupied.

In the Unincorporated County, out of the 24,801 occupied housing units 3,033 were large households made up of 5 or more household members, making approximately 12% of all households. In addition, 18% (544 large family household) were very low income, earning less than 50% of the AMI. For large households with 5 or more people (3,033 households) most units (74% or 2,250 units) are owner occupied. Large families are generally served by housing units with 3 or more bedrooms.

Unincorporated County Housing Units by Number of Bedrooms

Universe: Housing units

Source: U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25042

Large family households often have special needs due to a lack of adequately sized affordable housing available. The higher costs required for homes with multiple bedrooms can result in larger families experiencing a disproportionate cost burden than the rest of the population and can increase the risk of housing security. In the Unincorporated County, twenty-one percent of large family households experience a cost burden of 30-50% while 12% of households spend more than half of their income on housing. Some twenty percent of households earning between 30-50% with 18% spending more than 50% of their income on housing.

Unincorporated County Household Size by Household Income Level

Universe: Occupied housing unit

U.S. Department of Housing and Urban Development (HUD), *Comprehensive Housing Affordability Strategy (CHAS) ACS tabulation, 2013-2017 releases*

Proposed Policies, Program and Funding to Help Address Gap

As with other special needs groups, large families would benefit from multi-family housing development that includes three or more bedrooms. The County through implementation of *Program 1.1, “Supportive Housing Development Fund Notice of Funding Availability (SHDF NOFA)”* aims at increasing housing for families. New affordable housing for families funded by the County through Program 1.1 requires that at least 25% of the units in the project be three-bedroom or larger units. In addition, through program 1.21, *“Homelessness Prevention System”* the County provides financial assistance, legal services, and case management for households who are at risk of homelessness due to displacement.

Female-Headed Households

Households headed by one person are often at greater risk of housing insecurity, particularly female-headed households, who may be supporting children or a family with only one income. In the Unincorporated County, the largest proportion of households is Married-couple Family Households at 59.9% of total, while Female-Headed Households make up 8.1% of all households.

Unincorporated County Housing Tenure by Household Type

Universe: Occupied housing units

U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25011

Female-headed households with children may face particular housing challenges, with pervasive gender inequality resulting in lower wages for women. Moreover, the added need for childcare can make finding a home that is affordable more challenging. In the Unincorporated County, 26.9% of female-headed households with children fall below the Federal Poverty Line, while 8.4% of female-headed households without children live in poverty.

Unincorporated County Female-Headed Households by Poverty Status

Universe: Female Households

U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B17012

Proposed Policies, Program and Funding to Help Address Gap

As mentioned under Large Households, the County provides financial assistance, legal services, and case management through program 1.21, “Homelessness Prevention System” for households who are at risk of homelessness due to displacement. Approximately 70% of households served in Fiscal Year 2023 were female-headed households.

Seniors

Senior households often experience a combination of factors that can make accessing or keeping affordable housing a challenge. They often live on fixed incomes and are more likely to have disabilities, chronic health conditions and/or reduced mobility. Seniors who rent may be at even greater risk for housing challenges than those who own, due to income differences between these groups.

Gaps in Resources

The largest proportion of senior households who rent make 0%-30% of AMI, while the largest proportion of senior households who are homeowners falls in the income group Greater than 100% of AMI.

Unincorporated County Senior Households by Income and Tenure

Universe: Senior households

U.S. Department of Housing and Urban Development (HUD), Comprehensive Housing Affordability Strategy (CHAS) ACS tabulation, 2013-2017 release

There are 2,788 senior households in the Unincorporated County that earn less than 80 percent of AMI. When cost-burdened seniors are no longer able to make mortgage or rent payments, displacement from their homes can occur, putting further stress on the local rental market or forcing residents out of the community they call home.

Understanding how seniors might be cost-burdened is of particular important due to their special housing needs, particularly for low-income seniors. In the Unincorporated County, 59 percent of seniors making less than 30 percent of AMI are spending the

majority of their income on housing. For seniors making more than 100 percent of AMI, 83 percent are not cost-burdened and spend less than 30 percent of their income on housing.

Unincorporated County Cost-Burdened Senior Households by Income Level

Universe: Senior households

U.S. Department of Housing and Urban Development (HUD), Comprehensive Housing Affordability Strategy (CHAS) ACS tabulation, 2013-2017 release

Proposed Policies, Programs, and Funding to Help Address Gap

To address the needs of lower-income seniors in the future, *Program 1.1, "Supportive Housing Development Fund Notice of Funding Availability (SHDF NOFA)"* is meant to incentivize the construction of ELI housing units including special needs populations like seniors, previously unhoused individuals, transitioned-aged youth, families, farmworkers, and housing for people with disabilities including developmental disabilities. *Program 1.11, "Internal Coordination of Housing Funds and Services"* includes working with the Department of Aging and Adult Services to assist older adults and adults with disabilities, and their families, to maximize self-sufficiency, safety, health, and independence so that they can remain living in the community for as long as possible and maintain the highest quality of life. Finally, through the implementation of *Program 1.31 "Minor Home Repair and Maintenance Program"*, lower income seniors are providing with home safety repairs, fall prevention, accessibility and mobility and other similar repairs that help seniors age in place.

People With Disabilities

People with disabilities face additional housing challenges. Encompassing a broad group of individuals living with a variety of physical, cognitive, and sensory impairments, many people with disabilities live on fixed incomes and are in need of specialized care,

yet often rely on family members for assistance due to the high cost of care. Many individuals with disabilities live on a small, fixed income, limiting their ability to pay for housing. Some adults with developmental disabilities depend on monthly income of around \$1,000 from the Supplemental Security Income (SSI) program, limiting the options to find an affordable housing unit. Those with employment tend to work part-time in the lowest paid jobs and also struggle to income-qualify for many of the affordable housing units that may be available for rent in the Unincorporated County. Most adults with developmental disabilities also do not drive or own a car and many rely on public transit to access services in the community. Many people with disabilities experience severe rent burden, housing instability and displacement. Such disparities are attributable to the lack of housing affordable to ELI households.

Existing Resources and Gaps in Resources

When it comes to housing, people with disabilities are not only in need of affordable housing but accessibly designed housing, which offers greater mobility and opportunity for independence. Unfortunately, the need typically outweighs what is available, particularly in a housing market with such high demand. People with disabilities are at a high risk for housing insecurity, homelessness, and institutionalization, particularly when they lose aging caregivers. The rates at which different disabilities are present among residents of Unincorporated Santa Clara County. Overall, 8.3% of people in the Unincorporated County have a disability of any kind.

Unincorporated County Disability by Type

*Universe: Civilian noninstitutionalized population 18 years and over
U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B18102, Table B18103, Table B18104, Table B18105, Table B18106, Table B18107.*

Developmental disabilities are defined as severe, chronic, and attributed to a mental or physical impairment that begins before a person turns 18 years old. This can include Down’s Syndrome, autism, epilepsy, cerebral palsy, and mild to severe mental retardation. Some people with developmental disabilities are unable to work, rely on

Supplemental Security Income, and live with family members. In addition to their specific housing needs, they are at increased risk of housing insecurity after an aging parent or family member is no longer able to care for them. In the Unincorporated County, of the population with a developmental disability, children under the age of 18 make up 48.3%, while adults account for 51.7%.

The most common living arrangement for individuals with disabilities in the Unincorporated County is the home of parent /family /guardian.

Proposed Policies, Programs, and Funding to Help Address Gap

To address the needs of lower-income people with disabilities in the future, *Program 1.1, “Supportive Housing Development Fund Notice of Funding Availability (SHDF NOFA)”* is meant to incentivize the construction of ELI housing units including housing for people with disabilities including developmental disabilities. Implementation of *Program 1.20, “San Andreas Regional Center (SARC)”* will help those experiencing homeless or who formerly experienced homelessness and who have reported an intellectual and developmental disability to access SARC’s services, help SARC’s clients who are experiencing or are at-risk of homelessness to access supportive housing or homelessness prevention services and ensure that individuals or families who move into County-funded housing units for individuals with an intellectual or development disability receive the services they need to obtain and maintain their housing, and live as independently as possible. One of the contributing factors to fair housing issues is access to publicly supported housing for persons with disabilities. This

partnership aims to remove housing barriers and provide households with access to affordable, integrated housing.

Homelessness

Homelessness remains an urgent challenge in many communities across the state, reflecting a range of social, economic, and psychological factors. Rising housing costs result in increased risks of community members experiencing homelessness. Far too many residents who have found themselves housing insecure have ended up unhoused or homeless in recent years, either temporarily or longer term. Addressing the specific housing needs for the unhoused population remains a priority throughout the region, particularly since homelessness is disproportionately experienced by people of color, people with disabilities, those struggling with addiction and those dealing with traumatic life circumstances.

In Santa Clara County, the most common type of household experiencing homelessness is those without children in their care. Among households experiencing homelessness that do not have children, 87.1% are unsheltered. Of homeless households with children, most are sheltered in emergency shelter.

Homelessness by Household Type and Shelter Status, Santa Clara County 2019

	People in Households Composed Solely of Children Under 18	People in Households with Adults and Children	People in Households without Children Under 18
Sheltered - Emergency Shelter	7	377	696
Sheltered - Transitional Housing	3	301	400
Unsheltered	266	243	7,413

U.S. Department of Housing and Urban Development (HUD), Continuum of Care (CoC) Homeless Populations and Subpopulations Reports (2019).

People of color are more likely to experience poverty and financial instability as a result of federal and local housing policies that have historically excluded them from the same opportunities extended to white residents. Consequently, people of color are often disproportionately impacted by homelessness, particularly Black residents of the Bay Area. In Santa Clara County, White (Hispanic and Non-Hispanic) residents represent the largest proportion of residents experiencing homelessness and account for 43.9% of the homeless population, while making up 44.5% of the overall population.

In Santa Clara County, Latinx residents represent 42.7% of the population experiencing homelessness, while Latinx residents comprise 25.8% of the general population.

Racial Group Share of General and Homeless Populations, Santa Clara County

Universe: Population experiencing homelessness
 U.S. Department of Housing and Urban Development (HUD), Continuum of Care (CoC) Homeless Populations and Subpopulations Reports (2019); U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B01001(A-I)

Hispanic Share of General and Homeless Populations, Santa Clara County

Universe: Population experiencing homelessness
 U.S. Department of Housing and Urban Development (HUD), Continuum of Care (CoC) Homeless Populations and Subpopulations Reports (2019); U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B01001(A-I)

Many of those experiencing homelessness are dealing with severe issues – including mental illness, substance abuse and domestic violence – that are potentially life threatening and require additional assistance. In Santa Clara County, homeless individuals are commonly challenged by severe mental illness, with 2,659 reporting this condition. Of those, some 87.6% are unsheltered, further adding to the challenge of handling the issue.

Characteristics for the Population Experiencing Homelessness

Unhoused Status	Chronic Substance Abuse	HIV/AIDS	Severely Mentally Ill	Veterans	Victims of Domestic Violence
Sheltered - Emergency Shelter	128	5	201	79	52
Sheltered - Transitional Housing	153	11	130	129	20
Unsheltered	1,668	65	2,328	445	383

Although the sheltered homeless count has varied over time (including changes in HUD definition), the unsheltered count has the greatest influence on the overall number of homeless people in the county and is the most visible manifestation of this challenge for the broader community. The County conducts a Point in Time Count of people experiencing unsheltered homelessness as required by HUD.

Point-in Time Count

* Cities with unsheltered or sheltered populations <11 in a given year were moved to Unincorporated due to small sample size

In 2015, the Santa Clara County community came together to create a roadmap to guide the collective efforts to end homelessness. Coordinated by the Office of

Supportive Housing and nonprofit partner Destination: Home, the resulting 2015-2020 Community Plan set ambitious goals and identified strategies to help the community achieve this shared vision. Despite ending homelessness for over 14,000 people between 2015 and 2019, thousands of people became homeless for the first time as a result of vast income disparities and extreme housing costs in the county. In 2020, the community again came together to evaluate progress since 2015 and set new, ambitious targets towards ending and preventing homelessness.

In the Unincorporated County, the student population experiencing homelessness totaled 299 during the 2019-20 school year and increased by 27.2% since the 2016-17 school year. By comparison, Santa Clara County has seen a 3.5% increase in the population of students experiencing homelessness since the 2016-17 school year, and the Bay Area population of students experiencing homelessness decreased by 8.5%. During the 2019-2020 school year, there were still some 13,718 students experiencing homelessness throughout the region, adding undue burdens on learning and thriving, with the potential for longer term negative effects. The number of students in the Unincorporated County experiencing homelessness in 2019 represents 13.0% of the Santa Clara County total and 2.2% of the Bay Area total.

Proposed Policies, Programs, and Funding to Help Address Gap

Implementation of *Program 1.24, "2020-2025 Community Plan to End Homelessness"* will serve as our roadmap for ending homelessness in Santa Clara County and is organized around three main strategies: (1) Address the root causes of homelessness through system and policy change, (2) Expand homelessness prevention and housing programs to meet the need, and (3) Improve quality of life for unsheltered individuals and create healthy neighborhoods for all. The strategies included in this plan are grounded in evidence-based practices, lessons learned over the past five years, and robust conversations and input from more than 8,000 members of our community, including people with lived experience of homelessness, subject matter experts, key stakeholders, and community members. In addition, this plan sets aggressive targets designed to reverse the current growth in homelessness we are experiencing and bring us one step closer to our collective goal of eliminating homelessness in our community.

Farmworkers

Across the state, housing for farmworkers has been recognized as an important and unique concern. Farmworkers generally receive wages that are considerably lower than other jobs and may have temporary housing needs. Finding decent and affordable housing can be challenging, particularly in the current housing market. Workers in the agricultural industry have disproportionate needs that will require strategic planning from the County and regional and local partnerships.

Trends, Characteristics, and Disproportionate Needs

The agricultural history of Santa Clara County stretches back centuries. Historically and to this day, the fertile valley floor has produced abundant fruits, vegetables, and nursery crops, with production often managed by local resident farmers. The most recent USDA Census of Agriculture reported that, as of 2017, there were 890 farms with over 288,000 acres of land in Santa Clara County, producing over \$310 million of produce. Of these farms, 40% hire farm labor, and these farmworkers are an integral part of the agricultural industry.

According to the Santa Clara County 2021 Crop Report, there are approximately 8,000 farmworkers in the county, supporting a \$340 million industry that provides food to local residents, the region, and beyond. As the County implements additional measures to preserve agricultural lands, the need for farmworker housing is unlikely to diminish.

The nature of commercial agriculture in Santa Clara County has evolved significantly over the decades since it was known primarily as an agricultural economy, nicknamed the “Valley of Heart’s Delight.” Santa Clara County, once the fruit capital of the world with over one hundred thousand acres planted in fruit and nut trees, has seen a significant loss of agricultural land since the 1940s. Recognizing the rapid conversion of prime farmland within the county over the past two decades, the County of Santa Clara developed the Santa Clara Valley Agricultural Plan to identify and prioritize key strategy areas, policies, and programs that support and encourage existing and future agricultural operations.

On January 9, 2018, the County Board of Supervisors formally adopted the Santa Clara Valley Agricultural Plan. This strategic action plan identified programs, policies, and tools essential for sustaining agricultural lands and growing the farming economy in Santa Clara County. Objective 3 within the plan is to “Encourage the Establishment of Infrastructure and Support Uses that facilitate the growth of the regional agricultural economy.” Within this Objective, an action is to pursue revisions to County Zoning Ordinance regulations and development standards to streamline development of farmworker housing.

The diversity of Santa Clara County’s crops, the labor-intensive nature of such crops, and the overall high cost of housing in the region compound the need for agricultural employee housing as a basis for maintaining agriculture within the county. Santa Clara County’s land values will continue to rise, encouraging high-value specialty crop production, which tends to favor crops that are highly perishable and need sufficient personnel to be harvested and moved to market in a timely manner. Such crops require

significant hand-scale labor for planting, pruning, weeding, and harvesting and are typically not well-suited to mechanization. As farms become more vertically integrated, with on-site value-added operations such as packing and shipping facilities, agricultural processing, and on-site sales, the need for agricultural labor may increase, becoming more stable and year-round rather than seasonal

Farmworkers typically have low incomes and high employment fluctuation by season, qualifying them as a special housing needs group. The U.S. Department of Agriculture estimates there were about 3,306 farm and ranch laborers in the county in 2022, a 22% decrease from 2012. However, local nonprofits report the actual farmworker population exceeds federal estimates as the farmworker population can include individuals that are hard-to-reach and undercounted. In 2022, approximately 37% of farm laborers (1,229 people) worked seasonally. From 2012 to 2022, the number of farms decreased from 453 to 303, while the average workers per farm increased slightly from 9 to 10. The following table provides statistics on the farmworker population within the County and the change in figures over the last decade.

Santa Clara County Farm Labor Estimates				
	2012	2017	2022	% change 2012-2022
Hired Farm Labor ⁴	4,237	4,175	3,306	-22%
Annual Payroll (\$0, unadjusted)	\$68,224	\$92,447	\$78,498	15%
Payroll per Hired Worker (unadjusted)	\$16,101	\$22,142	\$23,744	47.5%
Number of Farms	453	359	303	-33.11%
Average Workers per Farm	9	11	10	11%
Farms Using Migrant Labor ⁵	48	21	48	0%
% of Total Farms Using Migrant Labor	10.5%	5.8%	15.8%	50.5%

Source: USDA 2007, 2012, 2017

Between 2012 and 2022, farmworker wages increased by 47.5% to \$23,744. However, this average salary still places them in the ELI housing category. The following table presents hourly wage data estimates for various farmworker categories in the area.

⁴ Data is for total hired farmworkers, including paid family members.

⁵ Defined as a farmworker whose employment required travel that prevented the migrant worker from returning to his/her permanent place of residence the same day.

Employment Type	Mean Hourly Wage (unadjusted)			
	2014	2017	2020	2023
Agricultural Inspectors	\$26.85	\$17.87	\$24.94	\$28.33
Farmworkers and Laborers, Crop and Nursery	\$10.32	\$11.78	\$13.94	\$20.61

% of Total Farms with 10 or more Workers	14.1%	18.3%	31.3%	122%

Source: California EDD 2024

The widening gap between farmworker incomes and housing costs has priced affordable housing out of reach for farmworkers with an average two-bedroom rental unit in Santa Clara County having a fair market monthly rent of \$2,418. This would require an hourly wage of at least \$46.50 (approximately \$96,720 per year) to cover housing costs.

The 2023 Farmworker Health Study by UC Merced found that nearly all (92%) farmworkers in the state are renters who face a host of substandard housing issues. These include inadequate drinking water, plumbing, heating and cooling systems, or the need for major repairs due to problems like termite infestation or water damage. Over a quarter of farmworkers live in overcrowded conditions, with six or more people per house and three or more per room.

According to a policy brief on farmworker housing in Santa Clara County, most residents employed by the agricultural industry are living in areas near Gilroy, Morgan Hill, and south San Jose.⁶ Most workers in the industry experience extreme housing insecurity due to the lack of available affordable housing, as well as the lack of seasonal units available for individuals that move as the seasons change.

In the Unincorporated County, the migrant worker student population totaled 126 during the 2019-20 school year and has decreased by 40.6% since the 2016-17 school year. The trend for the region for the past few years has been a decline of 2.4% in the number of migrant worker students since the 2016-17 school year. The change at the

⁶ <https://s3-us-east-2.amazonaws.com/s3athome/2019/08/29093757/Farmworker-Housing-Policy-Brief.pdf>

county level is a 49.7% decrease in the number of migrant worker students since the 2016-17 school year.

Migrant Worker Student Population

In 2018, through a series of surveys and roundtables, County Planning staff worked with local growers, ag-related businesses (namely processing, packing, and distribution facilities), the Santa Clara County Farm Bureau, and advocates for farmworkers including the California Rural Legal Assistance (CRLA) to determine available resources and shortfalls in serving the housing needs of farmworkers in the county. Through this effort, County Planning staff concluded that there was an estimated need for 700 new long-term housing units to meet the existing farmworker housing demand, and an estimated gap of 1,400 seasonal housing units for workers within the county’s seasonal agricultural industries. Although several projects involving new farmworker housing units have been developed since 2018, this shortfall is likely similar today.

Existing Resources and Gap in Resources

Farmworker Housing Permitting

The State has set forth regulations relating to employee housing and labor camps in the California Health and Safety Code sections 17021.5, 17021.6, and 17021.8, which supersede any local ordinances and preclude a local government from requiring a conditional-use permit, zoning variance, and/ or other discretionary zoning clearance for certain agricultural employee housing. Housing that accommodates six or fewer employees must be treated as a single-family residence in terms of how they are permitted both in location and in processing. Medium-scale projects that include group quarters of up to 36 beds or up to 12 single-family units are classified as an agricultural use and cannot be subject to any requirements which other agricultural uses in the same zone would not be subject to.

The County makes special provision for agricultural employee housing, especially smaller-scale projects that do not qualify as employee housing under state law.

On October 20, 2020, the County Board of Supervisors updated the Zoning Ordinance in a proactive effort to reduce the cost of producing housing for farmworkers through decreased regulations and processing times. These amendments are consistent with Health and Safety Code sections 17021.5, 17021.6, and 17021.8, and streamline the planning process.

Through the 2020 amendments, agricultural employee housing was re-classified as either Small-Scale Permanent, Seasonal, or Large-Scale Permanent. Small-scale permanent housing can include up to six family units or 18 beds in group housing. Large-scale permanent projects are those consisting of more units or beds than small-scale. Seasonal projects consist of multiple movable tiny homes and are onsite for no more than 180 days. The County also created a Temporary Agricultural Residence category, which allows for a single recreational vehicle or movable tiny home per property to provide temporary housing to a person engaged in an on-site agricultural operation, for up to five years. Small-Scale Permanent and Temporary Agricultural Residences are allowed subject to a non-discretionary Planning Clearance, with a cumulative cap of 100 units and 50 units, respectively. Large-Scale Permanent and Seasonal projects are allowed subject to a Special Permit. These changes in the County Zoning Ordinance provide farmers with more options and greater flexibility to produce housing for their farmworkers.

Agricultural employee housing is contingent on the owner of each parcel submitting an annual verification form to the Department of Planning and Development by January 31 of each year, to verify and provide substantial evidence that any permanent agricultural employee housing was occupied by agricultural employees for a majority of the year and verify that any seasonal units will be removed from the property outside of the designated occupancy dates. A deed restriction is recorded on any property for any permanent agricultural employee housing to provide notice to subsequent property owners that such housing is to be used only for agricultural employee housing. A property owner shall also affirmatively disclose the existence of any such deed restriction before transfer of ownership of such a property.

Outside of permitting private development of new units in unincorporated areas, the County Office of Supportive Housing (OSH) is providing resources to address the housing needs of farmworker families in several ways.

OSH Farmworker Housing Projects

OSH has engaged with the development community to ensure that every housing development proposed in South County considers the inclusion of units that can be set aside for farmworkers, as well as applying for the State's Joe Serna, Jr. Farmworker Housing Grant Program.

OSH is also evaluating County-owned properties with development potential and access to municipal services that could include set-aside units for farmworkers, including St. Louise Regional Hospital in Gilroy, Valley Health Center Morgan Hill (formerly DePaul Health Center), the San Martin Campus, and a site located at Eighth Street and Alexander in Gilroy.

To date, the County Board of Supervisors has approved funding for two housing developments that together will add 58 new affordable units for eligible farmworkers. Below is a summary of each project and the status.

- Royal Oak Village, Morgan Hill: On August 31, 2021, the Board approved a funding recommendation for Royal Oak Village—a new 73-unit affordable family development in Morgan Hill including 18 Rapid Rehousing (RRH) units to help individuals and families with special needs, 30 units for farmworker households, 24 units for very low-income households, and one manager’s unit. The site is currently under construction, which is expected to complete by July 2024.
- The Magnolias, Morgan Hill: On June 28, 2022, the Board approved a funding recommendation for The Magnolias—a new 65-unit affordable family development in Morgan Hill including seven permanent supportive housing (PSH) units to help homeless veterans with special needs obtain and maintain permanent housing, 10 RRH units for homeless individuals and families with special needs, 28 units for farmworker households, and 20 units for households earning up to 60% of Area Median Income. The developer is working on securing all funding sources.

Homeownership Opportunities

On June 27, 2023, the Board approved a new Below Market Rate Partnership Program that will leverage a \$5 million 2021 CalHome Program grant awarded to the County to promote affordable homeownership opportunities. Of this grant amount, \$1 million is set aside for mobile homes and manufactured housing. OSH will work with Gilroy, Morgan Hill, and other stakeholders in South County to market the program to the farmworker community and set aside funds for farmworkers in accordance with these cities’ projected pipelines.

FY2024 Community Project Funding Request

Staff has submitted a Community Project Funding Request to the Federal government to create a “Farmworker Housing Rehabilitation and Electrification Pilot Program” to improve existing substandard housing conditions for farmworkers. Through the proposed program, property owners who participate in the program and request and receive an inspection from DPD and DEH to identify building, water, and on-site wastewater treatment system improvements to meet health and safety standards would be eligible for funding to make improvements. Funding would be made available to:

1. Improve non-compliant farmworker housing for building, water, and on-site wastewater treatment systems, and
2. Upgrade farmworker housing to be energy efficient and all-electric through direct installation of building energy efficiency measures, heat pumps for space and water heating, induction cooking, and solar photovoltaic (PV) and battery systems.

Additional resources would be leveraged from the State Low-Income Weatherization Program’s Farmworker Housing Component, which provides no-cost rooftop solar PV systems and energy efficiency upgrades to low-income farmworker households to reduce greenhouse gas emissions and lower energy costs for participants.

If funding is allocated, staff would identify the best approach to administer this program. The program design would consider (1) whether to establish a revolving loan fund that

provides no-cost/low-cost loans for upgrades or make grant awards, (2) the appropriate funding cap amount, and (3) the time limit for work to be completed and verification requirements.

Gap in Resources

One of the County's key challenges in processing farmworker housing permits in rural, unincorporated areas is a dwindling supply of easily buildable lots and significant environmental site constraints that implicate public health and safety. Development on hillsides, prime farmland, and areas with high groundwater levels that create additional obstacles for onsite wastewater treatment will always be a challenge. County permitting reform applicable exclusively to unincorporated areas can only do so much to meet the housing needs of the farmworker community. Multifamily development is therefore more often appropriate and encouraged to be located in urbanized areas with access to infrastructure and essential services that are lacking in unincorporated areas.

Given the County's recent and ongoing significant efforts to bolster resources and address the challenges of housing the farmworker community in Santa Clara County, much of the identified gap in resources is related to coordination and iterative assessment. There is a clear need to coordinate new and overlapping efforts, make strategic interventions, leverage existing resources, and build capacity within the county and larger region.

Proposed Policies, Programs, and Funding to Help Address Gap

On August 29, 2023, the County Board of Supervisors directed County staff to develop an Agricultural Worker Housing Workplan (Program 4.02), intended to create a comprehensive approach to addressing farmworker housing needs in the county. This effort is intended to consist of the following components:

- Process, Informational, and Funding Strategies – Including further research into the housing conditions and needs of farmworkers, engaging specialists, and establishing a stakeholder committee.
- Permitting Process Improvements – Including research and proposals to make the permitting process for farmworker housing more understandable and easier to undertake with more parcel-specific information to help developers make better informed business decisions.
- Strategies Utilizing County Land – Including exploration of partnerships to develop farmworker housing on County-owned land.
- Legislative and Partnership Strategies – Including work with the state, other jurisdictions, and agencies to explore funding and policy strategies for developing farmworker housing.

In coordination with the Agricultural Worker Housing Workplan, the Housing Element proposes Program 2.04 – *Assess Farmworker Housing Needs and Collaborate with Other Jurisdictions*, which will build upon past efforts to collect more local information,

share best practices with neighboring jurisdictions, and comprehensively assess the challenges and opportunities to address farmworker housing needs in Santa Clara County. This effort will aim to update prior assessments and gain a deeper understanding of farmworkers' housing needs today. This program will include the County annually identifying new opportunities for facilitating the development of farmworker housing in partnership with nonprofit developers (among others).

The County intends to work with ABAG and other regional jurisdictions to share best practices and build capacity to address farmworker housing needs by December 2024 and complete the Farmworker Housing Needs Assessment by December 2025.

In conjunction with the workplan and assessment programs, the County will coordinate other efforts to address farmworker housing needs across County agencies, including but not limited to the following related programs detailed in the Housing Element:

- Program 1.01 – Supportive Housing Development Fund Notice of Funding Availability: pursue approval of funding for new development proposals involving farmworker housing.
- Program 1.05 – Mortgage Credit Certificate (MCC) Program: prioritize remaining MCCs for farmworkers.
- Program 1.07 – County-Led Housing Development: pursue approval of new farmworker housing within County-led development.
- Program 1.29 – Farmworker Affordable Homeownership and Farmworker Housing Pilot Program: issue a total of 10 loans to farmworker households by 2031.
- Program 2.01 – Housing Suitability and Prioritization Tool for County-Owned Properties: pursue approval of new farmworker housing on County-owned properties
- Program 2.14 – Expanded Streamlining of Agricultural Employee Housing: pursue Zoning Ordinance amendments to further streamline the production of agricultural employee housing

Non-English Speakers

California has long been an immigration gateway to the United States, which means that many languages are spoken throughout the Bay Area. Since learning a new language is universally challenging, it is not uncommon for residents who have immigrated to the United States to have limited English proficiency. This limit can lead to additional disparities if there is a disruption in housing, such as an eviction, because residents might not be aware of their rights, or they might be wary to engage due to immigration status concerns. In the Unincorporated County, 5.0% of residents 5 years and older identify as speaking English not well or not at all, which is below the proportion for Santa Clara County. Throughout the region the proportion of residents 5 years and older with limited English proficiency is 8%.

v: Disproportionate Housing Needs

Primary findings.

- The most significant housing challenge in the Unincorporated County and the CDPs is cost burden. Concentrations of cost-burdened renters are most prevalent in San José, as well as unincorporated areas of San José including in and around Cambrian Park, Fruitdale and Burbank, Alum Rock, and East Foothills. The Unincorporated County's more rural and affluent areas, which are disproportionately non-Hispanic white, have relatively low rates of overpayment.
- Overall, cost burden is highest for renters and in areas where Hispanic and Latinx residents reside. These same areas offer some of the lowest rates of burden for owners—demonstrating the stabilizing force of ownership especially in ethnically diverse enclaves.
- Overcrowding is much less prevalent, although some areas have high rates of overcrowding. Overcrowded households in the Unincorporated County are concentrated in parts of incorporated San José and Alum Rock: overcrowded households in some neighborhoods in these areas account for more than 20% of all households. Most of the unincorporated areas show very low rates of overcrowding.
- Most racial and ethnic minority populations are disproportionately impacted by low household incomes, poverty, housing problems, and overcrowding, compared to non-Hispanic white and Asian residents in the Unincorporated County.
 - Housing cost burden disproportionately impacts Black or African American residents, Hispanic residents, and American Indian or Alaska Native residents.
 - Overcrowding is significantly higher for non-white households: the number of overcrowded non-white households is at least three times higher than the number of white residents experiencing overcrowding.
 - Census tracts with overcrowding overlap with segregation by race and have a high proportion of low-income, single mother families indicating that households could be doubling up in order to avoid displacement. Overcrowding is most prominent in San José and one Census tract in Campbell.
- In the urban Unincorporated County, Asian and Pacific Islander residents are overrepresented in Project-based Section 8 units, multifamily units, and are more likely to have a housing voucher. Black or African American and Hispanic residents are overrepresented in LIHTC units.
- Housing condition in the Unincorporated County is mostly an issue of age. There are notable concentrations of units built before 1960 in San José, Alum Rock, Campbell, and a few Census tracts in Los Gatos. The Unincorporated County has a small supply of units without complete kitchen facilities though there are notable concentrations located in Sunnyvale, San José, and Los Gatos. The Unincorporated

County has a very small number of units lacking plumbing: only two Census tracts show five to ten percent of units as lacking plumbing, all other tracts have less than five percent of units lacking plumbing.

- Mobile homes, which provide affordable, often family- or senior-oriented housing, although can be in poor condition, are rare in the Unincorporated County. There are no mobile home parks in the Unincorporated County.

Disproportionate Housing Needs

“**Disproportionate housing needs** generally refers to a condition in which there are significant disparities in the proportion of members of a protected class experiencing a category of housing need when compared to the proportion of members of any other relevant groups, or the total population experiencing that category of housing need in the applicable geographic area. For purposes of this definition, categories of housing need are based on such factors as cost burden and severe cost burden, overcrowding, homelessness, and substandard housing conditions.”

Source: California Department of Housing and Community Development Guidance, 2021, page 39.

Table 1 shows disproportionate housing needs, including access to homeownership and rates of cost burden, for subpopulations of households in Santa Clara County for which data are available. As shown below, extremely low-income and very low-income households are significantly more likely to be cost burdened in the county than other income groups: 79% of extremely low-income households were cost burdened and 64% of very low-income households were cost burdened in 2020 compared to less than half (48%) of low to moderate income households and 33% of total households. Severe cost burden is notably higher for extremely low-income households at 62% compared to only 15% for total households in the county.

Cost burden disproportionately impacts extremely low and very low-income renters in Santa Clara County. This is largely because the county’s rental market has fallen short in meeting the affordability needs of these households. According to a 2023 Affordable Housing Needs Report completed by the California Housing Partnership, nearly 52,600 low-income renter households in the county do not have access to an affordable home.⁷

Extremely low-income households have substantially lower rates of homeownership than overall households and other special needs households at only 36%, suggesting that these households likely face greater barriers accessing homeownership opportunities. Rates are also lower among households with very low incomes (45%) and single female headed households (45%)—this compares to Santa Clara County overall which had a homeownership rate of 56%.

Source: 2016-2020 CHAS, 2021 5-year ACS,

Table 2 shows disproportionate house needs by household type for the Unincorporated County only. Households with extremely low incomes are also disproportionately impacted by high housing costs in the Unincorporated County. Three in four (75%) with extremely low incomes are severely cost-burdened, a much higher rate than very low-income (37%), low- to moderate-income (16%), and total households (17%). With extremely low incomes in a high-cost housing market, households in the Unincorporated County are more likely to experience severe cost burden than cost burden (75% v. 11%).

Disproportionate housing needs are becoming more prominent for many special needs households. For example, since the County’s 2020-2025 Consolidated Plan, rates of cost burden for low to moderate income households have increased (from 26% to 28%) while severely cost burdened households have slightly declined (from 15% to 12%).

Table 2. Disproportionate Needs by Household Type in the Unincorporated County

	Num./Pct. Owners	Num./Pct. Renters	Pct. Cost Burden	Pct. Severe Cost Burden	Total HHs

Policies & Programs to Address Needs

The Office of Supportive Housing (OSH) works to increase Santa Clara County’s supply of affordable and supportive housing that is available to extremely low-income and special needs households countywide. OSH primarily focuses on supporting the County’s efforts to prevent and end homelessness by organizing and operating homeless services including homelessness prevention, crisis response, and PSH and RRH programs (collectively, the Supportive Housing System). The agency also works to increase the county’s supply of housing by providing funds and incentive affordable development of housing for extremely low-income households.

In partnership with OSH, the County has developed a set of policies and programs to holistically address the gaps identified in the table and narrative above. An overview of programs that target special needs households, including households with extremely low incomes, is provided below. Note that this does not represent a comprehensive overview of proposed policies and programs to address disproportionate needs; a complete inventory of programs is explored in Section 4.01 (Program Descriptions).

- ***Program 1.01—Supportive Housing Development Fund Notice of Funding Availability***, an ongoing effort to increase affordable housing opportunities for vulnerable and extremely low-income residents/households and to prevent and

reduce homelessness across Santa Clara County. The program intends to approve funding to support at least 18 new housing development sites which will result in 1,657 units of affordable and supportive housing for special needs populations by June 30, 2025.

- **Program 1.03—Homeownership Projects**, promotes homeownership opportunities and supports the production of new for-sale homes through new projects. Proposed projects must sell a minimum 33% of homes to very low-income households, a maximum 33% to moderate income households, and the balance of the units for households at 80% AMI or below.
- **Program 1.04—Empower Homebuyers SCC**, created to increase homeownership opportunities for low-income households by helping first-time homebuyers purchase a home with down payment assistance. The program is being renewed with a focus on low-income families and special needs households to a secondary aim to eliminate lending discrimination that is prevalent among low-income households of color.
- **Program 1.06—Below Market Partnership Program**, intended to promote affordable homeownership for very low income and low-income households by providing deferred subordinate loans to eligible households purchasing a home in Santa Clara County. The program aims to issue 100 deferred subordinate loans to very low- and low-income households.
- **Program 1.07—County-Led Housing Development**, new affordable housing units to be developed on five county-owned sites in Palo Alto, San Jose, and Los Altos by 2023. For this planning period, the county is focused on sites in Cupertino, San Jose, and Gilroy—which could yield a minimum of 617 new affordable and workforce housing units by 2031.
- **Program 1.11—Internal County Coordination of Housing Funds and Services**, includes programs, services, and other supports targeted to persons experiencing or at risk of experiencing homelessness, persons with disabilities, families with children, and other special needs households.
- **Program 1.13—Supportive Housing and Innovative Fund**, local funds targeted to households with incomes below 30% AMI as well as special needs populations. The County intends to work with private sector partners to identify funding sources to incentivize the development of affordable and supportive housing in high opportunity areas.
- **Program 1.29—Farmworker Affordable Homeownership and Farmworker Housing Pilot Program**, focuses on providing funds to help increase housing options for very low-income farmworkers by creating new housing, rehabilitating/repairing existing housing, or replacing existing dilapidated mobile home units that have been used as farmworker housing in the past. The County

intends to issue the first loan by December 2024 with a total of 10 loans (serving 10 households) by 2031.

- **Program 2.05—Assess Farmworker Housing Needs and Collaborate with Other Jurisdictions**, intended to result in a comprehensive Farmworker Housing Needs Assessment for a deeper understanding of the housing needs of farmworkers in the county.
- **Program 2.13—Monitor R/ECAP and Burdened Households Areas**, to continue collecting data on R/ECAPs and areas with cost-burdened households to assess opportunities for improvement. Improvements will be focused in the areas of increasing access to amenities and resources such as transit, parks, grocery stores, and health facilities.
- **Program 2.15—Expanded Streamlining of Agricultural Employee Housing**, an ongoing effort since 2020 to streamline regulatory requirements and permitting processes for agricultural employee housing, particularly those outside of the planning-specific review of development applications (e.g., environmental health, fire safety, and road access). By June 2025, the County plans to solicit feedback from development application review agencies, development communities, the general public, and the agricultural community, on opportunities for improvement with feasible and appropriate amendments developed and presented to the Planning Commission and Board of Supervisors by December 2026.

Housing stock: Age and Condition. Housing units in Santa Clara County are older, with notable concentrations of units built before 1960 in San José, Alum Rock, Campbell, and a few Census tracts in Los Gatos; all of which show 80% of units or more built during this time.

In Santa Clara County, lower income households are more likely to live in older housing units. Low-income Census tracts in San José (less than \$55,000) are concentrated in areas with older housing: in these areas, over 80% of total units were built before 1960. Residents living in poverty are also more likely to live in these areas.

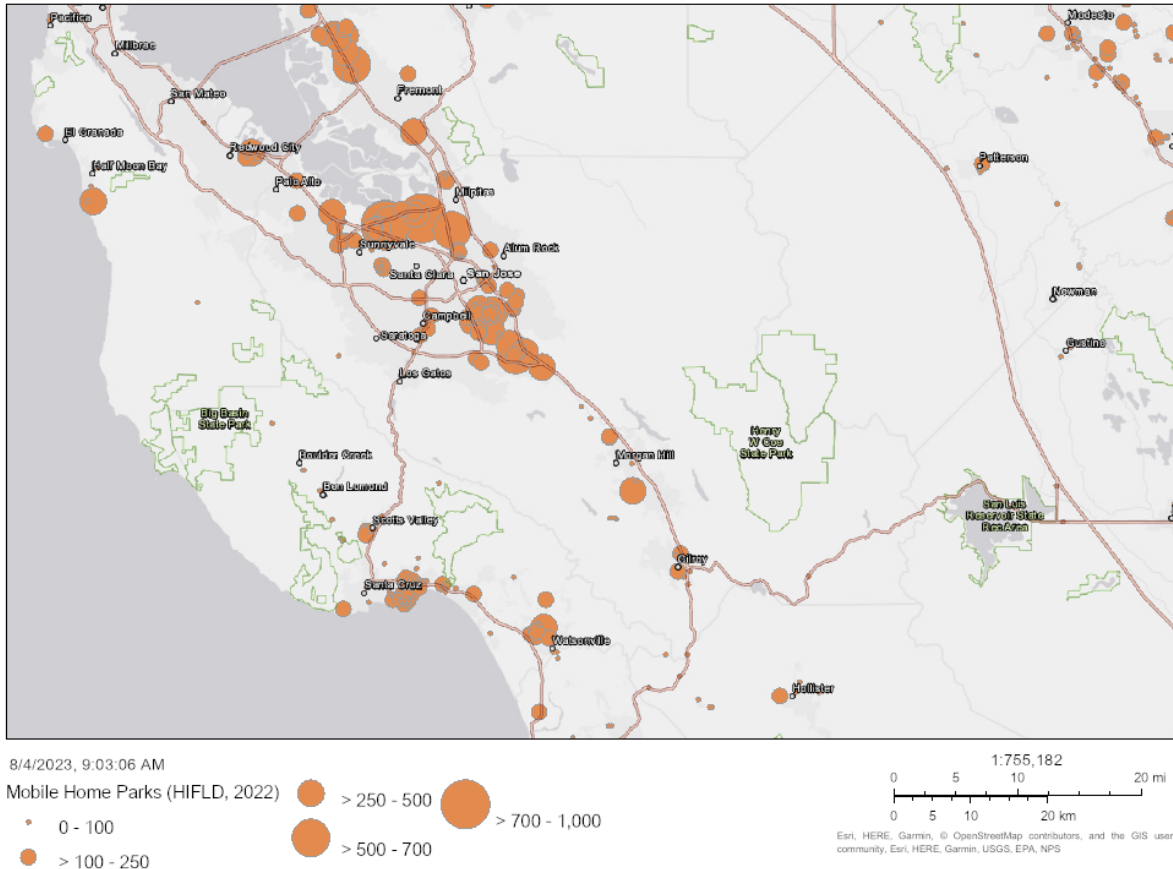

These patterns are similar for disabled residents in Santa Clara County: Census tracts with larger supplies of units built before 1960 have higher concentrations of disabled residents at 10% to 20% of the total population. San José has one Census tract where 20% to 30% of the population has a disability and up to 40% of units were built before this time.

Mobile and manufactured homes are especially at risk of being in poor condition. HCD's AFFH Data Viewer (version 2.0) was used to examine the location of the mobile home parks in the Santa Clara County.

As shown in the map below:

- Mobile home parks are concentrated near Sunnyvale, San José, and along the city boundaries of Campbell and Saratoga. Between 700 to 1,000 mobile home communities are located in Sunnyvale’s Census tracts and up to 700 parks are located in San José.
- There are no mobile home parks in any of the unincorporated CDPs.

Mobile Home Parks, Santa Clara County and Region, 2022

Source: California Department of Housing and Community Development AFFH Data Viewer.

Housing Needs—Overpayment. Households paying more than 30% of their incomes in housing costs—those facing cost burden—are located throughout the Unincorporated County. (Cost burden is also referred to as “overpayment.”) The darkest red shading in the maps that follow indicate Census tracts where the highest shares of cost burdened renters are located. Concentrations of cost burdened renters are most prevalent in San José, yet also are found around and in Cambrian Park, Fruitdale and Burbank, Alum Rock, and East Foothills.

The Unincorporated County’s more rural and affluent areas, which are disproportionately non-Hispanic white, have relatively low rates of overpayment.

By CDP and Census tract, burden varies widely. Owner burden is highest in the Loyola, Fruitdale, and Burbank areas and relatively low in Lexington Hills, Cambrian Park, and the East Foothills. Alum Rock and San Martin have moderate shares of burden. Renter burden is highest in Stanford, Loyola, parts of Fruitdale and Burbank, and Alum Rock. Overall, displacement risk due to high rates of burden is higher for renters and in areas where Hispanic and Latinx residents reside. These same areas offer lower rates of burden for owners—demonstrating the stabilizing force of ownership, especially in ethnically diverse enclaves.

Cost Burden, CDP and Census Tract, 2022

CDP	Stanford			Loyola		Cambrian Park		San Martin	
Census Tract	5115.02	5130	5116.08	5117.02	5117.07	5028	5027.04	5124.02	5124.01

Overpayment by Renters, Fruitdale and Burbank

Overpayment by Renters, Alum Rock CDP

Overpayment by Renters, East Foothills CDP

Overpayment by Renters, San Martin CDP

There are far fewer highly concentrated areas of cost burdened owners. Many Census tracts in the Unincorporated County have between 20% and 60% of owners facing cost burden, with every CDP having this share of burdened owners. Lexington Hills stands out in this regard, with a relatively high share of burdened owners compared to other CDPs.

Housing Needs—Overcrowding. Patterns of overcrowding in the Unincorporated County and the broader region largely mirror patterns of overpayment with the caveat that overcrowding is subject to fewer extremes than overpayment. The same disproportionately Hispanic or Latino areas have more overcrowding, but the degree to which that is true is less extreme than with respect to renter overpayment.

Overcrowding by Census Tract, Santa Clara County, 2021

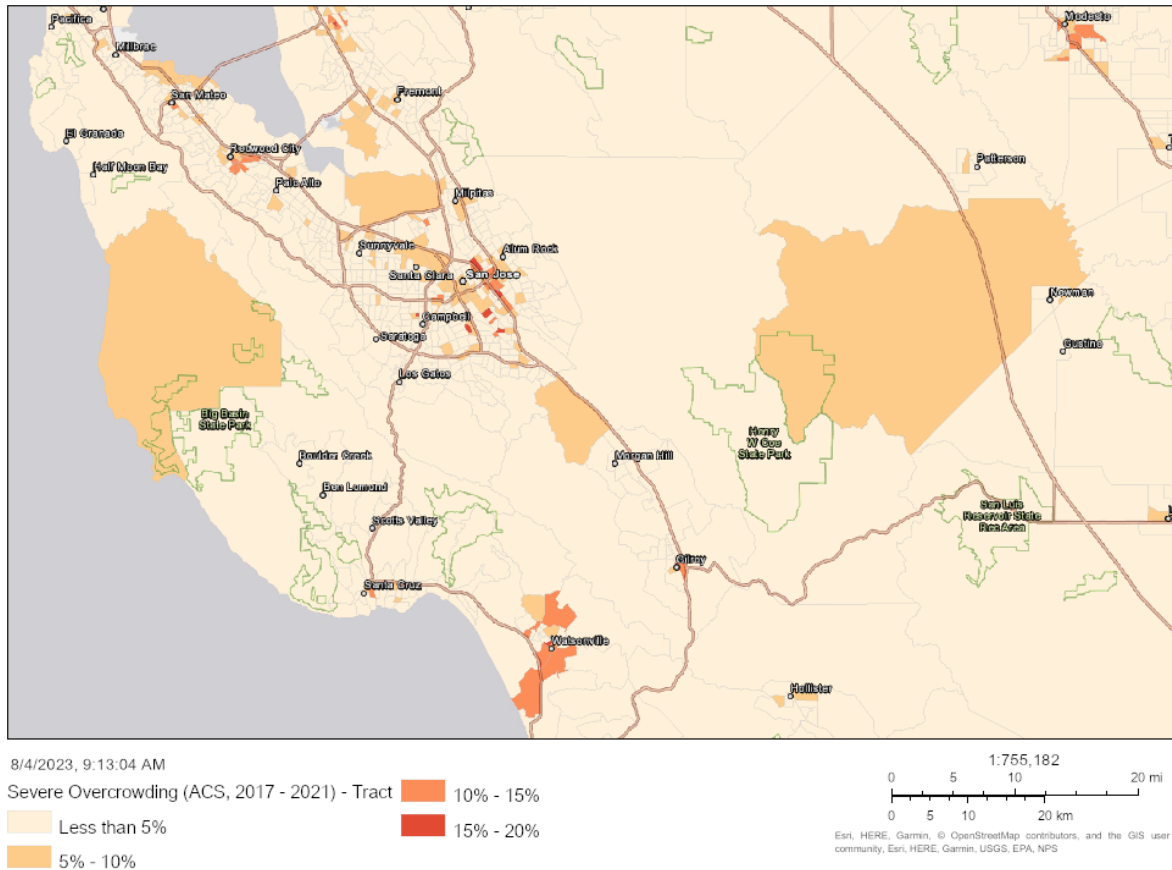

Source: California Department of Housing and Community Development AFFH Data Viewer.

Overcrowded households in Santa Clara County are concentrated in parts of San José and Alum Rock: overcrowded households in some neighborhoods in these areas account for more than 20% of all households. Sunnyvale has two Census tracts with comparatively higher rates of overcrowding at up to 20%.

Other parts of the Unincorporated County show lower rates of overcrowding (less than 10% of households living in crowded conditions) and most of the unincorporated areas show very low rates of severe overcrowding.

Severe Overcrowding by Census Tract, Santa Clara County, 2021

Source: California Department of Housing and Community Development AFFH Data Viewer.

Housing Needs—Displacement Risk. High levels of displacement of low-income residents, who are disproportionately likely to be Black, Vietnamese, or Latinx or have disabilities, is occurring at a countywide level and in specific cities throughout Santa Clara County.

Countywide, as well as in four of the five cities with the highest concentrations of Latinx residents, the percentage of Latinx residents has fallen in recent years. Households who can no longer afford to live in the central and northern portions of Santa Clara County seek out areas like Gilroy, along with and cities outside of Santa Clara County, for housing.

The Black population in Santa Clara County has historically been much lower than in other parts of the Bay Area. That is partially the product of a legacy of intentional discrimination in the housing market. Although there have been some areas, particularly in the east side of San José, that have had relative concentrations of Black residents, these neighborhoods (approximately 10-12% Black as of the 1990 Census) did not have the degree of concentration present in cultural enclaves in the region. Accordingly, the scale of displacement has been different from displacement of Santa Clara County’s

historically larger Latinx population than it has been for Black households. Nonetheless, between 2010 and the 2013-2017 ACS, many cities saw decreases in Black population. Displacement of Black residents was more pronounced between 1990 and 2010 with the largest decreases in Mountain View, Palo Alto, San José, and Sunnyvale.

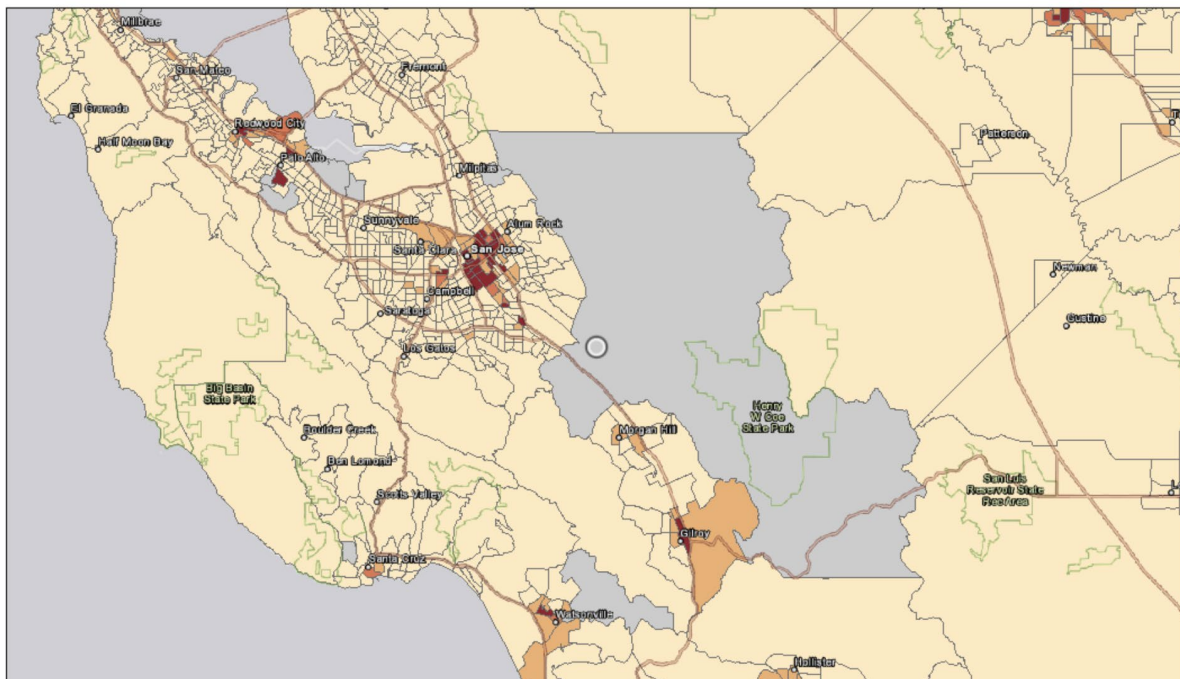

Data reflecting the Vietnamese population in Santa Clara County, which has the lowest income levels and therefore highest displacement risk among the four largest Asian ancestry groups in Santa Clara County (Chinese, Indian, and Filipino in addition to Vietnamese), is more ambiguous but does point towards the likelihood of some hyper-localized displacement as well as the future risk of more widespread displacement. Displacement of Vietnamese residents is most likely to be occurring in areas immediately to the north, east, and south of downtown San José. The farther a neighborhood in East San José is from downtown, the lower the displacement risk is.

The maps below are from the Urban Displacement Project, which is based at the University of California Berkeley. At a countywide scale, the map reflects displacement risk in urbanized Census tracts. The darker the shading is, the higher the risk of displacement. Displacement risk is highest in the cities of San José and Gilroy and suburban communities around south of San José.

No CDPs show high displacement risk. In contrast, most CDPs are indicative of advanced gentrification or ongoing gentrification and/or displacement.

7/26/2023, 12:36:37 PM

Estimated Displacement Risk - Overall Displacement (UCB, Urban Displacement Project 2022) - Tract

- Low Data Quality
- Lower Displacement Risk
- At Risk of Displacement

Disaster-driven displacement. Displacement can occur for a range of reasons. Given the dire consequences of climate change, it is critical that the Unincorporated County be prepared to prevent and reduce environmental hazards (e.g., floods, fires) and provide the necessary resources for households displaced by natural disasters.

As required by California law, the State Fire Marshal is mandated to classify lands within State Responsibility Areas into Fire Hazard Severity Zones (FHSZ) to better prepare for wildfires and other climate disasters.⁸ FHSZs fall into three classifications: moderate, high, and very high.⁹

As shown in the maps, very high-risk areas are concentrated in communities surrounding Saratoga, Los Gatos, and Morgan Hill. Alum Rock and East Foothills are adjacent to high-risk areas.

⁸ California laws include: California Public Resource code 4201-4204; California Code of Regulations Title 14, Section 1280; and California Government Code 51175-89.

⁹ <https://osfm.fire.ca.gov/divisions/community-wildfire-preparedness-and-mitigation/wildfire-preparedness/fire-hazard-severity-zones/>.

As part of the National Flood Insurance Program’s floodplain management plan, the Federal Emergency Management Agency (FEMA) provides Flood Insurance Rate maps to identify Special Flood Hazard Areas, which require all residents in these areas to purchase flood insurance. Of all areas within the Unincorporated County, residents in Gilroy and, to a lesser extent, San Martin, are most at risk of flooding.

Housing Needs—Publicly supported housing. Publicly supported housing in the Unincorporated County is mostly located in and surrounding San José. The area southwest and west of Alum Rock has the largest concentration of subsidized housing according to HCD’s Subsidized Housing maps. In the South County, all subsidized housing is located in incorporated Morgan Hill and Gilroy.

In Santa Clara County, emergency shelters for unhoused residents are highly concentrated in San José with other shelters located in smaller cities in the northern portion of Santa Clara County. There is a lack of emergency shelter capacity in unincorporated areas and in South County, in particular.

Subsidized Housing, 2023

Publicly subsidized housing (including LIHTC units) geared toward families are the most numerous. It follows a similar siting pattern to those reserved for seniors. Those located

on the eastern side of San José, in particular, are located in more diverse areas. Of particular note is the strong concentration of affordable family housing in Morgan Hill.

The vast majority of LIHTC developments are located in predominantly Latinx Census tracts. Most of the Large Family developments mirror that demographic trend. Meanwhile, five of the seven LIHTC developments reserved for seniors are majority-white, while the majority of the Census tracts where these developments are located have mainly Latinx or Asian populations.

Voucher holders by Census tract are shown in the map below. In Santa Clara County, residents with vouchers are more likely to be living in San José, Milpitas, Santa Clara, Campbell, Gilroy, and Cupertino (in part). These findings are unsurprising as these areas have larger shares of lower income communities.

Appendix M:
**Affirmatively Furthering Fair
Housing Sites Inventory
Analysis**

Affirmatively Furthering Fair Housing Sites Inventory Analysis

County of Santa Clara Housing Element Update (2023-2031)

AB 686 requires an analysis of sites identified by the County to meet RHNA obligations for their ability to affirmatively further fair housing (AFFH). The County's proposed RHNA sites can accommodate approximately **6,198 new units**—1,075 for very low-income households, 622 for low-income households, 636 for moderate-income households, and 3,865 for above moderate-income households.

Figure A-1 shows the location of Census Tracts in unincorporated Santa Clara County, while Figure A-2 shows the geographic distribution of the proposed RHNA sites. The proposed RHNA sites are distributed throughout the most urban areas of the county (northwest portion of the county), which provides the most opportunities for new and infill development, as well as proximity to transportation options, amenities, and other services.

Figures A-3 and A-4 present the distribution of the County's proposed RHNA units by Census Tract, income level, and AFFH indicators. Figures A-5 through A-9 map the location of proposed RHNA units compared to several AFFH indicators.

The analysis of the RHNA unit location against these indicators demonstrates that:

- There are four Census Tracts with populations of non-White residents at least ten percentage points higher than the county average. Of these Census Tracts, three are located in moderate and high-resource areas. The distribution of the proposed RHNA units within these Tracts will broaden housing choices for households of all income levels and not have the effect of increasing minority concentration in low-resource areas.
- There are 1,680 proposed RHNA units located in Census Tracts designated as R/ECAPs. However, due to their non-traditional demographic and socioeconomic conditions, these Census Tracts are designated as high-resource areas. The location of these units will offer more access to opportunity, particularly for very low- and low-income households in unincorporated Santa Clara County.
- Less than 1% of RHNA units are placed in low-resource areas (just 17 units out of approximately 6,200).
- RHNA units are well-distributed among income groups within high opportunity areas, particularly units for lower-income households (65% of all units proposed for very low- and low-income households are located in high-resource areas).

Note: No 2021 5-year ACS median household income estimate for Census Tract 5116.08; the 2020 5-year ACS estimated is provided.

Source: HCD AFFH Data Viewer, 2020 and 2021 5-year ACS, County of Santa Clara, and Root Policy Research.

Segregation and Integration

According to 2021 5-year ACS data, the majority of residents in Santa Clara County identify as non-White (61%). Asian (38%) and Hispanic (25%) residents represent the greatest non-White populations in the county. Of the Census Tracts within unincorporated Santa Clara County with proposed RHNA sites, there are four Census Tracts with populations of non-White residents at least ten percentage points higher than the county average. The Census Tracts with the greatest concentrations of non-White populations are Census Tract 5043.21 (87%), Census Tract 5038.02 (79%), Census Tract 5033.22 (76%), and Census Tract 5039.02 (72%).

All four Census Tracts are located near the eastern area of San José. Specifically:

- Census Tract 5043.21 is located in the northern part of San José in the Berryessa neighborhood;
- Census Tract 5038.02 is located just east of the Berryessa neighborhood, and west of the San José Country Club;
- Census Tract 5033.22 is located directly east of Lake Cunningham and Reid-Hillview Airport and south of Mount Pleasant High School and August Boeger Junior High School; and
- Census Tract 5039.02 is located in Alum Rock, east of James Lick High School and west of Joseph George Middle School.

Within these four Census Tracts, the County's RHNA sites inventory proposes 553 units for very low-income households, 301 units for low-income households, 317 units for moderate-income households, and 2,927 units for above moderate-income households. This represents 51% of the County's proposed units for very low-income households, 48% of units for low-income households, 50% of units for moderate-income households, and 76% of units for above moderate-income households.

According to the TCAC opportunity area maps, one of the Census Tracts is designated as "high-resource", two tracts are designated as "moderate-resource" and one tract is designated as "low-resource" (Figure A-4). Of the total units proposed in these four Census Tracts (4,098 units), 59% of the units for very low-income households, 62% of the units for low-income households, 63% of the units for moderate-income households, and 18% of the units for above moderate-income households are located in high-resource areas. In the context of segregation and integration, the County's Sites Inventory prioritizes the location of units targeted at very low- and low-income households in high-resource areas of unincorporated Santa Clara County, which will help broaden housing choices in high opportunity areas.

Racially and Ethnically Concentrated Areas of Poverty and Affluence

Per HUD's definition, there are three Census Tracts designated as racially and ethnically concentrated areas of poverty (R/ECAP) in unincorporated Santa Clara County. The three Census Tracts designated as R/ECAPs are located:

1. In south-central San José. This Census Tract includes the county fairgrounds, which is an unincorporated enclave with no population, along with the adjoining residential areas that are within city limits **(There are no proposed RHNA sites in this Census Tract)**;
2. Partially in Milpitas and partially covering parkland in an unincorporated area to the east of the city, with very few people residing there **(There are no proposed RHNA sites in this Census Tract)**; and
3. Stanford University's campus. This R/ECAP is the only one that includes a significant population in the Unincorporated County. However, the reasons for its race/ethnicity and socioeconomic demographics are very different from the vast majority of R/ECAPs. **(The Census Tracts with proposed RHNA sites are Census Tracts 5116.08 and 5130).**

According to 2021 5-year ACS data, the median household income in Santa Clara County is \$140,258. Of the Census Tracts with proposed RHNA sites in unincorporated Santa Clara County, the two Census Tracts with significantly lower median household incomes than the county average — Census Tract 5116.08 (\$42,279) and Census Tract 5130 (\$48,507)—are R/ECAPs. Census Tract 5130 is also designated as vulnerable to displacement. As noted above, these Census Tracts do not reflect the conditions of a traditional R/ECAP. Specifically, Stanford has a comparatively larger student population than surrounding communities. Full-time students tend to have lower incomes and are more diverse than overall populations in Santa Clara County and unincorporated areas.

Within these two census tracts, the County's Sites Inventory proposes 336 units for very low-income households, 252 units for low-income households, 252 units for moderate-income households, and 840 units for above moderate-income households. These units account for 31% of very low-income units, 41% of low-income units, 40% of moderate-income units, and 22% of above moderate-income units in the County's overall Sites Inventory. This distribution of units not only allows lower-income households to access more affordable housing options but provides the opportunity for households of all incomes to have increased access to high-resource areas in the county.

Conversely, there is one Census Tract with proposed RHNA sites in unincorporated Santa Clara County that meets the definition of a Racially Concentrated Area of Affluence—Census Tract 5028. This Census Tract is located in the southwestern area of San José and falls mostly in the unincorporated census-designated place called Cambrian Park. The Census Tract is in close proximity to health care services, numerous parks and schools, and the West Valley Freeway.

The County's Sites Inventory proposes eight units for this Census Tract—one for moderate-income households and seven for above moderate-income households. While no units are designated for very low- and low-income households in this Census Tract, the majority of the County's proposed units for very low- and low-income households overall are located in high-resource areas throughout the county.

Disparities in Access to Opportunity

Of the 11 Census Tracts in unincorporated Santa Clara County with proposed RHNA sites, five Census Tracts are designated as “moderate-resource”, four Census Tracts are designated as “high-resource”, and two Census Tracts are designated as “low-resource” areas. The Census Tracts designated as “high-resource” are located throughout the county—Census Tracts 5116.08 and 5130 are located on Stanford University’s campus in Palo Alto in the northwest area of the county, Census Tract 5043.21 is located in the Berryessa neighborhood in the northern part of the county, and Census Tract 5028 is located in Cambrian Park in the southwestern part of the county. These Census Tracts provide robust access to transportation options, amenities, such as health facilities and schools, and other services.

The County’s RHNA Sites Inventory proposes 661 units for very low-income households, 439 units for low-income households, 453 units for moderate-income households, and 1,361 units for above moderate-income households in the County’s “high-resource” areas. Overall, these units account for 61% of very low-income units, 71% of low-income units, 71% of moderate-income units, and 35% of above moderate-income units in the County’s proposed Sites Inventory. When the units for very low-income and low-income households are combined, 65% of all units targeted at very low-income and low-income households are located in high-resource areas throughout unincorporated Santa Clara County.

Disproportionate Housing Needs

Cost burden, or households paying more than 30% of their household income on housing costs, is a significant challenge currently facing residents living in unincorporated Santa Clara County, particularly for renters and racial and ethnic minority populations. Of the 11 Census Tracts in unincorporated Santa Clara County with proposed RHNA sites, the majority of renter households in six Census Tracts experience cost burden. Only one Census Tract has less than 40% of their renter households that experiences cost burden (Census Tract 5028, 33%).

The six Census Tracts with more than half of their renter households experiencing cost burden include Census Tract 5039.02 (77% of renter households are cost burdened), Census Tract 5130 (66%), Census Tract 5041.02 (63%), Census Tracts 5038.02 and 5116.08 (55%), and Census Tract 5043.21 (54%).

Within these six Census Tracts, the County proposes 661 units for very low-income households, 439 units for low-income households, 457 units for moderate-income households, and 1,381 units for above moderate-income households. This accounts for 61% of all proposed units for very low-income households, 71% of low-income units, 72% of moderate-income units, and 36% of above moderate-income units. Collectively, these units make up 47% of the County’s total RHNA Sites Inventory. Moreover, 65% of all proposed lower income units (very low-income + low-income) are located in these Census Tracts.

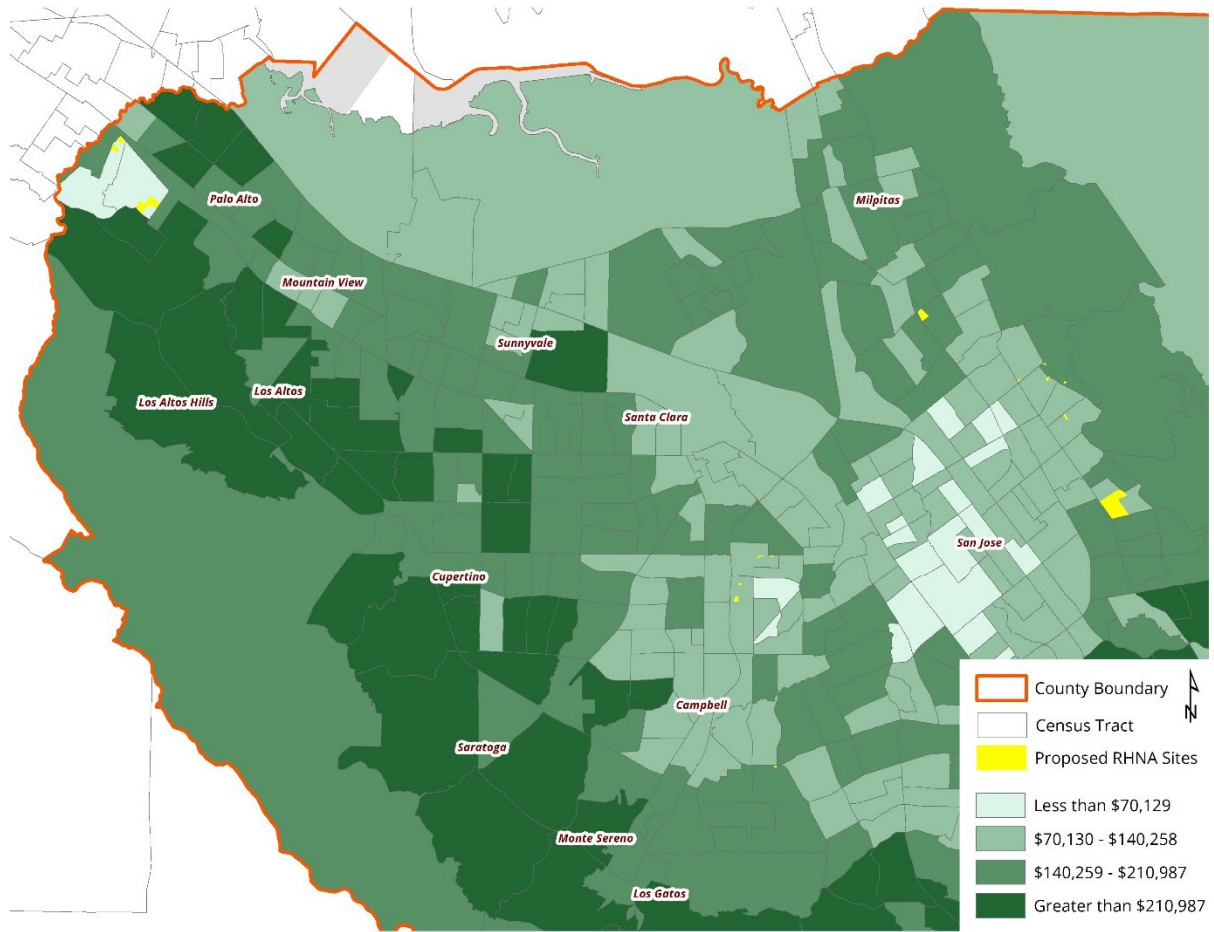

Three of the six Census Tracts—Census Tracts 5130, 5116.08, and 5043.21—are designated as high-resource areas. Of the proposed sites located within these six Census Tracts, 100% of the very low-income units (661) and low-income units (439), 99% of the moderate-income units

(452), and 98% of the above moderate-income units are located in high-resource areas. The addition of these units should help provide more opportunities for low- and moderate-income households to find affordable housing options and lessen the number of households experiencing cost burden.

In addition to cost burden, overcrowded households can signify a mismatch between the types of housing needed by residents and the types of housing available and affordable to households. In 2021, 8% of the county's households were considered overcrowded, defined as more than one person per bedroom in a household. There are two Census Tracts in unincorporated Santa Clara County where there are at least 50% more households experiencing overcrowding compared to the county overall—Census Tract 5041.02 (20% of households are overcrowded and Census Tract 5039.02 (19%). The County's Sites Inventory proposes no units for very low-income or low-income households, three units for moderate-income households, and 14 units for above moderate-income households. Collectively, these units make up less than 1% of the County's proposed RHNA sites.

According to the UC Berkeley Urban Displacement Project, lower-income residents living in Census Tract 5039.02 are at risk of displacement. While the addition of the units in this Census Tract will not contribute to more affordable housing choices, the relatively low number of units will likely not exacerbate the risk of displacement faced by lower-income residents.

Appendix N:

Assessment of Fair Housing Proposed Goals and Actions and Corresponding Implementation Programs

Assessment of Fair Housing Proposed Goals and Actions and Corresponding Implementation Programs

To address the contributing factors described in the Assessment of Fair Housing (AFH), the following goals and strategies (left column) proposed for Santa Clara County are addressed by way of the following implementation programs (right column), which are discussed further in Chapter 4 of the 2023-2031 Housing Element Update.

Proposed Goal/Action	Implementation Program
<p>I. Promote residential racial and ethnic integration and reduce displacement by increasing the supply of affordable housing in high opportunity areas, areas with ongoing displacement, and areas where residents are at risk of displacement.</p>	
<p>a. Advocate for flexible public funding that can speed up and create more affordable housing.</p>	<p>1.01– Supportive Housing Development Fund Notice of Funding Availability (SHDF NOFA) 1.06 – Below Market Rate Partnership Program 1.08 – Joint Development Memorandum of Understanding (MOU)</p>
<p>b. Expand private sector support for affordable housing.</p>	<p>1.09 – Housing Trust of Silicon Valley 1.13 – Supportive Housing and Innovation Fund 2.02 – Planning for Housing Development in Unincorporated USAs and Stanford University Lands 2.03 – In-Lieu Fee Program for State Density Bonus and Affordable Housing 2.067 – Streamline Accessory Dwelling Unit (ADU) processing 2.112 – Update Zoning Ordinance for Re-use of Non-Residential Buildings to Residential 2.145 – <u>Expanded</u> Streamlining Agricultural Employee Housing</p>

	<p>2.1924 – Create Objective Development Standards for Streamline Multi-Family Housing Development</p> <p>2.227 – Create Objective Development Standards for Multi-Family Housing</p> <p>2.2530 – Streamline Incentivize Lot Consolidation</p> <p>2.30 – Explore Housing Opportunities in the RCAA</p> <p>4.02 – Agricultural Worker Housing Workplan</p>
<p>c. Accelerate affordable housing development by leveraging County resources, including geographic information mapping tools, and others to identify, prioritize, and develop publicly owned sites that are suitable for development with an emphasis on parcels in high opportunity areas.</p>	<p>1.07 – County-Led Housing Development</p> <p>1.08 – Joint Development Memorandum of Understanding (MOU)</p> <p>2.01 – Housing Suitability and Prioritization Tool for County-Owned Properties</p> <p>2.078 – Housing Adjacent to Transit</p> <p>2.249 – Apply for Pro-Housing Designation</p>
<p>d. Support and provide technical assistance to Santa Clara County cities to help expand inclusionary housing and commercial linkage fee policies for development of affordable housing.</p>	<p>1.10 – Santa Clara County CDBG and Housing Coordinators’ Convenings</p> <p>2.089 – Santa Clara County Association of Planning Officials</p>
<p>e. Facilitate the production of farmworker housing through the actions outlined in the 2018 Santa Clara Valley Agricultural Plan, including through grant funding opportunities.</p>	<p>1.29 – Farmworker Affordable Homeownership and Farmworker Labor Housing Pilot Program.</p> <p>2.045 – Assess Farmworker Housing Needs and Collaborate with Other Jurisdictions</p> <p>2.145 – Expanded Streamlining of Agricultural Employee Housing</p> <p>4.02 – Agricultural Worker Housing Workplan</p>

<p>f. Collaborate with cities to apply for and secure funding to implement plans to increase rental and ownership housing that is affordable for low-income households and assist persons who are experiencing homelessness.</p>	<p>1.04 – Empower Homebuyers SCC 1.06 – Below Market Rate Partnership Program 2.249 – Apply for Pro-Housing Designation</p>
<p>g. Help community-based organizations form or increase their activities as Community Development Corporations, with the primary goal of increasing affordable housing.</p>	<p>1.32 – Community Development Corporations <u>Grant Program</u></p>
<p>II. Reduce zoning and land use barriers to affordable housing development.</p>	
<p>a. Provide support to cities considering zoning changes to County-owned parcels in high opportunity areas to foster the development of affordable housing.</p>	<p>1.10 – Santa Clara County CDBG and Housing Coordinators’ Convenings 1.08 – Joint Development Memorandum of Understanding (MOU)</p>
<p>III. Protect tenants from displacement by increasing tenant protection and housing preservation strategies and access to resources before and during eviction proceeding.</p>	
<p>a. Explore expanding funding for tenants in landlord-tenant proceedings.</p>	<p>1.19 – Eviction Diversion Program 4.01 – Dispute Resolution Program</p>
<p>b. Support education for tenants, landlords, and other housing providers regarding tenants’ rights laws.</p>	<p>1.14 – Santa Clara Fair Housing Consortium 1.18 – Tenant/Landlord Dispute Mediation Services 4.01 – Dispute Resolution Program</p>

<p>c. Facilitate discussion of tenant protection strategies among cities.</p>	<p>1.10 – Santa Clara County CDBG and Housing Coordinators Convenings 4.01 – Dispute Resolution Program</p>
<p>d. Track and collaborate to preserve affordable housing developments with expiring subsidy contracts countywide.</p>	<p>1.30 – Asset Management Portfolio Expansion</p>
<p>e. Collaborate with Santa Clara County Superior Court and other partners to facilitate access to resources for vulnerable tenants engaged in eviction proceedings.</p>	<p>1.19 – Eviction Diversion Program 4.01 – Dispute Resolution Program</p>
<p>IV. Increase access to opportunity for residents of historically disinvested low-income communities.</p>	
<p>a. Increase the number of free public transit passes and other transportation options for people who are unhoused to access services.</p>	<p>1.33 – Expand Access to UPLIFT Program</p>
<p>b. Study increasing access to services in South County.</p>	<p>4.02 – Agricultural Worker Housing Workplan</p>
<p>V. Promote racial equity in homeless services and permanent housing supportive services.</p>	
<p>a. Provide demographic data, including race and ethnicity, in all reports on homelessness to highlight and address inequities.</p>	<p>1.24 – Community Plan to End Homelessness</p>

<p>b. Provide trauma-informed care and racial equity/anti-racism training, as well as training on providing services that are accessible to persons with limited English proficiency and to persons with disabilities, to all staff working with people experiencing homelessness.</p>	<p>1.24 – Community Plan to End Homelessness</p>
<p>c. Align racial equity work in the homelessness sector with other racial equity initiatives in Santa Clara County.</p>	<p>1.24 – Community Plan to End Homelessness</p>
<p>VI. Continue support for fair housing enforcement, education, and outreach.</p>	
	<p>1.14 – Housing Assistance Program 2.089 – Santa Clara County Association of Planning Officials 2.178 – Training and Support to Homeowners Aging in Place 2.238 – Tracking Housing Conditions 4.02 – Agricultural Worker Housing Workplan</p>

How to Use the Housing Element Update

A Housing Element is a planning document required by California state law as part of the local government's General Plan. The Housing Element is intended to address the current and future housing needs of a community, including the development, preservation, and improvement of housing for all income levels.

The California Department of Housing and Community Development (HCD) sets forth specific requirements for the Housing Element, including an assessment of housing needs, identification of sites suitable for housing development, and policies to promote affordable housing. The Housing Element must be updated every eight years to reflect changing community needs and to ensure that the local government is meeting its goals for housing production.

The Housing Element plays a critical role in California's efforts to address its housing crisis by providing solutions to affordability and quality in housing. By requiring local governments to plan for housing growth and development, the Housing Element helps ensure that California's communities can provide a range of housing options for residents at all income levels.

The 2023-2031 update to the County of Santa Clara Housing Element is divided into the following chapters:

Chapter 1: Overview of Housing Element Update 2023-2031

Chapter 2: Housing Needs and Production

Chapter 3: Fifth Cycle Performance Review and Sixth Cycle Housing Strategies and Policies

Chapter 4: County Housing Strategies, Policies, and Programs

How the Housing Element is used will vary greatly based on the user. This section gives some general suggestions based on different users. Please also review the Frequently Asked Questions section, for general questions about the Housing Element.

County Officials

As an elected or appointed official, you have a duty to oversee the development, preservation, and improvement of housing for members of your community. This includes future members of the community and those of varying income levels, abilities, ages, and backgrounds.

Professional staff employed by the County will also need to be familiar with the Housing Element to implement the goals, strategies, policies, and programs it contains.

The Housing Element contains goals and policies to guide you in your work to ensure that these goals are met while still allowing for an appropriate level of local control. Some of the key sections County officials should be familiar with include:

- **Chapter 2:** [2.04b Development Capacity Analysis](#).
- **Chapter 3:** [3.05 Sixth Cycle Housing-Related Strategies and Policies](#)
- **Chapter 4:** [County Housing Strategies, Policies, and Programs](#).

Homeowners

As a current or future homeowner, you may want to know how the Housing Element impacts you and your housing choices. The Housing Element contains information about housing-related programs for both first-time home buyers as well as current homeowners.

For those individuals looking to become first-time home buyers, the County has several programs that may be of assistance, including:

- **Chapter 4:** [Program 1.02 - Limited Equity Housing Cooperative Projects \(LEHCs\)](#).
- **Chapter 4:** [Program 1.04 - Empower Homebuyers SCC](#).
- **Chapter 4:** [Program 1.05 - Mortgage Credit Certificate \(MCC\) Program](#).
- **Chapter 4:** [Program 1.06 - Below Market Partnership Program](#).
- **Chapter 4:** [Program 1.31 – Minor Home Repair and Maintenance](#).

Existing homeowners can find several programs and policies that can assist them as well. Some of these programs may include additional information on how to add an Accessory Dwelling Unit (ADU) and/or Junior Accessory Dwelling Unit (JADU), programs to assist in home repair or maintenance, and information on how to keep your home safe from wildfires. Chapter 4 describes a number of these policies and programs including:

- **Chapter 4:** [Program 1.31 – Minor Home Repair and Maintenance](#).
- **Chapter 4:** [Program 2.06 - Streamline Accessory Dwelling Unit \(ADU\) Processing](#).
- **Chapter 4:** [Program 2.17 - Training and Support to Homeowners Aging in Place](#).

Please see Chapter 4 for the full list of programs and policies.

Landlords/Tenants

The County of Santa Clara has housing programs geared at assisting tenants as well as landlords, including:

- **Chapter 4:** [Program 1.18 - Tenant/Landlord Dispute Mediation Services](#).
- **Chapter 4:** [Program 1.19 - Eviction Diversion Program](#).

Please see Chapter 4 for the full list of programs and policies.

Developers

Coordination with housing developers, especially affordable housing developers, is crucial to seeing more housing built in Santa Clara County. Developers can use the Housing Element to learn more about the sites identified for additional housing development. They can also take advantage of some of the County's on-going efforts to free up additional land for residential development such as: Program 2.11 - Update Zoning Ordinance for Re-use of Non-Residential Buildings to Residential. Some sections of the Housing Element that may be of interest to developers include:

- **Chapter 2:** Housing Needs and Production
- **Chapter 4:** County Housing Strategies, Policies, and Programs

Affordable Housing Advocates

The provision of affordable housing is critical for the continued vitality of the Bay Area. The County of Santa Clara has partnered with affordable housing developers in the past and will continue to provide support through a number of programs and funding

mechanisms. To learn more about past projects, as well as future opportunities, please read the following sections:

- **Chapter 2:** [2.04b Development Capacity Analysis](#).
- **Chapter 3:** [3.03 Review of County's Investment in Countywide Housing Efforts During Fifth Cycle and Beyond](#).
- **Chapter 3:** [3.05 Sixth Cycle Housing-Related Strategies and Policies](#).
- **Chapter 4:** [County Housing Strategies, Policies, and Programs](#).

Special Housing Needs

Part of the role of the Housing Element is to plan for a variety of housing types for a wide variety of individuals and circumstances. This includes looking at situations such as housing for agricultural workers, Seniors, individuals with disabilities, and temporary housing. To learn more about these programs and policies please visit the following sections of the Housing Element:

- **Chapter 3:** [Sixth Cycle Housing-Related Strategies and Policies](#).
- **Chapter 4:** [County Housing Strategies, Policies, and Programs](#).

Members of the Community

Community engagement is a key part of the Housing Element update process. Throughout the process, the County of Santa Clara has reached out to community members like you for your input and feedback. Thank you for your participation in the Housing Element process and for your continued interest. To learn about how public input was incorporated into the Housing Element, please refer to the following section:

- **Chapter 1:** [Community Participation and Outreach](#).

Housing Element FAQ

What is the purpose of a Housing Element?

The purpose of a Housing Element is to address the current and future housing needs of a community, including the development, preservation, and improvement of housing for all income levels.

What are the requirements for a Housing Element?

The requirements for a Housing Element include an assessment of housing needs, identification of sites suitable for housing development, and policies to promote affordable housing. The Housing Element must be updated every eight years and approved by HCD.

The main categories or types of information and analysis required in a Housing Element update are:

- Identification and analysis of existing housing needs and projected housing needs;
- A statement of goals, objectives, strategies, and policies relating to the maintenance, preservation, improvement, and development of housing;
- An analysis of the capacity of the existing General Plan and Zoning Ordinance to meet projected needs; and,
- A summary of housing programs and a five-year schedule of implementation measures.

The 2023-2031 update serves four additional important purposes:

- To document local housing needs in the context of existing County land use and growth management policies;
- To affirmatively further fair housing throughout Santa Clara County;

- To explain important components of planning policies in Santa Clara County, which has urban growth management policies that guide urban housing development to occur within cities and Urban Service Areas (USAs) to preserve open space and promote rural land use densities outside cities; and
- To document the many other ways, in addition to the approval of residential development, by which the County contributes significantly to meeting local and countywide housing needs.
- Who is responsible for preparing a Housing Element?
- Local governments are responsible for preparing a Housing Element. In this case, the County of Santa Clara is responsible for the preparation and update of the Housing Element for the unincorporated areas of the county.

How often does a Housing Element need to be updated?

A Housing Element needs to be updated every eight years. HCD will release a detailed timeline of when Housing Elements need to be submitted to HCD and approved for compliance with State law.

How does a Housing Element address affordable housing?

A Housing Element addresses affordable housing through policies that promote the production of affordable housing, such as permit streamlining and zoning reform. It also acknowledges the use of public funds (such as Measure A) to help subsidize the development of affordable housing.

How does a Housing Element address the needs of different income levels?

A Housing Element addresses the needs of different income levels by identifying the housing needs of all income levels and developing policies to promote the production and preservation of housing for all income levels. The Regional Housing Needs Allocation (RHNA)

identifies housing production targets for a range of income brackets—ensuring that the County plan for housing at all income levels.

What role do public participation and community input play in the preparation of a Housing Element?

Public participation and community input are critical in the preparation of a Housing Element. Local governments are required to engage with the community in the development of the Housing Element, through public meetings and other outreach efforts, and the County of Santa Clara held numerous on-line and in-person events. Section 1.08 highlights the Community Engagement plan and all of the efforts that went into meeting with the community and integrating their feedback into the final draft of the Housing Element.

How are housing needs assessed in a Housing Element?

Housing needs are assessed in a Housing Element through an analysis of demographic data, population projections, and housing market data. In the case of the County of Santa Clara, the Association of Bay Area Governments (ABAG) developed the methodology to assess the housing need in the region, and then assigned a certain number of projected units to each member jurisdiction. This is called the Regional Housing Needs Allocation (RHNA).

RHNA methodology adopted by ABAG and approved by HCD intends to achieve five primary objectives: increase housing supply and mix of housing types; promote infill development and socioeconomic equity; promote improved intraregional jobs-housing relationship; balance disproportionate household income distributions; and affirmatively further fair housing.

What is the role of the state government in the review and approval of a Housing Element?

The state government reviews and approves Housing Elements to ensure they comply with state law and meet the state's housing goals. HCD provides guidance and technical assistance to local governments in the preparation of the Housing Element.

HCD Comments	Revisions made
<p>1a. Patterns and Trends in the Unincorporated County: The element now addresses some patterns and trends at a local (patterns within a community) and regional (community compared to the region) level for the unincorporated County, including explaining socio-economic characteristics at a geographic sub-area level. However, this analysis should also address households by income. For example, the analysis could utilize median household income ranges. In addition, the element indicates the presence of Racially Concentrated Areas of Affluence (RCAA) in the unincorporated County but should also include specific analysis of trends and characteristics and incorporate local data and knowledge and other relevant factors.</p>	<p>AFH 6 – Unincorporated County Analysis section X.6 updated to include a discussion of segregation by household income (starting on page 18) and a more granular discussion of R/ECAPs and RCAAs in the unincorporated areas (starting on page 30).</p>
<p>1b. Contributing Factors to Fair Housing Issues: Based on the outcomes of a complete analysis, the element should re-assess and prioritize contributing factors to fair housing issues and add or modify programs, as appropriate.</p>	<p>DPD staff and AFH consultants believe no change to contributing factors is necessary. New program 2.30 added to Chapter 4 (pages 289-291). HG1-10 and HG1(i) G added to Chapter 3 (page 179). HG4(i) C amended in Chapter 3 (page 182). Refer to below comment.</p>
<p>1c. Programs: As noted above, the element requires a complete analysis of fair housing conditions. Depending upon the results of that analysis, the County may need to revise or add programs. In addition, goals and actions must significantly seek to overcome contributing factors to fair housing issues. Furthermore, programs must include specific commitment, discrete timing, milestones, metrics or numeric targets and geographic targeting and must address; as appropriate, housing mobility enhancement, new housing choices and affordability in relatively higher opportunity or income areas, place-based strategies toward community revitalization, and displacement protection.</p> <p>In addition, while the element includes many potential meaningful actions to affirmatively further fair housing (AFFH), it should consider additional actions to address housing mobility actions and place-based strategies toward community</p>	<p>New program 2.30 added to Chapter 4 (pages 289-291). HG1-10 and HG1(i) G added to Chapter 3 (page 179). HG4(i) C amended in Chapter 3 (page 182). Program 2.30 and supporting policies/implementations are written to address how the County will consider actions to broaden access to the RCAAs.</p>

<p>revitalization. For example, of potential programs, please see HCDs AFFH guidance Memo (starting on page 72).</p>	
<p>2a. Suitability of Nonvacant Sites: The element now explains some redevelopment trends and discusses existing uses on nonvacant sites. However, the element should also relate recent redevelopment trends to identified sites. For example, the element mentions redevelopment of prior single-family uses and lists sites with existing single-family uses but should also address the comparability of the trends and identified sites (e.g., existing versus allowable units, age and condition of structure, number of stories). This analysis should specifically address Parkmoor/Burbank and Alum Rock/East Foothills Neighborhoods.</p>	<p>Tables and narrative added to Chapter 2. Parkmoor/Burbank edited (pages 84-90). Alum Rock/East Foothills edited (pages 96-101).</p>
<p>2b. Annexation: Program 4.03 was revised to include a general statement that the County will coordinate with the City of San José regarding access to service providers (e.g., infrastructure) if the developer chooses to submit an application to the County; however, the element should be revised with additional actions and specific commitment. For example, the County can coordinate land use and zoning, list anticipated schedule of completion, clarify permitting authority and at least commit to coordinating maximum allowable densities with the City of San José, including alternative actions (e.g., identify additional sites and rezoning) by a specified date if necessary.</p>	<p>Program 4.03 was updated (pages 296-301). Additional language added to provide a background to how annexations of urban islands occur in Santa Clara County, clarify that the County has permitting authority until annexation, and that the County will work with the cities to facilitate maximum densities at annexed HEU sites. Additional information was provided concerning infrastructure capacity and RHNA transfers. Timing also added for mid-cycle review actions.</p>
<p>2c. Stanford Specific Plan: While the program lists a schedule the County anticipates Stanford to submit an application and issue building permits, the County should clarify what alternative actions program 2.26 (mid cycle Review) will commit to (e.g., identify additional sites and rezoning) by a specified date.</p>	<p>Program 2.02 is updated (pages 251-255) to include language tying Stanford sites to the mid-cycle review, and to update timelines as discussed with Stanford.</p>
<p>2d. Sites Identified in Prior Planning Periods: As found in HCD prior review, to make prior identified sites available to accommodate lower-income households the</p>	<p>Zoning Ordinance amendments to be adopted by the BOS on 11/5/2024.</p>

<p>County must include a rezone program to comply with Government Code section 65583.2 subdivision (c).</p>	<p>Program 2.02 updated in Ch. 4 (page 251-255). Narrative updated in Ch. 2 (pages 69-70, 127).</p>
<p>3. The element contains several programs intended to meet the housing needs of farmworkers. However, Programs 1.29 (Farmworker Affordable Homeownership and Farmworker Housing Pilot), 2.04 (Assess Farmworker Housing Needs and Collaborate with Other Jurisdictions) and 4.02 (Agricultural Worker Housing Workplan) should include discrete timing (e.g., at least annually).</p>	<p>Programs 1.29 (page 244), 2.04 (page 258), and 4.02 (page 295) updated in Chapter 4 to include annual progress reviews.</p>
<p>4. While Program 2.06 (Streamline Accessory Dwelling Unit (ADU) Processing) now commits to monitor ADUs, it should also commit to act within a specified time (e.g., six months) if assumptions are not realized.</p>	<p>Program 2.06 updated (page 260) to add additional program objective related to potential incentives for ADU construction.</p>
<p>5a. [The County’s Zoning] Ordinance does not appear to meet statutory requirements. Specifically, the zoning does not appear to meet 20 percent affordability, minimum densities and residential only requirements pursuant to Government Code section 65583.2, subdivision (c), (h) and (i). The housing element is out of compliance and will remain out of compliance until the rezoning has been completed to meet all statutory requirements.</p>	<p>Zoning Ordinance amendments to be adopted by the BOS on 11/5/2024. Program 2.02 updated in Ch. 4 (page 251-255). Narrative updated in Ch. 2 (pages 69-70, 127).</p>
<p>5b. In addition, please be aware, the recent California appellate decision in <i>Martinez v. City of Clovis</i> found that while overlays can be used in a rezone, when the base zone allows residential development, both the base zone and the overlay zone must comply with the minimum density requirements of Government Code section 65583.2, subdivision (h). The County may need to adjust its rezoning strategy if the underlying zoning for sites that will be rezoned allows minimum densities less than 20 dwelling units per acre. <i>Martinez v. City of Clovis</i> (2023) 90 Cal.App.5th 193, 307 Cal.Rptr.3d 64.</p>	<p>Zoning Ordinance amendments to be adopted by the BOS on 11/5/2024. Program 2.02 updated in Ch. 4 (page 251-255). Narrative updated in Ch. 2 (pages 69-70, 127).</p>

August 27, 2024

Mikhail Leza, Deputy Director
Department of Planning and Development
County of Santa Clara
70 W Hedding Street
San Jose, CA 95110

Dear Mikhail Leza:

RE: County of Santa Clara's 6th Cycle (2023-2031) Revised Draft Housing Element

Thank you for submitting the County of Santa Clara's (County) revised draft housing element update received for review on June 28, 2024 along with revisions received on August 26, 2024. The revisions were posted and made available to the public for seven days prior to review. In addition, the California Department of Housing and Community Development (HCD) received Ordinance Number NS 1200.384 and correspondence dated August 14, 2024 from the County regarding rezoning to accommodate the regional housing need allocation (RHNA). Pursuant to Government Code section 65585, HCD is reporting the results of its review. Our review was facilitated by various conversation in February, April, and August, with you, Michael Meehan, Principal Planner, Jacqueline Onciano, Director, and several others from the housing element update team. In addition, HCD considered comments from Stanford University and City of San Jose, pursuant to Government Code section 65585, subdivision (c).

The revised draft housing element addresses most statutory requirements described in HCD's December 18, 2023 review; however, additional revisions are necessary to substantially comply with State Housing Element Law (Gov. Code, § 65580 et seq), as follows:

1. *Affirmatively further[ing] fair housing in accordance with Chapter 15 (commencing with Section 8899.50) of Division 1 of Title 2...shall include an assessment of fair housing in the jurisdiction. (Gov. Code, § 65583, subd. (c)(10)(A).)*

Promote and affirmatively further fair housing opportunities and promote housing throughout the community or communities for all persons regardless of race, religion, sex, marital status, ancestry, national origin, color, familial status, or disability, and other characteristics... (Gov. Code, § 65583, subd. (c)(5).)

Patterns and Trends in the Unincorporated County: The element now addresses some patterns and trends at a local (patterns within a community) and regional (community compared to the region) level for the unincorporated County, including explaining socio-economic characteristics at a geographic sub-area level. However, this analysis should also address households by income. For example, the analysis could utilize median household income ranges. In addition, the element indicates the presence of Racially Concentrated Areas of Affluence (RCAA) in the unincorporated County but should also include specific analysis of trends and characteristics and incorporate local data and knowledge and other relevant factors.

Contributing Factors to Fair Housing Issues: Based on the outcomes of a complete analysis, the element should re-assess and prioritize contributing factors to fair housing issues and add or modify programs, as appropriate.

Programs: As noted above, the element requires a complete analysis of fair housing conditions. Depending upon the results of that analysis, the County may need to revise or add programs. In addition, goals and actions must significantly seek to overcome contributing factors to fair housing issues. Furthermore, programs must include specific commitment, discrete timing, milestones, metrics or numeric targets and geographic targeting and must address; as appropriate, housing mobility enhancement, new housing choices and affordability in relatively higher opportunity or income areas, place-based strategies toward community revitalization, and displacement protection.

In addition, while the element includes many potential meaningful actions to affirmatively further fair housing (AFFH), it should consider additional actions to address housing mobility actions and place-based strategies toward community revitalization. For example, of potential programs, please see HCDs AFFH guidance Memo (starting on page 72). HCD will send additional examples under separate cover.

2. *An inventory of land suitable and available for residential development, including vacant sites and sites having realistic and demonstrated potential for redevelopment during the planning period to meet the locality's housing need for a designated income level, and an analysis of the relationship of zoning and public facilities and services to these sites. (Gov. Code, § 65583, subd. (a)(3).)*

Identify actions that will be taken to make sites available during the planning period with appropriate zoning and development standards and with services and facilities... (Gov. Code, § 65583, subd. (c)(1).)

Suitability of Nonvacant Sites: The element now explains some redevelopment trends and discusses existing uses on nonvacant sites. However, the element should also relate recent redevelopment trends to identified sites. For example, the element mentions redevelopment of prior single-family uses and lists sites

with existing single-family uses but should also address the comparability of the trends and identified sites (e.g., existing versus allowable units, age and condition of structure, number of stories). This analysis should specifically address Parkmoor/Burbank and Alum Rock/East Foothills Neighborhoods.

For your information, if the housing element relies upon nonvacant sites to accommodate more than 50 percent of the RHNA for lower-income households the housing element must demonstrate existing uses are not an impediment to additional residential development and will likely discontinue in the planning period. (Gov. Code, § 65583.2, subd. (g)(2).) Absent findings (e.g., adoption resolution) based on substantial evidence, the existing uses will be presumed to impede additional residential development and will not be utilized toward demonstrating adequate sites to accommodate the RHNA.

Electronic Sites Inventory: For your information, pursuant to Government Code section 65583.3, the County must submit an electronic sites inventory with its adopted housing element. The County must utilize standards, forms, and definitions adopted by HCD. Please see HCD's housing element webpage at <https://www.hcd.ca.gov/community-development/housing-element/index.shtml#element> for a copy of the form and instructions. The County can reach out to HCD at sitesinventory@hcd.ca.gov for technical assistance.

Programs: As noted above, the element does not contain a complete site inventory and analysis. Based on the results of a complete site inventory and analysis, County may need to add or revise programs to address a shortfall of sites or zoning available to encourage a variety of housing types. In addition, the element should be revised as follows:

- *Annexation:* Program 4.03 was revised to include a general statement that the County will coordinate with the City of San Jose regarding access to service providers (e.g., infrastructure) if the developer chooses to submit an application to the County; however, the element should be revised with additional actions and specific commitment. For example, the County can coordinate land use and zoning, list anticipated schedule of completion, clarify permitting authority and at least commit to coordinating maximum allowable densities with the City of San Jose, including alternative actions (e.g., identify additional sites and rezoning) by a specified date if necessary.
- *Stanford Specific Plan:* While the program lists a schedule the County anticipates Stanford to submit an application and issue building permits, the County should clarify what alternative actions program 2.26 (mid-cycle Review) will commit to (e.g., identify additional sites and rezoning) by a specified date.

- *Sites Identified in Prior Planning Periods:* As found in HCD prior review, to make prior identified sites available to accommodate lower-income households the County must include a rezone program to comply with Government Code 65583.2 subdivision (c).
3. *The Housing Element shall contain programs which assist in the development of adequate housing to meet the needs of extremely low-, very low-, low- and moderate-income households. (Gov. Code, § 65583, subd. (c)(2).)*

The element contains several programs intended to meet the housing needs of farmworkers. However, Programs 1.29 (Farmworker Affordable Homeownership and Farmworker Housing Pilot), 2.04 (Assess Farmworker Housing Needs and Collaborate with Other Jurisdictions) and 4.02 (Agricultural Worker Housing Workplan) should include discrete timing (e.g., at least annually).

4. *Develop a plan that incentivizes and promotes the creation of accessory dwelling units that can be offered at affordable rent... (Gov. Code, § 65583, subd. (c)(7).)*

While Program 2.06 (Streamline Accessory Dwelling Unit (ADU) Processing) now commits to monitor ADUs, it should also commit to act within a specified time (e.g., six months) if assumptions are not realized.

The element will meet the statutory requirements of State Housing Element Law once the element has been revised, adopted, submitted to, and reviewed by HCD to comply with the above requirements and rezones have been completed, as described below, pursuant to Government Code section 65585.

As a reminder, the County's 6th cycle housing element was due January 31, 2023. As of today, the County has not completed the housing element process for the 6th cycle. The County's 5th cycle housing element no longer satisfies statutory requirements. HCD encourages the County to revise the element as described above, adopt if needed, and submit to HCD to regain housing element compliance.

For your information, pursuant to Assembly Bill 1398 (Chapter 358, Statutes of 2021), a jurisdiction that failed to adopt a compliant housing element within one year from the statutory deadline (January 31, 2023) cannot be found in compliance until rezones to make prior identified sites available (e.g., Program 2.02 Planning for Housing Development in Unincorporated USAs and Stanford University Lands) or accommodate a shortfall of sites are completed pursuant to Government Code section 65583, subdivision (c)(1)(A) and Government Code section 65583.2, subdivision (c). HCD has reviewed Ordinance 1200.384 that was completed to address these statutory requirements. However, the Ordinance does not appear to meet statutory requirements. Specifically, the zoning does not appear to meet 20 percent affordability, minimum densities and residential only requirements pursuant to Government Code section

65583.2, subdivision (c), (h) and (i). The housing element is out of compliance and will remain out of compliance until the rezoning has been completed to meet all statutory requirements.

In addition, please be aware, the recent California appellate decision in *Martinez v. City of Clovis* found that while overlays can be used in a rezone, when the base zone allows residential development, both the base zone and the overlay zone must comply with the minimum density requirements of Government Code section 65583.2, subdivision (h). The County may need to adjust its rezoning strategy if the underlying zoning for sites that will be rezoned allows minimum densities less than 20 dwelling units per acre. *Martinez v. City of Clovis* (2023) 90 Cal.App.5th 193, 307 Cal.Rptr.3d 64.

Public participation in the development, adoption and implementation of the housing element is essential to effective housing planning. Throughout the housing element process, the County must continue to engage the community, including organizations that represent lower-income and special needs households, by making information regularly available while considering and incorporating comments where appropriate. Please be aware, any revisions to the element must be posted on the local government's website and to email a link to all individuals and organizations that have previously requested notices relating to the local government's housing element at least seven days before submitting to HCD.

For your information, some general plan element updates are triggered by housing element adoption. HCD reminds the County to consider timing provisions and welcomes the opportunity to provide assistance. For information, please see the Technical Advisories issued by the Governor's Office of Planning and Research at: <https://www.opr.ca.gov/planning/general-plan/guidelines.html>.

Several federal, state, and regional funding programs consider housing element compliance as an eligibility or ranking criteria. For example, the CalTrans Senate Bill (SB) 1 Sustainable Communities grant, the Affordable Housing and Sustainable Communities programs, and HCD's Permanent Local Housing Allocation consider housing element compliance and/or annual reporting requirements pursuant to Government Code section 65400. With a compliant housing element, the County will meet housing element requirements for these and other funding sources.

Mikhail Leza, Deputy Director

HCD appreciates the hard work and dedication of the housing element team. We are committed to assisting the County in addressing all statutory requirements of State Housing Element Law. If you have any questions or need additional technical assistance, please contact Jose.Jauregui@hcd.ca.gov.

Sincerely,
